Re: Request for Information Pursuant to Section 104 of CERCLA for the Downers Grove Groundwater Site in Downers Grove, DuPage County, Illinois

Dear Ms. Ropski:

In our capacity as counsel to Morey Corporation ("Morey Corp.") we have prepared on Morey Corp.'s behalf the following Response to U.S. EPA's Request for Information Pursuant to Section 104 of CERCLA for the Downers Grove Groundwater Site in Downers Grove, DuPage County, Illinois, dated April 18, 2002. Under cover of this letter, please find enclosed documents bearing the Bates stamp range MOR 000001-MOR 001390 and MOR 001425-MOR 001556. Documents in the range MOR 001391-MOR 1424 are being sent simultaneously under separate cover in an oversize document tube. This set of documents is identical to a set produced to Illinois EPA ("IEPA") in response to an information request that was also related to the Downers Grove Groundwater Site investigation, with the addition of five (5) additional pages numbered MOR 001552-MOR 001556.

The following responses correspond to the numbered requests contained in the information request:

FOLEY & LARDNER
THREE FIRST NATIONAL PLAZA
70 WEST MADISON, SUITE 4100
CHICAGO, ILLINOIS 60602

TEL: 312.755 1900
FAX: 312 558 6538
WWW.FOLEYLARDNER.COM

CLIENT/MATTER NUMBER
087656-0114

011.489401.1

1. Identify all persons consulted in the preparation of the answers to these Information Requests.

Response: Current employees of Morey Corp., 100 Morey Drive, Woodridge, Illinois, 60517, (630) 754-2300: Dana Morey Vice-President; Jay Morey, Vice-President; Vincent Petrella, CFO; Fred Pfeiffer, Safety Manager; Jonathan Rausch, Director of Materials Purchasing; Theresa Cunningham, Purchasing Agent; Bill Prasch, Director of Manufacturing; Chris Murphy, Director of Test Engineering; Bogdan Buczek, Plant Engineer; Wayne Dial, Sales Manager; and Ed Hollowed, Chief Engineer. Former employee: Patricia Jurinek, Morey Corp.'s Purchasing Manager from 1979 through 1992, 9 S. 737 William Drive, Hinsdale, IL 60527; Phone (630) 243-6430. Counsel: Gary Rovner, Foley & Lardner, Three First National Plaza, 70 West Madison, Chicago, IL 60602 and Jeff Zimmerman, Foley & Lardner, 3000 K Street, N.W., Suite 500, Washington, D.C. 20007.

2. Identify all documents consulted, examined, or referred to in the preparation of the answers to these Requests, and provide copies of all such documents.

Response: The documents that we examined in preparation of the answers to this information request were, for the most part, the same documents that we identified and provided to the Illinois Environmental Protection Agency, Bureau of Land, in response to its information request regarding the Downers Grove groundwater investigation, dated October 3, 2001. Copies of these documents, bearing the Bates stamp range MOR 000001-MOR 001551, are enclosed. In addition, we obtained information from one of Morey Corp.'s vendors regarding four potting

machines purchase from that vendor between 1986 and 1991. Copies of these additional documents, bearing the Bates stamp range MOR 001552 – MOR 001556, are enclosed.

3. If you have reason to believe that there may be persons able to provide a more detailed or complete response to any Information Request or who may be able to provide additional responsive documents, identify such persons.

Response: By an agreement dated January 9, 2001 (See MOR 000211 and following) Morey Corporation's parent company, MC Holdings Corporation/Morey Realty Group, Inc. ("MC Holdings") sold the portion of the subject property containing Morey Corp.'s Facility to Ross and Barbara Johnson of Johnson Printing, 2659 Wisconsin Avenue, Downers Grove, Illinois. The current owners may have additional information not in the control of Morey Corporation about current activities at the Facility. In addition, individuals previously with Montgomery Ward, which leased part of the facility located at 2659 Wisconsin Avenue, Downers Grove, IL, may have more information related to the underground storage tank installed, used, and removed by Montgomery Ward. We do not have names or contact information for any such individuals.

4. Have you conducted any Phase I or Phase II investigations at your property? If so, please send copies of all reports including the analytical data.

Response: Morey Corp. has produced the following, which represents all reports in its possession relating to the facility: (1) A Focused Site Investigation & Remedial Action Completion Report (Addendum) (MOR 000012-000040) prepared by Pioneer Environmental, Inc. and dated January 23, 2001; (2) A Focused Site Investigation & Remedial Action

Completion Report (MOR 000042-000210) dated November 8, 2000; and (3) A Phase II Subsurface Investigation Report prepared by Environmental Management and Resource Consultants, Inc. (ENMARC) dated May 18 and June 2, 2000 (MOR 000589-000629).

5. Are there any monitoring wells on your property? If so, provide a map and the analytical results of the samples that were collected. Identify the entity that installed the monitoring wells and the date(s) of the well installations.

Response: To the best of the knowledge of those who participated in preparing this response letter, the property does not have and never has had any groundwater wells.

6. Have any soil borings been collected on your property. If so, send a map and analytical results related to the borings that were collected. Identify the entity that performed the soil borings and the date(s) in which they were taken.

Response: Yes, a total of 17 soil borings were conducted by Pioneer Environmental, Inc., in connection with the Focused Site Investigation & Remedial Action Completion Report (MOR 000042-000210) dated November 8, 2000, and with the Focused Site Investigation & Remedial Action Report (Addendum) (MOR 000012-000040) dated January 23, 2001. Fifteen of these soil borings were conducted on August 28 and 29, 2000 (see, MOR 000050). The sixteenth and seventeenth borings were conducted on January 2, 2001 (see, MOR 000015). While both reports include location maps and analytical results, the more recent report includes a map showing all the boring location on one page at MOR 000018 and all analytical results in one table at MOR 000020-21.

7. Have there ever been above ground or below ground storage tanks at your facility? If so, provide maps of the locations of the tanks. What was stored in each tank? If the tanks have been removed or replaced provide the date(s) of their removal or replacement. Provide copies of any analytical results of the contents of the tanks and analytical results of any samples taken of the soil surrounding or below the tanks.

Response: Morey Corporation has never installed or used any above ground or underground storage tanks either inside or outside the building located on this property. Based on information and belief, Morey Corporation understands that its tenant, Montgomery Ward, installed and ultimately removed an underground storage tank (UST) on this property. It is believed that this tank was used to store fuel for their vehicles. It is our understanding that removal of the UST occurred prior to the expiration of the Montgomery Ward lease. It is also our understanding based on the information available to us, that the tank was removed in accordance with all applicable state and federal regulations, but Morey Corp. does not have access to any written information or reports related to the use or the removal of this tank. The company has no reason to believe that any leakage of petroleum products occurred from the time the UST was installed through its removal.

8. Describe your company's solvent management system (including the locations of your product and waste holding tanks, drums and containers) at your facility prior to 1980.

Response: Morey Corp. has always used this facility for the manufacture of small electrical and mechanical assemblies (i.e. circuit board assemblies) primarily for use in automotive and telecommunication assemblies. Its processes required the use of relatively small amounts of hazardous materials and/or substances. Morey Corp. has no records or other

information available to it to determine precisely what the solvent management system at this facility was prior to 1980. but has interviewed current and former employees, Fred Pfeiffer, Ed Hollowed and Patricia Jurinek, who collectively provided the following anecdotal information about solvent management system. Prior to 1980, Morey Corp primarily used Freon as a solvent in a parts washer. Paint thinner was also used in very small quantities by dampening a rag and wiping or by using a small artists paint brush to apply thinner to an area where solder flux needed to be removed. Additionally, isopropyl alcohol was also used for the same types of small cleaning purposes. All of these chemicals were purchased using a hand written purchase requisition. When solvent material was received, it was catalogued, inspected for any damage and stored. The material was segregated from other materials and beginning in 1973 stored in a locked fire room. Freon was stored in 55 gallon drums. The thinner and alcohol were stored in the containers that they came in. When thinner or alcohol needed to be used, it was transferred out of the containers in the fire room into small cans which were designed so that, by pushing down on the top of the can, a small amount of the liquid inside would flow into the concave top of the can to be absorbed by a brush or rag. Excess thinner and alcohol evaporated from the top of the small cans and the parts on which they were used.

According to Morey Corp.'s written records (which date back to 1992), hazardous materials arrive at the Facility via the receiving department at a loading dock. All materials received are inspected to verify content, bar coded and sent to a fireproofed, vented fire room (located immediately adjacent to the loading dock) for storage. Any liquid chemical wastes

(such as waste solder flux, thinners, and humiseal) are stored in 55-gallon enclosed drums and are stored in the fire room. Pursuant to the company's waste handling policies, liquid wastes are carried from the work stations to the fire room and placed in sealed waste drums. The waste drums are routinely inspected by the Safety Manager, Mr. Fred Pfeiffer. When a drum is nearly full (depending on use, from around every two to four weeks during the 1980s and before and, more recently, every few months), Mr. Pfeiffer calls the waste disposal company. The liquid wastes are disposed through the services of a third-party contractor, Environmental Waste Services, Inc., 43 West 540 Main Street Road, Elburg, IL. The fire room is identified on the architectural drawings as "storage room." See, e.g. MOR 001409, MOR 001415, MOR 001419.

9. Describe your company's waste solvent handling and disposal practices prior to 1980.

Response: Morey Corp. has no specific information regarding its waste solvent handling and disposal system practices prior to 1980, but, based on information obtained from company personnel, there was very little need for disposal of solvents prior to 1980, because the manufacturing processes were such that very few solvents were used. Freon was the primary solvent used. The company no longer has any records regarding the disposition of used Freon. In discussions with several employees, including, Dana Morey, Jay Morey, William Prasch and Wayne Dial, we have determined that, approximately once a month, the Freon from the parts washer tank was pumped into special drums (metal, 55 gallon), for removal and recycling. The equipment was manufactured by Baron Blakeslee. The new and used Freon was stored in the

fire room. Morey Corp has searched extensively but has not been able to locate records of the company that supplied new Freon, or removed and recycled the used Freon.

Prior to 1980, the company also used small quantities of paint thinner and isopropyl alcohol. Containers of new materials of this type were stored in the fire room. Ms. Jurinek, who was employed by Morey Corp. in 1973 and was in charge of purchasing and assisted in disposal activities beginning in 1979, verified that disposal practices dating back to 1979 were very much in line with current practices. Used solvents were stored in a sealed 55-gallon drum in the fire room, and as it became near to full, the drum was disposed of by a third party contractor. To the best of her recollection, a 55-gallon drum was filled with waste solvents and disposed of at most every two to four weeks.

10. Provide the names of your solvent suppliers, years of service, and quantities of solvents received since you have been at this location.

Response:

The companies and product names listed below are for solvents for which Morey Corp. has current MSDS materials and therefore are solvents that the company either does or may use today. Quantity information, to the extent available from company records is summarized after this table.

Solvent Suppliers, Products, and Quantities Received Since 1992

Company	Product Name	Bates numbers
Markem Corporation	320 Cleaner	MOR 000688-694

DuPont	DBE Solvent	MOR 000706-712
Emerson and Cuming, Inc.	Eccostrip 93	MOR 000751-754
Chemtronics	Electro-Wash PX	MOR 000818-819
Alpha Metals	425 Thinner	MOR 0001350-1355
Humiseal Division, Chase Corp.	Solvent Solution	MOR 000893-895
Union Carbide	Isopropyl Alcohol	MOR 000902-908
Christopher Associates, Inc.	Flux, Solvent Mixture	MOR 000917-922
Loctite Corporation	ODC-Free 20260	MOR 000963-967
Oatey	Oatey Cleaner	MOR 001100-1101
Sherwin Williams	PC 101 Thinner	MOR 001357-1358
Nazdar Chicago	RE180 Screen Ink Thinner	MOR 001372-1376
Sunnyside Corporation	Xylene	MOR 001382-1384

Solvent Suppliers, Products, and Quantities Received Prior to 1992

Company	Product Name	Bates Numbers
Unknown	Freon	n/a
Unknown	Isopropyl alcohol	n/a
Unknown	Paint thinner	n/a
Unknown	Trichloroethylene	n/a

Based on anecdotal information obtained from company personnel (see discussion in the response to Question 8 above), Morey Corp. had a parts washer that used Freon to clean small parts and assemblies made by the company. While we do not know when Freon use began, we believe it was discontinued in the mid-1980s. We have no quantity information regarding Freon purchases. Based on this same information, the company also used small quantities of isopropyl alcohol and paint thinner for cleaning parts assemblies during the manufacturing process, a s described above in the response to Question 8.

Starting in 1986, Morey Corp. added equipment known as "potting machines" for use on certain products it produced. Records we obtained from the manufacturer of these machines indicate that Morey Corp. purchased the first of these machines in April 1986, a second in September 1988, a third in August 1989, and a fourth in January 1991. MOR 001552-0001556. These machines mixed a two part epoxy compound and pumped the mixture into electronic component parts to insulate and seal the electronics in place once the epoxy mix cured. The tubing that dispensed the mixed epoxy had to be cleaned with a solvent at the end of each work day so that no epoxy residue would be left behind to block the tubing. Based on information and belief, from April 1986 until May 1990, trichloroethylene (TCE) was used to clean the tubing, by a closed loop system built into each machine that passed the TCE from a small (3-5 gallon) holding tank, through the tubing, and back into the holding tank. Periodically, when the epoxy residue in the tank reached a level where the solvent effect was diminished, the TCE would be transferred into a 55 gallon waste solvent drum stored for approximately one month in the fire

room until it was nearly full. It would then be removed by a solvent handler for offsite recycling. TCE was only used in these potting machines. There was no other use of TCE at the facility. Sometime prior to May 1990 (the exact date is unclear), DBE Solvent was substituted for TCE in this equipment and TCE use at the facility ceased.

The only purchaser records Morey Corp. has for solvent materials are from 1992 forward. This period, under the heading "Gen Alcohol," the purchase records (MOR 001511-1519) show a total of 1009 containers (5 gallons each) were purchased for a total of 5045 gallons of solvent. Over this same period, under the heading "Gen. Thinner Conformal," the purchase records (MOR 001449-0001451, MOR 001460-0001467) show a total of 1240 containers (5 gallons each) were purchased for a total of 6200 gallons of solvent. Finally, for this period, under the heading "Gen. Thinner (No Clean)," the purchase records (MOR 001452-1459) show a total of 300 containers (5 gallons each) were purchased for a total of 1500 gallons of solvent. Morey Corp. has no purchase records for either the Freon used in the parts washer or the TCE used in the potting machines. Similarly, there are no records to quantify the amount of isopropyl alcohol or paint thinner used during or prior to the 1980s.

11. Provide the names of your waste solvent handlers, years of service, and quantities of waste shipped since you have been in service at this location.

Response: Since 1992, all waste solvents have been handled by Environmental Waste Services, Inc., located at 43 W 540C Main Street Rd., Elburn, IL 60119. See MOR 000643.

Morey Corp.'s hazardous waste manifest records (MOR 000299-MOR 000567) show that 4515 gallons of solvent waste have been shipped from the site. As noted in the responses to Questions 9 and 10 above, we have no information to identify the names of the solvent handlers for any of the waste solvent materials prior to 1992.

12. Provide drawings or diagrams of your sanitary and storm water sewer system at your facility.

Response: The sanitary and storm sewer systems are shown on Architectural drawing P-1 dated 3-16-73 (MOR 001419).

13. Provide a copy of all correspondence between yourself and each unit of local government regarding discharges into St. Joseph Creek and the municipal sewer.

Response: To the best of our knowledge, there is no correspondence between Morey Corp. and any unit of local government regarding discharges into St. Joseph Creek or the municipal sewer.

14. Describe the function of any floor drains at the facility. Provide a map of each floor drain location. Describe where the floor drains and associated piping drain to.

Response: To the best of our knowledge, there is one floor drain at this facility. This drain runs from the fire room to the outside of the building at the facility and is identified as a 4" pipe connected to a "scupper drain" on Sheet S-2 dated 3-16-73 (MOR 001418) and noted on

Sheet A-2 dated 3-16-73 (MOR 001415). This scupper drain was intended to drain any liquids that might be present on the floor of the fire room. The area around this drain was investigated and remediated in 2000/2001, and a No Further Remediation Letter was received at the completion of that project, see MOR 000001-000010.

This response was prepared in reliance, in whole or in part, upon officers, agents, employees or records of Morey Corp. This response is tendered subject to inadvertent or undiscovered errors and is necessarily limited by the records and information still in existence, presently recollected, and thus far discovered. Morey Corp. reserves the right to make changes to this Response if it appears that omissions or errors have been made or that more accurate information becomes available. Subject to these limitations, the Response is true to the best of the knowledge and belief of the undersigned.

Sincerely,

FOLEY & LARDNER

This Environmental No Further Remediation Letter must be submitted by the remediation applicant within 45 days of its receipt, to the Office of the Recorder of DuPage County.

Illinois State EPA Number: 0430305029

Dana Morey, the Remediation Applicant, whose address is 100 Morey Drive, Woodridge, IL 60517 has performed investigative and/or remedial activities for the remediation site depicted on the attached Site Base Map and identified by the following:

1. Legal description or Reference to a Plat Showing the Boundaries:

   Subject Property Legal Description:
   Lots 32 and 33 in Ellsworth Park unit number 5, being a subdivision in the southwest ¼ of section 12, Township 38 North, Range 10 East of the third principal meridian, according to the plat thereof recorded January 10, 1962 as document number R62-993 in DuPage County, Illinois.
   Remediation Site Description:
   Beginning at the southeast property corner of Lot 32, extending north along eastern property line for 120 feet, then due west 100 feet, then south 120 feet to the southern property line and then east 100 feet to the point of beginning.

2. Common Address: 2659 Wisconsin Street, Downers Grove, IL

3. Real Estate Tax Index/Parcel Index Number: ~~02~~ 08-12-303-008

4. Remediation Site Owner: Dana Morey

5. Land Use: Industrial/Commercial

6. Site Investigation:Focused

See NFR letter for other terms.

Re: 0430305029/DuPage
Downers Grove/Morey Corporation
Site Remediation Program/Technical Reports

Dear Mr. Morey:

The *Focused Site Investigation & Remedial Action Completion Report* (November 8, 2000/00-4399), and the addendum to the report (January 23, 2001/01-0286) as prepared by Pioneer Environmental, Inc. for the Morey Corporation property, has been reviewed by the Illinois Environmental Protection Agency ("Illinois EPA") and demonstrates that the remedial action was completed in accordance with the *Focused Site Investigation & Remedial Action Completion Report* (November 8, 2000/00-4399), and the addendum to the report (January 23, 2000/01-0286).

The Remediation Site, consisting of 0.03 acres, is located at 2659 Wisconsin Street, Downers Grove, Illinois. Pursuant to Section 58.10 of the Illinois Environmental Protection Act ("Act") (415 ILCS 5/1 et seq.), your request for a no further remediation determination is granted under the conditions and terms specified in this letter. The Remediation Applicant, as identified on the Illinois EPA's Site Remediation Program DRM-1 Form (November 13, 2000/00-4399), is Dana Morey.

This focused No Further Remediation Letter ("Letter") signifies a release from further responsibilities under the Act for the performance of the approved remedial action. This Letter shall be considered prima facie evidence that the Remediation Site described in the attached Illinois EPA Site Remediation Program Environmental Notice and shown in the attached Site Base Map does not constitute a threat to human health and the environment for the specified recognized environmental conditions so long as the Site is utilized in accordance with the terms of this Letter.

Conditions and Terms of Approval

Level of Remediation and Land Use Limitations

1) The recognized environmental conditions, as characterized by the focused site investigation, consist of the following:

   a) Regulated substances of concern that have been successfully addressed are detailed in the attached Table A.

2) The Remediation Site is restricted to Industrial/Commercial land use.

3) The land use specified in this Letter may be revised if:

   a) Further investigation or remedial action has been conducted that documents the attainment of objectives appropriate for the new land use; and

   b) A new Letter is obtained and recorded in accordance with Title XVII of the Act and regulations adopted thereunder.

Preventive, Engineering, and Institutional Controls

4) The implementation and maintenance of the following controls are required as part of the approval of the remediation objectives for this Remediation Site.

Institutional Controls:

5) No person shall construct, install, maintain, or operate a water system or well on the property identified in the Environmental Notice. All water supplies and water services for the Remediation Site must be obtained from a public water supply system. The provisions of this institutional control shall be applicable to all water usage (e.g., domestic, industrial/commercial uses and outdoor watering).

Other Terms

6) Where the Remediation Applicant is not the sole owner of the Remediation Site, the Remediation Applicant shall complete the attached *Property Owner Certification of the No Further Remediation Letter under the Site Remediation Program* Form. This certification, by original signature of each property owner, or the authorized agent of the owner(s), of the Remediation Site or any portion thereof who is not a Remediation Applicant shall be recorded along with this Letter.

7) Further information regarding this Remediation Site can be obtained through a written request under the Freedom of Information Act (5 ILCS 140) to:

Illinois Environmental Protection Agency
Attn: Freedom of Information Act Officer
Bureau of Land-#24
1021 North Grand Avenue East
Post Office Box 19276
Springfield, IL 62794-9276

8) Pursuant to Section 58.10(f) of the Act (415 ILCS 5/58.10(f)), should the Illinois EPA seek to void this Letter, the Illinois EPA shall provide notice to the current title holder and to the Remediation Applicant at the last known address. The notice shall specify the cause for the voidance, explain the provisions for appeal, and describe the facts in support of this cause. Specific acts or omissions that may result in the voidance of the Letter under Sections 58.10(e)(1)-(7) of the Act (415 ILCS 5/58.10(e)(1)-(7)) include, but shall not be limited to:

a) Any violation of institutional controls or the designated land use restrictions;

b) The failure to operate and maintain preventive or engineering controls or to comply with any applicable groundwater monitoring plan;

c) The disturbance or removal of contamination that has been left in-place in accordance with the Remedial Action Plan. Access to soil contamination may be allowed if, during and after any access, public health and the environment are protected consistent with the Remedial Action Plan;

d) The failure to comply with the recording requirements for this Letter;

e) Obtaining the Letter by fraud or misrepresentation;

f) Subsequent discovery of contaminants, not identified as part of the investigative or remedial activities upon which the issuance of the Letter was based, that pose a threat to human health or the environment;

g) The failure to pay the No Further Remediation Assessment Fee within forty-five (45) days after receiving a request for payment from the Illinois EPA;

h) The failure to pay in full the applicable fees under the Review and Evaluation Services Agreement within forty-five (45) days after receiving a request for payment from the Illinois EPA.

9) Pursuant to Section 58.10(d) of the Act, this Letter shall apply in favor of the following persons:

a) Dana Morey;

b) The owner and operator of the Remediation Site;

c) Any parent corporation or subsidiary of the owner of the Remediation Site;

7) Further information regarding this Remediation Site can be obtained through a written request under the Freedom of Information Act (5 ILCS 140) to:

Illinois Environmental Protection Agency
Attn: Freedom of Information Act Officer
Bureau of Land-#24
1021 North Grand Avenue East
Post Office Box 19276
Springfield, IL 62794-9276

8) Pursuant to Section 58.10(f) of the Act (415 ILCS 5/58.10(f)), should the Illinois EPA seek to void this Letter, the Illinois EPA shall provide notice to the current title holder and to the Remediation Applicant at the last known address. The notice shall specify the cause for the voidance, explain the provisions for appeal, and describe the facts in support of this cause. Specific acts or omissions that may result in the voidance of the Letter under Sections 58.10(e)(1)-(7) of the Act (415 ILCS 5/58.10(e)(1)-(7)) include, but shall not be limited to:

a) Any violation of institutional controls or the designated land use restrictions;

b) The failure to operate and maintain preventive or engineering controls or to comply with any applicable groundwater monitoring plan;

c) The disturbance or removal of contamination that has been left in-place in accordance with the Remedial Action Plan. Access to soil contamination may be allowed if, during and after any access, public health and the environment are protected consistent with the Remedial Action Plan;

d) The failure to comply with the recording requirements for this Letter;

e) Obtaining the Letter by fraud or misrepresentation;

f) Subsequent discovery of contaminants, not identified as part of the investigative or remedial activities upon which the issuance of the Letter was based, that pose a threat to human health or the environment;

g) The failure to pay the No Further Remediation Assessment Fee within forty-five (45) days after receiving a request for payment from the Illinois EPA;

h) The failure to pay in full the applicable fees under the Review and Evaluation Services Agreement within forty-five (45) days after receiving a request for payment from the Illinois EPA.

9) Pursuant to Section 58.10(d) of the Act, this Letter shall apply in favor of the following persons:

a) Dana Morey;

b) The owner and operator of the Remediation Site;

c) Any parent corporation or subsidiary of the owner of the Remediation Site;

d) Any co-owner, either by joint-tenancy, right of survivorship, or any other party sharing a relationship with the owner of the Remediation Site;

e) Any holder of a beneficial interest of a land trust or inter vivos trust, whether revocable or irrevocable, involving the Remediation Site;

f) Any mortgagee or trustee of a deed of trust of the owner of the Remediation Site or any assignee, transferee, or any successor-in-interest thereto;

g) Any successor-in-interest of the owner of the Remediation Site;

h) Any transferee of the owner of the Remediation Site whether the transfer was by sale, bankruptcy proceeding, partition, dissolution of marriage, settlement or adjudication of any civil action, charitable gift, or bequest;

i) Any heir or devisee of the owner of the Remediation Site;

j) Any financial institution, as that term is defined in Section 2 of the Illinois Banking Act and to include the Illinois Housing Development Authority, that has acquired the ownership, operation, management, or control of the Remediation Site through foreclosure or under the terms of a security interest held by the financial institution, under the terms of an extension of credit made by the financial institution, or any successor-in-interest thereto; or

k) In the case of a fiduciary (other than a land trustee), the estate, trust estate, or other interest in property held in a fiduciary capacity, and a trustee, executor, administrator, guardian, receiver, conservator, or other person who holds the remediated site in a fiduciary capacity, or a transferee of such party.

10) This letter, including all attachments, must be recorded as a single instrument within forty-five (45) days of receipt with the Office of the Recorder of DuPage County. For recording purposes, the Illinois EPA Site Remediation Program Environmental Notice attached to this Letter should be the first page of the instrument filed. This Letter shall not be effective until officially recorded by the Office of the Recorder of DuPage County in accordance with Illinois law so that it forms a permanent part of the chain of title for the Morey Corporation property.

11) Within thirty (30) days of this Letter being recorded by the Office of the Recorder of DuPage County, a certified copy of this Letter, as recorded, shall be obtained and submitted to the Illinois EPA to:

Robert E. O'Hara
Illinois Environmental Protection Agency
Bureau of Land/RPMS
1021 North Grand Avenue East
Post Office Box 19276
Springfield, IL 62794-9276

12) In accordance with Section 58.10(g) of the Act, a No Further Remediation Assessment Fee based on the costs incurred for the Remediation Site by the Illinois EPA for review and evaluation services will be applied in addition to the fees applicable under the Review and Evaluation Services Agreement. Request for payment of the No Further Remediation Assessment Fee will be included with the billing statement.

If you have any questions regarding this correspondence, you may contact the Illinois EPA project manager, Steve McCaslin at 217-557-8085.

Sincerely,

Lawrence W. Eastep, P.E., Manager
Remedial Project Management Section

Re: FSI / RACR Addendum
0430305029 – DuPage County
2659 Wisconsin Street
Downers Grove, Illinois
Pioneer Project No. 00618B

Dear Mr. McCaslin:

As you requested, Pioneer Environmental, Inc. (Pioneer) has performed additional assessment work at the above captioned site in connection with our *Focused Site Investigation & Remedial Action Completion Report* (FSI/RACR), dated November 8, 2000, which was submitted to the Site Remediation Program for review and evaluation. Based on our telephone conversations that took place after your review of the FSI/RACR, it was agreed that two additional soil borings would be advanced in order to further define the horizontal extent of contamination to the south, the vertical extent of contamination in the source area, and to assess the contaminant conditions directly beneath the former floor drain discharge pipe. In addition, a Tier 2 Groundwater Evaluation was performed as you suggested to expedite the review and subsequent closure of this site, and the proper disposal of contaminated soil that was previously excavated from beneath the floor drain discharge pipe (i.e. source area) was also conducted. Thus, this letter discusses the procedures and results of these requested activities and is intended to serve as an addendum to Pioneer's original FSI/RACR (Addendum).

Pioneer mobilized to the site and advanced two additional soil borings, B-16 and B-17, on January 2, 2001. These borings were placed in the specific locations discussed by Pioneer and the Agency prior to mobilization to the site. The soil sampling procedures were performed in accordance with Pioneer's Standard Protocol for Subsurface Sampling as described in the original FSI/RACR and in Attachment 1 of this Addendum. The soil boring locations are shown on Figure 1 and soil boring logs are included in Attachment 1.

In order to obtain the additional data requested, Pioneer selected three soil samples from the two boring locations for analytical testing. The selected samples were then shipped overnight to an independent laboratory under standard chain-of-custody procedures, and submitted for analysis

of the appropriate targeted compounds (VOCs). The results of the laboratory analyses are summarized in Table No. 1 and copies of the laboratory reports are included in Attachment 2.

The results indicated that all contaminant concentrations detected were below the Tier 2 SROs established for the site (Appendix H of FSI/RACR). It should be noted the Tier 2 SROs calculated for the site were based on the Mass-Limit Equations (S-26, S-27 & S-28) for the inhalation exposure route and the soil component of groundwater ingestion exposure route, found in Appendix C, Table A of TACO. The results of this recent sampling event confirm that *maximum* contaminant concentrations detected at the site are the same as those shown in Table 4.5.1 of the original FSI/RACR.

As we also discussed, in order to expedite the overall review and closure of the site, a Tier 2 Groundwater Evaluation, pursuant to 35 IAC 742.805, is presented herein as opposed to the Tier 3 approach originally presented in the FSI/RACR. Pioneer performed the weighted average calculation as outlined in 35 IAC 742.805(c). According to Table F of Appendix A of TACO, three similar-acting carcinogenic compounds affect the liver: tetrachloroethylene (PCE), trichloroethylene (TCE), and vinyl chloride (VC). Since other target organs listed in Table F are affected by fewer than three similar-acting compounds, the weighted average calculation for liver will yield the most conservative value.

Since no actual groundwater data was collected from the site for use in calculating the weighted average and as we discussed, Pioneer predicted groundwater concentrations from *maximum* detected soil concentrations using Equation R-14 (Appendix H of FSI/RACR) and then calculated Tier 2 Groundwater Remediation Objectives (GROs) using Equation R-26. Given the fact that an institutional control will eliminate any exposure point on the remediation site, Pioneer used Equation R-26 to "back calculate" allowable source area concentrations to ensure Tier 1 Class I GROs will be achieved at the eastern property boundary, the nearest exposure point. Tier 2 GRO calculations are included in Attachment 3. The results of these calculations were used to determine the weighted average for liver and are summarized as follows:

Tier 2 GROs / Weighted Average Parameters

COC	Maximum Soil Concentration (Actual)	Predicted Groundwater Concentration (x_s)	Calculated Tier 2 GROs ($CUOx_s$)
Tetrachloroethylene	110,000	56,075	4,860,000
Trichloroethylene	8,000	3,897	20,800
cis-1,2-Dichloroethylene	3,300	5,457	24,800
Vinyl Chloride	46	91	709
Methylene Chloride	40	118	$2.03(10^{25})$

All values in parts per billion (ppb).

Using predicted groundwater concentrations as x_a values and the Tier 2 GROs as the $CUOx_a$ values, as outlined in Section 742.805(c)(1), the following equation was solved using the parameters listed above.

$$W_{ave} = \frac{x_1}{CUOx_1} + \frac{x_2}{CUOx_2} + \ldots \frac{x_a}{CUOx_a}$$

The result of this calculation yielded a W_{ave} value of 0.327. Since this value is less than 1.0, remediation objectives are met for the above listed chemicals pursuant to Section 742.805(c)(1)(i). The calculation is included as Attachment 3.

The four drums of contaminated soil, which were previously excavated from beneath the floor drain discharge pipe, have been disposed of as hazardous waste. A copy of the hazardous waste manifest is included as Attachment 4. Finally, per your request, Pioneer submitted a revised Site Base Map (Figure 2) and ascertained that the site operated for approximately 35 years.

Pioneer hopes this information sufficiently addresses your comments and can allow the review and subsequent closure of this site to proceed. Pioneer appreciates your time in this matter and if you have any questions regarding any of the information presented herein, please contact me at (312) 587-1021. Further, any efforts that can be made to expedite your review of this submittal would be greatly appreciated.

Sincerely,
PIONEER ENVIRONMENTAL, INC.

Thomas A. Brecheisen
Project Manager

Pioneer Protocol for Subsurface Soil Sampling

Soil Boring Logs

PROTOCOL FOR SUBSURFACE SOIL SAMPLING

Subsurface samples are collected by employing various soil boring techniques based on certain site specific conditions. Soil borings are performed using a Hollow or Solid Stem (site specific) auger with split-spoon sampling techniques, a hydraulic percussive split-spoon sampler, a percussive Macro-Core® barrel sampler, and/or a stainless steel hand auger. The soil sampling activities are conducted in accordance with American Society of Testing and Materials (ASTM) standards (ASTM:D 1586). Soil samples are collected with a stainless steel hand auger, a split-spoon sampler, and/or a Macro-Core® sampler at 2-3 foot intervals depending on the specific method used. In the split-spoon sampling procedures, a split-barrel sampler having either a 2-inch or 1-3/16 inch outside diameter, an inside diameter of 1-3/8 or 7/8 inches, and a length of 2.5 or 3 feet is driven into the soil to collect a representative and undisturbed sample. In the Macro-Core® barrel sampling technique, a stainless steel barrel having a 2-inch outside diameter, an inside diameter of 1-1/2 inches, and a length of 2 or 3 feet is fitted with a PVC liner and is driven into the soil to collect a representative and undisturbed sample.

The drilling is directed by a Pioneer Environmental Field Project Geologist/Engineer, who logs geologic materials encountered during drilling, field screens auger cuttings and soil samples, observes the drilling activities, and supervises sample collection. Each sample is examined in the field for odor and visual evidence of hydrocarbon or other organic contamination. The field observations are noted in the soil boring logs that are included in the Appendices.

A representative portion of each sample is placed into an unused, air-tight plastic bag which is sealed and dedicated to that discrete sample. The sample is allowed to achieve a constant temperature and the headspace above each sample is screened for volatile organic compounds (VOCs) using either a Photovac MP-1000 handheld air monitor / photoionization detector (PID) or a Photovac IS 3000 handheld air monitor / flame ionization detector (FID), depending on the nature of the targeted contaminants. The PID/FID are devices that are sensitive to a variety of VOCs. The headspace is screened by inserting the PID/FID probe into the space above the soil and recording the maximum reading of the instrument. The results of the headspace screening are also listed on the soil boring logs.

When soil samples will be laboratory tested for VOCs, one of two field sampling methods are used as required by US EPA's SW-846 Method 5035. 1) A representative portion of the sample collected in the field is placed in an EnCore™ sampler, or equivalent, immediately after collection, with the appropriate quantity and volume of the containers determined by the scope of work and field conditions. The EnCore™ samplers, or equivalent, are delivered to the laboratory within 48 hours of sample collection. 2) An appropriate weight of a representative portion of the sample collected in the field is placed in laboratory-provided glassware, immediately after collection, and then the appropriate preservative is added, either sodium bisulfate-for samples with estimated VOC concentrations less than 200 ppb; or methanol-for samples with estimated VOC concentrations greater than 200 ppb.

Any soil samples chosen for analysis are packed in appropriate containers, properly labeled, and shipped in a cooler on ice via a delivery service overnight to an independent laboratory under standard chain-of-custody procedures. Samples are selected based on the scope of work, field observations (i.e. visual/odor observations, elevated PID readings, etc.), other site specific conditions, and the judgment of the Pioneer Field Project Geologist/Engineer.

Drill cuttings and liquids generated are left at the borehole. All boreholes are decommissioned in accordance with applicable Illinois Department of Public Health guidelines. When required, these spoils are contained in 55 gallon Type 17H drums. Decontamination procedures for the drilling equipment consists of steam cleaning the augers after each boring using a biodegradable detergent and high-pressure steam rinse. The split-spoon samplers are decontaminated between each sample interval by washing in a solution of Alconox and water, and triple rinsing with clean heated water.

Any deviations to or modifications of this standard protocol will be described on a site by site basis.

1.0 INTRODUCTION

1.1 Site Investigation Objectives

Pioneer Environmental, Inc. (Pioneer) was contracted by MC Holdings, Inc. (Remediation Applicant / client) to conduct a "focused" site investigation and provide environmental consulting services for the subject site located at 2659 Wisconsin Avenue in Downers Grove, Illinois (Figure 1). The purpose of the focused site investigation was to determine the nature and extent of contamination related to accidental releases of waste cleaning solvent that was previously identified during an initial assessment, and then use the regulatory options provided in 35 IAC Part 740-Site Remediation Program (SRP), and Part 742-Tiered Approach to Corrective Action Objectives (TACO), to obtain a focused "No Further Remediation" Letter (NFR Letter) for the subject site.

The following report is strictly related to the subsurface investigation activities conducted by Pioneer and is intended to serve as a *Focused Site Investigation & Remedial Action Completion Report* pursuant to Sections 740.435, 740.445 and 740.455. The contents of this report include a detailed discussion of the site characterization work and the TACO procedures utilized to establish site-specific remediation objectives and determine the degree of remedial action necessary to obtain a NFR Letter in accordance with Part 740, Subpart F and Section 58.10 of the Illinois Environmental Protection Act.

1.2 Background Information

The subject property, encompassing approximately 3.9 acres of land, consists of two parcels of land owned by MC Holdings, Inc. The Remediation Site consists of an approximate 1,200 square foot area located near the east-central portion of the subject property (Figure 2). A tall, one-story structure and an adjacent asphalt parking lot comprise the subject property which is located within the Ellsworth Industrial Park. The subject property is currently vacant and the property owner informed Pioneer that the building was formerly used for the manufacturing of small electronic components (See Section 2.1). Legal descriptions for the subject property and the Remediation Site are included in Appendix A.

The client is hereby submitting the required paperwork (Appendix A) to notify the Illinois Environmental Protection Agency (IEPA) of their election to proceed under the Site Remediation Program (SRP). This is being done for the express purpose of securing a NFR Letter from the State.

1.3 Recognized Environmental Conditions

As previously discussed, the subject property was used for manufacturing small electronic components. According to the property owner, historical site operations involved the storage of miscellaneous liquid wastes in a small, dedicated room along the subject building's eastern wall. This waste primarily included cleaning solvent and soldering by-products (i.e. flux). A floor drain from the waste storage room discharged to the ground surface immediately outside the building's eastern wall. Pioneer was informed that an initial assessment was previously performed at the site and identified certain volatile organic compounds (VOCs) in soil samples collected from the area around this drain pipe. Therefore, the presence of VOC-impacted soils was identified as a recognized environmental condition (REC) and provided the focus for the site investigation activities conducted at the subject site by Pioneer.

1.4 Contaminants of Concern

Based on the REC, the information from the previous assessment, and the nature of the suspected source at the subject site, Pioneer established volatile organic compounds (VOCs) as the appropriate contaminants of concern (COCs) at the subject site. The VOC analysis includes the full-scan of organic compounds typically found in waste cleaning solvents, including tetrachloroethylene (PCE), trichloroethylene (TCE) and the various degradation compounds of PCE and TCE.

2.0 SITE CHARACTERIZATION

2.1 Site Description

The subject site consists of two parcels of land owned by MC Holdings, Inc. The subject site is rectangular in shape and encompasses approximately 3.9 acres of land located near the southwest corner of the intersection of Wisconsin Street and Katrine Avenue in the Village of Downers Grove, Illinois. The subject site is occupied by an approximate 43,200 square foot one-story building located within the Ellsworth Industrial Park. The site is bordered to the north and east by Wisconsin Street and Katrine Avenue, respectively, beyond which are industrial/commercial buildings. An asphalt parking lot lies to the west of the subject building, beyond which is industrial/commercial development. South of the subject building is an asphalt parking lot beyond which is densely vegetated vacant land.

The subject building consists primarily of an open warehouse area, where former soldering workstations were utilized to manufacture small electrical and mechanical assemblies (i.e. circuit boards). As assemblies were completed, they were cleaned with solvent and the solvent was then stored in a 55-gallon drum in the aforementioned waste storage room located along the eastern side of the subject building. A floor drain routed any small spills of the wastes to a discharge point immediately outside the subject building and directly east of the waste storage room (Figure 3). Evidence of past spills (i.e. staining) was noted on the floor in the waste storage room.

The subject site is located in a manufacturing district (M1) within the Village of Downers Grove. The following list summarizes the adjacent properties noted during the recent investigation.

North: The site is bordered to the north by Wisconsin Street beyond which is Novartis Seeds, Inc. and Amkus Rescue Systems.

East: The site is bordered to the east by Katrine Avenue, beyond which is Lovejoy.

West: The site is bordered to the west by a public storage facility.

South: The subject property is bordered to the south by vacant land that is known as Elmore Avenue (dedicated right-of-way), beyond which is densely vegetated vacant land, reportedly located in an unincorporated portion of Downers Grove.

2.2 Sampling Plan

Based on the reported presence of solvent contamination beneath the discharge pipe outside the eastern edge of the building, Pioneer developed a sampling plan to adequately characterize the site conditions associated with the REC. The objectives of the assessment activities were to confirm and supplement previous assessment activities which indicated the site's soils had been impacted by VOCs and then to delineate the horizontal and vertical extent of the potential VOC contamination based on Pioneer's assessment results.

As mentioned, Pioneer was informed by the owner that VOC-impacted soils were identified by a previous assessment conducted in the area outside the east wall of the subject building from a floor drain discharge related to spills from former waste transfer operations previously conducted on-site. Pioneer noted evidence of past spills on the floor of the former waste storage room (i.e. staining). The owner stated that an excavation (3' x 3' x 4' deep) was dug manually beneath the discharge pipe. Soils from the excavation were stockpiled inside 55-gallon drums outside the subject building (Figure 3) and are intended for proper disposal according to the applicable regulations. Therefore, based on the information provided, Pioneer's assessment targeted the area beneath the waste storage room and beneath the discharge pipe outside the eastern portion of the subject building as the potential source area.

As a result, Pioneer advanced 15 soil borings throughout the site. Soil samples were collected and analyzed for VOCs according to USEPA Method 5035/8260B. For purposes of a TACO evaluation, one soil sample was also analyzed for pH and fraction of organic carbon (f_{oc}), according to respective USEPA Methods 9045 and 9060.

2.3 Soil Boring Advancement/Sampling

On August 28 and 29, 2000, Pioneer mobilized subsurface drilling equipment and OSHA-certified personnel to the subject site. A total of 15 soil borings were advanced at strategic locations inside the subject building and throughout the eastern portion of the subject property (Figure 3). Soil borings outside the subject building were advanced through a surface finish of either concrete or vegetated topsoil while soil borings advanced inside the subject building were advanced through concrete and an approximate 6-12 inch layer of associated gravel base materials. Internal soil borings were advanced using a manually-operated jackhammer-driven sinker drill. Exterior soil borings were advanced using a truck-mounted hydraulically-driven sinker drill. Soil samples were collected using a stainless steel barrel sampler with dedicated PVC liner sleeves. A photographic log of these activities is included in Appendix B.

The soil samples obtained from each interval were logged according to their predominant geological characteristics and then divided into two representative portions by a Pioneer Project Engineer. A measured portion of each sample (13 grams) was transferred from the sampling device(s) into pre-labeled laboratory provided glass containers with appropriate preservative (in accordance with SW-846 Method 5035 for VOCs), designated for possible analysis, and stored in a cooler on ice to preserve the integrity of the sample. The remaining portion of each sample was sealed in a pre-labeled plastic bag and set aside to be field screened.

After a sufficient amount of time had elapsed to allow the soil vapors to equilibrate with the air in the sample bags, the sealed soil vapors were field screened using either a MicroFID™ IS-3000 hand-held flame ionization detector (FID). This device is sensitive to a variety of VOCs, including those commonly associated with waste solvents and their degradation compounds. The instrument provides a quantitative indication of the relative concentrations of these compounds in the soil sample by measuring the amount of VOCs trapped in the headspace of the bags.

Pioneer selected soil samples from various boring locations for analytical testing. The samples were selected based on the scope of work, FID readings, and judgment of the

Project Engineer. The selected samples were then shipped overnight to an independent laboratory under standard chain-of-custody procedures, and submitted for analysis of the appropriate targeted compounds (VOCs). Pioneer's complete protocol for subsurface soil sampling and soil boring logs are provided in Appendix C.

2.4 Field Observations

No visual/olfactory indications of potential contamination were noted in any of the soil borings advanced on-site; however, elevated FID readings were noted in three of the 15 soil borings advanced at the subject site. This field evidence of contamination was primarily observed in samples collected beneath the former waste storage room and near the floor drain discharge pipe outside the eastern portion of the subject building (i.e. source area) and was observed from near surface grade to depths up to 12 feet BSG.

2.5 Site Geology

Soils beneath asphalt and concrete surface materials consisted primarily of brown silty clay and clayey silt from near surface grade to depths ranging from approximately 6 to 9 feet below surface grade (BSG). In general, the upper silty clay unit contained varying percentages of gravel, sand and silt, retained a loose, firm to stiff consistency, and exhibited brown to dark brown color variations.

Beneath this brown upper silty clay unit, a gray silty clay unit was encountered in all borings at depths ranging from 6 to 12 feet BSG with the exception of B-9, which was terminated at 9 feet BSG. The gray silty clay unit contained trace percentages of fine sand and its consistency ranged from soft to stiff. Based on observations from B-6, which began approximately 4 feet below natural surface grade due to the recessed loading dock, the gray silty clay persisted to at least 16 feet BSG. There was no obvious evidence of groundwater detected during any of the subsurface investigation activities performed by Pioneer.

According to the Illinois State Geological Survey (ISGS) map dated 1984 and titled *Stack-Unit Mapping of Geological Materials in Illinois to a Depth of 15 Meters*, by Kempton, John P. et al., and the ISGS map dated 1970 and titled *Surficial Geology of the Chicago Region*, by Willman and Lineback, the subject site is situated on the Wadsworth Member of the Wedron Formation, which is described as mostly gray clayey and silty clayey till, with low pebble, cobble and boulder content and local silt lenses present from approximately six to 15 feet BSG. The Wedron Formation is described as silty and clayey tills with interspersed beds of alluvial sand and gravel deposits.

Pioneer also reviewed Plate 1 of the ISGS Circular dated 1984 and titled *Potential for Contamination of Shallow Aquifers in Illinois*, by Berg, Richard C. et al. Plate 1 indicates the subject site is located on the border of areas designated as "C2" and "E". A "C2" classification is described as sand and gravel within 20-50 feet of surface underlain by impermeable till. An "E" classification is described as uniform, relatively impermeable silty or clayey till at least 50 feet thick. Based on the actual subsurface sediments encountered at the subject site, the site geology appears more consistent with an "E" classification.

Based on the Berg Circular and the predominant soil types encountered at the subject site, hydraulic conductivities were estimated to range from 10^{-9} to 10^{-7} cm/s, which indicate the site's soils have a low permeability. A complete listing of the geological conditions encountered during drilling are provided on the soil boring logs in Appendix C. Copies of the ISGS maps are included in Appendix D.

3.0 TIER 1 EVALUATION

3.1 Introduction

Based on the nature of the REC, each of the soil samples analyzed during the site investigation was tested for VOCs. In order to further characterize the site and for purposes of a potential Tier 2 evaluation, one soil sample was analyzed for pH and one soil sample was also analyzed for its fraction of organic carbon (f_{oc}). All analytical tests were performed by an independent laboratory in accordance with accepted State and Federal test methods.

Based on the site's historical and intended future industrial use, soil sample analytical results contained herein are compared to the most stringent soil remediation objectives (SROs) for industrial/commercial property, also referred to as Tier 1 SROs, found in 35 IAC 742, Tiered Approach to Corrective Action Objectives (TACO). The industrial/commercial Tier 1 SROs represent baseline contaminant concentrations that are acceptable to the IEPA. These Tier 1 SROs are based on a risk assessment that incorporates a conservative exposure scenario and yields values relative to three primary exposure pathways; namely, ingestion, inhalation, and the groundwater ingestion exposure routes (migration to groundwater), and for two target populations, industrial/commercial workers and construction workers.

Although these Tier 1 SROs may not represent final remediation objectives for the site, the analytical results of the soil and groundwater samples are herein compared to the most stringent Tier 1 SROs for industrial/commercial property use for initial screening purposes. Pursuant to the Part 742 regulations, the values for each of the three exposure pathways must be presented for matters of comparison and the most stringent becomes the remediation objective for a Tier 1 Evaluation.

3.2 Soil Sample Analytical Results

A total of 14 soil samples were analyzed for VOCs. The analytical results of the soil samples tested for VOCs indicated that concentrations of five of the 37 targeted compounds exceeded the most stringent Tier 1 SROs in seven of the samples analyzed. Table 3.2.1 provides a detailed breakdown of the particular pathway-specific Tier 1 SROs that were exceeded.

TABLE 3.2.1
Contaminants of Concern Exceeding Tier 1 SROs
The Morey Corporation
2659 Wisconsin Street / Downers Grove, Illinois

Sample ID	TACO Exposure Pathways						
	Route Specific Values				*Soil Component of Groundwater Ingestion Exposure Route*		*Soil Saturation Limit* C_{sat}
	Industrial - Commercial		*Construction Worker*				
	Ingestion	*Inhalation*	*Ingestion*	*Inhalation*	*Class I*	*Class II*	
B-1 (3'-6')	PCE	PCE		PCE	PCE, TCE, DCE, VC	PCE, TCE, DCE	
B-1 (9'-12')					DCE		
B-2 (6'-9')					PCE		
B-6 (3'-6')					PCE, TCE, DCE, VC	PCE, TCE, DCE	
B-10 (4'-6')		PCE		PCE	PCE	PCE	
B-10 (10'-12')					PCE	PCE	
B-12 (4'-6')					MC		

Notes:
PCE = Tetrachloroethylene; TCE = Trichloroethylene; DCE = cis 1,2-Dichloroethylene; VC = Vinyl Chloride
MC = Methylene Chloride

Analytical results show that remaining VOCs in these seven soil samples and the VOCs in all other soil samples were either not detected at the stated detection limits or were detected below the most stringent Tier 1 SROs. A complete summary of soil analytical results is provided in Table No. 1 and laboratory reports are included in Appendix E. Soil sample locations and exceedances of the Tier 1 SROs are shown on Figure 4.

Soil samples B-7 (3'-6') and B-14 (3'-6'), which were collected from non-impacted areas, were also analyzed for pH and f_{oc} respectively. Results yielded a pH of 7.20 standard units

and an organic carbon content of 1.08 % (or 0.0108 g-C / g-soil), which is approximately 5 times greater than the IEPA subsurface default value of 0.2% (0.002 g-C / g-soil).

3.3 Tier 1 Evaluation – Summary

The analytical results have demonstrated that soils beneath the eastern portion of the subject site have been impacted, to varying degrees, by: tetrachloroethylene (PCE), trichloroethylene (TCE), cis 1-2 dichloroethylene (DCE), vinyl chloride (VC) and methylene chloride (MC). The soil contamination appears to be most severe beneath the former waste storage room and the floor drain discharge pipe, which was considered the apparent source area based on the information previously provided by the owner.

4.0 ENDANGERMENT ASSESSMENT / REMEDIATION OBJECTIVES DETERMINATION

4.1 Introduction

As mentioned above, the analytical results of the soil samples indicated that the subject property has been impacted by certain VOCs at concentrations above the industrial/commercial Tier 1 SROs (Figure 4). As a result, Pioneer performed an endangerment assessment in accordance with the procedures outlined in the TACO regulations. The approach of this endangerment assessment was to eliminate the groundwater ingestion pathway and to establish site-specific Tier 2 SROs for remaining pathways for those contaminants detected above the most stringent industrial/commercial Tier 1 SROs. The five COCs at the site that were analytically confirmed to exceed the most stringent industrial/commercial Tier 1 SROs for any pathway are herein referred to as Targeted COCs and have been outlined below in Table 4.1.1.

Table 4.1.1
Targeted Contaminants of Concern

Targeted COCs	*Pathway Exceeded*			
	Ingestion	*Inhalation*	*Class I*	*Class II*
Tetrachloroethylene (PCE)	X	X	X	X
Trichloroethylene (TCE)			X	X
Cis 1,2 Dichloroethylene (DCE)			X	X
Vinyl Chloride (VC)			X	
Methylene Chloride (MC)			X	

4.2 Exposure Route Evaluation

Each of the potential exposure routes was evaluated pursuant to Subpart C of the Part 742 regulations to determine the feasibility of excluding specific pathways (i.e. groundwater ingestion and migration to groundwater) for the targeted COCs identified at the site. As provided in Subpart C of the Part 742 regulations, exposure pathways may be excluded from consideration if it can be demonstrated that an actual or potential impact to a receptor

or potential receptor can be eliminated. If exposure pathways can be excluded, their corresponding objectives are no longer applicable.

However, prior to conducting an exposure pathway assessment, the specific targeted COCs must be identified at the site. Based on the analytical results of the assessment work, the compounds listed in Table 4.1.1 were the only COCs identified at the site that required investigation beyond a Tier 1 evaluation.

As outlined in Section 742.305, prior to elimination of any pathways at a site, certain minimum requirements must be evaluated and satisfied. These requirements include the following:

- The sum of the concentrations of all organic COCs shall not exceed the attenuation capacity of the soil as determined under Section 742.215 (Section 742.305(a));

Pioneer calculated the sum of the organic compounds from each of the soil samples analyzed, using the value of the corresponding detection limit when the compound was not detected. The sum of the organic COCs from the most contaminated soil sample analyzed, B-1 (3'-6'), totaled 121 ppm (Table No. 1). Therefore, based on the analytical results of the soil samples collected, and the comparison to the most stringent default attenuation capacity for the site (2,000 ppm), it has been demonstrated that the attenuation capacity of the soil has not been exceeded; thus, this requirement has been satisfied.

- The concentrations of any organic COCs remaining in the soil shall not exceed the soil saturation limit as determined under Section 742.220 (Section 742.305(b)).

The maximum concentration and the soil saturation limits of the Targeted COCs (with melting points below 30°C) have been outlined below in Table 4.2.1. As illustrated, the default soil saturation limits are not exceeded by the maximum concentration of any of the Targeted COCs; therefore, this requirement has been satisfied for the subject property.

Table 4.2.1
Maximum Concentration of COCs (with melting points below 30°C) and Soil Saturation Limits

Targeted COCs	*Maximum Concentration (ppb)*	*Soil Saturation Limit (ppb)*
Tetrachloroethylene	110,000	240,000
Trichloroethylene	8,000	1,300,000
Cis 1,2 Dichloroethylene	3,300	1,200,000
Vinyl Chloride	46	1,200,000
Methylene Chloride	40	1,200,000

- Any soil which contains COCs shall not exhibit characteristics of reactivity for hazardous waste (Section 742.305(c));

Based on the physical and chemical properties and the relative concentrations of the contaminants identified at the site, it is unlikely that the soil at the subject property would exhibit the characteristics of reactivity as outlined in 35 IAC 721.123; thus, this requirement has been satisfied.

