Thanks for the outreach, Cynthia. Steve is the RPM for the DOT Kapalama Container Yard project that the transformer release is a part of, and I am copying him on your email. I have spoken to Dennis and understand this will be a straightforward dig and haul to remove PCBs from the spill. As such, we will likely just take a look at the documents, but don't see a need to get deeply involved. Steve will be in touch with you.

Hello Paul,

I hope all is well. I wanted to keep you in the loop with the latest on the PCB transformer release at the Kapalama site. I think you mentioned that Steve Mau is the PM for this site. If you or Steve are interested in overseeing sampling activities at this site, attached is the workplan, and I can get you in touch with Dennis to coordinate schedules. It looks like they are starting today (sorry for the late notice, I have been swamped), and it may take a couple days to finish up.

Thanks,
Cynthia

Cynthia

Please find the Work Plan and Sampling Analysis Plan for the Kapalama Military Reservation transformer release at Building 905. Please note that we are still awaiting signatures from the State DOT which will take a few more days and also from the contractor. I thought we could at least get a copy to you for review in the meantime and submit signature pages as we get them. Hopefully this acceptable.

I think Myounghee should be on call regarding disposal so maybe we can schedule that for next

week.

We look forward to your review and response.

Ok, sounds good. I am around today and tomorrow. I will be out of the office Thursday and Friday of this week (April 2nd and 3rd). I should be around all next week if this week doesn't work out for you. Please let me know what day works best for you. Thanks!

Cynthia

I just provided last set of revisions to DOT yesterday and they are working on signature form Director. You should have shortly.

I call regarding disposal application would be good.

Hello Dennis,

I hope all is well. When you get a chance, can you please provide me with a status update of the PCB activities and the risk-based disposal application submittal for the Kapalama site? Also, if you still have concerns or need any additional clarification regarding the disposal issue with MIS, we can certainly set up a conference call. Please let me know if this is something you're interested in discussing further.

Thanks,
Cynthia
