Re: Request for Information Pursuant to Section 104 of CERCLA for the Downers Grove Groundwater Site in Downers Grove, DuPage County, Illinois

Dear Ms. Ropski:

Enclosed herewith is Lovejoy, Inc.'s preliminary response to the Request for Information Pursuant to Section 104 of CERCLA in the above-referenced matter. Pursuant to my letter of February 4, 2002, and our subsequent conversation, Lovejoy has endeavored to provide as complete a response as possible within the allotted time. However, you agreed that any information that could not be obtained within the allotted time could be submitted in a subsequent response.

Lovejoy has operated at three buildings within the Site at various times throughout its history. One of those buildings housed Lovejoy Electronics, a company that was sold in 1987. No current employees of the company have knowledge of that business. Lovejoy is, however, attempting to ascertain information responsive to your request regarding that property. The current response, however, does not contain any information with regard to Lovejoy Electronics.

If you have any questions, please give me a call.

Very truly yours,

Bradley S. Rochlen

County, Illinois	)	42 U.S.C. § 9604
	)	

ANSWERS OF LOVEJOY, INC.
TO REQUEST FOR INFORMATION

Lovejoy, Inc. ("Lovejoy"), by its attorneys, Katten Muchin Zavis, states for its Objections and Responses to the Request for Information Pursuant to Section 104 of CERCLA for the Downers Grove Groundwater Site in Downers Grove, DuPage County, Illinois (the "Requests"), as follows:

GENERAL OBJECTIONS

1. Lovejoy objects to the Requests on the grounds that the legal definition of the Site is vague, ambiguous and does not form an enclosed boundary, making the determination of the Site impossible to know.

2. The time allotted to respond to the Requests did not provide adequate time to prepare a complete response. Therefore, this response is preliminary and will require future supplementation.

Without waiving these objections, and incorporating them into each and every answer below, Lovejoy responds to the Requests as follows:

REQUESTS

Request No. 1

Identify all persons consulted in the preparation of the answers to these Information Requests.

Answer No. 1

1. Edward Zdanowski
   Quality Manager
   Lovejoy, Inc.
   2655 Wisconsin Avenue
   Downers Grove, Illinois 60515
   630-852-0500

2. Tom Brininger
   Vice President - Finance
   Lovejoy, Inc.
   2655 Wisconsin Avenue
   Downers Grove, Illinois 60515
   630-852-0500

3. Bella Bartelt
   Customer Service Representative
   Lovejoy, Inc.
   2655 Wisconsin Avenue
   Downers Grove, Illinois 60515
   630-852-0500

4. Mark Caccipio
   Supervisor, Gear Division
   Lovejoy, Inc.
   2655 Wisconsin Avenue
   Downers Grove, Illinois 60515
   630-852-0500

5. Kevin Remack
   Product Manager, Gear Division
   Lovejoy, Inc.
   2655 Wisconsin Avenue
   Downers Grove, Illinois 60515

630-852-0500

6 Larry Sloane
Supervisor, Distribution Department
Lovejoy, Inc.
2655 Wisconsin Avenue
Downers Grove, Illinois 60515
630-852-0500

Further investigation is ongoing.

Request No. 2

Identify all documents consulted, examined, or referred to in the preparation of the answers to these Requests, and provide copies of all such documents.

Answer No. 2

All documents consulted, examined, or referred to in preparation of these documents that fall within the scope of the Requests are provided as Exhibits hereto. Further investigation is ongoing.

Request No. 3

If you have any reason to believe that there may be persons able to provide a more detailed or complete response to any Information Request or who may be able to provide additional responsive documents, identify such persons.

Answer No. 3

Currently unknown. Further investigation is ongoing.

Request No. 4

Identify all persons having knowledge or information about the generation, transportation, treatment, disposal, or other handling of hazardous substances by you, your contractors, or by prior owners and/operators.

Answer No. 4

The information responsive to Question 4 is currently unknown prior to 1991. The employees associated with that time period are no longer with the company. Since 1991, the persons having such knowledge are:

1. Edward Zdanoski

2. Sam Erwin

Waste Disposal Broker
Environmental Waste Services, Inc.
43 W. 540 Main Street Road, Unit C
Elburn, Illinois 60119
630-365-1000

Further investigation is ongoing.

Request No. 5

Between 1950 and the present, did you ever use, purchase, store, treat, dispose, transport or otherwise handle any hazardous substances or materials (including chlorinated solvents) at any location in the Ellsworth Industrial Park? If the answer to the preceding question is anything but an unqualified "no", identify:

a) The chemical composition, characteristics, physical state (e.g., solid, liquid) of each hazardous substance;

b) Who supplied you with such hazardous substances;

c) How such hazardous substances were used, purchased, generated, stored, treated, transported, disposed, or otherwise handled by you;

d) When such hazardous substances were used, purchased, generated, stored, treated, transported, disposed, or otherwise handled by you;

e) Where such hazardous substances were used, purchased, generated, stored, treated, disposed, or otherwise handled by you;

f) The quality of such hazardous substances used, purchased, generated, stored, treated, transported, disposed or otherwise handled by you.

Answer No. 5

Materials were used at the 2655 Wisconsin Avenue Building in the following processes:

1. Black Oxide tanks 1, 3, 4, 6
2. East Wash dip tank
3. West Wash dip tank (See Exhibit 1)

Further, for a short period of time methylene chloride was used as a cleaning solvent. Small amounts of the chemical were placed on a towel used to clean parts and was totally consumed in the process. See Exhibit 2 for the MSDS. Further investigation is ongoing.

Request No. 6

Describe the nature of your activities or business at the Site between 1950 and the present, with respect to purchasing, receiving, processing, storing, treating, disposing, or otherwise handling hazardous substances or materials at the Site.

Answer No. 6

Attached as Exhibits 3, 4,5, and 6 are documents responsive to Request No. 6. These include:

- "Pollution Incident Prevention Plan" – including Emergency Response Procedures for Wisconsin Avenue Facility, dated 11/16/1998;
- "Procedures for the Disposal of Solid Waste," prepared 7/10/1991;
- "Waste Disposal Instructions" prepared 1/8/1993 (with internal training log);
- "Handling of Non-Hazardous Special Waste" prepared 1/14/1993 (with internal training log);

- "Hazardous Waste Handling" prepared 1/15/1993 (with internal training log);
- Lovejoy Hazard Communication Plan" revised 10/18/1998;
- "Company Upgrades Blackening System to Improve Coupling Finish Quality" Modern Machine Shop, 1999.

Further investigation is ongoing.

Request No. 7

State the dates during which you owned, operated, or leased a portion of the Site, and provide copies of all documents evidencing or relating to such ownership, operation, or lease arrangement (e.g., deeds, leases, etc.).

Answer No. 7

Lovejoy leased three premises on the Site at various times.

Lovejoy, Inc.
2655 Wisconsin Avenue
Downers Grove, Illinois 60515

Lovejoy has operated at this address continuously since approximately 1971.

Lovejoy, Inc. Gear Division
2431 Curtis Street
Downers Grove, Illinois 60515

Lovejoy occupied this address for approximately three years beginning around 1994.

Lovejoy Electronics
5411 Walnut
Downers Grove, Illinois

Lovejoy operated out of this location for an unknown period of time ending in approximately 1985. Lovejoy currently has no information on this address and is investigating. When information is collected, this Response will be supplemented.

Request No. 8

Provide information about any facilities you have ever owned or operated at the Site, including but not limited to the following:

a) Property boundaries, including a written legal description;

b) Location of underground utilities (telephone, electrical, sewer, water main, etc.) And underground tanks;

c) Surface structures (e.g., buildings, tanks, etc.);

d) Ground water wells, including drilling logs;

e) Storm water drainage system, and sanitary sewer system, past and present, including septic tank(s), subsurface disposal field(s), and other underground structures; and where, when and how such systems are emptied;

f) Any and all additions, demolitions, or changes of any kind on, under, or about the Site, to its physical structures, or to the property itself (e.g., excavation work); and any planned additions, demolitions, or other changes to the Site; and

g) All maps and drawings of the Site in your possession.

Answer No. 8

Lovejoy has no documentation regarding Request No. 8. All information is based upon the best recollection of the company. The front and back parking lots of the 2655 Wisconsin Avenue property have been repaved and expanded. Drainless machine pits were installed inside the building. A storage shed was constructed, along with an outdoor basketball court and volleyball pit. Also, a pole barn structure was constructed at the south east side of the building. It included

a concrete pad and storm water drain to divert water to the storm drain. Further investigation is ongoing.

Request No. 9

> Identify all past and present solid waste units (e.g., waste piles, landfills, surface impoundments, waste lagoons, waste ponds or pits, tanks, container storage areas, etc.) at any facility you owned or operated at the Site. For each and such solid waste unit identified, provide the following information:
>
> a) A map showing the unit's boundaries and the location of all known solid waste units whether currently in operation or not. This map should be drawn to scale, if possible, and clearly indicate the location and size of all past and present units;
>
> b) The type of unit (e.g., storage area, landfill, waste pile, etc.), and the dimensions of the unit;
>
> c) The dates that the unit was in use;
>
> d) The purpose and past usage (e.g., storage, spill containment, etc.);
>
> e) The quantity and types of materials (hazardous substances and any other chemicals) located in each unit; and
>
> f) The construction (materials, composition), volume, size, dates of cleaning, and condition of each unit.
>
> g) If unit is no longer in use, how was such unit closed and what actions were taken to prevent or address potential or actual releases of waste constituents from the unit.

Answer No. 9

At no time was any solid waste stored outside of the building; Lovejoy has used no waste piles, landfills, surface impoundments, waste lagoons, waste ponds, waste pits, or tanks. Hazardous waste from the black oxide line was collected in 55-gallon steel drums and placed on containment pallets in a designated waste storage area within the building. The waste storage

area was located next to the evaporator along the east wall of the Wisconsin Avenue building. It had a holding capacity of approximately 20 barrels. In 1998, hazardous waste generation at Lovejoy was significantly reduced. Currently, hazardous waste is collected in 55-gallon steel drums, on a containment pallet. When a drum reaches capacity, pick-up of the drum is arranged from the loading dock to the transporter's truck. Further investigation is ongoing.

Request No. 10

Identify the prior owners of any property you owned or operated at the Site from 1950 to the present. For each prior owner, further identify:

a) The dates of ownership;

b) All evidence showing that they controlled access to the Site; and

c) All evidence that a hazardous substance, pollutant, or contaminant, was released or threatened to be released at the Site during the period that they owned the Site.

Answer No. 10

Currently unknown. Lovejoy is investigating this Request further.

Request No. 11

Identify the prior operators, including lessors, of any property you owned or operated at the Site from 1950 through the present. For each such operator, further identify:

a) The dates of operation;

b) The nature of prior operations at the Site;

c) All evidence that they controlled access to the Site; and

d) All evidence that a hazardous substance, pollutant, or contaminant was released or threatened to be released at or from the Site and/or its solid waste units during the period that they were operating the Site.

Answer No. 11

Currently unknown, Lovejoy is investigating this Request further.

Request No. 12

Provide copies of all local, state, and federal environmental permits ever granted for your Facility or Facilities in the Ellsworth Industrial Park or any part thereof (e.g., RCRA permits, NPDES permits, etc.).

Answer No. 12

See Exhibit 7 for responsive documents. Further investigation is ongoing.

Request No. 13

Did your Facility or Facilities in the Ellswroth Industrial Park ever have "interim status" under RCRA? If so, and the Facility does not currently have interim status, describe the circumstances under which the Facility lost interim status.

Answer No. 13

Lovejoy denies any knowledge of ever having "interim status" under RCRA. Further investigation is ongoing.

Request No. 14

Did your Facility or Facilities in the Ellsworth Industrial Park ever file a notification of hazardous waste activity under RCRA? If so, provide a copy of such notification.

Answer No. 14

See Exhibit 7 for responsive documents. Further investigation is ongoing.

Request No. 15

Provide all reports, information, or data related to soil, water (ground and surface), or air quality and geology/hydrogeology at and about the Site. Provide copies of all documents containing such data and information, including both past and current aerial photographs as well as documents containing analysis or interpretation of such data.

Answer No. 15

Attached as Exhibit 8 is a Phase I environmental study performed by Mostardi Platt. Further investigation is ongoing.

Request No. 16

Identify all leaks, spills, or releases into the environment of any hazardous substances, pollutants, or contaminants (including chlorinated solvents) that have occurred at or from your Facility or Facilities at the Site. In addition, identify:

a) When such releases occurred;

b) How the releases occurred;

c) The amount of each hazardous substances, pollutants, or contaminants so released;

d) Where such releases occurred;

e) Any and all activities undertaken in response to each such release or threatened release, including the notification of any agencies or governmental units about the release;

f) Any and all investigations of the circumstances, nature, extent or location of each release or threatened release including, the results of any soil, water (ground and surface), or air testing undertaken; and

g) All persons with information relating to these releases.

Answer No. 16

Lovejoy is unaware of any spill, leak or release into the environment of hazardous substances, pollutants or contaminants (including chlorinated solvents) at any of the addresses of Lovejoy, Inc. Further investigation is ongoing.

Request No. 17

Was there ever a spill, leak, release or discharge of hazardous materials (including chlorinated solvents) into any subsurface disposal system or floor drain inside or under any building you own or operate at the Site? If the answer to the preceding question is anything but an unqualified "no, identify:

a) Where the disposal system or floor drains were located;

b) When the disposal system or floor drains were installed;

c) Whether the disposal system or floor drains were connected to pipes;

d) Where such pipes were located and emptied;

e) When such pipes were installed;

f) How and when such pipes were replaced, or repaired; and

g) Whether such pipes ever leaded or in any way released hazardous materials into the environment.

Provide copies of all documents related to these leaks, spills or released or discharges.

Answer No. 17

Lovejoy is unaware of any spill, leak release or discharge of hazardous materials (including chlorinated solvents) into any subsurface disposal system or floor drain inside or under any building owned or operated at the Site. Further investigation is ongoing.

Request No. 18

Did any leaks, spills, or releases of hazardous materials (including chlorinated solvents) occur at any Facility you own or operate at the Site when such materials were being:

a) Delivered by a vendor;

b) Stored (e.g., in any tanks, drums, or barrels);

c) Transported or transferred (e.g., to or from any tanks, drums, barrels, or recovery units); or

d) Treated.

If so, provide copies of all documents relating to these leaks, spills or releases.

Answer No. 18

Lovejoy in unaware of any leaks, spills or releases of any hazardous materials (including chlorinated solvents) at any facility owned or operated at the Site. Further investigation is ongoing.

Request No. 19

Has soil ever been excavated or removed from the Site? Unless the answer to the preceding question is anything besides an unequivocal "no," identify:

a) Amount of soil excavated;

b) Location of excavation;

c) Manner and place of disposal and/or storage of excavated soil;

d) dates of soil excavation;

e) Identity of persons who excavated or removed the soil;

f) Reason for soil excavation;

g) Whether the excavation or removal soil contained hazardous materials and why the soil contained such materials;

h) All analyses or tests and results of analyses of the soil that was removed from the Site;

i) All persons, including contractors, with information about (a) through (h) of this request.

If so, provide copies of all documents relating to these excavations or removals.

Answer No. 19

At the 2655 Wisconsin Avenue building, various excavations have been undertaken. No documentation is available, and all answers are based upon personal recollection. Outside of the building, the parking lots were repaved and expanded within the last two years, but no material was removed from the property. Also outside, Lovejoy has installed a basketball and volleyball court.

Within the building, various projects have required small amounts of excavation.

Various pits were built to create room for equipment. These pits were excavated and paved over. Further investigation is ongoing.

Request No. 20

> Provide records from 1950 through the present showing how much chlorinated solvent/cleaner or other chlorinated materials were purchased for any Facility or Facilities you own or operate at the Site. Provide records from 1950 through the present, which show how much chlorinated solve/cleaner or other chlorinated materials were sent from the Facility or Facilities you own or operate at the Site to be recycled or disposed. Provide the manifests showing such recycling or disposal.

Answer No. 20

For a short period of time methylene chloride was used as a cleaning solvent. Small amounts of the chemical were placed on a towel used to clean parts and was totally consumed in the process. See Exhibit 2 for the MSDS. Further investigation is ongoing.

Request No. 21

> Provide all records regarding the disposal of solid waste from the Facility or Facilities you own or operate at the Site from 1950 to present.

CERTIFICATE OF SERVICE

I, Bradley S. Rochlen, an attorney, certify that I served a copy of the foregoing Answers of Lovejoy, Inc. to Request for Information, by causing a true and correct copy of same to be served upon:

SECTION I - PRODUCT IDENTIFICATION

CHEMICAL NAME: DICHLOROMETHANE
TRADE NAME: METHYLENE CHLORIDE
CHEMICAL FORMULA: CH2C12
DOT IDENTIFICATION NO.: UN1593
CAS NUMBER: 75-09-2
DATE OF PREPARATION: 10-A-88

SECTION II - PRODUCT AND COMPONENT DATA

CHEMICAL NAME	CAS NUMBER	% (APPROX.)	ACGIH TLV-TWA
DICHLOROMETHANE	75-09-2	100	50 PPM

THIS PRODUCT IS SUBJECT TO REPORTING REQUIREMENTS OF SARA 313 AND 40 CFR 372.

SECTION III - PHYSICAL DATA

APPEARANCE AND ODOR: CLEAR, COLORLESS LIQUID; MILDLY SWEET ODOR
BOILING POINT: 40.1 DEG.C (104 DEG. F)
VAPOR PRESSURE: 350 MM HG (20 DEG. C)
EVAPORATION RATE (ETHER=1): 0.7
SPECIFIC GRAVITY: 1.32 @ 25/25 DEG. C
VAPOR DENSITY (AIR=1): 2.9
PER CENT VOLATILE BY VOLUME: 100
SOLUBILITY IN WATER: 1.32 G/100G @ 25 DEG. C

SECTION IV - REACTIVITY DATA

STABILITY: STABLE
CONDITIONS TO AVOID: AVOID CONTACT WITH OPEN FLAME, ELECTRIC ARCS, OR OTHER HOT SURFACES WHICH CAN CAUSE THERMAL DECOMPOSITION.
INCOMPATIBILITY (MATERIALS TO AVOID): STRONG ALKALIES, OXYGEN, NITROGEN PEROXIDE, SODIUM, POTASSIUM, AND OTHER OXIDIZERS AND REACTIVE METALS.
HAZARDOUS DECOMPOSITION PRODUCTS: HYDROGEN CHLORIDE, PHOSGENE, CHLORINE.
HAZARDOUS POLYMERIZATION: WILL NOT OCCUR.

SECTION V - FIRE AND EXPLOSION HAZARD DATA

CHEMICAL INFORMATION SHEET

CHEMICAL NAME: DICHLOROMETHANE

TRADE NAME: METHYLENE CHLORIDE

COMMON NAME:

MANUFACTURER: E-K IND

MANUFACTURER ADDRESS: 1403 HERKIMER ST JOLIET IL 60432

DOES LOVEJOY HAVE A CURRENT M.S.D.S. ON FILE NOW?

WHAT IS THIS CHEMICAL USED FOR: A CLEANING SOLUTION FOR MILITARY PARTS BEFORE SANDSTROM PROCESS

WHERE WILL IT BE USED: U-JOINT DEPT.

WHERE WILL IT BE STORED: U-JOINT CERT MAT CAGE.

APPROVAL FOR USE

SUPERVISOR: DATE:

SAFETY: Oscar Sitkowski DATE: 4/20/92

ENVIRONMENTAL: Edward Jaramillo DATE: 4/27/92

MASTER FIRST AID H.R. PURCHASING SAFETY RECEIVING

FLASHPOINT (TOC): NONE
FLAMMABLE LIMITS IN AIR: 12-19% (VOL)@ 100 DEG. C
EXTINGUISHING AGENTS: WATER FOG, DRY CHEMICAL, FOAM, CARBON DIOXIDE
UNUSUAL FIRE AND EXPLOSION HAZARDS: CONCENTRATED VAPORS CAN BE IGNITED BY HIGH INTENSITY IGNITION SOURCE. FIREFIGHTERS SHOULD WEAR SELF-CONTAINED POSITIVE PRESSURE BREATHING APPARATUS DUE TO THERMAL DECOMPOSITION PRODUCTS, AND AVOID SKIN CONTACT.

SECTION VI - TOXICITY AND FIRST AID

EXPOSURE LIMITS: ACGIH; 50 PPM TWA (8 HR)
OSHA; 500 PPM TWA (8 HR) 1000 PPM CEILING (FOR PEAK VALUE CONCENTRATION REFER TO 29 CFR 1910.1000 TABLE Z-2)

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: ALCOHOLISM, ACUTE AND CHRONIC LIVER AND KIDNEY DISEASE, CHRONIC LUNG DISEASE, ANEMIA, CORONARY DISEASE OR RHYTH DISORDERS OF THE HEART.

ACUTE TOXICITY:

INHALATION-MAJOR ROUTE OF POTENTIAL EXPOSURE. DICHLOROMETHANE DEPRESSES THE CENTRAL NERVOUS SYSTEM. CONCENTRATIONS BETWEEN 900-1000 PPM MAY CAUSE DIZZINESS. NAUSEA, HEADACHE, AND VOMITING CAN OCCUR ABOVE 2000 PPM. AT 7000 PPM, NUMBNESS AND TINGLING IN ARMS AND LEGS AND RAPID HEARTBEAT HAVE OCCURED. LOSS OF CONCIOUSNESS AND DEATH HAVE OCCURED AT LEVELS ABOVE 9000 PPM IF EXPOSURE IS PROLONGED.

SKIN-LIQUID DICHLOROMETHANE IS PAINFUL AND IRRITATING IF CONFINED TO SKIN BY GLOVES, CLOTHING, ETC. PROLONGED OR REPEATED CONTACT MAY CAUSE IRRITATION, DEFATTING OF SKIN, AND DERMATITIS. ABSORPTION OF LIQUID THROUG INTACT SKIN IS POSSIBLE IF CONTACT WITH LIQUID IS PROLONGED.

EYES-LIQUID MAY CAUSE TEMPORARY IRRITATION WITH TEMPORARY CORNEAL INJURY. VAPORS MAY IRRITATE EYES.

INGESTION-SINGLE DOSE TOXICITY LOW TO MODERATE. IF VOMITING OCCURS, DICHLOROMETHANE CAN BE ASPIRATED INTO LUNGS, WHICH CAN CAUSE CHEMICAL PNEUMONIA AND SYSTEMIC EFFECTS.

FIRST AID:

INHALATION-REMOVE TO FRESH AIR. IF BREATHING HAS STOPPED, ADMINISTER ARTIFICIAL RESPIRATION. CALL A PHYSICIAN.

SKIN-REMOVE CONTAMINATED CLOTHING AND SHOES. WASH EXPOSED AREA THOROUGHLY WITH LARGE QUANTITIES OF WATER FOR AT LEAST 15 MINUTES. WASH CONTAMINATED CLOTHING BEFORE REUSE.

EYES-FLUSH EYES IMMEDIATELY WITH WATER FOR AT LEAST 15 MINUTES. IF IRRITATION PERSISTS, CALL A PHYSICIAN.

NOTE TO PHYSICIAN: ADRENALIN SHOULD NEVER BE GIVEN TO PERSON OVEREXPOSED TO DICHLOROMETHANE.

CARCINOGENICITY: THE INTERNATIONAL AGENCY FOR RESEARCH ON CANCER (IARC) HAS CONCLUDED THAT THERE IS SUFFICIENT EVIDENCE FOR THE CARCINOGENICITY OF DICHLOROMETHANE TO EXPERIMENTAL ANIMALS, AND INADEQUATE EVIDENCE FOR THE CARCINOGENICITY OF DICHLOROMETHANE TO HUMANS, RESULTING IN A CLASSIFICATIC

AS A 2B ANIMAL CARCINOGEN. THE NTP HAS IDENTIFIED DICHLOROMETHANE AS AN ANIMAL CARCINOGEN, BUT IT IS NOT ON THE OSHA OR NTP LISTS AS OF SEPTEMBER 30, 1988.

REPRODUCTIVE TOXICITY: REPRODUCTIVE TOXICITY TESTS ON LABORATORY ANIMALS INDICATE THAT DICHLOROMETHANE DOES NOT CAUSE BIRTH DEFECTS IN LABORATORY ANIMALS.

SECTION VII - PERSONAL PROTECTION AND CONTROLS

RESPIRATORY PROTECTION: WHERE VAPOR CONCENTRATION IS LIKELY TO EXCEED 50 PPM, AN APPROVED FULL FACE RESPIRATOR WITH ORGANIC VAPOR CANNISTER IS ACCEPTABLE APPROVED SELF-CONTAINED BREATHING APPARATUS OR AIR LINE RESPIRATOR WITH FUL FACEPIECE IS REQUIRED FOR VAPOR CONCENTRATIONS ABOVE 1000 PPM AND FOR SPILL AND/OR EMERGENCIES.

VENTILATION: DO NOT USE IN CLOSED OR CONFINED SPACE. USE VENTILATION AS REQUIRED TO MAINTAIN EXPOSURE LEVELS BELOW 50 PPM (TWA).

SKIN PROTECTION: WEAR SOLVENT-RESISTANT GLOVES. SOLVENT-RESISTANT BOOTS, APRON, HEADGEAR AND/OR FACESHIELD SHOULD BE WORN WHERE SPLASHING IS POSSIBL

EYE PROTECTION: WEAR SAFETY GLASSES. CONTACT LENSES SHOULD NOT BE WORN. CHEMICAL GOGGLES AND/OR FACE SHIELDS SHOULD BE WORN WHERE SPLASHING IS POSSIBLE.

HYGIENE: AVOID CONTACT WITH SKIN AND AVOID BREATHING VAPORS. DO NOT EAT, DRINK, OR SMOKE IN WORK AREA. WASH HANDS PRIOR TO EATING, DRINKING, OR USIN RESTROOM. ANY CLOTHING OR SHOES WHICH BECOME CONTAMINATED WITH DICHLOROMETHANE SHOULD BE REMOVED IMMEDIATELY AND THOROUGHLY LAUNDERED BEFORE WEARING AGAIN.

OTHER CONTROL MEASURES: MONITORING OF EXPOSURE LEVELS SHOULD BE PERFORMED REGULARLY. SAFETY SHOWER AND EYEWASH STATION SHOULD BE AVAILABLE.

SECTION VIII - STORAGE AND HANDLING PRECAUTIONS

STORE LABELED, SEALED CONTAINERS IN A COOL, DRY, WELL-VENTILATED AREA OUT OF SUNLIGHT. PREVENT WATER OR MOIST AIR FROM ENTERING STORAGE CONTAINERS. ALUMINUM EQUIPMENT SHOULD NOT BE USED FOR STORAGE AND/OR TRANSFER. CONTACT ALUMINUM PARTS IN A PRESSURIZABLE FLUID SYSTEM MAY CAUSE VIOLENT REACTIONS. VAPORS ARE HEAVIER THAN AIR AND WILL COLLECT IN LOW AREAS. DO NOT ENTER CONFINED SPACES SUCH AS TANKS OR PITS WITHOUT FOLLOWING PROPER ENTRY PROCEDURES SUCH AS ASTM D-4276.
DO NOT REMOVE OR DEFACE LABEL. DO NOT REUSE CONTAINER.

SECTION IX - SPILL, LEAK AND DISPOSAL PRACTICES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: EVACUATE THE AREA, VENTILATE, AND AVOID BREATHING VAPORS. DIKE AREA TO CONTAIN SPILL. CLEAN UP AREA BY MOPPING OR WITH ABSORBENT MATERIAL AND PLACE IN CLOSED CONAINERS FOR DISPOSAL. AVOID CONTAMINATION OF GROUND AND SURFACE WATERS. DO NOT FLUSH TO SEWER.

WASTE DISPOSAL METHOD: RECOVERED LIQUIDS MAY BE SENT TO A LICENSED RECLAIMER OR INCINERATION FACILITY. CONTAMINATED MATERAL MUST BE DISPOSED OF IN A

MATERIAL SAFETY DATA SHEET FEBRUARY, 1988

CASEWAY INDUSTRIAL PRODUCTS

PROGRESSIVE SCREEN PRINTING UNI-LAB™ CHEMICALS

TRADE NAME: SC 125

SHIPPING INFORMATION: UN 1593

HAZARDOUS INGREDIENTS: METHYLENE CHLORIDE, TECHNICAL CAS# 75-09-2 99.9%

1. Physical Data:

Boiling Point: 104F (39.8C)
Vap Press: 355 MMHG @ 20C
Vap Density: 2.93
Sol. in Water: 2.0G/100G @ 25C
Sp. Gravity: 1.320 @ 25/25C
Appearance: Colorless Liquid
Odor: Penetrating Ether-Like Odor. Irritating at high concentrations.

2. Fire and Explosion Hazard Data:

Flash Point: None
Method Used: TOC, TCC,COC
Flammable limits: LFL 13% @ 25C UFL 23% @ 25C
Extinguishing Media: Water Fog
Fire & Explosion Hazards: Forms flammable vapor-air mixtures. Lower temperatures increase the difficulty of getting it to ignite.
Fire-Fighting Equipment: Wear Positive Pressure Self-Contained Breathing Apparatus.

3. Reactivity Data:

Stability: (Conditions to Avoid) Hydrolysis producing small amounts of Hydrochloric Acid possible with gross water contamination. Avoid open flames, welding arcs, or other high temperature sources which induce thermal decomposition.
Incompatibility: (Specific Materials to Avoid) Amines, Aluminum, Possibly Sodium, Potassium, and Magnesium.
Hazardous Decomposition Products: Open flames and welding arcs can cause thermal degradation with the evolution of Hydrogen Chloride and very small amounts of Phosgene and Chlorine.
Hazardous Polymerization: Will Not Occur.

PERMITTED WASTE MANAGEMENT FACILITY. CONSULT FEDERAL, STATE, OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED PROCEDURES.

SECTION X - TRANSPORTATION

DOT HAZARD CLASSIFICATION: NONE BY LAND OR WATER TRANSPORTATION WHEN CONTAINERS ARE LESS THAN 1000 LB EACH. ORM-A WHEN CONTAINERS ARE MORE THAN 1000 LBS EACH OR WHEN TRANSPORTED BY AIR IN ANY SIZE CONTAINER.