- Any soil which contains COCs shall not exhibit a pH less than or equal to 2.0 or greater than or equal to 12.5 (Section 742.305(d)); and

Based on the result of B-7 (3'-6'), the measured pH of the soil was 7.20 standard units (Appendix E); therefore, this requirement has been satisfied.

- Any soil which contains arsenic, barium, cadmium, chromium, lead, mercury, selenium or silver shall not exhibit any of the characteristics of toxicity for hazardous waste (Section 742.305(e)).

None of the metals listed above were identified as COCs based on the nature of the REC. Therefore, this condition has been satisfied by default.

Based on the preceding evaluation, exclusion of potential exposure pathways is possible at the subject property; however, as described below, additional criteria must also be satisfied

before a particular exposure pathway can be formally excluded from consideration at the site.

4.3 Groundwater Ingestion Pathway

Pursuant to Section 742.320, the groundwater ingestion exposure route, which includes migration from soil to groundwater and direct ingestion of groundwater, may be excluded from consideration if, in addition to the criteria previously outlined in Section 4.2 of this report, the criteria described below are also satisfied. It should be noted that the Village of Downers Grove does not have a groundwater ordinance as required by Section 742.320(d). As a result, elimination of the groundwater ingestion pathway is pursued from a regulatory context under Section 742.900(c)(6). However, the information requested by Section 742.320 is still provided in the subsequent text as it discusses relevant issues needed to support groundwater ingestion pathway elimination under a Tier 3 Evaluation pursuant to Section 742.925(b).

- Corrective action measures must be completed to remove any free product to the maximum extent practicable (Section 742.320(b));

No free product was identified during site assessment activities conducted within the source area or outside the source area; thus, this requirement has been satisfied.

- The source of the release is not located within the minimum or designated maximum setback zone or within a regulated recharge area of a potable water supply well (Section 742.320(c));

Pioneer conducted an Illinois State Geological Survey (ISGS) well search to locate potable water supply wells within a one-mile radius of the source. A review of the ISGS records revealed several private water wells and one community water supply well within 2,500 feet of the site (Appendix F). A representative from the Groundwater Section of the IEPA Bureau of Water informed Pioneer the setback zone for the public water supply well is 400 feet and that there is no regulated recharge area associated with this well. The setback zone for all remaining private wells is 200 feet. Pioneer was additionally informed no maximum setback zone was established for the public water supply well referenced previously. Based on the locations of these wells, the site is not located within the minimum or

designated maximum setback zone of any potable water well or any regulated recharge area. Therefore, this condition is satisfied.

- For any area within 2,500 feet from the source of the release, an ordinance adopted by the unit of local government is in place that effectively prohibits the installation of potable water supply wells (and the use of such wells) (Section 742.320(d));

Pioneer contacted the Village of Downers Grove to determine whether the Village has an ordinance prohibiting the installation of private wells for potable purposes and to determine where the Village gets its potable water supply. Pioneer was informed the Village obtains its public water supply from the City of Chicago, via the DuPage Water Commission, which uses Lake Michigan as its source of potable water. According to the Village representatives, the Village of Downers Grove has a municipal ordinance prohibiting the installation of private wells for potable purposes where municipal water is available within 250 feet. If a business or residence is not within 250 feet of the municipal water supply system, a private well may be installed for potable purposes. Private wells may also be installed solely for irrigation purposes. The remediation site is currently serviced with municipal water and since the site is located within 250 feet of a Village water main, the installation of a private well for potable purposes would be prohibited under the municipal ordinance. A copy of this ordinance is included as Appendix G. However, since the municipal ordinance is not approved by the IEPA for TACO purposes as required under Section 742.1015, this requirement is not satisfied.

Because this condition is not met, Pioneer continued to pursue the exclusion of the groundwater ingestion exposure route under a Tier 3 Evaluation as allowed by Section 742.900(c)(6). The purpose of this Tier 3 Evaluation is to prohibit the potable use of groundwater at the site through a site-specific groundwater use restriction pursuant to Section 742.925.

As previously mentioned, there was no obvious evidence of groundwater encountered during any of Pioneer's subsurface investigation activities and the site is not located within the minimum or designated maximum setback zone of an existing potable water supply well. Further, as described in Section 4.4 of this report, Equation R-14/R-26 modeling calculations show that any *potentially* impacted groundwater would not migrate off-site at

levels above the Class I GROs, based on maximum soil concentrations and corresponding, conservative *theoretical* groundwater contamination.

Based on the information provided in connection with the pathway exclusion justification under Section 742.925 (including Section 742.320), Pioneer believes it has been adequately demonstrated that both the soil and groundwater components of the groundwater ingestion exposure route can be excluded from consideration at this site, as allowed under a Tier 3 Evaluation (Section 742.900[c][6]). An institutional control, in the form of the NFR Letter for the site, will be utilized to prohibit the potable use of groundwater at the site.

4.4 Equation R-14 / R-26 Modeling

Equations R-14 and R-26 were utilized to model predicted future impacts associated with the residual soil contamination at the site. The source area was identified as the area beneath the former waste storage room and the floor drain discharge pipe outside the subject building and is delineated as shown on Figure 4.

Since there was no obvious evidence of groundwater at the site, Equation R-14 was used to predict theoretical groundwater impacts from soil contaminants leaching to groundwater. *Maximum* detected soil concentrations from actual samples collected from the site were used to predict the most conservative theoretical groundwater impacts (C_{source}). The corresponding C_{source} values were then inputted into Equation R-26 to evaluate the current and future potential for impacted groundwater to migrate as a result of the impacted soil leaching to groundwater.

The site-specific input values required for Equation R-14 include the hydraulic conductivity (K), the hydraulic gradient (i), pH, fraction of organic carbon (f_{oc}) and source area dimensions as described below.

- Hydraulic Conductivity (K)

According to the Berg Circular for "E" type soils, typical hydraulic conductivity values range from 10^{-9} to 10^{-7} cm/s. However, Pioneer used a hydraulic conductivity value of 10^{-5} cm/s as a conservative measure.

- Hydraulic Gradient (i)

Pioneer used a hydraulic gradient of 0.01 ft/ft for the calculations. This is a very conservative value given the lack of groundwater observed during the subsurface investigation.

- pH

Pioneer used a site-specific pH of 7.20 standard units as measured from the site's soil (B-7[3'-6']).

- Organic Carbon (f_{oc})

Pioneer used a site-specific f_{oc} value of 1.08% (B-14 [3'-6']) as measured from the site's soil.

- Source Area Dimensions (W, S_w, X)

Site-specific source area parameters used in the R-14/R-26 calculations are shown on Figure 4. These parameters include: width of source area parallel to the direction of groundwater movement (W); source width perpendicular to the groundwater flow direction in the horizontal plane (S_w); and the distance along the centerline of the groundwater plume in the direction of groundwater flow (X). Since the eastern property line is closest to the source area, the distance from the source to the eastern property line was used as 'X' to provide the most conservative result for the R-26 modeling calculation. Remaining parameters are IEPA default values found in 35 IAC 742. Results of Equation R-26 calculations indicated that the Class I GROs would be achieved at the nearest property border (i.e. eastern property line). The R-14/R-26 modeling calculations are included in Appendix H.

4.5 Tier 2 Soil Evaluation

Since the groundwater ingestion pathway and the soil component of the groundwater ingestion pathway have been eliminated under a Tier 3 Evaluation, the remaining pathways (i.e. inhalation, ingestion) were evaluated under a Tier 2 Evaluation. Given the site's intended industrial/commercial redevelopment, Pioneer developed industrial/commercial Tier 2 SROs for the inhalation and ingestion pathways in order to calculate higher, yet acceptable remediation objectives. Pursuant to Subparts F and G of the Part 742 regulations, Tier 2 SROs may be developed utilizing site-specific information and are considered to be equally protective of human health and the environment even though they are less stringent than the conservative Tier 1 SROs.

As outlined in Section 742.600(e), prior to developing Tier 2 SROs for a site, certain minimum requirements must be evaluated and satisfied. These requirements are provided below and are followed by an explanation of how they apply to the subject property.

- The sum of all organic COCs shall not exceed the attenuation capacity of the soil (Sections 742.600(e)(1) and 742.215);

This condition has been met as previously outlined in Section 4.2.

- If more than one noncarcinogenic COC at the site affects the same target organ, the calculated remediation values shall be corrected for cumulative effects (Sections 742.600(e)(2) and 742.720);

Of the site's Targeted COCs (PCE, TCE, DCE, VC and MC), DCE is the only *noncarcinogenic* COC. Because not more than one noncarcinogenic COC is present at the site, remediation values were not corrected and this requirement is satisfied.

- For any organic COC with a melting point below 30°C, the concentration remaining in the soil shall not exceed the soil saturation limit (Sections 742.600(e)(3) and 742.220).

This condition has been met as previously discussed in Section 4.2 (See Table 4.2.1).

Since each of these initial conditions was satisfied, a Tier 2 analysis was considered valid for the subject property. Therefore, Pioneer established Tier 2 SROs for both of the remaining exposure pathways (i.e. inhalation and ingestion). Pioneer utilized the Soil Screening Level (SSL) equations as provided in Section 742.710 to calculate the Tier 2 values. Tier 2 SROs were calculated utilizing a widely accepted third-party software program (TACO PRO™ [2.0]). Tier 2 SROs were calculated for two populations, industrial/commercial workers and commercial workers.

Site-specific variables used during the Tier 2 calculations were limited to include only the measured pH (7.20), the organic carbon fraction of the soil collected from the site (1.08%), and the finite source area dimensions (Figure 4). The IEPA default values provided in Appendix C of the Part 742 regulations were used for all remaining parameters. See Appendix H for a copy of the appropriate IEPA Tier 2 data worksheets containing the Tier 2 SROs calculated for the Targeted COCs as well as a list of the TACO equations used to develop the Tier 2 SROs. Table 4.5.1 compares maximum site concentrations of the targeted COCs to the Tier 2 SROs calculated for the industrial/commercial populations as they are more stringent than the Tier 2 SROs calculated for the construction worker population as required by Section 742.600(h) (Appendix H).

TABLE 4.5.1
Tier 2 Industrial/Commercial SROs
The Morey Corporation
2659 Wisconsin Street / Downers Grove, Illinois

COC	*Maximum Site Concentration*	*Ingestion (Ind/Comm)*	*Inhalation (Ind/Comm)*	*C_{sat} (Surficial)*
Tetrachloroethylene	110,000	110,062	144,728	382,949
Trichloroethylene	8,000	520,291	49,378	2,168,731
cis-1,2-Dichloroethylene	3,300	20,440,000	1,801,007	1,801,007
Vinyl Chloride	46	3,012	999	1,402,301
Methylene Chloride	40	763,093	178,600	3,160,595

All concentrations in µg/kg.

MOR 000064

As indicated by a comparison of the maximum detected concentrations at the site to the most stringent industrial/commercial Tier 2 SROs calculated using TACO equations (Table No. 4.5.1), it was determined that the concentrations of COCs at the site are all less than the calculated Tier 2 SROs for industrial/commercial land use. Therefore, given the elimination of the groundwater ingestion pathway and the use of Tier 2 SROs, the actual risk posed by the residual COCs has been mitigated and the impacted soil may be adequately managed in-place.

5.0 FINDINGS

5.1 Summary

Pioneer was contracted by MC Holdings, Inc. (Remediation Applicant / client) to conduct a "focused" site investigation and provide environmental consulting services for the subject site located at 2659 Wisconsin Street in Downers Grove, Illinois (Figure 1). The purpose of the site investigation was to determine/verify whether subsurface soils had been impacted by VOC-contamination and then use the regulatory options provided in 35 IAC Parts 740 and 742 to address the impacts and obtain a "focused" No Further Remediation Letter for the remediation site. Pioneer was informed by the owner that the soils near the east-central portion of the subject building were impacted with VOC contamination related to accidental spills of cleaning solvents in a waste storage room during past facility operations.

Pioneer mobilized to the subject site to perform site characterization work on August 28 and 29, 2000. As a result, 15 soil borings were advanced at various locations on the subject site and select samples were analyzed for VOCs, the COCs established based on the source.

The Tier 1 Evaluation revealed that soil was impacted by certain chlorinated VOCs above industrial/commercial Tier 1 SROs to varying degrees. The assessment activities indicated the contamination was mainly present beneath the building and pavement within the source area and from near surface grade to approximately six feet BSG near the eastern portion of the subject site. Based on the results of the soil testing, the horizontal and vertical extent of contamination was adequately defined.

Pioneer then performed an endangerment assessment in accordance with TACO regulations to justify the elimination of the groundwater ingestion pathway (soil migration to groundwater) and to develop Tier 2 SROs for the targeted COCs at the site. The groundwater ingestion pathway was eliminated under a Tier 3 Evaluation pursuant to Section 742.925. Equations R-14 and R-26 were utilized to evaluate the potential for

theoretical, predicted future groundwater impacts to migrate. Results of the conservative modeling calculations indicated that the *potential* concentrations of COCs in groundwater would not migrate off-site at concentrations exceeding the Class I GROs as modeled from the source area to the nearest property boundary (Figure 4, Appendix H).

Pioneer then developed Tier 2 SROs for industrial/commercial and construction worker populations to address the remaining exceedances of the Tier 1 SROs for the ingestion and inhalation pathways. The only site-specific variables used for the Tier 2 calculations were the finite source area dimensions (Figure 4), pH (7.20) and the fraction of organic carbon (1.08%); TACO default values were used for all other parameters. Maximum soil contaminant concentrations were compared to the calculated Tier 2 SROs. Since there were no actual site concentrations that exceeded the most stringent calculated Tier 2 SROs (Table 4.5.1), it was determined that no further investigation was warranted and the residual contamination could be adequately managed in-place. A Site Base Map showing the area of contaminants remaining in-place is included as Figure 5.

5.2 Conclusions

Based on the site characterization work which has adequately defined the nature and extent of contamination and the endangerment assessment performed in accordance with the TACO regulations, Pioneer has demonstrated that the applicable remediation objectives have been achieved and that the risk associated with the soil contamination identified at the subject site can be adequately managed in-place. Thus, Pioneer maintains that no further remedial action is warranted in connection with the subsurface impacts identified at the subject site. In addition, Pioneer believes the site conditions warrant the issuance of a "focused" No Further Remediation Letter from the IEPA as acknowledgment of formal site closure in accordance with 35 IAC 740.430 and 415 ILCS 5/58.10 of the Illinois Environmental Protection Act. Pioneer respectfully requests the NFR letter include the following conditions and institutional controls:

- The land use is limited to industrial/commercial use;

- No person shall construct, install, maintain, or operate a water system or well at the remediation site for potable purposes;

- There are no engineering controls;

- Any contaminated soil (or groundwater) that is removed, excavated, or disturbed from the subject property must be handled in accordance with applicable laws and regulations; and

- The NFR Letter shall be recorded as a permanent part of the chain of title for the subject property and serve as an appropriate institutional control.

6.0 CLOSING REMARKS

This report has been prepared for the sole use of the client identified in the report and evaluation by the Illinois EPA, and can not be relied upon by other persons or entities without the joint permission of the client and Pioneer Environmental, Inc. (Pioneer). The observations and conclusions contained herein are limited by the scope and intent of the work mutually agreed upon by the client and Pioneer and the work actually performed. There are no warranties, implied or expressed, concerning the environmental integrity of areas and/or mediums not analytically tested.

Site Remediation Program Application and Services Agreement (DRM- 1) Form

I. Site Identification:

Site Name: The Morey Corporation
Street Address: 2659 Wisconsin Street
City: Downers Grove ZIP Code: 60515
County: Cook Approximate Size of Site (Acres): 3.9
Illinois Inventory I. D. Number: 0430305029 U.S. EPA I.D. Number : ILD025415266
Site Base Map Attached ☑ Illinois EPA Permit(s): NA
LUST/IEMA Incident Number(s), if applicable: NA

II. Remediation Applicant ("RA"):

RA's Name: Dana Morey Title: Co-Owner
Company: MC Holdings, Inc.
Street Address: 100 Morey Drive
City: Woodridge State: IL ZIP Code: 60517
Phone: 630.754.2124 FEIN or SSN: 36-4077561

I hereby certify that I am authorized to sign this application and services agreement. I certify that the proposed project meets the eligibility criteria set forth in Section 58.1(a)(2) of the Environmental Protection Act (415 ILCS 5/58.1(a)(2)) and regulations promulgated thereunder and that this submittal and all attachments were prepared at my direction. In consideration for the Illinois EPA's agreement to provide (subject to applicable law, available resources, and receipt of the advance partial payment) review and evaluation services for activities carried out pursuant to Title 17 of the Illinois Environmental Protection Act (415 ILCS 5/58-58.12), I agree to:

(1) Conform with the procedures of Title 17 of the Illinois Environmental Protection Act (415 ILCS 5/58 - 58.12) and implementing regulations;
(2) Allow for or otherwise arrange site visits or other site evaluations by the Illinois EPA when requested;
(3) To pay any reasonable costs incurred and documented by the Illinois EPA in providing such services; and
(4) Make an advance partial payment to the Illinois EPA for such anticipated services provided in Section V of this application.

As the Remediation Applicant, I understand that I may terminate this services agreement at any time, by notifying the Illinois EPA in writing that services previously requested under the services agreement are no longer wanted. Within 180 days after receipt of the notice, the Illinois EPA shall provide me with a final invoice for services provided until the date of receipt of such notification.

To the best of my knowledge and belief, this request and all attachments are true, accurate and complete. I hereby certify that I have the authority to enter into this agreement.

RA's Signature: Dana M Date: 10-31-00

LPC 565 Feb-2000

III. Project Objectives:

A. Release Letter Requested.

Please complete one of the subsections by checking applicable boxes and including other information (if necessary, additional information may be attached to this application form):

☐ Comprehensive No Further Remediation ("NFR") Letter

☑ Focused NFR Letter

Identify the focused contaminants of concern by checking the applicable box(es):

☑ Volatiles ☐ BTEX ☐ PCBs ☐ Metals
☐ Semivolatiles ☐ PNAs ☐ Pesticides

Other (identify): _____

☐ 4(y) Letter

Identify the focused contaminants of concern by checking the applicable box(es):

☐ Volatiles ☐ BTEX ☐ PCBs ☐ Metals
☐ Semivolatiles ☐ PNAs ☐ Pesticides

Other (identify): _____

Identify the media of concern by checking applicable boxes:

☐ Soil ☐ Sediments Other: _____

Identify the actions (e.g., drum removal, spill response, etc.):

B. Identify any support services being sought from the Illinois EPA in addition to the review and evaluation services (if necessary, additional information may be attached to this application form):

☑ No additional support services are being sought
☐ Assistance with community relations
☐ Environmental Remediation Tax Credit Budget Review (Attach DRM-4 application)
☐ Sample collection and analyses

Other (identify): _____

C. Anticipated Schedule

SRP Document	Projected Date of Receipt by Illinois EPA
Site Investigation Report	**11-1-2000**
Remediation Objectives Report	**11-1-2000**
Remedial Action Plan	
Remedial Action Completion report	**11-1-2000**

D. Identify the current and post-remediation uses of the remediation site (if necessary, additional information may be attached to this application form):

Current Use: **Vacant**

Post-Remediation Use: **Industrial/Commercial**

IV. Written Permission from the Property Owner (check one of the applicable boxes and provide additional information):

☑ RA is the property owner of the remediation site identified in Section I of this application.

☐ RA is **not** the property owner of the remediation site identified in Section I of this application.

Property Owner's Name: _____

Title: _____

Company: _____

Street Address: _____

City: _____ State: _____ ZIP Code: _____ Phone: _____

I hereby certify that the Remediation Applicant has my permission to enroll the site identified in Section I of this application into the Illinois EPA Site Remediation Program. I certify that the Remediation Applicant and designated representatives have permission to enter upon the indicated premises for the purpose of conducting remedial investigations or activities.

Owner's Signature: _____ Date: _____

For multiple property owners, attach additional sheets containing all the information above along with a signed, dated certification for each.

V. Advance Partial Payment:

The Remediation Applicant shall select one of the following advance partial payment plans:

☑ Plan 1: A $500 advance partial payment is included with this application. Please make the check payable to: "Treasurer, State of Illinois". Please include "For Deposit in the Hazardous Waste Fund" and the Remediation Applicant's FEIN or SSN on the check; or

☐ Plan 2: Request that the Illinois EPA determine the appropriate partial payment (i.e., approximately one-half of the total anticipated costs of the Illinois EPA, not to exceed $5,000). A completed DRM-3 form ("Request for Assessment of Advance Partial Payment for Anticipated Services") must accompany this application so that the Illinois EPA may determine the appropriate advance partial payment specific to the services requested.

NOTE: Illinois EPA cannot refund payments without a legislative appropriation. Payment under Plan 1 accelerates the review process but increases the risk of forfeiting the payment if the applicant is ineligible. Payment under Plan 2 may result in a larger advance partial payment when a final determination is made on the application, but it reduces the risk of forfeiture.

L If this application contains plans and reports for review and evaluation by the Illinois EPA, a completed Form DRM-2 must also accompany this submittal.

The Illinois EPA is authorized to require this information under Section 415 ILCS 5/58-58.12 of the Environmental Protection Act and regulations promulgated thereunder. Disclosure of this information is required as a condition of participation in the Site Remediation Program. Failure to do so may prevent this form from being processed and could result in your application being rejected. This form has been approved by the Forms Management Center. All information submitted as part of this Application is available to the public except when specifically designated by the Remediation Applicant to be treated confidentially as a trade secret or secret process in accordance with the Illinois Compiled Statutes, Section 7(a) of the Environmental Protection Act, applicable Rules and Regulations of the Illinois Pollution Control Board and applicable Illinois EPA rules and guidelines.

APPENDIX C

Pioneer Standard Protocol

Soil Boring Logs

Monitoring Well Completion Reports

PROTOCOL FOR SUBSURFACE SOIL SAMPLING

Subsurface samples are collected by employing various soil boring techniques based on certain site specific conditions. Soil borings are performed using a Hollow or Solid Stem (site specific) auger with split-spoon sampling techniques, a hydraulic percussive split-spoon sampler, a percussive Macro-Core® barrel sampler, and/or a stainless steel hand auger. The soil sampling activities are conducted in accordance with American Society of Testing and Materials (ASTM) standards (ASTM:D 1586). Soil samples are collected with a stainless steel hand auger, a split-spoon sampler, and/or a Macro-Core® sampler at 2-3 foot intervals depending on the specific method used. In the split-spoon sampling procedures, a split-barrel sampler having either a 2-inch or 1-3/16 inch outside diameter, an inside diameter of 1-3/8 or 7/8 inches, and a length of 2.5 or 3 feet is driven into the soil to collect a representative and undisturbed sample. In the Macro-Core® barrel sampling technique, a stainless steel barrel having a 2-inch outside diameter, an inside diameter of 1-1/2 inches, and a length of 2 or 3 feet is fitted with a PVC liner and is driven into the soil to collect a representative and undisturbed sample.

The drilling is directed by a Pioneer Environmental Field Project Geologist/Engineer, who logs geologic materials encountered during drilling, field screens auger cuttings and soil samples, observes the drilling activities, and supervises sample collection. Each sample is examined in the field for odor and visual evidence of hydrocarbon or other organic contamination. The field observations are noted in the soil boring logs that are included in the Appendices.

A representative portion of each sample is placed into an unused, air-tight plastic bag which is sealed and dedicated to that discrete sample. The sample is allowed to achieve a constant temperature and the headspace above each sample is screened for volatile organic compounds (VOCs) using either a Photovac MP-1000 handheld air monitor / photoionization detector (PID) or a Photovac IS 3000 handheld air monitor / flame ionization detector (FID), depending on the nature of the targeted contaminants. The PID/FID are devices that are sensitive to a variety of VOCs. The headspace is screened by inserting the PID/FID probe into the space above the soil and recording the maximum reading of the instrument. The results of the headspace screening are also listed on the soil boring logs.

When soil samples will be laboratory tested for VOCs, one of two field sampling methods are used as required by US EPA's SW-846 Method 5035. 1) A representative portion of the sample collected in the field is placed in an EnCore™ sampler, or equivalent, immediately after collection, with the appropriate quantity and volume of the containers determined by the scope of work and field conditions. The EnCore™ samplers, or equivalent, are delivered to the laboratory within 48 hours of sample collection. 2) An appropriate weight of a representative portion of the sample collected in the field is placed in laboratory-provided glassware, immediately after collection, and then the appropriate preservative is added, either sodium bisulfate-for samples with estimated VOC concentrations less than 200 ppb; or methanol-for samples with estimated VOC concentrations greater than 200 ppb.

Any soil samples chosen for analysis are packed in appropriate containers, properly labeled, and shipped in a cooler on ice via a delivery service overnight to an independent laboratory under standard chain-of-custody procedures. Samples are selected based on the scope of work, field observations (i.e. visual/odor observations, elevated PID readings, etc.), other site specific conditions, and the judgment of the Pioneer Field Project Geologist/Engineer.

Drill cuttings and liquids generated are left at the borehole. All boreholes are decommissioned in accordance with applicable Illinois Department of Public Health guidelines. When required, these spoils are contained in 55 gallon Type 17H drums. Decontamination procedures for the drilling equipment consists of steam cleaning the augers after each boring using a biodegradable detergent and high-pressure steam rinse. The split-spoon samplers are decontaminated between each sample interval by washing in a solution of Alconox and water, and triple rinsing with clean heated water.

Any deviations to or modifications of this standard protocol will be described on a site by site basis.

PROTOCOL
GROUNDWATER MONITORING WELL INSTALLATION & SAMPLING

Groundwater monitoring wells are typically installed using hollow stem auger borings. When spatial constraints dictate, wells may be installed using manual hand-augering techniques, or other acceptable practices. Soil sampling is conducted during well installation, according to Pioneer's Subsurface Soil Sampling Protocol. The drilling and well installation are directed by Pioneer's Field Project Geologist/Engineer, who logs geologic materials encountered during drilling, field screens auger cuttings and soil samples, observes the drilling activities, and supervises installation of groundwater monitoring wells. All drilling equipment and tools are properly decontaminated (i.e. pressure washing, steam cleaning, etc.) prior to mobilization onto the site, between boreholes, and upon completion of the drilling program.

Wells are constructed of 2 inch I.D. schedule 40 flush-joint PVC riser and screen unless noted otherwise in the report. The well materials are decontaminated prior to installation. When the depth of the well allows, the annular space surrounding the screen is backfilled with silica sand filter pack to a height not less than 1 foot above the top of the well screen, and a minimum of one foot of bentonite pellets or granular bentonite is placed above this backfill, to provide a low permeability seal. The remaining annulus is sealed with a cement/bentonite grout to the ground surface. Well screens are positioned to monitor selected areas of the water column. In high traffic areas, a flush-mount protective casing with a locking well cap is generally installed at the surface and secured with concrete. In low traffic areas, a "stickup" locking protective casing is typically installed.

After installation, wells are developed using either a new disposable high-density polyethylene (HDPE) bailer for each well, or a stainless steel submersible pump, by purging approximately 5-10 well volumes of water from each well, until the well water is visually clear of suspended sediments, or until further yield cannot be achieved. Wells are allowed to stabilize prior to sampling, to ensure the collected sample is representative of groundwater at the location. If a stainless steel pump is used during well development, it is decontaminated between wells using a tri-sodium phosphate (TSP) wash and triple water rinse.

Prior to sample collection, the wells are purged by removing a maximum of 3-5 well volumes of water or until further yield cannot be achieved in order to remove all static water from the wells. Purging is accomplished using either a disposable HDPE bailer which is dedicated to the individual well or a stainless steel submersible pump. Sample collection is accomplished using a new disposable HDPE bailer for each well. Groundwater samples are collected, placed in appropriately sized laboratory provided glassware and labeled, identifying sample number, location and date, and sampling personnel. The proper sample preservatives are added to the sampling jars as required. Standard chain-of-custody procedures are followed regarding shipment and receipt of samples.

Quality Assurance/Quality Control (QA/QC) procedures for field sampling techniques are performed on a site-by-site basis per scope of work considerations and contract obligations.

In accordance with Pioneer's Site Safety Plan, a photoionization detector (PID) is used to monitor ambient air concentrations at the sampling locations. Personal protective equipment is utilized by site personnel during performance of sampling activities, as specified in the Site Safety Plan as necessary.

Any deviations to or modifications of this standard protocol will be described on a site-by-site basis.

APPENDIX G

Local Groundwater Ordinance

Article V. Cross Connections/Backflow Prevention Requirements.

(Ord. No. 3805, Amended, 12/04/95; Ord. No. 3805, Amended, 12/04/95)

25-51. Cross-connection prohibited; backflow prevention device required.

No person shall establish or permit to be established or maintain or permit to be maintained any connection of a nonpublic water supply to the public water supply of the Village, excluding any water system intercomnections the Village may establish. Backflow prevention devices shall be installed where required under this Article and in accordance with Illinois Environmental Protection Agency Regulations, specifically Ill. Admin. Code, Title 35, Section 653.803.(Ord. No. 2942, § 1; Ord. No. 3301, § 2.)(Ord. No. 3473, Amended, 06/15/92; Ord. No. 3555, Amended, 04/19/93; Ord. No. 3581, Amended, 08/02/93; Ord. No. 3805, Amended, 12/04/95)

25-52. Private water wells; permit required.

(a) It shall be unlawful for any person to dig, drill, redrill or extend, or cause to be dug, drilled, redrilled, or extended, any well, hole or other excavation in the ground for the purpose of extracting water therefrom, at any location within the corporate limits of the Village, except:

(1) Any well authorized and intended to be owned and operated by the Village as part of the Village's water system;

(2) Any well situated on a zoning lot (as such term is defined and used in the Comprehensive Zoning Ordinance of the village) on which a building has been or may be lawfully constructed and occupied; provided, that no portion of such zoning lot is located within two hundred and fifty feet (as measured by the most direct route along public right of way or existing utility easements) of a water main owned by the Village that is available to provide water service to such zoning lot;

(3) Any well situated outside a zoning lot; provided, that such well is not located within two hundred fifty feet (measured as provided in paragraph (2) of this section) of a water main owned by the village that is available to provide water service;

(4) Any well intended and used exclusively for irrigation and watering of crops or landscaping or in cooling towers used in conjunction with air conditioning systems; provided, that the well shall meet the following conditions:

(i) Such well shall not be drilled to a depth greater than two hundred feet; and

(ii) Such well shall not be connected in any way to any water system providing water for domestic use or human consumption, including but not limited to, the Village's water system. In order to assure that water from such well is not so connected, the Village may require that a periodic bacteriological sampling may be taken of the domestic water entering any building on the property served by such well. The charge for such sampling shall be automatically added to the water bill for Village water for such building, and shall constitute an expense to the owner thereof; and

(iii) Any such well with a column pipe up to four inches in size shall not be dug or drilled within fifty feet from any Village-owned well. Any such well with a column pipe greater than five inches in size shall not be dug or drilled within one thousand feet from any Village-owned well; and

(iv) Such well shall be no less than fifteen feet from any publicly or privately owned water main, and

(v) A backflow prevention device shall be installed on the water service pipe(s)/line(s) connecting any structure on the property to the public water supply.

(vi) Such wells shall not be subject to the water conservation regulations in Section 25-5 if the owner or occupant of the property on which the well is located obtains and displays a "private well" sign. A metal sign shall be placed

MOR 000195

OCT-26-2000 14:30 DG PUBLIC WORKS DEPT. 630 434 5495 P.02

in the front yard or a paper sign in the window of the property in a location clearly visible from the street. Such signs shall be obtained from the Village: metal property signs for a cost of twenty dollars; paper window signs at no charge. Except as otherwise provided in the preceding sentences, such wells shall be subject to the water conservation regulations in Section 25-5.

(vii) If well water is used in cooling towers in conjunction with air conditioning systems, all such water shall dispense through evaporation or other appropriate means and shall not be discharged into the sanitary or storm sewer systems, or otherwise discharged into the ground.

(b) It shall be unlawful for any person to dig, drill, redrill or extend, or cause to be dug, drilled, redrilled, or extended, any well, hole or other excavation in the ground for the purpose of extracting water therefrom, without (1) having first applied for and obtained a permit for such well from the Village, which permit shall not be issued unless the applicant provides satisfactory evidence to the effect that such well is permitted under the provisions of subsection (a) above; (2) establishing that permits therefor have also been issued by DuPage County, the Illinois Department of Mines and Minerals and any other governmental authority having jurisdiction thereof; and (3) certifying that such well will be in full compliance with all applicable health and safety requirements of DuPage County. Fees for the permit required in paragraph (a) hereof shall be as follows:

Work Performed	Fee	Bond
Plan review and on site inspection	$ 100.00	N/A
Electrical inspection	6.00	N/A
Parkway opening	20.00	$200.00

(Ord. No. 2942, § 1; Ord. No. 3301, § 3.)(Ord. No. 3805, Amended, 12/04/95)

25-53. Backflow preventers required for certain facilities.

(a) If the director of public works or his designee determines that an industrial or commercial facility is an actual or potential hazard to the public water supply system, the owner or occupant of the property shall install a backflow prevention device on the water service pipes/lines which connect the industrial or commercial facility to the public water supply system. The following types of facilities are presumed to pose an actual or potential hazard unless the director of public works or his designee, upon certification from a cross-connection control device inspector (CCCDI), determines that the building does not pose an actual or potential hazard to the public water supply: (1) hospitals, mortuaries, clinics, nursing homes; (2) laboratories; (3) sewage treatment plants, sewage pumping stations or stormwater pumping stations; (4) food or beverage processing plants; (5) chemical plants; (6) metal plating industries; (7) petroleum processing or storage plants; (8) radioactive material processing plants or nuclear reactors; (9) car washes; (10) pesticide, or herbicide or extermination plants and trucks; (11) farm service and fertilizer plants and trucks. The aforementioned listing is not exhaustive and the director of public works or his designee may determine that other facilities not listed above pose an actual or potential hazard to the public water supply system.

(b) Any property owner or occupant notified in writing of a determination that the facility poses an actual or potential hazard to the public water supply system shall within ninety days of receipt of the notice install the required backflow prevention device at his or her expense and provide the director of public works or his designee with a certificate of inspection from an approved cross-connection control device inspector (CCCDI). (Ord. No. 3301, § 4.) (Ord. No. 3805, Renumbered, 12/04/95, 25-52.1)

REAL ESTATE AGREEMENT

This Contract is made this 9th day of January, 2001, by and between M. C. HOLDINGS, CORP. (hereinafter referred to as "Seller") and ROSS A. JOHNSON and BARBARA R. JOHNSON (hereinafter referred to as "Purchaser").

RECITALS

I. Seller represents that it or its nominee is the owner of real property located at 2659 Wisconsin Avenue, Downers Grove, Illinois 60515, together with all improvements thereon and appurtenances thereto, legally described in Exhibit "A" which is appended hereto and is by reference incorporated herein (hereinafter referred to as the "Premises") and known as P.I.N. 08-12-303-008.

II. Seller desires to sell and Purchaser desires to purchase the premises upon the terms and conditions hereinafter set forth.

Now, therefore, in consideration of the recitals which are hereby specifically by reference incorporated herein and in further consideration of the mutual promises of the parties, it is hereby covenanted and agreed as follows:

1. PREMISES:

Purchaser agrees to purchase from Seller and Seller agrees to sell to Purchaser the premises legally described in Exhibit "A" including all property owned by Seller at this location as specifically set forth on Exhibit "B" and to cause to be granted to Purchaser or its nominee good and merchantable title thereto by Special Warranty Deed with appropriate state and county revenue stamps affixed, subject only to permitted exceptions as hereinafter defined.

2. PURCHASE PRICE AND EARNEST MONEY:

A. The purchase price for the premises shall be in the sum of Two Million and no/100 ($2,000,000.00) Dollars (hereinafter referred to as "Purchase Price"), and shall be payable in the manner and at the time hereinafter set forth.

B. Upon execution of this Agreement:

1. Upon receipt of a fully executed Agreement, the Purchaser shall deposit Fifty Thousand and no/100 ($50,000.00) Dollars, in the form of cash or acceptable Letter of Credit as earnest money in an escrow account to be established with EPIC Savage Realty Partners. If the deposit is in the form of cash, the escrow account shall be interest bearing with interest to be paid to the Purchaser.

2. The escrowee shall be instructed to invest said earnest money in money market funds or certificates of deposit or other interest bearing accounts, and the interest earned thereon prior to disbursement to Seller or refunded to Purchaser shall be paid to Purchaser.

3. CONTINGENCIES:

Purchaser's obligation to perform under this agreement shall be contingent upon the following:

A. Effective November 22, 2000, the Purchaser shall have an initial sixty (60) day feasibility period ending January 22, 2001, in which to conduct soil tests, engineering, environmental and any additional investigations deemed necessary. These investigations will be conducted at the Purchaser's expense and the Purchaser shall agree to repair any damage caused during inspections. Purchaser shall indemnify, defend and hold harmless Seller for any liabilities, claims, suits or causes of action against Seller as a result of said investigations. In the event that Purchaser, in its sole discretion, shall determine that any of Purchaser's investigations indicate that development of the premises is unsuitable, then Purchaser shall so inform Seller in writing, whereupon Seller shall forthwith refund or cause to be refunded to Purchaser the earnest money deposited hereunder and this Agreement shall thereupon terminate and become null and void and of no further force or effect.

B. This Contract shall be subject to the Purchaser's ability to enter into a contract for the sale of Purchaser's property located at 1007 Burlington Avenue, Downers Grove, IL 60515 to the Village of Downers Grove on or before the expiration of Purchaser's feasibility period provided for in paragraph 3(A).

C. During this initial sixty (60) day period, the Purchaser shall have the right to terminate the contract for any reason and all earnest money, together with any and all interest earned thereon shall be returned to Purchaser. Subsequent to the initial sixty (60) day period, the Purchaser's obligation to purchase the property shall be subject to Purchaser's simultaneous closing of the sale of Purchaser's property at 1007 Burlington Avenue, Downers Grove, IL 60515 to the Village of Downers Grove on or before the 9th day of February, 2001.

4. NON-SATISFACTION OF CONTINGENCIES:

In the event that satisfaction of the foregoing contingencies shall fail to occur on or before January 22, 2001, then this Agreement shall thereupon terminate at Purchaser's or Seller's option and become null and void and of no further force or effect, whereupon Seller shall cause the earnest money herewith deposited with the escrowee to be delivered by it to Purchaser.

5. 1031 EXCHANGE:

Purchaser desires to exchange other property of like kind and qualifying use within the meaning of Section 1031 of the Internal Revenue Code of 1986, as amended, and the regulations promulgated thereunder for fee title in the property which is the subject of this contract. Purchaser expressly reserves the right to assign their rights, but not their obligations hereunder, to a Qualified Intermediary as provided in IRC Reg. 1.1031(k)-1(g)(4) on or before the closing date.

6. MORTGAGE CONTINGENCY:

This Contract is contingent upon Purchaser obtaining an unconditional written mortgage commitment (except for matters of title and survey or matters totally within Purchaser's control) on or before January 22, 2001, on terms and conditions acceptable to Purchaser. If Purchaser, having applied for the loan specified above, is unable to obtain a loan commitment and serves written notice to Seller within the time specified, this Contract shall be null and void and earnest money refunded to Purchaser upon written direction of the Parties to Escrowee. If written notice is not served within the time specified, Purchaser shall for all purposes be deemed to have waived this contingency and this Contract shall remain in full force and effect. Should Purchaser receive a mortgage commitment conditioned upon sale and/or closing of existing property, said commitment shall satisfy the terms of this mortgage contingency.

7. SURVEY:

Seller shall provide Purchaser with a current ALTA survey of the subject property, at Seller's expense, within thirty (30) days from the date hereof, said survey to include extended coverage and conforming to ALTA standard and bearing the certification of such surveyor to Purchaser, Seller, and the title insurer described in Paragraph 9 below or other mutually accepted title company that same was prepared in accordance with Illinois land survey standards at its own cost.

8. CLOSING PAYMENT OF PURCHASE PRICE:

On or before February 9, 2001, Purchaser shall deposit with the escrowee a sum equal to the difference between the purchase price and all sums theretofore paid or credited to Purchaser pursuant to the terms of this Agreement, and Seller shall deposit with the escrowee its Special Warranty deed conveying the premises to Purchaser or its nominee. Both parties shall further make the deposits described hereinbelow in Paragraph 9B whereupon closing hereunder shall occur (hereinafter referred to as "Closing"). Purchaser shall have the right to one (1) thirty (30) day extension of the closing date upon written notice to Seller of Purchaser's failure to meet the Section 3C contingency.

9. ESCROW; CONVEYANCES:

Upon execution of this Agreement, the parties shall enter into a deed and purchase money escrow with First American Title Insurance Company. Said escrow shall contain, in addition to the standard provisions contained in said instrument, clauses incorporating the following:

A. First American Title Insurance Company shall forthwith cause a commitment for title insurance, Form B, covering premises to be prepared in the amount of the purchase price. Said commitments shall show good title in Seller, subject only to Schedule B exceptions numbered 1 (as to 2000 taxes), 2, 3, 4, 15 and 16 as depicted on First American Title Commitment No. DC001189 dated May 9, 2000 ("Permitted Exceptions"), a copy of which is attached hereto as Exhibit C; provided, that Seller shall cause any title exception relating to any mortgage lien to be removed on or before the date of closing. Said commitment shall contain endorsements as requested by Purchaser's lender (payable by Purchaser) and a tax parcel endorsement. Seller shall cause the title insurer to issue an extended coverage endorsement over such general title exceptions. If any such title commitment shall disclose defects, encumbrances, or exceptions other than Permitted Exceptions, Seller shall have thirty (30) days from the date of notice thereof to the escrowee to remove same. If Seller shall fail to remove same within the specified time, Purchaser may terminate this Agreement or may elect upon notice to Seller within ten (10) days after expiration of said thirty (30) day period, to take title as it then is, with the right to deduct from the purchase price liens or encumbrances of a definite or ascertainable amount, not to exceed the sum of Ten Thousand ($10,000.00) Dollars. Purchaser, however, reserves the right not to close if said liens are not removed or insured over. If Purchaser shall fail so to elect, this Agreement shall become null and void without further action of the parties. The expense of said title commitments and the cost of premium charges of the title insurer for insurance over said general title exception or

extended coverage endorsements shall be paid by Seller, however, any endorsements required by Purchaser or Purchaser's lender, shall be paid by Purchaser. Seller shall furnish the title insurer with all documents, affidavits, and undertakings which may be necessary in order to cause good title to be conveyed to Purchaser or its nominee in compliance with this Agreement and in order to cause the title insurer to issue its title commitment or owners guarantee policy.

B. 1. Seller shall deposit with the escrowee the following documents prior to closing:

a. Stamped Special Warranty Deed conveying the premises to the nominee designated in writing by Purchaser;

b. Transfer declarations;

c. ALTA statement;

d. FIRPTA statement;

e. IRPTA disclosure document, if applicable.

2. Purchaser shall deposit with the escrowee the following sum and documents prior to closing:

a. The sum described in Paragraph 6 above by cashier's or certified check or wire transfer, plus or minus applicable prorations;

b. ALTA statement.

3. The parties shall jointly deposit with the escrowee the following documents prior to closing:

a. Joint proration statement;

b. A copy of this Agreement.

10. DISBURSEMENTS:

Upon execution and delivery of a deed for the premises, Seller shall instruct the title insurer to later date its commitment for the title insurance to cover said deed in the amount of the purchase price; and, when the title insurer is prepared to issue

its owner title insurance policy to the grantee in said deed, subject to Permitted Exceptions, it shall disburse the funds held by it as follows:

A. Pay state and county revenue stamps attached to the deed, the cost of title insurance and policy, and one-half of the escrow fees.

B. Bill Purchaser one-half of the escrow fees.

C. Pay to Seller the balance of the purchase price per the joint proration statement.

D. Pay to Purchaser the balance remaining, if any.

11. SELLER'S ASSURANCES:

Seller warrants, represents and covenants the following during the pendency of this Agreement and at the time of closing:

A. That Seller has entered into no agreement with any governmental authority and have no knowledge of any actual or proposed ordinance, statute, or agreement which has imposed or may impose any charge, liability, or financial obligation upon the premises, and that Seller shall hereafter execute no such agreement without the express written approval of Purchaser.

B. That Seller is the owner of good and marketable title to the premises, subject to the Permitted Exceptions.

C. That no encroachment exists over any property line of premises, except as noted on Exhibit C.

D. That Seller has received no notice, direct or indirect, of any violation from any governmental authority or of any proposed condemnation of any portion of the premises of any special assessment thereon.

E. That Seller shall not move any dirt from or upon the premises during the pendency of this Agreement subject to Seller's obligations under Paragraph 12, and shall forebear from using any portion thereof as a borrow pit or dump area for construction debris, rubble, or other refuse.

F. Except as set forth in Paragraph 12, neither Seller nor, to the best knowledge of Seller, any other person has ever caused or permitted any hazardous, toxic, or dangerous waste, substance, or material (hereinafter referred to as "hazardous material") to be placed, held, located, or disposed

of on, under, or at the premises, and that no portion of the premises has ever been used (whether by Seller or, to the best knowledge of the Seller, by any other person) as a permanent or temporary dump site or storage site for any hazardous material except as disclosed by Sellers environmental reports.

12. ENVIRONMENTAL MATTERS:

Seller has provided Purchaser with copies of a Phase I Environmental Site Assessment of the Property performed by Environmental Management and Resource Consultants, Inc., under report dated May 9, 2000, and a Focused Site Investigation & Remedial Action Completion Report performed by Pioneer Environmental, Inc., under report dated November 8, 2000. Said reports identify the presence on a small portion of the Property of elevated levels of certain compounds. Seller previously caused the affected area of the Property to be excavated. The excavated material remain on site and Seller intends to dispose of same and replace the excavated material with clean fill.

In addition, Seller has applied for a "no further remediation" letter from the Illinois Environmental Protection Agency. Such NFR letter will reflect that no further environmental remediation is required at the site, and will require that any deed conveying interests in the Property reflect that no grantee may use the Property for other than commercial or industrial uses. Purchaser agrees that such a restriction contained in the Seller's deed shall be a "Permitted Exception" hereunder.

In the event that the issuance of the NFR requires the performance of additional clean up at the site, then Seller agrees promptly to undertake to have such additional work performed. If such additional work is not completed prior to the Closing, then the parties agree to close this transaction and Seller will deposit into escrow, with the title insurer as escrow agent, an amount equal to the earnest money hereunder for such purpose. Seller agrees to complete the additional work as soon as practicable and the cost of same shall be paid from the funds in escrow upon application by Seller. Upon completion of such work, and the issuance by the IEPA of its NFR, and remaining funds in escrow shall be released to Seller. The funds held in escrow shall be invested in an interest bearing account and any interest earned therein shall accrue to Seller's benefit.

From and after the Closing date or the date of the issuance of the NFR, whichever is later, Seller shall have no further responsibility to Purchaser, or to Purchaser's heirs, personal representatives, grantees, successors or assigns or to any other party including, without limitation, any party claiming by, through or under Purchaser, for the assessment, monitoring or remediation of any contamination on or at the Property and Purchaser agrees that from and after such date, Purchaser shall not bring any claim, or make any demand, in a court of law or otherwise for damages,

reimbursement, contribution, indemnification or otherwise relating to contamination on, at or migrating from the Property.

13. FIRPTA AFFIDAVIT:

That Seller shall, prior to closing, deliver to Purchaser in accordance with Section 1445 of the Internal Revenue Code and regulations promulgated thereunder, an affidavit by Seller stating under penalty of perjury, Seller United States taxpayer identification number and that Seller is not a foreign person as defined by Internal Revenue Code 1445(F)(3).

14. DEFAULT:

A. It is hereby stipulated and agreed that time is of the essence of this Agreement and each and every part thereof.

B. If Seller shall fail to perform any covenant, term, or condition of this Agreement or shall breach any warranty herein contained, and such failure or breach shall not be cured within thirty (30) days after delivery of written notice thereof to Seller from Escrowee or Purchaser, then all rights and remedies granted by law or in equity or under this Agreement shall be available to Purchaser, including causes of action for damages and specific performance.

C. If Purchaser shall fail to perform any covenant, term, or condition of this Agreement or shall breach any warranty herein contained, and such failure or breach shall not be cured within thirty (30) days after delivery of written notice thereof to Purchaser from Escrowee or Seller, then all rights and remedies granted by law or in equity under this Agreement shall be available to Seller, including causes of action for damages and specific performance.

15. SELLER'S COOPERATION:

A. Seller agrees that it or its authorized agent, trustee, or attorney shall, at any time after execution of this Agreement, execute such petitions, agreements, and other instruments as Purchaser may desire or request to complete more effectively the transfer to Purchaser of the premises acquired under this Agreement. Seller shall cooperate with Purchaser in executing all applications and documents relative to Purchaser's land plans, zoning, utilities, traffic facilities, and development of the premises which may be required by Purchaser for submission to private or governmental authorities; provided that Seller shall be required to incur no financial obligation thereby.

B. Purchaser shall pay all costs expended or incurred in connection with preparation and submission of any amendment or modification of the zoning classification or any engineering plan or document required in connection therewith, and Seller shall have no responsibility thereof.

16. PURCHASER'S ENTRY; FEASIBILITY:

From and after the execution of this Agreement, Purchaser, its employees, agents, and designated representatives shall have the right to enter upon the premises or any portion thereof for the purpose of making surveys, soil tests, borings, percolation, and other tests and engineering, environmental and architectural studies, at its sole cost; provided that Purchaser shall not suffer nor permit any mechanics lien to attached to or be against or upon the premises which shall or may be superior to the rights of the Seller and save it harmless from and against any claim, obligation, liability, or expense (including, without limitation, attorney's fees and court costs) which may be asserted by any person or party arising out of or in the course of performance of any work or act hereinabove permitted.

17. IMPROVEMENTS:

All improvements owned by Seller and presently installed on the premises and specifically set forth on Exhibit B shall be included in the purchase price and shall be conveyed to Purchaser at the time of closing.

18. REAL ESTATE TAXES; POSSESSION:

A. General real estate taxes for the premises shall be prorated to the date of recordation of deed thereto by the escrowee on the basis of 103% of the most recent ascertainable tax bill. Purchaser shall be solely responsible for any increased tax or tax assessments arising or accruing prior to the closing which are directly attributable to the Purchaser's zoning reclassification or zoning application.

B. Possession of the premises shall be delivered to Purchaser upon deposit into escrow of the purchase price therefore and recordation of deed thereto.

19. CONDEMNATION:

In the event that, prior to the date of closing, all or any portion of the premises or any rights or easements therein shall be taken by condemnation or right of eminent domain or like process, or shall be threatened therewith, and the same, in Purchaser's opinion, would have a materially adverse impact upon its proposed development of the premises, Purchaser shall, within thirty (30) days after having received notice thereof from Seller, elect in writing to either:

A. Continue this Agreement in full force and effect, notwithstanding such taking or threatened taking, in which case Purchaser shall continue to be required to purchase the premises. In such event, Seller shall deliver to Purchaser the summons and complaint initiating any condemnation proceedings forthwith after service thereof. Purchaser shall be entitled to appear and defend against same, and the total amount of any condemnation award made prior to closing shall be paid to Seller and applied as a credit to Purchaser at closing; or:

B. Delete that portion of the premises condemned or threatened to be condemned from this Agreement, with a proportionate reduction in the purchase price, in which event Purchaser and Seller shall jointly appear and defend against such condemnation proceedings; or:

C. Terminate this Agreement. Failure of Purchaser to make a written election as aforesaid shall constitute an election to terminate this Agreement.

20. BROKER'S COMMISSION:

Seller and Purchaser hereby acknowledge that EPIC Savage Realty Partners by David Friedland has acted as broker in the negotiation of this contract and that Seller shall be responsible for any broker's commission due and owing to said Broker.

21. NOTICES:

All notices required or desired to be furnished pursuant to or with respect to this Agreement shall be in writing and shall be personally served or sent by registered or certified mail, return receipt requested, postage prepaid, to the respective parties at the following addresses:

To Purchaser:
Ross Johnson
c/o Johnson Printers
1007 Burlington
Downers Grove, IL 60515

Copy to:
James F. Russ, Jr.
4915 Main Street
Downers Grove, IL 60515

To Seller:

The Morey Corp.
Attn: Dana Morey
100 Morey Drive
Woodridge, IL 60517

Copy to:

William Cotter
8182 South Cass
Darien, IL 60561

Any party may change its address for purposes of service by delivery of written notice to all other parties designated above. Any notice to all other parties designated above. Any notice mailed in the manner herein specified shall be deemed received on the second business day after mailing.

22. MISCELLANEOUS:

A. This Agreement shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors, and assigns.

B. All warranties and representations made hereunder shall survive the closing and delivery of deed and shall remain binding upon the parties for one (1) year.

C. This Agreement shall not be merged into any escrow agreement.

D. This Agreement may be executed in counterparts and all so executed shall constitute one and the same Agreement.

E. This Agreement embodies the entire Agreement between the parties with respect to the premises. No extension or amendment of this Agreement shall be made or claimed by any party or have any force or effect whatsoever unless same shall be set forth in writing and signed by the parties.

F. Wherever applicable, the gender of any words used in this Agreement shall be construed to include any other gender, and any words used in the singular form shall be construed as though they were used in the plural form.

G. Any party shall have the right, as its option, to waive any covenant, warranty, term or condition of this Agreement, which the other party is obligated to perform or fulfill; provided that any such waiver shall be in writing and delivered to the other party.

H. This Agreement shall be construed under the laws of the State of Illinois.

I. Time is of the essence of this Agreement.

J. Seller agrees to deliver this Agreement to buyer on the same date of Seller's execution of said Agreement.

IN WITNESS WHEREOF, the parties have executed and delivered this Agreement in duplicate on the day of year first above written.

RE: MONTGOMERY WARD - DOWNERS GROVE, IL
PARKING LOT LEASE RENT INCREASE

Dear Mr. Cunningham:

Your letter of January 19, 1996 was referred to me for handling. According to the terms of our Lease dated February 5, 1980 and the First Supplemental Agreement dated December 29, 1989, our rent shall be increased per section 5 during the option period 10/1/95 thru 9/30/2000. Our fixed rent during this further extended term shall be adjusted upward at the commencement of the extended term by the percentage change in the CPI since the commencement of the extended term, but in no event shall rent be increased by more than 75%.

Below you will find our calculation for this increase using the following indexes:

CPI-U (82 Series) $\frac{10/95 \quad 153.7}{10/90 \quad 133.5}$ = 15.13% Increase

Current monthly rent $2,141.67 x 15.13% = $2,465.70 mo.

I have adjusted our rent retroactively to 10/1/95 to the new monthly amount of $2,465.70. Our check in the amount of $1,620.15 representing the rent adjustment for period 10/1/95 thru 2/29/96 shall be forthcoming in about ten days. Please note your records.

Should you have any questions, feel free to contact me at #312/467-7798.

Sincerely,

Barbara Gianfrancesco

MOR 000232

MEMORANDUM

TO: DOUG CUNNINGHAM

FROM: BILL COTTER

REGARDING: MONTGOMERY WARDS PARKING LOT LEASE

DATE: FEBRUARY 8, 1996

I received the "First Supplemental Agreement" and, as we had discussed, it appears that five years ago TMC in fact agreed to maintain the tenant's rent at the prior rate through 1995. Since this is true, B. Gianfrancesco's analysis in her January 30, 1996 letter appears accurate. We had talked at an earlier time about the likelihood of the rent increase being 75% (the cap set out in the lease); we were not aware at that time of the 1990 supplemental agreement.

