Aroclor Control - December Report 1969

MATTER HAS BEEN REDACTED FROM THIS DOCUMENT

MATTER HAS BEEN REDACTED FROM THIS DOCUMENT

Control Program

1. A plan has been developed by TSD and production to identify and measure all possible sources of aroclor losses in dept. 246. Minutes of the above plan discussion will be forwarded when typed.

2. A memo will be distributed to all supervisors re-emphasizing the importance of total plant control of aroclor losses.

CER 098479

3. The overflow wier system in dept. 246 trench sewers is trapping aroclor. The quantity has not been determined due to problems in removing the viscous material from the trench.