PLACARDS REQUIRED: NONE

LABEL REQUIRED: LABEL AS REQUIRED BY OSHA HAZARD COMMUNICATION STANDARD, AND ANY APPLICABLE STATE AND LOCAL REGULATIONS. USE HARMFUL LABEL WHEN TRANSPORTED BY AIR.

THE INFORMATION CONTAINED HEREIN IS PROVIDED IN GOOD FAITH AND IS BELIEVED TO BE CORRECT AS OF THE DATE HEREOF. HOWEVER, E K INDUSTRIES, INC. MAKES NO REPRESENTATION AS TO THE COMPREHENSIVENESS OR ACCURACY OF THE INFORMATION. IT IS EXPECTED THAT INDIVIDUALS RECEIVING THE INFORMATION WILL EXERCISE THEIR INDEPENDENT JUDGEMENT IN DETERMINING ITS APPROPRIATENESS FOR A PARTICULAR PURPOSE. ACCORDINGLY, E K INDUSTRIES, INC. WILL NOT BE RESPONSIBLE FOR DAMAGES OF ANY KIND RESULTING FROM THE USE OF OR RELIANCE UPON SUCH INFORMATION. NO REPRESENTATIONS, OR WARRANTIES, EITHER EXPRESS OR IMPLIED, OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR OF ANY OTHER NATURE ARE MADE HEREUNDER WITH RESPECT TO THE INFORMATION SET FORTH HEREIN OR TO THE PRODUCT TO WHICH THE INFORMATION REFERS..

- Environmental and Disposal I..mation: Action to take for s, /leaks :
  Small Spills: Mop up, Wipe up, or Soak up immediately. Remove to out doors.
  Large Spills: Evacuate area. Contain liquid; transfer to closed metal containers. Keep out of Water supply.
  Disposal Method: When disposing of the unused contents, the preferred options are to send to a Licensed Reclaimers, or to a permitted incinerators. Any disposal practice must be in compliance with Federal, State, and Local Regulations. DO NOT DUMP INTO SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER.

- Health Hazard Data:
  Eye: May cause pain, moderate eye irritation and slight corneal injury. Vapors may irritate eyes.
  Skin Contact: Prolonged or repeated exposure may cause skin irritation, even a burn. Repeated contact may cause drying or flaking of skin. May cause more severe response if confined to skin. Extensive skin contact with SC 125 such as immersion, may cause an intense burning sensation followed by a cold numb feeling, which will subside after contact.
  Skin Absorption: A single prolonged exposure is not likely to result in the material being absorbed through skin in harmful amounts. The dermal LD50 has not been determined.
  Ingestion: Single dose oral toxicity is low. The oral LD50 for rats is in the range of 1500-2500 MG/Kg. If aspirated (Liquid enters the Lung), may be rapidly absorbed through the lungs and result in injury to other body systems.
  Inhalation: Minimal anesthetic or narcotic effects may be seen in the range of 500-1000 PPM Methylene Chloride. Progressively higher levels over 1000 PPM can cause dizziness, drunkenness; concentrations as low as 10,000 PPM can cause unconsciousness and death. These high levels may also cause Cardiac Arrythmias (irregular heartbeats).

:cessive exposure may cause irritation to upper respiratory tract. Excessive exposure may ause Carboxyhemoglobinemia, thereby impairing the bloods' ability to transport oxygen. In nfined or poorly ventilated areas, vapors can readily accumulate and can cause unconsciousness id death.

Systemic & Other Effects: Excessive exposure may cause central nervous systems, liver or kidney effects. Excessive exposure may cause ... carboxyhemoglobinemia, thereby impairing the blood's ability to transport oxygen. The ingredient Methylene Chloride has been shown to increase the rate of spontaneously occurring malignant tumors in the B6C3F1 mouse and benign tumors in laboratory rats. Other animal studies, as well as several human epidemiology studies, failed to show a tumorigenic response relatable to Methylene Chloride. Methylene Chloride is not believed to pose a measurable carcinogenic risk to man when handled as recommended. Birth defects are unlikely. Exposures having no effect on the Mother should have no effect on the fetus. Did not cause birth defects in animals; other effects were seen in the fetus only at doses which caused toxi effects to the Mother. In animal studies, has been shown not to interfere with reproduction. Negative or equivocal results have been obtained in mutagenicity tests using mammalian cells or animals. This is consistent with the lack of interaction with DNA in rats and hamsters. Although results of Ames Bacterial Tests have generally been positive, overall the

5. Health Hazard Data: (Cont):
Data suggest that Genotoxic potencial does not appear tobe a significant factor in the toxicity of Methylene Chloride.

6 First Aid:

Eyes: Irrigate with flowing water immediately and continously for 15 minutes. Consult Medical personnel.

Skin: Wash off in flowing water or shower.

Ingestion: Do not induce vomiting. Call a Physician and/or transport to emergency facility immediately.

Inhalation: Remove to fresh air. If not breathing, give mouth-to-mouth resuscitation. If breathing is difficult, give oxygen. Call a Physician.

Note to Physician: Because rapid absorption may occur through lungs if aspirated and cause systemic effects, the decision of whether to induce vomiting or not should be made by a Physician. If lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Exposure may increase "myocardial Irritability." Do not administer sympathomimetic drugs unless absolutely necessary. If burn is present, treat as any thermal burn, after decontamination. No specific antidote. Supportive care. Treatment based on judgment of the Physician in response to reactions of the patient.

7. Handling Precautions:

Exposure Guideline(s): ACGIH TLV is 100 PPM; STEL is 500 PPM. OSHA PEL is 500 PPM; TWA CEILING is 1000 PPM; PEAK is 2000 PPM.

Ventilation: Controlling airborne concentrations below the ACGIH TLV exposure guideline is recommended. Use only with adequate ventilation. Local exhaust ventilation may be necessary for some operations. Lethal concentrations may exist in areas with poor ventilation.

Respiratory Protection: Atmospheric Levels should be maintained below the exposure guideline. When respiratory protection is required for certain operations, use an approved Air-Purifying Respirator. The effectiveness of an air purifying respirator is limited. Use it only for a single short-term exposure. For emergency and other conditions where the exposure guideline may be greatly exceeded, use an approves positive pressure self- contained breathing apparatus. In confined or poorly ventilated areas, use an approved positive pressure self-contained breathing apparatus.

Skin Protection: For brief contact, no precautions other than clean body-covering clothing should be needed. When prolonged or frequently repeated contact could occur, use protective clothing impervious to this material. Selection of specific items such as gloves, boots, apron or full-body suit will depend on operation.

Eye Protection: Use safety glasses. Where contact with liquid is likely, chemical goggles are recommended. If vapor exposure causes eye discomfort, use a full-face respirator.

8. Additional Information:

Special Precautions t taken in Handling and Storag

Exercise reasonable care and caution. Avoid breathing vapors. Store in cool place. Concentrated vapors of this product are heavier than air and will collect in low areas such as pits, degreasers, storage tanks, and other confined areas. Do not enter these areas where vapors of this product are suspected unless special breathing apparatus is used and an observer is present for assistance. The use of air for unloading product out of vessels or transport containers is not recommended.

Manual operations involving the potential for skin contact, such as some cold cleaning operations, or cleaning operations involving large surfaces, should be approached with special caution, due to the volatility of Methylene Chloride. Increased ventilation or respiratory protection may be required to reduce the potential for overexposure to vapors. Gloves or other protective equipment should be worn if skin contact is likely.

9. This information contained herein is based on data considered accurate. However no warranty is expressed or implied regarding the accuracy of this data or the results to be obtained from the use thereof. CASEWAY INDUSTRIAL PRODUCTS, INC. assumes no responsibility for personal injury or property damages to vendees, users or third parties caused by the material. Such vendees or users assume all risks associated with the use of the material.

POLLUTION INCIDENT PREVENTION PLAN

INCLUDING EMERGENCY RESPONSE PROCEDURES

FOR

LOVEJOY, INC.
2655 Wisconsin Avenue
Downers Grove, Illinois 60515

630-852-0500

November 16, 1998

Prepared by: Edward Zdanowski
Quality Manager & Emergency Coordinator

Approved by: James Krejci
Vice President, Operations

I. IDENTIFICATION INFORMATION

Facility:

Lovejoy, Inc.
2655 Wisconsin Avenue
Downers Grove, Illinois 60515

Phone: 630-852-0500
FAX: 630-852-2120

This facility is in operation 24-hours per day, 10:00 PM Sunday through 10:30 PM Friday, with occasional weekend hours.

Monday through Friday, from 7:00 AM through 5:30 PM, call (630) 852-0500 for switchboard assistance.

During other working hours, call the nightline number, (630) 829-1692, and ask to speak to a Supervisor.

When Lovejoy is closed during weekends or holidays, call the following key personnel:

1.	Don Roubal	(630) 964-7790
2.	Mark Caccippio	(630) 369-4699
3.	Roger Lambert	(708) 747-7101
4.	Fernando Rodriguez	(815) 744-7389
5.	Oscar Sitkowski	(815) 439-0252

Emergency Coordinator:

Edward Zdanowski, Emergency Coordinator
18437 Wildwood Avenue
Lansing, IL 60438
(708) 474-3585 (home)
(708) 912-3345 (car)

Location:

Lovejoy is located at 2655 Wisconsin Avenue, Downers Grove, Illinois, at the southeast corner of Wisconsin and Katrine.

We are approximately 200 feet south of Downers Grove Fire Station 1 (**APPENDIX A**).

II. FACILITY DESCRIPTION AND OPERATIONS:

This facility is the main manufacturing plant, distribution center, and corporate headquarters for Lovejoy, Inc.

Lovejoy is a manufacturer of power transmission products. We produce various steel, iron, aluminum, and powder metal parts through a variety of traditional machining processes.

The bulk of the industrial wastes currently generated are non-hazardous spent machining coolants, oils, and water. These waste fluids are reduced in volume in a SAMSCO Evaporator unit, accumulated on site, and are manifested to a licensed hauler and treatment facility for disposal. The evaporator unit is permitted by Illinois EPA.

Less than 100 gallons (per year) of waste currently generated by Lovejoy is classified and managed as a hazardous waste. The subject material is waste filter media from a cold process black oxide line. Waste filter media is manifested to a licensed waste hauler and disposal facility.

III. HAZARDOUS WASTE STORAGE

Hazardous waste filter media is accumulated in a 55-gallon open top drum at the point of generation. This practice is allowed under 40 CFR 262.34 (c) (1), Satellite Accumulation.

When the accumulation drum is filled to capacity, the drum is marked with the Accumulation Start Date and is moved to a waste storage area. Waste storage area is located at approximately midpoint of the east wall of the facility, adjacent to an overhead door (see plant layout, **APPENDIX B**).

Waste Storage Area has an overhead fire sprinkler system, fire extinguisher, warning alarm horn, and spill clean up materials.

IV. NON-HAZARDOUS WASTE HANDLING PROCEDURES

Non-hazardous waste fluids are moved by operators or maintenance personnel from point of generation to waste storage, using a portable sump pump and tank. Waste material is pumped out of the portable tank into a 125-gallon settling tank. A belt skimmer removes tramp oils from the waste material and this oil is stored in a 55-gallon drum as non-hazardous waste. The remaining material is pumped into the evaporator unit and is reduced by boiling to approximately 10% of the beginning volume. The remaining material is transferred to a 650-gallon storage drum and/or 55-gallon drums. The 55-gallon drums are stored in the shipping dock area.

When Lovejoy accumulates an approximate total of 1500-gallons of this non-hazardous waste, arrangements are made with a licensed waste transporter to pump the waste fluids into his tank truck, and transport the waste material to TSDF for disposal. The transporter uses his equipment to transfer the waste fluids. Access to the 650-gallon tank is through a capped and valved drainpipe leading from the 650-gallon tank, through the east wall, exiting at the exterior of the building approximately 5-feet north of the overhead door. The 55-gallon drums in the shipping dock area can be accessed through the open overhead door. The hauler pumps directly from these drums.

V. HAZARDOUS WASTE HANDLING PROCEDURES

The operator removes the filter media from the filtration unit and allows carry off fluids to drain back into the filtration unit. The waste filter media is placed in an open top 55-gallon steel drum and the top is secured. A fire extinguisher and spill control kit is located near the accumulation point. The entire area is covered by a fire sprinkler system.

When the 55-gallon drum is filled to capacity, the operator marks the accumulation start date on the drum. Within three days, the operator or maintenance personnel will move the drum to the waste storage area and the drum is placed on a portable containment pallet. The accumulation start date is monitored by the Emergency Coordinator and is removed within 180-days (Small Quantity Generator Rules).

The accumulation area near the point of generation is maintained by the operator to ensure unobstructed access, and maintenance personnel are responsible to keep the waste storage area clear and accessible.

Drums containing waste filters, located at the point of generation and in the waste storage area, are inspected weekly by the Emergency Coordinator for leaks, rust, damage, markings, accumulation start dates, access, and properly closed tops.

VI. EMERGENCY RESPONSE PROCEDURES FOR SPILL PREVENTION AND CONTROL

Lovejoy, Inc. and its employees, in an effort to act in a responsible and environmentally correct manner, will conduct themselves as follows:

RESPONSE PRECEDURES

In case of a spill, after caring for the immediate health and welfare needs of any individuals at the site, it is the responsibility of all personnel to immediately begin cleaning up the spill.

Waste Filter Media is a Hazardous Waste! Contents of damaged drums shall be transferred to an appropriate, undamaged drum. All markings and labels are to be transferred to the new drum. Additional open top, 55-gallon drums for the purpose of collecting waste filter media are stored near the point of generation.

Emergency Coordinator shall document all hazardous spill events.

Spills of non-hazardous material shall be cleaned with vacuum pumps, absorbent materials or mops. All recovered liquids are to be transferred to 650-gallon tank in the waste storage area or undamaged 55-gallon drums. These drums shall be stored in the shipping area.

If the spill is of the magnitude that MAY get out of the building, the first response by the one discovering the spill will be to dike the spill with socks and/or absorbent materials.

The Emergency Coordinator is to oversee the cleanup. In the event the Emergency Coordinator is off-site, the Supervisor, Director of Manufacturing, or Maintenance Personnel (in descending order) shall act as the Emergency Coordinator.

The Emergency Coordinator shall assess the situation and dispatch all necessary personnel and equipment to assist in the clean up. The Emergency Coordinator will use his discretion whether outside help is needed to assist in spill cleanup.

VII. EMERGENCY NOTIFICATION PHONE NUMBERS:

1. Downers Grove Fire Department, Police Department, and Ambulance:

   Emergency: 911
   Non-Emergency: Fire – (630) 968-2121
   Police – (630) 968-2131

2. Good Samitarian Hospital

   3815 Highland Ave.
   Downers Grove, IL

   (630) 275-5900

3. Lovejoy, Inc. – Emergency Coordinator

   Edward Zdanowski

   Office: (630) 852-0500 (ext 1361)
   Res: (708) 474-3585
   Car: (708) 912-3345

VIII. EVACUATION PLAN

At first notice of an emergency situation or spill, the employee closest to a phone will press 80 to activate the loud speaker system. He will repeat the words, "EMERGENCY" twice then give the type of emergency and location.

(Example: EMERGENCY, EMERGENCY, FIRE IN THE SHIPPING DOCK)

An alarm horn is located in the Waste Storage Area. To summon help, an employee is to press the red button to activate the alarm.

The fire alarm is triggered automatically by heat sensors in the sprinkler heads.

Upon activation of an alarm or announcement of an emergency, all personnel within the facility will proceed to the nearest exit and evacuate the building, unless it is obvious by the nature of the emergency that your help is required to manage the emergency, and that by assisting, it creates no possible risk to life or health. (See **APPENDIX C** for map of evacuation routes.)

Ed Zdanowski	Quality
Arnie Rediscker	Director of Manufacturing
DGFD	

PROCEDURES FOR THE DISPOSAL OF SOLID WASTE
(All except machining chips)

Solid wastes that have come in contact with coolants, hydraulic oil, lubricating oil, solvents, or other chemicals are to be collected and transferred into designated 55 gallon collection drums and hauled away as special, nonhazardous solid waste.

UNDER NO CONDITIONS IS THE SOLID WASTE COVERED BY THIS PROCEDURE TO BE PUT OUT WITH GENERAL GARBAGE THAT IS HAULED BY A SCAVENGER SERVICE.

* *

Solid waste covered by this procedure include, but is not limited to:

1) used OIL-DRY
2) used PIG-PANS
3) used PIG-LOGS
4) shop towels saturated by:
    a) hydraulic oil
    b) lubricating oil
    c) coolant
    d) solvents
    e) other chemicals
5) used mop heads
6) cardboard saturated with oil, coolant, solvent, or chemicals
7) waste PMP powder. SATURATED WITH OIL

CHIPS FROM MACHINING IS NOT COVERED BY THIS PROCEDURE

* *

Red, fireproof covered receptacles are provided throughout the shop as collection points for used shop towels ONLY.

These red containers are to be emptied daily into designated open top, covered 55 gallon waste storage drums to reduce the fire hazard.

All other solid wastes are to be moved directly into designated open top, covered 55 gallon waste storage drums.

All open top 55 gallon drums MUST be inspected before any waste is placed in the drum.

The drum is not to have any holes or damage. The open end must not be distorted or damaged. A lid must be test fitted to the drum to assure a secure seal before the drum can be

(PROCEDURES FOR THE DISPOSAL OF SOLID WASTE CONTINUED)

The drum in use is to be kept in the drum room only. NO OTHER SOLID WASTE STORAGE DRUMS ARE TO BE KEPT IN THE SHOP! Only one solid waste drum is to be used at a time. The solid waste drum is use is to be clearly marked:

"SOLID WASTE"

The drum shall be stored so that the marking is readily visible.

When the solid waste drum is filled, the drum is to be securely closed with a cover and the date shall be marked on the drum.

This closed drum is to be stored outside so that the marking is readily visible.

When a number of filled drums are accumulated, the drums will be hauled away and landfilled as special, nonhazardous solid waste.

Edward Zdanowski
Environmental Compliance
Coordinator

Effective date: July 10, 1991

WASTE DISPOSAL INSTRUCTIONS
JANUARY 8, 1993

To assure that Lovejoy properly disposes of our waste, please read and familiarize yourself with this information.

1. CLASSIFICATION OF WASTE

We generate two types of waste, HAZARDOUS and NON-HAZARDOUS SPECIAL WASTE.

Hazardous wastes come from the Black Oxide area, specifically, Tank #1 (wash tank), Tank #3 (blackening tank), Tank #4 (blackening tank), Tank #6 (Rust Pel), and both dip tanks (1033 East and West).

Non-hazardous special wastes come from other areas and are in the form of liquids and solids. They include:
waste coolant, waste oil, air compressor condensation, mop water, floor scrubber water, oil dry, pig logs/pig mats, oil saturated cardboard, sand blast media, diamond hone sludge, evaporator sludge, and oil contaminated PMP powder.

2. HAZARDOUS WASTE

There are very strict requirements that must be followed in the handling, storage and disposal of hazardous waste.

A) Containers - We shall use 55 gallon, closed top drums for the storage of hazardous waste. All original markings on the drum must be removed. Spray paint over all labels and ink markings on the drum BEFORE filling with hazardous waste. There is to be NO conflicting identification on the hazardous waste drums.

The drums shall not be damaged, dented or rusted. Both openings in the top of the drum must have properly fitting bunge caps.

B) Filling the drums - Take appropriate care in filling the 55 gallon drums. DO NOT fill the drum all the way to the top. Allow a 3" air gap in the drum to allow for expansion. When the drum is filled, tightly install both bunge caps. Wipe all spilled waste liquids from the top of the drum. Check the drum for leaks! Certain hazardous wastes from different sources cannot be combined and may cause a fire risk. Keep all waste streams in seperate drums. If a drum is only partially filled, keep track and add the same waste at a later time.

Do NOT use the sump cleaner to pump out hazardous waste.

Use the air operated pump and transfer the hazardous waste directly into the appropriate 55 gallon drums.

C) Identification - Each drum of hazardous waste must be clearly marked with this following information:

The words "HAZARDOUS WASTE"
The date hazardous waste is placed in the drum
The source of the hazardous waste

We will use the following codes to identify the source of hazardous waste:

Black Oxide Tank #1 (wash tank).....#1
Black Oxide Tank #3 (blackening).....#3
Black Oxide Tank #4 (blackening).....#4
Black Oxide Tank #6 (Rust Pel).....#6
Dip Tank (1033 west tank).....#7
Dip Tank (1033 east tank).....#8

Mark the identification on the drum top with a yellow paint stick. In the event the drum color is white, spray paint an area with black paint first and allow to dry before marking. This marking must be legible and highly visible.

D) Storage - All filled drums of hazardous waste are to be stored in the hazardous waste accumulation area, located near the air compressors and evaporator. Drums are to be lifted onto the containment pallets. The pallets are to be placed in the area designated by the floor markings. The gate to the waste accumulation area is to be kept closed and secured.

E) Records - Each drum that is placed in the waste accumulation area must be entered in a log. The following information must be logged in when a hazardous waste drum in put into the waste storage area.

a) Date
b) Contents (use code number)
c) Name of the person who moved the waste into the storage area.

F) Shipping the waste for disposal - Environmental Coordinator is responsible to proper shipping labels, warning placards, manifests, and disposal arrangements.

Lovejoy employees will move the hazardous waste to the loading dock, but are NOT allowed to load the truck.

Environmental Coordinator will observe the loading of the truck, offer appropriate truck placards, sign shipping documentation, witness the truck leave Lovejoy property and maintain waste records.

G) Special conditions -

(1) Combination of waste streams - Combination of hazardous waste streams is not allowed. In the event that waste streams are mixed, mark content codes of all of the wastes in the drum and immediately notify the Environmental Coordinator. Be prepared to explain the reason for the mixing of waste streams and the actions taken to prevent recurrence.

(2) Hazardous waste spills and leaks - All uncontrolled releases of hazardous wastes must be promptly corrected. Take the following corrective steps immediately:

a) Call the closest person for help.

b) Stop the spreading of the spill from reaching floor drains or the ground (non-cemented floor) with Pig-logs.

c) Notify your supervisor.

d) Notify Environmental Coordinator.

e) Clean up spill with oil-dry, pig-mats, pig-pillows, etc. These spent absorbants are to be placed in a plastic bag and be disposed of as a hazardous waste.

Persons responsible to control the incident and supervise the clean up are in the following order:

1 - Environmental Coordinator (Ed Zdanowski)

2 - Plant Superintendent (Oscar Sitkowski)

3 - Vice President, Operations (Jim Ferrell)

4 - Maintenance Group Leader (Fernando Rodriguez)

5 - Foremen

6 - Group Leader

If the Fire Department or other recognized outside authority is present, they may assume control. Lovejoy employees will follow their instructions.

3. NON-HAZARDOUS SPECIAL WASTES (TO BE EVAPORATED)

Following is a list of non-hazardous special wastes that may be combined and processed through the evaporator:

A) Waste coolant from the machine sumps

B) Air compressor condensation

C) Dirty mop water

D) Floor scrubber water

These waste streams are to be transferred by the sump cleaner to the white holding tank of the evaporator. The sump cleaner must be emptied after each use. Waste material is NOT to be stored in the sump cleaner.

In the event the white holding tank is filled, non-hazardous waste liquids may be stored in a 55 gallon drum next to the evaporator. This drum must be closed and the contents must be marked on the outside of the drum. Maintenance department will transfer the contents of these non-hazardous waste drums to the evaporator as soon as capacity in the white holding tank allows.

If a leak or spill of non-hazardous special wastes occur, take the following corrective steps immediately:

a) Call the closest person for help.

b) Stop the spreding of the spill from reaching floor drains or the ground (non-cement floor) with pig-logs.

c) Notify your supervisor.

d) Mop up or vacuum spilled material and transfer to evaporator. Dirty mop heads and any pig-mats/logs are to be put with solid non-hazardous special wastes (described later).

e) Report the incident to the Environmental Coordinator.

Liquids that would not evaporate are to be transferred to the large, white, 600 gallon holding tank. Notify the Environmental Coordinator when this 600 gallon tank approaches capacity so that arrangements for disposal can be made.

4. NON-HAZARDOUS SPECIAL WASTES (NOT TO BE EVAPORATED)

Waste hydraulic oils and machine oils are not to be processed through the evaporator. Transfer these non-hazardous special wastes directly into the large, white, 600 gallon holding tank.

Do NOT use the sump cleaner to transport these waste oils. Transfer all oils with the air pump.

Ia a leak of non-hazardous waste oil occurs, take the following correctine steps immediately:

a) Call the nearest person for help.

b) Stop the spreading of the spill from reaching floor drains or the ground (non-cement floor) with pig-logs.

c) Notify your supervisor.

d) Clean up the spill with pig-mats, pig-pillows, etc. Used absorbents are to be put with solid, non-hazardous special wastes (described later).

e) Report incident to Environmental Coordinator.

Notify Environmental Coordinator when the 600 gallon holding tank approaches capacity so that arrangements for disposal can be made.

5. SOLID NON-HAZARDOUS SPECIAL WASTE

Following is a list of our solid, non-hazardous special wastes:

A) Used oil absorbents (pig-logs/pillows/mats etc.)

B) Oil saturated cardboard

C) Dirty mop heads

D) Sand blast media

E) Oil contaminated PMP powder

F) Diamond hone sludge

G) Evaporator sludge

NOTE: Only sludge from these sources have been analyzed and are permitted with our waste disposal service. Notify Environmental Coordinator for instructions for sludge from a different source.

Used oil absoebents, oil saturated cardboard, sand blast media, and dirty mop heads are to be placed in the "Bulk Bag" located in the waste accumulation area. The bulk bag is to have a plastic liner, installed in it's rack, and have a wooden pallet in good condition underneath the bag.

When the bags are full, the plastic liners are to be closed, bags removed from rack, bag closed, and bag banded to wooden pallet.

Notify Environmental Coordinator that a bag is filled so that arrangements for disposal can be made.

Oil contaminated PMP powder is to be placed in an empty powder container with a plastic liner. The words "Waste Powder" is to be clearly marked on the container. The lid is to be banded in place.

Notify Environmental Coordinator that a container of oil saturated powder is ready for disposal so that arrangements can be made.

Sludge from diamond hone and the evaporator is to be transferred to an open top 55 gallon drum that will accept a metal lid and seal ring.

This drum must be kept closed while sludge is being accumulated.

Notify Environmental Coordinator when drum is filled so that arrangements for disposal can be made.

6. TRAINING

All personnel that will handle any hazardous or non-hazardous special waste will be trained to follow these instructions.

Each trained person will be held accountable for the proper handling, identification and storage of wastes identified in these instructions.

The Plant Superintendent, Foremen and Group Leaders are to monitor that instructions are followed and take appropriate corrective steps when necessary.

HANDLING OF NON-HAZARDOUS SPECIAL WASTE (PAGE 1)

1) WASTE COOLANT FROM MACHINE SUMPS
2) AIR COMPRESSOR CONDENSATION
3) DIRTY MOP WATER FROM SHOP FLOOR
4) FLOOR SCRUBBER WATER

THIS WASTE IS TO BE EVAPORATED

1) WASTE COOLANT FROM MACHINES - USE THE SUMP CLEANER. COLLECT THE WASTE WITH THE SUMP CLEANER AND TRANSFER THIS WASTE TO THE WHITE PLASTIC HOLDING TANK OF THE EVAPORATOR.

   IF THE WHITE PLASTIC HOLDING TANK IS FILLED, TRANSFER THE WASTE TO A 55 GALLON, CLOSED TOP DRUM. MARK THE DRUM WITH THE WORDS: "WASTE COOLANT". LEAVE THIS DRUM ON THE FLOOR NEXT TO THE EVAPORATOR. MAINTENANCE WILL TRANSFER THE WASTE TO THE WHITE PLASTIC HOLDING TANK WHEN THERE IS ROOM.

   NEVER LEAVE WASTE COOLANT IN THE SUMP CLEANER. EMPTYING THE SUMP CLEANER IS PART OF THE JOB.

2) AIR COMPRESSOR CONDENSATION - COLLECT IN 55 GALLON, CLOSED TOP DRUMS OR SMALLER CONTAINERS.

   IF USING A 55 GALLON DRUM, DO NOT FILL TO THE VERY TOP. LEAVE A 3" SPACE TO ALLOW FOR EXPANSION. TIGHTLY INSTALL BOTH BUNGE CAPS AND MOVE TO WASTE ACCUMULATION AREA. MARK THIS DRUM WITH THE WORDS: "AIR COMPRESSOR WATER". LEAVE THE DRUM ON THE FLOOR NEXT TO THE EVAPORATOR. MAINTENANCE WILL TRANSFER THIS WASTE TO THE WHITE PLASTIC HOLDING TANK AND EVAPORATE THE WASTE.

   IF USING A SMALLER CONTAINER, EMPTY INTO WHITE PLASTIC HOLDING TANK OR COMBINE WITH MOP WATER DRUMS LOCATED THROUGHOUT THE SHOP.

3) DIRTY MOP WATER FROM SHOP FLOOR - COLLECT IN 55 GALLON, CLOSED TOP DRUMS.

   BUNGES MUST BE TIGHTLY INSTALLED ON THESE DRUMS AT ALL TIMES, EXCEPT ONLY WHEN FILLING OR EMPTYING THE WASTE. DO NOT FILL THESE DRUMS TO THE VERY TOP. LEAVE A 3" SPACE TO ALLOW FOR EXPANSION. TIGHTLY INSTALL BOTH BUNGE CAPS AND MOVE THE DRUM TO THE WASTE ACCUMULATION AREA. MARK THIS DRUM WITH THE WORDS: "MOP WATER". LEAVE THE DRUM ON THE FLOOR NEXT TO THE EVAPORATOR. MAINTENANCE WILL TRANSFER THIS WASTE TO THE WHITE PLASTIC HOLDING TANK AND EVAPORATE THE WASTE.

4) FLOOR SCRUBBER WATER - TRANSFER DIRECTLY INTO WHITE PLASTIC HOLDING TANK. IF THE WHITE PLASTIC HOLDING TANK IS FILLED, TRANSFER THE WASTE INTO 55 GALLON, CLOSED TOP DRUMS. DO NOT FILL THE DRUM TO THE VERY TOP. LEAVE A 3" GAP TO ALLOW FOR EXPANSION. TIGHTLY INSTALL BOTH BUNGE CAPS. MARK THE DRUM WITH THE WORDS: "FLOOR SCRUBBER". LEAVE THIS DRUM ON THE FLOOR NEXT TO THE EVAPORATOR. MAINTENANCE WILL TRANSFER THIS WASTE TO THE WHITE PLASTIC HOLDING TANK AND EVAPORATE THE WASTE.