B. Gianfrancesco's computation of the increase in rent uses the CPI-U index, which is the consumer price index for all urban consumers, and is only one of several such indices maintained by the US Bureau of Labor Statistics. The CPI-U is a widely-used index, although there are others (for example, relating to specific geographic areas, such as the Chicagoland area, or relating to specific industries, such as manufacturing) that are also published. However, the various indices do tend to track very closely, and the use of one index over another for our purposes would result in only insignificant changes in the rent adjustment.

Finally, we talked about the January 11, 1995 letter from Chuck Jensen. While it is clear that he appeared to labor under the impression that the rent increase would be 75%, his letter is truly a simple offer to modify the terms of the existing lease, which offer was not accepted by TMC. In any contested dispute over the terms of the lease, I suspect that this letter would be disregarded in favor of simply construing the actual lease documents.

If you have any questions, please give me a call.

RE: Parking Lot Lease Renewal
Montgomery Ward Product Service Facility #2701
Downers Grove, IL

Dear Scott:

I am the regional property manager in the real estate department of Montgomery Ward responsible for renewal of the lease for the above captioned property.

We are presently in the first of two (2), five (5) year renewal options. The date for the renewal of our remaining 5 year option is on or before March 31, 1995, based on 180 days prior notice. The lease is scheduled to expire on September 30, 1995. If renewal occurs, the rent is scheduled to increase to 75% of present rent.

The purpose of this letter is to offer an alternative to the upcoming renewal terms and significant rent increase. This is necessary, as our Product Service department is presently going through some major strategic changes. The areas serviced by this particular facility may be affected.

In an effort to develop some flexibility until the Product Service strategy has been fully developed, it is necessary to maintain a presence in Downers Grove.

Therefore, I would like to propose the following:

	Current Terms	Lease Terms	Proposed Terms
Term:	4/1/90 - 9/30/95	(5 yrs.) 10/1/95 - 9/30/2005	(5 yrs.) 10/1/95 - 9/30/2005 (Montgomery Ward would have the right to terminate the lease after the 2nd year, upon 90 days prior notice.)
Rent:	$25,700/per year	$44,975/year	$35,338 per year

All other terms and conditions of the lease would remain the same.

Based on the modified terms above, the landlord is guaranteed a rent increase and Montgomery Ward has the flexibility it requires, while developing a long-term strategy.

After you have had a chance to review the aforementioned proposal to the lease renewal terms, please call me at (312) 467-6245 or send any correspondence to the address on the letterhead.

I will need time to prepare a proposal for management's review and approval, so any efforts on your part to expedite the handling of this matter would be most appreciated.

Regards,

Chuck Jensen

Re: Montgomery Ward Lease
Ellsworth Park Unit #5
Downers Grove, IL

Dear Mr. Kerr:

As you will recall, we represent the Downers Grove National Bank and Trust Company as trustee under Trust # 78-309 (The Morey Corporation) in regard to the proposed Lease for the above-captioned premises.

It is my understanding that Montgomery Ward and Company has not as yet signed the Lease and will not do so until the lease for the adjoining parcel has been fully executed.

As you are aware, the proposed Lease with my client provides for the completion of the improvements by June 1, 1980. Obviously, that date will not be realistic if there is any further delay in the execution of the Lease.

As you are further aware, the cost of construction increases almost daily. We will expect that the Lease will be executed in the near future or the terms will have to be renegotiated.

MAR 12 1980

Northcentral Regional Real Estate Dept.

Gentlemen:

We are pleased to submit for your consideration the following details concerning rental of parking facilities for your proposed service center in our area.

The area involved would consist of the approximately 48,667 square feet as discussed and would be made ready for your use in accordance with drawing submitted on your visit in the last week of August. Wards would supply on a no charge basis, the fuel tank, pump and associated hardware and fittings.

The lease period shall be for 10 years. The two 5 year options to extend will be acceptable subject to mutual agreement of the effect of ravaging inflation.

The Morey Corporation shall be held loss free of any maintenance costs during all periods and a certification of insurance shall be furnished by Montgomery Ward to hold The Morey Corporation free of any and all other claims against it.

The Realestate Tax for this portion of land was $1346.54 for 1978 and this amount shall be considered as the base figure included for the first three years of rental. The Morey Corporation shall continue to pay this tax. The rental shall be changed upward or downward for years 4 through 10 on a dollar for dollar adjustment basis of this base tax.

The rental shall be $28,200.00 per year, payable on a monthly basis.

We understand from our contractor, that should we have your order to proceed by the first of October, we can be ready for your January 1, 1980 use.

The precise language of our lease agreement shall, of course, be the product of both of our legal counsels.

We shall await your instructions.

Very truly yours,
THE MOREY CORPORATION

Dear James:

Thank you for your letter of January 4, 1980. Your client's lease is acceptable to us, and is being prepared for execution.

However, we are still negotiating some minor points of the lease for the adjoining premises, and that delay has caused us to put off execution of your client's lease until both can be executed at the same time. We are hopeful of doing this within the next seven to ten days.

I will advise further shortly.

Re: Improvements to Existing Gravel Parking Lot

Gentlemen:

For the sum of fifty-two thousand six hundred thirty-three and no/100 dollars ($52,633.00) we will provide all labor, material and equipment to make improvements to existing parking lot as discussed. Our proposal excludes the following items:

1) 10,000 gallon tank and gas pump to be furnished by others.
2) Electric required for pump and lighting is to terminate at junction box at exterior of existing building.
3) Fencing to have gate only at main entrance.
4) No cost for any required permits.

Respectively submitted,

Re: Improvements to Existing Gravel Storage Lot
Bid of September 11, 1979 Revised

Gentlemen:

For the sum of fifty-eight thousand two hundred sixty-four and no/100 dollars ($58,264.00) we will provide all labor, material and equipment to make improvements to existing storage lot as discussed. Our proposal is based on the following:

1) 10,000 gallon tank and gas pump to be furnished by others.
2) Electric required for pump and lighting is to terminate at junction box at exterior of existing building.
3) Fencing to have gate only at main entrance.
4) All costs based on September 1979 discussions with Village Engineering Department regarding permits.

Respectfully submitted,

Dear Ed:

Enclosed is the completed lease between The Morey Corporation and Montgomery Ward & Co. It's been a long time coming but we finally did it.

As I mentioned in our meeting on Wednesday, April 2, 1980, I've listed below the individuals at Wards who are directly involved with this project:

Mr. Warren Mathews
Real Estate Manager
140 South State
Chicago, Illinois
(312) 467-3261

Mr. Ray Olson
Engineering Department
140 South State
Chicago, Illinois
(312) 467-3197

Either one of these individuals should be able to give you an answer or direct you to the person in charge. If you have problems, please do not hesitate to call me.

Again, it's been a sincere pleasure working with you and best of luck with the lease.

Kindest regards,

KAPLAN, GOODE & CO.

Steven J. Goode

INVOICE

TO: Mr. Edward Cunningham
The Morey Corp.
2659 Wisconsin Avenue
Downers Grove, Illinois 60515

#269

For real estate brokerage services rendered in the leasing of the land site adjacent to 2659 Wisconsin Ave., Downers Grove, to Montgomery Ward & Co. for a period of 10 years commencing the first day of the first month following the month in which tenant takes possession.		
Yearly rental	$25,700.00	
Total rental (25,700 x 10 years)	$257,000.00	
$257,000 x 3% =	$7,710.00	$7,710 00
The lease contains two five year options. In the event said options are exercised, there shall be an additional commission equal to 3% of the rental reserved for in those option periods.

FIRST SUPPLEMENTAL AGREEMENT

The Morey Corp
RRM

THIS FIRST SUPPLEMENTAL AGREEMENT made this 29th day of December, 1989, ~~by and between DOWNERS GROVE NATIONAL BANK, a National Banking Association, as Trustee under Trust No. 78-308~~, hereinafter called Landlord, and MONTGOMERY WARD & CO., INCORPORATED, an Illinois corporation, with corporate offices at One Montgomery Ward Plaza, Chicago, Illinois 60671, hereinafter called Tenant.

W I T N E S S E T H:

WHEREAS, the parties hereto entered into a certain Lease Agreement dated February 5, 1980, hereafter called the Lease, covering certain premises located in the City of Downers Grove, County of DuPage, State of Illinois, commonly known as 2663 Wisconsin Avenue, now occupied by Tenant and more fully described in said Lease, and

WHEREAS, the parties are mutually desirous of supplementing said Lease;

NOW THEREFORE, for and in consideration of the mutual covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

(1) The term of said Lease is hereby extended from and including the first (1st) day of October, 1990 to and including the thirtieth (30th) day of September, 1995.

(2) Tenant shall continue to pay rent to Landlord for the leased premises during the extended term herein provided at the annual rate of TWENTY FIVE THOUSAND SEVEN HUNDRED AND NO/100 DOLLARS ($25,700.00), payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prorated.

(3) Payments to the Landlord may be made by checks or drafts payable to the order of The Morey Corporation, and mailed to such payee at 2659 Wisconsin Avenue, Downers Grove, Illinois 60515.

(4) Effective as of the complete execution and delivery of this First Supplemental Agreement, Section 4 of said Lease shall be and is hereby cancelled and deleted therefrom, it being understood and agreed, however, that the Tenant shall continue to have the option granted to it in Section 5 of said Lease to further extend the term for an additional period of five (5) years from the end of the extended term herein provided, in accordance with said Section 5.

(5) In consideration of One Dollar ($1.00) paid by the Tenant to the Landlord, the receipt and sufficiency of which is hereby acknowledged, Landlord hereby agrees that the Tenant shall have the option to execute this First Supplemental Agreement at any time within thirty (30) days after receipt of the same duly executed by Landlord.

RE: Parking lot lease, Montgomery Ward Service Facility 2701, Behind Walnut Avenue, Downers Grove, Illinois.

Dear Mr. Jensen:

As you are aware, Montgomery Ward has chosen to exercise the final five year option on the parking lot described above.

The lease terms provide for a 75% increase in rent effective on the October 1, 1995 renewal date.

We therefore request that you update your records and payment system to reflect a monthly rent of $3,747.91 as of October 1, 1995.

Please feel free to call the undersigned at (708) 964-2300 with any questions.

Very truly yours,

THE MOREY CORPORATION

Re: **Montgomery Ward Parking Lot Lease**

Dear Doug,

I am returning the documents which you had sent to me concerning the captioned lease. I have retained a copy of the actual lease, but have not kept copies of the other materials.

Montgomery Ward has suggested a five-year renewal of the lease at a lower rent that would otherwise be called for under the lease, coupled with the ability to terminate after two years. As I mentioned to you on the phone, our review of the lease does not indicate that there are any simple "outs" for the landlord, or any manner in which to deter the tenant for exercising its right to extend the lease. Your only true ability to terminate the lease is in the event of a tenant default, which you indicated has not occurred. To the contrary, Montgomery Ward has apparently been a very good tenant.

At this point, it appears your strategic options are somewhat limited: (1) you could reject the Montgomery Ward proposal and require strict adherence to the terms of the lease and hope that Montgomery Ward's plans are such that they would elect simply not to renew at all; (2) you could agree to the lower rent proposed by Montgomery Ward, but only on the condition that *both* landlord and tenant have the right to terminate the lease after two years (or some other period), (3) you could perhaps propose that the tenant waive its right to extend for five years in exchange for a one-year renewal - perhaps at the old rent. Opting for (1) above - the hardball approach - certainly *could* produce the best results for Morey, but clearly is a gamble; however, the tenor of Montgomery Ward's January 11 letter suggests that Montgomery Ward perceives *any* renewal of the lease to be a significant benefit to Morey.

Incidentally, as I mentioned to you, when I was speaking to Downers Grove National Bank the other day, I inquired into the status of the landlord-land trust (number 78-309). I was advised that the Bank's computer records reflected the trust was terminated in 1986. The Bank

could not at the time locate their files to determine to whom the property was conveyed. I suggested to you when we spoke that this seemed somewhat unusual since the trust would not have expired by its terms (typically 20 years) in 1986, and given the existence of the long term lease, there probably would have been no activity on the trust file. However, there may have been reasons why the trust was terminated at that time -- such as the repayment of any mortgages or other loans for which the property served as collateral. In any case, I wanted you to be alerted to this fact so that any extension documentation with Montgomery Ward would reflect the proper parties.

In any case, if you need assistance in documenting any agreement that you reach with Montgomery Ward, or if you have any questions, please let me know.

Sincerely,

William J. Cotter

Bill:

Per our previous conversation on the leased property adjacent to our I sent the following letter requesting the rate increase.

The response they sent indicated that they believe the rate increase to be 15.13%, not 75%.

Please review their correspondence and our lease and advise as to the proper interpretation.

Thanks

Doug Cunningham

Re: Montgomery Ward Lease
Ellsworth Park Unit #5
Downers Grove, IL

Dear Mr. Kerr:

In accordance with our recent telephone conversations, I am enclosing a photostatic copy of Lease previously tendered to me with the following changes and/or deletions:

(1) Leases dated December 1, 1979.

(2) The rent can be adjusted upward, but not downward, during any extention terms.

(3) That all maintenance of the demised premises are the obligation of the tenant.

(4) That Landlord has no obligation whatsoever in regard to insurance.

(5) That cost of leasehold title policy and recording of

Lease Agreement shall be bourn by Tenant.

I believe that these changes correctly reflects the intention of the parties but will await your comments before I incorporate them into the master copies of the Lease.

Very truly yours,

BAUER & HOTTE, P. C.

This Lease, dated ~~December 1, 1979~~ November 1, 1979

between Downers Grove National Bank and Trust, as Trustee under Trust No. 78-309

herein called the "Landlord," and MONTGOMERY WARD & CO., INCORPORATED, an Illinois corporation, with ~~General~~ Offices at ~~619 West Chicago Avenue~~, Chicago, Illinois, herein called the "Tenant,"

Regional 140 South State Street,

WITNESSETH:

1. The Landlord leases to the Tenant for a term commencing on * , and continuing to and including ** , the premises located in the City of Downers Grove , County of Dupage , and State of Illinois , described as follows:

See Exhibit "A", which is attached hereto and made a part hereof.

including all improvements now or hereafter thereon and all appurtenances thereto. Said premises are commonly known as 2663 Wisconsin Avenue.

2. The Tenant shall pay rent to the Landlord at the annual rate of Twenty Five Thousand Seven Hundred and No/100 Dollars ($ 25,700.00) payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prorated. Anything contained herein to the contrary notwithstanding, the Tenant's obligation to pay rent hereunder shall not commence until actual and exclusive possession of the leased premises has been delivered to the Tenant and all repairs, alterations and improvements necessary to fit the premises for occupancy and use by the Tenant shall have been completed, all as contemplated by Paragraphs 19 & 20 hereinbelow.

3. All payments to the Landlord may be made by checks or drafts payable to the order of The Money Corporation and mailed to such payee at 2659 Wisconsin Avenue, Downers Grove, Illinois 60515

4. The Tenant may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term, extend the term ~~to and including~~ an additional Five (5) years , upon the same terms and conditions as herein set forth, except that rent shall be adjusted upward ~~commencement~~ at the commencement of the extended term by the percentage in the CPI since the commencement of the term, but in no event shall the rent be increased by more than 75%.

* the date Tenant takes possessi of the demised Premises provid Landlord has completed the wor described in Paragraph #19 her und

** Ten (10) years after the first day of the first month followi the month in which Tenant take possession.

MOR 000265

5. If the Tenant has exercised the foregoing option to extend the term, it may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term as extended, further extend the term ~~to and including~~ for an additional Five years upon the same terms and conditions as herein set forth, except that rent during the further extended term shall be adjusted upward ~~or downward~~ at the commencement of the further extended term by the percentage change in the CPI since the commencement of the extende term, but in no event shall rent be increased by more than 75%.

~~graphed to the Landlord ( ) or more days before the effective date of the~~ cancellation, may cancel this lease as of

All rent and other charges paid in advance for any period after the effective date of such cancellation ~~shall be refunded to the Tenant.~~

7. The Landlord will not interrupt or disturb any entrances, exits, or approaches, or deprive the premises of any light or air now enjoyed by the premises.

8. The Landlord covenants and agrees to maintain the Tenant's quiet possession and enjoyment of the entire leased premises during the term hereof ~~and further covenants and agrees that the leased premises and all appurtenances thereto and fixtures thereon, except those installed by the Tenant, shall be kept and maintained by the Landlord in safe and tenantable condition, good order and repair and in conformity with all valid laws, ordinances, rules and regulations of duly constituted authorities applicable thereto whether now or hereafter applicable for any reason whatsoever.~~ The Landlord shall hold harm[illegible] the Tenant of and from any and all loss, damage and claims for damage to person or property [illegible]ng from his failure to comply with this agreement.

9. The Tenant, at its own expense, may from time to time install on the premises any equipment fixtures and improvements and remove them and may make any alterations or additions in a good and workmanlike manner in and to the premises and may erect or remove any signs on the premises which it may deem necessary or suitable for the conduct of its business. (Except Advertising Signs)

10. Notwithstanding any other provision of this lease, the Tenant shall not be liable for any loss or damage to the premises caused by fire or the elements, whether or not such loss or damage shall result from the Tenant's negligence. ~~At all times after the execution hereof, the Landlord shall carry fire and extended coverage insurance on the improvements on the premises in such companies and in such amounts and with such endorsements as shall be satisfactory to the Tenant. Certificates of insurance or certified copies of all insurance policies shall be deposited with the Tenant.~~

11. If any default of either party continues uncorrected for sixty (60) days (thirty (30) days in the case of a default in the payment of rent) after receipt of written notice from the other party, stating with particularity the nature and extent of the default, the party giving such notice may cancel this lease by written notice of cancellation. ~~The Tenant may, at any time after any default of the Landlord, correct such default. In the event the Tenant corrects such default, the Tenant may deduct an amount equal to the costs and expenses of such correction from rent payable under this lease. Pending final determination of the validity and amount of any claim of the Tenant under any provision of this lease, the Tenant may, without penalty or default, withhold from rent the amount claimed by it.~~ No remedy provided in this lease shall be exclusive, but each shall be cumulative with all other remedies provided in this lease and at law or in equity.

12. The Tenant may sublet the premises or assign this lease; provided, however, that the Tenant shall not be relieved from its obligations under the lease by such subletting or assignment without the Landlord's consent.

13. The Tenant may holdover at the end of the term, without extending the term or renewing the lease, pr[illegible]d the Landlord, at least thirty (30) days prior to the expiration of the term, has not given writt[illegible]ce to the Tenant to vacate the premises at the expiration of the term. If the Tenant does so hol[illegible].. the tenancy thereafter shall continue upon the terms and conditions of this lease in effect during the last month of the term until terminated by either party by notice mailed to the other party at least thirty (30) days before the effective date of such termination.

14. The Tenant, on the last day of the term, or on the last day of any holdover, will surrender the premises in as good condition as when the Tenant takes possession, except for ordinary wear and tear, repairs and replacements required to be made by the Landlord, loss by fire or casualty, loss by any cause beyond the Tenant's control, and alterations, additions, and improvements herein permitted.

MOR 000266

15. Tenant shall pay for all gas and electricity used by it on the demised premises.

16. (a) The Landlord shall pay when due all taxes and assessments of every kind and nature which have been or which shall during the term of this lease be levied, assessed or otherwise imposed upon the leased premises, including all improvements now or hereafter thereon, but nothing contained in this Section 16 shall be deemed to obligate the Landlord to pay any taxes levied or assessed against the personal property of the Tenant located in the leased premises or any taxes commonly known as "chain store taxes" imposed on the Tenant by reason of the fact that the Tenant operatesmore than one place of business in the jurisdiction imposing such tax, which personal property taxes and chain store shall be paid the Tenant.

(b) The Tenant, upon receipt of satisfactory evidence of the amount of such excess, shall reimburse the Landlord the amount by which the general real estate taxes levied and assessed against the leased premises for each subsequent tax fiscal year during the term of this lease exceed the general real estate taxes levied and assessed against the leased premises for the third tax fiscal year following Tenant's occupancy; provided, however, that the Tenant shall be obligated to pay only its pro rata share of such excess taxes for the tax fiscal year during which its obligation to pay rent under this lease ceases, said pro rata share to be based upon the number of days of the then current tax fiscal year for which the Tenant has been obligated to pay rent under this lease.

(c) Prior to the payment thereof, the Landlord shall submit to the Tenant copies of all general real estate tax bills, a portion of which the Tenant may be obligated to pay to the Landlord under this Section 18, together with a statement showing the computation of the amount owed by the Tenant to the Landlord hereunder, supported by such evidence as the Tenant may reasonably require, whereupon the Tenant (unless it shall contest such taxes as hereinafter provided) shall pay to the Landlord within thirty (30) days after receipt of such bills, statement and other evidence, that portion of such general real estate taxes required to be paid by the Tenant hereunder.

(d) In the event the Tenant shall desire to contest the validity or amount of any tax, a portion of which it may be required to pay to the Landlord hereunder, the Tenant, within thirty (30) days after being notified of the amount thereof, shall notify the Landlord of its intention to do so, whereupon the Landlord shall defer payment of any such tax so long as the validity or amount thereof shall be contested by the Tenant in good faith and by proper proceedings, except that the Landlord may make such payments under protest or take such other steps with regard to said tax as will not prejudice the Tenant's opportunity to successfully contest the validity or amount thereof. The Landlord agrees to render to the Tenant all assistance reasonably possible, without expense to the Landlord, in contesting the validity or amount of any such tax, including joining in and signing any protest or pleading which the Tenant may deem it advisable to file. Should any rebate be made on account of any tax a portion of which has been paid by the Tenant to the Landlord hereunder shall belong to and be paid to the Tenant.

17. Tenant shall maintain the parking lot areas, fence, and paved areas in good condition and repair, and shall also, as necessary, maintain, repair, and replace the gas pump and lighting facilities on the demised premises.

18. Tenant shall carry General Liability insurance, or at its option be self-insured, with limits of not less than Two Hundred and Fifty Thousand Dollars ($250,000.00).

~~Public Liability. The landlord shall carry policies of insurance against public liability with limits of at least Two Hundred Fifty Thousand Dollars/Two Hundred Fifty Thousand Dollars ($250,000/$250,000) and against property damages with a limit of at least Two Hundred Fifty Thousand Dollars ($250,000), which insurance shall be in effect at all times during the construction of Landlord's Improvements~~

~~All insurances policies required hereunder shall include Tenant as a name insured or provide for direct contractual liability of the insurance carrier to Tenant and shall be carried by responsible, solvent carriers authorized to do business in the state in which the Premises is located.~~

MOR 000267

The following endorsements shall be placed on all insurance policies carried by the Landlord pursuant to this Section 8.

(a) "Before changing of cancelling this policy, the Insurance Company agrees to give five (5) days prior written notice to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois 60603, attention of the Regional Real Estate Department."

(b) "Notice is received and accepted by the Insurance Company that the insured has waived the right of recovery from Montgomery Ward & Co., Incorporated."

Certificates of insurance or certified copies of all insurance policies required under this section bearing the required endorsements shall be deposited, upon request with the Tenant on or before commencement of the term of this lease.

19. Within Thirty (30) days after final execution of this Lease, Landlord shall commence, and thereafter diligently prosecute to completion, the following Landlord's work, as also more fully described an Exhibit "B", which is attached hereto and made a part hereof:

(a) Grade, compact, and gravel the parking areas so as to be suitable for Tenant's intended use.

(b) Install a six (6) foot chainlink fence (with barbed wire and sliding gate) around the perimeter of the demised area.

(c) Excavate for, position, and install a certain Eight Thousand (8000) gallon gasoline tank, and pump, located as shown on Exhibit "B", tank and pump to be supplied by Tenant promptly after last execution of this Lease.

(d) Provide electric service to the gas pump.

(e) Install and erect a lighting pylon, and attach lighting fixtures thereto, as shown on Exhibit "A".

(f) Lay concretepaving in and about the area of the gasoline pump as required.

(g) Pave a hard surface, all weather, access drive from the pump area to the adjoining parcel also leased by Tenant.

All work required to be performed by the Landlord hereunder shall be performed in a good and workmanlike manner. The Premises shall be left at the completion of such work in a safe, clean and tenantable condition and in good order and repair. Landlord shall perform all work provided for hereunder in conformity with all applicable construction and building codes and with every applicable requirement of law or duly constituted authority of law, or any Board of Underwriters, Rating Bureau or similar organization having jurisdiction, of carriers of insurance on the leased Premises.

20. Tenant shall take possession of the Leased premises within a reasonable time, not to exceed Thirty (30) days, after Landlord notifies Tenant that all Landlord's work pursuant to Paragraph #19 has been completed and that Tenant may have exclusive possession of the Premises. In the event the Landlord has not completed all work on or before June 1, 1980 , Tenant may cancel this Lease by sending written notice to Landlord, whereupon this Lease shall be terminated and of no further force and event.

21.1 Within thirty (30) days from the date of last execution of this Lease, Landlord shall ~~pay for,~~ provide and deliver to Tenant (at the office of Tenant) a leasehold title insurance policy of a title company acceptable to Tenant in the amount of ONE HUNDRED THOUSAND and No/100 ($100,000.00) DOLLARS covering the date hereof, or if Tenant so elects, its preliminary report on title or title binder in said amount of $100,000.00 showing title in Landlord, subject only to matters to which this Lease is subject. All such title costs and premiums to be paid by ~~landlord~~ TENANT

If the report on title, title binder, or leasehold title insurance policy, so required, discloses any defects in title (other than such usual objections contained in Leasehold policies and matters to which this Lease is subject) Landlord shall, upon tendering the same to Tenant within thirty (30) days from the date of last execution of this Lease, have sixty (70) days, from the date which such title report, binder, or leasehold title insurance policy bears, to cure such defects and to furnish such title report, binder, or leasehold policy showing such defects cured or removed. If such defects in title are not so cured within sixty (60) days, Tenant may, at its option, terminate this Lease. In the event this Lease is so terminated all papers, documents and instruments shall be returned to the respective

MOR 000268

21.2 Tenant may, at its option, record this Lease and the cost of all documentary stamps, or conveyancing, transfer tax and recording fees shall be paid ~~equally by the parties hereto~~. BY TENANT

21. Broker's Commissions - If there are any Broker's fees or commissions payable in connection with the bringing about of the execution and delivery of this lease, the Landlord agrees that Landlord will pay same, that the Tenant shall not be liable for such fees and commissions and that the Landlord will indemnify and save the Tenant harmless from any and all claims for such fees and commissions.

22. Landlord and Tenant acknowledge that Tenant is negotiating a Lease of substiantially like terms and conditions for Premises adjoining the Landlord's Premises, and that Tenant's use of the demised premises is not feasible without the use of said adjoining Premises. Notwithstanding anything in this Lease to the contrary, Tenant's rental obligation hereunder shall not commence until Tenant has taken possession of the adjoining Premises. When the commencement date of both leases has become fixed, Landlord and Tenant agree to execute a Lease Supplement fixing the commencement date and the termination date of the Lease.

If, due to fire, the elements, or the exercise of the right of eminent domain or other authority of law, or any other cause, the premises shall become untenantable, dangerous or unfit for the Tenant's use, rent payable under this lease shall abate during the continuance of that condition. If the conditions which give rise to an abatement of rent under this section continue for a period of ninety (90) days, then the Tenant may, at any time within sixty (60) days after such ninety (90) day period, cancel this lease and terminate its tenancy by giving the Landlord written notice of its intention to do so.

All notices, approvals, or requests in connection with this lease shall be sent by registered mail or telegram. Notices to the Landlord may be addressed to the Landlord at the address set forth in Section 3 above. Notices to the Tenant shall be addressed to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois, attention: Regional law Department.

Employees or agents of the Tenant have no authority to make or agree to make a lease. This instrument shall not be binding upon the Tenant until it has been executed on behald of the Tenant by one of its corporate officers. No act or omission of any employee of the Tenant shall alter, change, or modify any of the provisions of this lease. Any alterations, changes, and modifications of this lease shall be effective only when made in writing and executed on behalf of the Tenant by one of its corporate officers.

All the grantors of the term shall be bound jointly and severally by this lease. This lease shall inure to the benefit of and be binding upon, the respective heirs, legal representatives, successors and assigns of the Landlord and the Tenant.

IN WITNESS WHEREOF, this lease has been duly executed under seal as of the first hereinabove written.

Re: Montgomery Ward Lease
Ellsworth Park Unit #5
Downers Grove, IL

Dear Mr. Kerr:

In accordance with our recent telephone conversations, I am enclosing a photostatic copy of Lease previously tendered to me with the following changes and/or deletions:

(1) Leases dated December 1, 1979.

(2) The rent can be adjusted upward, but not downward, during any extention terms.

(3) That all maintenance of the demised premises are the obligation of the tenant.

(4) That Landlord has no obligation whatsoever in regard to insurance.

(5) That cost of leasehold title policy and recording of

Lease Agreement shall be bourn by Tenant.

I believe that these changes correctly reflects the intention of the parties but will await your comments before I incorporate them into the master copies of the Lease.

Very truly yours,

BAUER & HOTTE, P. C.

CC: The Morey Corporation - Attn: Mr. Edward J. Cunningham

This Lease, dated ~~December 1, 1979~~ November 1, 1979

between Downers Grove National Bank and Trust, as Trustee under Trust No. 78-309

herein called the "Landlord," and MONTGOMERY WARD & CO., INCORPORATED, an Illinois corporation, with ~~General~~ Offices at ~~619 West Chicago Avenue~~, Chicago, Illinois, herein called the "Tenant," Regional 140 South State Street,

WITNESSETH:

1. The Landlord leases to the Tenant for a term commencing on * , and continuing to and including ** , the premises located in the City of Downers Grove , County of Dupage , and State of Illinois , described as follows:

See Exhibit "A", which is attached hereto and made a part hereof.

including all improvements now or hereafter thereon and all appurtenances thereto. Said premises are commonly known as 2663 Wisconsin Avenue.

2. The Tenant shall pay rent to the Landlord at the annual rate of Twenty Five Thousand Seven Hundred and No/100 Dollars ($ 25,700.00) payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prorated. Anything contained herein to the contrary notwithstanding, the Tenant's obligation to pay rent hereunder shall not commence until actual and exclusive possession of the leased premises has been delivered to the Tenant and all repairs, alterations and improvements necessary to fit the premises for occupancy and use by the Tenant shall have been completed, all as contemplated by Paragraphs 19 & 20 hereinbelow.

3. All payments to the Landlord may be made by checks or drafts payable to the order of The Mooey Corporation and mailed to such payee at 2659 Wisconsin Avenue, Downers Grove, Illinois 60515

4. The Tenant may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term, extend the term ~~to and including~~ an additional Five (5) years , upon the same terms and conditions as herein set forth, except that rent shall be adjusted upward ~~or downward~~ at the commencement of the extended term by the percentage in the CPI since the commencement of the term, but in no event shall the rent be increased by more than 75%.

* the date Tenant takes possessi of the demised Premises provid Landlord has completed the wor described in Paragraph #19 her und

** Ten (10) years after the first day of the first month followi the month in which Tenant take possession.

MOR 000265

5. If the Tenant has exercised the foregoing option to extend the term, it may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term as extended, further extend the term ~~to and including~~ for an additional Five years upon the same terms and conditions as herein set forth, except that rent during the further extended term shall be adjusted upward ~~as follows:~~ at the commencement of the further extended term by the percentage change in the CPI since the commencement of the extende term, but in no event shall rent be increased by more than 75%.

~~graphed to the Landlord ( ) or more days before the effective date of the~~ cancellation, may cancel this lease as of

~~All rent and other charges paid in advance for any period after the effective date of such cancellation shall be refunded to the Tenant.~~

7. The Landlord will not interrupt or disturb any entrances, exits, or approaches, or deprive the premises of any light or air now enjoyed by the premises.

8. The Landlord covenants and agrees to maintain the Tenant's quiet possession and enjoyment of the entire leased premises during the term hereof ~~and further covenants and agrees that the leased premises and all appurtenances thereto and fixtures thereon, except those installed by the Tenant, shall be kept and maintained by the Landlord in safe and tenantable condition, good order and repair and in conformity with all valid laws, ordinances, rules and regulations of duly constituted authorities applicable thereto whether now or hereafter applicable for any reason whatsoever.~~ The Landlord shall hold harm[illegible]he Tenant of and from any and all loss, damage and claims for damage to person or property [illegible]ng from his failure to comply with this agreement.

9. The Tenant, at its own expense, may from time to time install on the premises any equipment fixtures and improvements and remove them and may make any alterations or additions in a good and workmanlike manner in and to the premises and may erect or remove any signs on the premises which it may deem necessary or suitable for the conduct of its business. (EXCEPT ADVERTISING SIGNS)

10. Notwithstanding any other provision of this lease, the Tenant shall not be liable for any loss or damage to the premises caused by fire or the elements, whether or not such loss or damage shall result from the Tenant's negligence. ~~At all times after the execution hereof, the Landlord shall carry fire and extended coverage insurance on the improvements on the premises in such companies and in such amounts and with such endorsements, as shall be satisfactory to the Tenant. Certificates of insurance or certified copies of all insurance policies shall be deposited with the Tenant.~~

11. If any default of either party continues uncorrected for sixty (60) days (thirty (30) days in the case of a default in the payment of rent) after receipt of written notice from the other party, stating with particularity the nature and extent of the default, the party giving such notice may cancel this lease by written notice of cancellation. ~~The Tenant may, at any time after any default of the Landlord, correct such default. In the event the Tenant corrects such default, the Tenant may deduct an amount equal to the costs and expenses of such correction from rent payable under this lease. Pending final determination of the validity and amount of any claim of the Tenant under any provisions of this lease, the Tenant may, without penalty or default, withhold from rent the amount claimed by it.~~ No remedy provided in this lease shall be exclusive, but each shall be cumulative with all other remedies provided in this lease and at law or in equity.

12. The Tenant may sublet the premises or assign this lease; provided, however, that the Tenant shall not be relieved from its obligations under the lease by such subletting or assignment without the Landlord's consent.

13. The Tenant may holdover at the end of the term, without extending the term or renewing the lease, pro[illegible]d the Landlord, at least thirty (30) days prior to the expiration of the term, has not given writt[illegible]ce to the Tenant to vacate the premises at the expiration of the term. If the Tenant does so hol[illegible]... the tenancy thereafter shall continue upon the terms and conditions of this lease in effect during the last month of the term until terminated by either party by notice mailed to the other party at least thirty (30) days before the effective date of such termination.

14. The Tenant, on the last day of the term, or on the last day of any holdover, will surrender the premises in as good condition as when the Tenant takes possession, except for ordinary wear and tear, repairs and replacements required to be made by the Landlord, loss by fire or casualty, loss by any cause beyond the Tenant's control, and alterations, additions, and improvements herein permitted.

15. Tenant shall pay for all gas and electricity used by it on the demised premises.

16. (a) The Landlord shall pay when due all taxes and assessments of every kind and nature which have been or which shall during the term of this lease be levied, assessed or otherwise imposed upon the leased premises, including all improvements now or hereafter thereon, but nothing contained in this Section 16 shall be deemed to obligate the Landlord to pay any taxes levied or assessed against the personal property of the Tenant located in the leased premises or any taxes commonly known as "chain store taxes" imposed on the Tenant by reason of the fact that the Tenant operatesmore than one place of business in the jurisdiction imposing such tax, which personal property taxes and chain store shall be paid the Tenant.

(b) The Tenant, upon receipt of satisfactory evidence of the amount of such excess, shall reimburse the Landlord the amount by which the general real estate taxes levied and assessed against the leased premises for each subsequent tax fiscal year during the term of this lease exceed the general real estate taxes levied and assessed against the leased premises for the third tax fiscal year following Tenant's occupancy; provided, however, that the Tenant shall be obligated to pay only its pro rata share of such excess taxes for the tax fiscal year during which its obligation to pay rent under this lease ceases, said pro rata share to be based upon the number of days of the then current tax fiscal year for which the Tenant has been obligated to pay rent under this lease.

(c) Prior to the payment thereof, the Landlord shall submit to the Tenant copies of all general real estate tax bills, a portion of which the Tenant may be obligated to pay to the Landlord under this Section 18, together with a statement showing the computation of the amount owed by the Tenant to the Landlord hereunder, supported by such evidence as the Tenant may reasonably require, whereupon the Tenant (unless it shall contest such taxes as hereinafter provided) shall pay to the Landlord within thirty (30) days after receipt of such bills, statement and other evidence, that portion of such general real estate taxes required to be paid by the Tenant hereunder.

(d) In the event the Tenant shall desire to contest the validity or amount of any tax, a portion of which it may be required to pay to the Landlord hereunder, the Tenant, within thirty (30) days after being notified of the amount thereof, shall notify the Landlord of its intention to do so, whereupon the Landlord shall defer payment of any such tax so long as the validity or amount thereof shall be contested by the Tenant in good faith and by proper proceedings, except that the Landlord may make such payments under protest or take such other steps with regard to said tax as will not prejudice the Tenant's opportunity to successfully contest the validity or amount thereof. The Landlord agrees to render to the Tenant all assistance reasonably possible, without expense to the Landlord, in contesting the validity or amount of any such tax, including joining in and signing any protest or pleading which the Tenant may deem it advisable to file. Should any rebate be made on account of any tax a portion of which has been paid by the Tenant to the Landlord hereunder shall belong to and be paid to the Tenant.

17. Tenant shall maintain the parking lot areas, fence, and paved areas in good condition and repair, and shall also, as necessary, maintain, repair, and replace the gas pump and lighting facilities on the demised premises.

18. Tenant shall carry General Liability insurance, or at its option be self-insured, with limits of not less than Two Hundred and Fifty Thousand Dollars ($250,000.00).

~~Public Liability. The landlord shall carry policies of insurance against public liability with limits of at least Two Hundred Fifty Thousand Dollars/Two Hundred Fifty Thousand Dollars ($250,000/$250,000) and against property damages with a limit of at least Two Hundred Fifty Thousand Dollars ($250,000), which insurance shall be in effect at all times during the construction of Landlord's Improvements.~~

~~All insurances policies required hereunder shall include Tenant as a name insured or provide for direct contractual liability of the insurance carrier to Tenant and shall be carried by responsible, solvent carriers authorized to do business in the state in which the Premises is located.~~

MOR 000267

The following endorsements shall be placed on all insurance policies carried by the Landlord pursuant to this Section 8.

(a) "Before changing of cancelling this policy, the Insurance Company agrees to give five (5) days prior written notice to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois 60603, attention of the Regional Real Estate Department."

(b) "Notice is received and accepted by the Insurance Company that the insured has waived the right of recovery from Montgomery Ward & Co., Incorporated."

Certificates of insurance or certified copies of all insurance policies required under this section bearing the required endorsements shall be deposited, upon request with the Tenant on or before commencement of the term of this lease.

19. Within Thirty (30) days after final execution of this Lease, Landlord shall commence, and thereafter diligently prosecute to completion, the following Landlord's work, as also more fully described an Exhibit "B", which is attached hereto and made a part hereof:

(a) Grade, compact, and gravel the parking areas so as to be suitable for Tenant's intended use.

(b) Install a six (6) foot chainlink fence (with barbed wire and sliding gate) around the perimeter of the demised area.

(c) Excavate for, position, and install a certain Eight Thousand (8000) gallon gasoline tank, and pump, located as shown on Exhibit "B", tank and pump to be supplied by Tenant promptly after last execution of this Lease.

(d) Provide electric service to the gas pump.

(e) Install and erect a lighting pylon, and attach lighting fixtures thereto, as shown on Exhibit "A".

(f) Lay concretepaving in and about the area of the gasoline pump as required.

(g) Pave a hard surface, all weather, access drive from the pump area to the adjoining parcel also leased by Tenant.

All work required to be performed by the Landlord hereunder shall be performed in a good and workmanlike manner. The Premises shall be left at the completion of such work in a safe, clean and tenantable condition and in good order and repair. Landlord shall perform all work provided for hereunder in conformity with all applicable construction and building codes and with every applicable requirement of law or duly constituted authority of law, or any Board of Underwriters, Rating Bureau or similar organization having jurisdiction, of carriers of insurance on the leased Premises.

20. Tenant shall take possession of the Leased premises within a reasonable time, not to exceed Thirty (30) days, after Landlord notifies Tenant that all Landlord's work pursuant to Paragraph #19 has been completed and that Tenant may have exclusive possession of the Premises. In the event the Landlord has not completed all work on or before June 1, 1980 , Tenant may cancel this Lease by sending written notice to Landlord, whereupon this Lease shall be terminated and of no further force and event.

21.1 Within thirty (30) days from the date of last execution of this Lease, Landlord shall ~~pay for,~~ provide and deliver to Tenant (at the office of Tenant) a leasehold title insurance policy of a title company acceptable to Tenant in the amount of ONE HUNDRED THOUSAND and No/100 ($100,000.00) DOLLARS covering the date hereof, or if Tenant so elects, its preliminary report on title or title binder in said amount of $100,000.00 showing title in Landlord, subject only to matters to which this Lease is subject. All such title costs and premiums to be paid by ~~Landlord~~ TENANT

If the report on title, title binder, or leasehold title insurance policy, so required, discloses any defects in title (other than such usual objections contained in Leasehold policies and matters to which this Lease is subject) Landlord shall, upon tendering the same to Tenant within thirty (30) days from the date of last execution of this Lease, have sixty (70) days, from the date which such title report, binder, or leasehold title insurance policy bears, to cure such defects and to furnish such title report, binder, or leasehold policy showing such defects cured or removed. If such defects in title are not so cured within sixty (60) days, Tenant may, at its option, terminate this Lease. In the event this Lease is so terminated all money, deposits and instruments shall be returned to the respective

MOR 000268

21.2 Tenant may, at its option, record this Lease and the cost of all documentary stamps, or conveyancing, transfer tax and recording fees shall be paid ~~equally by the parties hereto~~. BY TENANT

21. Broker's Commissions - If there are any Broker's fees or commissions payable in connection with the bringing about of the execution and delivery of this lease, the Landlord agrees that Landlord will pay same, that the Tenant shall not be liable for such fees and commissions and that the Landlord will indemnify and save the Tenant harmless from any and all claims for such fees and commissions.

22. Landlord and Tenant acknowledge that Tenant is negotiating a Lease of substiantially like terms and conditions for Premises adjoining the Landlord's Premises, and that Tenant's use of the demised premises is not feasible without the use of said adjoining Premises. Notwithstanding anything in this Lease to the contrary, Tenant's rental obligation hereunder shall not commence until Tenant has taken possession of the adjoining Premises. When the commencement date of both leases has become fixed, Landlord and Tenant agree to execute a Lease Supplement fixing the commencement date and the termination date of the Lease.

If, due to fire, the elements, or the exercise of the right of eminent domain or other authority of law, or any other cause, the premises shall become untenantable, dangerous or unfit for the Tenant's use, rent payable under this lease shall abate during the continuance of that condition. If the conditions which give rise to an abatement of rent under this section continue for a period of ninety (90) days, then the Tenant may, at any time within sixty (60) days after such ninety (90) day period, cancel this lease and terminate its tenancy by giving the Landlord written notice of its intention to do so.

All notices, approvals, or requests in connection with this lease shall be sent by registered mail or telegram. Notices to the Landlord may be addressed to the Landlord at the address set forth in Section 3 above. Notices to the Tenant shall be addressed to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois, attention: Regional law Department.

Employees or agents of the Tenant have no authority to make or agree to make a lease. This instrument shall not be binding upon the Tenant until it has been executed on behald of the Tenant by one of its corporate officers. No act or omission of any employee of the Tenant shall alter, change, or modify any of the provisions of this lease. Any alterations, changes, and modifications of this lease shall be effective only when made in writing and executed on behalf of the Tenant by one of its corporate officers.

All the grantors of the term shall be bound jointly and severally by this lease. This lease shall inure to the benefit of and be binding upon, the respective heirs, legal representatives, successors and assigns of the Landlord and the Tenant.

IN WITNESS WHEREOF, this lease has been duly executed under seal as of the first hereinabove written.

Re: Parking lot for
Montgomery Ward

Dear Mr. Cunningham:

Enclosed please find a letter of interest from Montgomery Ward regarding your land immediately behind the building at 5355 Walnut Street, Downers Grove. I have shown them your property on March 7th and 16th, 1979.

You will note that there is no stated rental price. This is based on the fact that there is work to be done on the property and amortized over the term of the lease. In the event a lease contract is agreed upon Kaplan, Goode & Co., would receive as commission payment, 3% of the total rental called for in the lease. If Montgomery Ward should execute the option periods Kaplan, Goode & Co. would be paid 3% of the total rental called for in the option period of the lease.

I look forward to working with you on this project and will be available at your request.

Sincerely,

KAPLAN, GOODE & CO.

Steve Goode

Re: Downers Grove, Illinois
Ward Proposed Parking Lot

Dear Mr. Cunningham:

After reviewing the gravel parking area behind 5355 Walnut, Downers Grove, with Mr. Steve Goode and Ward's operating management, we wish to express our interest in further discussing the leasing of this area. I am in receipt of a drawing of this lot which indicates approximately 100 available spaces. Ideally, Ward desires 125 to 150 spaces in the event that additional land adjacent to your existing lot could be transformed for this purpose. I would, also, like you to consider making the following three improvements which will be necessary for our needs:

(1) Complete paving and striping of the subject lot and drive connecting it to the drive behind the building just west.

(2) Complete fencing of the subject lot to Ward's standard specifications.

(3) Addition of adequate lighting for security purposes.

In addition, I would like you to consider the following lease structure:

LEASE TERM:	10 years fixed (a necessity, since we concurrently wish to lease the facility just west for a like term).
OPTION TO EXTEND:	Two 5-year periods.
OPTION TO CANCEL:	None.
ANNUAL RENTAL:	To be determined subject to the landlord's agreement to making the previously requested improvements as preferred by Wards ($3,300 is understood to be the base asking rental).

MOR 000271

MAINTENANCE: Upon completion of paving and fencing, Ward shall be responsible for all maintenance and patching to the point of complete replacement which shall be the landlord's responsibility.

REAL ESTATE TAXES: To be paid by landlord.

Anything contained herein notwithstanding, further pursuit and subsequent execution of an arrangement to lease this lot must be contingent upon Ward's concurrently arranging an agreement to lease the facility at 5355 Walnut in Downers Grove.

After your review of this proposal, I will be glad to meet with you and Mr. Steve Goode in order to resolve any points of further discussion. I feel that Ward can offer you an excellent investment possibility in terms of both longevity and security. I hope to hear from you at your earliest convenience.

Very truly yours,

G. A. Palka

PLANS AND SPECIFICATIONS

MONTGOMERY WARD PARKING LOT

We propose to furnish labor and material to install parking lot as per outline survey and specifications on preliminary plan.

We will grade present lot to as near as possible a flat plain sloping to lower side of lot.

We will then install approximately 6" of rough stone from 1½" to 0 grade and then top with approximately 2" of fine screening rolled and compacted.

We will excavate for and install a gasoline steel storage tank.

PERMITS: Apply and bear cost of state and local permits as required, and notify state and local fire prevention bureaus prior to starting installation.

TANKS: Install 1-8000 gallon steel tank of (Fiberglass) tank with 4" Midwest opening and U.L. label in the area designated, including excavation and backfilling.

SUMP: We will furnish and install a spill control inspection sump by tank as required by codes.

TEST: Tank to be tested prior to installation, and all completed piping to be tested before trenches and top of tank is backfilled, to assure a safe and efficient system.

PIPING: We will install with galvanized pipe and fittings; 1½" suction line, complete with OPW #32H Double poppet angle check valve and the required swing joints at tank.

We will install a complete Vapor Recovery System. Enco Wheaton coaxial fitting, locking cap and an A70 drop tube on 4" fill line to tank, a 12" manhole and lid at grade, and required to meet State codes and approved by Illinois Environmental Protection Agencies. 2" vent line, complete with swing joints, from tank to building, or pump island and up to a height of 12' as required by codes. Vent head will be a rustproof aluminum cap, updraft type, to dissipate hazardous vapors, and prevent accumulation of these vapors at ground level.

PUMP: We will set pump and tank furnished by Montgomery Ward.

We will install a concrete slab above tank of approximately 38' wide by 33' long. We will have a raised concrete island above slab for pump and pylon light.

We will have a blacktop approach to the parking lot where entrance will be facing adjoining building to the west as per plans.

We will install a 6' chainlink fence around the entire lot which measures approximately 265' X 183'. Fence to be as follows:

INSTALLATION:

All concrete used for post foundation shall be certified ready-mix concrete designed to obtain a minimum compression strength of 2,500 psi at 28 days or shall be mixed at the job site in the following proportions by volume: one part Type I Portland cement, two parts sand, three parts course aggregate, using just enough water to obtain workability.

(a) Posts shall be installed plumb at no more than 8 feet center to center.

(b) Posts for fence and gates shall be embedded 36" minimum in concrete foundation.

Erect approximately 884 lineal feet of 72" high galvanized mesh with three strands of barb wire on top per project specifications.

Supply one (1) cantilever gate 16 feet in width.

MATERIALS:

FABRIC:	72" high 9 gauge mesh
TERMINAL POST:	2½" O.D. structural pipe
LINE POST:	2" O.D.
CANTILEVER GATE:	4" O.D. schedule 40 pipe
CANTILEVER GATE:	2½" O.D. rails with 2" uprights for bracing standard in industry.
BARB WIRE:	4 pt. 12½ gauge galvanized.

ELECTRIC:

We will furnish and install electric wiring from building west of this site (leased by Wards) to pump island and connect gas pump and furnish and install a pylon light on island as called for on plans.

Re: Downers Grove, Illinois
Ward Proposed Parking Lot

Dear Mr. Cunningham:

After reviewing the gravel parking area behind 5355 Walnut, Downers Grove, with Mr. Steve Goode and Ward's operating management, we wish to express our interest in further discussing the leasing of this area. I am in receipt of a drawing of this lot which indicates approximately 100 available spaces. Ideally, Ward desires 125 to 150 spaces in the event that additional land adjacent to your existing lot could be transformed for this purpose. I would, also, like you to consider making the following three improvements which will be necessary for our needs:

(1) Complete paving and striping of the subject lot and drive connecting it to the drive behind the building just west.

(2) Complete fencing of the subject lot to Ward's standard specifications.

(3) Addition of adequate lighting for security purposes.

In addition, I would like you to consider the following lease structure:

LEASE TERM:	10 years fixed (a necessity, since we concurrently wish to lease the facility just west for a like term).
OPTION TO EXTEND:	Two 5-year periods.
OPTION TO CANCEL:	None.
ANNUAL RENTAL:	To be determined subject to the landlord's agreement to making the previously requested improvements as preferred by Wards ($3,300 is understood to be the base asking rental).

MAINTENANCE: Upon completion of paving and fencing, Ward shall be responsible for all maintenance and patching to the point of complete replacement which shall be the landlord's responsibility.

REAL ESTATE TAXES: To be paid by landlord.

Anything contained herein notwithstanding, further pursuit and subsequent execution of an arrangement to lease this lot must be contingent upon Ward's concurrently arranging an agreement to lease the facility at 5355 Walnut in Downers Grove.

After your review of this proposal, I will be glad to meet with you and Mr. Steve Goode in order to resolve any points of further discussion. I feel that Ward can offer you an excellent investment possibility in terms of both longevity and security. I hope to hear from you at your earliest convenience.

Very truly yours,

G. A. Palka

[illegible]

Certificates of insurance or certified copies of all policies required under this section bearing the notation evidencing payment of the premiums or accompanied by other evidence satisfactory to Landlord of such payment shall be deposited upon request with the Landlord by Tenant as herinafter specified.

19. Within Thirty (30) days after * approval of plans by Tenant, Landlord shall commence, and thereafter diligently prosecute to completion, the following Landlord's work, as also more fully described an Exhibit "B", which is attached hereto and made a part hereof:

(a) Grade, compact, and gravel the parking areas so as to be suitable for Tenant's intended use.

(b) Install a six (6) foot chainlink fence (with barbed wire and sliding gate) around the perimeter of the demised area.

(c) Excavate for, position, and install a certain Eight Thousand (8000) gallon gasoline tank, and pump, located as shown on Exhibit "B", tank and pump to be supplied by Tenant promptly after last execution of this Lease.

MOR 000278

(d) Provide electric service to the gas pump.

(e) Install and erect a lighting pylon, and attach lighting fixtures thereto, as shown on Exhibit "B".

(f) Lay concrete paving in and about the area of the gasoline pump as required.

(g) Pave a hard surface, all weather, access drive from the pump area to the adjoining parcel also leased by Tenant.

All work required to be performed by the Landlord hereunder shall be performed in a good and workmanlike manner. The Premises shall be left at the completion of such work in a safe, clean and tenantable condition and in good order and repair. Landlord shall perform all work provided for hereunder in conformity with all applicable construction and building codes and with every applicable requirement of law or duly constituted authority of law, or any Board of Underwriters, Rating Bureau or similar organization having jurisdiction, of carriers of insurance on the leased Premises.

See paragraph 19, continued on Page 4a.

20. Tenant shall take possession of the Leased premises within a reasonable time, not to exceed Thirty (30) days, after Landlord notifies Tenant that all Landlord's work pursuant to Paragraph #19 has been completed and that Tenant may have exclusive possession of the Premises. In the event the Landlord has not completed all work on or before June 1, 1980 , Tenant may cancel this Lease by sending written notice to Landlord, whereupon this Lease shall be terminated and of no further force and event.

1978 TAXES

$1233.68

The following provisions shall be incorporated and made part of this Exclusive Agency Agreement.

With reference to Item (1) under "The Owner Agrees" on the reverse side hereof, the commission schedule is as follows:

SALE: 6% of the first $100,000 of sale price and 5% on the balance.

NET LEASE:

A. For a lease of more than one (1) year to and including six (6) years — Commission is 8% of the first years rental plus 2% of the total rental reserved in the lease after the first year.

3 1/2 % of 10 yr - 19275.00

B. For a lease of more than six (6) years — Commission is 3-1/2% of the total rental reserved in the lease for the first twenty-five (25) years or less plus 1-3/4% of the total rental reserved for the balance of the term after twenty-five (25) years.

GROSS LEASE:

A. For a lease of more than one (1) year to and including six (6) years — Commission is 7% of the first years rental plus 2% of the total rental reserved in the lease after the first year.

B. For a lease of more than six (6) years — Commission is 3% of the total rental reserved in the lease for the first twenty-five (25) years or less plus 1-1/2% of the total reserved for the balance of the term after twenty-five (25) years.

PAYMENT: Lease Commissions are payable on the date of signing of the lease.

OPTIONS:

A. If a lease contains an option to renew and if the Lessee exercises such option, then a commission shall be paid on the additional period equal to the difference between the amount of commission due for the entire term and the amount of commission previously paid. Commission shall be paid at the time of such renewal.

B. If a lease contains an option to lease additional space and the Lessee exercises such option then a commission shall be paid at rate set forth for a new lease.

C. If a lease contains an option to purchase the property and if the Lessee exercises such option, then a commission on said sale shall be paid to the broker based on rates as indicated above, less any commission already paid for the unexpired portion of the lease. Such sales commission shall be paid at the time of said purchase.

