Message | 121224 Aquifer Exemption Supplemental Package.pdf

Rich,

Please find attached to this email a pdf of the supplemental package that was sent to Jerry Salera of DOGGR's Sacramento office and George Robin of the EPA, Region 9 office.

In this pdf, you should find the information that you have requested. We provided them with a verbal description of the geologic formations as well as cross-sections of the area in question.

Please let us know if you need anything else.

Michelle

John

Thanks for providing this information. What the Water Board is interested in basically is how much vertical distance there is between the deepest water supply wells and the depth of the proposed injection. Also, are there geologic units in between that act as a barrier? If you could provide a very brief summary by email that would be greatly appreciated. Thanks

Rich

Michelle Ricker with SCS will get this info to Rich and the CDOGGR (if she hasn't already). We may not be able to get depth information to you for all the water wells. Michelle will do her best but apparently some of the information is confidential.

Ross had indicated that he forwarded this to you. Not knowing if you were going to send the data directly to Mr. Chandler, please send us the data as well or send us the data and we can forward on. Either works. Thank you.

Pat

I've reviewed your correspondence dated December 21, 2012 regarding ERG's application to inject. Could you please ask Tracer to provide total depth for each of the 17 fresh water wells they listed? Thank you.

Rich