IN CASE OF A SPILL OF WASTE 5 & 6

STEP 1. CALL THE CLOSEST PERSON FOR HELP - DO NOT CLEAN THE SPILL BY YOURSELF!

STEP 2. STOP THE SPILL FROM REACHING FLOOR DRAINS OR THE GROUND (NON-CEMENTED FLOOR) WITH PIG LOGS OR PIG MATS.

STEP 3. NOTIFY YOUR SUPERVISOR.

STEP 4. SOAK UP THE SPILL WITH PIG MATS OR PIG PILLOWS. PUT THESE USED ABSOBANTS IN THE SOLID WASTE BAG. MOP THE FLOOR WITH SOAPY WATER OR THE FLOOR SCRUBBER, AND DISPOSE OF THIS WASTE ACCORDING TO PROCEDURES.

DIRTY MOP HEADS ARE TO BE PUT IN THE SOLID WASTE BAG.

STEP 5. NOTIFY THE ENVIRONMENTAL COORDINATOR.

7) USED OIL ABSORBANTS (PIG LOGS, MATS, PILLOWS, ETC.)
8) OIL SATURATED CARDBOARD
9) DIRTY MOP HEADS
10) SAND BLAST MEDIA

THESE WASTES ARE TO BE PUT IN THE SOLID WASTE BAG, LOCATED IN THE WASTE ACCUMULATION AREA.

THE BAG IS MOUNTED ON A METAL RACK AND A WOODEN PALLET IS TO BE PLACED UNDER THE BAG. BE SURE THAT THERE IS A PLASTIC LINER BAG INSIDE OF THE SOLID WASTE BAG.

BE SURE THAT THE WASTE MATERIALS YOU ARE ADDING TO THE SOLID WASTE BAG GO INTO THE PLASTIC LINER.

DO NOT OVER-FILL THE BAG. CALL MAINTENANCE IF THE BAG IS FILLED.

11) DIAMOND HONE SLUDGE
12) EVAPORATOR SLUDGE

NOTE: ONLY SLUDGES FROM THE DIAMOND HONE AND EVAPORATOR ARE TO BE HANDLED BY THESE INSTRUCTIONS. FOR SLUDGES FROM DIFFERENT WASTE STREAMS, NOTIFY ENVIRONMENTAL COORDINATOR FOR INSTRUCTIONS.

PLACE SLUDGES IN 55 GALLON OPEN TOP DRUMS THAT WILL ACCEPT A LID AND SEALING RING.

SLUDGE DRUMS ARE TO BE KEPT CLOSED EXCEPT WHEN ADDING SLUDGE.

WHEN FILLED, MARK THE DRUM WITH THE WORDS: "SLUDGE", SECURE THE LID AND MOVE TO THE WASTE ACCUMULATION AREA. LEAVE DRUM ON THE FLOOR NEXT TO THE EVAPORATOR AND NOTIFY MAINTENANCE.

IN CASE OF A SPILL OF WASTE 1, 2, 3, OR 4

STEP 1. CALL THE CLOSEST PERSON FOR HELP - DO NOT CLEAN THE SPILL BY YOURSELF!

STEP 2. STOP THE SPILL FROM REACHING AS FLOOR DRAIN OR THE GROUND (NON-CEMENTED FLOOR) WITH PIG LOGS OR PIG MATS.

STEP 3. NOTIFY YOUR SUPERVISOR.

STEP 4. MOP UP OR VACUUM SPILLED MATERIAL WITH THE SUMP CLEANER. DISPOSE OF THE RECOVERED WASTE IN THE SAME MANNER AS MOP WATER. MOP THE FLOOR WITH SOAPY WATER OR THE FLOOR SCRUBBER AND DISPOSE OF THIS WASTE ACCORDING TO PROCEDURES.

PUT DIRTY MOP HEADS AND ABSORBANTS IN THE SOLID WASTE BAG.

STEP 5. NOTIFY THE ENVIRONMENTAL COORDINATOR.

5) WASTE HYDRAULIC OIL
6) WASTE MACHINE OIL

DO NOT EVAPORATE THIS WASTE

5) WASTE HYDRAULIC OIL - TRANSFER DIRECTLY INTO 55 GALLON, CLOSED TOP DRUMS, USING THE AIR DIAPHRAM PUMP.

DO NOT FILL THE DRUMS TO THE VERY TOP. LEAVE A 3" GAP TO ALLOW FOR EXPANSION. TIGHTLY CLOSE BOTH BUNGE CAPS. MARK THE DRUM WITH THE WORDS: "WASTE OIL". MOVE THIS DRUM TO THE WASTE ACCUMULATION AREA AND LEAVE IT ON THE FLOOR NEXT TO THE EVAPORATOR. MAINTENANCE WILL MOVE THE DRUM INTO A SPECIAL STORAGE AREA UNTIL IT IS SHIPPED OUT FOR FINAL DISPOSAL.

6) WASTE MACHINE OIL - TRANSFER DIRECTLY INTO 55 GALLON, CLOSED TOP DRUMS, USING THE AIR DIAPHRAM PUMP.

DO NOT FILL THE DRUMS TO THE VERY TOP. LEAVE A 3" GAP TO ALLOW FOR EXPANSION. TIGHTLY CLOSE BOTH BUNGE CAPS. MARK THE DRUM WITH THE WORDS: "WASTE OIL". MOVE THIS DRUM TO THE WASTE ACCUMULATION AREA AND LEAVE IT ON THE FLOOR NEXT TO THE EVAPORATOR. MAINTENANCE WILL MOVE THE DRUM INTO A SPECIAL STORAGE AREA UNTIL IT IS SHIPPED OUT FOR FINAL DISPOSAL.

13) OIL CONTAMINATED P. POWDER

OIL CONTAMINATED PMP POWDER IS TO BE PLACED IN EMPTY POWDER TOTES WITH PLASTIC LINERS, LIDS AND WOODEN PALLETS (SAME CONTAINERS AS ORIGINALLY DELIVERED).

MARK FILLED CONTAINERS WITH WORDS: "WASTE POWDER", AND BAND THE LID IN PLACE.

STORE IN DESIGNATED AREA OF PMP DEPARTMENT AND NOTIFY ENVIRONMENTAL COORDINATOR.

LOVEJOY, INC.
HAZARD COMMUNICATION PLAN

Lovejoy, Inc.
2655 Wisconsin Avenue
Downers Grove, IL 60515
630-852-0500

Revised: October 18, 1998

Prepared by: Edward Zdanowski
Quality Manager

Approved by: James Krejci
Vice President, Operations

LOVEJOY HAZARD COMMUNICATION PLAN OUTLINE

I. Purpose

II. Plan Overview

- A. Administration
- B. Plan Summery
- C. Plan Effectiveness
- D. Annual Review

III. Inventory of Chemicals

- A. Purpose
- B. Responsibility
- C. Requirements and Procedures
- D. Chemical Information Sheets

IV. Chemical Labels

- A. Purpose
- B. Responsibility
- C. Requirements
- D. Procedures

V. Material Safety Data Sheets

- A. Requirements
- B. Responsibility
- C. Procedures

VI. Training and Communication

- A. Requirements
- B. Responsibility
- C. Guidelines
- D. Specific Training Programs

Section I – Purpose

The Lovejoy Hazard Communication Plan is based in a simple concept; that employees have both a need and a right to know the hazards and the identities of the chemicals they are exposed to when working. They also need to know what protective measures are available to prevent adverse effects from occurring. The Lovejoy Hazards Communication Plan (LHCP) is designed to provide employees with the information they need.

Lovejoy, Inc. is dedicated to providing a safe workplace for our employees.

Lovejoy Management and all employees will work together to use information gained from our Hazards Communication Plan to take steps to reduce exposures, substitute less hazardous materials, and establish proper work practices. These efforts will help prevent occurrence of work-related illnesses and injuries caused by chemicals.

Section II – Plan Overview

A. Administration

Overall management of the LHCP shall be the responsibility of the Quality Manager. Plan administrative duties and authority include:

1) Develop LHCP
2) Maintain LHCP
3) Address OSHA inquiries concerning LHCP
4) Form and chair special committees, as needed, to address and resolve LHCP issues
5) Evaluate effectiveness of LHCP

Director of Manufacturing shall ensure that all elements of LHCP are understood and followed by all Lovejoy shop employees. Each Department Manager and Supervisor shares this responsibility for the workers in their department or area, in both the shop and office, including temporary workers.

The Manager or Supervisor shall be responsible for communicating appropriate LHCP information and provide necessary protective equipment to outside contractors working in their area.

Any Lovejoy employee conducting business with any visitor to our facility will communicate appropriate LHCP information and provide necessary protective equipment.

Vice President, Human Resources shall:

1) Maintain a current and complete copy of LHCP
2) Provide access of LHCP to employees, upon request
3) Provide LHCP training
4) Document employee LHCP training in personnel records

Lovejoy Senior Management shall be aware of and actively support LHCP. Members of Lovejoy Senior Management will demand full compliance of LHCP, without exception, from each Lovejoy employee reporting to them.

B. Plan Summary

LHCP is developed and structured to meet the requirements of Title 29, Code of Federal Regulations (CFR) Part 1910.1200, "Hazard Communication Standard".

LHCP is a written plan addressing our responsibilities to:

1) Identify and list hazardous chemicals used in our facility.
2) Obtain Material Safety Data Sheets (MSDS) and labels for each hazardous chemical.
3) Develop and implement a written hazard communication program, which addresses labels, MSDS and employee training based on the chemicals used and information communicated by chemical manufacturers.
4) Communicate hazard information to employees through labels, MSDS and formal training programs.

LHCP procedures are detailed in Sections 3, 4, 5 and 6 of this document.

C. Plan Effectiveness

LHCP is intended to be a continuing program at Lovejoy. Each element of this plan is to be evaluated for effectiveness upon its execution, and if necessary, modified so that the goals are met. Any concerns of the effectiveness of LHCP shall be forwarded, in writing, to Quality Manager for immediate review and appropriate action.

D. Annual Review

During January of each year, LHCP shall be reviewed and updated, as necessary, to accurately reflect LHCP intent. The Quality Manager shall perform the annual review.

Revised LHCP shall be submitted to Vice President, Operations for approval.

Section III – Inventory of Chemicals

A. Purpose

LHCP requires a list of chemicals used in our facility as part of the written communications program. The list will serve as an inventory of chemicals for which an MSDS is maintained.

The goal of this section is:

1) Identify chemicals used at Lovejoy.
2) Control chemicals entering our facility.
3) Ensure presence of an MSDS.
4) Identify locations where the chemical is used.
5) Assess potential health risks.
6) Develop adequate safety procedures.
7) Determine proper disposal methods for the chemical.

B. Responsibility

Compliance of this section of LHCP is the responsibility of each Lovejoy employee.

Management of this section of LHCP is the responsibility of the Quality Manager.

Initiation of a Chemical Information Sheet is the responsibility of the employee, supervisor or manager requesting that a new chemical be purchased or brought into Lovejoy as a sample for evaluation.

Approval of chemicals will be a shared responsibility between:

1) Area Supervisor
2) Safety Committee
3) Quality Manager

The procurement of approved chemicals is the responsibility of Purchasing Department.

Accepting, receiving and labeling of shipments of approved chemicals is the responsibility of the Receiving Clerk.

Monitoring and enforcement of this section of LHCP is the responsibility of each Manager and Supervisor of the company.

C. Chemical Information Sheet

Chemical Information Sheet (see Appendix A) will be the form used to control the chemicals used at Lovejoy.

Chemical Information Sheet shall include:

a) Chemical name
b) Manufacturer of the chemical
c) Manufacturer's address
d) Acknowledgement that a legible MSDS is on file
e) Purpose for the chemical
f) Department of area the chemical will be used
g) Location the chemical will be stored
h) Health risk code
i) Protective equipment required
j) The chemical that the new chemical is replacing
k) Statement why an old chemical is being replaced
l) Disposal procedures
m) Approval signatures and dates

D. Requirements and Procedures

A Chemical Information Sheet must be completed, submitted and approved BEFORE any chemical is allowed to be brought into and used in our plant or offices, including trial samples.

The Chemical Information Sheet must be approved by:

1) Supervisor of the person requesting acquisition of the chemical
2) Safety Committee Chairman
3) Quality Manager

In the event a request for a new chemical is not approved, the person rejecting the chemical will notify the originator of the Chemical Information Sheet.

The Chemical Information Sheet shall remain valid until a new chemical replaces that chemical. Upon approval of a new chemical, the old chemical's Chemical Information Sheet is deactivated and can no longer be purchased until a new Chemical Information sheet is submitted and approved. Deactivation of Chemical Information Sheets shall cause a chemical to be removed from the Approved Chemical List.

Quality Manager shall compile an Approved Chemical List and distribute this list to:

1) Purchasing Department
2) Receiving Clerk
3) Tool Room

Purchasing will maintain a copy of the Approved Chemical List and purchase only chemicals appearing on this list. Requests for procurement of chemicals not appearing on the Approved Chemical List shall be returned to the originator of the Purchase Requisition.

Personnel authorized to purchase supplies by Procurement Card Procedures are responsible to verify a chemical is on the Approved Chemical List, BEFORE ordering a chemical. The Approved Chemical List is available in the Tool Room, Receiving Department, Purchasing Department or Quality Manager's Office for review.

Receiving Clerk will maintain a copy of the Approved Chemical List and accept shipments of only chemicals appearing on the Approved Chemical List. Chemicals delivered but not approved shall be quarantined at the receiving dock area. Purchasing Department shall be notified to coordinate the initiation and approval of the Chemical Information Sheet or the return of the chemical to the supplier.

At least once each year, all Supervisors will verify the accuracy of the Approved Chemical List against the chemicals actually present in their area. Discrepancies will be brought to the Quality Manager's attention for appropriate action.

Section IV – Chemical Labels

A. Purpose

Chemical exposure may cause or contribute to many serious health effects, such as heart ailments, kidney and lung damage, sterility, cancer, burns or rashes. Some chemicals may also present physical safety hazards and have the potential to cause fire or explosions or other serious accidents.

The basic goal of this section of LHCP is to be sure that employees know what the hazards are and how to protect themselves.

The primary source of communicating chemical hazard information to the worker is through labels on the chemical containers.

To ensure that chemicals are properly labeled, LHCP addresses our responsibility to:

1) Assure that all chemical containers entering our facility and that all secondary containers are properly labeled.
2) Assure that all chemicals are stored in a manner so those labels are clearly visible and are maintained in a readable condition.
3) Assure that provisions are designed to replace damaged or missing labels with appropriate identification and warning, and,
4) Define Lovejoy's method for uniform labeling of chemical containers.

B. Responsibility

Overall management of activities relating to chemical container labeling will be the responsibility of the Director of Manufacturing.

Verification for proper labeling of chemical containers upon delivery to our facility is the responsibility of the Receiving Clerk.

Maintenance of labels on chemical containers in use or chemical containers in storage is the responsibility of the area Supervisor. This responsibility includes maintenance and replacement of damaged or unreadable chemical container labels.

Application and maintenance of secondary container labels is the responsibility of the person filling the secondary container.

Enforcement of chemical labeling issues is the responsibility of Director of Manufacturing.

C. Requirements

Each chemical container must be labeled, tagged or otherwise marked with the identity of its contents, show the hazards warnings appropriate for employee safety and must list the manufacturer's name and address.

Labels must be legible, written in English and be permanently displayed.

Lovejoy uniform chemical label will be added to all original chemical containers and to all secondary containers.

D. Procedures

The label on the original container supplied by the manufacturer or supplier will be acceptable, provided that all of the above requirements are met.

Since the format of chemical labels varies from manufacturer to manufacturer, Lovejoy has established a uniform label system. In addition tot he manufacturer's label, a Lovejoy uniform label will be added to each chemical container by the Receiving Clerk. This uniform label will be applied in a manner which:

1) Does not obstruct the manufacturer's label
2) Is clearly visible when the container is stored or used

The Lovejoy uniform label shall contain the following information:

a) Chemical name
b) Health risk code
c) Flammability risk code
d) Reactivity risk code
e) Protective equipment code
f) Manufacturer's name
g) Manufacturer's address

Wall charts explaining the Lovejoy uniform label system shall be prominently displayed throughout the facility.

The presence of an appropriate manufacturer's label on a chemical container shall be verified upon delivery to Lovejoy. In the event the required label is missing or damaged, the chemical container must be either relabeled with an appropriate Lovejoy label or the delivery of the chemical refused.

Primary source of required information for the Lovejoy uniform label is the Approved Chemical List.

UNDER NO CONDITIONS IS AN UNPROPERLY MARKED CHEMICAL CONTAINER RECEIVED IN OUR FACILITY ALLOWED TO LEAVE THE RECEIVING AREA WITHOUT PROPER LABELING!

Properly labeled chemical containers are to be stored in appropriate areas. All safety warnings appearing on the label concerning storage and handling will be strictly followed.

Chemical containers are to be stored in a manner that warning labels are unobstructed and in a readable condition.

Secondary containers shall be identified with a Lovejoy uniform label.

Note: SECONDARY CONTAINER is a container in which a chemical is temporarily stored until ready for use AND this container leaves an individual's direct control.

Example: You transfer coolant from the original 55-gallon drum to a 5-gallon pail. You use only a portion of the coolant from the 5-gallin pail in your machine. Now you put this partially filled 5-gallon pail down. The 5-gallon pail is a secondary container because it left your direct control. This 5-gallon pail must now be marked with a Lovejoy uniform label.

Section V – Material Safety Data Sheet

A. Requirements

Copies of Material Data Safety Data Sheet (MSDS) for chemicals in a work area are to be readily accessible to employees in that area. As a source of detailed information on hazards, MSDS's are to be located close tot he workers and readily available to them during each work shift.

B. Responsibility

Responsibility for obtaining the MSDS from the manufacturer or supplier will belong to the person preparing the Chemical Information Sheet.

Quality Manager shall maintain a master file of all MSDS's.

Safety Committee Chairman is responsible for:

1) determining appropriate personal protection requirements
2) Providing and maintaining personal protection equipment

Manager or Supervisor of a department or area shall:

1) Maintain MSDS's near the work area the chemical is used
2) Communicate locations of MSDS to the workers
3) Review MSDS with employees working with or near chemicals
4) Ensure that employees understand and follow MSDS warnings and safety procedures
5) Report unsafe conditions to Safety Committee regarding the use of chemicals
6) Take immediate action to protect workers from serious chemical safety issues

Each Lovejoy employee is responsible for:

1) Understanding the safe use and handling procedures for chemicals
2) Following safe use and handling procedures for chemicals
3) Reporting unsafe conditions to Supervisor regarding the use of chemicals

C. Procedures

MSDS for new chemicals shall be attached with the Chemical Information Sheet and used in the approval process.

Safety Committee shall review the MSDS to identify the hazards and determine the appropriate personal protective equipment and/or training required.

Quality Manager shall review MSDS to identify safe disposal methods of waste chemicals.

Upon final approval of a new chemical, Quality Manager shall:

1) Forward one copy of the MSDS to the Manager or Supervisor approving the Chemical Information Sheet.
2) Forward one copy of the MSDS to the Tool Room.
3) File the original MSDS in the master file.

Manager or Supervisor receiving an MSDS shall distribute the MSDS to all work areas using the chemicals and manage the chemicals as required. Only MSDS for current chemicals are to be maintained by the Manager or Supervisor.

Employees shall follow the warnings and instructions communicated on the MSDS. If the employee is unsure of the safe use of a chemical, the employee is required to ask the Supervisor for training and guidance.

The Safety Committee and Quality Manager, for impact of the changes on the use, handling and disposal of the chemical, shall review revised MSDS's.

Managers and Supervisors shall request additional or replacement copies of the MSDS from the Tool Room Attendant.

Persons damaging or removing MSDS sheets from binders or files will be subject to severe disciplinary action.

Section VI – Training and Communication

A. Requirement

A training and information program will be established concerning LHCP. Training will be provided to all Lovejoy employees at the time of initial assignment and whenever a new hazard is introduced to their work area.

Records will be kept to document the type of training provided and to whom.

B. Responsibility

Vice President, Human Resources is responsible for overall management of this section of LHCP. Vice President, Human Resources shall:

1) Maintain training records
2) Ensure that new hires are trained in Hazards Communication
   a) LHCP
   b) Chemical container labels
   c) MSDS
3) Coordinate additional training requested by Safety Committee and Managers or Supervisors

Manager or Supervisor is responsible to:

1) Maintain a list of safety training required for an employee
2) Identify and recommend additional training topics relating to chemical safety
3) Work with Human Resources and Safety Committee to provide required chemical safety training

C. Guidelines for Training

Each employee who may be exposed to hazardous chemicals when working must be provided information and be trained prior to initial assignment to work with a hazardous chemical or whenever the hazards change. "Exposure" or "exposed" means that an employee is subjected to a hazardous chemical in the course of employment through any route of entry (inhalation, ingestion, skin contact or absorption, etc.) and includes potential (e.g. accidental or possible) exposure.

Information and training may be done either by individual chemical or by categories of hazards (such as flammability).

A properly conducted training program will ensure comprehension and understanding. It is not sufficient to either read material to the workers or to simply hand them material to read. You want to create a climate where the workers feel free to ask questions.

The underlying purpose of LHCP is to reduce the incidence of chemical source illnesses and injuries.

Training programs are to be documented with a detailed lesson plan to assure consistency in training.

Lesson plans should include:

1) Topic name
2) Name of person conducting the training
3) Duration of training session
4) Training program format (classroom, video, discussion, etc.)
5) Copies of handouts
6) Outline of the training session

When conducting the training session, be sure to write down any questions asked that you did not know the answer. Do not be afraid to say, "I don't know". Seek help in finding the correct answer to the question and communicate the answer to the group as a follow up.

Submit a completed Training Roster to Vice President, Human Resources upon completion of a training class.

Better Production

Company Upgrades Blackening System To Improve Coupling Finish Quality

Product recognition in the marketplace is important to most companies. For Lovejoy Inc. (Downers Grove, Illinois), a manufacturer of power transmission couplings including curved jaw, elastomeric, rubber-in-shear, gear, grid, torsional and specialty models, a blackened hub and vivid orange label serve as its calling card in the industry.

For More Information
...about Birchwood Casey, visit Birchwood Casey's Showroom..

MMS ONLINE TOOLS

Link a Friend to This Page Via E-mail

The company recently implemented a series of changes to its blackening lines, which not only improved coupling quality and its recognizable appearance, but also saved the company thousands of dollars. The changes are helping Lovejoy achieve ISO 9001 compliance.

Ed Zdanowski, the Lovejoy quality manager who coordinated the blackening system evaluation and upgrade, reports that the new process finishes parts in half the time of the old method with much better quality finishes.

Lovejoy's blackening line was originally installed in Downers Grove in the early 1980s and utilized a heated (285° F) black oxide process. The system initially did the job, but as production volume grew and pollution regulation became more stringent in the 90s, it was evident that quality and pollution problems were increasing.

Mr. Zdanowski and his team identified several issues that needed attention. The process was increasingly difficult to control as production volume increased. Chemical solutions drifted out of balance frequently and had to be dumped. New solutions had to be mixed and re-heated to maintain correct blackening conditions, causing expensive unscheduled downtime and production delays. Finishes were not up to the quality level Lovejoy wanted, and finish consistency was difficult to maintain. Customers were demanding higher quality and Lovejoy saw that it had to deliver that quality. The process line produced an increasingly large volume of sludge and waste that had to be drummed up and sent outside for expensive waste treatment.

"In 1993, we hit an all time high, generating 126 drums of hazardous flammable and corrosive wastes from the black oxide line. Disposal costs that year exceeded $28,000," reported Mr. Zdanowski, "which was excessive for our operation." About the time Lovejoy evaluated its hot oxide line, the company was also preparing for ISO 9001 certification. Together, these factors mandated a better finishing process, and Mr. Zdanowski, who wanted to keep the finishing process in-house, was the designated team leader for getting it done.

When Mr. Zdanowski was asked to describe the ideal finish and process, he had four primary criteria: (1) a high quality, clean black finish; (2) corrosion resistance from creation to service; (3) the process itself should be safe and easy to operate, with simple bath control techniques; (4) the process should not pose an environmental hazard, and it must be easy to justify to Lovejoy's neighbors and board of directors.

After investigating several blackening options, Mr. Zdanowski's team chose the Birchwood Casey (Eden Prairie, Minnesota) Presto Black system for its Downers Grove facility. Lovejoy sent sample parts to Birchwood Casey's labs for development of the optimum process parameters. When the parts were returned, Lovejoy found the black finish to be very satisfactory in terms of appearance, corrosion resistance, thickness and uniformity.

Mr. Zdanowski then planned a production scale test to further analyze costs and performance. The new cold blackening process was installed right next to the old line and a two-week test was run without dismantling any of the existing equipment. For this test, Birchwood Casey provided the required process chemicals and a factory technician to train the operators. These tests proved conclusively that finish quality was higher and operating costs were lower in the Presto Black process. Mr. Zdanowski then decided to go forward with the full-scale retrofit of the existing tank line utilizing the new cold blackening process.

"We were on our way with the new system in a very short time with the help of Birchwood Casey technical personnel. Once installed, results were even better than in the production trials," Mr. Zdanowski stated. "One of the best features of the process was that the solutions operate as permanent baths with no dumping required. The bulk of the

hazardous waste collection and dispo- .as eliminated. Instead of 126 drums of waste . . ar costing $28,000 to dispose of, we now generate only four drums of spent filter tubes annually, which cost just $700."

Following the success at the Downers Grove plant, Lovejoy installed a second process line in its South Haven, Michigan, facility. Both use Birchwood Casey's customer assistance program, whereby process solutions and rinse water samples are regularly sent in for chemical analysis at no charge. This ensures ongoing chemical balance for top quality and economical part finishing for both operations while meeting environmental regulatory standards. "Not only are we saving on disposal costs," says Mr. Zdanowski, "we're able to gain important EPA regulatory relief by qualifying as a small quantity generator. Needless to say, we're very pleased with the results because our part productivity has been doubled and our quality standards met while saving money doing it."

ILLINOIS GENERATOR I.D. NUMBER REQUEST FORM

Generator I.D. numbers are normally assigned from data provided in Supplemental Waste Stream Permit Applications submitted by permitted sites. Generator I.D. numbers are arbitrarily assigned to those generators who do not have one when waste stream permit applications are received. This form is to be used by those generators that **only** ship waste out-of-state **or** to facilities having a generic permit to accept the generator's waste stream.

Please **TYPE or PRINT in ink. INCOMPLETE FORMS WILL BE REJECTED.** This form will be returned to you when a generator number has been assigned. Any questions should be directed to the Permit Section at 217/782-6762.

This number is being requested by VIVIAN I. DECOWSKI

1.0 EXECUTIVE SUMMARY

Lovejoy, Inc. (Lovejoy) retained MOSTARDI-PLATT ASSOCIATES, INC. (Mostardi Platt) to perform a Phase I Environmental Site Assessment of the real property commonly known as 2655 West Wisconsin Avenue in Downers Grove, Illinois (the Property). This Phase I Environmental Site Assessment was conducted to meet the loan application requirements of LaSalle Northwest National Bank, the required elements of the American Society of Testing and Materials (ASTM) Standard E1527-94 entitled, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the minimum requirements of Section 22 of the Illinois Environmental Protection Act, otherwise known as 415 ILCS 5/22.2. A glossary containing terms and definitions in the ASTM Standard E1527-94 is included in Appendix A.

This Phase I Environmental Site Assessment consists of the following:

- A visual inspection of the Property and accessible improvements
- An examination of title records
- A review of historical aerial photographs
- A visual inspection of adjoining and local properties as seen from the Property or from accessible public points of view
- Reviews of various geologic, soil, topographic, and wetlands maps
- A limited survey of building materials suspected of containing asbestos
- Interviews with government agency representatives and persons familiar with the Property

APPENDICES 24

- Discussions of possible wetlands on the Property.

A single story approximately 70,000 square-foot brick industrial building is situated on approximately 6.7 acres of land, which comprises the Property.

Lovejoy currently uses the Property to machine and manufacture power transmission couplings. Mostardi Platt understands that Lovejoy, the current tenant, has occupied the Property for approximately 26 years. The building on the Property is approximately 29 years old. Mr. Oscar Sitkowski, Advanced Manufacturing Manager of Lovejoy, stated that the Property was undeveloped prior to current development. Historical aerial photographs show that the Property was row crop farmland from at least the early 1950s until the construction of the building in approximately 1968.

ASTM defines a Recognized Environmental Condition as the presence or likely presence of any hazardous substances or petroleum products under conditions, that would indicate an existing release, a past release, or a material threat of a release of such substances into structures on the Property or into the ground, groundwater, or surface water of the Property.

Based upon the investigations, no Recognized Environmental Conditions were identified with respect to the Property.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I Environmental Site Assessment is to identify and report, to the extent feasible, Recognized Environmental Conditions at the Property. Mostardi Platt prepared this Phase I Environmental Site Assessment in accordance with the ASTM E1527-94 Standard Practice for Environmental Site Assessments and 415 ILCS 5/22.2 regulations. Performing a Phase I Environmental Assessment in accordance with E1527-94 and 415 ILCS may enable a user to satisfy one of the requirements to qualify for the Innocent Landowner Defense of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA); by demonstrating that the user performed "all appropriate inquiry into the previous ownership and uses of the Property consistent with good commercial or customary practice," as defined in United States Code 42, Section 9601 (35) (B).

2.2 Standard of Care

Mostardi Platt conducted this Phase I Environmental Site Assessment in accordance with generally accepted practices and in a manner consistent with that level of care

 © Mostardi-Platt Associates, Inc.

ordinarily exercised by members of our profession currently performing Phase I Environmental Site Assessments in the same locality and under similar conditions of time and accessibility of improvements and information. No other representations, expressed or implied, and no warranty or guarantee is included or intended to be part of this Phase I Environmental Site Assessment or report.

Mostardi Platt formulated this report using a defined scope of services considered appropriate on the date the service was authorized in writing, unless the scope of services or the methods used were later modified, in writing, and accepted by Mostardi Platt prior to performance.