D. The above agreements as to option commission shall be made part of any lease.

EXCLUSIVE AGENCY AND COOPERATIVE LISTING AGREEMENT

To: KAPLAN, GOODE & CO.
2 North Riverside Plaza
Chicago, Illinois 60606

In consideration of our mutual agreements and of your efforts to secure a buyer or tenant for the property located at _____, Illinois, and described as

_____

_____

_____

the undersigned, hereinafter referred to as "OWNER", warrants his authority to execute this agreement and does hereby employ you as exclusive agent from_____19_____to_____19_____with sole authority to offer said property for sale or lease, including authority to advertise and to place "For Sale" or "For Rent" signs thereon, on the following terms and conditions:

TERMS OF SALE: _____

_____

TERMS OF LEASE:_____

_____

THE OWNER AGREES:

(1) To pay you a real estate brokerage commission in an amount determined by the applicable rate as indicated in schedule on reverse side hereof (a) for your services in procuring a purchaser or lessee of the property on the above terms or such other terms as the OWNER shall accept, or (b) if the property is sold or leased by you, by OWNER, or through any other person, during the period hereof, or (c) if the property is sold or leased within six (6) months after terminating date hereof to a purchaser or lessee, or anyone on behalf thereof, to whom it was submitted by you and whose name has been registered with OWNER.

(2) To cooperate with you in bringing about a sale or lease of said property and to refer to you all inquiries of brokers or others interested in said property, that all negotiations or dealings shall be with and through you as agent, and that you may list this property with cooperating brokers.

(3) In the event your authority is revoked or said property is withdrawn from sale or lease during the period of this agreement, then to pay you as compensation for your services and as liquidated damages an amount equivalent to a brokerage commission based upon the sale or lease price as above stated.

(4) To reimburse you for advertising expenses as follows:

_____

_____

THE AGENT AGREES:

(1) To inspect the said property, to secure and compile written information with respect thereto and to make an earnest and continued effort to sell or lease said property at the terms hereinabove set forth.

(2) TO LIST THIS PROPERTY WITH OTHER ACTIVE INDUSTRIAL REAL ESTATE BROKERS AND TO COOPERATE FULLY WITH ALL REAL ESTATE BROKERS.

(3) To promote and advertise said property for sale or lease in the manner that in the judgment of the agent will aid in securing prospects for the OWNER'S property.

(4) To send information and copy of any descriptive brochure to prospective buyers and to others as the OWNER requests.

(5) To take prospective buyers or lessees through the said property at convenient times and from time to time to advise OWNER as to sale or lease conditions upon his request. In the event the property is not sold or leased during the period of this agreement, then, immediately upon its expiration the agent shall furnish the OWNER with a list of all persons to whom the property was submitted.

Dated at Chicago, Illinois, _____, 19_____.

Re: Downers Grove, Illinois
Service Center Parking Lot

Gentlemen:

Mr. West, our Engineering Manager, has stated that the 10,000 gallon gasoline tank can be installed without the concrete holddown pad as most of the major oil companies do it this way. The tank must be on 12" of pea gravel, and be covered with it up to the surface. The top of the tank shall be three feet below finished grade, or per code, whichever is greater.

Very truly yours,

Dear Mr. Cunningham:

Re: Trust No. 78-309

Some time ago, Mr. Starmann spoke with you requesting that you forward to the Trust Department a letter of direction authorizing the Trustee to sign an Assignment of Rents. We have not yet received that letter in a form which specifically authorizes the execution of the Assignment.

I have enclosed for your use a sample form of the letter which would enable the trustee to proceed with the execution of the document. Please return the letter of direction signed by the proper beneficiaries of the trust if the letter is acceptable to you.

Do not hesitate to call if you have any questions.

Very truly yours,

Faye D. Hoffman
Trust Assistant

Re: Montgomery Ward Lease

Dear Ed:

Enclosed please find original and four copies of proposed Exhibit A to be attached to the lease with Montgomery Ward Corporation.

I have taken the legal description from the photocopy of the 1977 Du Page County Real Estate Tax Bill which you furnished to me on January 28, 1980. I note that that description covers a parcel with approximate dimensions of 320 by 200 feet and is located on Wisconsin Avenue.

The original and one copy of the Exhibit should be attached to the two copies of the Lease and initialed (along with Exhibit B) by Downers Grove National Bank.

Very truly yours,

BAUER & HOTTE, P. C.

This Lease, dated ~~November 13, 1979~~ January , 1980

between Downers Grove National Bank and Trust, as Trustee under Trust No. 78-309

herein called the "Landlord," and MONTGOMERY WARD & CO., INCORPORATED, an Illinois corporation, with ~~General~~ Offices at ~~619 West Chicago Avenue~~, Chicago, Illinois, herein called the "Tenant,"
Regional 140 South State Street,

WITNESSETH:

1. The Landlord leases to the Tenant for a term commencing on * , and continuing to and including ** , the premises located in the City of Downers Grove , County of Dupage , and State of Illinois , described as follows:

See Exhibit "B", which is attached hereto and made a part hereof.

including all improvements now or hereafter thereon and all appurtenances thereto. Said premises are commonly known as 2663 Wisconsin Avenue.

2. The Tenant shall pay rent to the Landlord at the annual rate of Twenty Five Thousand Seven Hundred and No/100 Dollars ($ 25,700.00) payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prorated. Anything contained herein to the contrary notwithstanding, the Tenant's obligation to pay rent hereunder shall not commence until actual and exclusive possession of the leased premises has been delivered to the Tenant and all repairs, alterations and improvements necessary to fit the premises for occupancy and use by the Tenant shall have been completed, all as contemplated by Paragraphs 19 & 20 hereinbelow.

3. All payments to the Landlord may be made by checks or drafts payable to the order of

The Morey Corporation and mailed to such payee at 2659 Wisconsin Avenue Downers Grove, Illinois 60515

4. The Tenant may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term, extend the term ~~to and including~~ an additional Five (5) years , upon the same terms and conditions as herein set forth, except that rent shall be adjusted upward ~~commencement~~ at the commencement of the extended term by the percentage in the CPI since the commencement of the term, but in no event shall the rent be increased by more than 75%.

* the date Tenant takes possessi of the demised Premises provid Landlord has completed the wor described in Paragraph #19 her und

** Ten (10) years after the first day of the first month followi the month in which Tenant take possession.

MOR 000289

5. If the Tenant has exercised the foregoing option to extend the term, it may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term as extended, further extend the term ~~to and including~~ for an additional Five years upon the same terms and conditions as herein set forth, except that rent during the further extended term shall be adjusted upward [illegible] at the commencement of the further extended term by the percentage change in the CPI since the commencement of the extended term, but in no event shall rent be increased by more than 75%.

~~graphed to the Landlord ( ) or more days before the effective date of the cancellation, may cancel this lease as of~~

~~All rent and other charges paid in advance for any period after the effective date of such cancellation shall be refunded to the Tenant.~~

7. The Landlord will not interrupt or disturb any entrances, exits, or approaches, or deprive the premises of any light or air now enjoyed by the premises.

8. The Landlord covenants and agrees to maintain the Tenant's quiet possession and enjoyment of the entire leased premises during the term hereof [illegible] The Landlord shall hold harmless the Tenant of and from any and all loss, damage and claims for damage to person or property arising from his failure to comply with this agreement.

9. The Tenant, at its own expense, may from time to time install on the premises any equipment fixtures and improvements and remove them and may make any alterations or additions in a good and workmanlike manner in and to the premises and may erect or remove any signs on the premises which it may deem necessary or suitable for the conduct of its business. (except advertising signs)

10. Notwithstanding any other provision of this lease, the Tenant shall not be liable for any loss or damage to the premises caused by fire or the elements, whether or not such loss or damage shall result from the Tenant's negligence. [illegible]

11. If any default of either party continues uncorrected for sixty (60) days (thirty (30) days in the case of a default in the payment of rent) after receipt of written notice from the other party, stating with particularity the nature and extent of the default, the party giving such notice may cancel this lease by written notice of cancellation. [illegible] remedy provided in this lease shall be exclusive, but each shall be cumulative with all other remedies provided in this lease and at law or in equity.

12. The Tenant may sublet the premises or assign this lease; provided, however, that the Tenant shall not be relieved from its obligations under the lease by such subletting or assignment without the Landlord's consent.

13. The Tenant may holdover at the end of the term, without extending the term or renewing the lease, provided the Landlord, at least thirty (30) days prior to the expiration of the term, has not given written notice to the Tenant to vacate the premises at the expiration of the term. If the Tenant does so holdover, the tenancy thereafter shall continue upon the terms and conditions of this lease in effect during the last month of the term until terminated by either party by notice mailed to the other party at least thirty (30) days before the effective date of such termination.

14. The Tenant, on the last day of the term, or on the last day of any holdover, will surrender the premises in as good condition as when the Tenant takes possession, except for ordinary wear and tear, repairs and replacements required to be made by the Landlord, loss by fire or casualty, loss by any cause beyond the Tenant's control, and alterations, additions, and improvements herein permitted.

MOR 000290

15. Tenant shall pay for all gas and electricity used by it on the demised premises.

16. (a) The Landlord shall pay when due all taxes and assessments of every kind and nature which have been or which shall during the term of this lease be levied, assessed or otherwise imposed upon the leased premises, including all improvements now or hereafter thereon, but nothing contained in this Section 16 shall be deemed to obligate the Landlord to pay any taxes levied or assessed against the personal property of the Tenant located in the leased premises or any taxes commonly known as "chain store taxes" imposed on the Tenant by reason of the fact that the Tenant operatesmore than one place of business in the jurisdiction imposing such tax, which personal property taxes and chain store shall be paid the Tenant.

(b) The Tenant, upon receipt of satisfactory evidence of the amount of such excess, shall reimburse the Landlord the amount by which the general real estate taxes levied and assessed against the leased premises for each subsequent tax fiscal year during the term of this lease exceed the general real estate taxes levied and assessed against the leased premises for the third tax fiscal year following Tenant's occupancy; provided, however, that the Tenant shall be obligated to pay only its pro rata share of such excess taxes for the tax fiscal year during which its obligation to pay rent under this lease ceases, said pro rata share to be based upon the number of days of the then current tax fiscal year for which the Tenant has been obligated to pay rent under this lease.

(c) Prior to the payment thereof, the Landlord shall submit to the Tenant copies of all general real estate tax bills, a portion of which the Tenant may be obligated to pay to the Landlord under this Section 18, together with a statement showing the computation of the amount owed by the Tenant to the Landlord hereunder, supported by such evidence as the Tenant may reasonably require, whereupon the Tenant (unless it shall contest such taxes as hereinafter provided) shall pay to the Landlord within thirty (30) days after receipt of such bills, statement and other evidence, that portion of such general real estate taxes required to be paid by the Tenant hereunder.

(d) In the event the Tenant shall desire to contest the validity or amount of any tax, a portion of which it may be required to pay to the Landlord hereunder, the Tenant, within thirty (30) days after being notified of the amount thereof, shall notify the Landlord of its intention to do so, whereupon the Landlord shall defer payment of any such tax so long as the validity or amount thereof shall be contested by the Tenant in good faith and by proper proceedings, except that the Landlord may make such payments under protest or take such other steps with regard to said tax as will not prejudice the Tenant's opportunity to successfully contest the validity or amount thereof. The Landlord agrees to render to the Tenant all assistance reasonably possible, without expense to the Landlord, in contesting the validity or amount of any such tax, including joining in and signing any protest or pleading which the Tenant may deem it advisable to file. Should any rebate be made on account of any tax a portion of which has been paid by the Tenant to the Landlord hereunder shall belong to and be paid to the Tenant.

17. Tenant shall maintain the parking lot areas, fence, and paved areas in good condition and repair, and shall also, as necessary, maintain, repair, and replace the gas pump and lighting facilities on the demised premises.

18. Tenant shall carry General Liability insurance, or at its option be self-insured, with limits of not less than Two Hundred and Fifty Thousand Dollars ($250,000.00).

[illegible]

[illegible]

[illegible]

[illegible]

[illegible]

Paragraph 19 (continued)

Within Thirty (30) days after the last execution of this Lease, Landlord shall prepare appropriate plans, specifications and/or working drawingscovering the foregoing work, and submit same to Tenant for approval.

In the event Landlord does not complete the work diligently, Tenant may, at its option, cause the work to be completed and deduct the cost thereof from rent.

21.2 Tenant may, at its option, record this Lease and the cost of all documentary stamps, or conveyancing, transfer tax and recording fees shall be paid xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx by Tenant.

21. Broker's Commissions - If there are any Broker's fees or commissions payable in connection with the bringing about of the execution and delivery of this lease, the Landlord agrees that Landlord will pay same, that the Tenant shall not be liable for such fees and commissions and that the Landlord will indemnify and save the Tenant harmless from any and all claims for such fees and commissions.

22. Landlord and Tenant acknowledge that Tenant is negotiating a Lease of substiantially like terms and conditions for Premises adjoining the Landlord's Premises, and that Tenant's use of the demised premises is not feasible without the use of said adjoining Premises. Notwithstanding anything in this Lease to the contrary, Tenant's rental obligation hereunder shall not commence until Tenant has taken possession of the adjoining Premises. When the commencement date of both leases has become fixed, Landlord and Tenant agree to execute a Lease Supplement fixing the commencement date and the termination date of the Lease.

If, due to fire, the elements, or the exercise of the right of eminent domain or other authority of law, or any other cause, the premises shall become untenantable, dangerous or unfit for the Tenant's use, rent payable under this lease shall abate during the continuance of that condition. If the conditions which give rise to an abatement of rent under this section continue for a period of ninety (90) days, then the Tenant may, at any time within sixty (60) days after such ninety (90) day period, cancel this lease and terminate its tenancy by giving the Landlord written notice of its intention to do so.

All notices, approvals, or requests in connection with this lease shall be sent by registered mail or telegram. Notices to the Landlord may be addressed to the Landlord at the address set forth in Section 3 above. Notices to the Tenant shall be addressed to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois, attention: Regional law Department.

Employees or agents of the Tenant have no authority to make or agree to make a lease. This instrument shall not be binding upon the Tenant until it has been executed on behalf of the Tenant by one of its corporate officers. No act or omission of any employee of the Tenant shall alter, change, or modify any of the provisions of this lease. Any alterations, changes, and modifications of this lease shall be effective only when made in writing and executed on behalf of the Tenant by one of its corporate officers.

All the grantors of the term shall be bound jointly and severally by this lease. This lease shall inure to the benefit of and be binding upon, the respective heirs, legal representatives, successors and assigns of the Landlord and the Tenant.

IN WITNESS WHEREOF, this lease has been duly executed under seal as of the first hereinabove written.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide–LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

HOW MUST THE WASTE BE MANAGED?

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally *examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and* believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imp

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.43(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 1ST COPY

EQP 5110 Rev. 5/98

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, [illegible] Part 12[illegible]

Additional information such as "Rejected Load Procedures", state [illegible] test forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ) Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an error, [illegible] rejected load.

NOTE: The 24 hour emergency response number required for a hazardous materials shipment may be different from the generator's phone number.

Item 5. Enter the company name of the [illegible] who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the additional transporters must be recorded on a continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in item [illegible] Each transporter must sign the manifest in the space provided for the designated facility except for intermediate transporters who transport the waste only between two designated facilities. If the designated facility refuses the waste, it should sign the manifest and list any transporters and drivers working for the transporters. Item [illegible] be used by shippers to reference the actual page number of their continuation sheets. Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Place an X in the HM box if the waste is a hazardous material regulated by U.S. DOT (See 49 [illegible] U.S. DOT shipping description including Proper Shipping Name, Hazard Class or Division, Identification Number, and packing group for each waste as identified in 49 CFR 172. [illegible] This includes, but is not limited to, those materials listed as hazardous substances, hazardous wastes, marine pollutants, and those materials which exhibit one or more of the characteristics of ignitability, corrosivity, reactivity, or toxicity as defined in 49 CFR 173.[illegible] Enter the appropriate shipping description for this waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiberboard or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Enter the appropriate abbreviation listed below:

G = Gallons (liquids only)
[illegible]
[illegible]
[illegible]

HOW MUST THE WASTE BE MANAGED?

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.43(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 1ST COPY

EQP 5110 Rev. 5/98

...generator or forter ... a form or 8 per ... Agree.

... Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121...

Additional information such as "Rejected Load Procedures", state ... fest forms, etc. can be obtained by contacting the Michigan Department of ... Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us and/or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is ... address record the site address in item J.

Item 4. Enter a telephone number that a ... can be reached in the event of an emergency or if ... load rejection is issued.

NOTE: The 24 hour emergency phone ... for responding to a hazardous ... may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the ... name and phone.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, ... sheet. In item L of the continuation sheet, the generator/transporter must copy ... ment number, state ... facility (except for ... the designated facility) must be ... drivers working for the transporter. ... *sheets must be appropriately numbered in their entirety and properly distributed. Continuation sheets may* not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. ... Yes" box if the waste is a hazardous material regulated by U.S. DOT (see 49 CFR 172, ...) and shipping description including ... shipping name, hazard ... and identification number (UN/NA) and packing group for each waste as listed on the ... 172. ... regulated ... the shipping description for the waste ...

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiberboard or plastic boxes, cartons, cases
BA = Burlap, cloth, paper or plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use abbreviations or fractions.

... (Indicate only)
G = Gallons (liquids only)
P = Pounds
T = Tons
K = Kilograms
L = Liters
Y = Cubic yards
M = Metric tons (Metric)
N = Cubic meters

... may use this space to indicate special transportation, treatment, storage or ... Import/Export information as noted in the "International Shipment" instructions ... of the manifest.

... the ... permitted ... indicate the ... of ... of ... waste.

... must ... knowledge acceptance of the waste described on the manifest by signing and entering the ...

Item 16. If applicable, print the name of the person accepting the waste on behalf of the second ... carrier. That person must acknowledge acceptance of the waste described on the manifest by signing ... the date of receipt.

Item 18. ... Authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

HOW MUST THE WASTE BE MANAGED?

MOR 000311

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to th applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Sectio 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I hav personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certificatio and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that th treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 26 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.43(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

MOR 000313

20. Facility Owner or Operator: Certification of receipt of hazardous materials covered by this manifest except as noted in item 19.

Printed/Typed Name: Nathan M. Wiseman Signature Date: Month 01 Day 25 Year 01

This Agency is authorized to require, pursuant to Illinois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to this Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed $25,000 per day of violation. Falsification of this information may result in a fine up to $50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

COPY 1. TSD MAIL TO GENERATOR

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802 or 202/426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. Potentially Infectious Medical Waste (PIMW) requires a PIMW manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of Copy 1 should be used.

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number* and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5. 6. For the first transporter who will transport the waste, enter the
C. D. company name, USEPA ID number*, Illinois EPA four digit Special Waste Hauling (SWH) Permit number or the Uniform Program I.D. number issued by the participating state, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
7. 8. If applicable, enter the information requested for the second
E. F. transporter who will transport the waste.
9. 10. For the facility designated to receive the waste, enter company
G. H. name, address, USEPA ID Number*, Illinois EPA ten digit identification number, and telephone number where an authorized agent of the receiving facility may be reached.
11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT".

*** REQUIRED ONLY FOR HAZARDOUS WASTE**

12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM = Metal boxes or roll offs	DM = Metal drums
CW = Wooden boxes	DW = Wooden drums
CF = Fiberboard or plastic bags	DF = Fiberboard or plastic drums
BA = Burlap, cloth, paper or plastic bags.	
CY = Cylinders	TT = Tank Trucks
DT = Dump trucks	TP = Tanks portable
TC = Tank cars	

13. Enter the total quantity of each waste.
14. Enter unit of measure from list below:

G = Gallons	P = Pounds
T = Tons	Y = Cubic Yards
L = Liters	K = Kilograms
M = Metric tons	N = Cubic meters

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - additional numbers should be listed in Section J.

J, K. If needed, enter additional description or information/ instructions for the material listed in Item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.
16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6. MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT IF WASTE IS RCRA HAZARDOUS OR PCB WASTE.

INSTRUCTIONS TO TRANSPORTER: 17. 18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. ***Upon delivery of waste to facility, retain Copy 4 and leave remaining copies with the facility owner/operator.***

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

RETAIN COPY 3, SEND COPY 1 TO THE GENERATOR, AND SEND COPY 2 TO ILLINOIS EPA WITHIN 30 DAYS OF THE DELIVERY IF WASTE IS RCRA HAZARDOUS OR PCB WASTE.

Public reporting burden for this collection of information is estimated to average .37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 2ND COPY

EQP 5110 Rev. 5/98

[illegible] and state regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities (TSDFs) to use this Manifest [illegible] and if [illegible] for both interstate and intrastate shipments of hazardous waste. The Acts are described in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments (i.e., industrial waste and [illegible] Part [illegible] and "Special Handling" (Part 21).

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, 40CFR Part 121, Part 111).

Additional information such as "Rejected Load Procedures", state requirements, [illegible] numbers, manifest forms, etc., can be obtained by contacting the Michigan Department [illegible] Waste Management Division's (WMD) Internet Home Page at: http://www.[illegible].state.mi.us/wmd/ or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address, record the site address in Item J.

Item 4. Enter a telephone number [illegible] where an authorized representative of the generator can be reached in the event of an emergency [illegible].

NOTE: The 24 hour emergency phone number for all manifests [illegible] may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number may be used.

Item 7. If using a second transporter, enter the [illegible].

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a [illegible] number is to be used.

NOTE: If more than two transporters are [illegible] sheet. In Item E of the continuation sheet, the generator/transporter must copy the waste [illegible] manifest number listed in Item [illegible] facility (except for intermediate [illegible] the designated facility) must [illegible] drivers working for one transporter [illegible] sheets must be appropriately completed, clearly and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter [illegible] in this box if the waste is a hazardous material regulated by U.S. DOT. (See 49 CFR 172.[illegible]) [illegible] required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or [illegible] corresponding Group, and UN/NA number as listed in 49 CFR 172.[illegible]

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
[illegible]
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
[illegible] (trucks, vans, etc., usually regulated by U.S. DOT)
CW = Wooden boxes, cartons, crates
[illegible] = Fiberboard or plastic boxes, cartons, crates
BA = Burlap, cloth, paper, or plastic bags

Item [illegible]: Enter the total quantity of waste listed for each container. Do not use decimals or fractions.

Item 14. Enter the appropriate [illegible] for the units of measure listed below:

G = Gallons (liquids only)
[illegible]
T = Tons (2,000 pounds)
[illegible]
[illegible]
[illegible]
[illegible]
K = Cubic meters

MOR 000316

Item 15. Use this space to indicate special transportation, treatment, storage or disposal information as noted in the "International Shipment" instructions [illegible].

Item 16. [illegible] print name and sign and date the receipt of shipment.

Item 17. [illegible] must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. If [illegible] representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A pre-printed State manifest document number.

Item B - [illegible] required by other states.

Item [illegible] the appropriate waste numbers found in R299.9212 through [illegible]. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute hazardous waste (including P and acute F wastes), [illegible] state-specific [illegible] regulated wastes, toxic hazardous wastes, federally regulated wastes, [illegible] are not hazardous [illegible] as listed below:

[illegible] System	007L
[illegible]	014L
[illegible]	017L
[illegible] Oil Only	018
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]

[illegible] Item C - Enter the appropriate waste description, [illegible] the shipping address noted in Item [illegible] Waste Description, Quantity, and Units of Measure (Items 11-14).

Item D - [illegible]

[illegible]	[illegible]
[illegible]	[illegible]
[illegible] Spill Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States."

Imports- Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310."

[illegible] must [illegible] a copy of the manifest to the U.S. Customs when [illegible] the waste across the border. Note that foreign waste manifest documents [illegible].

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest), remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be stapled and supplied to the next transporter acknowledging the receipt of the shipment by the [illegible] transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the [illegible] transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ [illegible] the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

[illegible] reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters and 16 minutes for treatment, storage and disposal facilities. The record keeping burden for [illegible] for this collection of information is estimated to average [illegible] minutes for generators, 5 minutes for transporters, and 30 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding the burden estimate or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 2ND COPY

EQP 5110 Rev. 5/98

MOR 000317

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 40CFR Part 262, Part 263).

Additional information such as "Rejected Load Procedures", state assigned site numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us and/or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address, record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an error, emergency, or discrepancy with the manifest.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter their company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, use additional copies of the manifest and continuation sheet. In item E of the continuation sheet, the generator/transporter must copy the state assigned site number listed in Item 21 of the manifest. Where this generator/transporter is a waste broker, facility (except for intermediate rail facilities), or the designated facility, they must enter their state assigned site number in item E of the continuation sheet. Where drivers working for one transporter change trucks, trailers, or containers, continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on the manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an "X" in the "HM" box if the waste is a hazardous material regulated by U.S. DOT (See 49 CFR [illegible]). For "Total Quantity" enter the gross weight or estimated gross weight of the waste. For "Unit Wt./Vol." enter the appropriate weight or volume unit. Use only one unit per waste stream. Do not use abbreviations or partial units. Enter the proper shipping name, hazard class, and ID number (UN/NA) for each waste listed by name in 49 CFR [illegible]. For wastes not listed in 49 CFR [illegible], enter the proper shipping name, hazard class, and ID number (UN/NA) for the most predominant hazardous component of the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drums, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanker, portable
CT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper or plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or partials.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lbs)
K = Kilograms
L = Liters (liquids only)
Y = Cubic yards
M = Metric tons (1000 kg)
N = Cubic meters

Item 15. Generators or their agents may use this space to indicate special transportation, treatment, storage, or disposal information. Export information as noted in the "International Shipment" instructions should be entered here.

Generators must read, print or type name, sign and date the certification statement.

Item 17. Enter the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. A properly authorized representative of the facility designated on the manifest (or alternate facility) must note in this space any discrepancies in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A pre-printed State manifest document number.

Item B - H. May be required by other states.

Item I. Enter the appropriate waste numbers found in R299.9212 through R299.9214 of the Michigan Part 111 Rules. If more than one waste number is required to characterize properly the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (include P and U wastes), toxic waste, state F (non-specific source), and characteristic waste (ignitable, corrosive, reactive, EP toxic). Any federally regulated waste. For Part 121 wastes which are not hazardous, enter the appropriate code listed below:

[illegible]	007L
[illegible]	014L
[illegible]	017L
[illegible]	019L
[illegible]	021
[illegible]	[illegible]
[illegible]	025L
[illegible]	[illegible]
[illegible]	[illegible]

Item J. Enter the site address (if different from the mailing address listed in Item 3) of the generator's facility where the waste listed on the manifest was originally accepted by the first transporter for shipment. Enter the appropriate code listed below:

Automotive Battery Recycling	B
[illegible]	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports- Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

The primary importer of hazardous waste or wastes must deliver a copy of the manifest to U.S. Customs when entering or leaving the waste across U.S. borders. Note the foreign waste manifest document number in Item 21.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

THE MOREY CORP.

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 15 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 1ST COPY

EQP 5110 Rev. 5/96

...computer printer or with pen. Print or type in the unshaded areas only. Federal regulations require that you provide all information requested in the unshaded areas. Refer to the instructions in the Michigan Part 121 Liquid Industrial Waste Manifest Procedures Manual for additional information.

...must obtain a sheet (Form # 700-22A) for both the primary and continuation pages of this manifest. Use this form (700-22) and, if necessary, the 700-22A continuation sheet to list hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations may require EPA Form 8700-22 to be used for the transportation of liquid industrial waste as defined by Part 111 and Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 40CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used. In which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which a copy of this manifest should be mailed. If the address of the site at which the waste was placed into transportation is other than the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where a knowledgeable agent of the generator can be reached in the event of an emergency and/or a problem with the listed load.

NOTE: The 24 hour emergency phone number required for all Part 121 manifests (including paper) may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number may be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number may be used.

NOTE: If more than two transporters are used, the generator must copy the information for the additional transporters in Item L of the continuation sheet. The generator must copy the manifest document number (entered in Item 1) and the generator's U.S. EPA identification number (entered in Item 1) in the appropriate boxes on the continuation sheet. The generator must also copy the designated facility name and site address (Item 9) and the designated facility's U.S. EPA identification number (Item 10) in the appropriate boxes on the continuation sheet. Transporters, drivers working for one transporter, and facilities are responsible for ensuring that the continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on the manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. (Container Type) If the HM box (Item 11) of the waste is a hazardous material regulated by U.S. DOT (see 49 CFR 172.101), you are required to enter the proper shipping name, hazard class, and UN/NA identification number as specified in 49 CFR 172.202 and 172.203. Non-hazardous materials may also be described on the manifest by their proper shipping name. If you are shipping a waste that is not subject to U.S. DOT regulations, enter the appropriate identification number, if any, for the waste.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanker portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiberboard or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate unit of measure for the quantity listed in Item 13.

G = Gallons (liquids only)
L = Liters
T = Short Tons (2000 lbs)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters
Y = Cubic yards

...Item 15. Enter the date the waste is accepted by the first transporter. Enter the month, day and year.

...Item 16. Print or type the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 17. If applicable, enter the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, enter the name of the person accepting the waste on behalf of the third transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated or alternate facility must note in this space any discrepancies in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item J. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item K. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item L. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item M. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item N. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item O. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item P. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item Q. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item R. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item S. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item T. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item U. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item V. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item W. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item X. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item Y. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item Z. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item AA. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item BB. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item CC. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item DD. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item EE. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item FF. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item GG. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item HH. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item II. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item JJ. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item KK. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item LL. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item MM. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item NN. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item OO. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item PP. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item QQ. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item RR. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item SS. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item TT. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item UU. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item VV. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item WW. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item XX. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste. If more than one waste number is required to accurately identify the waste, list the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and some F wastes), toxic waste, non-acute F (non-specific source) wastes, ignitable wastes, corrosive wastes, reactive wastes, other federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil	007L
Paint Wastes	014L
Chemicals	017L
Industrial Process Sludge	019L
Soil Contaminated with Petroleum	021L
Soap	022L
Oil	013L
Other Petroleum Products	023L

Item YY. Enter the appropriate waste numbers found in R299.9212 through R299.9216 that identify the waste

LAND DISPOSAL RESTRICTION & CERTIFICATION FORM 6/98

Please check the facility you are shipping to:

☐ Michigan Disposal Waste Treatment Plant
(Stabilization and Treatment)

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide–LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

HOW MUST THE WASTE BE MANAGED?

MOR 000321

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to t applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Secti 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I ha personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certificatio and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that th treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 26 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of th prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine an imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HA BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance wit the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including th possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 1ST COPY

EQP 5110 Rev. 5/98

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, [illegible]).

Additional information such as "Rejected Load Procedures", state addresses, [illegible] forms, etc., can be obtained by contacting the Michigan Department of [illegible] (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/ and you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet(s) is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which this manifest should be mailed. If the address of the site at which the waste was placed into transportation [illegible] and, if so, record the site address in Item 3.

Item 4. Enter a telephone number [illegible] where an authorized agent of the generator can be reached in the event of an emergency or [illegible].

NOTE: The 24 hour emergency [illegible] required for a hazardous material shipment; paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number may be used.

Item 7. If using a second transporter, [illegible].

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, [illegible] sheets. In Item 5 of the continuation sheet, the company/transporter must copy the [illegible] ment number listed in Item [illegible] of the manifest. If a transporter is changed at a facility (except for intermediate [illegible] the designated facility), the [illegible] drivers working for the transporter [illegible] sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. [illegible] HM and if the waste is a hazardous material regulated by U.S. DOT (See 49 [illegible] description, the Proper Shipping Name, and Hazard Class, ID number (UN/NA) [illegible] packing group for each waste as identified in 49 C.F.R. 172. [illegible] required for each waste listed. Enter the additional required information for each waste listed in Item 11 in the space provided in Item 13. Special handling instructions for the waste should be noted.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
CT = Cargo Tanks
TP = Tanks, portable
TT = Trailer or rail tank trucks
TC = Tank Cars
[illegible]downs
MB = Metal boxes, pallets, cases (including roll-offs)
BA = Burlap, cloth, paper or plastic bags

Enter the estimated quantity of waste (decimals are allowed). Do not use decimals or fractions.

Use the following codes for the units of measure (bulk or containers) listed in Item 12:

G = Gallons (liquids only)
[illegible]
[illegible]
[illegible]

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide--LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

HOW MUST THE WASTE BE MANAGED?

MOR 000327

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohi[illegible]. I am aware t[illegible]here are significant penalties for subm[illegible]g a false certification, inc[illegible]ity of fine and imprison[illegible]

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

Generator Name Morey Corp. Generator USEPA ID No. ILD025415266

Generator Address 2659 Wisconsin Av. Downers Grove, IL. 60515

State Manifest No. MI7P00168 Manifest Doc. No. 00168

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide–LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

INSTRUCTIONS

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY
INVENTORY IDENTIFICATION NUMBER APPLICATION

An Illinois inventory ID number is required under 35 Ill Adm, Section 855.104. Information provided on this application form will be entered into the Bureau of Land's inventory computer system. Illinois Inventory ID numbers are assigned to a specific location address and not to the facility . A separate application is required for each location. Once an inventory number is assigned to a location, it will remain in the inventory system indefinitely. Please notify the Bureau of Land's Planning and Reporting Section if there is a name change for the location address.

The original and colored copies must be returned to the IEPA. Applications which are incomplete or are completed inaccurately will be rejected. To avoid delays or a rejected application, please read the following instructions carefully.

The gray shaded area at the top of the page is for Agency use. The number that is assigned to your location will appear in this space when your application is processed.

IEMA INCIDENT # (if applicable): Provide the Illinois Emergency Management Agency (IEMA) Incident number for this location.

COMPANY NAME: Provide the company's official name.

NAICS CODE(s): Provide the North America Industrial Classification System (NAICS) Code that best describes the principal product or services rendered at this location. See the attached list for codes.

GENERATOR STATUS (check all that apply):
-Hazardous Large Quantity Generator (LQG): Greater than 1000kg/mo (2,200 lbs).
-Hazardous Small Quantity Generator (SQG) or Hazardous Conditionally Exempt Small Quantity Generator (CESQG): Less than 1000kg/mo (2,200 lbs).
-Nonhazardous Generator: Generator of nonhazardous special waste.

LOCATION ADDRESS: LOCATION: Provide the street address, a P.O. Box is not acceptable. CITY:, STATE:, ZIP CODE: Provide all information. TELEPHONE: Provide company telephone number including the area code. CONTACT: Provide a contact person for your company.

MAILING ADDRESS (if applicable): Provide this information only if it is different than the location address, if not, leave blank.

MANIFESTS: Indicate quantity and type.

RETURN ADDRESS: Type the address ~~for UPS delivery of the~~ package (processed application with number issued, manifests or manifest order ~~form~~).

AUTHORIZATION STATEMENT: After completion of form, read the certification statement, sign and date.

RETURN COMPLETED FORM TO: Illinois Environmental Protection Agency

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc. can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in item J.

Item 4. Enter a telephone number [illegible] generator can be reached in the event of an emergency, and/or a [illegible].

NOTE: The 24 hour emergency [illegible] hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter [illegible] transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter [illegible]

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, [illegible] a continuation sheet. In item C of the continuation sheet, the generator/transporter must copy the State manifest document number listed in item A, [illegible] the designated facility, (except for intermediate [illegible] and the designated facility) must [illegible] for individual drivers working for one transporter [illegible] to reflect the additional transporter. Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter [illegible] if the waste is a hazardous material regulated by U.S. DOT (See 49 [illegible] Proper Shipping Name, Hazard Class, [illegible] as specified in 40 CFR 172 [illegible] and reportable quantity [illegible] appropriate shipping description for the waste [illegible].

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrel, keg
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
[illegible]
[illegible] boxes, bags, cases (including roll off)
CW = Wrapped boxes, cartons, cases
[illegible] = Boxes, cartons, cases (other than fiberboard)
BA = Bulkes, slurry, paper/plastic bags

[illegible] the total waste quantity for each container type. Do not use decimals or fractions.

[illegible] Enter [illegible] type.

G = Gallons (liquids only)
[illegible]

MOR 000338

Item 13. The generator must read and print/type the certification statement.

Item 14. Print/type the name of the person signing the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 15. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 16. Print the name of the person accepting the waste on behalf of the designated (or alternate) facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K (specific sources), non-acute F (non-specific sources), and D (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

Mixed Solvents	007L
Halogenated	014L
Crankcase oil	017L

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports- Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or transiting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. *Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For* shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

LANSING MI 48909-7538

[illegible] collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per [illegible] is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes per facility. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

FACILITY

ALL SPILLS MUST BE REPORTED TO THE MICHIGAN POLLUTION EMERGENCY ALERTING SYSTEM, IN MICHIGAN AT 1-800-292-4706 OR OUT OF STATE AT 517-373-7660 AND THE NATIONAL RESPONSE CENTER AT 1-800-424-8802 24 HOURS PER DAY.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 2ND COPY

EQP 5110 Rev. 5/96

...Federal and State regulations require generators and transporters of hazardous waste and the EPA or State...must...and...to...this form...and, if...(Form 8700-22A) for both interstate and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations require the use of this form for all manifested shipments of liquid industrial waste as regulated in Part ... of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, 45CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number including area code at which an authorized agent of the generator can be reached in the event of an emergency and/or a question or rejected load.

NOTE: The 24 hour emergency response phone number and identification number (such as a contract or purchase order number) may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number must be used.

Item 7. If using a second transporter, enter the second transporter's company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are involved, attach a continuation sheet. In Item L of the continuation sheet, the generator/transporter must copy the State (number assigned to the manifest document number listed in Item 1. The generator must sign and date the continuation sheet. The designated facility (except for intermediate rail transporters) must sign and date the continuation sheet. The designated facility must obtain the signature of each transporter and the driver of each vehicle transporting waste listed on the continuation sheet. Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on the manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an "X" in the HM box if the waste is a hazardous material regulated by U.S. DOT. (See 49 CFR ... for definition of hazardous material.) Using the appropriate Proper Shipping Name, Hazard Class, ID Number (UN/NA), and Packing Group for each waste as specified in 49 CFR ... enter the information required by 49 CFR ... in the space provided. Additional descriptive information for the waste may be entered after the proper shipping name.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drums, barrels, kegs
FB = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper or plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below:

G = Gallons (liquids only)
B = Barrels
Y = Cubic yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000340

Item 15. [illegible] Use this space to indicate special transportation, treatment, storage or disposal information. Export Information as noted in the "International Shipment" instructions section of the instructions.

Item 16. The transporter must print or type the name and date for each carrier signature.

Item 17. Provide the name of the person who signs for the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - N. May be required by other states.

Item O. For hazardous wastes, enter the appropriate waste numbers found in R299.9213 through R299.9216 and R299.9218 that describe the waste listed in Item 9. If more than one waste number is required to accurately identify the waste, enter the additional numbers in Item P. In selecting the waste number, the following hierarchy must be used: state waste (including P and U wastes), F wastes (nonspecific hazardous wastes), characteristic wastes (not regulated as hazardous waste by Part 121 unless which exhibit hazardous waste characteristics), and then the appropriate code listed below.

Mixed Solvents	007L
Paint [illegible]	014L
Sandblast [illegible]	017L
[illegible]	019L
[illegible]	021L
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]

Only [illegible] appropriate waste numbers listed above. If more than one waste number is required to accurately identify the waste, enter the additional numbers in Item P. If none of these waste numbers are appropriate, enter NONE.

Item R. [illegible]

[illegible]	[illegible]
[illegible]	[illegible]
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports- Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when exporting or importing the waste across U.S. borders. Note: Any foreign waste manifest document may be used.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the initial transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the tenth day of the month following receipt of shipment.

LANSING MI 48909-7538

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 15 minutes for treatment, storage and disposal facilities. The record keeping burden per respondent for the collection of information is estimated to average 6 minutes for transporters, and 8 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 172, Part 121).

Additional information such as "Rejected Load Procedures", state specific [illegible] test forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used. In which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation differs from the mailing address record the site address in Item 3.

Item 4. Enter a telephone number where a knowledgeable agent of the generator can be reached in the event of an emergency and/or problem or questions are found.

NOTE: The 24 hour emergency [illegible] required on the DOT shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will haul the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number must be used.

Item 7. If using a second transporter [illegible].

Item 8. Enter the second transporter's [illegible]. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, [illegible] sheet. In item 5 of the continuation sheet, the transporter must enter the [illegible] ment number listed in Item 21 [illegible] facility (except for intermediate [illegible] the designated facility must [illegible] drivers working for one transporter [illegible] sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an "X" in the "HM" box if the waste is a hazardous material regulated by U.S. DOT. (See 49 [illegible] DOT and [illegible] Proper Shipping Name, Hazard [illegible] as defined in 49 CFR 172.101. INTERNATIONAL SHIPMENTS

***Exports-** Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.**

(Imports- Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA or State Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

[illegible] of hazardous waste shipments must designate entry to the receiving state in U.S. Customs when importing the waste across U.S. borders. Note the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the [illegible] to be copied and supplied to the previous transporter acknowledging the receipt of the shipment [illegible] transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return [illegible] banded copy only to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C. 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide–LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

HOW MUST THE WASTE BE MANAGED?

MOR 000343

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Sec 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I h personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certificat and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 2 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of t prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine a imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, H/ BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance wi the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including th possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personall examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification th: the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFI 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there ar significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that th debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.43(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 2ND COPY

EQP 5110 Rev. 5/98

...operators of ... (Form ... 22A) for ... hazardous waste as defined in 40 CFR ... and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations require the use of this manifest for all regulated shipments of ... waste as ... Part ... of Act 451 of 1994, as amended, Part 121).

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR 40CFR Part 262, Part 121).

Additional information such as "Rejected Load Procedures", state assigned ... numbers, manifest forms, etc. can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. *Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).*

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address, record the site address in Item 3.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a question regarding the shipment.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the second transporter's company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a ... number is to be used.

NOTE: If more than two transporters are used, the generator/transporter must copy the additional transporter names (item 5 and 7) and EPA/State assigned numbers (item 6 and 8) in the order they will be used (except for intermediate facilities) on a continuation sheet. In item 11 of the Part A manifest (or item 13 of the designated facility) must be listed ... drivers working for one transporter ... sheets must be appropriately completed, clearly, and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT. (See 49 CFR ... for ... and U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. ... additional ... may be ... by the ... or ... shipping ... The ... shipping description for the waste ...

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

CM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Trucks
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = CyFinders
... = Metal boxes, cartons, cases (including ...)
CW = Wooden boxes, cartons, cases
CF = Fiberboard or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste listed in item 11. Do not use continuation sheets.

Item 14. Enter the appropriate ... for each waste listed in item 11.

G = Gallons (liquid only)
P = Pounds
T = Tons (2,000 lbs.)
... = ...
... = ...
... = ...
M = Metric tons (1,000 kg)
N = Cubic meters

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports. Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must ... the manifest as required in R299.9310.*

... importers of hazardous waste ... a copy of the manifest to U.S. Customs when ... importing the waste across U.S. borders. Note the foreign waste manifest document ...

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the received generator manifest copy, when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the ... transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

FACILITY

ALL SPILLS MUST BE REPORTED TO THE MICHIGAN POLLUTION EMERGENCY ALERTING SYSTEM, IN MICHIGAN AT 1-800-292-4706 OR OUT OF STATE AT 517-373-7660 AND THE NATIONAL RESPONSE CENTER AT 1-800-424-8802 24 HOURS PER DAY.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 1ST COPY

MOR 000349

EQP 5110 Rev. 5/98

[illegible] type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
[illegible]
BW = Wooden boxes, natural woods
BF = Fiberboard or plastic boxes, cartons, cases
BA = Burlap, cloth, paper or plastic bags

Item 13. Enter the quantity of waste described on each line. Do not use decimals or fractions.

[illegible]

G = Gallons (liquids only)
P = Pounds
T = Tons (2,000 lbs)
K = Kilograms
M = Metric tons (1,000 kgs)
N = Cubic meters

[illegible] section A for each waste listed in the State national section B for each waste listed.

Item 14. The generator or his agent must read and sign and date the certification statement.

Item 15. A transporter acknowledging the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 16. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 17. A transporter or designated representative of the designated (or alternate) facility must note in this space any discrepancy between waste described on the manifest and waste received.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded areas is a State of Michigan requirement:

Item A. A pre-printed State manifest document number.

Item B - H. May be required by other states.

Item I. Enter the appropriate waste numbers found in R299.9212 through R299.9214 and in 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (include P and acute F codes), toxic waste (include U and toxic F (non-specific source) and D codes), other regulated wastes (if the same there only as federally regulated wastes - not Part 121 wastes which are not hazardous wastes for the state) state codes listed below.

Mixed Solvents	007L
Chlorinated Oil	C14L
Chlorinated Oil	C17L
Oil & Water Mixture (Emulsions)	015L
Other waste (not listed in Item 11 or Item J)	021L
Spray	022L
Paint	023L
Other waste (not listed in Item 11 or Item J)	028L
Oil Sludge	030L

Item J. Enter the additional waste numbers, if any, from Item I that are necessary to describe properly the waste listed in Item 11. Enter the appropriate state waste number for each waste listed in Item 11. Enter the appropriate federal waste number for each waste listed in Part 121 Section A. If these wastes are not listed in Part 121 Section A, enter the appropriate federal waste number for each waste listed in Part 121 Section B.

Item K. Shaded area for state use only.

Commercial Facility	B
Captive Facility (Non-Commercial)	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports- Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when entering or exporting the waste across U.S. borders. Note the foreign waste manifest document number in Item 2.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received.

TRANSPORTER: *Upon delivery to the designated (or alternate) facility,* and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

MOR 000350

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

HOW MUST THE WASTE BE MANAGED?

MOR 000351

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

HOW MUST THE WASTE BE MANAGED?

MOR 000355

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

Generator Approval Notification *July 29, 1999*

Customer: ENVIRONMENTAL WASTE SRVCS.
Fax: (630) 365-3112

FRED PFEIFFER
MOREY CORP.
2659 WISCONSIN AVE.
DOWNERS GROVE, IL 60515

This Generator Approval Notification acknowledges the acceptability of waste material(s) into the EQ environmental protection facility identified below and ensures that this facility has the appropriate permit(s) issued by federal and state regulatory agencies to properly transport, treat, and/or dispose of the waste material(s).

EQ FACILITY: Michigan Disposal Waste Treatment Plant (MID000724831)
49350 North I-94 Service Drive, Belleville, Michigan 48111

Approval Number: 072999MK
Generator EPA ID #: ILD025415266 **Approved Container:** DRUM **Expires On:** 7/28/2000
Waste Common Name: SIGMA S-460 CONTAMINATED SOIL
Waste Code: **Primary-**000M **Secondary-**
Comments: NO FREE LIQUIDS ALLOWED

The Approval(s) listed above are based upon information supplied to EQ by your company. The generator is ultimately responsible for the accuracy and completeness of the characterization information provided and other information that was provided during the technical approval process. The generator must notify the EQ Customer Satisfaction Department immediately upon knowledge of any changes to this information.

The Approval(s) will expire on the date(s) noted. Any new Approvals obtained from EQ on future business will be valid for a period of one (1) year from the date of issuance. Within 60 days of the Approval Expiration Date, you will be notified of the requirements for recertification. Please contact our Scheduling Department at 1-800-TRKTRAC (875-8722) to coordinate delivery of your waste stream(s).

If you have any questions, please call us toll free at

ALL SPILLS MUST BE REPORTED TO THE MICHIGAN POLLUTION EMERGENCY ALERTING SYSTEM, IN MICHIGAN AT 1-800-292-4706 OR OUT OF STATE AT 517-373-7660 AND THE NATIONAL RESPONSE CENTER AT 1-800-424-8802 24 HOURS PER DAY.

EQP 5110 Rev. 10/98

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, [illegible]).

Additional information such as "Rejected Load Procedures", state assigned numbers, many manifest forms etc. can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ) Waste Management Division's (WMD) Internet Home Page at http://www.deq.state.mi.us/whm/index.html or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are also supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used. If so, record the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be returned. If the address of the site at which the waste was placed into transportation (pick-up site) is different, record the site address in Item 3.

Item 4. Enter a telephone number where a knowledgeable representative of the generator can be reached in the event of an emergency involving the waste described on the manifest.

NOTE: The 24 hour emergency telephone number should be that of the generator or transporter and may be different from the generator's phone number.

Item 5. Enter the company name and the U.S. EPA twelve digit identification number of the transporter who will haul the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number must be used.

Item 7. If using a second transporter, enter the name of the company.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator must enter the additional transporters on a continuation sheet. In Item 5 of the continuation sheet, the generator/transporter must copy the U.S. EPA twelve digit identification number listed in Item 1. Similarly, each transporter listed in the continuation sheet (except for intermediate transporters) must enter the U.S. EPA twelve digit identification number of the designated facility listed in Item 9. Intermediate transporters (i.e., drivers working for one trucking company who haul waste to a terminal for transfer to another driver working for another trucking company) must enter their company name in the appropriate space on the continuation sheet. Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

[illegible]

Item 12. Enter the number of containers for each waste and the appropriate abbreviation listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrel, kegs
[illegible]
L = Lugger Truck
TP = Tanker, portable
TT = Cargo tanker (tank truck)
TC = Tank car
C = Cylinders

HOW MUST THE WASTE BE MANAGED?

MOR 000362

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

GENERATOR TRANSPORTER FACILITY

ALL SPILLS MUST BE REPORTED TO THE MICHIGAN POLLUTION EMERGENCY ALERTING SYSTEM, IN MICHIGAN AT 1-800-292-4706 OR OUT OF STATE AT 517-373-7660 AND THE NATIONAL RESPONSE CENTER AT 1-800-424-8802 24 HOURS PER DAY.

EPA Form 8700-22 (Rev. 9/88) [illegible] GENERATOR 2nd COPY

EQP 5110 Rev. 10/96

MOR 000364

General Instructions

[illegible] this multi-part shipping form. This form has been designed for use on a typewriter, computer printer, a firm point pen may also be used - press hard. Ensure all copies are legible.

[illegible] transporters of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities to use this form (8700-22) and, if necessary, the continuation sheet (Form 8700-22A) for both interstate and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as required in Part [illegible] of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), *Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd* or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. *Enter the generator's U.S. EPA twelve digit identification number.* For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. *Enter the transporter's U.S. EPA twelve digit identification number.* For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall indicate a continuation sheet. In Item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item 1. Every transporter company used between the generator and the designated facility (except for intermediate rail or barge carriers, intermediate trailer barge carriers and the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the [illegible] box if the waste is a hazardous waste as regulated by U.S. DOT (See 49 CFR [illegible]). Enter the required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, Identification (UN/NA) and packing group for each waste as identified in 49 CFR 172 [illegible]. Additional descriptions for the waste (including chemical name and reportable quantity) as appropriate, for any non-DOT regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiberboard or plastic boxes, cartons, cases
BA = Burlap, cloth, paper or plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
[illegible]
[illegible]
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Short tons (tons)

MOR 000365

Item 15. The generator may use this space to indicate special transportation, treatment, storage or disposal information. Import/Export information as noted in the "International Shipment" instructions section may be recorded here.

Item 16. The generator must read, print/type name, sign and date the certification statement.

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B. N. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K (specific sources), non-acute F (non-specific sources) and C (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

Mixed Solvents	007L
Pharmaceutical	014L
Emulsified Oil	017L
Coolants and Water Soluble Oils	019L
Other Oil (specify in Item H or Item J)	021L
Brine	022L
PCB	026L
Other wastes (specify in Item H or Item J)	029L
Petroleum	030L

Item J. Use this space for the site address if different from the mailing address noted [illegible] additional waste codes, [illegible] as noted in Item I of these instructions, approval of controlling authority as required in R299.9304(6).

Item K. Enter any special codes which apply.

Domestic Sewage Recovered	B
Conditionally Exempt Small Quantity Generator	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The *primary exporter must identify the point of departure from the United States.*

Imports- Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. *Send the white copy to MDEQ no later than the tenth day of the month following the shipment.* For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

LANSING MI 48909-7538

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

General Instructions

[illegible] typewriter or printer. A ball point pen may be used for the [illegible] Press firmly and print all copies at once.

[illegible] require generators, transporters of hazardous waste and owners or [illegible] storage and disposal facilities to use this form (8700-22) and, if [illegible] sheet (Form 8700-22A) for both intra- and interstate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as required in Part [illegible] of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121)

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number [illegible] where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter which will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter [illegible] U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter [illegible]

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter [illegible] U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator must photocopy the State manifest document number listed in Item A. Each transporter, starting with the first transporter after the designated facility (except for intermediate rail or ship transporters used between the initial rail or barge carriers and the designated facility) must be listed [illegible] provided for signatures/dates for individual drivers working for one transporter. Item 2 is to be changed to reflect the added pages). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. For each waste [illegible] hazardous material regulated by U.S. DOT (See 49 [illegible] Proper Shipping Name, Hazard Class, ID Number, [illegible] and packing group for each waste as identified in 49 CFR 172. For [illegible] regulated wastes [illegible] appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable

Item 13. The generator may use this space to indicate special transportation [illegible] information. Import/Export information as noted in the "International Shipments" section is to be recorded here.

Item 15. The generator must read, print/type name, sign and date the certification.

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K (specific sources), non acute F (non-specific sources) and D (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

Mixed Solvents	007L
Petroleum Coal	014L
Crankcase Oil	017L

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations. If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR; if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

State Manifest No. MI 7749432 Manifest Doc. No. 44432

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide--LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

HOW MUST THE WASTE BE MANAGED?

MOR 000370

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to th applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Sectio 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I hav personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certificatio and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that th treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 26 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

EPA [illegible] GENERATOR 2ND COPY

EQP 8110 Rev. 10/05

General Instructions

Read all instructions before completing this form. This form has been designed for use on a computer (elite type). Use typewriter/computer printer ribbon only. Do not use pencil. Press down hard. Ensure that all copies are legible.

Federal and State regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage and disposal facilities to use this form (8700-22) and, if necessary, the continuation sheet (Form 8700-22A) for both inter- and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as defined in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121)

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall initiate a continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transportation company used between the generator and the disposal facility (except for intermediate rail or barge transporters used between the initial and final carriers and the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). *Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.*

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT. (See 49 CFR 172). Enter the required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA); and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb.)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000377

Item 15. The generator may use this space to indicate special transportation, treatment, storage or disposal information. Import/Export information as noted in the "International Shipments" instructions shall be recorded here.

Item 16. The generator must read, print his/her name, sign and date the manifest certification.

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste numbers is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F); U (toxic); K wastes (sources); non-acute F (non-specific sources); and C (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

Waste Solvents	007L
Waste Lubricating Oil	014L
Crankcase Oil	017L
Emulsions and Water Soluble Oils	019L
[illegible]	[illegible]
Brine	022L
PCB	026L
Other wastes (Describe in Item 11 or Item J)	028L
Antifreeze	033L

Item J. Generators are to use this space for the additional numbers (if more than one is required) listed in Item I, additional waste codes, additional description for a Part 121 waste as noted in the instructions, approval of commingling authority as required in R299.9306(6).

Item K. List any applicable waste codes:

Burned for Energy Recovery	B
Conditionally Exempt Small Quantity Generator	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports: Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports: Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

LANSING MI 48909-7538

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2.37), 401 M St., S.W., Washington, D.C., 20480 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

EPA Form 8700-22 (Rev. 3-97) GENERATOR'S 2ND COPY

EQP 5110 Rev. 10/98

General Instructions

Read all instructions before completing this form. This form has been designed for use on a 12-pitch (elite) typewriter, computer printer. A firm point pen may also be used - press down hard. Ensure all copies are legible.

