Emy,

Two CDs containing the consolidated RCRA and CERCLA Groundwater Monitoring Reports from 2005 through present and the Effluent Monitoring Reports from January 2005 through November 2012 for The Dalles site were mailed to you via overnight mail (they were mailed from CDM Smith's office).

The Groundwater Monitoring Reports were submitted bi-annually to ODEQ (quarterly in 2005). These reports include documentation regarding the discharge of treated leachate (i.e., batch discharge forms, analytical data, and discharge volume totals for the leachate discharges from the CERCLA tank (Outfall C)).

Also included on the CD are Effluent Monitoring Reports from January 2005 through November 2012. These reports are prepared monthly by Northwest Aluminum Specialties and document the effluent monitoring for the NPDES discharge.

Please contact me with any questions or comments.

Thanks,

Brian

Emy,

We are still compiling the documents and should have them together by tomorrow or Thursday. They are too large to email so we will need to send you a CD with the requested documents. I will let you know when we get everything together.

Thanks,

Brian

Emy,

I will put together the requested documents. I will provide you with an update later today on how soon you will receive them and the method of delivery.

Please contact me with any questions or comments.

Thanks,

Brian

Subject: EXTERNAL: request for information/reports

Hello Bill,

I am not sure if you are the appropriate person to request this from, but I am looking for the annual groundwater monitoring reports and leachate discharge reports for the Martin-Marietta Site from 2005 to the present. Can you direct me to someone who has these reports? I need them to finalize the CERCLA five-year review.

Thank You,

Emy