2.3 Limitation of Use

This report is confidential and has been prepared for Lovejoy. Lovejoy indicated that a copy of this report may be issued to LaSalle Northwest National Bank. No additional party beyond those referenced above may use the information contained in this report without obtaining the written permission of both Mostardi Platt and Lovejoy. Mostardi Platt's duties and obligations extend to Lovejoy and to no other party. Mostardi Platt's duties and obligations to Lovejoy are not transferable to any person, corporation, or organization without the express written consent of both Lovejoy and Mostardi Platt.

This report must be read and interpreted as a whole. Individual sections and appendices of this report are dependent on the balance of this report, and on the terms, conditions, and stipulations contained in the proposal, the report, and any written amendments accepted by Mostardi Platt.

2.4 Limiting Conditions and Exceptions of Assessment

This report is based in part on information obtained from commercial data sources and interviews with government agency representatives, employees of operations located at the Property, and the current owners of the Property. Mostardi Platt assumes this information to be accurate. Mostardi Platt's findings are based on our observations, inquiries, and historical research. We identify Recognized Environmental Conditions using reasonably ascertainable information. Mostardi Platt does not represent that this Phase I Environmental Site Assessment reflects findings of all the information available for the Property, nor is it representative of future Property conditions. Activities or episodes that transpire subsequent to this Phase I Environmental Site Assessment are not considered in this investigation.

Mostardi Platt examined the building on the Property for exposed, reasonably accessible, suspect ACBM. However, we did not perform a comprehensive inspection as part of this Phase I Environmental Site Assessment. Mostardi Platt observed the

 © Mostardi-Platt Associates, Inc.

surface of the Property for indications of Recognized Environmental Conditions. However, a subsurface examination designed to collect soil and groundwater samples and to analyze for the presence of hazardous substances, petroleum, or chemicals or their constituents, is beyond the scope of this Phase I Environmental Site Assessment. Due to areas covered with machines and raw materials, Mostardi Platt was unable to inspect the entire surface of the Property.

2.5 Authorization

Mostardi Platt initiated this Phase I Environmental Site Assessment pursuant to written authorization received from Mr. Tom Brininger, Vice President of Finance of Lovejoy on August 5, 1997. Mostardi Platt performed this Phase I Environmental Site Assessment subject to the terms and conditions of Mostardi Platt Proposal 012476, dated August 5, 1997. Mostardi Platt Proposal 012476 contains the scope of services, a cost estimate, and general terms and conditions governing this Phase I Environmental Site Assessment. A copy of Mostardi Platt's Proposal for this Phase I Environmental Site Assessment is included in Appendix B.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The Property lies north of Elmore Street, east of Katrine Avenue, south of Wisconsin Avenue, and west of Janes Avenue at 2655 West Wisconsin Avenue in Downers Grove, DuPage County, Illinois. Maps showing the location of the Property are included in Appendix C.

The legal description of the Property was obtained from Mr. Brininger is included in Appendix D.

3.2 Site and Vicinity Characteristics

A Plat of Survey, prepared by Woods and Associates and dated August 24, 1970, shows the Property has street frontages of approximately 510 feet along Wisconsin Avenue and approximately 568 feet along Katrine Avenue and contains a total area of approximately 6.7 acres. A copy of the Plat of Survey showing the configuration of the Property is included in Appendix E.

The Property is located in a mixed-use residential and industrial area of Downers Grove, Illinois. Mostardi Platt observed local area properties for current uses or conditions that may create Recognized Environmental Conditions on the Property.

© Mostardi-Platt Associates, Inc.

Mostardi Platt saw no surficial evidence to indicate that adjoining properties may have created Recognized Environmental Conditions on the Property.

3.3 Surface Description and Improvements

The Property has been improved with one building and asphalt-paved parking and driveway areas. The building covers approximately 20% of the surface of the Property with parking and driveway areas located on the north and south sides of the Property. In addition, an approximately 3.5 acre grassy area is located on the east side of the Property.

Access to the Property is via Wisconsin Avenue, which runs east and west along the north side of the Property. Village of Downers Grove storm sewers and sanitary sewers run beneath Wisconsin Avenue and service the building from the north. The Village of Downers Grove provides potable water to the Property, which is obtained from Lake Michigan. Mostardi Platt saw no ground water wells on the Property during the inspection or evidence of a septic field for sanitary wastewater disposal on the Property during the inspection.

A single story approximately 70,000 square foot building is located on the Property. The building is heated by natural gas-fired furnaces and unit heaters. Natural gas is supplied to the Property by Northern Illinois Gas Company. The building is cooled by electric roof-mounted air conditioners. Electricity is supplied to the Property by ComEd.

Mostardi Platt photographed selected sites, operations, and improvements located at or near the Property to support this written report. The photographs are included in Appendix F of this report.

3.4 Current and Historical Property Use

Lovejoy currently uses the Property to machine and manufacture power transmission couplings. Mr. Sitkowski stated that Lovejoy has occupied the Property since 1971. Mostardi Platt reviewed historical aerial photographs and observed that the Property was used as row crop farmland prior to construction of the building in approximately 1968. Mostardi Platt observed no Environmental Conditions regarding the current and historical Property use.

3.5 Current and Historical Use of Adjoining Properties

The adjoining properties consist of various industrial buildings and single family homes. Mostardi Platt reviewed historical aerial photographs and observed that the

© Mostardi-Platt Associates, Inc.

southern adjoining properties have been improved with residential dwellings since at least 1951. The remaining adjoining properties were row crop farmland prior to the development of the area in the 1960s. Mostardi Platt observed no Recognized Environmental Conditions regarding the current and historical use of adjoining properties. The following is a listing of the current adjoining properties including the facility name, address, operation, and direction from the Property.

ADJOINING PROPERTIES			
Facility Name	**Address**	**Operation**	**Direction from the Property**
Novatis Seeds, Inc.	Wisconsin Avenue Downers Grove, Illinois	Light Industrial	Northwest
Downers Grove Fire Department Station No. 1	Wisconsin Avenue Downers Grove, Illinois	Fire Department	North
Insulation Products Corporation	2550 Wisconsin Avenue Downers Grove, Illinois	Light Industrial	Northeast
Flexible Steel Lacing Company	Wisconsin Avenue Downers Grove, Illinois	Industrial	East
Single Family Homes	Downers Grove, Illinois	Residential	South
The Morey Corporation	2659 Wisconsin Avenue Downers Grove, Illinois	Light Industrial	West

4.0 RECORDS REVIEW

Mostardi Platt obtained and reviewed published, reasonably ascertainable information concerning the physical setting and environmental status of the Property. Mostardi Platt obtained that information from the following sources:

- Records on file at Lisle Township Assessors, Chicago Title and Trust Company Offices, and the Village of Downers Grove Building and Fire Departments
- Commercial enterprises that compile federal, state, and local environmental regulatory agency lists
- A topographic map prepared by the United States Geological Survey (USGS)

© Mostardi-Platt Associates, Inc.

- Aerial photographs obtained from Chicago Aerial Photo Services and the Northeastern Illinois Planning Commission
- Maps and publications prepared by the Illinois State Geological Survey (ISGS)

Summaries of our reviews are contained in the following sections.

4.1 Topography and Regional Subsurface Geology

The Property is relatively flat with a maximum elevation difference estimated to be less than five feet across the surface of the Property. Mostardi Platt saw no grade changes to the Property as judged relative to the topography of adjoining properties and Mostardi Platt's examination of a topographic map. The topographic map prepared by the USGS (Wheaton, Illinois Quadrangle, 1962, photorevised 1972 and 1980) indicates that the Property is approximately 735 feet above mean sea level. Based on our review of this topographic map, the regional surface water flow appears to be in a northerly direction toward St. Joseph Creek, which is located approximately 0.5 miles to the northeast of the Property. A copy of the USGS topographic map is included in Appendix G.

Mostardi Platt reviewed the ISGS publication and maps entitled *Stack-Unit Mapping of Geologic Materials in Illinois to a Depth of Fifteen Meters* and *Potential for Contamination of Shallow Aquifers in Illinois.* The *Stack-Unit Mapping of Geologic Materials in Illinois to a Depth of Fifteen Meters* publication shows the distribution of geologic material vertically in order of occurrence to a specified depth and horizontally over a specified area. The *Potential for Contamination of Shallow Aquifers in Illinois* publication combines hydrogeologic properties and vertical position of geologic materials to rate the potential for contamination of shallow aquifers[1]. The rating ranges from A to G with A representing the highest potential and E, F, and G representing the lowest potentials for shallow aquifer impacts.

According to the ISGS publication, *Stack-Unit Mapping of Geologic Materials in Illinois to a Depth of Fifteen Meters*, soil in the area of the Property consists of clayey and silty till[2] soil of the Wadsworth Member of the Wedron Formation. Soil in the area of the Property is generally described as uniform, relatively impermeable till material of more than 50 feet thick.

---

[1] "Aquifer" (as used in this report) means a water-bearing subsurface zone that is porous and permeable enough to produce a volume of water sufficient to sustain industrial, agricultural, or residential uses.

[2] "Till" means those unconsolidated materials deposited directly from a glacier without reworking by water (e.g., rivers or streams).

 © Mostardi-Platt Associates, Inc.

In addition, the characteristics of native soil in the area of the Property would be expected to exhibit hydraulic conductivities[3] between 1×10^{-9} and 1×10^{-7} centimeters per second. Hydraulic conductivities in those ranges suggest that compound migration would be impeded by native clayey soil beneath the surface of the Property.

According to the ISGS publication, *Potential for Contamination of Shallow Aquifers in Illinois*, the potential for contamination of shallow aquifers in the area of the Property is rated E. This rating means the potential for groundwater contamination from surface spillage of chemical or petroleum or other potentially hazardous compounds is low because there is either uniform, relatively impermeable silty or clayey till or other fine-grained materials more than 50 feet thick, and no sand and gravel identified.

4.2 Federal, State, and Local Databases and Information Review

Mostardi Platt has access to various federal, state, and commercial information services that provide information on compliance with environmental law and investigations of reported violations of environmental law. Mostardi Platt obtained certain state and federal environmental database information from Environmental Risk Information & Imaging Services (ERIIS). ERIIS is a commercial provider of state and federal environmental database information. Mostardi Platt's review of the ERIIS Environmental Data Report disclosed the information summarized in the following subsections. A copy of the ERIIS Environmental Data Report is included in Appendix A.

4.2.1 National Priority List (NPL)

The National Priority List (NPL) is a listing of uncontrolled or abandoned hazardous waste sites identified by the United States Environmental Protection Agency (USEPA) for remedial action under the Superfund Program. Mostardi Platt reviewed ERIIS' summary of the June 6, 1997 NPL in an effort to identify reported NPL sites located within approximately one mile of the Property. ERIIS listed no reported NPL sites within approximately one mile of the Property.

4.2.2 Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)

The CERCLIS list is a compilation of sites that the USEPA has investigated or is currently investigating regarding a release or a threatened release of certain hazardous

[3] "Hydraulic conductivity" is a measure of the ability of soil or rock to conduct the flow of water. Hydraulic conductivity is usually stated in centimeters per second (cm/s), which is, in essence, velocity. For example, low hydraulic conductivity values would be 1×10^{-9} to 1×10^{-6} cm/s (clay), while high hydraulic conductivity would be 1×10^{-4} cm/s, or greater, (sand or gravel).

© Mostardi-Platt Associates, Inc.

substances regulated under CERCLA. Mostardi Platt reviewed ERIIS' summary of the June 6, 1997 CERCLIS list in an effort to identify reported CERCLIS sites located within approximately one-half mile of the Property. ERIIS listed no reported CERCLIS sites located within approximately one-half mile of the Property.

4.2.3 Resource Conservation and Recovery Act (RCRA)

The Resource Conservation and Recovery Act (RCRA) program identifies and tracks regulated hazardous waste from the point of generation to the point of disposal. The USEPA maintains a list of facilities that generate, store, transport, treat, or dispose regulated hazardous waste. The simple listing of a facility in the RCRA database does not automatically indicate that a Recognized Environmental Condition exists. Mostardi Platt reviewed ERIIS' summary of the October 1, 1996 USEPA RCRA Small- and Large-Quantity Hazardous Waste Generators lists in an effort to identify such facilities located within approximately one-quarter mile of the Property. Mostardi Platt also reviewed ERIIS' summary of the October 1, 1996 USEPA RCRA Treatment, Storage, and/or Disposal Sites list in an effort to identify those reported facilities located within approximately one mile of the Property. ERIIS listed the following reported USEPA RCRA facilities of any of these types located within the above-referenced distances from the Property.

USEPA RCRA SMALL-QUANTITY GENERATORS		
Facility ID No.	**Name**	**Address**
ILD025415266	*Morey Corporation	2659 Wisconsin Avenue Downers Grove, Illinois
ILD984907972	WPC Machinery Corporation	2700 Wisconsin Avenue Downers Grove, Illinois
ILD984848564	Norwood Marking Sys.	2538 Wisconsin Avenue Downers Grove, Illinois
ILD984829986	Montgomery Ward and Company	5365 Walnut Avenue Downers Grove, Illinois
ILD984789776	CVP Systems, Inc.	2518 Wisconsin Avenue Downers Grove, Illinois
ILD984820936	Heuft, Inc.	2512 Wisconsin Avenue Downers Grove, Illinois
ILD055421705	Walberg Arvid C. & Co., Inc.	2741 Curtiss Street Downers Grove, Illinois

© Mostardi-Platt Associates, Inc.

USEPA RCRA SMALL-QUANTITY GENERATORS		
Facility ID No.	**Name**	**Address**
ILD984782706	Hilti	2727 Curtiss Street Downers Grove, Illinois
ILD982063869	Kaspar Walter Service	2747 Curtiss Street Downers Grove, Illinois

* Adjoining Property

USEPA RCRA LARGE-QUANTITY GENERATORS		
Facility ID No.	**Name**	**Address**
ILD039344809	*Lovejoy, Inc.	2655 Wisconsin Avenue Downers Grove, Illinois
ILD005094230	**Flexible Steel Lacing	2525 Wisconsin Avenue Downers Grove, Illinois
ILD980614242	Lovejoy Electronics, Inc.	5411 Walnut Avenue Downers Grove, Illinois

* The Property
** Adjoining Property

The presence of a USEPA RCRA small or large quantity hazardous waste generator in the Property area does not, in and of itself, indicate the existence of a Recognized Environmental Condition at the Property. This listing provides information regarding only the name and type of hazardous waste generators in the general area of the Property. This listing can be used to determine the number of commercial or industrial hazardous waste generators in the general area of the Property.

4.2.4 Registered Underground Storage Tanks (USTs)

Owners and operators are required to register certain types of USTs with the Office of the Illinois State Fire Marshal (OSFM). The OSFM maintains a current list of registered USTs for the state of Illinois. Mostardi Platt reviewed ERIIS' summary of the May 1, 1997 OSFM list of registered USTs in an effort to identify registered USTs on the Property or adjoining properties. ERIIS listed no registered USTs located on the Property or adjoining properties.

© Mostardi-Platt Associates, Inc.

4.2.5 Leaking Underground Storage Tank (LUST) Incident Reports

The Illinois Environmental Protection Agency (IEPA) publishes a list of reported leaking underground storage tanks (LUSTs). Users of the list are required to provide the following notice: "This list of LUST sites is a nonverified, unconfirmed list and should not be used or considered as a final IEPA determination regarding whether releases have occurred at the sites on the list. Sites have been included in this list based on reports of releases at the site received by the IEPA. The IEPA, in providing this list, makes no representations regarding the accuracy of the information contained in the list. The IEPA is in the process of confirming the type and size of the release, if any, the proper owner or operator, and the location of each site." Mostardi Platt reviewed ERIIS' summary of the February 4, 1997 IEPA LUST incident list in an effort to identify reported LUST incidents at facilities within approximately one-half mile of the Property. ERIIS listed the following LUST incidents reported at facilities located within approximately one-half mile of the Property.

REPORTED LEAKING UNDERGROUND STORAGE TANKS				
Incident No.	**Name**	**Address**	**Distance and Direction**	**Year Reported**
912371	Baker Motor Express, Inc.	5355 Walnut Avenue Downers Grove, Illinois	0.14 Miles Northwest	1991
880876	Molex	5224 Katrine Avenue Downers Grove, Illinois	0.15 Miles Northeast	1988
920115	Downers Grove Ice Arena Ltd. Partnership	5501 Walnut Avenue Downers Grove, Illinois	0.20 Miles Southwest	1992
913065	Suburban Moving & Storage	2400 Wisconsin Avenue Downers Grove, Illinois	0.29 Miles Northeast	1991
930214	Arrow Gear Company	2301 Curtiss Street Downers Grove, Illinois	0.45 Miles Northeast	1993

No additional information was available to Mostardi Platt during the course of this Phase I Environmental Site Assessment to determine the potential environmental impact, if any, to the Property from the above-referenced LUST incidents. Mostardi Platt believes that the environmental impact to the Property, if any, from these reported LUST incidents would be diminished based on the distances from the Property, the presence of structures, roads, and underground utilities that may redirect the flow of contaminants between this these reported LUST incidents and the Property, the projected groundwater flow direction toward the north, and published information

describing the regional subsurface geology consisting of relatively impermeable clayey and silty till.

4.2.6 Emergency Response Notification System (ERNS)

The Emergency Response Notification System (ERNS) is a national database of reported releases of petroleum and hazardous substances. The database contains information from spill reports made to the USEPA, the United States Coast Guard, the National Response Center, and the United States Department of Transportation. Mostardi Platt reviewed ERIIS' summary of the June 11, 1997 ERNS list in an effort to identify reported ERNS incidents on the Property or adjoining properties. ERIIS listed no reported ERNS incidents on the Property or adjoining properties.

4.2.7 Area Solid Waste Disposal Sites (SWDS)

The Northeastern Illinois Planning Commission (NIPC) compiles a list of solid waste disposal sites titled the *Historical Inventory of Solid Waste Disposal Sites* (SWDS) *in Northeastern Illinois*. This list was last revised in 1989. Mostardi Platt reviewed the NIPC SWDS list in an effort to identify reported NIPC SWDS located within approximately one mile of the Property. NIPC listed no reported SWDS within approximately one mile of the Property.

4.2.8 State Category Listing (SCL)

The state of Illinois maintains list of sites identified for remedial action under the state of Illinois equivalent of the Superfund Program. This category listing also includes a mention of voluntary cleanup sites. Mostardi Platt reviewed ERIIS' summary of the June 1, 1997 SCL in an effort to identify reported SCL sites within approximately one mile of the Property. ERIIS listed no SCL sites within approximately one mile of the Property.

4.2.9 Illinois Permitted Solid Waste/Inventory Facilities (SWFs)

The IEPA maintains a list of Illinois Permitted Solid Waste Facilities (SWFs). This list contains sites that are regulated for solid waste disposal by the state of Illinois. This database also includes additional sites from the Illinois Inventory including barrel and tank areas; surface impoundments; illegal dumps and waste piles; and land application, treatment, underground injection, recycling, and transfer facilities. Mostardi Platt reviewed ERIIS' summary of the August 30, 1993 SWF list in an effort to identify reported SWFs within approximately one-half mile of the Property. ERIIS listed no reported SWFs located within approximately one-half mile of the Property.

© Mostardi-Platt Associates, Inc.

4.2.10 Unmappable Sites

A limitation of some federal, state, and local government databases is that they often contain incomplete or incorrect address information. Without proper addresses, ERIIS cannot locate and map these sites. Unmappable sites located by Mostardi Platt during the inspection of local area properties are included in each applicable section. The following table lists each unmappable facility name, general location, and name of applicable federal, state, or local government database.

UNMAPPABLE SITES		
Facility Name	**General Location**	**Government Database**
One Hour Cleaners	21 W 265 Maple Avenue Downers Grove, Illinois	RCRA-SG
Goodyear Service Center	21 W 277 Maple Avenue Downers Grove, Illinois	RCRA-SG
Borg Pontiac, Inc.	2300 Cedar Avenue Downers Grove, Illinois	RCRA-SG
Downers Grove HHW Collection	Belmont and Curtiss Site B Downers Grove, Illinois	RCRA-SG
DuPage Forest Preserve District Lemont	Davey Road, Half Mile West of Orch. R Downers Grove, Illinois	RCRA-SG
University of Illinois at Chicago	21 W 042 Finley Road Downers Grove, Illinois	UST

4.3 Historical Records, Photographs, and Maps Review

Mostardi Platt gathered information from county records, government agencies, and commercial enterprises regarding historical use of the Property and size and age of improvements at the Property. The following sections summarize Mostardi Platt's review of these historical records, photographs, and maps.

4.3.1 Village of Downers Grove Fire Department Records Review

Mostardi Platt interviewed Inspector Jim Stupka of the Village of Downers Grove Fire Department, which serves the Property, to inquire about flammable or hazardous material currently or formerly stored on the Property and the current or former presence of USTs on the Property. According to Inspector Stupka, the Village of

© Mostardi-Platt Associates, Inc.

Downers Grove Fire Department has no record or knowledge of USTs or hazardous material incidents on the Property.

4.3.2 Village of Downers Grove Building Department Records Review

Mostardi Platt reviewed the Village of Downers Grove Building Department records for the Property as part of this Phase I Environmental Site Assessment. According to the Village of Downers Grove Building Department records, a permit for building construction on the Property was applied for by Harper Wyman Company in 1965. Various permits were also applied for by Lovejoy in the 1970s and 1980s. Mostardi Platt identified no Recognized Environmental Conditions regarding the Property during the Village of Downers Grove Building Department records review.

4.3.3 Lisle Township Assessor's Records Review

Mostardi Platt reviewed the Lisle Township Assessor's records for the Property on August 14, 1997 as part of this Phase I Environmental Site Assessment. According to the Lisle Township Assessor's records, an approximately 70,000 square foot building is located on the Property that was occupied by Lovejoy and Harper Wyman in the 1970s. Mostardi Platt identified no Recognized Environmental Conditions regarding the Property as a result of the review of the Lisle Township Assessor's records.

4.3.4 Sanborn Fire Insurance Map Review

Sanborn Fire Insurance (Sanborn) Maps were developed to assist insurance companies in setting fire insurance rates. These maps frequently show the existence and location of aboveground storage tanks (ASTs) and USTs, structures, improvements, and operations on the Property at various times Sanborn Mapping & Geographic Information Service (Sanborn) is a commercial enterprise that specializes in providing historical mapping services to the environmental industry. Mostardi Platt attempted to obtain site-specific, historical Sanborn Maps from ERIIS to review as part of this Phase I Environmental Site Assessment. According to the ERIIS Report, no Sanborn Maps were found for the Property in the ERIIS Sanborn collection. A copy of the ERIIS Sanborn Map Site Search Report is included in Appendix I.

4.3.5 Aerial Photograph Review

Mostardi Platt reviewed individual, historical, stereo, and non-stereo, aerial photographs of the Property, obtained from Chicago Aerial Photo Services and the Northeastern Illinois Planning Commission. Mostardi Platt reviewed the 1951, 1956, 1963, 1970, 1975, 1980, 1985, 1990, and 1995 aerial photographs in an effort to identify Recognized Environmental Conditions on the Property.

© Mostardi-Platt Associates, Inc.

The 1951 and 1956 aerial photographs show the Property and the adjoining properties to the north, east, and west as row crop farmland. The adjoining properties to the south are improved with residential dwellings.

The 1963 aerial photograph shows the Property and the adjoining properties to the northeast, east and west as undeveloped. The adjoining property to the northwest is improved with an industrial building and the adjoining properties to the south are improved with residential dwellings.

The 1970 and 1975 aerial photographs show the Property improved with a building and a parking lot in a configuration consistent with the one observed during the property inspection. The adjoining properties are in the same general configuration observed on the 1963 aerial photographs.

The 1980, 1985, 1990, and 1995 aerial photographs shows the Property and the adjoining properties to the north, west and south in the same general configuration shown in the 1975 aerial photograph. The adjoining properties to the north, northeast, east, and west are all improved with buildings which appear to be industrial and they are also in the same general configuration observed during the property inspection.

Mostardi Platt observed no evidence of fill activity, surface scarring, staining, or other Recognized Environmental Conditions on the Property during this aerial photograph review.

5.0 SITE RECONNAISSANCE

Mostardi Platt inspected the Property on August 14,1997. Mr. Garrick J. Milkeris, Project Manager of Mostardi Platt, was accompanied by Mr. Sitkowski. Mr. Sitkowski answered questions concerning the current and past use of the Property, the facility operations, and recent improvements to the Property. Mostardi Platt looked for the following items that may have an environmental impact on the Property:

- Chemicals stored on the Property
- Suspect waste generation practices
- Unusual surface conditions
- USTs and ASTs
- Equipment suspected of containing Polychlorinated Biphenyls (PCBs)
- Building materials suspected of containing asbestos
- Wetlands
- Suspect pesticide and herbicide application practices

© Mostardi-Platt Associates, Inc.

- Other substances, materials, or geologic environments that may have an environmental impact on the Property.

The following sections summarize our observations and interviews during the inspection.

5.1 Stored Chemicals

Mostardi Platt looked for chemicals and potentially hazardous substances stored on the Property during the inspection. Mostardi Platt found the following chemicals and potentially hazardous substances stored on the Property.

CHEMICALS AND POTENTIALLY HAZARDOUS SUBSTANCES		
Type of Chemical	**General Location**	**Approximate Quantity**
Various Lubricating Oils	Southwest Side of Building	500 Gallons
Coolant	Southwest Side of Building	500 Gallons
Prestoprep (Black Oxide Process)	Black Oxide Process Area	100 Gallons
Prestoblack PBR	Black Oxide Process Area	100 Gallons
Various Detergents	Black Oxide Process Area	100 Gallons

In addition, Mostardi Platt observed commonly available janitorial and cleaning supplies stored in the buildings during the Property inspection. Mostardi Platt saw no improper chemical storage practices or uncontrolled releases of chemicals on the Property during the inspection.

As a point of information, the federal Emergency Planning and Community Right-to-Know Act (SARA Title III) may require that an inventory of chemicals stored at a facility in excess of threshold quantities be provided to various local, state, and federal agencies. Those chemicals that require reporting are defined by the Occupational Safety and Health Administration (OSHA) as posing physical or health hazards, and those substances identified as extremely hazardous by the USEPA. OSHA regulations require that material safety data sheets (MSDS) be prepared and made available to employees for any hazardous chemical. SARA Title III may require information to be filed with the local fire district, the local emergency planning committee, and the appointed state emergency response commission.

As a part of each Phase I Environmental Site Assessment, Mostardi Platt routinely requests to review each facility's chemical storage and reporting records to identify

 © Mostardi-Platt Associates, Inc.

potential impacts on the Property from chemicals used and stored thereon. Mostardi Platt's inquiry regarding those records is limited to identifying potential environmental impacts on the Property. It is not Mostardi Platt's purpose in a Phase I Environmental Site Assessment to make any evaluation or determination as to whether or not a particular facility is regulated under or is in compliance with SARA Title III.

Mostardi Platt asked Mr. Sitkowski if MSDS are maintained on file for chemicals stored on the Property. Mostardi Platt reviewed the MSDS kept on file at the Property and the MSDS appeared to be complete and in order.

5.2 Waste Generation

Mostardi Platt looked for evidence of the current generation of waste and the current waste disposal practices at the Property during the inspection. According to Mr. Sitkowski, types of waste generated on the Property consist of black oxide process waste, waste oil, and general municipal refuse.

Black oxide process waste is collected, placed in 55-gallon steel drums, and removed from the Property on a bi-monthly basis, and disposed of by Environmental Waste Services. Waste oil is collected in a 600-gallon above ground storage tank, removed from the Property on a bi-monthly basis, and disposed of by Beaver Oil Company. General municipal refuse is collected in commercial dumpsters and removed from the Property on a daily basis by Browning Ferris Industries.

As a point of information, various state and federal statutes and regulations use definitions, categories, and characteristics to define hazardous wastes and their constituents. The federal government describes hazardous waste based upon the characteristics of ignitability, corrosivity, reactivity, or toxicity as described in RCRA. In addition, RCRA characterizes as hazardous, wastes that are generated by specific types of industrial operations. Except for the black oxide process, Mostardi Platt observed no operations on the Property during the inspection that would be expected to generate hazardous wastes.

5.3 Interior and Exterior Property Surface Conditions

Mostardi Platt saw several floor drains inside the building during the inspection. The floor drains appeared in good condition with no evidence of staining or abnormal appearance. Mostardi Platt did not see a sump pit in the building during the inspection. Due to areas inside the building covered with machines and stored materials, Mostardi Platt was unable to fully inspect the inside of the building on the Property.

© Mostardi-Platt Associates, Inc.

Mostardi Platt observed no evidence of soil discoloration, or stressed or defoliated vegetation on the surface of the Property during the inspection. In addition, Mostardi Platt saw no surficial evidence of pesticide or herbicide application practices or contamination on the Property.

Mostardi Platt saw no pits, ponds, lagoons, or stained pavement on the surface of the Property during the inspection. Mostardi Platt identified no wells or septic systems on the Property. Wastewater is discharged into the sanitary sewer and surface water runoff from the roof and paved surfaces on the Property is directed into the storm sewer. Mostardi Platt saw no surficial evidence of open dumping or landfilling activities on the Property during the inspection.

5.4 Underground and Aboveground Storage Tanks

Mostardi Platt visually inspected the Property for surficial evidence of USTs and ASTs during the inspection. Mostardi Platt found no fillpipes, manways, vent lines, or any other physical evidence of an UST on the Property. In addition, Mr. Sitkowski indicated that he is aware of no USTs located on the Property and that if USTs were present on the Property, he would be aware of them. Mostardi Platt observed one 600-gallon waste oil AST on the east side of the building. No staining was observed around this AST.

The building on the Property is currently heated by natural gas-fired furnaces and unit heaters, which would not require the storage of heating oil.

5.5 Polychlorinated Biphenyls (PCBs)

Mostardi Platt saw one concrete pad-mounted electrical transformer on the southeast side of the building during the inspection. The electrical transformer appeared to be in good condition with no visible leaks or irregularities. Areas around this electrical transformer exhibited no visible staining or abnormal appearance.

As a point of information, federal regulations issued pursuant to the Toxic Substance Control Act (TSCA) require that electrical transformers containing PCBs be marked as such. Mostardi Platt observed no labels indicating PCB content on the electrical transformer at the Property.

