SUBJECT Water Distribution for Elyria + the Area

I described to Mr Kuzak the area outside the city limits of Elyria but within the 3 mile Radius of the site. He insisted that the City of Elyria is entirely served by the Elyria water system. He said some areas ~~were~~ outside the city + within the 3 mile Radius were served by the Elyria or Rural water system. I asked if he could estimate the number of people dependent solely on private well water in these areas that is, don't have an alternate water source. He estimated it to be less than 2% of the population in these areas. The Elyria Water System gets it's water from Lake Erie.
