My name is [redacted] I am the President of Summer Toxic a environmentalist in Cincinnati Ohio, who have learned and study a community in Cincinnati Ohio zip-code 45232 Winton Hills. To whom this may concern, I am writing a request for my community. This is a low-income project and the citizens are surrounded by large landfills consisted of dead animals –garbage – waste is health hazard. Large Chemical plants consisting of chemicals – toxics –particulate matter –methane –Smog and asbestos All this in one area makes this community a health hazard. There has been nothing but health and death problems in this environment since the early 1960,s Mothers, childrens, babies and senior citizens have been affected. There is majority of black people. This is a racial issue and the citizens are still suffering. In resolving this issue a request for relocation –compensation due to the suffering and pain, the hardship and problems that have been ignored. A investigation is needed. The community has the right to speak on their family, friends and loved ones that have been affected . This is a hardship problem and needs to be dealt with. A two day awareness program concerning environmental justice and in case of a emergency, different health and death affects. I would like to request the U.C – Xavier – City Manager + councils – EPA local and Federal – OKI – NIEHS – ATSDR approve and sponsor a environmental awareness Town meeting for 2X days in Cinti Ohio. date-time last week of May, 2010

Please contact me [redacted]