Mostardi Platt also inspected the inside of the building to identify additional electrical equipment that may contain PCBs, such as fluorescent light ballasts, hydraulic lifts, and electrical capacitors. Fluorescent light ballasts, hydraulic lifts, and electrical capacitors have been known to contain PCBs in their insulating or lubricating oils. Specific regulatory requirements may apply to the disposal of PCB-containing electrical

© Mostardi-Platt Associates, Inc.

equipment and hydraulic fluids. Fluorescent lights were observed in the building. However, no leaks or stains were observed in association with the fluorescent light ballasts. Mostardi Platt did not observe hydraulic lifts or electrical capacitors on the Property during the inspection.

5.6 Asbestos Survey Procedures

Except for those relating to school buildings and certain OSHA requirements, there are no federal or state regulations regarding asbestos sampling techniques or mandating the management, abatement, or removal of asbestos. The Asbestos Hazard Emergency Response Act (AHERA) governs the testing procedures, management, abatement, and removal standards for ACBM in public and private grade school buildings (kindergarten through 12th grade). No similar statute is applicable to industrial, commercial, or residential structures, provided that renovation or demolition activities are not scheduled for the building.

Mostardi Platt performed a limited, non-AHERA, survey of the interior of the building during the Property inspection. This survey was not intended to be a comprehensive search for all ACBM at the Property. The survey was designed to identify reasonably accessible material commonly suspected of containing asbestos within the proposed scope of services. In so doing, Mostardi Platt visually inspected reasonably accessible areas in the interior of the building to determine the existence and condition of suspect ACBM. Mostardi Platt observed suspect ACBM in the forms of floor tile and ceiling in the building during the Property inspection.

Mostardi Platt did not sample these materials because we did not wish to disturb previously undamaged materials in occupied areas. Furthermore, asbestos sampling is beyond the scope of this Phase I Environmental Site Assessment. Finally, these findings are not adequate for the preparation of cost estimates for the management or abatement of the suspect ACBM identified at the Property.

As a point of information, renovation or demolition of areas containing ACBM may be regulated in accordance with the National Emissions Standards for Hazardous Air Pollutants (NESHAP) and by OSHA regulations. ACBM should not be altered without consulting the NESHAP and OSHA regulations. Furthermore, if ACBM is to be removed, a qualified asbestos abatement contractor should be contacted.

© Mostardi-Platt Associates, Inc.

5.7 Wetlands

Mostardi Platt observed no ponded water, flowing water, saturated soils, or hydrophytic vegetation at the Property during the inspection. According to the National Wetlands Inventory Map for the Property (Wheaton, Illinois Quadrangle, April, 1983), the Property contains no identified wetlands. According to the Soil Survey of DuPage and Parts of Cook Counties, the Property contains Urban land-Orthents complex series soil, which is not considered a hydric soil (soil that developed under wet conditions). In addition, extensive identification and delineation of wetlands is beyond the scope of services for this Phase I Environmental Site Assessment.

© Mostardi-Platt Associates, Inc.

6.0 FINDINGS AND CONCLUSIONS

Mostardi Platt has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-94 and Section 22 of the Illinois Environmental Protection Act, otherwise known as 415 ILCS 5/22.2, of 2655 West Wisconsin Avenue in Downers Grove, Illinois (the Property). Any exceptions to, or deletions from, the Standard Practice are described in Section 2.4 of this report. This Phase I Environmental Site Assessment has revealed no evidence of a Recognized Environmental Condition in connection with the Property.

© Mostardi-Platt Associates, Inc.

7.0 AFFIRMATION

The undersigned hereby affirms that:

I am the environmental professional who prepared the audit and the facts stated in the report are true and made under a penalty of perjury as defined in Section 32-2 of the Illinois Criminal Code of 1961.

The reported analyses, opinions, and conclusions are personal, unbiased, professional, and limited only by the assumptions and qualifications stated herein. Compensation is not contingent upon an action or an event resulting from the analyses, opinions, or conclusions in, or the use of, this report.

This Phase I Environmental Site Assessment has been performed in accordance with applicable legal requirements and in accordance with accepted practices prevailing in the environmental industries. The person who performed the investigation is properly licensed and certified in accordance with the requirements of federal, state, and local laws, rules, and regulations, as applicable.

I have no present or prospective interest in the Property or the parties involved.

Respectfully submitted,

MOSTARDI-PLATT ASSOCIATES, INC.

Garrick J. Milkeris
Project Manager

8.0 ENVIRONMENTAL PROFESSIONAL CREDENTIALS

Garrick J. Milkeris

Project Manager

Education

Bachelor of Science—Environmental Health and Chemistry, Illinois State University, Normal, Illinois, 1992

Environmental Experience

Mr. Milkeris has more than four years of experience in the environmental field. He is currently a member of Mostardi Platt's Environmental Compliance Management department. His pertinent experience includes the following:

- Conducting Phase I Environmental Site Assessments on industrial, commercial, and residential properties throughout Illinois including on-site investigations, aerial photograph and topographic map reviews, and interpretations of historical research
- Providing hazardous waste management services to private industry and government agencies including oversight of PCB decontamination projects
- Providing project oversight and soil and groundwater sampling during remediation projects
- Performing analyses and characterizations using in-field analytical equipment
- Supervising and managing asbestos abatement in public schools and commercial high rise buildings
- Collecting and analyzing environmental air samples to test indoor air quality and personal exposures for a variety of contaminants

Professional Certifications/Licenses

OSHA Hazardous Waste Site Worker
AHERA Asbestos Building Inspector
AHERA Asbestos Project Manager, State of Illinois
AHERA Air Sampling Professional, State of Illinois
IDPH Lead Inspector

Appendix A: Glossary

GLOSSARY

adjoining properties — any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them.

aerial photographs — photographs taken from an airplane or helicopter of areas encompassing the property. Aerial photographs are often available from government agencies or private collections unique to a local area.

appropriate inquiry — that inquiry constituting "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in CERCLA, 42 USC § 9601(35)(B), that will give a party to a commercial real estate transaction the innocent landowner defense to CERCLA liability (42 USC § 9601(A) and (B) and 9607(b)(3), assuming compliance with other elements of the defense.

asbestos-containing material (ACM) — any material or product that contains more than one percent asbestos.

building department records — those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property. Often building department records are located in the building department of a municipality or county.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) — the list of sites compiled by EPA that have investigated or are currently investigating for potential hazardous substance contamination for possible inclusion on the National Priorities List.

construction debris — concrete, brick, asphalt, and other such building materials discarded in the construction of a building or other improvement to property.

demolition debris — concrete, brick, asphalt, and other such building materials discarded in the demolition of a building or other improvement to property.

drum — a container (typically, but not necessarily, holding 55 gal (208 L) of liquid) that may be used to store hazardous substances or petroleum products.

dry wells — underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm

runoff, for the collection of spilled liquids (intentional and non-intentional) and wastewater disposal (often illegal).

due diligence — the process of inquiring into the environmental characteristics of a parcel of commercial real estate or other conditions, usually in connection with a commercial real estate transaction. The degree and kind of due diligence vary for different properties and differing purposes.

dwelling — structure or portion thereof used for residential habitation.

environmental professional — a person possessing sufficient training and experience necessary to conduct a site reconnaissance, interviews, and other activities in accordance with Practice E 1527, and from the information generated by such activities, having the ability to develop conclusions regarding recognized environmental conditions in connection with the property in question. An individual's status as an environmental professional may be limited to the type of assessment to be performed or to specific segments of the assessment for which the professional is responsible. The person may be an independent contractor or an employee of the user.

environmental site assessment (ESA) — the process by which a person or entity seeks to determine if a particular parcel of real property (including improvements) is subject to recognized environmental conditions. At the option of the user, an environmental site assessment may include more inquiry than that constituting appropriate inquiry or, if the user is not concerned about qualifying for the innocent landowner defense, less inquiry than that constituting appropriate inquiry.

ERNS list -- EPA's Emergency Response Notification System list of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center.

fill dirt — dirt, soil, sand, or other earth, that is obtained off-site, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

fire insurance maps — maps produced for private fire insurance map companies that indicate uses of properties at specified dates and that encompass the property. These maps are often available at local libraries, historical societies, private resellers, or from the map companies who produced them.

hazardous substance — any solid, liquid, or gas which is toxic, flammable, caustic, reactive/explosive, and/or radioactive.

hazardous waste — "a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may — (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

The federal government describes hazardous waste based upon the characteristics of ignitability, corrosivity, reactivity, or toxicity, as described in RCRA.

hazardous waste/contaminated sites — sites on which a release has occurred, or is suspected to have occurred, of any hazardous substance, hazardous waste, or petroleum products, and on which release or suspected release has been reported to a government entity.

landfill — a place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term solid waste disposal site and is also known as a garbage dump, trash dump, or similar term.

local government agencies — those agencies of municipal or county government having jurisdiction over the property. Municipal and county government agencies include but are not limited to cities, parishes, townships, and similar entities.

local street directories — directories published by private (or sometimes government) sources that show ownership, occupancy, use of sites and/or by reference to street addresses. Often local street directories are available at libraries of local governments, colleges or universities, or historical societies.

LUST sites — state lists of leaking underground storage tank sites. Section 9003 (h) of Subtitle I of RCRA gives EPA and states, under cooperative agreements with EPA, authority to clean up releases from UST systems or require owners and operators to do so.

material safety data sheet (MSDS) — written or printed material concerning a hazardous substance which is prepared by chemical manufacturers, importers, and employers for hazardous chemicals pursuant to OSHA's Hazard Communication Standard.

National Priorities List (NPL) — list compiled by EPA pursuant to CERCLA 42 USC § 9605(a)(8)(B) of properties with the highest priority for cleanup pursuant to EPA's hazard ranking system.

occupants — those tenants, subtenants, or other persons or entities using the property or a portion of the property.

owner — generally the fee owner of record of the property.

petroleum products — those substances included within the meaning of the terms within the petroleum exclusion to CERCLA, 42 USC § 9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof that is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to Standard Definitions of Petroleum Statistics.

pits, ponds, or lagoons — man-made or natural depressions in a ground surface that are likely to hold liquids or sludge containing hazardous substances or petroleum products. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the pit, pond, or lagoon, including, but not limited to, discolored water, distressed vegetation, or the presence of an obvious wastewater discharge.

property — the real property that is the subject of the environmental site assessment described in this practice. Real property includes buildings and other fixtures and improvements located on the property and affixed to the land.

publicly available — information that is publicly available means that the source of the information allows access to the information by anyone upon request.

RCRA generators — those persons or entities which generate hazardous wastes, as defined and regulated by RCRA.

RCRA generators list — list kept by EPA of those persons or entities that generate hazardous wastes as defined and regulated by RCRA.

RCRA TSD facilities — those facilities on which treatment, storage, and/or disposal of hazardous wastes takes place, as defined and regulated by RCRA.

RCRA TSD facilities list — list kept by EPA of those facilities on which treatment, storage, and/or disposal of hazardous wastes takes place, as defined and regulated by RCRA.

reasonably ascertainable — for purposes of both this practice and Practice E 1527 information that is publicly available, obtainable from its source within reasonable time and cost constraints, and practically reviewable.

recognized environmental conditions — the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

report — the written record of a transaction screen process as required by Practice E 1527 or the written report prepared by the environmental professional and constituting part of a Phase I Environmental Site Assessment, as required by Practice E 1527.

site visit — the visit to the property during which observations are made constituting the site reconnaissance section the Phase I Environmental Site Assessment in Practice E 1527 and the *site visit* requirement of the transaction screen process in this practice.

solid waste disposal site — a place, location, tract of land, area, or premises used for the landfill disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term landfill and is also known as a garbage dump, trash dump, or similar term.

solvent — a chemical compound that is capable of dissolving another substance and is itself a hazardous substance used in a number of manufacturing/industrial processes including, but not limited to, the manufacture of paints and coatings for industrial and household purposes, equipment clean-up, and surface degreasing in metal fabricating industries.

state-registered USTs — state lists of underground storage tanks required to be registered under Subtitle I, Section 9002 of RCRA.

sump — a pit, cistern, cesspool, or similar receptacle where liquids drain, collect, or are stored.

TSD Facility — treatment, storage, or disposal facility (see definition of RCRA TSD facilities).

underground storage tank (UST) — any tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground.

user — the party seeking to use the transaction screen process of this practice or the Phase I Environmental Site Assessment of Practice E 1527 to perform an environmental assessment of the property, a potential tenant of property, an owner of property, a lender, or a property manager.

USGS 7.5 Minute Topographic Map — the map (if any) available from or produced by the United States Geological Survey, entitled "USGS 7.5 Minute Topographic Map," and showing the property.

wastewater — water that is or has been used in an industrial or manufacturing process, conveys or has conveyed sewage, or is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant.

zoning/land use records — those records of the local government in which the property is located indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps and/or written records. They are often located in the planning department of a municipality or county.

Proposal 012476

Mostardi Platt

Mr. Tom Brininger
Lovejoy
2655 Wisconsin Avenue
Downers Grove, Illinois 60515

Dear Mr. Brininger:

In response to your request, MOSTARDI-PLATT ASSOCIATES, INC. (Mostardi Platt) is pleased to submit this proposal for Phase I Environmental Site Assessment Services on two parcels of real property located at 2655 Wisconsin Avenue in Downers Grove, Illinois and 300 Lovejoy Avenue in South Haven, Michigan.

The purpose of the phased approach to performing an environmental assessment is to allow parties to a real estate transaction to cost effectively meet their "due diligence" or "...appropriate inquiry" obligations. Performing all of the sampling and analysis required to obtain complete assurance that there are no potential environmental liabilities associated with a parcel of real property may be extremely costly and is generally not required by the custom and usage in the real estate or lending industries. The premise of the Phase I Environmental Site Assessment is that reviewing reasonably available information involving the past or current use and activities on the property will indicate if there are potential Recognized Environmental Conditions. If a Recognized Environmental Condition is identified, then due diligence may require that further inquiry be made to adequately quantify the impact on the property.

Scope of Services

Mostardi Platt will conduct the Phase I Environmental Site Assessments in accordance with the American Society of Testing and Materials (ASTM) Standard No. E1527-94 entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, and generally accepted industry standards regarding environmental site assessments. The Phase I Environmental Site Assessment shall consist of the following services:

- A 50-year examination of title records and business records, if available, to determine the former ownership and use of the properties

- A review of a topographic map, historical aerial photographs, and Sanborn Fire Insurance Maps, if available, to investigate past property conditions

- Property inspections by trained professionals to investigate the current use of the property and identify the presence of hazardous substances, wastes, underground storage tanks, or other areas of environmental concern on the properties

- A review of reasonably available government records for permits, citations, and reports connected to the property or corporation including waste disposal records

- A limited survey of building materials at the properties suspected of containing asbestos

- An inspection of adjoining properties from reasonably available public viewpoints to identify the current use of these properties, if possible

- A review of specific government lists regarding environmental activities for the properties and local area properties

- Preparation of two reports which specifically lists any Recognized Environmental Condition identified during the course of the Phase I Environmental Site Assessment

Recognized Environmental Conditions identified during the Phase I Environmental Site Assessment will be reported to Lovejoy as early as practical to allow as much time as possible to perform any additional work that may be required.

Project Fee

The fee for performing the Phase I Environmental Site Assessments as described above on the property is.....$4,000.00.

Any additional consultation or services, authorized in writing by Lovejoy, beyond the scope of services described above will be billed to Lovejoy according to the following fee schedule:

Officer	$200/hr
Principal Engineering Consultant	$150/hr
Director	$135/hr
Department Manager	$120/hr
Professional Engineer	$95/hr
Senior Project Manager	$90/hr
Project Manager	$75/hr
Staff Engineer or Staff Scientist	$60/hr
Field Supervisor	$60/hr
Technician	$45/hr
Clerical/Administrative Support	$35/hr
Travel Expenses	Actual Costs

Additional Services

At Lovejoy's request, Mostardi Platt can perform a Phase II Environmental Site Assessment if information discovered in the Phase I Environmental Site Assessment suggests that further investigation is needed. A Phase II Environmental Site Assessment may include, but is not limited to:

- Soil borings, sampling, and analysis of groundwater, soil, air and/or waste
- Precision leak testing of underground storage tanks and transfer lines
- Comprehensive sampling and analysis of building materials suspected of containing asbestos
- Comprehensive sampling and analysis of building materials and water suspected of containing lead
- An investigation of topology and geology of the property to indicate the migration routes of potential contamination

- Further information review including forwarding Freedom of Information Act request letters

Participation by Lovejoy

Mostardi Platt will need the following information regarding the property to start the proposed Phase I Environmental Site Assessment:

- The copy of this letter signed by an authorized person
- A plat of survey showing the boundaries of the properties
- The legal description of the properties
- The permanent index number(s) (P.I.N. or tax number) of the properties
- The name of the owner of record of the properties
- The name and telephone number of the person who shall provide Mostardi Platt with access to the properties
- Any other information in your possession regarding the environmental condition of the property or the existence of previous environmental reports, underground storage tanks, pipelines, or other underground structures

Payment Terms

Mostardi Platt will submit an invoice to Lovejoy. All invoices are billed net. Payments not received within ten (10) days from the date billed are subject to a late payment charge of 1.5% per month until payment is received.

Acceptance and Authorization

If the fee and attached General Terms and Conditions are acceptable to Lovejoy, please indicate such acceptance by having an authorized person sign and title the enclosed copy of this letter in the space provided and return it to Mostardi Platt.

We appreciate the opportunity to submit a proposal to you for this project and look forward to working with you. If you have any questions regarding this proposal or require additional information, please call.

Respectfully submitted,

MOSTARDI-PLATT ASSOCIATES, INC.

GENERAL TERMS AND CONDITIONS

Our Agreement with you consists of these General Terms and Conditions and Mostardi Platt Proposal 012476.

1.0 PERFORMANCE OF WORK

1.1 **Standard of Care.** We will conduct all services relating to this Agreement in accordance with generally accepted practice in a manner consistent with that level of care ordinarily exercised by members of the industry currently performing services specified in this Agreement in the same locality and under similar conditions of time and accessibility of improvements and information. No other representations, expressed or implied, and no warranty or guarantee is included or intended to be part of this Agreement.

1.2 **Accuracy of Measurements.** We will reference our field observations and samplings to available reference points at the Property. We will not survey, set, or check the accuracy of those points unless we accept that duty in writing.

1.3 **Failure to Follow Recommendations.** If you do not follow our recommendations, you agree not to hold us liable for undesirable circumstances that may occur as a result of not following our recommendations.

1.4 **Force Majeure.** If you fail to provide us with specified facilities or information, or if you or your contractor are negligent, omit information, or cause delays, we reserve the right to renegotiate the cost and time schedule commitments of this Agreement. In addition, delays caused by incidents beyond our control—such as fires, floods, strikes, riots, explosions, adverse weather conditions, casualties, unavailability of labor or materials or services, process shutdown, acts of God, court orders, or acts, orders or regulations of any governmental agency—will prompt renegotiation of proposed costs and time schedules of this Agreement.

1.5 **Accuracy of Information.** We will use commercial information services from one commercial source that provide information about compliance with environmental laws and investigations of reported violations of environmental laws. These services do not insure the accuracy of the information they provide; nor do they carry insurance to cover errors or omissions that occur in the conversion of data they receive from government agencies. Therefore, our use of commercial services is subject to the same limitations. We assume that the information we receive from commercial information services is accurate unless other information obtained ourselves with it.

2.0 AGREEMENT TERMS

2.1 **Notice.** Any notice or communication required to be sent to either of the parties by the other will be deemed to have been sufficiently given when delivered in person to the other party or upon receipt of postage-prepaid, certified United States mail, or the equivalent, to your or our business address shown on the first page of our proposal in this Agreement.

2.2 **Confidentiality.** Unless you prohibit us from doing so, we may use your name in our promotional materials. When we use your name, we agree not to reference the exact services we performed or identify the properties involved.

2.3 **Payment of Fees.** You are responsible for paying any filing or application fees, penalties, or fines to any federal, state, or local governments relating to the services we propose to provide in this Agreement.

2.4 **Assignment.** You may not assign this Agreement without our prior written consent. Consequently, we may not assign this Agreement without your prior written consent.

2.5 **Binding Effect.** Both you and we understand and agree that this Agreement is binding on both parties, respective successors, and any assigned parties.

2.6 **Severability.** The provisions of this Agreement are severable. If one (or more) of the provisions in this Agreement proves invalid or unenforceable, it (or they) will not affect the validity and enforceability of the other provisions in this Agreement.

2.7 **Governing Law.** The provisions of this Agreement will be governed by the laws of the state of Illinois in the county of DuPage.

2.8 **Survival.** All obligations that occur before this Agreement is concluded and all the conditions of this Agreement that designate responsibility or liability between you and us will continue after services are completed and this Agreement is concluded.

2.9 **Arbitration.** Unless you and we agree differently, all claims, disputes, and other matters in question between us that arise out of or relate to this Agreement or breaking of this Agreement may be decided by the most current rules of the American Arbitration Association.

2.10 **Other Compensation.** You agree to compensate us for our reasonable expenses incurred if we are required to respond to legal processes related to our services for you that arise out of a lawsuit or a proceeding in which we are not a party.

2.11 **Limitation of Liability.** Our liability in connection with this Agreement, and any subsequent services we provide, is limited to $50,000.00. We exclude all expressed or implied warranties in regard to the services or reports prepared including all warranties of merchantability and fitness for a particular purpose. In no event will we be liable for special, incidental, or consequential damages arising out of the services prepared in this Agreement or any subsequent services we provide.

2.12 **Limitation of Use.** We will prepare a confidential report for you. No third party may use the information contained in our report without written permission from both you and us. Our duties and obligations extend to you and to no other party. Our duties and obligations to you are not transferable to any person, corporation, or organization without the expressed written consent from both you and us.

TOPO QUAD: Wheaton

Radon Zone Level: 2

Zone 2 has a predicted average indoor screening level >= 2 pCi/L and <= 4 pCi/L

A Radon Zone should not be used to determine if individual homes need to be tested for radon. The EPA's Office of Radiation and Indoor Air (202/233-9320) recommends that all homes be tested for radon, regardless of geographic location or the zone designation in which the property is located.

**A target area is defined as a .02 mile buffer around the site's latitude and longitude.
A blank radius count indicates that the database was not searched by this radius per client instructions.
NR in a radius count indicates that the database cannot be reported by this search criteria due to insufficient and/or inaccurate addresses reported by a federal/state agency.

DATABASE REFERENCE GUIDE

NPL

Date of Data: 06/06/97
Release Date: 06/13/97
Date on System: 06/27/97
US Environmental Protection Agency
Office of Solid Waste and Emergency Response
703/603-8881

National Priorities List

The NPL Report is an EPA listing of the nation's worst uncontrolled or abandoned hazardous waste sites. NPL sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980. In addition, the NPL Report includes information concerning cleanup agreements between EPA and Potentially Responsible Parties (commonly called Records of Decision, or RODS), any liens filed against contaminated properties, as well as the past and current EPA budget expenditures tracked within the Superfund Consolidated Accomplishments Plan (SCAP).

CERCLIS

Date of Data: 06/06/97
Release Date: 06/13/97
Date on System: 06/27/97
US Environmental Protection Agency
Office of Solid Waste and Emergency Response
703/603-8881

Comprehensive Environmental Response, Compensation, and Liability Information System

The CERCLIS Database is a comprehensive listing of known or suspected uncontrolled or abandoned hazardous waste sites. These sites have either been investigated, or are currently under investigation by the U.S. EPA for the release, or threatened release of hazardous substances. Once a site is placed in CERCLIS, it may be subjected to several levels of review and evaluation, and ultimately placed on the National Priorities List (NPL). In addition to site events and milestone dates, the CERCLIS Report also contains financial information from the Superfund Consolidated Accomplishments Plan (SCAP).

RCRIS_TS

Date of Data: 10/01/96
Release Date: 12/16/96
Date on System: 03/14/97
US Environmental Protection Agency
Office of Solid Waste and Emergency Response
800/424-9346

Resource Conservation and Recovery Information System - Treatment, Storage, And Disposal Facilities

The RCRIS_TS Report contains information pertaining to facilities which either treat, store, or dispose of EPA regulated hazardous waste. The following information is also included in the RCRIS_TS Report:
- Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS)
- Inspections & evaluations conducted by federal and state agencies
- All reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties
- Information pertaining to corrective actions undertaken by the facility or EPA
- A complete listing of EPA regulated hazardous wastes which are generated or stored on-site

RCRIS_LG

Date of Data: 10/01/96
Release Date: 12/16/96
Date on System: 03/14/97
US Environmental Protection Agency
Office of Solid Waste and Emergency Response
800/424-9346

Resource Conservation and Recovery Information System - Large Quantity Generators

The RCRIS_LG Report contains information pertaining to facilities which either generate more than 1000kg of EPA regulated hazardous waste per month, or meet other applicable requirements of the Resource Conservation And Recovery Act. The following information is also included in the RCRIS_LG Report:
- Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS)
- Inspections & evaluations conducted by federal and state agencies
- All reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties
- Information pertaining to corrective actions undertaken by the facility or EPA
- A complete listing of EPA regulated hazardous wastes which are generated or stored on-site

RCRIS_SG
Date of Data: 10/01/96
Release Date: 12/16/96
Date on System: 03/14/97
US Environmental Protection Agency
Office of Solid Waste and Emergency Response
800/424-9346

Resource Conservation and Recovery Information System - Small Quantity Generators

The RCRIS_SG Report contains information pertaining to facilities which either generate between 100kg and 1000kg of EPA regulated hazardous waste per month, or meet other applicable requirements of the Resource Conservation And Recovery Act. On advice of the U.S. EPA, ERIIS does not report so-called "RCRA Protective Filers." Protective Filers, commonly called Conditionally Exempt Small Quantity Generators (CESQG's), are facilities that have completed RCRA notification paperwork, but are not, in fact, subject to RCRA regulation. The determination of CESQG status is made by the U.S. EPA. The following information is also included in the RCRIS_SG Report:
- Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS)
- Inspections & evaluations conducted by federal and state agencies
- All reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties
- Information pertaining to corrective actions undertaken by the facility or EPA
- A complete listing of EPA regulated hazardous wastes which are generated or stored on-site

Emergency Response Notification System

ERNS is a national computer database system that is used to store information concerning the sudden and/or accidental release of hazardous substances, including petroleum, into the environment. The ERNS Reporting System contains preliminary information on specific releases, including the spill location, the substance released, and the responsible party. Please note that the information in the ERNS Report pertains only to those releases that occured between January 1, 1997 and June 11, 1997.

Illinois Land-Based Disposal Sites Report

The Illinois Land-Based Disposal Site Report is an inventory of all active and historical waste disposal sites located within the State of Illinois. The inventory includes sites of all types including: municipal, industrial, hazardous, surface impoundments, illegal dumps, landfills, etc... Landfills tracked by the Northeastern Illinois Planning Commission (NIPC), as well as those sites listed in the Illinois EPA's "Available Disposal Capacity for Solid Waste in Illinois" Annual Report, are also included within the LBDS Report.

No Further Remedial Action Planned Sites

The No Further Remedial Action Planned Report (NFRAP), also known as the CERCLIS Archive, contains information pertaining to sites which have been removed from the U.S. EPA's CERCLIS Database. NFRAP sites may be sites where, following an initial investigation, either no contamination was found, contamination was removed quickly without need for the site to be placed on the NPL, or the contamination was not serious enough to require federal Superfund action or NPL consideration.

Resource Conservation and Recovery Information System - Corrective Action Sites

The RCRIS_CA Report contains information pertaining to hazardous waste treatment, storage , and disposal Facilities (RCRA TSD's) which have conducted, or are currently conducting, a corrective action(s) as regulated under the Resource Conservation and Recovery Act. The following information is included within the RCRIS_CA Report:
- Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS)
- Inspections & evaluations conducted by federal and state agencies
- All reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties
- Information pertaining to corrective actions undertaken by the facility or EPA
- A complete listing of EPA regulated hazardous wastes which are generated or stored on-site

If a selected database does not appear on this list, it is not available for the subject property's state.

SEARCH RESULTS
ERIIS HISTORICAL MAP COLLECTION

PERTAINING TO: Lovejoy Properties
2655 West Wisconsin Avenue
Downers Grove, IL 60515

REPORT NUMBER: 184584A

No historic map coverage is available for this site in the ERIIS Historic Map Collection, for the period covering the years 1867 - 1990.

The ERIIS Historic Map Collection is the largest and most extensive private collection of prior-use maps in the United States, thereby affording the greatest degree of historic due diligence. ERIIS' inventory includes images from the following publishers:

- Bromley
- Dakin
- Hexamer
- Hopkins
- Manufacturers Mutual Fire Insurance Maps
- Nirenstein Real Estate Atlases
- Sanborn Fire Insurance Map Collections
- Scarlett and Scarlett
- Rascher
- William G. Baist

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

J. Additional Descriptions for Materials Listed Above K. Handling Codes for Wastes Listed Above

15. Special Handling Instructions and Additional Information

16. **GENERATOR'S CERTIFICATION:** I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

Re: Legislative Changes Affecting Nonhazardous Special Waste Manifests and Reports.

June 26, 1991

Dear Environmental Coordinator:

New legislation (Senate Bill 388) has been approved by the House and Senate and is expected to be signed by Governor Edgar. Upon his signature, the law will put into effect the following:

- The **four-part** Nonhazardous Special Waste Manifest has been **eliminated**. The **six-part** Uniform Hazardous Waste Manifest will be used for **all** special waste, including hazardous and nonhazardous.

- **Nonhazardous special waste** will continue to be shipped on the six-part manifest; however, the word "hazardous" **must** be crossed out on the manifest and **no** manifest copies are to be sent to the Agency.

- **Nonhazardous Reporting** has been changed. Quarterly Reports are no longer required; instead, waste quantities must be reported to the Agency on the Nonhazardous Annual Report. This annual report must be received at the Agency by **February 1** of each year. This report must be completed by all treatment, storage, disposal, and recycling **facilities** located in Illinois which have received these types of special waste. The report also must be completed by **Illinois generators** who have sent these types of wastes to locations **outside** of Illinois.

  The Nonhazardous Annual Report describes the activity of the previous calendar year. It is a summation of all manifested nonhazardous and PCB wastes with a shipping date of January 1 through December 31 of each year. The first Nonhazardous Annual Report summarizing the entire calendar year of 1991 **must** be received at the Agency February 1, 1992.

