ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

MEMORANDUM

TO: Division File

DATE: 10-27-82

FROM: Ben Cecil Southern

☒ Information only

SUBJECT: General St. Clair Co. Cahokia / Dead Creek

☐ Response requested

On October 27, 1982 this writer visited the subject site, along with Mike O'Toole - USEPA Superfund Region II, for the purpose of inspecting the completed fence for final payment. Mr O'Toole was responsible for inspecting the completed fence to make sure it conforms to the contract specifications, after this determination is made only then could final payment be made. Upon arrival at the site, this writer met with Mr O'Toole and Ed Gentry - Granite City Fence. While walking on the east side, just north of the pond, it was apparent that someone had tried to steal portions of the fence. Two corner braces were missing, the barbed wire cut and the fabric cut from the fence posts. Except for this act of vandalism, the fence met the contractual specifications, and according to Mr O'Toole final payment will be made. While still present at the site crews from Granite City Fence were ~~[illegible]~~ repairing the damage. As of this visit, all work has been completed except for the top strand of barbed wire on portions of the western side. After leaving the site, this writer stopped at the Cahokia Police Department to report that vandalism had occurred to the fence, and to ask their assistance to control any future vandalism acts. Note - Granite City Fence has still not supplied a padlock per the contract - Ed Gentry said that a padlock will be supplied in a day or two.

FROM: [illegible] - Southern region

SUBJECT: General - St Clair Co - Cahokia/Dead Creek

☒ Information only
☐ Response requested

On August 16, 1982 operations started at the subject site to remove the existing snow fence so that the chain-link fence could be erected. Removal of the major portions of the fence were completed by the end of the week 8/20/82. Mayor Mike King of Cahokia was contacted about the availability of a temporary storage site for the snow fence, once it's taken down. Mayor King said to contact Bob Robinson (337-5810) at the municipal garage - for determining where to store the fence. On August 16 + 17, this writer along with Mike O'Toole USEPA Region 5 transported several sections of fencing to the garage, however it was discovered that additional help would be needed. This writer then contacted John Dhermy (875-0177) of I.D.O.T. to ask his assistance in moving the snow fence to the municipal garage. On August 23, 1982 a crew of laborers from I.D.O.T. transported the fence. Some small sections of fence and posts still remain on site, however these sections will be collected and transported to the garage, by this writer.

NOTE - wells G109 - G111 are damaged at or just below ground surface while G102 could not be found at all!

TO: Division File DATE: 10/29/82

FROM: Tom Powell - southern region

☒ Information only

SUBJECT: Canal St. Clair Co. Cahokia/Dead Creek

☐ Response requested

On October 28, 1982 this writer traveled to the subject site along with Doug Tolan and Ken Bosie of our Springfield office. Messrs. Tolan + Bosie came down to inspect the finished fence at Dead Creek as well as to make a determination how to transport the old sinour fence back to Springfield. Mr Tolan said that he would be in contact with Bob Robinson (618-337-5810) of the Village of Cahokia to set up times, dates, etc for the pick-up of the fence which is at present stored at the Cahokia Municipal garage.
