Subject: Eco-Cell presentation - Wed 11/30/77

At my request John Sundstrom has set up a visit by Belco Pollution Control Corporation to our plant. These people represent a British firm who have designed equipment for the removal of dissolved metals from effluent streams by electrochemical means.

We anticipate a slide presentation and expect to get together about 2:30 PM in the cafeteria. Either I or John Sundstrom will call you at that time to see if you wish to join us.

Those expected:

Michael Limbo - V.P. Sales

Dr. Sylvester Wong - Research

George Shaw - ?

The methods seems too expensive for our practical use