- **Hazardous waste** manifesting and reporting will continue to remain the same as currently required. The Agency will continue to receive parts 2 and 5 of the six-part manifest. The Annual **RCRA** Hazardous Waste Report(s) must be received at the Agency by **March 1** of each year and describe hazardous **waste** management activities for the previous calendar year.

Profile Number: S15342 Process which generated waste: Spent black oxid

Generic Waste Name: Black Oxide from cleaning parts.

I certify that the following constituents (checked no below) are not present in my waste stream above the PQL identified in 35 IAC 725, Appendix F

Characteristics of Hazardous Waste Indicate if this waste contains any of the following characteristics above the PQL.

Waste Code	Constituent	Regulatory Threshold Level, ppm	PQL (ppm)	Constituent Above the PQL Yes	No
D004	Arsenic	5.0	.050		
D005	Barium	100.0	.002		
D006	Cadmium	1.0	.004		
D007	Chromium	5.0	.020		
D008	Lead	5.0	.040		
D009	Mercury	0.2	.002		
D010	Selenium	1.0	.750		
D011	Silver	5.0	.020		
D012	Endrin	0.02	.010		
D013	Lindane	0.4	.00004		
D014	Methoxychlor	10.0	.010		
D015	Toxaphene	0.5	.010		
D016	2,4,-D (2, 4-Dichlorophenoxyacetic acid)	10.0	.010		
D017	2, 4, 5-TP Silvex	1.0	.002		
D018	Benzene	0.5	.005		
D019	Carbon tetrachloride	0.5	.001		
D020	Chlordane	0.03	.010		
D021	Chlorobenzene	100.0	.005		
D022	Chloroform	6.0	.005		
D023	o-Cresol	200.0	.010		
D024	m-Cresol	200.0	.010		
D025	p-Cresol	200.0	.010		

Waste Code	Constituent	Regulatory Threshold Level, ppm	PQL (ppm)	Constituent Above the PQL Yes	No
D026	Cresol	200.00	.010		
D027	1, 4-Dichlorobenzene	7.5	.005		
D028	1, 2-Dichloroethane	0.5	.005		
D029	1, 1-Dichloroethylene	0.7	.005		
D030	2, 4-Dinitrotoluene	0.13	.010		
D031	Heptachlor (and its epoxide)	0.008	.010		
D032	Hexachlorobenzene	0.13	.010		
D033	Hexachlorobutadine	0.5	.010		
D034	Hexachloroethane	3.0	.010		
D035	Methyl ethyl ketone	200.0	.100		
D036	Nitrobenzene	2.0	.010		
D037	Pentachlorophenol	100.0	.050		
D038	Pyridine	5.0	.010		
D039	Tetrachloroethylene	0.7	.005		
D040	Trichloroethylene	0.5	.005		
D041	2, 4, 5-Trichlorophenol	400.0	.010		
D042	2, 4, 6 Trichlorophenol	2.0	.010		
D043	Vinyl Chloride	0.2	.010		

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. In addition, I have read and understand instructions to this certification form titled "Special Waste Stream Permit Preacceptance Analysis Requirements". Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is true, accurate, and complete. I have used intimate knowledge of our process which generates the waste and adequate Material Safety Data Sheets to determine the hazardous constituents which I have certified are not contained in this waste in accordance with 35 IAC 722.111(d). I am aware that there are significant penalties for knowingly submitting false information, including the possibility of fine and imprisonment.

Dear Generator:

Attached is a copy of your LDR (Land Disposal Restriction) which contains additions or changes.

Please keep this copy with your manifest for your compliance records.

If you have any questions, please call Cathy Rubino at 312-646-6202.

Very truly yours,

CLEAN HARBORS OF CHICAGO, INC.

Judy Kosiba

GENERATOR LAND DISPOSAL RESTRICTION NOTIFICATION

The wastes identified on the accompanying manifest number IL 45 58 576 and bearing the EPA Hazardous Waste Codes listed below are restricted wastes which are prohibited from land disposal under the Land Disposal Restriction, 40 CFR §268, effective August 8,1990. Per 268.7 (a) (3), the EPA hazardous waste codes, waste subcategories, treatability groups, treatment standards, technology codes, and appropriate references, as applicable, are provided below.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

— (Initial Waste Generator Only) —

By applying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Lovejoy, Inc. GEN. EPA I.D. NUMBER: IL UD 0 1 3 1 9 1 3 4 4 8 0 9

CERTIFICATIONS

1 APPENDIX IV LAB PACK (ORGANOMETALLIC)

"I certify under penalty of law that I personally examined and am familiar with the waste and that the lab pack contains only the wastes specified in Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

2 APPENDIX V LAB PACK (ORGANIC)

"I certify under penalty of law that I personally examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste and that the lab pack contains only organic wastes specified in Appendix V to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

4 FORM CERTIFICATION

"I hereby certify that all information supplied above, and attached, is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist."

Generator Land Disposal Restriction Notification for Hazardous Wastes Subject to an Effective Prohibition Date

Generator Name: Lovejoy, Inc. EPA ID No. ILD039344809

Address: 2655 Wisconsin Ave. Contact (Print) Edward Zdanowski

Downers Grove, IL 60515

Signature: Edward Zdan Date: 02-02-93

The hazardous wastes identified on the accompanying manifest number 4558593 and bearing the EPA Hazardous Waste Codes listed below are restricted wastes which are prohibited from land disposal under the Land Disposal Restrictions, 40 CFR Part 268. In accordance with 40 CFR 268.7(a)(1), the EPA waste code, waste subcategory, treatability groups, treatment standards, technology codes, and appropriate references, as applicable, are provided below:

I. Characteristic Wastes D001 through D017

Waste Code/Subcategory	Numerical Treatment Standard, Technology Code and/or Reference	
	Wastewater	Nonwastewater
[ ] D001		
[ ] Ignitable Liquid Wastewaters	[ ] Ref 2 – DEACT	NA
[ ] Ignitable Liquids < 10% TOC	NA	[ ] Ref 2 – DEACT
[ ] Ignitable Liquids > or = 10% TOC	NA	[ ] Ref 2 – FSUBS; RORGS; or INCIN

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

— (Initial Waste Generator Only) —

am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 etermined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is cove this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Lovejoy, Inc. GEN. EPA I.D. NUMBER: ILD 013193188

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

ing this notice and certification to Environmental Waste Resources, Inc. In accordance with the requirements of regulations at 40 CFR 268.7 I have that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered otification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

"This hazardous debris is subject to the alternative treatment standards of 40 CFR 268.45." The contaminants subject to treatment pursuant to 40 CFR 268.45(b) are:

CERTIFICATIONS

1 APPENDIX IV LAB PACK (ORGANOMETALLIC)

"I certify under penalty of law that I personally examined and am familiar with the waste and that the lab pack contains only the wastes specified in Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

2 APPENDIX V LAB PACK (ORGANIC)

"I certify under penalty of law that I personally examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste and that the lab pack contains only organic wastes specified in Appendix V to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

4 FORM CERTIFICATION

"I hereby certify that all information supplied above, and attached, is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist."

Downers Grove, IL 60515

Signature: [redacted] Date: [redacted] MARCH 22, 1993

The hazardous wastes identified on the accompanying manifest number IL 4558597 and bearing the EPA Hazardous Waste Codes listed below are restricted wastes which are prohibited from land disposal under the Land Disposal Restrictions, 40 CFR Part 268. In accordance with 40 CFR 268.7(a)(1), the EPA waste code, waste subcategory, treatability groups, treatment standards, technology codes, and appropriate references, as applicable, are provided below:

I. Characteristic Wastes D001 through D017

Waste Code/Subcategory	Numerical Treatment Standard, Technology Code and/or Reference	
	Wastewater	Nonwastewater
[ ] D001		
[ ] Ignitable Liquid Wastewaters	[ ] Ref 2 – DEACT	NA
[ ] Ignitable Liquids < 10% TOC	NA	[ ] Ref 2 – DEACT
[ ] Ignitable Liquids > or = 10% TOC	NA	[ ] Ref 2 – FSUBS; RORGS; or INCIN
[ ] Ignitable Compressed Gas	NA	[ ] Ref 2 – DEACT
[ ] Ignitable Reactives	NA	[ ] Ref 2 – DEACT
[ ] Oxidizers	[ ] Ref 2 – DEACT	[ ] Ref 2 – DEACT
[X] D002		
[ ] Acid, pH < or = 2.0	[ ] Ref 2 – DEACT	[ ] Ref 2 – DEACT
[X] Alkaline, pH > or = 12.5	[ ] Ref 2 – DEACT	[X] Ref 2 – DEACT
[ ] Other (per §261.22(a)(2))	[ ] Ref 2 – DEACT	[ ] Ref 2 – DEACT
[ ] D003		
[ ] Reactive Sulfides	[ ] Ref 2 – DEACT	[ ] Ref 2 – DEACT
[ ] Reactive Cyanides	[ ] Ref 3	[ ] Ref 3
[ ] Explosives	[ ] Ref 2 – DEACT	[ ] Ref 2 – DEACT
[ ] Water Reactives	NA	[ ] Ref 2 – DEACT
[ ] Other (per §261.23(a)(1))	[ ] Ref 2 – DEACT	[ ] Ref 2 – DEACT
[ ] D004 - Arsenic	[ ] Ref 3	[ ] Ref 1
[ ] D005 - Barium	[ ] Ref 3	[ ] Ref 1

This Agency is authorized to require, pursuant to Illinois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed $25,000 per day of violation. Falsification of this information may result in a fine up to $50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802 or 202/426-2675.

*** IMPORTANT ***

PLEASE CHANGE THE AUTHORIZATION NUMBER ON YOUR COPIES OF THE ATTACHED MANIFEST TO #000249.

OUR PERMIT PARAMETERS REQUIRE LOADS OF LESS THAN 50% OIL TO BE RUN ON PERMIT #000249.

IF YOUR WASTE IS USUALLY LESS THAN 50% OIL, THIS PERMIT NO. WILL BE USED FROM NOW ON.

I.A D001/D002 Hazardous Wastes Requiring "DEACT, and meet F039" Treatment Standard [Check one]

[ ] See attached LDR1 Addendum for identification of F039 underlying hazardous constituents.
[ ] This waste is intended for export to a treatment and disposal facility located outside the United States. Per U.S. EPA guidance, the identification of F039 underlying hazardous constituents is not required unless the waste is returned to the United States for treatment or disposal.

Generator Land Disposal Restriction Notification for
Hazardous Wastes Subject to an Effective Prohibition Date

Generator Name: Lovejoy, Inc. EPA ID No. ILD039344809

Address: 2655 Wisconsin Ave. Contact (Print) Edward Zdanowski

Downers Grove, IL 60515

Signature: Edward Zdanow Date: DECEMBER 22, 1993

The hazardous wastes identified on the accompanying manifest number IL 6007712 and bearing the EPA Hazardous Waste Codes listed below are restricted wastes which are prohibited from land disposal under the Land Disposal Restrictions, 40 CFR Part 268. In accordance with 40 CFR 268.7(a)(1), the EPA waste code, waste subcategory, treatability groups, treatment standards, technology codes, and appropriate references, as applicable, are provided below:

I. Characteristic Wastes D001 through D017

	Waste Code/Subcategory	Numerical Treatment Standard, Technology Code and/or Reference	
		Wastewater	Nonwastewater
[ ]	D001 - All descriptions based on 40 CFR 261.21, except for the §261.21(a)(1) High TOC subcategory, managed in non-CWA/ non-CWA-equivalent/non-Class I SDWA systems. IF "DEACT, AND MEET F039" IS CHECKED, THE GENERATOR MUST IDENTIFY ALL UNDERLYING HAZARDOUS CONSTITUENTS THAT ARE REASONABLY EXPECTED TO BE PRESENT IN THE WASTE. SEE SECTION I.A BELOW.	[ ] DEACT, and meet F039; OR [ ] FSUBS, RORGS, or INCIN	[ ] DEACT, and meet F039; OR [ ] FSUBS, RORGS, or INCIN
[ ]	D001 - All descriptions based on 40 CFR 261.21, except for the §261.21(a)(1) High TOC subcategory, managed in CWA, CWA-equivalent or Class I SDWA systems.	[ ] DEACT	[ ] DEACT
[ ]	D001 - All descriptions based on 40 CFR 261.21(a)(1) High TOC Ignitable Liquids Subcategory (Greater than or equal to 10% TOC)	Not applicable	[ ] FSUBS, RORGS, or INCIN
[ ]	D002 - All wastes (acids, alkalines, others) that are managed in non-CWA/ non-CWA-equivalent/non-Class I SDWA systems. THE GENERATOR MUST IDENTIFY ALL UNDERLYING HAZARDOUS CONSTITUENTS THAT ARE REASONABLY EXPECTED TO BE PRESENT IN THE WASTE. SEE SECTION I.A BELOW.	[ ] DEACT, and meet F039	[ ] DEACT, and meet F039

Generator Land Disposal Restriction Notification for
Hazardous Wastes Subject to an Effective Prohibition Date

Generator Name: Lovejoy, Inc. EPA ID No. ILD039344809

Address: 2655 Wisconsin Ave. Contact (Print) Edward Zdanowski

Downers Grove, IL 60515

Signature: Edward Zdanowski Date: FEBRUARY 18 1994

The hazardous wastes identified on the accompanying manifest number [redacted]IL6007716 and bearing the EPA Hazardous Waste Codes listed below are restricted wastes which are prohibited from land disposal under the Land Disposal Restrictions, 40 CFR Part 268. In accordance with 40 CFR 268.7(a)(1), the EPA waste code, waste subcategory, treatability groups, treatment standards, technology codes, and appropriate references, as applicable, are provided below:

I. Characteristic Wastes D001 through D017

	Waste Code/Subcategory	Numerical Treatment Standard, Technology Code and/or Reference	
		Wastewater	Nonwastewater
[ ]	D001 - All descriptions based on 40 CFR 261.21, except for the §261.21(a)(1) High TOC subcategory, managed in non-CWA/ non-CWA-equivalent/non-Class I SDWA systems.	[ ] DEACT, and meet F039; OR [ ] FSUBS, RORGS, or INCIN	[ ] DEACT, and meet F039; OR [ ] FSUBS, RORGS, or INCIN
	IF "DEACT, AND MEET F039" IS CHECKED, THE GENERATOR MUST IDENTIFY ALL UNDERLYING HAZARDOUS CONSTITUENTS THAT ARE REASONABLY EXPECTED TO BE PRESENT IN THE WASTE. SEE SECTION I.A BELOW.		
[ ]	D001 - All descriptions based on 40 CFR 261.21, except for the §261.21(a)(1) High TOC subcategory, managed in CWA, CWA-equivalent or Class I SDWA systems.	[ ] DEACT	[ ] DEACT
[ ]	D001 - All descriptions based on 40 CFR 261.21(a)(1) High TOC Ignitable Liquids Subcategory (Greater than or equal to 10% TOC)	Not applicable	[ ] FSUBS, RORGS, or INCIN
[ ]	D002 - All wastes (acids, alkalines, others) that are managed in non-CWA/ non-CWA-equivalent/non-Class I SDWA systems.	[ ] DEACT, and meet F039	[ ] DEACT, and meet F039
	THE GENERATOR MUST IDENTIFY ALL UNDERLYING HAZARDOUS CONSTITUENTS THAT ARE REASONABLY EXPECTED TO BE PRESENT IN THE WASTE. SEE SECTION I.A BELOW.		
[X]	D002 - All wastes (acids, alkalines, others) that are managed in CWA, CWA-equivalent or Class I SDWA systems.	[ ] DEACT	[X] DEACT
[ ]	D003		
	[ ] Reactive Sulfides	[ ] Ref 2 -- DEACT	[ ] Ref 2 -- DEACT
	[ ] Reactive Cyanides	[ ] Ref 3	[ ] Ref 3
	[ ] Explosives	[ ] Ref 2 -- DEACT	[ ] Ref 2 -- DEACT
	[ ] Water Reactives	Not applicable	[ ] Ref 2 -- DEACT
	[ ] Other (per §261.23(a)(1))	[ ] Ref 2 -- DEACT	[ ] Ref 2 -- DEACT
[ ]	D004 - Arsenic	[ ] Ref 3	[ ] Ref 1
[ ]	D005 - Barium	[ ] Ref 3	[ ] Ref 1
[ ]	D006		
	[ ] Cadmium	[ ] Ref 3	[ ] Ref 1
	[ ] Cadmium Containing Batteries	Not applicable	[ ] Ref 2 -- RTHRM
[ ]	D007 - Chromium	[ ] Ref 3	[ ] Ref 1
[ ]	D008		
	[ ] Lead	[ ] Ref 3	[ ] Ref 1
	[ ] Lead Acid Batteries	Not applicable	[ ] Ref 2 -- RLEAD
[ ]	D009 - Mercury		
	[ ] Low Hg, < 260 mg/kg Hg	[ ] Ref 3	[ ] Ref 1
	[ ] High Hg, > or = 260 mg/kg Hg, mercury and organics and are not incinerator residues	Not applicable	[ ] Ref 2 -- IMERC; or RMERC
	[ ] High Hg, > or = 260 mg/kg Hg, inorganics including incinerator & RMERC residues	Not applicable	[ ] Ref 2 -- RMERC
[X]	D010 - Selenium	[ ] Ref 3	[X] Ref 1
[ ]	D011 - Silver	[ ] Ref 3	[ ] Ref 1
[ ]	D012 - Endrin	[ ] Ref 2 -- BIODG; or INCIN	[ ] Ref 3
[ ]	D013 - Lindane	[ ] Ref 2 -- CARBN; or INCIN	[ ] Ref 3
[ ]	D014 - Methoxychlor	[ ] Ref 2 -- WETOX; or INCIN	[ ] Ref 3
[ ]	D015 - Toxaphene	[ ] Ref 2 -- BIODG; or INCIN	[ ] Ref 3
[ ]	D016 - 2,4-D	[ ] Ref 2 -- CHOXD; BIODG; or INCIN	[ ] Ref 3
[ ]	D017 - 2,4,5-TP (Silvex)	[ ] Ref 2 -- CHOXD; or INCIN	[ ] Ref 3

I.A D001/D002 Hazardous Wastes Requiring "DEACT, and meet F039" Treatment Standard [Check one]

[ ] See attached LDR1 Addendum for identification of F039 underlying hazardous constituents.
[ ] This waste is intended for export to a treatment and disposal facility located outside the United States. Per U.S. EPA guidance, the identification of F039 underlying hazardous constituents is not required unless the waste is returned to the United States for treatment or disposal.

16. **GENERATOR'S CERTIFICATION:** I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; **OR,** if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

Generator Land Disposal Restriction Notification for
Hazardous Wastes Subject to an Effective Prohibition Date

Generator Name: Lovejoy, Inc. EPA ID No. ILD039344809

Address: 2655 Wisconsin Ave. Contact (Print) Edward Zdanowski

Downers Grove, IL 60515

Signature: Edward Zdan Date: APRIL 25 1994

The hazardous wastes identified on the accompanying manifest number IL 6007719 and bearing the EPA Hazardous Waste Codes listed below are restricted wastes which are prohibited from land disposal under the Land Disposal Restrictions, 40 CFR Part 268. In accordance with 40 CFR 268.7(a)(1), the EPA waste code, waste subcategory, treatability groups, treatment standards, technology codes, and appropriate references, as applicable, are provided below:

I. Characteristic Wastes D001 through D017

	Waste Code/Subcategory	Numerical Treatment Standard, Technology Code and/or Reference	
		Wastewater	Nonwastewater
[ ]	D001 - All descriptions based on 40 CFR 261.21, except for the §261.21(a)(1) High TOC subcategory, managed in non-CWA/ non-CWA-equivalent/non-Class I SDWA systems. IF "DEACT, AND MEET F039" IS CHECKED, THE GENERATOR MUST IDENTIFY ALL UNDERLYING HAZARDOUS CONSTITUENTS THAT ARE REASONABLY EXPECTED TO BE PRESENT IN THE WASTE. SEE SECTION I.A BELOW.	[ ] DEACT, and meet F039; OR [ ] FSUBS, RORGS, or INCIN	[ ] DEACT, and meet F039; OR [ ] FSUBS, RORGS, or INCIN
[ ]	D001 - All descriptions based on 40 CFR 261.21, except for the §261.21(a)(1) High TOC subcategory, managed in CWA, CWA-equivalent or Class I SDWA systems.	[ ] DEACT	[ ] DEACT
[ ]	D001 - All descriptions based on 40 CFR 261.21(a)(1) High TOC Ignitable Liquids Subcategory (Greater than or equal to 10% TOC)	Not applicable	[ ] FSUBS, RORGS, or INCIN
[ ]	D002 - All wastes (acids, alkalines, others) that are managed in non-CWA/ non-CWA-equivalent/non-Class I SDWA systems. THE GENERATOR MUST IDENTIFY ALL UNDERLYING HAZARDOUS CONSTITUENTS THAT ARE REASONABLY EXPECTED TO BE PRESENT IN THE WASTE. SEE SECTION I.A BELOW.	[ ] DEACT, and meet F039	[ ] DEACT, and meet F039
[X]	D002 - All wastes (acids, alkalines, others) that are managed in CWA, CWA-equivalent or Class I SDWA systems.	[ ] DEACT	[X] DEACT
[ ]	D003

[ ]	D014 - Methoxychlor	[ ] Ref 2 -- WETOX; or INCIN	[ ] Ref 3
[ ]	D015 - Toxaphene	[ ] Ref 2 -- BIODG; or INCIN	[ ] Ref 3
[ ]	D016 - 2,4-D	[ ] Ref 2 -- CHOXD; BIODG; or INCIN	[ ] Ref 3
[ ]	D017 - 2,4,5-TP (Silvex)	[ ] Ref 2 -- CHOXD; or INCIN	[ ] Ref 3

I.A D001/D002 Hazardous Wastes Requiring "DEACT, and meet F039" Treatment Standard [Check one]

[ ] See attached LDR1 Addendum for identification of F039 underlying hazardous constituents.
[ ] This waste is intended for export to a treatment and disposal facility located outside the United States. Per U.S. EPA guidance, the identification of F039 underlying hazardous constituents is not required unless the waste is returned to the United States for treatment or disposal.

PLEASE LIST EACH DRUM OF HAZARDOUS WASTE PLACED IN STORAGE AREA.
EACH DRUM OF HAZARDOUS WASTE MUST BE ON A SEPERATE LINE.
NOTIFY ED ZDANOWSKI EVERY TIME HAZARDOUS WASTE IS MOVED INTO STORAGE.
ONLY USE 55 GALLON DRUMS, IN GOOD CONDITION, FOR HAZARDOUS WASTE.
COVER ALL EXISTING MARKINGS ON DRUMS FOR HAZARDOUS WASTE.
MARK DRUMS WITH WASTE CODE, DATE, AND WORDS "HAZARDOUS WASTE".

CHI FORM LDR1 ADDENDUM
MULTI-SOURCE LEACHATE AND D001/D002 UNDERLYING HAZARDOUS CONSTITUENTS

Generator Name: Lovejoy, Inc. EPA ID No. ILD039344809

Signature: X Edward Johansson Date: 4-28-94

Manifest No.: TI 6007719

I. EPA Waste Code(s) [Check all which apply]

[ ] F039 - Multi-source leachate

[ ] D001 - Ignitable hazardous waste requiring deactivation and identification/treatment of Underlying Hazardous Constituents based on F039 treatment standards

[X] D002 - Corrosive hazardous waste requiring deactivation and identification/treatment of Underlying Hazardous Constituents Based on F039 treatment standards

II. Constituents, Treatability Group, and LDR Treatment Concentration [Check all which apply]

A. For F039 multi-source leachate wastes, review the table below and check off each constituent that is present and the applicable wastewater or nonwastewater treatment standard.

B. For D001/D002 wastes requiring identification/treatment of F039 Underlying Hazardous Constituents, review the table below and:

[ ] Check here if none of the F039 constituents (211 total) identified on the following table is present as an "Underlying Hazardous Constituent" in the D001/D002 waste.

[X] Check here if one or more of the F039 constituents (211 total) identified on the following table is present as an "Underlying Hazardous Constituent" in the D001/D002 waste. Then in the table below, check off each constituent that is present and the applicable wastewater or nonwastewater treatment standard.

Thank you,
George Siambanes

Oxford NO. 752 1/3

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

— (Initial Waste Generator Only) —

By supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Lovejoy, Inc. | GEN. EPA I.D. NUMBER: ILD 093 414 801 9

EWR STREAM NO.: 20880 | MANIFEST NO.: IL 6007 12 0 | Line No.: ■ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001	D010				
2. Subcategory:	Ign. Liq. High TOC					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ■					
4. This waste is subject to a treatment standard under 40 CFR 268.41(a): • Waste Requires Treatment • Waste Does Not Require Treatment	☐ ☐	■ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
5. This waste is subject to a treatment standard under 40 CFR 268.42(a): (Include Technology Codes)	FSUBS INCIN RORGS					
6. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (INCIN)	☐					
7. This waste is subject to a treatment standard under 40 CFR 268.43(a): • Waste Requires Treatment • Waste Does Not Require Treatment	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
8. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)	☐					
9. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(a): (INCIN) • Appendix IV (organometallic lab pack) • Appendix V (organic lab pack)	☐ ☐					
10. This waste is hazardous debris subject to the alternative treatment standard under 40 CFR 268.45(a):	☐					
11. (Reserved)	☐					
12. This waste is subject to an exemption from treatment under: • a national capacity variance • a Case-by-case extension • (reserved)	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐
The exemption expires on:						

ADDITIONAL REQUIREMENTS — Check all that apply, and follow instructions.

☐ F001–F005 SPENT SOLVENT (Complete Table 1) ☐ "CALIFORNIA LIST" (Complete Table 2) ☐ HAZARDOUS DEBRIS (Complete Table 3)

☐ APPENDIX IV LAB PACK (Complete Certification 1) ☐ APPENDIX V LAB PACK (Complete Certification 2) ☐ F039 (Attach constituent list)

☐ WASTE MEETS A TREATMENT STANDARD, AS INDICATED ABOVE IN ROW 4 OR 7. (Complete Certification 3)

☐ D001 OR D002 WASTE WITH F039 CONSTITUENT ABOVE TREATMENT STANDARDS. (Specific list attached)

☐ This page is a continuation sheet.

TABLE 3 — HAZARDOUS DEBRIS

"This hazardous debris is subject to the alternative treatment standards of 40 CFR 268.45." The contaminants subject to treatment pursuant to 40 CFR 268.45(b) are:

_____

_____

CERTIFICATIONS

1 APPENDIX IV LAB PACK (ORGANOMETALLIC)

"I certify under penalty of law that I personally examined and am familiar with the waste and that the lab pack contains only the wastes specified in Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

2 APPENDIX V LAB PACK (ORGANIC)

"I certify under penalty of law that I personally examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste and that the lab pack contains only organic wastes specified in Appendix V to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

4 FORM CERTIFICATION

"I hereby certify that all information supplied above, and attached, is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist."

)02 - CORROSIVE CHARACTERISTIC . ARDOUS WASTE

astes which ***DO NOT MEET*** treatment standards
otice from generator to disposal facility (40 CFR 268.7(a)(1)(i))

ıe wastes identified on manifest number ML3024932 and bearing the EPA Hazardous Waste Number(s) D002 are subject to the ıd disposal restrictions of 40 CFR Part 268. This waste ***DOES NOT MEET*** the applicable treatment standards specified in Part 268 ıbpart D or exceeds the prohibitions specified in 268.32 or RCRA section 3004(d). Analytical data, where available, has been previously pplied or is attached. All treatment standards or prohibition levels exceeded by the waste are checked below.

Applicable treatment standards from 40 CFR 268.41(Table CCWE) or 268.42 (Tables 1 and 2) or 268.43 (Table CCW)

heck ne	Waste Code	See also	Waste descriptions and/or treatment subcategory	Technology Code Circle One: Wastewaters	Nonwastewaters
X	D002	Table CCWE in 268.41 and Table CCW in 268.43	Acid, alkaline, and other subcategory based on 261.22 managed in non-CWA/non-CWA-equivalent/non-Class I SDWA systems.	DEACT and meet F039	DEACT and meet F039
___	D002	NA	Acid, alkaline, and other subcategory based on 261.22 managed in CWA, CWA-equivalent, or Class I SDWA systems.	DEACT	DEACT

Are there any F039 Constituents (40 CFR 268.43 CCW, 268.41 CCWE)? X Yes ___ No
If so, please list all; Selenium
or circle constituents on
a Table 2 attachment. _____

I. California List Prohibition Levels (40 CFR 268.32)

oes this waste contain any of the following constituents at levels greater than the California List Prohibition levels given below?

YES	NO	Constituents (MUST Check either Yes or No)
___	X	1,000 mg/kg Halogenated Organic Compounds (HOC's listed in 168.32 App. III)
___	X	50 ppm PCB's (liquid wastes)
___	X	134 mg/L Nickel (liquid wastes)
___	X	130 mg/L Thallium (liquid wastes)

/. Additional Hazardous Characteristics (check one)

___ No additional characteristics are exhibited by this waste which would require treatment beyond the standards described above.
X Treatment standards for the additional Hazardous Characteristics requiring treatment are indicated on the attached page.

. Certification
ll treatment standards and prohibition levels applicable to this waste are indicated above.

D004-D011 - TOXICITY CHARACTERSTIC HAZARDOUS WASTE

WASTES WHICH DO NOT MEET TREATMENT STANDARDS NOTICE FROM GENERATOR TO DISPOSAL FACILITY (40 CFR 268.7 (a) (1) (i))

The wastes identified on manifest number MI 3687305 and bearing the EPA Hazardous Waste Number(s) D010 are subject to the land disposal restrictions of 40 CFR Part 268. This waste does not meet the applicable treatment standards specified in Part 268 Subpart D or exceeds the prohibitions specified in 268.32 or RCRA section 3004(d). Analytical data, where available, has been previously supplied or is attached. All treatment standards or prohibition levels exceeded by the waste are circled and initialled below.

