Hello all:

FYI: The attached maps illustrate the proposed Production Area No. 1 in UEC's Goliad Project. Please note the number and location of exploratory holes as identified by the representative of Daniel B. Stephens & Associates Inc. during a meeting with EPA staff early last year, and which he characterized as potential paths for inter-zonal crossflow points due to improper plugging. The GCGCD also provided a list illustrating the location of these wells as "Easting" and "Northing". Thought you might wish to have this information.
