Hi Lynn. OWOW staff (i.e., Tim Landers) have completed their review of OW equities relevant to EPA Region 9 FOIA 2018-008976. In this FOIA, Fennemore Craig Attorneys, representing Rosemont Copper Company, requested EPA records from November 2016 - present relating to Rosemont's proposed open pit mine in Arizona.

OW equities identified by Region 9 for OWOW review entailed approximately 50 emails. These emails discuss and include publicly-available technical comments that EPA Region 9 prepared on the project, discuss and include responses to the Region's technical comments prepared by the company, discuss and include informational briefing materials on the project that OWOW prepared for OW, and discuss and include materials prepared in anticipation of a meeting between EPA and the company. In our review, OWOW agreed with the disposition proposed by Region 9 on these OW equities, and did not identify issues of concern.

I have reached out to the Region and they will be providing you access shortly to OW equities in the event you would like to spot-check. Please let me know when you have completed your review, and I will circle back with Region 9 if appropriate. My understanding is the Region's current target for response is February 23.

Do not hesitate to reach out with any questions, and thanks for your help.