I. Applicable treatment standards from 40 CFR 268.41 (Table CCWE) or 268.42 (Tables 1 and 2) or 268.43 (Table CCW)

Hazardous Waste Description	Constituents of concern	NONWASTEWATER Total Composition mg/kg	NONWASTEWATER TCLP mg/l	WASTEWATER Total Composition mg/l
D004-Arsenic	Arsenic		5	5
D005-Barium	Barium		100	100
D006-Cadmium	Cadmium		1	1
D006-Cadmium batteries		RTHRM		N.A.
D007-Chromium	Chromium(total)		5	5
D008-Lead			5	5
D008-Lead acid batteries		RLEAD		N.A.
D009-Low-mercury sub-category (< 260 mg/kg total Hg)	Mercury		0.2	0.2
D009-High-mercury sub-category (> 260 mg/kg total Hg)		IMERC,RMERC		0.2
D010-Selenium	Selenium		5.7	1
D011-Silver	Silver		5	5

II. California List Prohibition Levels (40 CFR 268.32)

Does this waste contain any of the following constituents at levels greater than the California List Prohibition levels given below?

Yes	No	Constituents
___	X	1,000 mg/kg Halogenated Organic Compounds (HOC's listed in 168.32 Appendix III
___	X	50 ppm. PCB's (liquid wastes)
___	X	134 mg/L Nickel (liquid wastes)
___	X	130 mg/L Thallium (liquid wastes)

III. Additional Hazardous Characteristics

___ No additional Hazardous Characteristics are exhibited by this waste which would require treatment beyond the standards described above.

X Treatment standards for the additional Hazardous Characteristics requiring treatment are indicated on the attached page.

IV. Certification

"All treatment standards and prohibition levels applicable to this waste are indicated above."

Notice from generator to disposal facility (40 CFR 268.7(a)(1)(i))

The wastes identified on manifest number MI 3687805 and bearing the EPA Hazardous Waste Number(s) D002 are subject to the land disposal restrictions of 40 CFR Part 268. This waste ***DOES NOT MEET*** the applicable treatment standards specified in Part 268 Subpart D or exceeds the prohibitions specified in 268.32 or RCRA section 3004(d). Analytical data, where available, has been previously supplied or is attached. All treatment standards or prohibition levels exceeded by the waste are checked below.

I. Applicable treatment standards from 40 CFR 268.41(Table CCWE) or 268.42 (Tables 1 and 2) or 268.43 (Table CCW)

Check One	Waste Code	See also	Waste descriptions and/or treatment subcategory	Technology Code Circle One: Wastewaters	Nonwastewaters
X	D002	Table CCWE in 268.41 and Table CCW in 268.43	Acid, alkaline, and other subcategory based on 261.22 managed in non-CWA/non-CWA-equivalent/non-Class I SDWA systems.	DEACT and meet F039	DEACT and meet F039
____	D002	NA	Acid, alkaline, and other subcategory based on 261.22 managed in CWA, CWA-equivalent, or Class I SDWA systems.	DEACT	DEACT

II. Are there any F039 Constituents (40 CFR 268.43 CCW, 268.41 CCWE)? X Yes ___ No
If so, please list all; or circle constituents on a Table 2 attachment. Selenium

III. California List Prohibition Levels (40 CFR 268.32)

Does this waste contain any of the following constituents at levels greater than the California List Prohibition levels given below?

YES	NO	Constituents (MUST Check either Yes or No)
___	X	1,000 mg/kg Halogenated Organic Compounds (HOC's listed in 168.32 App. III)
___	X	50 ppm PCB's (liquid wastes)
___	X	134 mg/L Nickel (liquid wastes)
___	X	130 mg/L Thallium (liquid wastes)

IV. Additional Hazardous Characteristics (check one)

___ No additional characteristics are exhibited by this waste which would require treatment beyond the standards described above.
X Treatment standards for the additional Hazardous Characteristics requiring treatment are indicated on the attached page.

V. Certification
All treatment standards and prohibition levels applicable to this waste are indicated above.

D004-D011 - TOXICITY CHARACTERSTIC HAZARDOUS WASTE

WASTES WHICH DO NOT MEET TREATMENT STANDARDS NOTICE FROM GENERATOR TO DISPOSAL FACILITY (40 CFR 268.7 (a) (1) (i))

The wastes identified on manifest number MI 3687806 and bearing the EPA Hazardous Waste Number(s) D010 are subject to the land disposal restrictions of 40 CFR Part 268. This waste does not meet the applicable treatment standards specified in Part 268 Subpart D or exceeds the prohibitions specified in 268.32 or RCRA section 3004(d). Analytical data, where available, has been previously supplied or is attached. All treatment standards or prohibition levels exceeded by the waste are circled and initialled below.

I. Applicable treatment standards from 40 CFR 268.41 (Table CCWE) or 268.42 (Tables 1 and 2) or 268.43 (Table CCW)

	Hazardous Waste Description	Constituents of concern	NONWASTEWATER Total Composition mg/kg	NONWASTEWATER TCLP mg/l	WASTEWATER Total Composition mg/l
	D004-Arsenic	Arsenic		5	5
	D005-Barium	Barium		100	100
	D006-Cadmium	Cadmium		1	1
	D006-Cadmium batteries		RTHRM		N.A.
	D007-Chromium	Chromium(total)		5	5
	D008-Lead			5	5
	D008-Lead acid batteries		RLEAD		N.A.
	D009-Low-mercury sub-category (< 260 mg/kg total Hg)	Mercury		0.2	0.2
	D009-High-mercury sub-category (> 260 mg/kg total Hg)		IMERC.RMERC		0.2
X	D010-Selenium	Selenium		5.7	1
	D011-Silver	Silver		5	5

II. California List Prohibition Levels (40 CFR 268.32)

Does this waste contain any of the following constituents at levels greater than the California List Prohibition levels given below?

Yes	No	Constituents
___	X	1,000 mg/kg Halogenated Organic Compounds (HOC's listed in 168.32 Appendix III
___	X	50 ppm. PCB's (liquid wastes)
___	X	134 mg/L Nickel (liquid wastes)
___	X	130 mg/L Thallium (liquid wastes)

III. Additional Hazardous Characteristics

___ No additional Hazardous Characteristics are exhibited by this waste which would require treatment beyond the standards described above.

X Treatment standards for the additional Hazardous Characteristics requiring treatment are indicated on the attached page.

IV. Certification

"All treatment standards and prohibition levels applicable to this waste are indicated above."

D004-D011 - TOXICITY CHARACTERS. HAZARDOUS WASTE

WASTES WHICH DO NOT MEET TREATMENT STANDARDS NOTICE FROM GENERATOR TO DISPOSAL FACILITY (40 CFR 268.7 (a) (1) (i))

The wastes identified on manifest number MS 3687807 and bearing the EPA Hazardous Waste Number(s) D010 are subject to the land disposal restrictions of 40 CFR Part 268. This waste does not meet the applicable treatment standards specified in Part 268 Subpart D or exceeds the prohibitions specified in 268.32 or RCRA section 3004(d). Analytical data, where available, has been previously supplied or is attached. All treatment standards or prohibition levels exceeded by the waste are circled and initialled below.

I. Applicable treatment standards from 40 CFR 268.41 (Table CCWE) or 268.42 (Tables 1 and 2) or 268.43 (Table CCW)

	Hazardous Waste Description	Constituents of concern	NONWASTEWATER Total Composition mg/kg	NONWASTEWATER TCLP mg/L	WASTEWATER Total Composition mg/L
	D004-Arsenic	Arsenic		5	5
	D005-Barium	Barium		100	100
	D006-Cadmium	Cadmium		1	1
	D006-Cadmium batteries		RTHRM		N.A.
	D007-Chromium	Chromium(total)		5	5
	D008-Lead			5	5
	D008-Lead acid batteries		RLEAD		N.A.
	D009-Low-mercury sub-category (< 260 mg/kg total Hg)	Mercury		0.2	0.2
	D009-High-mercury sub-category (> 260 mg/kg total Hg)		RMERC RMERC		0.2
X	D010-Selenium	Selenium		5.7	1
	D011-Silver	Silver		5	5

II. California List Prohibition Levels (40 CFR 268.32)

Does this waste contain any of the following constituents at levels greater than the California List Prohibition levels given below?

Yes	No	Constituents
__	X	1,000 mg/kg Halogenated Organic Compounds (HOCs listed in 168.32 Appendix III
__	X	50 ppm. PCB's (liquid wastes)
__	X	134 mg/L Nickel (liquid wastes)
__	X	130 mg/L Thallium (liquid wastes)

III. Additional Hazardous Characteristics

__ No additional Hazardous Characteristics are exhibited by this waste which would require treatment beyond the standards described above.

X Treatment standards for the additional Hazardous Characteristics requiring treatment are indicated on the attached page.

IV. Certification

"All treatment standards and prohibition levels applicable to this waste are indicated above."

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

Table 1: Regulated Constituents

#	Regulated Hazardous Constituent	#	Regulated Hazardous Constituent

5	Halogenated Organic Carbon >= 1000 mg/kg

CHECKLIST - HAZARDOUS WASTE, PREPARATION FOR SHIPMENT TO TSDF

Manifest Document Number: ILD 039344809 95016

State manifest Number: MI 3697512

Prepared By: EJL Date: 9/21/95

[✓] 1. Clean tops and sides of drums.
[✓] 2. Check for leaks and drum damage.
[✓] 3. Tighten all bungs.
[✓] 4. Get label master:
(UN1719 - 1,3,4,5,7,8)
(UN1760 - 9)
(UN1993 - 6)
[✓] 5. Assign drum number.
[✓] Mark drum number on map.
[✓] List date & contents on map.
[✓] Mark drum number on drum.
[✓] 6. Assign manifest number
[✓] Log entry.
[✓] Add manifest number to label master.
[✓] 7. Photocopy label master onto orange stock.
[✓] Check photocopy for clarity.
[✓] Cut and trim orange labels.
[✓] 8. Fill out individual orange address labels.
[✓] Accumulation start date.
[✓] Drum number.
[✓] Lovejoy contents code number.
[✓] 9. Apply orange labels to drum.
** Side of drum:
[✓] Address label.
[✓] Contents/Warning label.
[✓] Hazards diamond label.
** Top of drum:
[✓] Contents/Warning label.
[✓] Hazards diamond label.
[✓] 10. Fill out manifest.
[✓] 11. Fill out Land Ban Notice.
[✓] 12. Call for pick up (Date: 9/21/95 Time: 7:00 A Contact: SAA)
[✓] 13. Hazardous Waste Load in Transit (roadload)
[✓] 14. Prepare emergency contact information.
[✓] Copy of manifest.
[✓] Copy of land Ban Notice.
[✓] Copy of hazardous Waste Load in Transit.
[✓] Emergency Response Book page.
[✓] Waste data sheet.
[✓] 15. Present waste to shipper.
[✓] Spill kit to dock.
[✓] Train driver. (Driver name: TDR)
[✓] Location of spill kit.
[✓] Location of fire extinguisher.
[✓] Location of phone.
[✓] Chock wheels of truck.
[✓] Truck engine off.
[✓] Outer overhead door and dock plate controls

[ ] 16. Witness loading of hazardous waste
- [✓] Capability with other wastes on truck.
- [✓] Load properly distributed.
- [✓] Good condition of truck cargo area.
- [✓] Load properly secured.
- [✓] No evidence of drum leakage.
- [ ] Proper placards on truck (Type: 8)
  - [ ] Driver accepted from Lovejoy.
  - [✓] Driver has placards.

[ ] 17. Sign, date and distribute shipping documents.

**Lovejoy:
- [✓] 1 copy of manifest for state.
- [✓] 1 copy of manifest for file.
- [✓] 1 copy of land ban notice.

**Shipper:
- [✓] 4 copies of manifest.
- [✓] 1 copy of land ban notice.
- [✓] Emergency Response Guide Book
  - [ ] Driver accepted from Lovejoy (Guide number: _____)
  - [✓] Driver has copy in truck.

[✓] 18. Truck leaves Lovejoy property.
- [✓] Switch cell phone.
  - * while at work - forward to 852-0500
  - * while in car - turn off call forwarding
  - * while at home - forward to 474-3585
- [✓] Enter ship date in log.
- [✓] Adjust PO records.
- [✓] Notify Receiving Clerk to enter transaction.
- [✓] Mail copy of manifest to state.
- [✓] Emergency contact data file
  - * 1 full set in office
  - * 1 full set in briefcase
  - * 1 full set in car
- [✓] Mark due date for manifest return in appointment book (35 days)

[✓] 19. File records

[ ] 20. Manifest returned by TSDF (end telephone switching)
- [✓] Close out log entry.
- [✓] File returned copy of manifest.

PLEASE LIST EACH DRUM OF HAZARDOUS WASTE MOVED INTO THE STORAGE AREA.

DRUMS MUST BE MADE OF STEEL, IN GOOD CONDITION (NO LEAKS, DENTS OR RUST) AND HAVE ALL BUNGES TIGHTLY CLOSED.

SIDE OF EACH DRUM MUST BE MARKED WITH THE FOLLOWING INFORMATION ONLY:

WORDS "HAZARDOUS WASTE"
LOVEJOY WASTE CODE (SEE CHART ON CLIPBOARD)
DATE THE DRUM WAS MOVED INTO THE STORAGE ROOM

ALL OTHER MARKINGS AND LABELS MUST BE REMOVED OR PAINTED OVER!

PLEASE ENTER EACH HAZARDOUS WASTE DRUM PLACED IN THE STORAGE ROOM ON THIS LOG SHEET.

ENTER DATE THE DRUM WAS PLACED IN THE STORAGE ROOM, THE WASTE CODE OF THE DRUM'S CONTENTS, YOUR NAME, AND CHECK OFF THE THE DRUM IS PROPERLY MARKED, THE BUMGES ARE TIGHT, AND THAT THE DRUM IS ON A CONTAINMENT PALLET.

Generator Name: Lovejoy, Inc. Manifest Doc. No.: 95013

Generator USEPA ID No. ILD039344809 State Manifest No.: MI 3687810

INSTRUCTIONS

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste co check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropri Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of t alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this for In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constituer associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Referen Number or Numbers from Table 1 of the contaminants subject to treatment.

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituent in Table 2 (page 4 of this form).

REF #	1. HAZARDOUS WASTE CODE(S)	2a. NWW	2b. WW	3. SUBCATEGORY (Enter Appropriate Subcategory If Applicable. If Debris That Will Be Managed Using The Alternative Treatment Technologies Provided By 268.45, Enter "Debris")	4. HOW MUST THE WASTE BE MANAGED? (Reference Page 2 Paragraph)	5. Identify, Using The Reference Numbers In Table 1, All The Regulated Constituents For Wastes F001-F005, F039, D001, D002, D012-D043 and Debris.

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste cod check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropria Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of th alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this form In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constituent associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Referenc Number or Numbers from Table 1 of the contaminants subject to treatment.

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituents in Table 2 (page 4 of this form).

REF #	1. HAZARDOUS WASTE CODE(S)	2a. NWW	2b. WW	3. SUBCATEGORY (Enter Appropriate Subcategory If Applicable. If Debris That Will Be Managed Using The Alternative Treatment Technologies Provided By 268.45, Enter "Debris")	4. HOW MUST THE WASTE BE MANAGED? (Reference Page 2 Paragraph)	5. Identify, Using The Reference Numbers In Table 1, All The Regulated Constituents For Wastes F001-F005, F039, D001, D002, D012-D043 and Debris.

EQ LDR.FRM 12/13/94 Revision 0

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

PLEASE LIST EACH DRUM OF HAZARDOUS WASTE MOVED INTO THE STORAGE AREA.

DRUMS MUST BE MADE OF STEEL, IN GOOD CONDITION (NO LEAKS, DENTS OR RUST) AND HAVE ALL BUNGES TIGHTLY CLOSED.

SIDE OF EACH DRUM MUST BE MARKED WITH THE FOLLOWING INFORMATION ONLY:

WORDS "HAZARDOUS WASTE"
LOVEJOY WASTE CODE (SEE CHART ON CLIPBOARD)
DATE THE DRUM WAS MOVED INTO THE STORAGE ROOM

ALL OTHER MARKINGS AND LABELS MUST BE REMOVED OR PAINTED OVER!

ASE ENTER EACH HAZARDOUS WASTE DRUM PLACED IN THE STORAGE ROOM ON THIS SHEET.

DATE THE DRUM WAS PLACED IN THE STORAGE ROOM, THE WASTE CODE OF THE CONTENTS, YOUR NAME, AND CHECK OFF THE THE DRUM IS PROPERLY MARKED, NGES ARE TIGHT, AND THAT THE DRUM IS ON A CONTAINMENT PALLET.

EQ LAND DISPOSAL RESTRICTIONS NOTIFICATION AND CERTIFICATION FORM

Generator Name: Lovejoy, Inc. Manifest Doc. No.: 95002

Generator USEPA ID No. ILD039344809 State Manifest No.: MI 3687841

INSTRUCTIONS

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste code, check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropriate Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this form. In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constituents associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Reference Number or Numbers from Table 1 of the contaminants subject to treatment

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituents in Table 2 (page 4 of this form).

REF #	1. HAZARDOUS WASTE CODE(S)	2a. NWW	2b. WW	3. SUBCATEGORY (Enter Appropriate Subcategory If Applicable. If Debris That Will Be Managed Using The Alternative Treatment Technologies Provided By 268.45, Enter "Debris")	4. HOW MUST THE WASTE BE MANAGED? (Reference Page 2 Paragraph)	5. Identify, Using The Reference Numbers In Table 1, All The Regulated Constituents For Wastes F001-F005, F039, D001, D002, D012-D043 and Debris.

EQ LDR.FRM 12/13/94 Revision 0

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. **THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD**

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. **THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS**

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. **THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY**

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. **THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT**

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. **THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45**

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

PLEASE LIST EACH DRUM OF HAZARDOUS WASTE MOVED INTO THE STORAGE AREA.

DRUMS MUST BE MADE OF STEEL, IN GOOD CONDITION (NO LEAKS, DENTS OR RUST) AND HAVE ALL BUNGES TIGHTLY CLOSED.

SIDE OF EACH DRUM MUST BE MARKED WITH THE FOLLOWING INFORMATION ONLY:

WORDS "HAZARDOUS WASTE"
LOVEJOY WASTE CODE (SEE CHART ON CLIPBOARD)
DATE THE DRUM WAS MOVED INTO THE STORAGE ROOM

ALL OTHER MARKINGS AND LABELS MUST BE REMOVED OR PAINTED OVER!

PLEASE ENTER EACH HAZARDOUS WASTE DRUM PLACED IN THE STORAGE ROOM ON THIS LOG SHEET.

ENTER DATE THE DRUM WAS PLACED IN THE STORAGE ROOM, THE WASTE CODE OF THE DRUM'S CONTENTS, YOUR NAME, AND CHECK OFF THE THE DRUM IS PROPERLY MARKED, BUMGES ARE TIGHT, AND THAT THE DRUM IS ON A CONTAINMENT PALLET.

Generator Name: Lovejoy, Inc. Manifest Doc. No.: 96030

Generator USEPA ID No. ILD039344809 State Manifest No.: MI 3687816

INSTRUCTIONS

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste code, check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropriate Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this form. In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constituents associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Reference Number or Numbers from Table 1 of the contaminants subject to treatment.

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituents in Table 2 (page 4 of this form).

REF #	1. HAZARDOUS WASTE CODE(S)	2a. NWW	2b. WW	3. SUBCATEGORY (Enter Appropriate Subcategory If Applicable. If Debris That Will Be Managed Using The Alternative Treatment Technologies Provided By 268.45, Enter "Debris")	4. HOW MUST THE WASTE BE MANAGED? (Reference Page 2 Paragraph)	5. Identify, Using The Reference Numbers In Table 1, All The Regulated Constituents For Wastes F001-F005, F039, D001, D002, D012-D043 and Debris.

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. **THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD**

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. **THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS**

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. **THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY**

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. **THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT**

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. **THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45**

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR; if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

GENERATOR

Printed/Typed Name: EDWARD ZDANOWSKI — Signature — Date (Month Day Year)

TRANSPORTER

17. Transporter 1 Acknowledgement of Receipt of Materials
Printed/Typed Name — Signature — Date (Month Day Year)

18. Transporter 2 Acknowledgement or Receipt of Materials
Printed/Typed Name — Signature — Date (Month Day Year)

FACILITY

19. Discrepancy Indication Space

20. Facility Owner or Operator: Certification of receipt of hazardous materials covered by this manifest except as noted in Item 19.
Printed/Typed Name — Signature — Date (Month Day Year)

ALL SPILLS MUST BE REPORTED TO THE MICHIGAN POLLUTION EMERGENCY ALERTING SYSTEM. IN MICHIGAN AT 1-800-292-4706 OR OUT OF STATE AT 517-373-7660 AND THE NATIONAL RESPONSE CENTER AT 1-800-424-8802 24 HOURS PER DAY.

To be mailed by Michigan DNR

PR 5110

Generator Name Lovejoy, Inc. Manifest Doc. No. X 96018

Generator Address 2655 Wisconsin Ave., Downers Grove, IL 60515

Generator USEPA ID No. ILD039344809 State Manifest No. X MI 3687815

INSTRUCTIONS

- In Column 1, identify the manifest line item number.
- In Column 2, identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below.
- In Column 3, identify the appropriate Treatability group, Non-Wastewater (NWW), or Wastewater (WW) for each waste code.
- In Column 4, enter the appropriate Subcategory, if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 of this form.
- In Column 6, enter the Reference Number(s) from Table 1 for all regulated constituents associated with F001-F005, F039, D001, D002, and D012-D043. If the waste is a debris, enter the Reference Number(s) from Table 1 of the contaminants subject to treatment. If the waste is a California List waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Table 2.

1. MANIF. LINE ITEM #	2. HAZARDOUS WASTE CODE(S)	3. NWW or WW	4. SUBCATEGORY	5. HOW MUST THE WASTE BE MANAGED?	6. REFERENCE NUMBER(S)

Printed Name X EDWARD JOHNSON Date X JULY 11 1996

How Must The Waste Be Managed?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS.

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

INSTRUCTIONS

- In Column 1, identify the manifest line item number.
- In Column 2, identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below.
- In Column 3, identify the appropriate Treatability group, Non-Wastewater (NWW), or Wastewater (WW) for each waste code.
- In Column 4, enter the appropriate Subcategory, if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 of this form.
- In Column 6, enter the Reference Number(s) from Table 1 for all regulated constituents associated with F001-F005, F039, D001, D002, and D012-D043. If the waste is a debris, enter the Reference Number(s) from Table 1 of the contaminants subject to treatment. If the waste is a California List waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Table 2.

1. MANIF. LINE ITEM #	2. HAZARDOUS WASTE CODE(S)	3. NWW or WW	4. SUBCATEGORY	5. HOW MUST THE WASTE BE MANAGED?	6. REFERENCE NUMBER(S)
a.	D002 D010	NWW	Corrosive Characteristic Wastes that are managed in non-CWA/non-CWA equivalent/non-Class I SDWA systems	A.	213

I hereby certify that all information submitted on this and all associated documents is complete and accurate to the best of my knowledge and information.

Generator Signature X Edward Zdanowski Title X ENV. MGR

Printed Name X EDWARD ZDANOWSKI Date X JULY 11 1996

How Must The Waste Be Managed?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS.

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

CHECKLIST - HAZARDOUS WASTE, PREPARATION FOR SHIPMENT TO TSDF

Manifest Document Number: ILD 039344809 96018

State manifest Number: MI 3687515

Prepared By: Ed Date: 7/8/96

[✓] 1. Clean tops and sides of drums.
[✓] 2. Check for leaks and drum damage.
[✓] 3. Tighten all bungs.
[✓] 4. Get label master:
(UN1719 - 1,3,4,5,7,8)
(UN1760 - 9)
(UN1993 - 6)
[✓] 5. Assign drum number.
[✓] Mark drum number on map.
[✓] List date & contents on map.
[✓] Mark drum number on drum.
[✓] 6. Assign manifest number
[✓] Log entry.
[✓] Add manifest number to label master.
[✓] 7. Photocopy label master onto orange stock.
[✓] Check photocopy for clarity.
[✓] Cut and trim orange labels.
[✓] 8. Fill out individual orange address labels.
[✓] Accumulation start date.
[✓] Drum number.
[✓] Lovejoy contents code number.
[✓] 9. Apply orange labels to drum.
** Side of drum:
[✓] Address label.
[✓] Contents/Warning label.
[✓] Hazards diamond label.
** Top of drum:
[✓] Contents/Warning label.
[✓] Hazards diamond label.
[✓] 10. Fill out manifest.
[✓] 11. Fill out Land Ban Notice.
[✓] 12. Call for pick up (Date: 7/10/96 Time: 7:00 Contact: SAm)
[✓] 13. Hazardous Waste Load in Transit (roadload)
[✓] 14. Prepare emergency contact information.
[✓] Copy of manifest.
[✓] Copy of land Ban Notice.
[✓] Copy of hazardous Waste Load in Transit.
[✓] Emergency Response Book page.
[✓] Waste data sheet.
[✓] 15. Present waste to shipper.
[✓] Spill kit to dock.
[✓] Train driver. (Driver name: Tom)
[✓] Location of spill kit.
[✓] Location of fire extinguisher.
[✓] Location of phone.
[✓] Chock wheels of truck.
[✓] Truck engine off.
[✓] Outer overhead door and dock plate controls

[✓] 16. Witness loading of hazardous waste
- [✓] Capability with other wastes on truck.
- [✓] Load properly distributed.
- [✓] Good condition of truck cargo area.
- [✓] Load properly secured.
- [✓] No evidence of drum leakage.
- [✓] Proper placards on truck (Type: 8)
  - [ ] Driver accepted from Lovejoy.
  - [✓] Driver has placards.

[✓] 17. Sign, date and distribute shipping documents.
- **Lovejoy:
  - [✓] 1 copy of manifest for state.
  - [✓] 1 copy of manifest for file.
  - [✓] 1 copy of land ban notice.
- **Shipper:
  - [✓] 4 copies of manifest.
  - [✓] 1 copy of land ban notice.
  - [✓] Emergency Response Guide Book
    - [ ] Driver accepted from Lovejoy (Guide number: _____)
    - [✓] Driver has copy in truck.

[✓] 18. Truck leaves Lovejoy property.
- [✓] Switch cell phone.
  - * while at work - forward to 852-0500
  - * while in car - turn off call forwarding
  - * while at home - forward to 474-3585
- [✓] Enter ship date in log.
- [✓] Adjust PO records.
- [✓] Notify Receiving Clerk to enter transaction.
- [✓] Mail copy of manifest to state.
- [ ] Emergency contact data file
  - * 1 full set in office
  - * 1 full set in briefcase
  - * 1 full set in car
- [✓] Mark due date for manifest return in appointment book (35 days)

[✓] 19. File records

[✓] 20. Manifest returned by TSDF (end telephone switching)
- [✓] Close out log entry.
- [✓] File returned copy of manifest.

INSTRUCTIONS

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste code, check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropriate Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this form. In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constituents associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Reference Number or Numbers from Table 1 of the contaminants subject to treatment.

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituents in Table 2 (page 4 of this form).

REF #	1. HAZARDOUS WASTE CODE(S)	2a. NWW	2b. WW	3. SUBCATEGORY (Enter Appropriate Subcategory If Applicable. EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

CHECKLIST - HAZARDOUS WASTE, PREPARATION FOR SHIPMENT TO TSDF

Manifest Document Number: ILD 039344809 76003

State manifest Number: MI 3687813

Prepared By: EJL Date: 1-4-96

[X] 1. Clean tops and sides of drums.
[X] 2. Check for leaks and drum damage.
[X] 3. Tighten all bungs.
[X] 4. Get label master:
(UN1719 - 1,3,4,5,7,8)
(UN1760 - 9)
(UN1993 - 6)
[X] 5. Assign drum number.
[Y] Mark drum number on map.
[X] List date & contents on map.
[X] Mark drum number on drum.
[X] 6. Assign manifest number
[X] Log entry.
[X] Add manifest number to label master.
[X] 7. Photocopy label master onto orange stock.
[X] Check photocopy for clarity.
[X] Cut and trim orange labels.
[X] 8. Fill out individual orange address labels.
[X] Accumulation start date.
[X] Drum number.
[Y] Lovejoy contents code number.
[X] 9. Apply orange labels to drum.
** Side of drum:
[X] Address label.
[X] Contents/Warning label.
[X] Hazards diamond label.
** Top of drum:
[X] Contents/Warning label.
[X] Hazards diamond label.
[X] 10. Fill out manifest.
[X] 11. Fill out Land Ban Notice.
[X] 12. Call for pick up (Date: 1/5/96 Time: 7 os Contact: GEORGE)
[X] 13. Hazardous Waste Load in Transit (roadload)
[X] 14. Prepare emergency contact information.
[X] Copy of manifest.
[X] Copy of land Ban Notice.
[X] Copy of hazardous Waste Load in Transit.
[X] Emergency Response Book page.
[X] Waste data sheet.
[X] 15. Present waste to shipper.
[X] Spill kit to dock.
[X] Train driver. (Driver name: THOMAS LACKEY)
[Y] Location of spill kit.
[Y] Location of fire extinguisher.
[X] Location of phone.
[X] Chock wheels of truck.
[X] Truck engine off.
[X] Outer overhead door and dock plate controls

[✓] 16. Witness loading of hazardous waste
- [✓] Capability with other wastes on truck.
- [✓] Load properly distributed.
- [✓] Good condition of truck cargo area.
- [✓] Load properly secured.
- [✓] No evidence of drum leakage.
- [✓] Proper placards on truck (Type: Corrosive)
  - [ ] Driver accepted from Lovejoy.
  - [✓] Driver has placards.

[✓] 17. Sign, date and distribute shipping documents.

**Lovejoy:
- [✓] 1 copy of manifest for state.
- [✓] 1 copy of manifest for file.
- [✓] 1 copy of land ban notice.

**Shipper:
- [✓] 4 copies of manifest.
- [✓] 1 copy of land ban notice.
- [✓] Emergency Response Guide Book
  - [ ] Driver accepted from Lovejoy (Guide number: _____)
  - [✓] Driver has copy in truck.

[✓] 18. Truck leaves Lovejoy property.
- [✓] Switch cell phone.
  - * while at work - forward to 852-0500
  - * while in car - turn off call forwarding
  - * while at home - forward to 474-3585
- [✓] Enter ship date in log.
- [ ] Adjust PO records.
- [ ] Notify Receiving Clerk to enter transaction.
- [✓] Mail copy of manifest to state.
- [✓] Emergency contact data file
  - * 1 full set in office
  - * 1 full set in briefcase
  - * 1 full set in car
- [✓] Mark due date for manifest return in appointment book (35 days)

[✓] 19. File records

[✓] 20. Manifest returned by TSDF (end telephone switching)
- [✓] Close out log entry.
- [✓] File returned copy of manifest.