Federal and state regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities to use this form (8700-22), and if necessary, the continuation sheet (Form 8700-22A) for both inter- and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as required in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. *Enter the generator's U.S. EPA twelve digit identification number.* For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. *Enter the name of the generator and the mailing address to which the manifest should be mailed.* If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached *in the event of an emergency and/or a partial or total rejected load.*

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall initiate a continuation sheet. In Item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transport company used between the generator and the designated facility (except for intermediate rail or barge transporters used between the initial rail or barge carrier and the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may *not be used to list additional waste streams.*

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT (See 49 CFR 172). Enter the required U.S. DOT shipping description including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = *Gallons (liquids only)*
P = Pounds
T = Tons (2000 lb.)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000379

Item 15. The generator may use this space to indicate special transportation, treatment, storage or disposal information. Import/Export information as noted in the "International Shipment" instructions section is to be completed here.

Item 16. The generator must read, sign, and date in the International Shipments block if they are exporting waste.

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated (or alternate) facility must note in the space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K (specific sources), non-acute F (non-specific sources), and D (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

Mixed Solvents	007L
Waste Gasoline	014L
Crankcase Oil	017L
Solvents and Water Solubles, Oils	019L
Other Oils (Including Petroleum Distillates)	020L
Brine	024L
PCB	026L
Oil and Water (Insoluble Non-Petroleum Base)	027L
Acid Waste	030L

Item J. Enter the address of the facility if the waste is from a site different from the mailing address noted in Item 9. Additional waste numbers from Item I and other pertinent descriptions (i.e., name of consigning party) as required in R299.9304(2).

Item K. Check the applicable box for each waste listed.

INTERNATIONAL SHIPMENTS

Exports: Transporters must sign and enter the date the waste leaves the United States in Item 15. The *primary exporter must identify the point of departure from the United States.**

Imports: Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA *Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111,* must complete the manifest as required in R299.9310.*

**Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders.* Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the *designated facility.*

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

EPA Form 8700-22 (Rev. 9/88) GENERATOR—1ST COPY EQP 511 Rev. 10/

MOR 000380

Manifest Instructions

Please print or type before completing this form. Print with the blue or black ink that will not transfer through the forms. Do not use pencil. A typewriter, computer printer, a fine point pen may also be used. Press down hard as this form is multi-part. Do not use felt tip pens.

This manifest is required by law. It must be prepared whenever hazardous waste is transported, offered for transport, or received by a transporter within the United States. Improper completion of this manifest may result in civil or criminal penalties. Use the continuation sheet (Form 6700-22A) for both state and federal regulated hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations require the use of this manifest for all regulated shipments of liquid industrial waste as defined by Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 40CFR Part 111, R299.9310).

Additional information such as "Rejected Load Procedures", state assigned codes for wastes, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different than the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number (see item 15) for a hazardous material shipment should be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number may be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter should attach additional copies of the manifest sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transporter company used between the generator's site and the designated facility (except for intermediate rail or water shipments used between the initial and final transporters the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT (See 49 CFR 172). Enter the required U.S. DOT shipping description including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

GA = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb.)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

Item 15. Generators may use this space to indicate special transportation, treatment, storage or disposal information as noted in the "Internal and Management" instructions below.

Emergency Telephone Number

Item 17. Enter the name of the person accepting waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. Any additional comments concerning the transportation of the waste should be noted in this space, such as instructions in the event of a rejected load or waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A pre-printed State manifest document number.

Item B - H. May be used differently by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9213 through R299.9216 of Part 111 and 40 CFR Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in item I. In selecting the most appropriate waste number the following hierarchy must be used: Acute waste (including P and acute F) listed wastes, toxic wastes, non-acute F (non-specific source) and K (specific source) listed wastes, state regulated wastes (in the same hierarchy as federally regulated wastes). The Part 121 regulated wastes (Part 111 R299.9223 listed wastes) enter the appropriate code listed below.

[illegible]	[illegible]
[illegible]	044
Crankcase Oil	017
[illegible] Water Sample Only	018
[illegible] Item 11 or Item J	02
[illegible]	022
[illegible]	026
[illegible]	027
Antifreeze	030

Item J. Generators may use this space to indicate the site address if different than the mailing address listed in item 3. Additional waste codes, additional description for a Part 121 waste, or other information such as emergency authority (as required in R299.9310).

Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports. Transporters must sign and enter the date the waste leaves the United States in item 15. The primary exporter must identify the point of departure from the United States.*

Imports. Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA acknowledged Waste Manifest. Any person importing waste (i.e. Importer as defined in Part 111) must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs after importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan where a uniform state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility (and that facility signs and dates the manifest), the canary banded copy will be returned to you. If more than one transporter is used, the canary will be copied and supplied to the previous transporter as proof of the delivery to the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and receiving the manifest as received, give the canary banded copy to the transporter. Retain the gold banded copy for your records. Mail the white copy to the MDEQ no later than the tenth day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

MOR 000381

The public reporting burden for this collection of information is estimated to average 21 minutes for generators, 18 minutes for transporters, and 18 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed at 40 CFR part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C. 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

ALL SPILLS MUST BE REPORTED TO THE MICHIGAN POLLUTION EMERGENCY ALERTING SYSTEM. IN MICHIGAN AT 1-800-292-4706 OR OUT OF STATE AT 517-373-7660 AND THE NATIONAL RESPONSE CENTER AT 1-800-424-8802 24 HOURS PER DAY.

EPA Form 8700-22 (Rev. 3/88) GENERATOR'S COPY

EQP 5110 Rev. 10/9

MOR 000382

General Instructions

Read all instructions before completing this form. This form has been designed for use on a 12 pitch (elite) typewriter/computer printer. A firm point pen may also be used - press down hard. Ensure all copies are legible.

Federal and state regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities to use this form (8700-22) and, if necessary, the continuation sheet (Form 8700-22A) for both inter- and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as regulated in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall initiate a continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transport company used between the generator and the designated facility (except for intermediate rail or barge transporters used between the initial rail or barge carriers and the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT (See 49 CFR 172). Enter the required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

CM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000383

Item 15. The generator may use this space to indicate special transportation, treatment, storage or disposal information. Import/Export information as noted in the "International Shipment" instructions section is to be recorded here.

Item 16. The generator must read, print/type and sign where indicated for the certification statement.

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K (specific sources), non-acute F (non-specific sources) and D (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

Mixed Solvents	007L
Pharmaceutical	014L
Crankcase Oil	017L
Coolants and Water Soluble Oils	018L
Other Oil (Describe in Item 11 or Item J)	021
Brine	022L
PCB	025L
Other wastes (Describe in Item 11 or Item J)	026L
Solvents	027

Item J. Generators are to use this space for the site address if different from the mailing address noted in Item 3, additional waste codes, additional description for Part 121 waste as noted in Item I of these instructions, approval or authorizing authority as required in R299.9304(5).

Item K. Designate specific management method:

Burned for Energy Recovery	B
Conditionally Exempt Small Quantity Generator	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports. Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

***Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.**

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY. Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

March 20, 1998

PHIL MEYER
MOREY CORP
2659 WISCONSIN AVENUE
DOWNERS GROVE, IL 60515

This Generator Approval Notification acknowledges the acceptability of waste material(s) into Michigan Recovery Systems, Inc. (MRSI) and ensures that this facility has the appropriate permit issued by federal and state regulatory agencies to properly transport, treat, and/or disposal of the waste material(s).

Approval Number	Waste Common Name
032217D	FLUX

The Approval(s) listed on the following page(s) are based upon information supplied to MRSI by your company. The generator is ultimately responsible for the accuracy and completeness of the characterization information provided and other information that was provided during the technical approval process. The generator must notify the MRSI Approvals Department immediately upon knowledge of any changes to this information.

The Approval(s) will expire on the date(s) noted on the following page(s). Any new Approvals obtained from MRSI on future business will be valid for a period of one (1) year from the date of issuance. Within 30 days of the Approval Expiration Date, you will be notified of the requirements for recertification.

GENERATOR 1ST. COPY

EQP 5110 Rev. 10/9

MOR 000385

Print or type. (Form designed for use on elite (12-pitch) typewriter.) Type all items in capital letters. Use typewriter, computer printer, a firm point pen or ballpoint pen. Press firmly and print all 5 copies at the same time. Leave blanks only as indicated.

Federal regulations require generators of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities to use this form (8700-22) and if necessary, the continuation sheet (Form 8700-22A) for both interstate and intrastate transport of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as defined by Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR 262, 263, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ) Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used. In which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different than the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where a knowledgeable representative can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number for hazardous waste shipments may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall attach a continuation sheet. In Item L of the continuation sheet, the generator/transporter must sign and date. State manifest number listed in Item A. Every transporter, originally used or prior to the designated facility (except for intermediate rail or barge transporters used between the initial transporter and the designated facility) must be listed. This includes all transporters, owner/operators, and all drivers working for one transporter. Item 5 is to be changed to reflect the above changes. Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the RM box if the waste is a hazardous material regulated by U.S. DOT (see 49 CFR 172). Enter the required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as described in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drums, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll off)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate unit of measure for the quantity listed in Item 13.

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb.)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric Tons (1000 kg)
N = Cubic meters

Item 15. Generator may use this space to list additional descriptions for waste materials listed in Item 11. Treatment, storage or disposal information as noted in the "International Shipment" instructions should be entered here.

Item 16. The ...

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date.

Item 18. Print the name of the person accepting the waste on behalf of the next transporter (if any). That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An entry identifying the waste as listed or characteristic must be made in this space. This should be consistent with the waste description.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A pre-printed State of Michigan manifest document number.

Item B - H. May be left blank for other states.

Item I. For hazardous waste shipments, enter the appropriate hazardous waste number from Rule 9214 of Part 111 Rules of 1994 Administrative Code. If the waste is not hazardous, leave blank. If more than one waste material is listed in Item 11, use the appropriate space to identify the additional numbers. If additional space is required, use a continuation sheet. For Part 121 shipments, the following hierarchy must be used to enter the waste codes: [illegible] For wastes that are not hazardous but are to be managed at a hazardous waste treatment, storage, or disposal facility as listed in Rule 9214 of Part 111 Rules of 1994, as amended, enter the appropriate code listed below:

[illegible]	
[illegible]	
Crankcase Oil	
[illegible]	
[illegible]	
[illegible]	
[illegible]	
[illegible]	

Item K. [illegible]

Item L. [illegible]

Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 13. The primary exporter must identify the point of departure from the United States.*

Imports- Shipments of hazardous and Part 121 regulated wastes must be manifested by a U.S. EPA or Michigan Hazardous Waste Manifest. Any person functioning as the U.S. importer as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs at the port of importing or exporting the waste across U.S. borders. Record the foreign waste shipment document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold (or blue) copies and give the remaining copies to the transporter. Send the white copy to MDEQ [illegible] For shipments of wastes being transported to a designated facility outside of Michigan which are out of state manifests used, mail to the MDEQ a photocopy of the manifest which you have signed into the transporter and mail a photocopy of the out-of-state manifest to the [illegible]

TRANSPORTER: Upon delivery to the designated facility (or alternate facility) and that facility signs and dates the manifest, the canary (yellow) copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging receipt of the shipment by the next transporter. The generator and/or any state with jurisdiction reserves the right to inspect the designated facility.

DESIGNATED FACILITY: [illegible] the manifest as received, give the canary (yellow) copy to the transporter [illegible] Within 30 days after the delivery, send the green copy to the generator.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

WASTE MANAGEMENT DIVISION
MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY
PO BOX 30038
LANSING MI 48909-7538

MOR 000386

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 15 minutes for treatment, storage and disposal facilities. The burden estimate includes reading the regulations. Total response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 5 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Parts 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

EQP 5110 (7-01) Rev. 06/01 — GENERATOR 2ND COPY — EQP 5110 Rev. 10/99

General Instructions

Read all instructions before completing this form. This form has been designed for use on a 12-pitch (pica) typewriter/computer printer. A firm point pen may also be used - press down hard. Ensure all copies are legible.

Federal and state regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage and disposal facilities to use this form (8700-22), and, if necessary, the continuation sheet (Form 8700-22A) for both interstate and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as required in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/swmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall initiate a continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transport company used between the generator and the designated facility (except for intermediate rail or barge transporters used between the initial rail or barge carriers and the designated facility) must be listed. This is not intended to require multiple signatures for multiple drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT. (See 49 CFR 172). Enter the required U.S. DOT shipping description including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb.)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000392

Item 15. The generator may use this space to list any special transportation, treatment, storage or disposal information. "Import/Export information as noted in the "International Shipment" instructions section is to be recorded here.

Item 16. The generator must read, print his/her name, sign and date in the appropriate areas.

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R229.9212 through R229.9216 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item I. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K (specific sources), non-acute F (non-specific sources), and C (other criteria). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

Waste Solvents	007L
Waste Fuel Oil	014L
Crankcase Oil	017L
Coolants and Water Soluble Oils	019L
Other Oils (Describe in Item 11 or Item J)	021L
Brine	022L
PCB	026L
Other Wastes (Describe in Item 11 or Item J)	029L
Antifreeze	030L

Item J. Generators are to use this space for the site address if different from the mailing address noted in Item 3, additional waste codes, additional description for a Part 121 waste as noted in one of these instructions, approval of commingling authority as required in R299.9304(6).

Item K. List any special codes which apply.

Burned for Energy Recovery	B
Conditionally Exempt Small Quantity Generator	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports: Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports: Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

WASTE MANAGEMENT DIVISION

LANSING MI 48909-7538

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2.37), 401 M St., S.W., Washington, D.C. 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 1ST COPY

MOR 000393

EQP 5110 Rev. 10/96

General Instructions

[illegible] before completing this form. This information must be typed or printed using a typewriter/computer printer, a ball point pen may also be used if the form is printed legibly. Illegible forms will not be accepted.

Federal and State regulations require generators and transporters of hazardous waste to use manifests for shipments of hazardous waste to treatment, storage and disposal facilities (TSDFs). Use this form (EQP 8700) and if necessary, the continuation sheet (Form 8700-22A) for both state and industrial hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of out-of-state industrial waste as [illegible] (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, **regarding the use and management of this form (40CFR 440CFR, Part 111, Part 121)**

Additional information such as "Rejected Load Procedures", state specific [illegible] manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http / www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number including area code where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number a state assigned number must be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a third transporter does not have a U.S. EPA assigned number a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall [illegible] continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transport company used between the generator and the designated facility (except for intermediate rail or barge transporters used between transfer facilities) must be listed. This is not intended to require listing of individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter any [illegible] for the waste to be shipped as hazardous materials, as defined by U.S. DOT in the 49 CFR 172. Enter the required U.S. DOT shipping description including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as described in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. **For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.**

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

CM = Metal drums, barrels, kegs
CW = Wooden drums, barrels, kegs
CF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
[illegible]
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. [illegible] for the [illegible] of quantity.

G = Gallons (liquid only)
L = Pounds
T = Tons (2000 lb)
Y = Cubic Yards
[illegible]
K = Kilograms
M = Metric tons (1,000 kg)
N = Cubic meters

Generator Approval Notification

May 20, 1998

Customer: ENVIRONMENTAL WASTE SVCS.

Fax: (630) 365-3112

PHIL MEYER
MOREY CORP
2659 WISCONSIN AVENUE
DOWNERS GROVE, IL 60515

This Generator Approval Notification acknowledges the acceptability of waste material(s) into Michigan Recovery Systems, Inc. (MRSI) and ensures that this facility has the appropriate permit issued by federal and state regulatory agencies to properly transport, treat, and/or disposal of the waste material(s).

Approval Number	Waste Common Name
D15198L	MTS 001 TITRATION SOLUTION

The Approval(s) listed on the following page(s) are based upon information supplied to MRSI by your company. The generator is ultimately responsible for the accuracy and completeness of the characterization information provided and other information that was provided during the technical approval process. The generator must notify the MRSI Approvals Department immediately upon knowledge of any changes to this information.

The Approval(s) will expire on the date(s) noted on the following page(s). Any new Approvals obtained from MRSI on future business will be valid for a period of one (1) year from the date of issuance. Within 30 days of the Approval Expiration Date, you will be notified of the requirements for recertification.

...typewriter/computer printer, a firm point pen may be used. Press clearly and legibly.

...transportation of hazardous waste within the State of Michigan to a treatment, storage, and disposal facilities to use this form (see 40 CFR 262), and, if necessary, the continuation sheet (Form 4700-22A) for both interstate and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as defined in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40 CFR 262, 263, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state approved alternative manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. **The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).**

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency, and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipment may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number must be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall use a continuation sheet. In Item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transport company used between the generating facility and the designated facility (except for intermediate rail or barge transporters used between the initiating transporter and the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT (See 49 CFR 172). Enter the required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drums, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Trucks
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
E = Pounds
T = Tons (2000 lb)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000397

Item 15. Enter the ... code(s) for the waste listed. If none of the listed codes are appropriate, enter "NONE". If more than one code is required, enter the first code in this space and list additional codes in Item K of the continuation sheet.

Ignitable Waste	D001
Corrosive Waste	D002
Spent Acid Solution	D002
Spent Caustic Solution	D002
Spent Halogenated Solvents	F001
Spent Non-Halogenated Solvents	F003
Still Bottoms	F005
Oily Residue	F005
Other Reactive, Toxic, Ignitable or Corrosive Wastes (Describe in Item K)	None

Item 16. Enter the ... code(s) for the waste listed. If none of the listed codes are appropriate, enter "NONE". If more than one code is required, enter the first code in this space and list additional codes in Item K of the continuation sheet.

INTERNATIONAL SHIPMENTS

Exports: Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports: Shipments of hazardous waste and Part 121 regulated waste entering the U.S. require a U.S. EPA or state hazardous waste manifest. Any person functioning as the U.S. importer is defined by Part 111 must complete the manifest as required at R299.9216.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs officials when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates acknowledgment), remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ not later than the ten days of the month following shipment. For shipments of wastes being transported to a designated facility outside of Michigan which do not require a manifest, send a copy to the MDEQ at the point where the shipment leaves the state of initial transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility or other facility, sign and date the manifest, tear off carbon backed copy and return to you. If more than one transporter is used, the manifest must be copied and supplied to the previous transporter to allow for signature of the appropriate party (i.e., initial transporter). The canary banded copy must travel with the manifest until it reaches the designated facility.

DESIGNATED FACILITY: Upon receipt of the waste listed on the manifest as received, give the canary banded copy to the transporter. Within 10 days of receipt of the waste, complete and sign the manifest certification and return the white and canary banded copies to the transporter.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

WASTE MANAGEMENT DIVISION
MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY

LANSING MI 48909-7538

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The annual reporting burden or response for this collection of information is estimated to average 5 minutes for generators, 6 minutes for transporters, and 8 minutes for treatment, storage and disposal facilities. The burden associated with recordkeeping requirements is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C. 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide–LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

HOW MUST THE WASTE BE MANAGED?

MOR 000398

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to th applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Sectio 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.43(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

EPA Form 8700-22 (Rev. 9/88) GENERATOR - 1ST COPY

EQP 5110 Rev. 10/96

MOR 000400

General Instructions

Read all of the instructions carefully before completing this form. This information should be typed or printed using a typewriter/computer printer. A firm point pen may be used if typing is unavailable. Ensure all copies are legible.

Federal and state regulations require generators and transporters of hazardous waste and the owners or operators of hazardous waste treatment, storage, and disposal facilities to use this form (8700-22) and, if necessary, the continuation sheet (Form 8700-22A) for both interstate and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as defined in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number may be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or the 3rd transporter shall use a continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transporter utilized between the generator and the designated facility (except for intermediate rail or barge transporters used between the initial transporter and the designated facility) must be listed. This is not intended to require multiple drivers for a single transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material as defined by U.S. DOT (See 49 CFR 172). Enter the required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in the space including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviation listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below:

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb.)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

Item 15. Generators may use this space to indicate special handling information, additional emergency/Expert information as noted in the "International Shipment" instructions section, or other items.

Item 16. The generator must sign and date.

Item 17. Transporter must acknowledge acceptance of custody of the waste listed on the manifest by signing and entering the date.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the subsequent transporter or designated facility. Enter the date of receipt.

Item 19. All discrepancies noted during shipment, including differences between quantities or types designated in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous waste, list the appropriate waste numbers found in R299.9213 through R299.9214 and Part 111 and 40 CFR Part 261. Use the first two waste numbers to correctly identify the waste, enter the additional waste numbers in the remaining boxes. If more than four waste numbers are required, attach a list including all waste numbers. Non-specific [illegible] waste enter the appropriate code listed below.

[illegible]	007L
[illegible]	008L
Crankcase Oil	017L
[illegible]	018L
[illegible]	019L

INTERNATIONAL SHIPMENTS

Exports: Transporters must sign and enter the date the waste leaves the United States in Item 18. The primary exporter must identify the point of departure from the United States.*

Imports: Shipments of hazardous waste and Part 121 regulated wastes must be accompanied by a U.S. EPA acknowledgment of consent to the shipment of hazardous waste. Any person importing waste into the U.S. (importer as defined in Part 111) must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest to the first transporter. Send one white copy to MDEQ Manifest Unit within thirty (30) days of shipment. For shipments of wastes being transported to a designated facility outside of Michigan, when no out-of-state manifest is used, send the MDEQ a photocopy of the manifest when the shipment leaves the state. Retain a photocopy of the manifest for a period of three (3) years.

TRANSPORTER: Upon delivery to the designated (or alternate) facility and after having signed the manifest, the carrier handed copy will be returned to you. If more than one transporter is used, the manifest is to be signed and left with the next transporter in order. The carrier shall keep a copy of the manifest for a period of three (3) years. The original manifest accompanies the waste to the designated facility.

DESIGNATED FACILITY: Upon receiving the manifest as received, give the [illegible] copy to the [illegible] Manifest Unit no later than the [illegible] day of the month following receipt.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

MOR 000401

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden for this response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The total annual burden of all record keeping & reporting is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

MICHIGAN RECOVERY SYSTEMS, INC
Land Disposal Restriction Notification Form

Generator: Morey Corp. EPA ID #: ILD025415266 Manifest # [illegible]

List the waste codes and check the appropriate box for the waste described on each line of the manifest referenced above

a. D001 (X) Non-Wastewater ( ) Wastewater c. _____ ( ) Non-Wastewater ( ) Wastewa
b. _____ ( ) Non-Wastewater ( ) Wastewater d. _____ ( ) Non-Wastewater ( ) Wastewa

All treatment standards or prohibition levels exceeded by the waste are checked below, with the applicable hazardous waste treatment standards from 268.40 "Treatment Standards for Hazardous Waste".

Check Manifest Line Item #: if Present						Wastewater	Non-Wastewater
11a.	11b.	11c.	11d.	Constituents of Concern	CAS #	mg/l or Technology Code	mg/l or Technology Code
				1. Listed Hazardous Wastes F001,F002,F003,F004, F005-Solvents wastes that contain any of one or more of the following spent solvents:			
___	___	___	___	Acetone	67-94-1	0.28	160

				Waste Code	If applicable Subcategory	Treatment Standard and/or prohibition levels

2. California List Waste This shipment contains hazardous waste subject to additional RCRA Section 3004(d) California List waste treatment standards.

				Liquid waste with PCB's >50 ppm
				Liquid waste that contain halogenated organic compounds (HCC) in total concentrations ≥ 1,000 mg/l or 1000 mg/kg (nonliquids).(INCINERATION) (HOCs found in 40 CFR 268.32, Appendix III)
				Nickel (liquid waste)>134 ppm
				Thallium (liquid waste) >130 ppm

3. Hazardous Waste Characteristics

				No additional hazardous waste characteristics are exhibited by this waste which would require treatment beyond the standards described above.
X				Treatment standards for the additional hazardous waste characteristics exhibited by this waste are indicated below.

J. Additional Descriptions for Materials Listed Above

K. Handling Codes for Wastes Listed Above

15. Special Handling Instructions and Additional Information
Emergency Contact # (630) 964-2300

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR; if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

GENERATOR

TRANSPORTER

FACILITY

ALL SPILLS MUST BE REPORTED TO THE MICHIGAN POLLUTION EMERGENCY ALERTING SYSTEM, IN MICHIGAN AT 1-800-292-4706 OR OUT OF STATE AT 517-373-7660 AND THE NATIONAL RESPONSE CENTER AT 1-800-424-8802 24 HOURS PER DAY.

Read all instructions before completing this form. This form may be typed or printed using ink (black or blue only). A typewriter, computer printer, a firm point pen may also be used - press down hard! Ensure all boxes are legible.

Federal and state regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities use this form (8700-22) and if necessary the continuation sheet (Form 8700-22A) for both interstate and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994 as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as required in Part 121 of Act 451 of 1994 as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall initiate a continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transport company used between the generator and the designated facility (except for intermediate rail or barge transporters used between the initial and last barge carriers and the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT (See 49 CFR 172). Enter the required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as described in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviation listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb.)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000407

Item 15. The generator may use this space to indicate special transportation, treatment, storage or disposal information. Import/Export information as noted in the "International Shipments" section is to be recorded here.

Item 16. The generator must read, print his/her name, sign and date the certification statement.

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item I. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K (specific sources), non-acute F (non-specific sources) and D (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

Mixed Solvents	007L
Petrochemical	014L
Used Waste Oil	017L
Oil/Water Solvents	019L
Coolant (Describe in Item 11 or Item J)	021L
Paint	022L
PCB	026L
Other Wastes (Describe in Item 11 or Item J)	029L
Antifreeze	030L

Item J. Use this space to indicate the site address if different than the mailing address noted in Item 3, add additional waste codes, additional description for a Part 121 waste as noted in Item 11 of these instructions, approval or cross-reference authority as required in R299.9311(5).

Item K. List any specific codes which apply.

Boiler for Energy Recovery	B
Conditionally Exempt Small Quantity Generator	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports: Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports: Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the 1st day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

WASTE MANAGEMENT DIVISION

LANSING MI 48909-7538

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 18 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2.37), 401 M St., S.W., Washington, D.C., 20480 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

EPA Form 8700-22 (Rev. 9/88)

MOR 000408

PR 6110 Rev. 5/95

GENERATOR 1st COPY

READ ALL INSTRUCTIONS BEFORE COMPLETING THIS FORM.

Federal regulations require generators and transporters of hazardous waste and owners and operators of hazardous waste treatment, storage, and disposal facilities to use this form (8700-22) for both inter and intrastate transportation.

State regulations require this manifest to be used for the transportation of (1) all hazardous waste managed under Part 111 of Act 451 of 1994 as amended and (2) all liquid industrial waste (including those reclaimed, or recycled) under Part 121 of Act 451 of 1994 as amended.

Forms can be obtained by calling Michigan Department of Natural Resources (MDNR) Waste Management Division at (517) 373-2730.

GENERATOR INSTRUCTIONS

Item 1. For shipments of regulated quantities of hazardous waste enter your U.S. EPA twelve digit identification number. To receive an EPA ID number, a notification of hazardous waste activity, EPA Form 8700-12, must be submitted to the EPA.

Enter a unique five digit number in the manifest document number space. We suggest that you start with 00001 and progress to 99999.)

For non Act 136 liquid industrial waste only, a Michigan ID number may be used in place of the EPA ID number. To obtain a Michigan ID number call MDNR Waste Management Division at (517) 373-2730.
The Michigan ID Number cannot be used by generators of RCRA hazardous wastes.

Item 2. If a continuation sheet is used, enter the total number of sheets here. If continuation sheet is used only when three or more transporters are used, to illustrate the skip, and in all other cases enter page 1 of 1.

Item 3. Enter your name and mailing address. The address should be the location that will manage the returned manifest forms.

Item 4. Enter a telephone number where someone can be reached 24 hours a day in the event of an emergency.

Item 5. Enter the company name of the first transporter. Do not abbreviate the last.

Item 6. Enter the U.S. EPA or Michigan twelve digit identification number of the first transporter identified in item 5. If the transporter is not a hazardous waste transporter, EPA ID number may be used.

Item 7. Enter the company name of the second transporter that will transport the waste, if applicable.

Item 8. Enter the U.S. EPA or Michigan twelve digit identification number of the second transporter identified in item 7.

If three or more transporters are used, you must use an EPA form, 8700-22A continuation sheet to identify an additional transporters. **This is the only situation where a continuation sheet is to be used.** You must indicate the transporter's company name and U.S. EPA or Michigan twelve-digit identification number in items 24-27 on the continuation sheet.

Photo copy the continuation sheet and distribute copies just as you do the manifest. Also place the manifest document number from item A of page 1 in item L of the continuation sheet in addition to proper signatures where needed, these are the only items to be completed on the continuation sheets.
NOTE: Every transporter used between the generator and the designated facility must be listed.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest. The address must be the site address. It may differ from the company mailing address.

Item 10. Enter the U.S. EPA or Michigan twelve digit identification number of the designated facility identified in item 9.

Item 11. Enter an X in the RM box if the waste is a hazardous material regulated by U.S. DOT (see 49 CFR 172.201).

Enter the U.S. DOT Proper Shipping Name, Hazard Class and the DOT ID (UN/NA) number for each waste as identified in 49 CFR 171 through 177, and 179, when required.

If you need space to list additional waste types use extra manifests to complete the waste listings for your shipment. Each manifest used should be completed in its entirety. You may not use continuation sheets for additional waste shipments.

WASTE BEING TRANSPORTED TO AN OUT-OF-STATE FACILITY MUST BE PROPERLY CHARACTERIZED TO DETERMINE IF IT IS A HAZARDOUS WASTE IN THAT STATE. ANY WASTE WHICH IS DETERMINED TO BE A HAZARDOUS WASTE IN THE RECEIVING STATE MUST BE APPROPRIATELY IDENTIFIED IN ITEM J.

Item 12. Enter the number of containers for each waste and the appropriate abbreviation for the type of container.

DM	= Metal drums, barrels, kegs	OT	= Dump truck
DW	= Wooden drums, barrels, kegs	CY	= Cylinders
DF	= Fiberboard or plastic drums, barrels, kegs	CM	= Metal boxes, cartons, cases (including roll-offs)
TP	= Tanks portable	CW	= Wooden boxes, cartons, cases
TT	= Cargo tanks (tank trucks)	CF	= Fiber or plastic boxes, cartons, cases
TC	= Tank cars (railroad cars)	BA	= Burlap, cloth, paper or plastic bags

Item 13. Enter the total quantity of waste described on each line. Use whole numbers only, do not use decimal numbers or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure.

G	= Gallons (liquids only)	L	= Liters (liquids only)
P	= Pounds	K	= Kilograms
T	= Tons (2000 lbs.)	M	= Metric tons (1000 kg)
Y	= Cubic yards	N	= Cubic meters

Item 15. Indicate any special transportation, Bill of Lading, treatment, storage or disposal information. For shipments of hazardous waste from the U.S. destined for treatment, storage or disposal outside the jurisdiction of the United States, generators must enter the point of departure (City and State).

Item 16. The generator must read, sign (by hand) and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted directly below the lined out word. If another mode in addition to the highway mode is used, enter the appropriate additional mode (e.g., and rail) in the space location.

Item A. Michigan has preprinted the State manifest document number(s) to assure a unique number for each manifest.

Items B – H. Not required to be completed under Michigan law. This information may be required by the generator state if the waste was generated in a state other than Michigan.

Item I. For hazardous wastes, enter the hazardous waste number R299.9213 thru R299.9214 of the Michigan Administrative Code, or 40 CFR 261. If more than one waste number is required to adequately identify the waste enter additional numbers in item J. For liquid industrial wastes which are not regulated by RCRA or Part 111 of Act 451, 1994, as amended, enter the most appropriate waste numbers from Table I listed in these instructions.

N/H Column

For each waste listed, put an N in this column if the waste is a liquid industrial waste or a non-regulated hazardous waste. Put an H in this column if the waste is a regulated hazardous waste under RCRA or part 111.

Item J. Indicate any safety precautions and describe the properties of the waste not identified (e.g., Poison, Hazard class). Include all additional hazardous waste numbers applicable to the wastes listed in item I. If the waste is a mixture of several listed hazardous wastes, list all the appropriate waste numbers of each component. Also include treatment standards to restrict waste from land disposal (if applicable).

Item K. For each hazardous waste in item 13, describe the specific waste that falls in the following categories by listing the letter preceding the following categories from the list in the small lightly lined area on the right side of this box. For example, if item 1 is a waste listed as S, enter the letter S in the corresponding lines in the right hand side of item K. For liquid industrial wastes, the primary authority for these categories:

C	= Conditionally Exempt Small Quantity Generator	F	= Liquid Chemical
H	= Household Wastes	I	= RCRA Listed Waste (40 CFR 261.33)
M	= Mix Combined Commingled	U	= Superfund Cleanup
R	= Recycled, Reclaimed, Used or Reused	X	= Act 307 Site
S	= Small Quantity Generator		

Distribution of Manifest

Before removing any copies, verify that all necessary information has been entered and that the necessary signatures affixed.

After the transporter signs and dates the manifest to verify receipt of the waste (retain the top pink/white) and bottom (goldenrod) copies of the manifest and give the balance of the manifest to the transporter. If more than one transporter will be used, you must give a photo copy of the manifest to each additional transporter.

Where more than two transporters have been used, a continuation sheet must be used. A copy of each continuation sheet must accompany each copy of the manifest and be distributed in accordance with these instructions.

Send the white copy to the DNR no later than the 10th day of the month following shipment. The blue copy signed by the disposal facility and returned to you must be retained for three years.

For shipments from non-Michigan generators, the generator must send a photo copy of the manifest to the regulatory agency of the generator state when so required. An additional copy must also be provided to the transporter for submittal by the TSDF to the regulatory agency of the generator state when so required by the generator state.

Nondeliverable Wastes

If an emergency prevents a transporter from delivering the generator's shipment to the designated treatment, storage or disposal facility, the transporter will call the generator asking for information on an alternate facility that can accept the waste. The generator shall either designate another facility, or instruct the transporter to return the waste.

TABLE I (For use with wastes regulated under Part 121 of Act 451, 1994 as amended only)

Liquid wastes which have been evaluated and found to fall outside of RCRA or Part 111 of Act 451, 1994, as amended, regulations should be manifested using these numbers.

Waste	Waste No.	Waste	Waste No.
Acid Solution	001L	Crankcase Oil	017L
Alkaline Solution	002L	Cutting Oil	018L
Etching Fluids	003L	Coolants and Water Soluble Oil	019L
Plating Wastes	004L	Lubricating Oil	020L
Halogenated Solvents	005L	Other Oil	021L
Non-Halogenated Solvents	006L	Brine	022L
Mixed Solvents	007L	Drilling Muds (Gas and Oil Operations)	023L
Peroxides	008L	Oil Field Tank Bottoms	024L
Papermill Wastes	009L	Mixed Oil Residue	025L
Ink Residues	010L	PCB, PBB contaminated Materials	026L
Paint and Pigments Residue	011L	Radioactive Residues	027L
Resin Residues	012L	Food Processing Wastes	028L
Herbicide Residues	013L	Other Wastes (Describe in Item J)	029L
Pharmaceutical Wastes	014L		
Carcinogens, Amides, Mercaptans	015L		
Plasticizers, Resins, Monomers, Elastomers	016L		

TRANSPORTER INSTRUCTIONS

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. Print, if applicable, the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

International Shipments

Exports – You must sign and enter the date the waste left the United States in item 15.

Imports – Shipments of hazardous waste regulated by RCRA and transported into the United States from another country must, upon entry, be accompanied by the U.S. EPA or Form Hazardous Waste Manifest.

If you transport hazardous waste into the United States from another country, you are responsible for completing the generator portion of the manifest (40 CFR 263.10(e)(1)).

Distribution of Manifest

Upon delivery of the shipment to the TSDF, give the remaining copies of the manifest to the TSDF representative. The TSDF representative must sign and date the manifest upon acceptance of the waste and return the canary copy of the manifest to you.

Nondeliverable Waste

When an emergency prevents delivery of the waste to the designated facility, the transporter shall call the generator to obtain the name of an alternate TSDF. The generator shall either designate another facility or instruct the transporter to return the waste.

The transporter shall legibly print the name and phone number of the person at the generator facility who provided information to the transporter in the comments section.

TREATMENT, STORAGE, OR DISPOSAL FACILITY INSTRUCTIONS

Item 19. An authorized representative of the designated (or alternate) facility must note in this space any significant discrepancy in the waste shipment as defined in 40 CFR 264.72.

If significant discrepancies cannot be resolved within 15 days of receiving the waste, you must submit your U.S. EPA Regional Administrator a letter with a copy of the manifest describing the discrepancy and attempts to reconcile it (40 CFR 264.72 and 265.72). A copy of this letter should also be submitted to the Michigan Department of Natural Resources to the address in these instructions.

Item 20. Print or type the name of the person accepting the waste on behalf of the TSDF. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Distribution of Manifest

Return the canary copy of the manifest to the transporter, send the blue copy to the generator, and the pink copy to the MDNR (no later than the 10th day of the month following shipment). Retain the green copy for your records.

A photo copy may be required by the regulatory agency of an out-of-state generator.

Rejected shipments – retain the **unsigned** green copy and return the remaining copies of the manifest to the transporter.

ADDRESS ALL MDNR MANIFEST COPIES TO:

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 2nd COPY

PR 5110 Rev. 5/95

READ ALL INSTRUCTIONS BEFORE COMPLETING THIS FORM.

Federal regulations require generators and transporters of hazardous waste and owners and operators of hazardous waste treatment, storage and disposal facilities to use this form (8700-22) for both inter and intrastate transportation.

State regulations require this manifest to be used for the transportation of: (1) all hazardous waste managed under Part 111 of Act 451 of 1994, as amended and (2) all liquid industrial waste (including those reclaimed or recycled) under Part 121 of Act 451 of 1994, as amended.

Forms can be obtained by calling Michigan Department of Natural Resources (MDNR) Waste Management Division at (517) 373-2730.

GENERATOR INSTRUCTIONS

Item 1. Enter the name, mailing address, and telephone number of the generator. Enter the U.S. EPA twelve digit identification number. If you are a CESQG in addition to the location of the hazardous waste activity, EPA Form 8700-12 must be submitted to the EPA.

Enter a unique eight digit number in the manifest document number space. We suggest that you start with 0001, and increase it serially.

For all Act 136 liquid industrial waste only, a Michigan 14 digit ID number may be used in place of the EPA ID number. To obtain a Michigan ID number call MDNR Waste Management Division at (517) 373-2730.

The Michigan ID Number cannot be used by generators of RCRA hazardous waste.

Item 2. If a continuation sheet is used, the total number of pages used to complete this manifest must be entered in item 2. Enter the page number of each page in the upper right corner (for example, page 1 of 1).

Item 3. Enter the name and mailing address of the facility to manage the returned manifest forms.

Item 4. Enter the telephone number of the person who can be contacted in the event of an emergency.

Item 5. Enter the total number of the first transporter(s) that will handle the waste.

Item 6. Enter the U.S. EPA or Michigan twelve digit identification number of the first transporter identified in item 5. If the shipment is hazardous waste only, the EPA ID number must be used.

Item 7. Enter the company name of the second transporter that will transport the waste, if applicable.

Item 8. Enter the U.S. EPA or Michigan twelve digit identification number of the second transporter identified in item 7.

If three or more transporters are used, you must use a U.S. EPA Form 8700-22A continuation sheet to identify additional transporters. **This is the only situation where a continuation sheet is to be used.** You must indicate the transporter's company name and U.S. EPA or Michigan twelve digit identification number in items 24-27 on the continuation sheet.

Photo copy the continuation sheet and distribute copies with the manifest. Also place the manifest document number from item A of page 1 in item L of the continuation sheet in addition to proper signatures where needed, these are the only items to be completed on the continuation sheets.

NOTE: Every transporter used between the generator and the designated facility must be listed.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest. The address must be the site address which may differ from the company mailing address.

Item 10. Enter the U.S. EPA or Michigan twelve digit identification number of the designated facility identified in item 9.

Item 11. Enter the U.S. DOT description of the waste (hazardous material regulated by U.S. DOT - see 49 CFR 172.101).

Enter the U.S. DOT Proper Shipping Name, Hazard Class, and the UN/NA number for each hazardous waste as identified in 49 CFR 171 through 177, and IRC when required.

If you need space to list additional waste types use extra manifests to complete the waste listings for your shipment. Each manifest used should be completed in its entirety. You may not use continuation sheets to list additional waste shipments.

WASTE BEING TRANSPORTED TO AN OUT-OF-STATE FACILITY MUST BE PROPERLY CHARACTERIZED TO DETERMINE IF IT IS A HAZARDOUS WASTE IN THAT STATE. ANY WASTE WHICH IS DETERMINED TO BE A HAZARDOUS WASTE IN THE RECEIVING STATE MUST BE APPROPRIATELY IDENTIFIED IN ITEM J.

Item 12. Enter the number of containers for each waste and the appropriate abbreviation for the type of container.

- DM = Metal drums, barrels, kegs
- DW = Wooden drums, barrels, kegs
- DF = Fiberboard or plastic drums, barrels, kegs
- TP = Tanks portable
- TT = Cargo tanks (tank trucks)
- TC = Tank cars (railroad cars)
- DT = Dump truck
- CY = Cylinders
- CM = Metal boxes, cartons, cases (including roll-offs)
- CA = Wooden boxes, cartons, cases
- CF = Fiber or plastic boxes, cartons, cases
- BA = Burlap, cloth, paper or plastic bags

Item 13. Enter the total quantity of waste described on each line. Use whole numbers only, do not use decimal numbers or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure.

- G = Gallons (liquids only)
- P = Pounds
- T = Tons (2,000 lbs.)
- Y = Cubic yards
- L = Liters (liquids only)
- K = Kilograms
- M = Metric tons (1000 kg)
- N = Cubic meters

Item 15. Indicate any special transportation, Bill of Lading, treatment, storage, or disposal information. For shipments of hazardous waste from the U.S. destined for treatment, storage or disposal outside the jurisdiction of the United States, generators must enter the point of departure (City and State).

Item 16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word highway should be lined out and the appropriate mode (rail, water or air) entered in the space below the lined out word. If another mode in addition to the highway mode is used, enter the appropriate additional mode (e.g., and rail) in the space provided.

Item A. Michigan has preprinted the State of Michigan document numbers to assist in issuing a unique number for each manifest.

Items B - H. Not required to be completed unless Michigan is the final destination of the waste or required by the generator state. If the waste was generated in a state other than Michigan:

Item I. For hazardous wastes enter the hazardous waste number from R299.9212 to R299.9214 of the Michigan Administrative Code or 40 CFR 261 in the state hazardous waste number column followed by identification code. Also enter additional numbers to identify liquid industrial wastes which are not regulated by RCRA, but Part 121 of Act 451, 1994, as amended. See the table on page 4 of these instructions for a listing of wastes listed in these instructions.

N/H Column

For each waste listed, put an asterisk (*) in column H for each hazardous waste listed in the additional state, non-hazardous waste, or Part 121 liquid industrial waste listed in column I. Leave blank if the waste is not regulated as hazardous waste under RCRA or Act 451.

Item J. Indicate any safety precautions and special handling procedures. Enter the DOT hazard class. Include all additional hazardous waste numbers and manifest codes. Enter the total quantity of each waste. If a waste is a mixture of several hazardous wastes, list the hazardous waste numbers in order of predominance of each waste. Also include treatment standards for all hazardous wastes listed in item I.

Item K. For each hazardous waste listed in item I, identify one applicable waste handling code from the following categories by placing the letter preceding the code in the corresponding space (item K1 for the first waste listed in item I, item K2 for the second waste listed in item I, etc.). Enter the appropriate code in the corresponding lines in the right hand side of item K. Do not enter more than one code per waste listed.

- T = Tolling Agreement (Generator Retains Title)
- W = Wastewater Treatment
- D = Disposal
- I = Incineration
- E = Energy Recovery
- R = Recycled/Reclaimed
- U = Used Oil Burned for Energy Recovery
- X = Other (Specify)

Authorized Exempt Small Quantity Generator Waste Codes:

- C = Conditionally Exempt Small Quantity Generator
- H = Household Wastes
- M = Mix (Combined Commingled)
- S = Small Quantity Generator

Distribution of Manifest

Before removing any copies verify that all necessary copies have been filled out and the necessary signatures affixed.

After the transporter signs and dates the manifest, remove the orange (Pink) and bottom (goldenrod) copies of the manifest and leave the balance of the manifest with the transporter. If more than one transporter will be used, you must ensure that a copy of the manifest is left with each additional transporter.

Where more than two transporters have been used, the continuation sheet must be signed. A copy of each continuation sheet must accompany each copy of the manifest and be distributed in accordance with these instructions.

Send the white copy to the MDNR no later than 30 days from the date of shipment. Retain the blue copy signed by the disposal facility and returned to you with the shipment for your records.

For shipments from non-Michigan generators, one additional copy of the manifest to the regulatory agency of the generator state when so required. An additional copy must also be provided to the transporter for submittal by the TSDF to the regulatory agency of the generator state when so required by the generator state.

Nondeliverable Wastes

If an emergency prevents a transporter from delivering the generator's shipment to the designated treatment, storage, or disposal facility, the transporter will call the generator asking for information on an alternate facility that can accept the waste. The generator shall either designate another facility or instruct the transporter to return the waste.

TABLE I (For use with wastes regulated under Part 121 of Act 451, 1994 as amended only)

Liquid wastes which have been evaluated and found to fall outside of RCRA or Part 111 of Act 451, 1994, as amended, regulations should be manifested using these numbers.

Waste	Waste No.	Waste	Waste No.
Acid Solution	001L	Crankcase Oil	017L
Alkaline Solution	002L	Cutting Oil	018L
Etching Fluids	003L	Coolants and Water Soluble Oil	019L
Plating Wastes	004L	Lubricating Oil	020L
Halogenated Solvents	005L	Other Oil	021L
Non-Halogenated Solvents	006L	Brine	022L
Mixed Solvents	007L	Drilling Muds (Gas and Oil Operations)	023L
Peroxides	008L	Oil Field Tank Bottoms	024L
Paperoil Wastes	009L	Mixed Oil Residue	025L
Ink Residues	010L	PCB, PBB contaminated Materials	026L
Paint and Pigments Residue	011L	Radioactive Residues	027L
Pesticide Residues	012L	Food Processing Wastes	028L
Herbicide Residues	013L	Other Wastes (Describe in Item J)	
Pharmaceutical Wastes	014L		
Laxatives, Amides, Mercaptans	015L		
Plasticizers, Resins Monomers, Elastomers	016L		

TRANSPORTER INSTRUCTIONS

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. Print (if applicable) the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

International Shipments

Exports - you must sign and enter the date that you leave the United States in item 21.

Imports - shipments of hazardous waste regulated under RCRA and transported into the U.S. from anothe country must upon entry be accompanied by the U.S. EPA Uniform Hazardous Waste Manifest.

If you transport hazardous waste into the United States from another country, you are responsible for completing the generator portion of the manifest (40 CFR 262.21).

Distribution of Manifest

Upon delivery of the shipment to the TSDF, give the remaining copies of the manifest to the TSDF representative. The TSDF representative must sign and date the manifest upon acceptance of the waste, return the yellow copy of the manifest to you.

Nondeliverable Waste

If an emergency prevents delivery of the waste to the designated facility, you must contact the generator to obtain the name of an alternate TSDF. The generator shall either designate another facility or instruct the transporter to return the waste.

The transporter shall notify the name and phone number of the person at the generator to whom such information is to be transmitted in the manifest section.

TREATMENT, STORAGE, OR DISPOSAL FACILITY INSTRUCTIONS

Item 19. An authorized representative of the designated facility must note in this item any significant discrepancy in the waste shipment as defined in 40 CFR 264.72.

Any significant discrepancies cannot be resolved within 15 days of receiving the waste, you must submit to the U.S. EPA Regional Administrator a letter with a copy of the manifest document describing the discrepancy and attempts to reconcile it (40 CFR 264.72 and 265.72). A copy of the letter should also be sent to the Michigan Department of Natural Resources at the address in these instructions.

Item 20. Print or type the name of the person accepting the waste on behalf of TSDF. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Distribution of Manifest

Return the canary copy of the manifest to the transporter, send the blue copy to the generator, and the pink copy to the MDNR (no later than the 10th day of the month following shipment). Retain the green copy for your records.

A photo copy may be required by the regulatory agency of an out-of-state generator.

Rejected shipments - retain the **unsigned** green copy and return the remaining copies of the manifest to the transporter.

ADDRESS ALL MDNR MANIFEST COPIES TO:

EPA Form 8700-22 (Rev. 9/88)

GENERATOR 1ST COPY

EQP 5110 Rev. 10/96

...typewriter/computer printer, a firm point pen may be used. ...

...State regulations require the use of this manifest for all regulated shipments of liquid industrial waste as defined by Part ... of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR 262 Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state ... forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be returned. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency ... (Part 111, Part 121).

NOTE: The 24 hour emergency phone number required for Part 121 state ... number may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA ... a state assigned number may be used.

Item 7. If using a second transporter, enter the ... company name.

Item 8. Enter the second transporter's U.S. EPA ... For Part 121 manifested shipments where a transporter does not have a U.S. EPA ... a state assigned number is to be used.

NOTE: If more than two transporters are ... the generator must use ... sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every ... facility (except for intermediate rail or barge ... the designated facility) must ... drivers working for one transporter. Item 2 is to be changed to reflect the additional ... sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an ... HM box if the waste is a hazardous material ... Enter the required ... Class or Division Number ... Additional information may also be required in this space including technical name and ... quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviation listed below for the type of container. Each container type requires separate entry.

CM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Trucks
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line ... specified in Item 12.

Item 14. ... the appropriate ... Ton, Yard, ... quantity.

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000413

Item 15. ... may use this space to indicate special ... storage or ... Enter information as ... the transporter ... instructions ...

...

Item 17. ... must acknowledge acceptance of the waste described on the manifest by signing and ...

Item 18. If applicable, print the name of the person accepting the waste on behalf of the ... Transporters ... quantities of the waste described on the manifest by signing and ... the date of receipt.

Item 19. ... shipments.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejection.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A pre-printed State manifest document number.

Item B - H. May be used by the state.

Item I. ... appropriate identification number listed in R299.9306 ... waste number the following hierarchy must be used: ... waste number, P and ... waste F ... waste ... the same ... by as follows: ... wastes enter the ... code listed below.

Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 18. The primary exporter must identify the point of departure from the United States.*

Imports- ... must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to the U.S. ... importing or exporting the waste across U.S. borders. Record the foreign waste manifest document ...

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and ... manifest) remove the white and gold banded copies and give the remainder of the manifest consisting of the transporter. Retain the white copy (MDEQ ... copy) for ... shipment. For shipments of waste ... to a designated facility or those of Michigan origin which ... out-of-state manifest is used, ... the MDEQ a photocopy of the manifest when the shipment ... into transportation and mail a photocopy of the second gold banded copy when received.

TRANSPORTER: Upon delivery to the designated facility, ... and date the manifest. The canary banded copy will be returned to you. If more than one transporter is used, the ... will be copied and signed by the previous transporter acknowledging receipt of the shipment by that transporter. The canary banded copy stays with the waste ... until it reaches the designated facility.

DESIGNATED FACILITY: ... receiving the manifest as required, give the ... copy to the ... transporter.

LANSING MI 48909-7538

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden for response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 0 minutes for treatment, storage and disposal facilities. The ... is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C. 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR; if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

EPA Form 8700-22 (Rev. 2-98) GENERATOR, 2ND COPY

EQP 5110 Rev. 10/96

General Instructions

Read all instructions before completing this form. This form has been designed for use on a typewriter/computer printer. A ball point pen may also be used. Press down hard. Ensure all copies are legible.

Federal and state regulations require generators and transporters of hazardous waste, owners or operators of treatment, storage, and disposal facilities to use this form (8700-22) and, if necessary, the continuation sheet (Form 8700-22A) for both interstate and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as regulated by Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, 46CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used, in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) at which an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall initiate a continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in item A. Every transporter company used between the generator and the designated facility (except for intermediate rail or barge transporters used between the initial rail or barge carriers and the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a *hazardous material regulated by U.S. DOT.* (See 49 CFR 172). Enter the *required* U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity *references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.*

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drum, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
P = Pounds
T = Tons (2000 lb.)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000419

Item 15. The generator may use this space to indicate special transportation, treatment, storage or disposal information. Import/Export information as noted in the "International Shipments" instructions section is to be completed here.

Item 16. The generator must print/type the name, sign and date the certification statement.

Item 17. Transporter acknowledgment of receipt of materials. First transporter must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the next (alternate) facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K (specific source), non-acute F (non-specific sources), and D (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below:

Mineral Oil Wastes	03PL
Petroleum Distillate	04PL
Crude Oil	07PL
Oil Spills and Water Soluble Oils	11PL
Waste Oil (Specify in Item 11 of Manifest)	01PL
Brine	02PL
PCB	05PL
Other Wastes (Specify in Item 11 of Manifest)	10PL
Paint Waste	09PL

Item J. Enter any additional state waste codes in the shaded area. If more than one waste is listed in Item I, the first waste listed must be the waste with the highest disposal volume. Additional descriptions for wastes listed in Item I, such as proper shipping names, hazard classes, and packing groups (if any) may be entered in this item. Enter the appropriate identification number for each facility to which you plan to transport hazardous waste for treatment, storage, or disposal. For facilities outside the U.S., enter the name of the country. Enter the appropriate state waste codes for the waste listed in Item I. Enter the DOT description (proper shipping name, hazard class, ID number) for each waste listed in Item I. For rejected loads, enter the new manifest tracking number. For imported shipments, enter the port of entry. For exports, enter the point of exit (city and state). For discrepancies, enter the quantity, type, and residue difference between quantity received and quantity shipped. Enter any special handling instructions for the waste, including the emergency response phone number and any additional comments concerning the shipment. For hazardous waste treatment, storage, or disposal facilities in Michigan, enter the applicable waste management method code(s) as listed in Part 111 hazardous waste management facility operating licenses. Enter the DEQ/EPA waste code for each waste listed. For imported shipments, enter the name and site address (if available) of the foreign generator. Enter any special waste codes associated with the waste. For Part 121 wastes, enter the appropriate waste management code(s) listed below. For imported shipments, enter the name and site address (if available) of the foreign generator. Enter any special waste codes associated with the waste. For Part 121 wastes, enter the appropriate waste management code(s) listed below.

Burned for Energy Recovery	B
Completely Exempt Small Quantity Generator	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports - Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure from the United States.*

Imports. Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY. Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

This agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Chief, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, D.C. 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

EPA Form 8700-22 (Rev. 9/88) [illegible] GENERATOR 1ST COPY

MOR 000420

EQP 5110
Rev. 10/96

General Instructions

[illegible] hazardous waste generated, transported, treated, stored, or disposed of within the United States, except waste produced by a farmer, rancher, or private [illegible] a farm property [illegible] the [illegible] waste.

[illegible] hazardous waste treatment, storage, and disposal facilities to use this form to manifest hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated liquid industrial waste as defined in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR 262-265, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state [illegible] and other manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ) Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used. If so, record the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation differs from the mailing address record the site address in Item J.

Item 4. Enter a telephone number [illegible] where [illegible] can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number [illegible] different from the generator's phone number.

Item 5. Enter the company name of the first transporter that will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number may be used.

Item 7. If using a second transporter, [illegible].

