Hi everyone. I know there is some confusion about what documents are being drafted/shared on this topic. I just heard back from R3 and want to provide some clarification. My intention is to share a draft options paper (preliminary and without management approval) with those copied on this email by COB today. Then, as Lori, Clarke, Deb and I discussed yesterday evening, we can review/revise the draft options Monday during the call we have scheduled at 11 am EST among R3, R5, OECA and OGC staff. R5 management briefings are targeted to occur Tuesday, unless I receive a request from my management for a briefing earlier than that (not expected). I understand that Karen Johnson is providing data (not options) to her management today that identifies water supplies in R3 (including those near the DuPont Washington Works facility) with PFOA and PFOS contamination above 100 ppt. I hope this clarifies that there is one options paper in the works, which I am drafting now, and we are all working on this collectively. Thanks-Jacquie

Thanks, Lori. ORC in R5 has not received instruction to stop working on an options paper, so I am continuing to work on one now. Karen, if you are working on an options paper as well, I'd like to attempt to coordinate so we are not duplicating effort. FYI, Karen's voicemail indicates she is out of the office today. Thanks-Jacquie

A little more info: apparently (per our Water DD), our RA spoke to R5 RA yesterday, and that is where the discussion re options paper was agreed to. So, Jacquie and Debra -- you might want to verify that. When I hear things third- or fourth-hand, I just want to make sure that they are accurate.

The other direction is that Karen Johnson in R5 is supposed to be drafting the options paper, but I can check in with her if you want unless you have the same information.
