Mike,

Attached is a pdf of the revisions for the DCR applications for the proposed dam alterations for Ponds ABC, D, and E at Possum Point. This pdf incorporates the changes we discussed over the past several days.

Hi Ken,

Meant to call but didn't get to it. I will call you tomorrow morning.

I'm thinking we show all the trial surfaces. I know it will look like a solid mass of grey, but from what I understand that is kind of what he is looking for, a demonstration of the 'investigation'. If we show less it may not be what he is looking for and could cause delay. I don't think he will have a problem if we show too much.

Talk to you tomorrow.

Mike W

Mike,

Attached is one of the slope stability figures we include in the report, it shows 15 slip surfaces. I have included the same figure showing 250 slip surfaces. We can show up to several thousand slip surfaces if desired, but like your email indicated this will make for a VERY busy figure. Please call me when you get a few minutes and let's discuss.

Thanks

Hi Ken and John,

Just a couple of comments and questions.

Regarding the trial slip surfaces shown on the Pond D stability analysis.

- It isn't clear from the label, but I assume you are showing a sample of the most critical surfaces. I think Michael wanted to see all the trial surfaces. I know that makes for a very busy figure, so we might need to add an additional figure for each cross section.
- Please carry this comment through to the rapid drawdown calculations as well.

That should do it.

Please let me have a quick look at what you come up with for the figures before we go final.

Thanks,

Mike Winters

Mike,

Attached is a pdf of the DRAFT revisions for the DCR applications for the proposed dam alterations for Ponds ABC, D, and E at Possum Point. The changes were made with green text for easy identification. Also attached is a cover letter we drafted for your use when submitting to DCR.

Please review and let me know if we need to add anything else or make any edits.
