REVIEWER MD

Dear Mr. Bush:

Your application for enrollment is complete and above referenced site was enrolled in the Illinois Environmental Protection Agency (Illinois EPA) Site Remediation Program as of August 3, 2007. A partial advance payment in the amount of $ 500 for anticipated review and evaluation services was received by this office with your application.

Illinois Environmental Protection Agency is currently experiencing a significant backlog of projects within the Site Remediation Program. We currently have over 1000 projects under review for 18 project managers. This has resulted in review times greater than 90 days for many of the projects.

In order to speed up the review times, Illinois EPA can contract this review to one of three engineering contractors to review the required reports. The firms are Tetra Tech, Inc., Shaw Engineering, and Earth Tech. If time is of the essence, the Remediation Applicant may wish to pursue this alternative review. Illinois EPA's role is to oversee and direct the contractor's work and the production of the NFR letter.

If the Remediation Applicant chooses to elect to have one of our contractors review the reports. Please contact the Illinois EPA's project manager and we will obtain an estimate to review the report from the contractor prior to work being performed. This estimate generally takes about a week, although the RA can forego the need for an estimate if desired.

James Baldwin is the Illinois EPA project manager assigned to provide review and evaluation services for this project and is your primary Illinois EPA point of contact for this site. All routine project correspondence and documents should be directed to him to ensure the quickest possible response. He is available at (217) 524-7207 or by e-mail at James.Baldwin@illinois.gov.

Welcome to the Site Remediation Program. The Illinois EPA looks forward to completing this project with you and extends its full cooperation and assistance. Visit our web site at www.epa.state.il.us/land/cleanup-programs for additional information concerning the Site Remediation Program.

Sincerely,

Rick Lucas P.E., Manager
Voluntary Site Remediation Unit