Item 8. Enter the second transporter's [illegible]. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall [illegible] continuation sheet. In Item L of the continuation sheet, the generator/transporter must copy the Shipment Document number listed in Item A. Every transporter [illegible] between the generator's property and the designated facility (except for intermodal shipments) must sign and date [illegible] the designated facility must sign and date [illegible] drivers working for one transporter. Item J is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. [illegible] Part 121 regulated wastes [illegible] Shipping Name, Hazard Class, ID Number, and Packing group for each waste as defined in 49 CFR 172. Additional information may also be listed in this space, including federal, state and facility waste reference. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
WD = Wooden drums, barrels, kegs
FB = Fiberboard or plastic drums, barrels, kegs
DW = Dump Truck
TP = Tanker, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll offs)
CW = Wooden boxes, cartons, cases
CF = Fiberboard or plastic boxes, cartons, cases
BA = Burlap, cloth, paper or plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the [illegible] for the quantity listed in Item 13.

G = Gallons (liquids only)
B = Barrels
T = Tons (2000 lbs)
Y = Cubic yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000421

[illegible] Transporter [illegible] transportation, treatment, storage or disposal. Enter information as noted in the "International Shipment" instructions.

Item 16. Date

[illegible] accepting the waste listed on the first page of the manifest. They must acknowledge acceptance of the waste described on the manifest by signing and dating [illegible].

Item 17. [illegible] the name of the person accepting the waste on behalf of the [illegible] acknowledging the date received.

Item 18. [illegible] the manifest [illegible] for [illegible] Shipments, the [illegible].

Item 20. Enter the [illegible] of the person accepting the waste on behalf of the designated facility. That person is to acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. As assigned State's first facility number.

15. Special Handling Instructions and Additional Information
Emergency Contact # (630) 964-2300

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR; if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

EPA Form 8700-22 (Rev. 9/88) [illegible] EQP 5110 Rev. 10/96

General Instructions

Read all instructions before completing this form. This form has been designed for use on a 12 pitch (elite) typewriter/computer printer. A ten point pen may also be used. Press down hard. Ensure all copies are legible.

Federal and State regulations require generators and transporters of hazardous waste and owners or operators of treatment, storage and disposal facilities to use this form (8700-22) and, if necessary, the continuation sheet (Form 8700-22A) for both interstate and intrastate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as required in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 42CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deq.state.mi.us/wmd or you may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial manifest page, should be shown.

Item 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper is often different from the generator's phone number.

Item 5. Enter the company name of the first transporter who will transport the waste.

Item 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 7. If using a second transporter, enter the company name.

Item 8. Enter the second transporter's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a transporter does not have a U.S. EPA assigned number, a state assigned number is to be used.

NOTE: If more than two transporters are used, the generator or third transporter shall initiate a continuation sheet. In Item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transporter company used between the generator and the designated facility (except for intermediate rail or barge transporters used between the initial rail or barge carriers and the designated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Item 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT. (See 49 CFR 172). Enter the required U.S. DOT shipping description including Proper Shipping Name, Hazard Class or Division, ID Number (UN/NA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry.

DM = Metal drums, barrels, kegs
DW = Wooden drums, barrels, kegs
DF = Fiberboard or plastic drums, barrels, kegs
DT = Dump Truck
TP = Tanks, portable
TT = Cargo tanks (tank trucks)
TC = Tank cars
CY = Cylinders
CM = Metal boxes, cartons, cases (including roll-offs)
CW = Wooden boxes, cartons, cases
CF = Fiber or plastic boxes, cartons, cases
BA = Burlap, cloth, paper/plastic bags

Item 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions.

Item 14. Enter the appropriate abbreviation for the unit of measure listed below.

G = Gallons (liquids only)
P = Pounds
T = Tons (2,000 lb)
Y = Cubic Yards
L = Liters (liquids only)
K = Kilograms
M = Metric tons (1000 kg)
N = Cubic meters

MOR 000423

Item 15. The generator may use this space to indicate special transportation, treatment, storage or disposal information. Import/Export information as noted in the "International Shipment" instructions should be recorded here.

Item 16. The [illegible] the name [illegible]

Item 17. Print the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 19. An authorized representative of the designated facility must note in this space any discrepancy in the waste shipment.

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load rejections.

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number.

Item B - H. May be required by other states.

Item I. For hazardous wastes, enter the appropriate waste numbers found in R299.9212 through R299.9214 of Part 111 and 40 CFR 261 Subparts C and D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number, the following hierarchy must be used: acute waste (including P and acute F), U (toxic), K [illegible] acute F (non specific sources), and C (characteristic). State regulated wastes follow the same hierarchy as federally regulated wastes. For Part 121 wastes which are not hazardous wastes, enter the appropriate code listed below.

Used Oil	027
[illegible]	014
Crankcase Oil	017
Petroleum and Synthetic Cutting Oils	[illegible]
[illegible]	021
Brine	022
PCB	026
Other wastes (Describe in Item J of the manifest)	030
[illegible]	031

Item J. [illegible] the name and address of the facility if it is different from the mailing address noted [illegible] Enter the additional waste numbers from Item I of the manifest and any other descriptions required for the waste listed in Item I of these instructions, such as [illegible] (e.g. R299.9304, etc.).

Item K. [illegible]

[illegible]	[illegible]
Conditionally Exempt Small Quantity Generator	C
Emergency Response Cleanup	E
Household Generated	H
Recycled Precious Metals	P
Recycled, Reclaimed, Used or Reused	R
Universal Waste	U

INTERNATIONAL SHIPMENTS

Exports- Transporters must sign and enter the date the waste leaves the United States in Item 15. The *primary exporter must identify the point of departure from the United States.**

Imports. Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA Uniform Hazardous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no later than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy when received.

TRANSPORTER: Upon delivery to the designated (or alternate) facility and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

WASTE MANAGEMENT DIVISION
MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY
PO BOX 30038
LANSING MI 48909-7538

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 5 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2.37), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C. 20503. Include the OMB control number in any correspondence.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: I L D 0 2 5 4 1 1 5 2 6 6

EWR STREAM NO.: 21226 MANIFEST NO.: 1 1 7 2 5 6 6 7 Line No. ☒ 1a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001					
1a. Former USEPA Waste Numbers: (If previously treated to remove hazardous characteristic)						
2. Subcategory:	High TOC Ign. Liq.					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ☒					
4. For F001-F005, D001 (DEACT only), and D012-D043 wastes, list all hazardous constituents.						
5. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (CMBST)	☐					
6. This waste is subject to a treatment standard under 40 CFR 268.40: • Waste Requires Treatment • Waste Does Not Require Treatment	☒ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
7. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)	☐					
8. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(c).	☐					
9. This waste is hazardous debris subject to 40 CFR 268.45. (over 50% of waste is debris)	☐					
10. This waste is subject to an exemption from treatment under: • a national capacity variance • a Case-by-case extension • 40CFR268.6	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐
The exemption expires on:						

ADDITIONAL REQUIREMENTS — Check all that apply, and follow instructions.

☐ APPENDIX IV LAB PACK (Complete Certification 1) ☐ "CALIFORNIA LIST" (Complete Table 2) ☐ HAZARDOUS DEBRIS (Complete Table 3)

☐ WASTE MEETS A TREATMENT STANDARD, AS INDICATED ABOVE IN ROW 6. (Complete Certification 3)

☐ PRESENT OR FORMER D001, D002 OR D012-D043 WASTES. (complete Table 1.)

☐ FORMER D001, D002 OR D012-D043 WASTES WHICH DO NOT MEET UNIVERSAL TREATMENT STANDARDS (complete Certification 2)

☐ This page is a continuation sheet.

TABLE 1 — UNDERLYING HAZARDOUS CONSTITUENTS AS DEFINED IN 40 CFR 268.2(6) AT THE FOLLOWING LEVELS WHICH DO NOT MEETTHE TREATMENT STANDARDS SHOWN IN 40 CFR 268.48 TABLE UIS:

CONSTITUENT	CONCENTRATION	CONSTITUENT	CONCENTRATION	CONSTITUENT	CONCENTRATION

TABLE 2 — "CALIFORNIA LIST" PROHIBITIONS

☐ ≥ 50 PPM PCBs (liquid) ☐ ≥ 134 PPM NICKEL (liquid) ☐ ≥ 130 PPM THALLIUM (liquid) ☐ OTHER (Specify) _____

☐ ≥ 1,000 PPM but< 10,000 PPM Appendix III HOCs and primarily water. *(Only for wastes with no specific Subpart D HOC Treatment Standard)*

TABLE 3 — HAZARDOUS DEBRIS

"This hazardous debris is subject to the alternative treatment standards of 40 CFR 268.45." The contaminants subject to treatment pursuant to 40 CFR 268.45(b) are:

CERTIFICATIONS

1 LAB PACK

"I certify under penalty of law that I personally examined and am familiar with the waste and that the lab pack contains only the wastes that have not been excluded under Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

2 FORMER D001, D002 or D012–D043 WASTES

"I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

4 FORM CERTIFICATION

"I hereby certify that all information supplied above, and attached, is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist."

MOR 000430

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802 or 202/426-2675.

***The Illinois Uniform Manifest** must be used for all shipments of special waste (hazardous [illegible]) shipped, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for [illegible] that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments [illegible] generator's state requires copies of the manifest, a photocopy of part 1 should be used.*

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5, 6, C, D. For the first transporter who will transport the waste, enter the company name, USEPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) Permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7, 8, E, F. If applicable, enter the information requested for the second transporter who will transport the waste.

9, 10, G, H. For the facility designated to receive the waste, enter company name, address, USEPA ID Number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT".

12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container.

CM = Metal boxes or roll offs	DM = Metal drums
CW = Wooden boxes	DW = Wooden drums
CF = Fiberboard or plastic bags	DF = Fiberboard or plastic drums
BA = Burlap, cloth, paper or plastic bags	
CY = Cylinders	TT = Tank Trucks
DT = Dump trucks	TP = Tanks portable
TC = Tank cars	

13. Enter the total quantity of each waste.
14. Enter unit of measure from list below:

G = Gallons	P = Pounds
T = Tons	Y = Cubic Yards
L = Liters	K = Kilograms
M = Metric tons	N = Cubic meters

I. Enter the EPA 4 digit Hazardous Waste Number. If waste is a mixture of listed and characteristic wastes, the listed waste must be entered – other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste. Permit numbers are specific for each waste stream and companies, and are obtained from the receiving facility. (Leave Blank for waste going out of Illinois).

J, K. If needed, enter additional [illegible] for the material listed in Item 11.

15. If needed, list additional transportation [illegible] shipment, storage, or disposal information, Bill of Lading information. For international shipments generators must enter the point of departure (City and State) for shipments destined for treatment, storage or disposal [illegible] the United States in this box.

16. The generator must read, sign (by hand), and date the certification [illegible] If more than one carrier is used, the second [illegible] must read, sign, and date the certification [illegible] another blank manifest [illegible] appropriate additional [illegible].

GENERATOR RETAINS [illegible] USEPA 2 PAGE copy of this manifest for their records.

WASTE 2 PAGE copy [illegible] transporter.

INSTRUCTIONS [illegible] The person accepting the waste on behalf of the treatment [illegible] acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. *Upon delivery of waste to facility, retain Copy 3 and leave remaining copies with the facility owner/operator.*

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE OR DISPOSAL FACILITIES:

19. The authorized treatment, storage or disposal (TSD) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C or D.

20. Print or type name of the person accepting the waste on behalf of the [illegible] facility. That person must sign and [illegible] entering the date of receipt.

Return Copy 3, send Copy 1 to the generator, and send Copy 2 to Illinois EPA within [illegible] delivery.

Public reporting burden for this collection of [illegible] waste is estimated to average [illegible] minutes per response for generators, transporters and owners/operators of treatment, storage, and disposal facilities. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information, including suggestions for reducing this burden to Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC [illegible] and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: I L D 0 2 5 4 1 5 2 6 6

*This Agency is authorized to require, pursuant to Illinois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed $25,000 per day of violation. Falsification of this information may result in a fine up to $50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

COPY 6. GENERATOR'S COPY

MOR 000434

In case of a spill call the Illinois Office of Emergency Response at 217 / 782-7860 and the National Response Center at 800 / 424-8802 or 202 / 426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.

9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM =	Metal boxes or roll-offs	DM =	Metal drums
CW =	Wooden boxes	DW =	Wooden drums
CF =	Fiberboard or plastic bags	DF =	Fiberboard or plastic drums
BA =	Burlap, cloth, paper or plastic bags	CY =	Cylinders
DT =	Dump trucks	TT =	Tank trucks
TC =	Tank cars	TP =	Tanks portable

13. Enter the total quantity (gallons or cubic yards) of each waste.
14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

J,K. If needed, enter additional description or information/instructions for the material listed in item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment storage, or disposal outside the jurisdiction of the United States in this space.
16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Return copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: I L D 0 2 5 4 1 1 5 2 6 6

MOR 000438

In case of a spill call the Illinois Office of Emergency Response at 217 / 782-7860 and the National Response Center at 800 / 424-8802 or 202 / 426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.

9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM =	Metal boxes or roll-offs	DM =	Metal drums
CW =	Wooden boxes	DW =	Wooden drums
CF =	Fiberboard or plastic bags	DF =	Fiberboard or plastic drums
BA =	Burlap, cloth, paper or plastic bags	CY =	Cylinders
DT =	Dump trucks	TT =	Tank trucks
TC =	Tank cars	TP =	Tanks portable

13. Enter the total quantity (gallons or cubic yards) of each waste.
14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

J,K. If needed, enter additional description or information/instructions for the material listed in item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment storage, or disposal outside the jurisdiction of the United States in this space.
16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt.
UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19 The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.

20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: ILD025415266

4. For F001-F005, D001 (DEACT only), and D012-D043 wastes, list all hazardous constituents.						
5. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (CMBST)	☐					
6. This waste is subject to a treatment standard under 40 CFR 268.40: • Waste Requires Treatment • Waste Does Not Require Treatment	☒ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
7. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)	☐					
8. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(c).	☐					
9. This waste is hazardous debris subject to 40 CFR 268.45. (over 50% of waste is debris)	☐					
10. This waste is subject to an exemption from treatment under: • a national capacity variance • a Case-by-case extension • 40CFR268.6	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐
The exemption expires on:						

ADDITIONAL REQUIREMENTS — Check all that apply, and follow instructions.

- ☐ APPENDIX IV LAB PACK (Complete Certification 1) ☐ "CALIFORNIA LIST" (Complete Table 2) ☐ HAZARDOUS DEBRIS (Complete Table 3)
- ☐ WASTE MEETS A TREATMENT STANDARD, AS INDICATED ABOVE IN ROW 6. (Complete Certification 3)
- ☐ PRESENT OR FORMER D001, D002 OR D012-D043 WASTES. (complete Table 1.)
- ☐ FORMER D001, D002 OR D012-D043 WASTES WHICH DO NOT MEET UNIVERSAL TREATMENT STANDARDS (complete Certification 2)

☐ This page is a continuation sheet.

TABLE 1 — UNDERLYING HAZARDOUS CONSTITUENTS AS DEFINED IN 40 CFR 268.2(6) AT THE FOLLOWING LEVELS WHICH DO NOT MEETTHE TREATMENT STANDARDS SHOWN IN 40 CFR 268.48 TABLE UIS:

CONSTITUENT	CONCENTRATION	CONSTITUENT	CONCENTRATION	CONSTITUENT	CONCENTRATION

TABLE 2 — "CALIFORNIA LIST" PROHIBITIONS

☐ ≥ 50 PPM PCBs (liquid) ☐ ≥ 134 PPM NICKEL (liquid) ☐ ≥ 130 PPM THALLIUM (liquid) ☐ OTHER (Specify) _____

☐ ≥ 1,000 PPM but< 10,000 PPM Appendix III HOCs and primarily water. (Only for wastes with no specific Subpart D HOC Treatment Standard)

TABLE 3 — HAZARDOUS DEBRIS

"This hazardous debris is subject to the alternative treatment standards of 40 CFR 268.45." The contaminants subject to treatment pursuant to 40 CFR 268.45(b) are:

_____

_____

CERTIFICATIONS

1 LAB PACK

"I certify under penalty of law that I personally examined and am familiar with the waste and that the lab pack contains only the wastes that have not been excluded under Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

2 FORMER D001, D002 or D012–D043 WASTES

"I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

4 FORM CERTIFICATION

"I hereby certify that all information supplied above, and attached, is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist."

NAME PHIL MYER TITLE _____

SIGNATURE X Phil Myer DATE 3-28-96

This Agency is authorized to require, pursuant to Illinois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed $25,000 per day of violation. Falsification of this information may result in a fine up to $50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

COPY 6. GENERATOR'S COPY

MOR 000442

If there is a spill call the Illinois Office of Emergency Response and the National Response Center at 800/424-8802 or 202/426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and non-hazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for [illegible] not print and supply the form. PMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments [illegible] generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5, 6, C, D. For the first transporter who will transport the waste, enter the company name, USEPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) Permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7, 8, E, F. If applicable, enter the information requested for the second transporter who will transport the waste.

9, 10, G, H. For the facility designated to receive the waste, enter company name, address, USEPA ID Number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT".

12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM = Metal boxes or roll offs	*DM = Metal drums*
CW = Wooden boxes	DW = Wooden drums
CF = Fiberboard or plastic bags	DF = Fiberboard or plastic drums
BA = Burlap, cloth, paper or plastic bags.	
CY = Cylinders	TT = Tank Trucks
DT = Dump trucks	TP = Tanks portable
TC = Tank cars	

13. Enter the total quantity of each waste.

14. Enter unit of measure from list below:

G = Gallons	P = Pounds
T = Tons	Y = Cubic Yards
L = Liters	K = Kilograms
M = Metric tons	C = Cubic meters

I. Enter the EPA 4 digit Hazardous Waste Number. If waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream. These numbers are specific for each waste stream and companies, and are obtained from the receiving facility (leave blank for waste going out of Illinois).

J, K. If needed, enter additional descriptions or [illegible] information/instructions for the material listed in Item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For *international shipments generators must enter the point of* departure (City and State) for shipments destined for treatment, storage or disposal [illegible] the United States in this space.

16. The generator must read, sign (by hand), and date the certification [illegible] If a code other than 1 (light duty) is used, the [illegible] number under which the waste is shipped, enter the appropriate [illegible]

GENERATOR'S [illegible]
WITHIN [illegible]
HAZARDOUS

INSTRUCTIONS [illegible] The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. *Upon acceptance of waste by facility, retain Copy 4 and leave remaining copies with the facility owner/operator.*

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19. The owner/operator of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C or D.

20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.
Retain Copy 3, send Copy 2 to the generator, and send Copy [illegible] within [illegible] days of delivery.

Public reporting burden for this collection of information is estimated to average [illegible] per response, including the time for transporters [illegible] This includes [illegible] completing and [illegible] reducing the burden estimate including [illegible] Policy Branch, PM-[illegible] Protection Agency, 401 M Street SW, Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

COPY 1. TSD MAIL TO GENERATOR

MOR 000444

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.

9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM =	Metal boxes or roll-offs	DM =	Metal drums
CW =	Wooden boxes	DW =	Wooden drums
CF =	Fiberboard or plastic bags	DF =	Fiberboard or plastic drums
BA =	Burlap, cloth, paper or plastic bags	CY =	Cylinders
DT =	Dump trucks	TT =	Tank trucks
TC =	Tank cars	TP =	Tanks portable

13. Enter the total quantity (gallons or cubic yards) of each waste.
14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

J,K. If needed, enter additional description or information/instructions for the material listed in item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.
16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19 The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.

20 Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503

CERTIFICATE OF DISPOSAL

Date: April 4, 1996

Environmental Waste Resources, Inc., herein certifies that the waste identified below has been treated at our facility in Coal City, Illinois.

The material listed below has been treated and/or disposed of in accordance with all applicable Federal, State and Local Regulations. The RCRA handling method(s) as defined in 40 CFR Part 265, Appendix 1, Table 2, Parts 2 & 3 used to manage waste, is herein attested to.

6. For the first transporter who will transport the waste, enter the U.S. EPA ID number, company name, and telephone number. Special Waste Hauling Permit [illegible] number where an authorized agent of the transporter may be reached in the event [illegible].
7. 8. If applicable, [illegible] transporter.
9. E. F. transporter who will transport [illegible].
10. For the facility [illegible]
11. G, H. name, address [illegible] facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
12. Enter the US DOT Proper Shipping Name, Hazard Class and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the general [illegible] that the waste is not hazardous by DOT.
13. Enter the number of [illegible] and the appropriate abbreviations for the type of container:
    DM = Metal boxes or roll-offs; DM = Metal drums
    CW = Wooden boxes [illegible]
    CF = Fiberboard or plastic bags; DF = Fiberboard or plastic drums
    BA = Burlap, cloth [illegible]
    CY = Cylinders [illegible]
    DT = Dump trucks [illegible]
    TC = Tank cars
14. Enter the actual quantity of [illegible]
15. Enter unit of measure [illegible]:
    G = Gallons; P = Pounds
    T = Tons [illegible]
    [illegible]
    MT = Metric tons; [illegible]

Enter the EPA [illegible] of waste in Item 12. If a mixture of listed and [illegible] the listed waste must be entered [illegible] listed in Section I. For nonhazardous special waste, use Class A. Enter the Illinois EPA six digit waste stream permit (authorization) [illegible] these numbers are specific for [illegible] stream and companies, and are obtained from the [illegible] for facilities Class B&C for waste going out of Illinois).

[illegible] the material listed in Item 11.

[illegible] special [illegible] treatment, storage, [illegible] Bill of Lading information. For [illegible] shipments, generators must enter the point of departure (City and State) for shipments destined for treatment [illegible] United States [illegible].

[illegible] must read, sign (by hand) and date the certification [illegible] mode other than highway is used, the [illegible]

[illegible]

[illegible]

INSTRUCTIONS TO TRANSPORTERS

[illegible] person [illegible] on behalf of the transporter must acknowledge receipt of the waste described on the Manifest by signing and entering the date of receipt. *If you deliver the waste to facility, retain one copy and leave remaining copies with the facility owner or operator.*

[illegible]

INSTRUCTIONS TO OWNERS AND OPERATORS OF [illegible] STORAGE, OR DISPOSAL FACILITIES

[illegible] facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.

20. Print or type name of the person accepting the waste on behalf of the owner or operator. That person must acknowledge receipt [illegible] and entering the date of receipt.

Send Copy 3, and Copy 4 to the generator, and send Copy [illegible] to the USEPA within [illegible] days of delivery.

Public reporting burden for this collection of information is estimated [illegible] including the time for reviewing instructions, searching existing [illegible] completing and reviewing the collection of information. Send comments regarding this burden estimate [illegible] Director, Office of Solid Waste (5305), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

This Agency is authorized to require, pursuant to Illinois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed $25,000 per day of violation. Falsification of this information may result in a fine up to $50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

COPY 1. TSD MAIL TO GENERATOR

The Illinois Uniform Manifest *for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or* ***reclaimed in Illinois; and for all shipments originating in Illinois and destined for*** *that do not print and supply the form. PIMW (****Potentially Infectious Medical Waste****) requires a different manifest. The* *generator's state* ***requires copies of the manifest, a photocopy of part 1 should be used.***

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of [illegible] can be reached in the event of an emergency.

B. Enter the generator's [illegible] number.

5, 6, C, D. For the first transporter who will transport the waste, enter the company name, [illegible] Special Waste Hauler [illegible] and telephone number where an authorized agent of the transporter can be reached in the event [illegible].

7, 8, E, F. If applicable, [illegible] transporter who will transport the waste.

9, 10, G, H. For the facility designated [illegible] name, address, [illegible] facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (UN/NA Number) for each waste as identified in 49 CFR 172 through 177 for wastes not regulated as Hazardous Materials by DOT. Enter a description of the waste and the generator's [illegible] for the waste "not hazardous by DOT."

12. Enter the number of containers for each waste and the appropriate abbreviation for the type of container.
   PM = Metal boxes or roll-off; PM = Metal [illegible]
   PW = Wooden [illegible]
   CF = Fiberboard or plastic bags; DF = Fiberboard or plastic drums
   BA = Burlap, cloth, [illegible] bags
   CY = Cylinder; [illegible]
   DT = Dump truck; [illegible]
   TC = Tank cars

13. Enter the total quantity [illegible]

14. Enter unit [illegible]
   G = Gallons; P = Pounds
   [illegible]
   [illegible]
   K = Metric tons; [illegible]

15. Enter the [illegible] waste. If the waste is a hazardous waste, the listed waste must be entered [illegible] listed in Section 11. For nonhazardous special waste, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) [illegible] for the state site [illegible] these numbers are specific for each waste stream and companies, and are obtained from the [illegible] facility. (Unless we are going out of Illinois).

[illegible] for the material listed in Item 11.

[illegible] storage, [illegible] or loading information. For [illegible] must enter the point of departure (City and State) for shipments destined for treatment [illegible] Printed [illegible]

[illegible] must read, sign (by hand) and date the certification [illegible] code other than railway is used, the [illegible]

[illegible]

[illegible]

[illegible] TRANSPORTER

[illegible] on behalf of the transporter must acknowledge receipt of the waste described on the Manifest by signing and entering the date of receipt. *Upon delivery of waste to facility,* [illegible]

INSTRUCTIONS TO OWNERS AND OPERATORS OF [illegible] OR DISPOSAL FACILITIES:

[illegible] facility owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.

20. Print or type name of the person receiving the waste on behalf of the [illegible] facility. That person must [illegible] by signing and entering the date of receipt.

Retain Copy 5, send Copy 4 to the generator, and send Copy 1 [illegible] to the [illegible]

Public reporting burden for this collection of information is estimated to [illegible] hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch (PM-223), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

COPY 1. TSD MAIL TO GENERATOR

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

In case of a Spill, call the ...

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste

9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM =	Metal boxes or roll-offs	DM =	Metal drums
CW =	Wooden boxes	DW =	Wooden drums
CF =	Fiberboard or plastic bags	DF =	Fiberboard or plastic drums
BA =	Burlap, cloth, paper or plastic bags	CY =	Cylinders
DT =	Dump trucks	TT =	Tank trucks
TC =	Tank cars	TP =	Tanks portable

13. Enter the total quantity (gallons or cubic yards) of each waste.
14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

J,K. If needed, enter additional description or information/instructions for the material listed in item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for ... treatment, storage, or disposal outside the jurisdiction of the United States in this space.
16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt.
UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 4, send copy 1 to the generator, and send copy 2 to Illinois EPA within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

In case of a spill call the Illinois Office of Emergency Response at 217 / 782-7860 and the National Response Center at 800 / 424-8802 or 202 / 426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and non-hazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photo-copy of part 1 should be used.

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.

9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste, the generic name of the waste, plus the phrase "not hazardous by DOT."
12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container.

CM =	Metal boxes or roll-offs	DM =	Metal drums
CW =	Wooden boxes	DW =	Wooden drums
CF =	Fiberboard or plastic bags	DF =	Fiberboard or plastic drums
BA =	Burlap, cloth, paper or plastic bags	CY =	Cylinders
DT =	Dump trucks	TT =	Tank trucks
TC =	Tank cars	TP =	Tanks portable

13. Enter the total quantity (gallons or cubic yards) of each waste
14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

J,K. If needed, enter additional description or information/instructions for the material listed in item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment storage, or disposal outside the jurisdiction of the United States in this space.
16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner or operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: I L D 0 2 5 4 1 5 2 6 6

EWR STREAM NO.: 21226 MANIFEST NO.: IL 6648118 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001					
1a. Former USEPA Waste Numbers: (if previously treated to remove hazardous characteristic)						
2. Subcategory:	High TOC Ign. Liq.					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ☒					
4. For F001-F005, D001 (DEACT only), and D012-D043 wastes, list all hazardous constituents.						
5. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (CMBST)	☐					
6. This waste is subject to a treatment standard under 40 CFR 268.40: • Waste Requires Treatment • Waste Does Not Require Treatment	☒ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
7. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)	☐					
8. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(c).	☐					
9. This waste is hazardous debris subject to 40 CFR 268.45. (over 50% of waste is debris)	☐

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: I L D 0 2 5 4 1 5 2 6 6

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: ILD 012 514 152 66

EWR STREAM NO.: 21226 MANIFEST NO.: IL6385041 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001					
1a. Former USEPA Waste Numbers: (if previously treated to remove hazardous characteristic)						
2. Subcategory:	High TOC Ign. Liq.					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ☒					
4. For F001-F005, D001 (DEACT only), and D012-D043 wastes, list all hazardous constituents.						
5. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (CMBST)	☐					
6. This waste is subject to a treatment standard under 40 CFR 268.40: • Waste Requires Treatment • Waste Does Not Require Treatment	☒ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
7. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)	☐					
8. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(c).	☐					
9. This waste is hazardous debris subject to 40 CFR 268.45. (over 50% of waste is debris)	☐					
10. This waste is subject to an exemption from treatment under: • a national capacity variance • a Case-by-case extension • 40CFR268.6	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐
The exemption expires on:						

ADDITIONAL REQUIREMENTS — Check all that apply, and follow instructions.

- ☐ APPENDIX IV LAB PACK (Complete Certification 1)
- ☐ "CALIFORNIA LIST" (Complete Table 2)
- ☐ HAZARDOUS DEBRIS (Complete Table 3)
- ☐ WASTE MEETS A TREATMENT STANDARD, AS INDICATED ABOVE IN ROW 6. (Complete Certification 3)
- ☐ PRESENT OR FORMER D001, D002 OR D012-D043 WASTES. (complete Table 1.)
- ☐ FORMER D001, D002 OR D012-D043 WASTES WHICH DO NOT MEET UNIVERSAL TREATMENT STANDARDS (complete Certification 2)

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

COPY 1. TSD MAIL TO GENERATOR

MOR 000476

In case of a spill call the Illinois Office of Emergency Response at 217 / 782-7860 and the National Response Center at 800 / 424-8802 or 202 / 426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and non-hazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.

9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container.

CM =	Metal boxes or roll-offs	DM =	Metal drums
CW =	Wooden boxes	DW =	Wooden drums
CF =	Fiberboard or plastic bags	DF =	Fiberboard or plastic drums
BA =	Burlap, cloth, paper or plastic bags	CY =	Cylinders
DT =	Dump trucks	TT =	Tank trucks
TC =	Tank cars	TP =	Tanks portable

13. Enter the total quantity (gallons or cubic yards) of each waste.
14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

J,K. If needed, enter additional description or information/instructions for the material listed in item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment storage, or disposal outside the jurisdiction of the United States in this space.

16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.

20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

This Agency is authorized to require, pursuant to Illinois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed $25,000 per day of violation. Falsification of this information may result in a fine up to $50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

COPY 6. GENERATOR'S COPY

MOR 000483

In case of a spill call the Illinois Office of Emergency Response at 217 / 782-7860 and the National Response Center at 800 / 424-8802 or 202 / 426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS *(Please type)*

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.

9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM =	Metal boxes or roll-offs	DM =	Metal drums
CW =	Wooden boxes	DW =	Wooden drums
CF =	Fiberboard or plastic bags	DF =	Fiberboard or plastic drums
BA =	Burlap, cloth, paper or plastic bags	CY =	Cylinders
DT =	Dump trucks	TT =	Tank trucks
TC =	Tank cars	TP =	Tanks portable

13. Enter the total quantity (gallons or cubic yards) of each waste.
14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

J,K. If needed, enter additional description or information/instructions for the material listed in item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment storage, or disposal outside the jurisdiction of the United States in this space.
16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: ILD025411526

EWR STREAM NO.: 21226 MANIFEST NO.: IL6648497 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: ILD 025411526

EWR STREAM NO.: 21226 MANIFEST NO.: IL6385319 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001					
1a. Former USEPA Waste Numbers: (If previously treated to remove hazardous characteristic)						
2. Subcategory:	High TOC Ign. Liq.

"This hazardous debris is subject to the alternative treatment standards of 40 CFR 268.45." The contaminants subject to treatment pursuant to 40 CFR 268.45(b) are:

CERTIFICATIONS

1 LAB PACK

"I certify under penalty of law that I personally examined and am familiar with the waste and that the lab pack contains only the wastes that have not been excluded under Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

2 FORMER D001, D002 or D012–D043 WASTES

"I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

4 FORM CERTIFICATION

"I hereby certify that all information supplied above, and attached, is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist."

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: I L D 0 2 5 4 1 5 2 6 6

EWR STREAM NO.: _____ MANIFEST NO.: IL4865168 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001					
2. Subcategory:	Ign. Liq. High TOC					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ☒					
4. This waste is subject to a treatment standard under 40 CFR 268.41(a): • Waste Requires Treatment • Waste Does Not Require Treatment	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
5. This waste is subject to a treatment standard under 40 CFR 268.42(a): (Include Technology Codes)	FSUBSINCIN RORGS					
6. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (INCIN)	☐					
7. This waste is subject to a treatment standard under 40 CFR 268.43(a): • Waste Requires Treatment • Waste Does Not Require Treatment	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
8. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)	☐

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

— (Initial Waste Generator Only) —

I am supplying this notice and certification to Clayton Chemical Co in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: ILD 012 154 152 161

STREAM NO.: 5157 MANIFEST NO.: IL4865382 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001					
2. Subcategory:	Ign. Liq. High TOC					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ☒

Date: February 11,1994

Reference Manifest Number: IL 4865168

Reference Manifest Date: 2-9-94

Attached you will find the original copy of your Illinois Environmental Protection Agency Manifest in reference to waste material that you shipped to EWR.

Environmental Waste Resources certifies that materials received from the enclosed manifest have entered our treatment process for secondary fuel.

Thank you for allowing us to help you dispose of your waste material within all applicable regulatory and permit requirements.

Marketing Department

State of Illinois
ENVIRONMENTAL PROTECTION AGENCY

Mary A. Gade, Director

2200 Churchill Road, Springfield, IL 62794-9276

217/782-5563

Dear Environmental Coordinator:

The enclosed manifest copy was sent to us in error. For hazardous waste shipments, the Illinois Environmental Protection Agency (IEPA) should be sent only the part 5 (green) copy by the company generating the waste, and the part 2 (yellow) copy from the facility accepting the waste. Please familarize yourself with the below listed distribution information to avoid future problems.

DISTRIBUTION - After the generator and transporter have completed their respective items and have signed the manifest, the generator should pull the bottom two copies prior to releasing the manifested load to the transporter. The generator must keep the part 6 (blue) copy and forward part 5 (green) to the Illinois Environmental Protection Agency within two working days of the load being shipped.

When the designated facility receives the manifested waste, the owner or operator, or authorized representative must sign and date the manifest to certify receipt of the waste described on the manifest. Upon receipt, the transporter shall be given part 4 (gold) of the manifest for their records. Within thirty days of receipt of the waste, the facility must send the part 2 (yellow) copy to the IEPA and the original part 1 (white) copy to the generator. The remaining part 3 (pink) copy must be retained by the facility. All copies must be retained for a minimum of three years by all parties.

For nonhazardous waste shipments, no copies of the manifest shall be sent to the IEPA. Instead an Annual Report must be submitted.

If you have any questions, contact the Bureau of Land's Environmental Information Support Sub-Unit at the above number.

Sincerely,

Michael Walver, Manager
Environmental Information Support Unit
Bureau of Land

COPY 6. GENERATOR COPY

MOR 000524

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802 or 202/426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS (Please type)

(1) Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.

(2) Enter total number of pages comprising this Manifest.

(3) Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.

(4) Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

(B) Enter the generator's Illinois EPA ten digit identification number.

(5,6,C,D) For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

(7,8,E,F) If applicable, enter the information requested for the second transporter who will transport the waste. If more than two transporters are used, use a second manifest and in Section 15 of the second manifest enter "Continuation of Manifest Number xxxxxxx" (from Section A).

(9,10,G,H) For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

(11) Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT." If more than four waste streams are in a shipment, complete a second manifest.

(12) Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM	-	Metal boxes or roll-offs	DM	-	Metal drums
CW	-	Wooden boxes	DW	-	Wooden drums
CF	-	Fiberboard or plastic boxes	DF	-	Fiberboard or plastic drums
BA	-	Burlap, cloth, paper or plastic bags	CY	-	Cylinders
DT	-	Dump trucks			
TC	-	Tank cars	TT	-	Tank trucks
			TP	-	Tanks portable

(13) Enter the total quantity (gallons or cubic yards) of each waste; round to nearest whole number, do not use decimals or fractions.

(14) Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

(I) Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

(J,K) If needed, enter additional description or information/instructions for the material listed in item 11.

(15) If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.

(16) The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate *additional* mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: (17,18) The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. *UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.*

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

(19) The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually recieved at the facility. Reference the discrepancy by line A, B, C, or D.

(20) Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form.

Send comments regarding the burden estimate, including suggestions for reducing this burden, to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

1 APPENDIX IV LAB PACK (ORGANOMETALLIC)

"I certify under penalty of law that I personally examined and am familiar with the waste and that the lab pack contains only the wastes specified in Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

2 APPENDIX V LAB PACK (ORGANIC)

"I certify under penalty of law that I personally examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste and that the lab pack contains only organic wastes specified in Appendix V to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

4 FORM CERTIFICATION

"I hereby certify that all information supplied above, and attached, is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist."

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

— (Initial Waste Generator Only) —

I am supplying this notice and certification to Clayton Chemical Co in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: ILD 012 541 516 216

STREAM NO.: 5157 MANIFEST NO.: IL 4672812 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001	D008				
2. Subcategory:	Ign. Liq. High TOC					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ☒					
4. This waste is subject to a treatment standard under 40 CFR 268.41(a): • Waste Requires Treatment • Waste Does Not Require Treatment	☐ ☐	☒ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
5. This waste is subject to a treatment standard under 40 CFR 268.42(a): (Include Technology Codes)	FSUBSINCIN RORGS					
6. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (INCIN)	☐					
7. This waste is subject to a treatment standard under 40 CFR 268.43(a): • Waste Requires Treatment • Waste Does Not Require Treatment	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
8. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)	☐					
9. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(a): (INCIN) • Appendix IV (organometallic lab pack) • Appendix V (organic lab pack)	☐ ☐					
10. This waste is hazardous debris subject to the alternative treatment standard under 40 CFR 268.45(a):	☐					
11. (Reserved)	☐					
12. This waste is subject to an exemption from treatment under: • a national capacity variance • a Case-by-case extension • (reserved)	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐	☐ ☐ ☐
The exemption expires on:						

ADDITIONAL REQUIREMENTS — Check all that apply, and follow instructions.

☐ F001–F005 SPENT SOLVENT (Complete Table 1) ☐ "CALIFORNIA LIST" (Complete Table 2) ☐ HAZARDOUS DEBRIS (Complete Table 3)

☐ APPENDIX IV LAB PACK (Complete Certification 1) ☐ APPENDIX V LAB PACK (Complete Certification 2) ☐ F039 (Attach constituent list)

☐ WASTE MEETS A TREATMENT STANDARD, AS INDICATED ABOVE IN ROW 4 OR 7. (Complete Certification 3)

☐ This page is a continuation sheet.

This Agency is authorized to require, pursuant to Illinois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed $25,000 per day of violation. Falsification of this information may result in a fine up to $50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

COPY 6. GENERATOR COPY

MOR 000528

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802 or 202/426-2675.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS (Please type)

(1) Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.

(2) Enter total number of pages comprising this Manifest.

(3) Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.

(4) Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

(B) Enter the generator's Illinois EPA ten digit identification number.

(5,6,C,D) For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

(7,8,E,F) If applicable, enter the information requested for the second transporter who will transport the waste. If more than two transporters are used, use a second manifest and in Section 15 of the second manifest enter "Continuation of Manifest Number xxxxxxx" (from Section A).

(9,10,G,H) For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

(11) Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT." If more than four waste streams are in a shipment, complete a second manifest.

(12) Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM	-	Metal boxes or roll-offs	DM	-	Metal drums
CW	-	Wooden boxes	DW	-	Wooden drums
CF	-	Fiberboard or plastic boxes	DF	-	Fiberboard or plastic drums
BA	-	Burlap, cloth, paper or plastic bags	CY	-	Cylinders
DT	-	Dump trucks			
TC	-	Tank cars	TT	-	Tank trucks
			TP	-	Tanks portable

(13) Enter the total quantity (gallons or cubic yards) of each waste; round to nearest whole number, do not use decimals or fractions.

(14) Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

(I) Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

(J,K) If needed, enter additional description or information/instructions for the material listed in item 11.

(15) If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.

(16) The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate *additional* mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: (17,18) The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. *UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.*

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

(19) The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually recieved at the facility. Reference the discrepancy by line A, B, C, or D.

(20) Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form.

Send comments regarding the burden estimate, including suggestions for reducing this burden, to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

— (Initial Waste Generator Only) —

I am supplying this notice and certification to Clayton Chemical Co in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

RESTRICTED WASTE REQUIRING TREATMENT

1. ☒ I am the initial generator of an untreated waste restricted from land disposal under 40 CFR Part 268. This waste, identified above, may not be land disposed unless it is first treated to the appropriate treatment standard(s) or prohibition level(s), as indicated below.

The material described above requires treatment to the following level(s):

☒ (a) Treatment standards expressed as concentrations in a waste extract, as located in 40 CFR 268.41(a)

☒ (b) Treatment standards expressed as specific technologies, as located in 40 CFR 268.42(a)
(The appropriate 5-character code(s) are indicated below)

F _ S _ U _ B _ S _ _ _ _ _ _ _ _ _ _

☐ (c) The alternative treatment standard for Lab Packs, as located in 40 CFR 268.42(c) (INCIN)

☐ APPENDIX IV LAB PACK (ORGANOMETALLIC)

"I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack contains only the wastes specified in Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

☐ APPENDIX V LAB PACK (ORGANIC)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste and that the lab pack contains only organic wastes specified in Appendix V to part 268 or solid wastes not subject to regulation under 40 CFR Part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

☐ (d) Treatment standards expressed as concentrations in the waste, as located in 40 CFR 268.43(a)

☐ (e) Waste specific prohibition level(s), as located in 40 CFR 268.32 or RCRA Sec. 3004(d)

RESTRICTED WASTE NOT REQUIRING FURTHER TREATMENT

1. ☐ The above waste, as generated, meets the treatment standards under 40 CFR Part 268, Subpart D.
The material, described above, as generated, meets the following treatment standard(s).

☐ (a) Treatment standards expressed as concentrations in a waste extract, as located in 40 CFR 268.41(a)

☐ (b) Treatment standards expressed as concentrations in the waste, as located in 40 CFR 268.43(a)

I have attached waste analysis data upon which I have made this determination, where available.

I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Signature _____ Date _____

RESTRICTED WASTE SUBJECT TO EXTENSION, PETITION OR VARIANCE

1. ☐ The waste identified is currently not subject to a treatment standard for waste codes 1 2 3 4 5 due to:

☐ (a) A nationwide capacity variance under 40 CFR 268, Subpart C.

☐ (b) A case-by-case extension under 40 CFR 268.5

☐ (c) A no-migration petition under 40 CFR 268.6

The variance, extension or petition indicated above expires on the following date: 1 2 3 4 5

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

4 FORM CERTIFICATION

"I hereby certify that all information supplied above, and attached, is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist."

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

— (Initial Waste Generator Only) —

I am supplying this notice and certification to Clayton Chemical Co in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: I L D 0 2 1 5 4 1 6 2 1 6

STREAM NO.: 5157 MANIFEST NO.: IL7784412 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001	D008				
2. Subcategory:	Ign. Liq. High TOC					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ☒					
4. This waste is subject to a treatment standard under 40 CFR 268.41(a): • Waste Requires Treatment • Waste Does Not Require Treatment	☐ ☐	☒ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
5. This waste is subject to a treatment standard under 40 CFR 268.42(a): (Include Technology Codes)	FSUBSINCIN RORGS					
6. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (INCIN)	☐					
7. This waste is subject to a treatment standard under 40 CFR 268.43(a): • Waste Requires Treatment • Waste Does Not Require Treatment	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐	☐ ☐
8. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)	☐					
9. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(a): (INCIN) • Appendix IV (organometallic lab pack) • Appendix V (organic lab pack)	☐ ☐					
10. This waste is hazardous debris subject to the alternative treatment standard under 40 CFR 268.45(a):	☐					
11. (Reserved)	☐

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

— (Initial Waste Generator Only) —

I am supplying this notice and certification to Clayton Chemical Co in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME: Morey Corp. GEN. EPA I.D. NUMBER: ILD 012 541 516 16

STREAM NO.: 5157 MANIFEST NO.: IL4865077 Line No.: ☒ 11a ☐ 11b ☐ 11c ☐ 11d

PROHIBITIONS AND RESTRICTIONS	Complete a column for each waste number used to identify the waste, as applicable, by completing blocks and checking (✓) boxes.					
1. U.S. EPA Waste Number:	D001	D008				
2. Subcategory:	Ign. Liq. High TOC					
3. Treatability Group: • Wastewater • Non-Wastewater	☐ ☒

_____

CERTIFICATIONS

1 APPENDIX IV LAB PACK (ORGANOMETALLIC)

"I certify under penalty of law that I personally examined and am familiar with the waste and that the lab pack contains only the wastes specified in Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

2 APPENDIX V LAB PACK (ORGANIC)

"I certify under penalty of law that I personally examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste and that the lab pack contains only organic wastes specified in Appendix V to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

3 WASTE MEETING TREATMENT STANDARD(S)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or thorough knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

(4) ... telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

(5) Enter the generator's Illinois EPA ten digit identification number.

(6,7,8,9,E,F) For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA ... Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

(7,8,E,F) If applicable, enter the information requested for the second transporter who will transport the waste. If more than two transporters are used, use a second manifest and in Section 15 of the second manifest enter "Continuation of Manifest Number xxxxxx" (from Section A).

(10,11,G,H) For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

(12) Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 ... through 177. For wastes not regulated as Hazardous Materials by DOT enter a description of the waste and the generic name ... the waste, plus the phrase "not hazardous by DOT." If more than four waste streams are in a ... container, enter "mixed waste."

(13) Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

...	= Metal boxes or roll-offs	DM	= Metal drums
...	= Wooden boxes	DW	= Wooden drums
...	= Fiberboard or plastic boxes	DF	= Fiberboard or plastic drums
...	= ...	CY	= Cylinders
...	= Dump trucks		
...	= Tank cars	TT	= Tank trucks
		TP	= Tanks portable

(14) Enter the total quantity (gallons or cubic yards) of each waste; round to nearest whole number, do not use decimals or fractions.

(15) Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section I.

(16) Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered ... characteristic must be listed in Section I. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA ... waste stream permit ... Permit numbers are specific for each waste stream and comparable ... from the receiving ...

(17) ... additional description or information (instructions for the material listed in item 11).

(18) ... treatment, storage, or disposal information or DOT ... For international ... Departure (City and State) for shipments destined for ... disposal outside ...

(19) ... (by hand) and date the certification statement. If a mode other than highway is used, the word ... a mode (rail, water, or air) entered in the ... mode in addition ... mode.

(20) ... AND MAIL COPY 3 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT.

(17,18) The person accepting the waste on behalf of the transporter must acknowledge ... of the waste described on the Manifest by signing and entering the date of receipt. *UPON ... OF WASTE TO FACILITY, ... by any other person in connection with the facility owner/operator.*

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES

(19) The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 726.172) between the waste described on the Manifest and the waste actually received ... facility. Reference the discrepancy by line A, B, C, or D.

(20) Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must ... acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to ... 25 minutes for generators, 15 minutes for transporters, and 10 minutes for ... treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden, to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street S.W., Washington, DC 20480; and to the Office of Information and Regulatory ... Office of Management and Budget, Washington, DC 20503.

This Agency is authorized to require, pursuant to Illinois Revised Statutes, Chapter 111½ Section 21, that this information be submitted to the Agency. Failure to provide the information may result in a civil penalty against the owner or operator of not to exceed $25,000 per day of violation. Falsification of this information may result in a fine up to $50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

COPY 1. TSD MAIL TO GENERATOR COPY

The Illinois Uniform Manifest must be used for all shipments of hazardous waste stored, disposed of, treated, or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS (Please type)

(1) Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.

(2) Enter total number of pages comprising this Manifest.

(3) Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.

(4) Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

(B) Enter the generator's Illinois EPA ten digit identification number.

(5,6,C,D) For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

(7,8,E,F) If applicable, enter the information requested for the second transporter who will transport the waste. If more than two transporters are used, use a second manifest and in Section 15 of the second manifest enter "Continuation of Manifest Number xxxxxxx" from Section A).

(9,10,G,H) For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

(11) Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT." If more than four waste streams are in a shipment, complete a second manifest.

(12) Enter the number of containers for each waste and the appropriate abbreviation for the type of container:

CM	= Metal Boxes or roll-offs	DM	= Metal drums
CW	= Wooden boxes	DW	= Wooden drums
CF	= Fiberboard or plastic boxes	DF	= Fiberboard or plastic drums
BA	= Burlap, cloth, paper, or plastic bags	CY	= Cylinders
DT	= Dump trucks	TT	= Tank trucks
TC	= Tank cars	TP	= Tanks portable

(13) Enter the total quantity (gallons or cubic yards) of each waste; round to nearest whole number, do not use decimals or fractions.

(14) Enter 1 if quantity is in gallons or 2 if quantity is in cubic yards. *No other unit is to be used.* To track weight if desired, enter pounds, tons, or kilograms in Section J.

(I) Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - - other numbers should be listed in Section J. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies) (leave blank for waste going out of Illinois).

(J,K) If needed, enter additional description or information/instructions for the material listed in item 11.

(15) If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.

(16) The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate *additional* mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT.

INSTRUCTIONS TO TRANSPORTER: (17,18) The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. *UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.*

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

(19) The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.

(20) Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form.

Send comments regarding the burden estimate, including suggestions for reducing this burden, to; Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

The Illinois Uniform Manifest must be used for all shipments of hazardous waste stored, disposed of, treated, or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS (Please type)

(1) Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.

(2) Enter total number of pages comprising this Manifest.

(3) Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.

(4) Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

(B) Enter the generator's Illinois EPA ten digit identification number.

(5,6,C,D) For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

(7,8,E,F) If applicable, enter the information requested for the second transporter who will transport the waste. If more than two transporters are used, use a second manifest and in Section 15 of the second manifest enter "Continuation of Manifest Number xxxxxxx" from Section A).

(9,10,G,H) For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

(11) Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT." If more than four waste streams are in a shipment, complete a second manifest.

(12) Enter the number of containers for each waste and the appropriate abbreviation for the type of container:

CM	= Metal Boxes or roll offs	DM	= Metal drums
CW	= Wooden boxes	DW	= Wooden drums
CF	= Fiberboard or plastic boxes	DF	= Fiberboard or plastic drums
BA	= Burlap, cloth, paper, or plastic bags	CY	= Cylinders
DT	= Dump trucks	TT	= Tank trucks
TC	= Tank cars	TP	= Tanks portable

(13) Enter the total quantity (gallons or cubic yards) of each waste; round to nearest whole number, do not use decimals or fractions.

(14) Enter 1 if quantity is in gallons or 2 if quantity is in cubic yards. *No other unit is to be used.* To track weight if desired, enter pounds, tons, or kilograms in Section J.

(I) Enter the EPA 4 digit Hazardous Waste Number. If waste is a mixture of listed and characteristic wastes, the listed waste must be entered - - other numbers found be listed in Section J. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies) (leave blank for waste going out of Illinois).

(J-K) If needed, enter additional descriptions or information instructions for the material listed in item 11.

(L) If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.

(16) The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate *additional* mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT.

INSTRUCTIONS TO TRANSPORTER: (17,18) The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. *UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner operator.*

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

(19) The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, b, C, or D.

(20) Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form.

Send comments regarding the burden estimate, including suggestions for reducing this burden, to; Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802 or 202/426-2675.

The Illinois Uniform Manifest must be used for **all shipments of hazardous waste stored, disposed of, treated, or reclaimed in Illinois; and for all** shipments originating in Illinois and destined for states that do not print and supply the form. For shipments not originating in Illinois, **if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.**

INSTRUCTIONS TO GENERATORS (Please type)

(1) Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (e.g. 000011 by the generator.

(2) Enter total number of pages comprising this Manifest.

(3) Enter generator's name and mailing address. *If location of waste generation is different from mailing address, enter location to the right* of mailing address.

(4) Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

(B) Enter the generator's Illinois EPA ten digit identification number.

(5,6,C,D) For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

(7,8,E,F) If applicable, enter the information requested for the second transporter who will transport the waste. If more than two transporters are used, use a second manifest and in Section 15 of the second manifest enter "Continuation of Manifest Number xxxxxxx" from Section A).

(9,10,G,H) For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.

(11) Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT." If more than four waste streams are in a shipment, complete a second manifest.

(12) Enter the number of containers for each waste and the appropriate abbreviation for the type of container:

CM =	Metal Boxes or roll-offs	DM =	Metal drums
CW =	Wooden boxes	DW =	Wooden drums
CF =	Fiberboard or plastic boxes	DF =	Fiberboard or plastic drums
BA =	Burlap, cloth, paper, or plastic bags	CY =	Cylinders
DT =	Dump trucks	TT =	Tank trucks
TC =	Tank cars	TP =	Tanks portable

(13) *Enter the total quantity (gallons or cubic yards) of each waste; round to nearest whole number, do not use decimals or fractions.*

(14) Enter 1 if quantity is in gallons or 2 if quantity is in cubic yards. *No other unit is to be used.* To track weight if desired, enter pounds, tons, or kilograms in Section J.

(I) Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - - other numbers should be listed in Section J. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream: (these numbers are specific for each waste stream and companies) (leave blank for waste going out of Illinois).

(J,K) If needed, enter additional description or information instructions for the material listed in item 11.

(15) If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.

(16) The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate *additional* mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT.

INSTRUCTIONS TO TRANSPORTER: (17,18) The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. *UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.*

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

(19) The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.

(20) Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form.

Send comments regarding the burden estimate, including suggestions for reducing this burden, to; Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL
— (Initial Waste Generator Only) —

I am supplying this notice and certification to Clayton ChemicalCo in accordance with the requirements of regulations at 40 CFR 268.7. I h determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is cover by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME Morey Corp. GEN. EPA I.D. NUMBER IL D 0 2 5 4 1 6 2 6

STREAM NO. 5157 MANIFEST NO. IL3771741 Line No. ☒ 11a ☐ 11b ☐ 11c ☐ 11d

☒ Other

RESTRICTED WASTE REQUIRING TREATMENT

I. ☒ I am the initial generator of an untreated waste restricted from land disposal under 40 CFR Part 268. This waste, identified above, may not be land disposed unless it is first treated to the appropriate treatment standard(s) or prohibition level(s), as indicated below.

The material described above requires treatment to the following level(s):

☒ (a) Treatment standards expressed as concentrations in a waste extract, as located in 40 CFR 268.41(a)

☒ (b) Treatment standards expressed as specific technologies, as located in 40 CFR 268.42(a)
(The appropriate 5-character code(s) are indicated below)
F _ S _ U _ B _ S

☐ (c) The alternative treatment standard for Lab Packs, as located in 40 CFR 268.42(c) (INCIN)

☐ APPENDIX IV LAB PACK (ORGANOMETALLIC)

"I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack contains only the wastes specified in Appendix IV to part 268 or solid wastes not subject to regulation under 40 CFR part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

☐ APPENDIX V LAB PACK (ORGANIC)

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste and that the lab pack contains only organic wastes specified in Appendix V to part 268 or solid wastes not subject to regulation under 40 CFR Part 261. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment."

