See separate email on ESL values for EtO.

TX generally updates ESLs to whatever number the literature and requested input justifies. They are, of course aware of IRIS, but follow their own process and make their own determinations for their purposes.

Hi, Ruben.
Does TCEQ currently have a tox screening value for EtO? Do you know whether they are considering updating it to the IRIS value? (I tried looking it up in the ESL database, but failed---unless there is no long-term number in that database.)
Thanks.
Carol

Subject: TCEQ Toxicology News: We are requesting toxicity data & a new public comment period has begun

1. The Toxicology Division is requesting toxicity data for Ethylene Oxide (CAS 75-21-8)
2. A new public comment period has begun for 3 Proposed DSDs:
    - Ethylene Dibromide
    - Inorganic Arsenic Oral Slope Factor
    - Manganese and Inorganic Manganese Compounds
3. Three DSDs and Fact Sheets are now final:
    - Cobalt and Cobalt Compounds
    - Decane, All Isomers
    - Hexane, All Isomers

November 17, 2017 is the deadline to submit toxicity data and/or public comments. For information on how to submit comments or to view the DSDs and Fact Sheets, visit: https://www.tceq.texas.gov/toxicology and look for the "New" images.