INSTRUCTIONS

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste cod check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropria Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of t alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this forr In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constituen associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Referen Number or Numbers from Table 1 of the contaminants subject to treatment.

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituent in Table 2 (page 4 of this form).

REF #	1. HAZARDOUS WASTE CODE(S)	2a. NWW	2b. WW	3. SUBCATEGORY (Enter Appropriate Subcategory If Applicable. If Debris That Will Be Managed Using The Alternative Treatment Technologies Provided By 268.45, Enter "Debris")	4. HOW MUST THE WASTE BE MANAGED? (Reference Page 2 Paragraph)	5. Identify, Using The Reference Numbers In Table 1, All The Regulated Constituents For Wastes F001-F005, F039, D001, D002, D012-D043 and Debris.

EQ LDR-FRM 12/13/94 Revision 0

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

INSTRUCTIONS

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste cod check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropria Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of th alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this form In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constituent associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Referenc Number or Numbers from Table 1 of the contaminants subject to treatment.

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituents in Table 2 (page 4 of this form).

REF #	1. HAZARDOUS WASTE CODE(S)	2a. NWW	2b. WW	3. SUBCATEGORY (Enter Appropriate Subcategory If Applicable. If Debris That Will Be Managed Using The Alternative Treatment Technologies Provided By 268.45, Enter "Debris")	4. HOW MUST THE WASTE BE MANAGED? (Reference Page 2 Paragraph)	5. Identify, Using The Reference Numbers In Table 1, All The Regulated Constituents For Wastes F001-F005, F039, D001, D002, D012-D043 and Debris.

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

INSTRUCTIONS (a UN 1719)

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste co check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropri Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this for In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constitue associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Referen Number or Numbers from Table 1 of the contaminants subject to treatment.

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituen in Table 2 (page 4 of this form).

EQ LDR-FRM 12/13/94 Revision 0

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS PESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

EQ LAND DISPOSAL RESTRICTIONS NOTIFICATION AND CERTIFICATION FORM

Generator Name: Lovejoy, Inc. Manifest Doc. No.: ~~X~~ ILD 039344809 96003

Generator USEPA ID No. ILD039344809 State Manifest No.: ~~X~~ MI 3687813

(b UN1760)

INSTRUCTIONS

A. Identify all USEPA hazardous waste codes that apply to this waste shipment in the spaces provided below. For each waste co check the appropriate Treatability Group, Non-WasteWater (NWW) or WasteWater (WW), in Column 2. Enter the appropri Subcategory, if applicable, in Column 3 and also enter "Debris" in Column 3 if the waste is debris that will be treated using one of t alternative treatment technologies provided by 268.45. In Column 4, reference the appropriate paragraph(s) from Page 2 of this for In Column 5, enter the Reference Number or Numbers from Table 1 (pages 3 and 4 of this form) for all regulated constitue associated with F001-F005, F039, D001, D002, and D012-D043. Also, if the waste is a debris, enter in Column 5 the Referen Number or Numbers from Table 1 of the contaminants subject to treatment.

B. If the waste is a California List waste, complete the boxes below appropriately and check the appropriate California List constituent in Table 2 (page 4 of this form).

REF #	1. HAZARDOUS WASTE CODE(S)	2a. NWW	2b. WW	3. SUBCATEGORY (Enter Appropriate Subcategory If Applicable. If Debris That Will Be Managed Using The Alternative Treatment Technologies Provided By 268.45, Enter "Debris")	4. HOW MUST THE WASTE BE MANAGED? (Reference Page 2 Paragraph)	5. Identify, Using The Reference Numbers In Table 1, All The Regulated Constituents For Wastes F001-F005, F039, D001, D002, D012-D043 and Debris.

EQ LDR_FRM 12/13/94 Revision 0

EQ LDR NOTIFICATION AND CERTIFICATION FORM (CONTINUED)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD

This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart D, 268.32 or RCRA Section 3004(d) prior to land disposal.

B. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

C. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY

I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

D. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45

I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

MAIN LINE ITEM #	1. HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBPART CC YES/NO	4. SUBCATEGORY	5. HOW MUST THE WASTE BE MANAGED?	6. REFERENCE NUMBER(S)

How Must The Waste Be Managed?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD.
This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS.
I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT.
I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45.
I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IX TO PART 268.
I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack does not contain any wastes identified at Appendix IV to part 268. I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL.

(Please include the date the waste is subject to the prohibitions in Column 6)

This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATION IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c).

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS NON-HAZARDOUS WASTE STREAM REQUIRES SOLIDIFICATION PRIOR TO LANDFILLING.

M. THIS NON-HAZARDOUS WASTE STREAM DOES NOT REQUIRE TREATMENT PRIOR TO LANDFILL.

N. SURCHARGE EXEMPTION. This is a certification pursuant to section 11108(3) of Act 451 of 1994 (the Natural Resources and Environmental Protection Act) that the hazardous waste identified herein is exempt from the surcharge provided in the Act.

WASTE DESCRIPTION: _____

LINE ITEM: _____

QUANTITY AND UNITS: _____

This shipment of hazardous waste is exempt from the surcharge fees because the waste is:

_____(a) Ash that results from the incineration of hazardous waste of incineration of solid waste as defined in part 115.

_____(b) Hazardous waste exempted by rule because of its character or the treatment it has received.

_____(c) Hazardous waste that is removed from a site of environmental contamination that is included in a list submitted to the legislature pursuant to section 20105, or hazardous waste that is removed as part of a site cleanup activity at the expense of the state or federal government.

_____(d) Solidified hazardous waste produced by a solidification facility licensed pursuant to section 11123 and destined for land disposal.

_____(e) Hazardous waste generated pursuant to a 1-time closure or site cleanup activity in his state if the closure or cleanup activity has been authorized in writing by the department. Hazardous waste resulting from the cleanup of inadvertent releases which occur after March 30, 1988 is not exempt from the fee.

_____(f) Primary and secondary wastewater treatment solids from a wastewater treatment plant that includes an aggressive biological treatment facility as defined in section 3005(j)(12)(B) of Subtitle C of the Solid Waste Disposal Act, 42 U.S.C. 6925.

_____(g) Emission control dust or sludge from the primary production of steel in electric furnaces.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

MAIN LINE ITEM #	1. HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBPART CC YES/NO	4. SUBCATEGORY	5. HOW MUST THE WASTE BE MANAGED?	6. REFERENCE NUMBER(S)

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD.
This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS.
I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT.
I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45.
I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IX TO PART 268.
I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack does not contain any wastes identified at Appendix IV to part 268. I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

© 1997 EQ - The Environmental Quality Company

J. THIS RESTRICTED WA IS SUBJECT TO AN EXEMPTI ROM LAND DISPOSAL.
(Please include the date the waste is subject to the prohibitions in Column 6)
This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c).
I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS NON-HAZARDOUS WASTE STREAM REQUIRES SOLIDIFICATION PRIOR TO LANDFILLING.

M. THIS NON-HAZARDOUS WASTE STREAM DOES NOT REQUIRE TREATMENT PRIOR TO LANDFILL.

N. SURCHARGE EXEMPTION. This is a certification pursuant to section 11108(3) of Act 451 of 1994 (the Natural Resources and Environmental Protection Act) that the hazardous waste identified herein is exempt from the surcharge provided in the Act.

WASTE DESCRIPTION:_____

LINE ITEM:_____

QUANTITY AND UNITS:_____

This shipment of hazardous waste is exempt from the surcharge fees because the waste is:

_____(a) Ash that results from the incineration of hazardous waste of incineration of solid waste as defined in part 115.

_____(b) Hazardous waste exempted by rule because of its character or the treatment it has received.

_____(c) Hazardous waste that is removed from a site of environmental contamination that is included in a list submitted to the legislature pursuant to section 20105, or hazardous waste that is removed as part of a site cleanup activity at the expense of the state or federal government.

_____(d) Solidified hazardous waste produced by a solidification facility licensed pursuant to section 11123 and destined for land disposal.

_____(e) Hazardous waste generated pursuant to a 1-time closure or site cleanup activity in his state if the closure or cleanup activity has been authorized in writing by the department. Hazardous waste resulting from the cleanup of inadvertent releases which occur after March 30, 1988 is not exempt from the fee.

_____(f) Primary and secondary wastewater treatment solids from a wastewater treatment plant that includes an aggressive biological treatment facility as defined in section 3005(j)(12)(B) of Subtitle C of the Solid Waste Disposal Act, 42 U.S.C. 6925.

_____(g) Emission control dust or sludge from the primary production of steel in electric furnaces.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.

  In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

J. THIS RESTRICTED WA[illegible] IS SUBJECT TO AN EXEMPT[illegible] FROM LAND DISPOSAL.

(Please include the date the waste is subject to the prohibitions in Column 6)

This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c).

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS NON-HAZARDOUS WASTE STREAM REQUIRES SOLIDIFICATION PRIOR TO LANDFILLING.

M. THIS NON-HAZARDOUS WASTE STREAM DOES NOT REQUIRE TREATMENT PRIOR TO LANDFILL.

N. SURCHARGE EXEMPTION. This is a certification pursuant to section 11108(3) of Act 451 of 1994 (the Natural Resources and Environmental Protection Act) that the hazardous waste identified herein is exempt from the surcharge provided in the Act.

WASTE DESCRIPTION:_____

LINE ITEM:_____

QUANTITY AND UNITS:_____

This shipment of hazardous waste is exempt from the surcharge fees because the waste is:

_____(a) Ash that results from the incineration of hazardous waste of incineration of solid waste as defined in part 115.

_____(b) Hazardous waste exempted by rule because of its character or the treatment it has received.

_____(c) Hazardous waste that is removed from a site of environmental contamination that is included in a list submitted to the legislature pursuant to section 20105, or hazardous waste that is removed as part of a site cleanup activity at the expense of the state or federal government.

_____(d) Solidified hazardous waste produced by a solidification facility licensed pursuant to section 11123 and destined for land disposal.

_____(e) Hazardous waste generated pursuant to a 1-time closure or site cleanup activity in his state if the closure or cleanup activity has been authorized in writing by the department. Hazardous waste resulting from the cleanup of inadvertent releases which occur after March 30, 1988 is not exempt from the fee.

_____(f) Primary and secondary wastewater treatment solids from a wastewater treatment plant that includes an aggressive biological treatment facility as defined in section 3005(j)(12)(B) of Subtitle C of the Solid Waste Disposal Act, 42 U.S.C. 6925.

_____(g) Emission control dust or sludge from the primary production of steel in electric furnaces.

HOW MUST THE WASTE BE MANAGED?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD.
This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS.
I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT.
I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45.
I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IX TO PART 268.
I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack does not contain any wastes identified at Appendix IV to part 268. I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. Additional Descriptions for Materials Listed Above

K. Handling Instructions and Additional Information

15. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national governmental regulations.

If export shipment and I am the Primary Exporter, I certify that the contents of this consignment conform to the terms of the attached EPA Acknowledgment of Consent.

If I am a small quantity generator and there is no Primary Exporter, I certify that the materials described above on this manifest are not subject to federal regulations for reporting properly classified or described hazardous materials under 49 CFR 172 and 173.

If I am a small quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a large quantity generator, I certify that I have a program in place to reduce the volume or quantity and toxicity of waste generated to the degree, determined by me, to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment.

Signature: [redacted] Month Day Year: 6/30/98

19. Discrepancy Indication Space

20. Facility Owner or Operator: Certification of receipt of hazardous materials covered by this manifest except as noted in Item 19.

Signature: [redacted] Month Day Year: 6/30/98

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802 or 202/426-2675.

This form has been approved by the Illinois Pollution Control Board. Effective 6-30-86

Section 22.20 of the Illinois Environmental Protection Act, Chapter 111 1/2, Section 1022.20, requires the owner or operator of any facility to maintain records of all hazardous waste received at such facility. Failure to complete this manifest in full may result in the refusal of any waste to be accepted by the facility. Illinois regulations require the generator to complete this manifest and have it signed by the initial transporter. Section 21(d) of the Illinois Environmental Protection Act, Chapter 111 1/2, Section 1021(d), prohibits the transportation of hazardous waste without a manifest.

15 Special Handling Instructions and Additional Information

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

How Must The Waste Be Managed?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD.
This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS.
I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT.
I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45.
I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IX TO PART 268.
I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack does not contain any wastes identified at Appendix IV to part 268. I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL.

(Please include the date the waste is subject to the prohibitions in Column 6)

This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c).

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS NON-HAZARDOUS WASTE STREAM REQUIRES SOLIDIFICATION PRIOR TO LANDFILLING.

M. THIS NON-HAZARDOUS WASTE STREAM DOES NOT REQUIRE TREATMENT PRIOR TO LANDFILL.

N. SURCHARGE EXEMPTION. This is a certification pursuant to section 11108(3) of Act 451 of 1994 (the Natural Resources and Environmental Protection Act) that the hazardous waste identified herein is exempt from the surcharge provided in the Act.

WASTE DESCRIPTION: _____

LINE ITEM: _____

QUANTITY AND UNITS: _____

This shipment of hazardous waste is exempt from the surcharge fees because the waste is:

_____(a) Ash that results from the incineration of hazardous waste of incineration of solid waste as defined in part 115.

_____(b) Hazardous waste exempted by rule because of its character or the treatment it has received.

_____(c) Hazardous waste that is removed from a site of environmental contamination that is included in a list submitted to the legislature pursuant to section 20105, or hazardous waste that is removed as part of a site cleanup activity at the expense of the state or federal government.

_____(d) Solidified hazardous waste produced by a solidification facility licensed pursuant to section 11123 and destined for land disposal.

_____(e) Hazardous waste generated pursuant to a 1-time closure or site cleanup activity in his state if the closure or cleanup activity has been authorized in writing by the department. Hazardous waste resulting from the cleanup of inadvertent releases which occur after March 30, 1988 is not exempt from the fee.

_____(f) Primary and secondary wastewater treatment solids from a wastewater treatment plant that includes an aggressive biological treatment facility as defined in section 3005(j)(12)(B) of Subtitle C of the Solid Waste Disposal Act, 42 U.S.C. 6925.

_____(g) Emission control dust or sludge from the primary production of steel in electric furnaces.

GUIDE 154 - SUBSTANCES - TOXIC AND / OR CORROSIVE (NAERG96) (NON-COMBUSTIBLE)

POTENTIAL HAZARDS

HEALTH:
* TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
* Contact with molten substance may cause severe burns to skin and eyes.
* Avoid any skin contact.
* Fire may produce irritating, corrosive and / or toxic gases.
* Runoff from fire control or dillution water may be corrosive and / or toxic and cause pollution.

FIRE OR EXPLOSION:
* Non-combustible, substance itself does not bum but may decompose upon heating to produce corrosive and / or toxic fumes.
* Some are oxidizers and may ignite with combustibles (wood, paper, oil, clothing, etc.).
* Containers may explode when heated.

PUBLIC SAFETY

* **CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper is not available or no answer, refer to appropriate telephone number listed on the inside back cover. CHEMTREC 1-800-424-9300**
* Isolate spills or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
* Keep unauthorized personnel away.
* Stay upwind.
* Keep out of low areas.
* Ventilate enclosed areas.

PROTECTIVE CLOTHING:
* Wear positive pressure self-contained breathing apparatus (SCBA).
* Wear chemical protective clothing which is specifcally recommended by the manufacturer.
* Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION:

SPILL
* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY". (NR)

FIRE
* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions. (NR)

EMERGENCY RESPONSE

FIRE

Small Fires

* Dry chemical, CO2, or water spray.

Large Fires

* Dry chemical, CO2, alcohol-resistant foam or water spray.
* Move containers from fire area if you can do it without risk.
* Dike fire control water for later disposal; do not scatter the material.

Fire involving Tanks or Car / Trailer Loads

* Fight fire from maximum distance or use unmanned hose holders or motion nozzles.
* Do not get water inside containers.
* Cool containers with flooding quantities of watewr until well after fire is out.
* Withdraw immediately in case of rising sound venting safety devices of discoloration of tank.
* ALWAYS stay away from ends of tanks.

SPILL OR LEAK

* ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area).
* Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.
* Stop leak if you can do it without risk.
* Prevent entry into waterways, sewers, basements or confined areas.
* Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers.
* DO NOT GET WATEWR INSIDE CONTAINERS.

FIRST AID

* Move victim to fresh air. * Call emergency medical care.
* Apply artificial respiration if victim is not breathing.
* Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.
* Administer oxygen if breathing is difficult.
* Remove and isolate contaminated clothing and shoes.
* In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes.
* For minor skin contact, avoid spreading material on unaffected skin.
* Keep victim warm and quiet.
* Effects of exposure (inhilation, ingestion or skin contact) to substance may be delayed.
* Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

CHECKLIST - HAZARDOUS WASTE
PREPARATION FOR SHIPMENT TO TSDF

Manifest Document Number: ILD 039344809 98010
State Manifest Number: MI 3687824
Prepared by: EL Date: 5/15/98

[X] 1. Clean tops and sides of drums.
[X] 2. Check drums for leaks and damage.
[X] 3. Tighten bungs.
[X] 4. Get label master:
(UN1719 - 1,3,4,5,7,8)
(~~UN1760 - 9~~)
(UN1993 - 6)

DM #6 5/11/98

[X] 5. Assign drum number.
[X] Mark drum number on map.
[X] List date and contents on map.
[X] Mark drum number on drum.
[X] 6. Assign manifest number.
[X] Log entry.
[X] Add manifest number to label master.
[X] 7. Photocopy label master onto orange sticker.
[X] Cleck sticker for clarity.
[X] Cut and trim labels.
[X] 8. Fill out individual orange address labels.
[X] Accumulation start date.
[X] Drum number.
[X] Lovejoy contents code number.
[X] 9. Appy orange label to drum.
** Side of drum:
[X] Address label.
[X] Contents/warning label.
[X] Hazard diamond label.
** Top of drum:
[X] ~~Contents/warning~~ label.
[ ] Hazards ~~diamond~~ label.
[X] 10. Fill out manifest.
[X] 11. Fill out Land Ban Restriction Notice.
[X] 12. Call for pick up. (Date: 5/18 Time: 7:00 Contact: GDS)
[X] 13. Prepare Hazardous Waste Load in Transit (roadload).
[X] 14. Prepare emergency contact information.
[X] Copy of manifest
[X] Copy of Land Ban Restriction Notice.
[X] Copy of Hazardous Waste Liad in Transit.
[X] Emergency Response Book page.
[X] Waste Data Sheet or analysis.

[X] 15. Present waste to shipper:
[ ] Spill kit to dock.
[X] Train Driver. (Driver name: TOM)
[X] Location of spill kit.
[X] Location of fire extinguisher.
[X] Location of phone.
[X] Chock truck wheels.
[X] Turn truck engine off.
[X] Outer door and dock plate controls.
[X] 16. Witness loading of hazardous waste.
[X] Capatibiltiy with other wastes on truck.
[X] Load properly distributed.
[X] Good condition of truck cargo area.
[X] Load properly secured.
[X] No evidence of drum leakage.
[X] Propoer plackards on truck. (Type: 3-8)
[ ] Driver accepted from Lovejoy.
[X] Driver has plackards.
[X] 17. Sign and distribute shippiong documents.
** Lovejoy:
[X] 1 copy of manifest for state.
[X] 1 copy manifest for file.
[X] 1 copy Land Ban Restriction Notice.
** Shipper:
[X] 4 copies of manifest.
[X] 1 copy of Land Ban Restriction Notice.
[X] Emergency Response Guide Book
[ ] Driver accepted from Lovejoy (Guide number(s): _____)
[X] Driver has copy in truck.
[X] 18. Truck leaves Lovejoy property.
[X] Switch cell phone.
* while at work - forward to 630-852-0500.
* while in car - turn off call forwarding
* while at home - forward to 708-474-3585.
[X] Enter ship date in log.
[X] Adjust Purchase Order records.
[X] Notify Receiving Clerk to enter transaction.
[X] Mail copy of manifest to state.
[X] Emergency contact data file:
* 1 full set in office
* 1 full set in briefcase (for home)
* 1 full set in car
[X] Mark due date for manifest return in appointment book (35 days)
[X] 19. File records.
[ ] 20. Manifest returned by TSDF (end cell phone switching)
[ ] Close out log entry.
[ ] File returned copy of manifest.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR; if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

GENERATOR

GUIDE 128 FLAMMABLE LIQUIDS (NAERG96)
(NON-POLAR / WATER-IMMISCIBLE)

POTENTIAL HAZARDS

FIRE OR EXPLOSION:
* HIGHLY FLAMMABLE: Will be easily ignited by heat, sparks or flames.
* Vapors may form explosive mixtures with air.
* Vapors may travel to source of ignition and flash back.
* Most vapors are heavier than air. They will spread along the ground and collect in low or confined areas (sewers, basements, tanks).
* Vapor explosion hazard indoors, oytdoors or in sewers.
* Some may polymerize (P) explosively when heated or involved in a fire.
* Runoff to sewer may create fore or explosion hazard.
* Containers may explode when heated.
* Many liquids are lighter than water.
* Substances may be transported hot.

HEALTH:
* Inhilation or contact with material may irritate or burn skin and eyes.
* Fire may produce irritating, corrosive and / or toxic gases.
* Vapors may cause dizziness or suffocation.
* Runoff from fire control or dillution water may cause pollution.

PUBLIC SAFETY

* **CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper is not available or no answer, refer to appropriate telephone number listed on the back inside cover. (CHEMTREC 1-800-424-9300)**
* Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
* Keep unauthorixed personel away.
* Stay upwind.
* Keep out of low areas.
* Ventilate closed spaces before entering.

PROTECTIVE CLOTHING:
* Wear positive pressure self-contained breathing apparatus (SCBA).
* Structural firefighters' protective clothing will only provide limited protection.

EVACUATION:
LARGE SPILL
* Consider initial downwind evacuation for at least 300 meters (1000 feet).

FIRE
* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

EMERGENCY RESPONSE

FIRE:
CAUTION: All these products have a very low flash point: Use of water spray when fighting fire may be inefficient.

Small Fires
* Dry chemical, CO2, water spray or regular foam.

Large Fires
* Water spray, fog or regular foam.
* Do not use straight streams.
* Move containers from fire area if you can do it without risk.

Fire involving Tanks or Car / Trailer Loads
* Fight fire from maximum distance or use unmanned hose holders or monitor nozzles.
* Cool containers with flooding quantities of water until well after fire is out.
* Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank.
* ALWAYS stay away from ends of tanks.
* For massive fire, use unmanned hose holders or monitor nozzles; If this is impossible, withdraw from area and let fire burn.

SPILL OR LEAK:
* ELIMINATE all ignition sources (no smoking, flares or flames in immediate area).
* All equipment used when handling the product must be grounded.
* Do not touch or walk through spilled material.
* Stop leak if you can do it without risk.
* Prevent entry into waterways, sewers, basements or confined areas.
* A vapor surpressing foam may be used to reduce vapors.
* Absorb or cover with dry earth, snad or other non-combustible material and transfer to containers.
* Use clean non-sparking tools to collect absorbed material.

LARGE SPILLS
* Dike far ahead of liquid spill for later disposal.
* Water spray may reduce vapor; but may not prevent ignition in closed spaces.

FIRST AID:
* Move victim to fresh air.
* Call emergency medical care.
* Apply artificial respiration if victim is not breathing.
* Administer oxygen if breathing is difficult.
* Remove and isolate contaminated clothing and shoes.
* In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes.
* Wash skin with soap and water.
* Keep victim warm and quiet.
* Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

CHECKLIST - HAZARDOUS WASTE
PREPARATION FOR SHIPMENT TO TSDF

Manifest Document Number: ILD 039344809 98009
State Manifest Number: MI 3687823
Prepared by: EL Date: 5/1,79

[✓] 1. Clean tops and sides of drums.
[✓] 2. Check drums for leaks and damage.
[✓] 3. Tighten bungs.
[✓] 4. Get label master:
(UN1719 - 1,3,4,5,7,8)
~~(UN1760 - 8)~~
(UN1993 - 6)

11/18/97 1, 11/24/97 1 11/5/98 1 12-21-97 1 11/18/97 1
1, 2, 3, 4, 5

[✓] 5. Assign ~~drum number~~.
[✓] Mark drum number on map.
[✓] List date and contents on map.
[✓] Mark drum number on drum.
[✓] 6. Assign manifest number.
[✓] Log entry.
[✓] Add manifest number to label master.
[✓] 7. Photocopy label master onto orange sticker.
[✓] Cleck sticker for clarity.
[✓] Cut and trim labels.
[✓] 8. Fill out individual orange address labels.
[✓] Accumulation start date.
[✓] Drum number.
[✓] Lovejoy contents code number.
[✓] 9. Appy orange label to drum.
** Side of drum:
[✓] Address label.
[✓] Contents/warning label.
[✓] Hazard diamond label.
** ~~Top of drum:~~
[ ] ~~Contents/warning label.~~
[ ] ~~Hazards diamond label.~~
[X] 10. Fill out manifest.
[X] 11. Fill out Land Ban Restriction Notice.
[X] 12. Call for pick up. (Date: 5/18 Time: 7:00 Contact: Geo.)
[X] 13. Prepare Hazardous Waste Load in Transit (roadload).
[X] 14. Prepare emergency contact information.
[X] Copy of manifest
[X] Copy of Land Ban Restriction Notice.
[X] Copy of Hazardous Waste Liad in Transit.
[X] Emergency Response Book page.
[X] Waste Data Sheet or analysis.

[X] 15. Present waste to shipper:
- [X] Spill kit to dock.
- [X] Train Driver. (Driver name: Tom)
  - [X] Location of spill kit.
  - [X] Location of fire extinguisher.
  - [X] Location of phone.
  - [X] Chock truck wheels.
  - [X] Turn truck engine off.
  - [X] Outer door and dock plate controls.

[X] 16. Witness loading of hazardous waste.
- [X] Capatibiltiy with other wastes on truck.
- [X] Load properly distributed.
- [X] Good condition of truck cargo area.
- [X] Load properly secured.
- [X] No evidence of drum leakage.
- [X] Propoer plackards on truck. (Type: 3/8)
  - [ ] Driver accepted from Lovejoy.
  - [X] Driver has plackards.

[X] 17. Sign and distribute shippiong documents.
- ** Lovejoy:
  - [X] 1 copy of manifest for state.
  - [X] 1 copy manifest for file.
  - [X] 1 copy Land Ban Restriction Notice.
- ** Shipper:
  - [X] 4 copies of manifest.
  - [X] 1 copy of Land Ban Restriction Notice.
  - [X] Emergency Response Guide Book
    - [ ] Driver accepted from Lovejoy (Guide number(s): _____)
    - [X] Driver has copy in truck.

[X] 18. Truck leaves Lovejoy property.
- [X] Switch cell phone.
  - * while at work - forward to 630-852-0500.
  - * while in car - turn off call forwarding
  - * while at home - forward to 708-474-3585.
- [X] Enter ship date in log.
- [X] Adjust Purchase Order records.
- [X] Notify Receiving Clerk to enter transaction.
- [X] Mail copy of manifest to state.
- [X] Emergency contact data file:
  - * 1 full set in office
  - * 1 full set in briefcase (for home)
  - * 1 full set in car
- [X] Mark due date for manifest return in appointment book (35 days)

[X] 19. File records.

[ ] 20. Manifest returned by TSDF (end cell phone switching)
- [ ] Close out log entry.
- [ ] File returned copy of manifest.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (Sec 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

J. THIS RESTRICTED W. .E IS SUBJECT TO AN EXEMPTION .OM LAND DISPOSAL.

(Please include the date the waste is subject to the prohibitions in Column 6)

This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

... THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c).

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS NON-HAZARDOUS WASTE STREAM REQUIRES SOLIDIFICATION PRIOR TO LANDFILLING.

M. THIS NON-HAZARDOUS WASTE STREAM DOES NOT REQUIRE TREATMENT PRIOR TO LANDFILL.

N. SURCHARGE EXEMPTION. This is a certification pursuant to section 11108(3) of Act 451 of 1994 (the Natural Resources and Environmental Protection Act) that the hazardous waste identified herein is exempt from the surcharge provided in the Act.

ASTE DESCRIPTION: _____

LINE ITEM: _____

QUANTITY AND UNITS: _____

This shipment of hazardous waste is exempt from the surcharge fees because the waste is:

_____(a) Ash that results from the incineration of hazardous waste of incineration of solid waste as defined in part 115.

_____(b) Hazardous waste exempted by rule because of its character or the treatment it has received.

_____(c) Hazardous waste that is removed from a site of environmental contamination that is included in a list submitted to the legislature pursuant to section 20105, or hazardous waste that is removed as part of a site cleanup activity at the expense of the state or federal government.

_____(d) Solidified hazardous waste produced by a solidification facility licensed pursuant to section 11123 and destined for land disposal.

_____(e) Hazardous waste generated pursuant to a 1-time closure or site cleanup activity in his state if the closure or cleanup activity has been authorized in writing by the department. Hazardous waste resulting from the cleanup of inadvertent releases which occur after March 30, 1988 is not exempt from the fee.

_____(f) Primary and secondary wastewater treatment solids from a wastewater treatment plant that includes an aggressive biological treatment facility as defined in section 3005(j)(12)(B) of Subtitle C of the Solid Waste Disposal Act, 42 U.S.C. 6925.

_____(g) Emission control dust or sludge from the primary production of steel in electric furnaces.

How Must The Waste Be Managed?

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD.
This waste must be treated to the applicable performance based treatment standard set forth in 40 CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS.
I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT.
I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45.
I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IX TO PART 268.
I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack does not contain any wastes identified at Appendix IV to part 268. I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS.
I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are sig. ificant penalties for submitting false certification, including the possibility of fine and imprisonment.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide–LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

HOW MUST THE WASTE BE MANAGED?

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Sect 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I ha personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certificati and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that t treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 2 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of t prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine ar imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HA BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance wit the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including th possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personall examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification tha the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFI 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there ar significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN E[illegible]TION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide--LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

HOW MUST THE WASTE BE MANAGED?

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a pronibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

15. Special Handling Instructions and Additional Information: EMERGENCY CONTACT 630-852-0500

16. GENERATOR'S CERTIFICATION: I hereby delare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and selected the best waste management method that is available to me and that I can afford.