Signature _____ Date _____

☐ (d) Treatment standards expressed as concentrations in the waste, as located in 40 CFR 268.43(a)

☐ (e) Waste specific prohibition level(s), as located in 40 CFR 268.32 or RCRA Sec. 3004(d)

RESTRICTED WASTE NOT REQUIRING FURTHER TREATMENT

II. ☐ The above waste, as generated, meets the treatment standards under 40 CFR Part 268, Subpart D.
The material, described above, as generated, meets the following treatment standard(s).

☐ (a) Treatment standards expressed as concentrations in a waste extract, as located in 40 CFR 268.41(a)

☐ (b) Treatment standards expressed as concentrations in the waste, as located in 40 CFR 268.43(a)

I have attached waste analysis data upon which I have made this determination, where available.

"I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Signature _____ Date _____

RESTRICTED WASTE SUBJECT TO EXTENSION, PETITION OR VARIANCE

III. ☐ The waste identified is currently not subject to a treatment standard for waste codes 1. 2. 3. 4. 5. due to

☐ (a) A nationwide capacity variance under 40 CFR 268, Subpart C.

☐ (b) A case-by-case extension under 40 CFR 268.5

☐ (c) A no-migration petition under 40 CFR 268.6

The variance, extension or petition indicated above expires on the following date 1. 2. 3. 4. 5.

TABLE 1 — F001, F002, F003, F004, F005 SPENT SOLVENT WASTES

Re: Waste Acceptability at Michigan Recovery Systems, Inc.
EPA Identification number: MID 060 975 844

Dear Sir/Madame:

This letter acknowledges that Michigan Recovery Systems, Inc. has the appropriate permits, and the acceptability of the waste described below for treatment/storage at our Romulus, Michigan facility.

1.	General Description:	BLACO - TRON TMS PLUS
2.	EPA/MDNR Waste Codes: Secondary Codes:	007L
3.	Generator EPA identification #:	ILD 025 415 266
4.	Approval Number:	071857 D

This approval is based upon information supplied to us by your company. As the Generator, you are responsible for the accuracy of the characterization information. If there are any errors or changes to this information, please notify us immediately.

Although your waste has been technically approved, you or your agent (listed below) must contact Michigan Recovery Systems, Inc. to arrange the scheduling of your waste shipment. ALL WASTE SHIPMENTS MUST BE SCHEDULED PRIOR TO SHIPPING.

If you have any questions, please do not hesitate to contact us.

MOR 000574

STANDARD TERMS AND CONDITIONS

This Agreement between the Customer and EQ – The Environmental Quality Company and/or its member companies (hereinafter "EQ") related to or associated with Delivered Waste, as herein defined, shall be governed by the following Standard Terms and Conditions in addition to the terms and conditions contained in any Waste Characterization Report, Customer Approval Quote Confirmation, Generator Approval Notification, Notice of Waste Approval Expiration, and/or Credit Agreement associated with such Delivered Waste.

The Customer may use its standard forms (such as purchase orders, acknowledgments of orders, and invoices) to administer its dealings under this Agreement for convenience purposes, but all provisions thereof in conflict with these terms and conditions shall be deemed stricken.

Definitions.

The following definitions shall apply for purposes of this Agreement:

"Acceptable Waste" shall mean any hazardous waste, as defined under applicable State or federal law, determined by EQ as acceptable for treatment and/or disposal in accordance with this Agreement.

"Delivered Wastes" shall mean all wastes (i) which are transported, delivered, or tendered to EQ by the Customer; (ii) which the Customer has arranged for the transport, delivery or tender to EQ; or (iii)) which are transported, delivered, or tendered to EQ under a Credit Agreement between the Customer and EQ.

"Non-Conforming Wastes" shall mean wastes that (a) are not in accordance in all material respects with the warranties, descriptions, specifications or limitations stated in the Waste Characterization Report and this Agreement; (b) have constituents or components of a type or concentration not specifically identified in the Waste Characterization Report (i) which increase the nature or extent of the hazard and risk undertaken by EQ in treating and/or disposing of the waste, or (ii) for whose treatment and/or disposal a Waste Management Facility is not designed or permitted, or (iii) which increase the cost of treatment and/or disposal of waste beyond that specified in EQ's price quote; or (c) are not properly packaged, labeled, described, or placarded, or otherwise not in compliance with United States Department of Transportation and United States Environmental Protection Agency regulations.

Control of Operations.

EQ shall have sole control over all aspects of the operation of any treatment and/or disposal facility of EQ receiving Delivered Wastes under this Agreement (hereinafter, "Waste Management Facility"), including, without limitation, maintaining EQ's desired volumes of Acceptable Wastes being delivered to any Waste Management Facility by the Customer or any other person or entity.

Identification of Waste.

For each waste material to be transported, delivered, or tendered to EQ under this Agreement, the Customer shall provide, or cause to be provided, to EQ a representative sample of the waste material and a completed Waste Characterization Report containing a physical and chemical description or analysis of such waste material, which description shall conform with any and all guidelines for waste acceptance provided by EQ. On the basis of EQ's analysis of such representative sample of the waste material and such Waste Characterization Report, EQ will determine whether such wastes are Acceptable Wastes. EQ does not make any guarantee that it will handle any waste material or any particular quantity or type of waste material, and EQ reserves the right to the decline to transport, treat and/or dispose of waste material. The Customer shall promptly furnish to EQ any information regarding known, suspected or planned changes in the composition of the waste material. Further, the Customer shall promptly inform EQ of any change in the characteristic or condition of the waste material which becomes known to the Customer subsequent to the date of the Waste Characterization Report.

Non-Conforming Wastes.

In the event that EQ at any time discovers that any Delivered Waste is Non-Conforming Waste, EQ may reject or revoke its acceptance of the Non-Conforming Waste. The Customer shall have seven (7) days to direct an alternative lawful manner of disposition of the waste, unless it is necessary by reason of law or otherwise to move the Non-Conforming Waste prior to expiration of the seven (7) day period. If the Customer does not direct an alternative disposal, at its option, EQ may return any such Non-Conforming Wastes to the Customer, and the Customer shall pay or reimburse EQ for all costs and expenses incurred by EQ in connection with the receipt, handling, sampling, analyses, transportation and return to the Customer of such Non-Conforming Wastes. If it is impossible or impractical for EQ to return the Non-Conforming Waste to the Customer, the Customer shall reimburse EQ for all costs, of any type or nature whatsoever, incurred by EQ, solely because such Delivered Waste was Non-Conforming Waste (including, but not limited to, all costs associated with any remedial steps necessary, due to the nature of the Non-Conforming Waste, in connection with material with which the Non-Conforming Waste may have been commingled and all expenses and charges for analyzing, handling, loading, preparing for transporting, storing and disposing of any Non-Conforming Waste).

Customer Warranty - Acceptable Wastes.

All Delivered Wastes shall be Acceptable Wastes and shall conform in all material respects to the description and specifications contained in the Waste Characterization Report. The information set forth in the Waste Characterization Report or any manifest, placard or label associated with any Delivered Wastes, or otherwise represented by the Customer or the generator (if other than the Customer) to EQ, is and shall be true, accurate and complete as of the date of receipt of the involved waste by EQ.

Customer Warranty - Title to Wastes.

Either the Customer or the generator (if other than the Customer) shall hold clear title, free of any all liens, claims, encumbrances, and charges to Delivered Waste until such waste is accepted by EQ.

Customer Warranty - Compliance with Laws.

The Customer shall comply with all applicable federal, state and local environmental statutes, regulations, and other governmental requirements, as well as directives issued by EQ from time to time, governing the transportation, treatment and/or disposal of Acceptable Wastes, including, but not limited to, all packaging, manifesting, containerization, placarding and labeling requirements.

Customer Warranty - Updating Information.

If the Customer receives information that Delivered Waste or other hazardous waste described in the Waste Characterization Report, or some component of such waste, presents or may present a hazard or risk to persons, property or the environment which was not disclosed to EQ, or if the Customer or generator (if other than the Customer) has changed the process by which such waste results, the Customer shall promptly report such information to EQ in writing.

Customer Indemnity.

The Customer shall indemnify, defend and hold harmless EQ, and its affiliated or related companies, and all of their respective present or future officers, directors, shareholders, employees and agents from and against any and all losses, damages, liabilities, penalties, fines, forfeitures, demands, claims, causes of action, suits, costs and expenses (including, but not limited to, reasonable costs of defense, settlement, and reasonable attorneys' fees), which may be asserted against any or all of them by any person or any governmental agency, or which any or all of them may hereafter suffer, incur, be responsible for or pay out, as a result of or in connection with bodily injuries (including, but not limited to, death, sickness, disease and emotional or mental distress) to any person (including EQ's employees), damage (including, but not limited to, loss of use) to any property (public or private), or any requirements to conduct or incur expense for investigative, removal or remedial expenses in connection with contamination of or adverse effect on the environment, or any violation or alleged violation of any statutes, ordinances, orders, rules or regulations of any governmental entity or agency, caused or arising out of (i) a breach of this Agreement by the Customer, (ii) the failure of any warranty of the Customer to be true, accurate and complete, or (iii) any willful or negligent act or omission of the Customer, or its employees or agents in connection with the performance of this Agreement.

Force Majeure

EQ shall not be liable for any failure to accept, receive, handle, treat, and/or dispose of Delivered Waste due to an act of God, fire, casualty, flood, war, strike, lockout, labor trouble, failure of public utilities, equipment failure, facility shutdown, injunction, accident, epidemic, riot, insurrection, destruction of operation or transportation facilities, the inability to procure materials, equipment, or sufficient personnel or energy in order to meet operational needs without the necessity of allocation, the failure or inability to obtain any governmental approvals or to meet Environmental Requirements (including, but not limited to voluntary or involuntary compliance with any act, mandate, assertion, or requirement of any governmental authority) which may temporarily or permanently prohibit operations of EQ, the Customer, or the Generator, or any other circumstances beyond the control of EQ which prevents or delays performance of any of its obligations under this Agreement.

Governing Laws

This Agreement shall in all respects be governed by and shall be construed in accordance with the laws of the State of Michigan applied to contracts executed and performed wholly within such state.

Metal Settlement For Scrap Received
12/16/93

Transaction M6020

1.) 16 pails/skid 63/37 solder dross 1978-200-1778 lbs. net
Settlement basis: 65.00¢/lb. x 1778=$1155.70

Total due $1155.70 (Check attached)

This completes the settlement on this shipment. The above settlement basis is as per your agreement with Dale Rondinelli of Miltex Corporation. This will also verify that this dross was properly handled by company which specializes in the reclamation and refining of tin/lead alloys. All of your dross was consumed and used in new products.
If you have any questions please call. Thank you for this opportunity to do business and please call on us if we can be of service in the future.

Sincerely,

Edward M. Alpert
EMA/bma

8	25 ppm (SKIN) FINAL	N/E	25 ppm (SKIN)	N/E	N/E	N/E
9	100 ppm FINAL	N/E	100 ppm	150 ppm	N/E	N/E
10	N/E	N/E	5 mg/m3	N/E	N/E	N/E
11	N/E	N/E	N/E	N/E	N/E	N/E
12	10 mg/m3 as Dust	N/E	10 mg/m3 Nuisance Dust	N/E	N/E	N/E

The dried film of this product is hazardous when removed by sanding, grinding, or welding.
(SKIN) absorption may contribute to the overall exposure to this material. Take appropriate measures to prevent skin contact.

(N/E = not established)

SECTION III PHYSICAL DATA

boiling point	: not established	% volatile by volume	:	70.36	(Theoretical)
evaporation rate	: < 1 (ether = 1)	% volatile by weight	:	52.38	(Theoretical)
vapor density	: > 1 (air = 1)	weight per gallon	:	8.79	(Theoretical)

SECTION IV HEALTH INFORMATION

EYE CONTACT
PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE EYES. EXPOSURE MAY CAUSE CORNEAL INJURY. PRODUCT VAPORS AND/OR MISTS MAY ALSO BE IRRITATING TO THE EYES.

SKIN CONTACT
BASED ON THE PRESENCE OF COMPONENT 8 PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE SKIN. PROLONGED CONTACT MAY CAUSE DAMAGE TO THE SKIN. BASED ON THE PRESENCE OF COMPONENTS 8, 9 AND11 ABSORPTION THROUGH THE SKIN MAY RESULT IN SYMPTOMS OF EXPOSURE AS THOSE DESCRIBED FOR INHALATION AND INGESTION. PROLONGED OR REPEATED CONTACT MAY RESULT IN DEFATTING AND DRYING OF THE SKIN WHICH MAY RESULT IN DERMATITIS.

INHALATION
EXPOSURE MAY PRODUCE IRRITATION TO THE NOSE, THROAT, RESPIRATORY TRACT, AND OTHER MUCOUS MEMBRANES. EXPOSURE TO HIGH CONCENTRATIONS OF VAPOR MAY PRODUCE CENTRAL NERVOUS SYSTEM DEPRESSION. REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL.

INGESTION
MODERATELY TOXIC. BASED ON THE PRESENCE OF COMPONENT 8 INGESTION MAY CAUSE RED BLOOD CELL HEMOLYSIS LEADING TO KIDNEY AND LIVER DAMAGE. SMALL AMOUNTS OF THE LIQUID ASPIRATED INTO THE LUNGS DURING INGESTION OR FROM VOMITING MAY RESULT IN SEVERE LUNG DAMAGE. INGESTION MAY CAUSE CENTRAL NERVOUS SYSTEM DEPRESSION.

SIGNS AND SYMPTOMS
SYMPTOMS OF EYE IRRITATION INCLUDE PAIN, TEARING, REDDENING AND SWELLING. SYMPTOMS OF SKIN IRRITATION INCLUDE REDDENING, SWELLING, RASH AND REDNESS. SYMPTOMS OF RESPIRATORY IRRITATION INCLUDE RUNNY NOSE, SORE THROAT, COUGHING, CHEST DISCOMFORT, SHORTNESS OF BREATH AND REDUCED LUNG FUNCTION. SYMPTOMS OF GASTROINTESTIONAL IRRITATION INCLUDE SORE THROAT, ABDOMINAL PAIN, NAUSEA, VOMITING AND DIARRHEA. CENTRAL NERVOUS SYSTEM DEPRESSION MAY BE EVIDENCED BY HEADACHE, DIZZINESS, NAUSEA AND SYMPTOMS OF INTOXICATION; IN EXTREME CASES, UNCONSCIOUSNESS AND DEATH MAY OCCUR. SYMPTOMS OF CHRONIC OVEREXPOSURE INCLUDE LOSS OF MEMORY, LOSS OF INTELLECTUAL ABILITY AND LOSS OF COORDINATION.

AGGRAVATED MEDICAL CONDITIONS
PREEXISTING SKIN, EYE AND RESPIRATORY DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT. IMPAIRED CENTRAL NERVOUS SYSTEM FUNCTIONS FROM PREEXISTING DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT.

OTHER HEALTH EFFECTS
BASED ON THE PRESENCE OF COMPONENTS 8, 9 AND11 CHRONIC OVEREXPOSURE MAY CAUSE INJURY TO THE KIDNEYS AND LIVER. BASED ON THE PRESENCE OF COMPONENT 8 CHRONIC OVEREXPOSURE MAY CAUSE DAMAGE TO THE RED BLOOD CELLS. BASED ON THE PRESENCE OF COMPONENTS 8 AND 9 CHRONIC OVEREXPOSURE MAY CAUSE DAMAGE TO THE LUNGS. BASED ON THE PRESENCE OF COMPONENT 6 CHRONIC OVEREXPOSURE TO TiO2 DUST MAY CAUSE SLIGHT LUNG FIBROSIS. BASED ON THE PRESENCE OF COMPONENT 5 CHRONIC OVEREXPOSURE TO TALC DUST MAY CAUSE SCARRING OF THE LUNGS. BASED ON THE PRESENCE OF COMPONENT 3 CHRONIC OVEREXPOSURE TO PRODUCT DUST MAY PRODUCE A BENIGN PNEUMOCONIOSIS TERMED 'SIDEROSIS'.

SECTION V EMERGENCY AND FIRST AID PROCEDURES

EYE CONTACT
IMMEDIATELY FLUSH EYES WITH COPIOUS AMOUNTS OF WATER FOR AT LEAST 15 MINUTES HOLDING EYELIDS OPEN. SEEK PROMPT MEDICAL ATTENTION.

SKIN CONTACT
REMOVE CONTAMINATED CLOTHING AND SHOES. WIPE EXCESS FROM SKIN AND FLUSH WITH WATER USING SOAP IF AVAILABLE. SEEK MEDICAL ATTENTION IF IRRITATION OCCURS. DO NOT REUSE CLOTHING UNTIL THOROUGHLY DECONTAMINATED.

INHALATION
REMOVE VICTIM TO FRESH AIR AND TREAT SYMPTOMATICALLY. PROVIDE OXYGEN IF BREATHING IS DIFFICULT. GIVE ARTIFICIAL RESPIRATION IF THE VICTIM IS NOT BREATHING. SEEK PROMPT MEDICAL ATTENTION.

INGESTION
DO NOT INDUCE VOMITING. IF VOMITING SPONTANEOUSLY OCCURS, KEEP THE VICTIM'S HEAD BELOW THE HIPS TO PREVENT ASPIRATION INTO THE LUNGS. SINCE ASPIRATION INTO THE LUNGS CAN CAUSE VERY SERIOUS, PERMANENT DAMAGE, THE DECISION OF WHETHER TO INDUCE VOMITING OR NOT SHOULD BE MADE BY A PHYSICIAN. DANGER FROM LUNG ASPIRATION MUST BE WEIGHED AGAINST TOXICITY WHEN CONSIDERING EMPTYING THE STOMACH. CONSULT A PHYSICIAN, HOSPITAL OR POISON CONTROL CENTER AND/OR TRANSPORT TO AN EMERGENCY FACILITY IMMEDIATELY.

>> COMPONENTS 1 AND 2 MAY CAUSE SEVERE, PERMANENT DAMAGE IF ASPIRATED AND VOMITING SHOULD NOT BE INDUCED.

SECTION VI FIRE AND EXPLOSION HAZARDS

flammability classification - OSHA : FLAMMABLE LIQUID - CLASS IB
- DOT : FLAMMABLE LIQUID
flash point : 68 degrees F. (Theoretical)

EXTINGUISHING MEDIA
USE WATER FOG, FOAM, DRY CHEMICAL OR CARBON DIOXIDE.

SPECIAL FIRE FIGHTING PROCEDURES AND PRECAUTIONS
WARNING. FLAMMABLE. CLEAR FIRE AREA OF UNPROTECTED PERSONNEL. DO NOT ENTER CONFINED FIRE SPACE WITHOUT HELMET, FACE SHIELD, BUNKER COAT, GLOVES, RUBBER BOOTS, AND A POSITIVE PRESSURE NIOSH-APPROVED SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS
CONTAINERS EXPOSED TO INTENSE HEAT FROM FIRES SHOULD BE COOLED WITH WATER TO PREVENT VAPOR PRESSURE BUILDUP WHICH COULD RESULT IN CONTAINER RUPTURE. CONTAINER AREAS EXPOSED TO DIRECT FLAME CONTACT SHOULD BE COOLED WITH LARGE QUANTITIES OF WATER AS NEEDED TO PREVENT WEAKENING OF CONTAINER STRUCTURE.

SECTION VII REACTIVITY

STABILITY : STABLE HAZARDOUS POLYMERIZATION : WILL NOT OCCUR

CONDITIONS AND MATERIALS TO AVOID
AVOID OXIDIZING MATERIALS. BASED ON THE PRESENCE OF COMPONENT 8 AVOID STRONG ALKALIES.

HAZARDOUS DECOMPOSITION PRODUCTS
CARBON DIOXIDE, CARBON MONOXIDE AND UNIDENTIFIED ORGANIC COMPOUNDS MAY BE FORMED DURING COMBUSTION.

SECTION VIII EMPLOYEE PROTECTION

RESPIRATORY PROTECTION
USE VENTILATION AS REQUIRED TO CONTROL VAPOR CONCENTRATIONS - AT LEAST 10 AIR CHANGES PER HOUR ARE RECOMMENDED FOR GOOD GENERAL ROOM VENTILATION. IF EXPOSURE EXCEEDS THE PEL/TLV, USE THE APPROPRIATE NIOSH-APPROVED RESPIRATOR.

PROTECTIVE CLOTHING
WEAR SAFETY GLASSES, GOGGLES, OR A SPLASH SHIELD TO PREVENT EYE CONTACT. CONTACT LENSES SHOULD NOT BE WORN. WEAR APPROPRIATE GLOVES AND PROTECTIVE CLOTHING TO PREVENT CONTACT WITH SKIN AND CLOTHING.

ADDITIONAL PROTECTIVE MEASURES
EYE WASH FOUNTAINS AND SAFETY SHOWERS SHOULD BE AVAILABLE FOR USE IN AN EMERGENCY.

SECTION IX ENVIRONMENTAL PROTECTION

SPILL OR LEAK PROCEDURES
LARGE SPILLS >> EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR APPROPRIATE RESPIRATOR AND PROTECTIVE CLOTHING. SHUT OFF SOURCE OF LEAK ONLY IF SAFE TO DO SO. DIKE AND CONTAIN. IF VAPOR CLOUD FORMS, WATER FOG MAY BE USED TO SUPPRESS; CONTAIN RUN-OFF. REMOVE WITH VACUUM TRUCKS OR PUMP TO STORAGE/SALVAGE VESSELS. SOAK UP RESIDUE WITH AN ABSORBENT SUCH AS CLAY, SAND OR OTHER SUITABLE MATERIAL; PLACE IN NON-LEAKING CONTAINERS FOR PROPER DISPOSAL. FLUSH AREA WITH WATER TO REMOVE TRACE RESIDUE; DISPOSE OF FLUSH SOLUTIONS AS ABOVE. SMALL SPILLS >> TAKE UP WITH AN ABSORBENT MATERIAL AND PLACE IN NON-LEAKING CONTAINERS; SEAL TIGHTLY FOR PROPER DISPOSAL.

WASTE DISPOSAL
OBSERVE ALL FEDERAL, STATE, AND LOCAL REGULATIONS REGARDING PROPER DISPOSAL.

SECTION X ADDITIONAL PRECAUTIONS

KEEP LIQUID AND VAPOR AWAY FROM HEAT, SPARKS, AND FLAME. EXTINGUISH PILOT LIGHTS, CIGARETTES AND TURN OFF OTHER POSSIBLE SOURCES OF IGNITION PRIOR TO USE AND UNTIL VAPORS ARE GONE. SURFACES THAT ARE SUFFICIENTLY HOT MAY IGNITE PRODUCT IN THE ABSENCE OF SPARKS OR FLAME. VAPORS MAY ACCUMULATE AND TRAVEL TO IGNITION SOURCES DISTANT FROM HANDLING SITE. KEEP CONTAINERS CLOSED WHEN NOT IN USE. USE WITH ADEQUATE VENTILATION. CONTAINERS, EVEN IF EMPTY, CAN CONTAIN EXPLOSIVE VAPORS. DO NOT CUT,DRILL, GRIND, OR WELD NEAR CONTAINERS.

CONTAINERS CAN CONTAIN HAZARDOUS PRODUCT RESIDUES EVEN WHEN EMPTY. WASH WITH SOAP AND WATER BEFORE EATING, DRINKING, SMOKING, OR USING TOILET FACILITIES.

THE INFORMATION CONTAINED HEREIN IS BASED ON THE DATA AVAILABLE TO US AND IS BELIEVED TO BE CORRECT. HOWEVER, WE MAKE NO WARRANTY, EXPRESSED OR IMPLIED, REGARDING THE ACCURACY OF THIS DATA OR THE RESULTS TO BE OBTAINED FROM THE USE THEREOF. WE ASSUME NO RESPONSIBILITY FOR INJURY FROM THE USE OF THE PRODUCT DESCRIBED HEREIN.

SECTION IV HEALTH INFORMATION

EYE CONTACT
PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE EYES. PRODUCT VAPORS AND/OR MISTS MAY ALSO BE IRRITATING TO THE EYES.

SKIN CONTACT
BASED ON THE PRESENCE OF COMPONENTS 3 AND 6 PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE SKIN. PROLONGED CONTACT MAY CAUSE DAMAGE TO THE SKIN. PROLONGED OR REPEATED CONTACT MAY RESULT IN DEFATTING AND DRYING OF THE SKIN WHICH MAY RESULT IN DERMATITIS. BASED ON THE PRESENCE OF COMPONENTS 3 AND 6 CONTACT MAY RESULT IN A PRONOUNCED PHOTOSENSITIZATION EFFECT.

INHALATION
EXPOSURE MAY PRODUCE IRRITATION TO THE NOSE, THROAT, RESPIRATORY TRACT, AND OTHER MUCOUS MEMBRANES. EXPOSURE TO HIGH CONCENTRATIONS OF VAPOR MAY PRODUCE CENTRAL NERVOUS SYSTEM DEPRESSION. REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL.

INGESTION
SLIGHTLY TOXIC. SMALL AMOUNTS OF THE LIQUID ASPIRATED INTO THE LUNGS DURING INGESTION OR FROM VOMITING MAY RESULT IN SEVERE LUNG DAMAGE. INGESTION MAY CAUSE CENTRAL NERVOUS SYSTEM DEPRESSION.

SIGNS AND SYMPTOMS
SYMPTOMS OF EYE IRRITATION INCLUDE PAIN, TEARING, REDDENING AND SWELLING. SYMPTOMS OF SKIN IRRITATION INCLUDE REDDENING, SWELLING, RASH AND REDNESS. SYMPTOMS OF RESPIRATORY IRRITATION INCLUDE RUNNY NOSE, SORE THROAT, COUGHING, CHEST DISCOMFORT, SHORTNESS OF BREATH AND REDUCED LUNG FUNCTION. SYMPTOMS OF GASTROINTESTIONAL IRRITATION INCLUDE SORE THROAT, ABDOMINAL PAIN, NAUSEA, VOMITING AND DIARRHEA. CENTRAL NERVOUS SYSTEM DEPRESSION MAY BE EVIDENCED BY HEADACHE, DIZZINESS, NAUSEA AND SYMPTOMS OF INTOXICATION; IN EXTREME CASES, UNCONSCIOUSNESS AND DEATH MAY OCCUR. SYMPTOMS OF CHRONIC OVEREXPOSURE INCLUDE LOSS OF MEMORY, LOSS OF INTELLECTUAL ABILITY AND LOSS OF COORDINATION.

AGGRAVATED MEDICAL CONDITIONS
PREEXISTING SKIN, EYE AND RESPIRATORY DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT. IMPAIRED CENTRAL NERVOUS SYSTEM FUNCTIONS FROM PREEXISTING DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT.

OTHER HEALTH EFFECTS
BASED ON THE PRESENCE OF COMPONENT 9 CHRONIC OVEREXPOSURE MAY CAUSE DAMAGE TO THE KIDNEYS. BASED ON THE PRESENCE OF COMPONENT 5 CHRONIC OVEREXPOSURE TO TiO2 DUST MAY CAUSE SLIGHT LUNG FIBROSIS. BASED ON THE PRESENCE OF COMPONENT 2 CHRONIC OVEREXPOSURE TO PRODUCT DUST MAY PRODUCE A BENIGN PNEUMOCONIOSIS TERMED 'SIDEROSIS'.

SECTION V EMERGENCY AND FIRST AID PROCEDURES

EYE CONTACT
IMMEDIATELY FLUSH EYES WITH COPIOUS AMOUNTS OF WATER FOR AT LEAST 15 MINUTES HOLDING EYELIDS OPEN. SEEK PROMPT MEDICAL ATTENTION.

SKIN CONTACT
REMOVE CONTAMINATED CLOTHING AND SHOES. WIPE EXCESS FROM SKIN AND FLUSH WITH WATER USING SOAP IF AVAILABLE. SEEK MEDICAL ATTENTION IF IRRITATION OCCURS. DO NOT REUSE CLOTHING UNTIL THOROUGHLY DECONTAMINATED.

INHALATION
REMOVE VICTIM TO FRESH AIR AND TREAT SYMPTOMATICALLY. PROVIDE OXYGEN IF BREATHING IS DIFFICULT. GIVE ARTIFICIAL RESPIRATION IF THE VICTIM IS NOT BREATHING. SEEK PROMPT MEDICAL ATTENTION.

INGESTION
DO NOT INDUCE VOMITING. IF VOMITING SPONTANEOUSLY OCCURS, KEEP THE VICTIM'S HEAD BELOW THE HIPS TO PREVENT ASPIRATION INTO THE LUNGS. SINCE ASPIRATION INTO THE LUNGS CAN CAUSE VERY SERIOUS, PERMANENT DAMAGE, THE DECISION OF WHETHER TO INDUCE VOMITING OR NOT SHOULD BE MADE BY A PHYSICIAN. DANGER FROM LUNG ASPIRATION MUST BE WEIGHED AGAINST TOXICITY WHEN CONSIDERING EMPTYING THE STOMACH. CONSULT A PHYSICIAN, HOSPITAL OR POISON CONTROL CENTER AND/OR TRANSPORT TO AN EMERGENCY FACILITY IMMEDIATELY.

>> COMPONENTS 1, 3, 4, 6, 7, 8 AND 9 MAY CAUSE SEVERE, PERMANENT DAMAGE IF ASPIRATED AND VOMITING SHOULD NOT BE INDUCED.

SECTION VI FIRE AND EXPLOSION HAZARDS

flammability classification - OSHA : FLAMMABLE LIQUID - CLASS IB
- DOT : FLAMMABLE LIQUID
flash point : 50 degrees F. (Theoretical)

EXTINGUISHING MEDIA
USE WATER FOG, FOAM, DRY CHEMICAL OR CARBON DIOXIDE.

SPECIAL FIRE FIGHTING PROCEDURES AND PRECAUTIONS
WARNING. FLAMMABLE. CLEAR FIRE AREA OF UNPROTECTED PERSONNEL. DO NOT ENTER CONFINED FIRE SPACE WITHOUT HELMET, FACE SHIELD, BUNKER COAT, GLOVES, RUBBER BOOTS, AND A POSITIVE PRESSURE NIOSH-APPROVED SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS
CONTAINERS EXPOSED TO INTENSE HEAT FROM FIRES SHOULD BE COOLED WITH WATER TO PREVENT VAPOR PRESSURE BUILDUP WHICH COULD RESULT IN CONTAINER RUPTURE. CONTAINER AREAS EXPOSED TO DIRECT FLAME CONTACT SHOULD BE COOLED WITH LARGE QUANTITIES OF WATER AS NEEDED TO PREVENT WEAKENING OF CONTAINER STRUCTURE.

SECTION VII REACTIVITY

STABILITY : STABLE HAZARDOUS POLYMERIZATION : WILL NOT OCCUR

CONDITIONS AND MATERIALS TO AVOID
AVOID OXIDIZING MATERIALS.

HAZARDOUS DECOMPOSITION PRODUCTS
CARBON DIOXIDE, CARBON MONOXIDE AND UNIDENTIFIED ORGANIC COMPOUNDS MAY BE FORMED DURING COMBUSTION.

SECTION VIII EMPLOYEE PROTECTION

RESPIRATORY PROTECTION
USE VENTILATION AS REQUIRED TO CONTROL VAPOR CONCENTRATIONS - AT LEAST 10 AIR CHANGES PER HOUR ARE RECOMMENDED FOR GOOD GENERAL ROOM VENTILATION. IF EXPOSURE EXCEEDS THE PEL/TLV, USE THE APPROPRIATE NIOSH-APPROVED RESPIRATOR.

PROTECTIVE CLOTHING
WEAR SAFETY GLASSES, GOGGLES, OR A SPLASH SHIELD TO PREVENT EYE CONTACT. CONTACT LENSES SHOULD NOT BE WORN. WEAR APPROPRIATE GLOVES AND PROTECTIVE CLOTHING TO PREVENT CONTACT WITH SKIN AND CLOTHING.

ADDITIONAL PROTECTIVE MEASURES
EYE WASH FOUNTAINS AND SAFETY SHOWERS SHOULD BE AVAILABLE FOR USE IN AN EMERGENCY.

SECTION IX ENVIRONMENTAL PROTECTION

SPILL OR LEAK PROCEDURES
LARGE SPILLS >> EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR APPROPRIATE RESPIRATOR AND PROTECTIVE CLOTHING. SHUT OFF SOURCE OF LEAK ONLY IF SAFE TO DO SO. DIKE AND CONTAIN. IF VAPOR CLOUD FORMS, WATER FOG MAY BE USED TO SUPPRESS; CONTAIN RUN-OFF. REMOVE WITH VACUUM TRUCKS OR PUMP TO STORAGE/SALVAGE VESSELS. SOAK UP RESIDUE WITH AN ABSORBENT SUCH AS CLAY, SAND OR OTHER SUITABLE MATERIAL; PLACE IN NON-LEAKING CONTAINERS FOR PROPER DISPOSAL. FLUSH AREA WITH WATER TO REMOVE TRACE RESIDUE; DISPOSE OF FLUSH SOLUTIONS AS ABOVE. SMALL SPILLS >> TAKE UP WITH AN ABSORBENT MATERIAL AND PLACE IN NON-LEAKING CONTAINERS; SEAL TIGHTLY FOR PROPER DISPOSAL.

WASTE DISPOSAL
OBSERVE ALL FEDERAL, STATE, AND LOCAL REGULATIONS REGARDING PROPER DISPOSAL.

SECTION X ADDITIONAL PRECAUTIONS

KEEP LIQUID AND VAPOR AWAY FROM HEAT, SPARKS, AND FLAME. EXTINGUISH PILOT LIGHTS, CIGARETTES AND TURN OFF OTHER POSSIBLE SOURCES OF IGNITION PRIOR TO USE AND UNTIL VAPORS ARE GONE. SURFACES THAT ARE SUFFICIENTLY HOT MAY IGNITE PRODUCT IN THE ABSENCE OF SPARKS OR FLAME. VAPORS MAY ACCUMULATE AND TRAVEL TO IGNITION SOURCES DISTANT FROM HANDLING SITE. KEEP CONTAINERS CLOSED WHEN NOT IN USE. USE WITH ADEQUATE VENTILATION. CONTAINERS, EVEN IF EMPTY, CAN CONTAIN EXPLOSIVE VAPORS. DO NOT CUT,DRILL, GRIND, OR WELD NEAR CONTAINERS.

CONTAINERS CAN CONTAIN HAZARDOUS PRODUCT RESIDUES EVEN WHEN EMPTY. WASH WITH SOAP AND WATER BEFORE EATING, DRINKING, SMOKING, OR USING TOILET FACILITIES.

THE INFORMATION CONTAINED HEREIN IS BASED ON THE DATA AVAILABLE TO US AND IS BELIEVED TO BE CORRECT. HOWEVER, WE MAKE NO WARRANTY, EXPRESSED OR IMPLIED, REGARDING THE ACCURACY OF THIS DATA OR THE RESULTS TO BE OBTAINED FROM THE USE THEREOF. WE ASSUME NO RESPONSIBILITY FOR INJURY FROM THE USE OF THE PRODUCT DESCRIBED HEREIN.

Re: Lockformer Subpoena

Dear Amy:

I have enclosed copies of the following information in response to the Lockformer Subpoena:

The NFR letter received from the State of Illinois EPA.

Focused Site Investigation and Remedial Action Completion Report, Prepared by Pioneer Environmental, Inc., dated November 8, 2000.

Focused Site Investigation and Remedial Action Completion Report (addendum), Prepared by Pioneer Environmental, Inc., dated January 23, 2001.

A list of chemicals kept by The Morey Corporation.

A material data safety sheet for the one product we have identified which contains chemicals listed in the subpoena.

A purchase history for the product reflecting all purchases since 1992.

The product we have identified is "Slide Epoxease Areosol". The product is used in our manufacturing process to enable us to dislodge hardened plastics from molds.

I appreciate your assistance in this matter. After you and your environmental specialists have had an opportunity to review the enclosed, please call me to discuss at (630) 754-2130.

Sincerely,

Michael L. Legel
Chief Financial Officer

PHASE II SUBSURFACE INVESTIGATION(S)

Morey Corporation
2659 Wisconsin Ave.
Downers Grove, Illinois

I. INTRODUCTION

On May 9th, 2000, a Phase I Environmental Site Assessment of the above referenced Property was completed on behalf of the potential purchaser, Cable/Comm Technologies. The results of the Phase I ESA indicated two areas of potential environmental concern: (1) the clay potting compound mixing area inside of the building which contain evidence of spilled materials and structural degradation of the underlying concrete floor; and (2) an area exterior to the building in which a drain leading from the chemical and waste storage area exits through the wall. There was evidence of stressed vegetation within this area, indicating that chemical spills have impacted the these surface soils by means of migration through the storage room drain. Figure 1 provides a map identifying the locations of these potential concerns.

Additionally, on May 18th, ENMARC had been requested to mobilize to the site to collect samples from this exterior area (@ the end of the drainage piping), following the removal of approximately1.5 cubic yards by the Morey Corporation. The Morey Corporation had experienced a release of a flux thinner (containing the hazardous compounds: isopropanol and methanol) that had migrated through the drain located in the chemical storage room and into the environment at this location. An approximate 3' x 3' x 4' deep excavation had been manually dug and the soils placed into containers. ENMARC collected samples from the sidewalls and bottom of the excavation and subjected them to field screening analysis using a Photoionization Detection (PID) meter. Field screening analysis of the sidewall samples collected from 2-3' depth intervals resulted in no PID readings. However, the bottom sample collected and subjected to field screening indicated a PID reading @ 8.7 ppm.

Subsequently, ENMARC collected an additional sample off the bottom of the small excavation area (@ 4') for submittal to an environmental testing laboratory for analytical documentation of the levels of contaminants that may be present. The bottom sample was collected pursuant to EPA Method 5035 (refer to Section II for details of sampling method), labeled and placed into an iced cooler pending transport to an environmental testing laboratory. The sample was submitted under chain-of-custody to the laboratory and analyzed for VOC's (Volatile Organic Compounds), SVOC's (Semi-Volatile Organic Compounds) and isopropanol and methanol compounds using EPA SW-846 test methods. Results of the analysis indicated levels of several contaminants above the current Tier 1 standards adopted under 35 Illinois Administrative Code (IAC) Part 742, Tiered Approach to Corrective Action Objectives (TACO). These contaminants include: tetrachloroethene, trichloroethene and vinyl chloride.

As a result, an extended subsurface investigation was completed on June 2nd, 2000. The intent of the follow-up subsurface investigation completed was to attempt to delineate the extent of the impact plume of contaminants discovered at the site.

II. EXTENDED PHASE II FIELD ACTIVITIES

On June 2, 2000, ENMARC mobilized the necessary equipment and personnel to the subject Property to install borings by means of Geoprobe methods to determine the extent of the impact previously discovered at the site, and to complete one boring within the potting compound mixing area. A total of seven borings were completed.

Figure 2 and Figure 3 provides illustrations of the location of the borings completed as part of the extended Phase II subsurface investigation completed. The samples were collected and analyzed in accordance with EPA protocol:

(1)Sample Collection
The borings were continuous sampled through their entire length for purposes of classifying the soils beneath the site, in addition to collecting samples at 2 foot depth intervals for field screening analysis and potential laboratory analytical documentation of the absence/presence of dry cleaning compounds. The samples collected from each depth interval were split into three portions. Pursuant to EPA Method 5035, approximately 5 ± g (weighed in the field) aliquots of the initial portion were placed into each of three pre-preserved 40 ml VOA bottles (one was preserved with methanol and two with a sodium bisulfate/deionized water solution) supplied by the laboratory. An additional portion was place into a 4 ounce glass jar with teflon lid for dry weight determinations, and the remaining portion was placed into a heavy duty plastic bag and sealed for purposes of "headspace" field screening analysis. The laboratory samples (VOA bottles and 4 ounce glass jars) were placed into an iced cooler pending submittal to an environmental testing laboratory for analytical confirmation of the levels of suspect constituents.

All sampling equipment was decontaminated between sample locations utilizing a detergent wash, i.e., tri-sodium phosphate; tap water rinse and a final distilled water rinse and allowed to air dry. A new, clean pair of nitrile gloves was utilized for each sampling interval.

(2)Field Screening:
The samples collected and placed into the heavy duty plastic bags were subjected to a heated environment for approximately ten minutes to enhance the volatilization of any organic contaminants prior to headspace screening with a properly calibrated Photoionization Detection (PID) meter, HNu Model HW-101. The probe of the PID meter was subsequently inserted through the plastic bag and into the "headspace" of the glass container and the maximum reading recorded. The PID meter was utilized to assess, in the field, the presence of potential impact. Boring logs, including the field screening analysis results were recorded in the field for each boring location. Attachment 1contains copies of the boring logs completed for the project.

(3)Sample Submittal to the Laboratory
The samples collected were labeled with the following information: Client, Site Name, Date, Sample Identification # and samplers initials. The samples were placed into an "iced" cooler for preservation purposes during transport to the laboratory. A laboratory chain-of-custody sheet was completed and submitted with the samples relinquished to the laboratory for analysis. Due to the lack of the presence of semi-volatiles and other compounds analyzed in the initial sample collected on 5/18/2000, all samples were subjected to analysis for VOC's only using EPA Method 8260.

III. SITE GEOLOGY

Pursuant to geologic reference sources, specifically the 1984 Berg Circular entitled, *"Potential for Contamination of Shallow Aquifers from Land Burial of Municipal Wastes"*, the site may be located within one of the following Berg Geologic Zones:

Zone Ax: Alluvium, a mixture of gravel, sand, silt and clay along streams, variable in composition and thickness;

Zone C2: Sand and gravel within 20-50 feet of land surface, overlain and underlain by relatively impermeable till, other fine-grained material, and/or bedrock;

Zone E: uniform, relatively impermeable silty or clayey till at least 50 feet thick; no evidence of interbedded sand and gravel.

Visual inspection of the samples collected of the soils beneath the site indicates that the native soils consist of silty clay materials within the shallow subsurface environment, up through a depth of approximately 12 feet below grade near the source (where the drain pipe exits the building). Within this area in which the source is located, the elevation is approximately 4 -5 feet higher than the remaining topography, particularly that at and north of the loading dock area. At approximately 11' feet below grade at the source location, a stiff, grey silty clay layer is encountered which appears to be the confining layer absent of impact above TACO Tier 1 standards. This confining layer is subsequently encountered at shallower depths across the site in the direction of the loading dock. Additionally, the initial strata immediately encountered at the site consists of non-native clayey fill materials. Without the completion of borings to greater depths, the type of Berg soils that underlay the site cannot be defined.

IV. SOIL SAMPLE ANALYSIS

Samples from the depth interval indicating the highest levels of potential impact (based upon visual and/or field screening analysis) from each boring location were submitted to an environmental testing laboratory for purposes of analysis for Volatile Organic Compounds (VOC's, EPA Method 8260), which were initially detected in the first sample collected and analyzed from the site.

Laboratory analysis of the samples collected did result in levels of several (VOC) compounds that had initially been detected at several of the borings installed. A table summarizing the results of the analysis completed in comparison to TACO Tier 1 standards is incorporated as Attachment 2, along with copies of the laboratory analysis reports for each of the samples submitted for analysis.

Based upon review of the analysis results, the highest impact is located at the bottom of the concrete stoop located immediately adjacent to the unloading dock area. It appears that releases of contaminants from the drainage pipe would follow the topography of the ground surface and flow towards the bottom of the concrete steps towards the unloading dock. Materials appear to have accumulated at this location and infiltrated into the ground.

V. CONCLUSIONS AND RECOMMENDATIONS

In general, the levels detected at the site were compared to the TACO Tier 1 standards which comprise the initial Tier of cleanup objectives developed under TACO by the Illinois EPA . TACO Tier 1 evaluations are used as the first basis of comparison in establishing impact and corresponding remediation. Tier 1 standards are based upon three types of exposure: ingestion, inhalation and the migration path to groundwater ingestion routes of exposure, and is additionally based upon property use, i.e., residential versus commercial/industrial. TACO uses a series of ASTM equations which models the transport of contaminants through the subsurface. Tier 1 standards are calculated from these equations using conservative, generic calculation parameters. It appears that the primary route of exposure that the contaminant levels at this site exceed, under a Tier 1 evaluation, is the migration to groundwater ingestion exposure route. There are, however, several locations at which the inhalation exposure routes are additionally exceeded. A summary identifying these exceedences is incorporated into the following table:

SAMPLE I.D./DEPTH	PARAMETERS ABOVE TACO TIER 1 RESULTS IN PPM		
	TETRACHLOROETHENE	TRICHLOROETHENE	VINYL CHLORIDE
S-1 @ 4'	14.9	0.618	0.116
B2 @ 8-10'	66.7	5.96	ND
B4 @ 6-8'	220.8	0.496	ND
B5 @ 4'	4.03	0.250	ND
B6 @ 4'	97.7	0.129	ND
B7 @ 4'	0.147	ND	ND
IEPA TACO TIER I CLEANUP OBJECTIVES – RESIDENTIAL, PPM			
INGESTION	12	58	0.3
INHALATION	11	5	0.03
IEPA TACO TIER I CLEANUP OBJECTIVES – COMMERCIAL/INDUSTRIAL, PPM			
INGESTION	110	520	3
INHALATION	20	8.9	0.06
IEPA TACO TIER I CLEANUP OBJECTIVES – CONSTRUCTION WORKER, PPM			
INGESTION	2400	1200	65
INHALATION	28	12	0.08
IEPA TACO TIER I CLEANUP OBJECTIVES – MIGRATION TO GW INGESTION (BOTH RESIDENTIAL & COMMERCIAL/INDUSTRIAL			
CLASS I	0.06	0.06	0.01
CLASS II	0.3	0.3	0.07

Figure 2 also provides a map in which an impact boundary, of those levels exceeding Tier 1 standards, is estimated.

However, TACO additionally establishes Tier 2 and Tier 3 objectives, which are based on the development of site-specific standards/modeling. In lieu of the conservative, all encompassing parameters for use in calculating cleanup objectives as done under Tier 1, Tier 2 standards are based upon the use of site-specific parameters that are developed from the collection and geotechnical testing of the soils at the site. Tier 3 further exemplifies site specific development of standards by allowing the use of additional modeling of the contaminants present at a site, in addition to considering other conditions not allowed under Tier 1 or Tier 2 .

Additionally, under TACO evaluations, the use of institutional controls and engineering barriers to limit the exposure to contaminants at a Property is allowed. Institutional controls include the use of restrictions to limit the use of the property, prohibit the installation or use of on-site wells, and facilitate the use of highway authority agreements, etc. Engineering barriers include the installation of such barriers as clean soil, concrete or asphalt caps over the impacted areas to prohibit exposure to the underlying contaminants.

In conclusion, TACO was developed by the Illinois EPA in order to address impact at industrial/commercial properties using a risk-based approach in lieu of one set of broad, conservative standards for establishing "clean" which in the past has created costly and unnecessary cleanups. The IEPA now recognizes site specific conditions for establishing cleanup objectives, as wells as the use of institutional controls and engineering barriers to minimize the risk associated with impacted properties.

With regard to the specific impact discovered at the site, there is a high likelihood that the calculation of a site specific cleanup objectives, in conjunction with the limited application of engineering barriers, may be able to demonstrate that the existing levels can be allowed to remain in-place as-is. Based upon review of the areas exceeding TACO cleanup objectives, ENMARC would like to provide the following evaluations and recommendations:

1. Based upon the fact that the site is currently supplied with potable water from a municipal water supply source, and that the installation of an on-site well is not necessary, and may even be prohibited at the Village level, the groundwater ingestion route of exposure to the contaminant levels is limited, therefore the exposure route with regard to groundwater ingestion is basically eliminated; and

2. Collection of a sample for physical soils analysis, for purposes of calculating site specific Tier 2 cleanup objectives for the inhalation exposure route. There are four areas at which the inhalation exposure route standards under Tier 1 have been exceeded, based upon the current and continuing industrial use of the Property: S-1, B2, B4, and B6. Prior experience with similar contaminants and soils indicates that most of these locations would fall under a Tier 2 standard for inhalation, excepting for B4 where the levels of Tetrachloroethene are relatively high @ 220.8 ppm. This location also exceeds the standard established for the ingestion exposure route for Tetrachloroethene (@ 110 ppm) which cannot be changed by a Tier 2 evaluation. Therefore, the application of a concrete cap to act as a barrier to the impact would suffice. An approximate 10' x 10' concrete patio over the location of B4 would sufficiently eliminate the inhalation and ingestion exposures to the impact levels at this location.

In order to achieve the above, an additional investigation and collection of samples for both chemical and physical analysis would be necessary. The cost of the investigation (by ENMARC) would be approximately $ 4,125.00. This would include the installation of up to 5 additional borings, the geotechnical and chemical analysis of these samples, TACO modeling to determine Tier 2 site specific objectives, and a final report. The additional sampling and analysis will take several weeks to complete due to the extensive laboratory work required. In conjunction with the use of site specific objectives, the 10' x 10' patio at the highest area of impact (B4) would act as an engineering barrier, which would in all likelihood eliminate the routes of exposure to the contamination in accordance with the protocol established under TACO.

If Tier 2 calculations do not resolve the inhalation impact areas (specifically that @ B6), we estimate that a 25' x 15' area would require capping with concrete to serve as an additional engineering barrier. The cost of the engineering barriers would thus be approximately $ 5000. The total cost of addressing the impacted areas by means of risk management would subsequently be $ 10,000.00.

LIMITATIONS

Conclusions and recommendations in the Phase II section of this report are based upon the data obtained from samples collected at the indicated locations and from any other information discussed in this report. Only a limited evaluation was performed and this report does not reflect any variations which may occur between sample locations. The nature and extent of such variations may not become evident until later. If variations appear evident, it will be necessary to re-evaluate the recommendations in this report.

The observations described in this report were made under the conditions state herein. The findings presented in the report were based solely upon the services described in 20-656.02 and not on tasks or procedures beyond the scope of the described and authorized services.

Certain site-specific information presented in this report was obtained from the parties herein referenced. ENMARC did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of this subsurface site investigation.

The objective of this Phase II subsurface site investigation was to provide data for the evaluation of the site located at 2659 Wisconsin Ave., Downers Grove, Illinois. Further investigative site information which was not available to ENMARC at the time of this assessment may result in a modification of the findings stated above.

This report has been prepared in accordance with generally accepted site assessment practices. No other warranty, expressed or implied, is made.

(1) TACO -- Tiered Approach to Cleanup Objectives -- 35 IAC Part 742.

(2) Application of Commercial/Industrial Standards requires the use of an institutional control limited the use of the Property to Commercial/Industrial.

(3) No objective established under TACO. Objective established by IEPA Office of Chemical Safety.

B => Acetone found in lab blank @ 0.0207ppm; => Methylene Chloride found in lab blank @ 0.0162mg/kg.

Notes Those levels exceeding Tier 1 standards are shaded.
NT => Not Tested due to lack of SVOC's at source discovered from initial sampling efforts (@ S-1).

PROJECT NAME	: **MOREY BLDG, DOWNERS GROVE, IL**
NUMBER#	: 20.565
TASK ORDER	: N/A
ATTN	: **J. Virgilio**
RECEIVED	: 06/02/00
REPORTED	: 06/14/00
FILE ID#	: **00005360 THRU 00005368**

PROJECT SUMMARY:

Analyses were performed in accordance with the methods found in the USEPA publication: Test Methods for Evaluating Solid Waste, Physical/Chemical methods, SW- 846, 3rd Edition, December 1996. Specific method references are listed on the analytical report.

Results have been expressed on a "wet" weight (as received) basis except where otherwise specified .

All analyses were performed within established holding times, and all Quality Control criteria as outlined in the methods have been met.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide–LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

Manifest Line Item #	1. USEPA HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBCATEGORY	4. HOW MUST THE WASTE BE MANAGED? (Circle one)	5. REFERENCE NUMBER(S) of Hazardous Constituents contained in the waste. Complete for F001-F005, F039, D001-D043, Soil & Debris wastes.

HOW MUST THE WASTE BE MANAGED?

MOR 000636

For S, circle the appropriate response for the 3 *italicized* options:

S. THIS CONTAMINATED SOIL *DOES / DOES NOT* (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND *DOES / DOES NOT* (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND *IS SUBJECT TO / COMPLIES WITH* (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imprisonment.

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.

B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.

C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.

G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.

J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. *(Please include the date the waste is subject to the prohibitions in Column 5)* This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)

K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43, IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS, AS DEFINED IN 268.2(i) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

MATERIAL SAFETY DATA SHEET

MSDS

Heraeus Inc. Cermalloy Division
24 Union Hill Industrial Park
West Conshohocken, PA 19428

Office Telephone: (610)825-6050
Emergency Telephone: (800)255-3924
Date Prepared: 5/25/95
Date Revised: 6/27/96

Section 1: IDENTIFICATION

Product Name: PD944
CAS Registry Number: not applicable since product is a mixture.

Section 2: COMPONENT HAZARD DATA (3)

Hazardous Components		CAS No.	Exposure Limits
epoxy	35-45%	25068-38-6	not established
thinner	10-20%	26761-45-5	not established
hardener	25-35%	134091-76-2	not established
pigment	1-3%	71566-54-6	not established
silica, amorphous	5-15%	7631-86-9	10mg/M3 ACGIH (1)

NFPA rating: health 1, fire 1, reactivity 1

(1) TLV is very unlikely to be reached since material is in the paste form; hence no airborne particles. Provide adequate ventilation in the firing room to remove any evolved fumes.
(2) Supplementary data on lead attached if applicable.
(3) Per 29 CFR 1910 the mixture has not been tested as a whole. All hazardous components which comprise >=1% of the mixture (0.1% if carcinogenic) are listed. Percentages of individual components are not listed as this information is considered a Trade Secret; it is not required that it be disclosed.

Section 3: PHYSICAL DATA

Appearance and Odor: Physical State - thick paste
Color - red
Odor -mild
Initial Boiling Point of Organic Mixture: (>400 ^{o}F)
Specific Gravity: 1
Vapor Pressure (Estimated for mixture, 20^{o}C): N/AP
Vapor Density (Air = 1): N/AP
Evaporation Rate
(Estimated for mixture, n-butyl acetate = 1,20^{o}C): N/AP
Solubility in water: insoluble

Section 4: FIRE, REACTIVITY, AND EXPLOSION HAZARD DATA
Flash Point (Most flammable solvents): (>200 ^{O}F)
Autoignition Temperature (Most Flammable Solvents):N/AV
Flammable Limits in Air (Most Flammable Solvent):N/AV
Extinguishing Media: Water Fog, Alcohol Foam, Dry Chemical
Special Fire Fighting Procedures: Cool exposed containers with water. When fighting use NIOSH approved self-contained breathing apparatus with full face piece operated in positive pressure mode, as evolved fumes are toxic and cause respiratory irritation.
Unusual Fire and Explosion Hazards: Store at ambient temperature away from open flame or sparks.
Stability: The material is stable under normal use conditions. Avoid temperatures > 40oC and moisture.
Incompatibility: Will not react with water. Avoid mixing with strong oxidizing agents, acids, and caustics.
Hazardous Decomposition Products: Combustion produces carbon monoxide, carbon dioxide, and various hydrocarbons.
Hazardous Polymerization: Will not occur.
Section 5: Health Hazards of Components *
OSHA Permissible Exposure Limit: Not Established for Mixture

Components listed as carcinogenic by NTP, IARC, or OSHA: None

Primary Routes of Entry: inhalation, skin, eye,ingestion.

