1/6/95

Phone call from Terry Ayres IEPA 9:15a

Discussion on ~~G~~ Site G.

Terry informed me the state will be taking the stand that placing the cap on site G will be an interim action and not a final action. The State is looking to have ~~remove~~ the cap removed in the future and testing or removing landfill contents to prevent contributing to the groundwater problem.

Will have a conference call w/ Paul T. + rest of team to determine course of action.
