157097

L.V.B
8/1/85.

August 1, 1985

Need to define sewer flow plan.
Need to firm up and get agreement on dates for various stages of construction.

D. Knoll (Flescher-Seeger)..
Rich (Flescher-Seeger)..
C Fotz (Alberici).
W. Koester (Alberici).

Concrete contours cannot be followed.
Fill in of indents, etc. cannot be maintaining the 1/4" to 3/8" thick membrane.
1) NEED TO RESOLVE thickness application problem, and pinhole checks.

Certification received on tar from Pennwalt.

Resolve alternative on T2.

2) Sewer Entry Requirements - every box we know we are going into we need to make up and document from now until the end of the job. CARRICCO.

3) Resolve complete plan in detail for T-3 (right now we're guessing) (Scope of work and dates for all parties needed).