ROUTE EXPOSURE	ACUTE & CHRONIC SYSTEMS	MEDICAL CONDITIONS AGGRAVATED	EMERGENCY FIRST AID
Inhalation	Irritant	Unknown	Remove to fresh air. If breathing difficult give oxygen. If breathing has stopped, start artificial respiration.
Skin Contact	Irritant	Unknown	Remove contaminated clothing and launder before reuse. Wash thoroughly with soap and water.
Eye Contact	Moderate	Unknown	Flush with running water for 15 mins. lifting upper and lower lids.

Ingestion	Irritation of the GI system	Unknown	Drink large quantities of water

Other health information:

epoxy: LD50 oral rat: >2000mg/kg

thinner: *ingestion of large quantities (1% of diet) of* this product produced body weight changes in experimental animals and in the liver and kidney. Levels of 0.5% and 1.0% wt in the diet also caused changes and reduced erythrocyte count and hematocrit. If ingested, do not induce vomiting. Drinke water and get medical attention.

hardener: oral LD50 (rats) <3000 mg/Kg
dermal: LD50 (rabbits) >3000 mg/kg

* If necessary, copies of toxicology studies provided to HICD by the manufacturers of the above hazardous components can be supplied. Synergistic or additive effects of the above chemicals are unknown, as are the effects of exposure to these chemicals in addition to others present in the workplace.

** In all cases keep individuals warm and quiet and get medical attention.

Section 6: PERSONAL PROTECTION AND CONTROLS

Personal Protection: Avoid prolonged skin contact.

Respiratory: Not required if local exhaust is satisfactory. Ten (10) air changes per hour are recommended. If overexposure occurs, use NIOSH-OSHA approved air supply respirator suitable for organic vapors. Administrative or engineering controls should be implemented to reduce exposure .

Eye: Chemical splash goggles or OSHA approved glasses.

Skin: Solvent resistant glove (polyurathane, vinyl)

Engineering Controls: Recommended ventilation, provide sufficient mechanical (general or local exhaust) ventilation to maintain concentrations below TLV -10 air changes per hour.

Hygienic Practices: Prevent eye contact with glasses or goggles, minimize skin contact, use with adequate ventilation to minimize inhalation of vapor. Do not smoke or eat in work areas. Wash hands thoroughly prior to smoking or eating.

Section 7: STORAGE, SPILL, AND DISPOSAL

Special storage conditions: Keep containers closed and sealed when not in use. Steps to be taken in case material is released or spilled:

Clean spill with disposable paper towels (wear rubber gloves) and wash area with soap and water.

Waste Disposal Method: Dispose in accordance with all local, state and federal regulations.

EPA Waste Class: Residual

Section 8: TRANSPORTATION
DOT ID No.: not regulated
DOT hazard class: not regulated
Proper shipping name: adhesive- not regulated
Section 9: REFERENCES
This MSDS is compilation of information supplied in the MSDS's obtained from the manufacturers of the chemicals present in this product. Also, 29 CFR.1210 was consulted for TLV information.

*** This information is for guidance, and is furnished without warranty of any kind. It is a compilation of data believed to be reliable, but Heraeus Incorporated, Cermalloy Division assumes no obligation or liability for its completeness or accuracy.

MATERIAL SAFETY DATA SHEET

AS-3

(Prepared According To 29 CFR 1910.1200)

Effective Date - 08-04-97

SECTION 1 - PRODUCT IDENTIFICATION

Product Name: LIME & SCALE REMOVER
Supplier's Name: UNISOURCE WORLDWIDE, INC
Supplier's Address: POST OFFICE BOX 958
VALLEY FORGE, PA
19482

Chemical Family: ACID CLEANER
Proper Shipping Name: CORROSIVE LIQUID, ACIDIC, INORGANIC, N.O.S., 8, UN3264, PGII (CONTAINS PHOSPHORIC ACID)

SECTION 2 - INGREDIENTS

CHEMICAL NAME	OSHA/PEL	ACGIH/TLV	CAS NO.
PHOSPHORIC ACID	N.E.	1 MG/M3	7664-38-2
HYDROXYACETIC ACID	N.E.	N.E.	79-14-1

SECTION 313 - SUPPLIER NOTIFICATION
THIS PRODUCT CONTAINS THE FOLLOWING TOXIC CHEMICALS SUBJECT TO THE REPORTING REQUIREMENTS OF SECTION 313 OF THE EMERGENCY PLANNING AND COMMUNITY RIGHT-TO-KNOW ACT OF 1986 AND OF 40 CFR 372:

CAS #	CHEMICAL NAME	% BY WEIGHT
7664-38-2	PHOSPHORIC ACID	12

THIS INFORMATION MUST BE INCLUDED IN ALL MSDS THAT ARE COPIED AND DISTRIBUTED FOR THIS MATERIAL

SECTION 3 - PHYSICAL DATA

Specific Gravity: 1.086
Solubility in Water: 100% SOLUBLE
Physical Description: CLEAR LIQUID
Odor: CHARACTERISTIC ACID ODOR
Boiling Point: > 212 F
Vapor Pressure (mmHg): 22.0

SECTION 4 - FIRE AND EXPLOSION DATA

Flash Point (Method Used): NONE
Extinguishing Media: AS REQUIRED BY SURROUNDING FIRE
Special Fire Fighting Procedures: WEAR SELF-CONTAINED FULL-FACE BREATHING APPARATUS

Unusual Fire and Explosion Hazards: COULD REACT WITH METALS TO GENERATE FLAMMABLE HYDROGEN GAS.

SECTION 5 - REACTIVITY DATA

Stability: STABLE
Conditions to Avoid: EXTREME TEMPERATURES
Polymerization: WILL NOT OCCUR
Conditions to Avoid: NONE
Incompatability (Materials to Avoid): BASES, METALS, OXIDIZERS
Hazardous Decomposition Products: H2, CO2, CO

SECTION 6 - STORAGE AND HANDLING INFORMATION

Precautions to be Taken in Handling and Storage:
STORE IN COOL, DRY PLACE. KEEP CONTAINER CLOSED WHEN NOT IN USE. KEEP OUT OF THE REACH OF CHILDREN

SECTION 7 - HEALTH HAZARDS AND FIRST AID

Effects of Overexposure:
SEVERITY OF INJURY DEPENDS LARGELY ON PRODUCT CONCENTRATION AND DURATION OF EXPOSURE. IMMEDIATE ACTION IS NECESSARY TO LIMIT SEVERITY OF INJURY. CAN CAUSE MINOR IRRITATION TO SEVERE BURNS AND TISSUE DAMAGE TO EXPOSED AREAS OF BODY.

Other Precautions:
CORROSIVE LIQUID. AVOID SKIN CONTACT.

Carcinogenicity:
NTP: NO
IARC: NO
OSHA: NO

First Aid Procedures

Skin:
REMOVE CONTAMINATED CLOTHING AND IMMEDIATELY WASH EXPOSED AREA WITH WATER FOR 15 MINUTES. GET MEDICAL ATTENTION IF NECESSARY.

Eyes:
FLUSH EYES IMMEDIATELY WITH LARGE AMOUNT OF WATER FOR 15 MINUTES, LIFTING THE EYELIDS OCCASIONALLY. GET MEDICAL ATTENTION AT ONCE.

Inhalation:
MOVE PERSON TO FRESH AIR. IF BREATHING STOPS, ADMINISTER ARTIFICIAL RESPIRATION. GET MEDICAL ATTENTION IMMEDIATELY.

Ingestion:
GIVE LARGE QUANTITIES OF WATER THEN SEVERAL GLASSES OF MILK. DO NOT INDUCE VOMITING. GET MEDICAL ATTENTION IMMEDIATELY.

SECTION 8 - PERSONAL PROTECTION INFORMATION

Respiratory Protection: ONLY W/O ADEQUATE VENTILATION
Ventilation: GENERAL EXHAUST
Protective Gloves: RUBBER GLOVES
Eye Protection: SAFETY GOGGLES
Other Protective Equipment: AS REQUIRED TO LIMIT SKIN CONTACT. WASH HANDS THOROUGHLY AFTER USE.

MOR 000649

SECTION 9 - SPILL OR LEAK PROCEDURES

Steps to be Taken in Case Material is Released or Spilled:
CONTAIN LARGE SPILLS AND PUMP TO RECOVER. SMALL SPILLS CAN BE MOPPED UP AND RECOVERED. CONTAMINATED AREA SHOULD BE NEUTRALIZED.

Waste Disposal Methods:
DISPOSE OF IN ACCORDANCE WITH ALL FEDERAL, STATE AND LOCAL REGULATIONS.

Infotrac Emergency Phone: 1-800-535-5053 CODE-AB

Disclaimer: Unisource Worldwide, Inc. and the manufacturer believe that the information contained on this Material Safety Data Sheet is accurate. The suggested procedures are based on experience as of date of publication. They are not necessarily all inclusive nor fully adequate in every circumstance. Also, the suggestions should not be confused with, nor followed in violation of applicable laws, regulations, rules or insurance requirements.

ACTI-BRITE

Material Safety Data Sheet

SECTION I - COMPANY IDENTIFICATION

PRODUCT: ACTI-BRITE

CAT. NO.: AB-1, AB-5, AB-55

MANUFACTURED BY:
Virginia KMP Corporation
4100 Platinum Way
Dallas, Texas 75237

TELEPHONE NUMBERS:
Office: 1-(214) 330-7731
Emergency Only: 1-(800) 424-9300

SECTION II - HAZARDOUS INGREDIENTS

OSHA Hazardous Components (29 CFR 1910.1200)		EXPOSURE LIMITS: 8 HR. TWA OSHA PEL		ACGIH TLV
Phosphoric acid (CAS# 7664-38-2)		1 mg/m^3		1 mg/m^3
Hydrofluoric acid (CAS# 7664-39-3)	STEL	3 mg/m^3	STEL	3 mg/m^3
		3 ppm (F)	CL	3 ppm (F)
	STEL	6 ppm (F)		

SECTION III - HAZARDS IDENTIFICATIONS

EMERGENCY OVERVIEW: DANGER! Corrosive to all body tissues. Avoid contact with skin or eyes. Harmful if inhaled or swallowed.

POTENTIAL HEALTH EFFECTS:

INHALATION: Inhalation of vapor or mist is corrosive to respiratory tract. Symptoms include coughing, wheezing, laryngitis, shortness of breath, headache, nausea, and vomiting.

EYE CONTACT: Liquid or vapors are corrosive to eyes. Immediate irritation followed by destruction of tissue.

SKIN CONTACT: This material is corrosive to all body tissues. Full extent of damage may not be apparent for 12 - 24 hours after exposure. Severe burns are slow healing. Gangrene may follow damage.

INGESTION: Corrosive, moderately toxic, causes nausea, vomiting, loss of consciousness.

CHRONIC Effects: Damage to kidneys and liver (phosphoric acid). Changes in bones or joints (hydrofluoric acid).

NOTE:

CARCINOGENICITY: LISTED IN NTP? No IARC? No OSHA Regulated? No

SECTION IV - FIRST AID MEASURES

INHALATION: *Remove victim to fresh air and, if needed, immediately begin artificial respiration. Give oxygen if breathing is labored. Get emergency medical help. Contact a physician immediately.*

EYE CONTACT: Flush eyes with water for 15 minutes. Get medical attention.

SKIN CONTACT: Flush with water or soap and water for 15 minutes or until all traces have been removed. Seek medical attention if symptoms develop and persist.

INGESTION: Do not induce vomiting. Rinse mouth out with water. Get immediate medical attention.

SECTION V - FIRE FIGHTING MEASURES

FLASHPOINT (TEST METHOD): None
FLAMMABLE LIMITS: LOWER: NA UPPER: NA
AUTOIGNITION TEMPERATURE: NA

GENERAL HAZARD: Toxic fumes produced in fire.

FIRE FIGHTING INSTRUCTIONS: Approach fire from upwind side. Avoid breathing smoke, fumes, mist, or vapors on the downwind side. Firefighters wear protective clothing and self contained breathing apparatus.

EXTINGUISHING MEDIA: Dry powder, carbon dioxide (CO_2), water fog or spray.

HAZARDOUS COMBUSTION PRODUCTS: Smoke, irritating vapors, toxic fumes of PO_x, and corrosive F fumes, CO, CO_2.

SECTION VI - ACCIDENTAL RELEASE MEASURES

LAND SPILL: Emergency response coordinator must have mandated training. Eliminate all ignition sources. SMALL SPILLS: Pick up with absorbent materials and place in non-leaking containers; seal tightly for proper disposal or reuse. LARGE SPILLS: Evacuate the hazard area of unprotected personnel. Wear appropriate respirator and protective clothing. Shut off source of leak if safe to do so. Dike and contain. Remove with vacuum trucks or pump to storage/salvage vessels.

WATER SPILL: Notify proper authorities.

Clean up leaks/spills immediately to prevent soil or water contamination.

SECTION VII - HANDLING AND STORAGE

HANDLING: Avoid contact with skin, eyes, and clothing. After handling this product, wash hands before eating, drinking or smoking. If contact occurs, remove contaminated clothing. If needed, take first aid action shown in section IV. Launder contaminated clothing before reuse.

STORAGE: Store away from food stuffs, alkaline materials.

ACTI-BRITE

SECTION VIII - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Local exhaust ventilation recommended.
PERSONAL PROTECTION: If TLV is exceeded wear NIOSH approved respirator. Use heavy rubber type gloves, full face shield and boots, aprons, drench showers, eye wash as needed for protection against spills and/or splashes.

SECTION IX - PHYSICAL AND CHEMICAL PROPERTIES

VAPOR PRESSURE: ND
SPECIFIC GRAVITY (H_2O=1): 1.15
SOLUBILITY IN WATER: Complete
pH: <2.0
BOILING POINT: 212 F
APPEARANCE & ODOR: Pink liquid, pungent odor.
VAPOR DENSITY (Air=1): >1
EVAPORATION RATE (BuAc=1): >1
VOC: 0%
FREEZING POINT: ND

SECTION X - STABILITY AND REACTIVITY

STABILITY: Stable.
CONDITIONS TO AVOID: High temperatures.
MATERIALS TO AVOID: Alkaline materials, may react with metals to produce hydrogen gas.
HAZARDOUS DECOMPOSITION PRODUCTS: Corrosive F fumes, toxic PO_x fumes, from combustion - smoke, CO, CO_2.
HAZARDOUS POLYMERIZATION: Will not occur.

SECTION XI - TOXICOLOGICAL INFORMATION

Phosphoric Acid	LDLo:	220 mg/kg	(unr - man)
	LD50:	1530 mg/kg	(oral - rat)
	LD50:	2740 mg/kg	(skin - rat)
Hydrofluoric Acid	LCLo:	50 ppm / 30 M	(inh - human)
	LC50:	966 ppm / 1 hr	(inh - rat)
	TCLo:	100 mg/m^3	(inh - human) NOSE,EYE, PUL

SECTION XII - ECOLOGICAL INFORMATION

Harmful to aquatic life in very low concentrations.

Phosphoric Acid	138 ppm / 24 hr / mosquito fish / TLm / fresh water
Hydrofluoric Acid	60 ppm / fish / lethal / fresh water

SECTION XIII - DISPOSAL CONSIDERATIONS

Dispose as hazardous waste. Classification and documentation is required before disposal. Follow all local, state and federal regulations.

SECTION XIV - TRANSPORTATION INFORMATION

PROPER SHIPPING NAME: Corrosive liquid, Acidic, Inorganic, n.o.s. (contains phosphoric acid, hydrofluoric acid), 8, UN3264, PG II

HAZARD CLASS: 8
IDENTIFICATION NUMBER: UN3264
DOT Emergency Guide #: 59
Reportable Quantity (RQ): 65 gallons (hydrofluoric acid)
International: Corrosive liquid, Acidic, Inorganic, n.o.s. (contains phosphoric acid, hydrofluoric acid), 8, UN3264, PG II, IMDG 8147-1

SECTION XV - REGULATORY INFORMATION

TSCA (Toxic Substance Control Act): Components of this product are listed on the TSCA Inventory.
CERCLA (Comprehensive Environmental Response, Compensation and Liability Act): Reportable quantity is 65 gallons (hydrofluoric acid). Cc local authorities for other reporting requirements.

SARA TITLE III (Superfund Amendments and Reauthorization Act):

Section 302	Threshold Planning Quantity is 65 gallons (hydrofluoric acid)		
Section 313	Hydrogen Floride	(CAS# 7664-39-9)	8 - 15%
	Phosphoric Acid	(CAS# 7664-38-2)	5 - 10%

CALIFORNIA PROPOSITION 65: Not listed.

SECTION XVI - OTHER INFORMATION

State Right-to-Know Programs: MA, NJ, PA

NFPA Ratings
Health: 4
Flammability: 0
Reactivity: 1
HMIS Protective Equipment: X See your supervisor

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: 3880 Adhesive Electrically Conductive
Item No.: 30077
Product Type: Conductive Adhesive

Rec. 3/9/01

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
SILVER*	7440-22-4	50-70
Epoxy resin	Proprietary	10-30
Epoxy resin	Proprietary	10-30
Epoxy resin	Proprietary	1-10
Amine hardener	Proprietary	1-5
HARDENER	Proprietary	1-5
Carbitol acetate	112-15-2	1-5

* This component is listed as a SARA Section 313 Toxic Chemical.

The following numbers have been used to register components of this product as trade secrets for the State of New Jersey:
NJ 06-070-1067-5041P
NJ 06-070-1067-5042P
NJ 06-070-1067-5090P
NJ 06-070-1067-5091P
NJ 06-070-1067-5092P

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
SILVER	0.1 mg/m3 TWA	0.01mg/m3 TWA	None

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: May irritate eyes, skin, and gastrointestinal tract. Prolonged or repeated exposure may cause allergic skin reaction. Prolonged expoxure to silver may cause argyria which is a pigmentation of skin and other body tissue.

Primary Routes of Entry: Inhalation, ingestion, eyes, skin.

Signs and Symptoms of Exposure: Inhalation may produce allergic reactions in some individuals. Ingestion may cause gastrointestinal irritation, nausea, vomiting, and diarrhea. Eye contact may cause severe irritation, burning sensation, blurred vision. Skin contact may produce allergic reaction in some individuals.

Existing Conditions Aggravated by Exposure: None known

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. Keep individual calm. Seek medical attention immediately.

Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.

Skin Contact: Remove contaminated clothing, wash immediately

Product Name: 3880 Adhesive Electrically Conductive
Item No.: 30077

4. FIRST AID MEASURES (continued)

	with soap and water. Wash contaminated clothing thoroughly before reuse. If irritation persists, obtain medical attention.
Eye Contact:	Flush thoroughly with water. If irritation persists, obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point:	More than 200°F Method:Pensky-Martens Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Use self-contained breathing supply.
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Take up with an inert absorbent. Store in a closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage:	Store below 80°F. Refrigerated storage (-40°F) is recommended to extend shelf life
(Contact Loctite Customer	Service 1-800-243-4874 for shelf life information)
Handling:	Avoid prolonged skin contact. Keep away from eyes. Avoid prolonged inhalation of mists or vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Wear chemical splash goggles.
Skin:	Wear solvent resistant gloves.
Ventilation:	Provide sufficient local exhaust ventilation to maintain exposure below TLV(s).
Respiratory	If the TLV of the product is exceeded, a mechanical or self contained breathing appartus is advised.
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Silver liquid\paste
Odor:	Faint epoxy
Boiling Point:	More than 300°F
pH:	Does not apply
Solubility in Water:	Not available
Specific Gravity	2.44
Volatile Organic Compound (EPA Method 24)	3.04 %; 74.26 grams/liter
Vapor Pressure:	Not available
Vapor Density:	Not available
Evaporation Rate (Ether = 1)	Not available

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	Strong oxidizers
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	Amines, aldehydes

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

Product Name: 3880 Adhesive Electrically Conductive
Item No.: 30077

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Do not landfill. Dispose of commercial material and empty containers through a licensed/permitted disposal contractor.

EPA Hazardous Waste Number: D011 / TCLP hazardous when disposed of per 40 CFR 261.24 (Silver).

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)
Domestic Ground Transport
- Proper Shipping Name: Unrestricted
- Hazard Class or Division: Unrestricted
- Identification Number: None
- Marine Pollutant: None

IATA
- Proper Shipping Name: Unrestricted
- Class or Division: Unrestricted
- UN or ID Number: None

15. REGULATORY INFORMATION

CA Proposition 65: WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
epichlorohydrin

16. OTHER INFORMATION

Estimated NFPA(R) Code:
- Health Hazard: 2
- Fire Hazard: 1
- Reactivity Hazard: 0
- Specific Hazard: Does not apply

Estimated HMIS(R) Code:
- Health Hazard: 2*
- Flammability Hazard: 1
- Reactivity Hazards: 0
- Personal Protection: See Section 8.

NFPA is a registered trademark of the National Fire Protection Assn.
HMIS is a registered trademark of the National Paint and Coatings Assn.

RF=Respirable Fraction, RD=Respirable Dust, hr=10hr TWA, L.F.C.=Lowest Feasible Concentration, TP=Total Particulate (Dust), N.E.=None Established (Exposure Limit)

SECTION III PHYSICAL PROPERTIES

Vapor Pressure (mm Hg): Not Available
Vapor Density (Air = 1): Not Available
Solubility in Water: Negligible
Appearance: Yellow solid bar
Odor: Mild fatty odor
Melting Point: 125°F (52°C)

Specific Gravity: >1.6
Boiling Point: Not Available
Evaporation Rate: Not Available
Volatility (%): Not Available
pH: Not Available

SECTION IV FIRE AND EXPLOSION DATA

Flash Point: 350°F (177°C)
Auto Ignition Temperature: Not Available

Flammable Limits: **LEL:** Unknown **UEL:** Unknown

EXTINGUISHING MEDIA: Carbon Dioxide, dry chemical, or foam

Special Fire Fighting Procedures: Fire fighters should wear full turnout gear and pressure-demand self-contained breathing apparatus (SCBA).

Unusual Fire and Explosion Hazards: None Known

SECTION V REACTIVITY DATA

Stable? Yes **Conditions to Avoid:** High temperatures

Incompatibility (Materials to Avoid): Strong oxidizers

Hazardous Decomposition Products: Oxides of carbon, nitrogen

Hazardous polymerization may occur? No **Conditions to Avoid:** None Known

Material Safety Data Sheet
Material/Trade Name: Bobbing Compound

MSDS Code: RIO-008

SECTION VI HEALTH HAZARD DATA

Primary Routes of Exposure: Inhalation, eye and skin contact

Acute signs and Symptoms of Overexposure: Material is not considered an inhalation hazard as supplied, but dust generated during buffing contains silica. Irritating to the eyes, skin and mucous membranes of the respiratory tract. Contact with molten material can cause severe burns.

Chronic Signs and Symptoms of Overexposure: Prolonged inhalation of silica dust may cause Silicosis, a fibrotic progressive lung disease charactorized by loss of lung capacity. Symptoms characteristic of this condition include coughing, difficulty breathing, wheezing, and repeated non-specific chest illness.

Carcinogenicity? Yes	NTP	IARC	ACGIH	OSHA	PROP65
Crystalline Quartz Silica	AHC	PC2A	No	No	C

AHC=Anticipated Human Carcinogen, PC2A=Probably Carcinogenic to Humans (Group 2A), C=Known in the state of California to be a Carcinogen

Conditions That May Increase Overexposure Potential: Any condition which creates a respirable dust. When using compound for buffing, proper ventilation should be used and appropriate protective equipment worn.

Medical Conditions Generally Aggravated by Exposure: Respiratory disease, damaged skin

FIRST AID PROCEDURES:

Eye Contact:	Flush contaminated eye(s) with plenty of water for at least 15 minutes while holding eyelids open. Seek medical attention immediately if irritation persists or if injury has occurred.
Skin Contact:	Wash area with soap and water. Seek medical attention if irritation develops or persists.
Inhalation:	Remove victim to fresh air. If breathing has stopped, properly trained personnel should begin artificial respiration or cardiopulmonary resuscitation (CPR) and medical assistance should be obtained immediately.
Ingestion:	Seek medical attention immediately. DO NOT INDUCE VOMITING.

SECTION VII PRECAUTIONS FOR SAFE HANDLING AND USE

Actions to Take for Spills: Provide adequate ventilation. Avoid breathing dust by dampening material with water, scoop or sweep up and place in approved containers. Do not flush to sewers o water ways.

Waste Disposal: Dispose of via a licensed firm in accordance with federal, state and local regulations (see EPA 40 CFR 261).

Precautions to be Taken in Handling and Storage: Store in a cool, dry, well ventilated area away from heat, and out of the sun, as product may melt. Observe all safeguards for container residue until cleaned or destroyed. Store in area where animals cannot get access to since pets, especially dogs, like to eat tallow based compounds.

Community Right-to-Know Requirements: None Known

SECTION VIII EMPLOYEE PROTECTION MEASURES

Ventilation: Local ventilation is preferred to meet TLV requirements. General ventilation is acceptable, if exposure is maintained below TLV.

Respiratory Protection: When airborne concentrations exceed TLV or are unkown, use a NIOSH/MSHA approved respirator for particulates in accordance with OSHA respiratory protection requirements (29 CFR 1910.134).

Eye Protection: Face sheild is recommended.

Protective Gloves: Cotton or leather gloves are recommended. Use heat resistant gloves when handling molten material.

Section VI Health Hazard Data

Primary Routes of Exposure: None known

Acute Signs and Symptoms of Overexposure: None known

Chronic Signs and Symptoms of Overexposure: None known

Carcinogenicity? No Listed in: Not listed

Medical Conditions Generally Aggravated by Exposure: None known

First-Aid Procedures

Eye: Hold eyelids open and flush eyes for 15 minutes with large quantities of water. Seek medical attention immediately.

Skin: Wash area with soap and water. Remove contaminated clothing. Seek medical attention.

Inhalation: Remove victim to fresh air. Restore breathing if necessary. Seek medical attention immediately.

Ingestion: Seek medical attention immediately.

Section VII Precautions for Safe Handling and Use

Actions to Take for Spills: Sweep up any material.

Waste Disposal: Dispose of in accordance with local, state and federal regulations.

Precautions to be Taken in Handling and Storage: Store away from extreme heat.

Other Precautions: None known

Section VIII Employee Protection Measures

Ventilation: Local ventilation is preferred to meet TLV requirements. General ventilation is acceptable, if exposure is maintained below TLV.

Respiratory Protection: If irritation occurs appropriate respiratory protection should be worn.

Eye Protection: Safety goggles Protective Gloves: Rubber gloves
Other Protective Equipment: None known
Work/Hygiene Practices: Eyewash station and safety shower should be available in areas of use. Wash thoroughly after handling product.

The information herein is given in good faith, but no warranty, express or implied, is made.

NA

Special Firefighting Procedures
Steel products in the solid state present no fire or explosion hazard.

Unusual Fire and Explosion Hazards
Dust hazard exists under favoring conditions of small particle size.
Dispersion in air and strong ignition source may result in an explosion.

MOR 000665

Reactivity Data

Stability	Incompatability (Materials to Avoid)
Stable	Mercury, Ammonia, Acetylene, Acids

Conditions to Avoid
Exposure during storage to strong acids, bases or oxidizing agents.

Hazardous Decomposition Products
Toxic gases, aerosols, and vapors may be released in a fire involving copper alloys if fumes of other compounds or other contacting materials are involved.

Product
Brass

Section 6 Health Hazard Data

NOTE: STEEL PRODUCTS IN THE NATURAL STATE DO NOT PRESENT AN INHALATION, INGESTION OR CONTACT HAZARD. HOWEVER, OPERATIONS SUCH AS BURNING, WELDING, SAWING, BRAZING AND GRINDING MAY RELEASE FUMES AND/OR DUSTS WHICH MAY PRESENT HEALTH HAZARDS IF TLV'S ARE EXCEEDED

MAJOR EXPOSURE HAZARD

☒ Inhalation ☒ Pb Skin Contact ☐ Skin Absorption ☐ Eye Contact ☒ Pb Ingestion

Effects of Overexposure

Short term exposure to fumes/dust may produce irritation of eyes and respiratory system. Inhalation of high concentrations of freshly formed oxide fumes of copper, zinc and lead may cause metal fume fever characterized by a metallic taste in the mouth, dryness and irritation of the throat and influenzalike symptoms.

Inhalation or ingestion of lead particles may result in lead-induced systemic toxicity. Symptoms of lead poisoning include abdominal cramps, anemia, muscle weakness and headache. Prolonged exposure can cause behavioral changes, kidney damage, CNS damage and reproductive effects.

Suspected Cancer Agent? __X__ NO: This product's ingredients are not found in the lists below.

_____ YES: ____ Federal OSHA ____ NTP ____ IARC

Emergency and First Aid Procedures

If exposed to excessive levels of metal fumes, remove to fresh air, seek medical aid immediately.

Eyes - Flush with water for at least 15 minutes.

Section 7 Spill or Leak Procedures

Spill or Leak Procedures

NA

Waste Disposal Methods

According to local, state and federal regulations

Section 8 Special Protection

Respiratory

NIOSH/MSHA - Approved dust and fume, respirator should be used to avoid excessive inhalation of particulates when exposure exceeds TLV's.

Ventilation

Local exhaust ventilation should be utilized when welding, burning, sawing, brazing, grinding or machining when exposure exceeds TLV's.

Eye Protection and Protective Clothing

Safety glasses or goggles should be utilized as required by exposure. Other protective equipment should be utilized as required by the welding standards.

Section 9 Special Precautions

In welding, precautions should be taken for airborne contaminants which may originate from components of the welding rod.

Arc or spark generated when welding or burning could be a source of ignition for combustible and flammable materials.

MOR 000666

Formula: Trade Secret

Phone Number: 714-631-3707

Supplier's Address: 729 W. 16TH ST STE A-3, COSTA MESA, CA 92627

NPCA Hazardous Materials Rating Identification System

4 = Extreme
3 = High
2 = Moderate
1 = Slight
0 = Insignificant

Health	0
Flammability	0
Reactivity	0
Special Protection	0

SECTION 2 - INGREDIENTS

CHEMICAL NAME:	CAS NO.	WT.%	PEL	TWA-TLV	STEL-TLV	CARCINOGEN
Contains no hazardous components Under Current OSHA definitions. Complies with OSHA's 29 CRF 1910. 1200 "Trade Secrets"		N/A	N/A	N/A	N/A	N/A

SECTION 3 - PHYSICAL DATA

Boiling Range: 212°
Specific Gravity: 1.02
Vapor Pressure: Same as water
Vapor Density: Same as Water
pH: 9.0 to 9.5
Solubility in Water: Complete
Evaporation Rate: 1.0
Melting Point: N/A
Physical Description: Slightly viscous amber color solution, light citrus odor.

SECTION 3 - PHYSICAL DATA

Flash Point (Method Used): None
Upper Explosive Limit: None
Extinguishing Media: Non-Combustible Liquid
Special Fire Fighting Procedures: None
Unusual Fire & Explosion Hazards: None

SECTION 5 - REACTIVITY DATA

Stability: Stable
Hazardous Polymerization: Will not occur
Incompatibility (Materials to Avoid): Strong oxidizers, acids, heat over 250°
Hazardous Decomposition Products: None Known

SECTION 6 - STORAGE & HANDLING INFORMATION

Precautions to be Taken in Handling and Storage:

Store tightly closed container in a dry area at temperatures between 40 - 120°F. Keep product out of eyes. Keep out of the reach of children. Clothing or shoes which become saturated with substance should not be reworn until thoroughly cleaned. Local, state, federal laws apply.

SECTION 7 - HEALTH HAZARDS AND FIRST AID

Effects of Overexposure: There are no known effects from overexposure to this product. However, practice of good industrial hygiene exposure to any chemical should be kept to a minimum.

Carcinogenicity: N/A
NTP: N/A
IARC Monographs: N/A
OSHA Regulated: N/A

None of the ingredients are listed as carcinogens by IARC, NTP, OSHA

Medical Conditions: None

Generally Aggravated by Exposure: None Known

First Aid Procedures:

Skin: Flush with water. Seek medical attention if irritation persists.

Eyes: Flush with large quantities of water, occasionally lifting upper and lower lids. Seek medical attention if irritation persists.

Inhalation: N/A

Ingestion: Drink plenty of water. Seek medical attention if irritation persists.

MOR 000669

SECTION 8 - SPECIAL PROTECTION INFORMATION

Respiratory Protection: No special requirements.

Protective Gloves: Recommended, but not necessary.

Other Protective Equipment: No special measures are required.

Ventilation: Standard. If vapors are detected, ventilate work area by opening windows and using exhaust fans

Eye Protection: No Special Measures Required.

SECTION 9 - SPILL OR LEAK PROCEDURES

Steps to be Taken in Case Material is Released or Spilled: Absorb spill with inert absorbent material. Pick up and place residue in a suitable waste container, or, if permitted, flush into sewer. Thoroughly rinse spill area with water.

Waste Disposal Method: Liquid wastes are not permitted in landfills. This product is not considered a hazardous waste under RCRA. Unusable liquid may be drummed and taken to a chemical or industrial landfill or rinse into sewers. Local, state and federal laws apply

Specific Gravity
Approximately 7

Section IV

Extinguishing Media
NA

Special Firefighting Procedures
Steel products in the solid state present no fire or explosion hazard.

Unusual Fire and Explosion Hazards
NA

MOR 000672

Section V

Stability
Stable

Incompatability (Materials to Avoid)
Reacts with strong acids to produce hydrogen gas.

Conditions to Avoid
NA

Hazardous Decomposition Products
Metallic dust or fumes may be produced during welding, burning, grinding and possibly machining.
Refer to ANSI Z49.1

Product
Carbon

Section II - Health Hazard

NOTE: STEEL PRODUCTS IN THE NATURAL STATE DO NOT PRESENT AN INHALATION, INGESTION OR CONTACT HAZARD. HOWEVER, OPERATIONS SUCH AS BURNING, WELDING, SAWING, BRAZING AND GRINDING MAY RELEASE FUMES AND/OR DUSTS WHICH MAY PRESENT HEALTH HAZARDS IF TLV'S ARE EXCEEDED

MAJOR EXPOSURE HAZARD

☒ Inhalation ☒ Skin Contact ☐ Skin Absorption ☐ Eye Contact ☒ Ingestion

Effects of Overexposure

Short term exposure to fumes/dust may produce irritation of eyes and respiratory system. Inhalation of high concentrations of freshly formed oxide fumes of iron, manganese and lead may cause metal fume fever characterized by a metallic taste in the mouth and irritation of the throat and influenza-like symptoms.

Chronic inhalation of high concentrations of iron oxide fumes or dust may lead to benign pneumoconiosis (siderosis). Inhalation of high concentrations of ferric oxide may possibly enhance the risk of lung cancer development in workers exposed to pulmonary carcinogens.

Inhalation or ingestion of lead particles may result in lead-induced systemic toxicity. Symptoms of lead poisoning include abdominal cramps, anemia, muscle weakness and headache. Prolonged exposure can cause behavioral changes, kidney damage, CNS damage and reproductive effects.

Suspected Cancer Agent? __X__ NO: *This product's ingredients are not found in the lists below.*
_____ YES: ____ Federal OSHA ____ NTP ____ IARC

Emergency and First Aid Procedures

If exposed to excessive levels of metal fumes, remove to fresh air, seek medical aid immediately.

Eyes - Flush with water for at least 15 minutes.

Section V - Spill or Leak Procedures

Spill or Leak Procedures

NA

Waste Disposal Methods

According to local, state and federal regulations

Section VI - Special Protection

Respiratory

NIOSH/MSHA - Approved dust and fume, respirator should be used to avoid excessive inhalation of particulates when exposure exceeds TLV's.

Ventilation

Local exhaust ventilation should be utilized when welding, burning, sawing, brazing, grinding or machining when exposure exceeds TLV's.

Eye Protection and Protective Clothing

Safety glasses or goggles should be utilized as required by exposure. Other protective equipment should be utilized as required by the welding standards.

Section VII - Special Precautions

In welding, precautions should be taken for airborne contaminants which may originate from components of the welding rod.

Arc or spark generated when welding or burning could be a source of ignition for combustible and flammable materials.

MOR 000673

The information in this MSDS was obtained from sources which we believe are reliable. However, the information is provided without any representation or warranty, express or implied, regarding the accuracy or correctness.

The conditions or methods of handling storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product.

Data sheets of individual manufacturers may be obtained by contacting A. M. Castle & Co., 3400 N. Wolf Road, Franklin Park, IL 60131 Attn: Corp. Safety Mgr.

CAT HYDRAULIC OIL (HYDO) SAE 10W

MATERIAL SAFETY DATA BULLETIN

---

1. PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: CAT HYDRAULIC OIL (HYDO) SAE 10W
SUPPLIER: MOBIL OIL CORP.
NORTH AMERICA MARKETING AND REFINING
3225 GALLOWS RD.
FAIRFAX, VA 22037

24 - Hour Emergency (call collect):	609-737-4411	
Product and MSDS Information:	800-662-4525	856-224-4644
CHEMTREC:	800-424-9300	202-483-7616

2. COMPOSITION/INFORMATION ON INGREDIENTS

CHEMICAL NAMES AND SYNONYMS: PET. HYDROCARBONS AND ADDITIVES

INGREDIENTS CONSIDERED HAZARDOUS TO HEALTH:

This product is not formulated to contain ingredients which have exposure limits established by U.S. agencies. It is not hazardous to health as defined by the European Union Dangerous Substances/Preparations Directives. See Section 15 for a regulatory analysis of the ingredients.

See Section 15 for European Label Information.

See Section 8 for exposure limits (if applicable).

3. HAZARDS IDENTIFICATION

US OSHA HAZARD COMMUNICATION STANDARD: Product assessed in accordance with OSHA 29 CFR 1910.1200 and determined not to be hazardous.
EFFECTS OF OVEREXPOSURE: No significant effects expected.
EMERGENCY RESPONSE DATA: Brown Liquid. Note: Pressurized mists may form a flammable mixture. DOT ERG No. - NA

4. FIRST AID MEASURES

EYE CONTACT: Flush thoroughly with water. If irritation occurs, call a physician.
SKIN CONTACT: Wash contact areas with soap and water. High pressure accidental injection through the skin requires immediate medical attention for possible incision, irrigation and/or debridement.
INHALATION: Not expected to be a problem.
INGESTION: Not expected to be a problem. However, if greater than 1/2 liter (pint) ingested, seek medical attention.

5. FIRE-FIGHTING MEASURES

EXTINGUISHING MEDIA: Carbon dioxide, foam, dry chemical and water fog.
SPECIAL FIRE FIGHTING PROCEDURES: Water or foam may cause frothing. Use water to keep fire exposed containers cool. Water spray may be used to flush spills away from exposure. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply.
SPECIAL PROTECTIVE EQUIPMENT: For fires in enclosed areas, fire fighters must use self-contained breathing apparatus.
UNUSUAL FIRE AND EXPLOSION HAZARDS: Note: Pressurized mists may form a flammable mixture. Flash Point C(F): > 200(392) (ASTM D-92). Flammable limits - LEL: NA, UEL: NA.
NFPA HAZARD ID: Health: 0, Flammability: 1, Reactivity: 0
HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide. Metal oxides. Elemental oxides.

6. ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES: Report spills as required to appropriate authorities. U. S. Coast Guard regulations require immediate reporting of spills that could reach any waterway including intermittent dry creeks. Report spill to Coast Guard toll free number (800) 424-8802. In case of accident or road spill notify CHEMTREC (800) 424-9300.
PROCEDURES IF MATERIAL IS RELEASED OR SPILLED: Adsorb on fire retardant treated sawdust, diatomaceous earth, etc. Shovel up and dispose of at an appropriate waste disposal facility in accordance with current applicable laws and regulations, and product characteristics at time of disposal.
ENVIRONMENTAL PRECAUTIONS: Prevent spills from entering storm sewers or drains and contact with soil.
PERSONAL PRECAUTIONS: See Section 8

PERSONAL PRECAUTIONS: See Section 8

7. HANDLING AND STORAGE

HANDLING: High pressure injection under the skin may occur due to the rupture of pressurized lines. Always seek medical attention.
STORAGE: Do not store in open or unlabelled containers. Store away from strong oxidizing agents or combustible material.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

VENTILATION: No special requirements under ordinary conditions of use and with adequate ventilation.
RESPIRATORY PROTECTION: No special requirements under ordinary conditions of use and with adequate ventilation.
EYE PROTECTION: Normal industrial eye protection practices should be employed.
SKIN PROTECTION: No special equipment required. However, good personal hygiene practices should always be followed.
EXPOSURE LIMITS: This product does not contain any components which have recognized exposure limits. However, a exposure limit of 5.00 mg/m3 is suggested for oil mist.

9. PHYSICAL AND CHEMICAL PROPERTIES

Typical physical properties are given below. Consult Product Data Sheet for specific details.

APPEARANCE: Liquid
COLOR: Brown
ODOR: Mild
ODOR THRESHOLD-ppm: NE
pH: NA
BOILING POINT C(F): > 316(600)
MELTING POINT C(F): NA
FLASH POINT C(F): > 200(392) (ASTM D-92)

10. STABILITY AND REACTIVITY

STABILITY (THERMAL, LIGHT, ETC.): Stable.
CONDITIONS TO AVOID: Extreme heat.
INCOMPATIBILITY (MATERIALS TO AVOID): Strong oxidizers.
HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide. Metal oxides. Elemental oxides.
HAZARDOUS POLYMERIZATION: Will not occur.

11. TOXICOLOGICAL DATA

---ACUTE TOXICOLOGY---

ORAL TOXICITY (RATS): Practically non-toxic (LD50: greater than 2000 mg/kg). ---Based on testing of similar products and/or the components.
DERMAL TOXICITY (RABBITS): Practically non-toxic (LD50: greater than 2000 mg/kg). ---Based on testing of similar products and/or the components.
INHALATION TOXICITY (RATS): Not applicable ---Harmful concentrations of mists and/or vapors are unlikely to be encountered through any customary or reasonably foreseeable handling, use, or misuse of this product.
EYE IRRITATION (RABBITS): Practically non-irritating. (Draize score: greater than 6 but 15 or less). ---Based on testing of similar products and/or the components.
SKIN IRRITATION (RABBITS): Practically non-irritating. (Primary Irritation Index: greater than 0.5 but less than 3). ---Based on testing of similar products and/or the components.
OTHER ACUTE TOXICITY DATA: The acute toxicological results summarized above are based on testing of representative Mobil products.

---SUBCHRONIC TOXICOLOGY (SUMMARY)---

Representative Mobil formulations have been tested at the Mobil Environmental and Health Sciences Laboratory by dermal applications to rats 5 days/week for 90 days at doses significantly higher than those expected during normal industrial exposure. Extensive evaluations, including microscopic examination of internal organs and clinical chemistry of body fluids, showed no adverse effects.

---REPRODUCTIVE TOXICOLOGY (SUMMARY)---

Dermal exposure of pregnant rats to representative formulations did not cause adverse effects in either the mothers or their offspring.

(Section continued next page)

---CHRONIC TOXICOLOGY (SUMMARY)---

The base oils in this product are severely solvent refined and/or severely hydrotreated. Chronic mouse skin painting studies of severely treated oils showed no evidence of carcinogenic effects. These results are confirmed on a continuing basis using various screening methods such as the Mobil Modified Ames Test and IP-346.

---SENSITIZATION (SUMMARY)---

Representative Mobil formulations have not caused skin sensitization in guinea pigs.

12. ECOLOGICAL INFORMATION

ENVIRONMENTAL FATE AND EFFECTS: This product is expected to be inherently biodegradable. There is no evidence to suggest bioaccumulation will occur. It is not expected to be toxic to aquatic organisms.

Accidental spillage may lead to penetration in the soil and groundwater. However, there is no evidence that this would cause adverse ecological effects.

13. DISPOSAL CONSIDERATIONS

WASTE DISPOSAL: Product is suitable for burning in an enclosed, controlled burner for fuel value or disposal by supervised incineration. Such burning may be limited pursuant to the Resource Conservation and Recovery Act. In addition, the product is suitable for processing by an approved recycling facility or can be disposed of at an appropriate government waste disposal facility. Use of these methods is subject to user compliance with applicable laws and regulations and consideration of product characteristics at time of disposal.

RCRA INFORMATION: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrosivity, or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

14. TRANSPORT INFORMATION

USA DOT: NOT REGULATED BY USA DOT.

RID/ADR: NOT REGULATED BY RID/ADR.

IMO: NOT REGULATED BY IMO.

IATA: NOT REGULATED BY IATA.

15. REGULATORY INFORMATION

Governmental Inventory Status: All components comply with TSCA, EINECS/ELINCS, AICS, MITI, and DSL.

EU Labeling: EU labeling not required.

U.S. Superfund Amendments and Reauthorization Act (SARA) Title III:
This product contains no "EXTREMELY HAZARDOUS SUBSTANCES".

SARA (311/312) REPORTABLE HAZARD CATEGORIES: None.

This product contains the following SARA (313) Toxic Release Chemicals:

CHEMICAL NAME	CAS NUMBER	CONC.

SECTION 1 IDENTIFICATION

PRODUCT NAME: CATALYST 23LV

General Chemical Description: Aliphatic Amine

SECTION 2 INGREDIENTS

Components	% by Weight	Exposure Guidelines OSHA PEL	ACGIH TLV
Polyoxypropylene Polyamine	50 - 60%	NE	NE
Polyglycol Diamine	40 - 50%	NE	NE

SECTION 3 PHYSICAL DATA

Boiling Point (Degree F): >480
Vapor Pressure (mm Hg @ 25°C): < 0.001
Percent Volatiles by Weight: ND
Specific Gravity (water = 1): 1.00
Solubility in Water: Soluble
Vapor Density: Heavier than air
Appearance and Odor: Amber liquid, amine odor

SECTION 4 FIRE AND EXPLOSION HAZARD DATA

Flash Point (Degree °F):
>200 (PMCC)

Flammable Limits:
Not Established

Extinguishing Media:
Use carbon dioxide, dry chemical, foam, water fog.

Unusual Fire or Explosion Hazard:
Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions.

MOR 000683

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of th information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the us and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. Th material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of th user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

,pecial Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5 REACTIVITY DATA

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:
Incompatible with strong oxidizers, acids, bases, epoxides.

Hazardous Decomposition Products:
Carbon monoxide, carbon dioxide, oxides of nitrogen, amines and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on the conditions of combustion.

Conditions to Avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with epoxies or exposure to incompatible substances.

SECTION 6 RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:
Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

Large Spills:
Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

CATALYST 23LV

SECTION 7 HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to to use.

Personal Protection:

This product can cause eye burns. Prevent eye contact through the use of a face shield used in conjunction with either splash-proof chemical goggles or chemical safety glasses. This product can cause skin burns and may cause allergic skin responses. Components of this product may also be absorbed through the skin. Wear appropriate protective gloves, a proper chemical-resistant apron and additional impervious clothing to prevent all skin contact, contamination of clothing and possible absorption through the skin. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.

Ventilation Recommendations and Respiratory Protection:

Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing.

Storage:

Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8 HEALTH DATA

Routes of Exposure:

Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:

Exposure may aggravate preexisting skin, eye and/or respiratory disorders.

Eye Contact:

Contains materials corrosive to the eyes; may cause burns and possible corneal injury. Permanent impairment of vision or blindness may occur.

Skin Contact:

Contains materials corrosive to the skin; may cause severe burns and blistering. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals. May be harmful if absorbed through the skin.

MOR 000685

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

.nhalation:
Vapors may cause irritation, nausea, and headaches.

Ingestion:
Harmful if swallowed. May cause burns to the mouth and upper gastrointestinal tract.

Chronic Health Effects:
None known

SECTION 9 FIRST AID PROCEDURES:

Eye Contact:
Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

Skin Contact:
Immediately flush the affected area of the skin with plenty of water, while removing contaminated clothing or shoes. Follow by thoroughly washing with soap and water. Avoid scrubbing, as this action could increase skin absorption and worsen the effect of chemical contact. Get immediate medical attention. Do not reuse contaminated clothing until properly cleaned. Contaminated leather articles, including shoes, cannot be decontaminated and should be destroyed.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
DO NOT induce vomiting. If victim is conscious and alert, dilute by giving water to drink; never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

SECTION 10 ADDITIONAL INFORMATION

TSCA Status:
All components of this product are listed in the EPA Toxic Substance Control Act Inventory.

SARA Status:
This product does not contain any substances regulated by the SARA Section 313 amendments to RCRA.

MOR 000686

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT PART NUMBER: 8000034
DESCRIPTION: 320 CLEANER

COMPANY:
Markem Corporation
150 Congress Street
Keene, NH 03431

EMERGENCY RESPONSE NUMBERS:
Transportation:
United States: (800) 424-9300
International: (703) 527-3887(collect)
Product Safety and Environmental:
(603) 352-1130

2. HAZARDOUS INGREDIENTS

COMPONENT	CAS #	PCT(WT)
ETHYL ACETATE	141-78-6	30-60
ISOPROPYL ALCOHOL	67-63-0	30-60

Exposure and physical property information is presented in Section 9.
If the total percentage is less than 100, the balance of this product is not considered to be hazardous as defined in the OSHA Hazard Communication Standard (29 CFR 1910.1200).

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

HMIS RATING SYSTEM		NFPA RATING SYSTEM	
Health:	1	Health:	1
Flammability:	3	Flammability:	3
Reactivity:	0	Reactivity:	0
Protection:	X		

POTENTIAL HEALTH CONSIDERATIONS

LIKELY ROUTES OF ENTRY:
Ingestion; Inhalation; Absorption; Contact

TARGET ORGANS:
Respiratory Tract; Eyes; Kidneys; Nervous System;

POTENTIAL IMMEDIATE EFFECTS FROM OVEREXPOSURE

EYE CONTACT
Can cause minor irritation, tearing and reddening.

SKIN CONTACT
Can cause minor skin irritation, defatting, and dermatitis.

SKIN ABSORBTION
Minimal hazard in normal industrial use.

3. HAZARDS IDENTIFICATION (Cont.)

INHALATION
Can cause respiratory irritation, dizziness, weakness, fatigue, nausea, headache and possible unconsciousness.

INGESTION
Irritating to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting and diarrhea.

POTENTIAL LONG-TERM EFFECTS FROM OVEREXPOSURE:

CANCER INFORMATION
None of the substances have been shown to cause cancer.
Not a carcinogen according to NTP, IARC or OSHA.
A4 - Not classifiable as a human carcinogen

REPRODUCTIVE SYSTEM INFORMATION
None of the substances have been shown to cause reproductive system disorders.

ADDITIONAL HEALTH HAZARD INFORMATION
No information available.

MEDICAL CONDITIONS POTENTIALLY AGGRAVATED BY OVEREXPOSURE
No data found

CHEMICAL INTERACTIONS
No information found.

4. FIRST AID MEASURES

EYE CONTACT
Immediately flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Get immediate medical attention.

SKIN CONTACT
Wash with soap and water. Remove contaminated clothing and launder. Get medical attention if irritation develops or persists.

INHALATION
Remove to fresh air. If not breathing, perform rescue breathing and, if available, have a trained person administer oxygen.
Get medical attention immediately.

INGESTION
Emergency personnel should be contacted immediately and be provided with this MSDS. For ingestion of small quantities of chemicals, the risk associated with inducing vomiting usually exceeds the poisoning risk.

Get medical attention immediately. Drink 2 glasses of water. Contact a poison information service. Stomach evacuation may be appropriate, as recommended by

4. FIRST AID MEASURES (Cont.)

medical professionals, only if a significant quantity of the materials has been ingested. Stomach evacuation should only be carried out by trained and properly equipped medical personnel.

5. FIRE FIGHTING MEASURES

FLAMMABILITY DATA

FLASH POINT: 26 F

EXPLOSIVE/FLAMMABILITY LIMITS ESTIMATED FROM INGREDIENTS:

LOWER LIMIT: 2.0 %

UPPER LIMIT: 12.0 %

AUTOIGNITION TEMPERATURE ESTIMATED FROM INGREDIENTS:

750 F

GENERAL HAZARDS

Vapors may be ignited by heat, sparks, flames or other sources of ignition giving rise to a Class B fire. Vapors are heavier than air and may travel to a source of ignition and flash back. Container may explode in heat of fire. Empty container may still contain residual material that can ignite and/or result in an explosion. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose empty container to heat, flame, sparks, static electricity, or other sources of ignition.

EXTINGUISHING MEDIA

Use alcohol foam, carbon dioxide (CO2) or dry chemical. Water may not be effective to extinguish fire. Use water spray to cool fire-exposed containers and to protect personnel.

FIRE FIGHTING INSTRUCTIONS

Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location. Heat may build pressure and rupture closed containers, spreading fire and increasing risk of burns or injuries. Water may be ineffective in firefighting due to low flash point and limited miscibility with water. Flammable/combustible components of this material may be lighter than water and burn while floating on the surface. Use water spray/fog for cooling. Even if material is water soluble, it may not be practical to extinguish fire by water dilution. Notify authorities if liquid enters sewers or other public waters.

HAZARDOUS COMBUSTION PRODUCTS

carbon dioxide; carbon monoxide

6. ACCIDENTAL RELEASE MEASURES

SPILL CLEAN-UP PROCEDURES

Shut off ignition sources; smoking, flames or other sources of ignition must not be permitted in the area. Small Spills: Take up with sand or other noncombustible absorbent material and put into properly labeled containers for disposal. Large Spills: Dike ahead of liquid spill area to minimize migration and vapor generation. Ventilate the area. Get professional help from outside

6. ACCIDENTAL RELEASE MEASURES (Cont.)

contractors, the fire department or your trained spill brigade.

HEALTH CONSIDERATIONS AND PROTECTIVE EQUIPMENT

Follow personal protective equipment recommendations found in this MSDS.

7. HANDLING AND STORAGE

HANDLING
Avoid contact with material, avoid breathing vapors, use only in a well ventilated area, use bonding and grounding when transferring this material.

STORAGE
Store in a cool dry ventilated location, away from oxidizers, heat, flame or other incompatible conditions. Keep container(s) closed if possible.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

ENGINEERING CONTROLS
Local exhaust ventilation or other engineering controls are normally required when handling or using this product to keep exposure to airborne contaminants below the TLV, PEL, or other recommended exposure limit and/or maintain operator comfort. These controls should be explosion-proof when exhausting flammable vapors.
Facilities storing or using this material should be equipped with an eyewash and safety shower.

RESPIRATORY PROTECTION
If air monitoring indicates airborne concentrations at or above the limits, or symptoms of inhalation over-exposure occur, a respiratory protection program may be required. Engineering controls to reduce the exposure below acceptable limits are usually preferable to a respirator program.

EYE PROTECTION
Chemically resistant safety glasses with side shields must be worn when handling this product. Further eye protection such as chemical splash goggles and/or face shield must be worn when the possibility exists for eye contact due to splashing or spraying liquid or airborne particles. Contact lenses should not be worn. An eye wash station should be available.

SKIN PROTECTION
Depending upon conditions of use, wear protective gloves and other protective equipment. Inspect gloves for chemical break-through and replace as needed. Clean equipment thoroughly after each use.
Appropriate gloves to be used for MARKEM products that are mixtures have not been determined. Glove type(s) for ingredients present at 10% or more (if known) are:
Nitrile; Neoprene; Natural rubber

9. PHYSICAL AND CHEMICAL PROPERTIES - PRODUCT MIXTURE

APPEARANCE:	Liquid
COLOR:	Colorless to slightly pale
ODOR:	Strong solvent
SPECIFIC GRAVITY(g/ml):	0.83
PERCENT VOLATILE:	100
VOC CONTENT:	Not Determined
VAPOR PRESSURE (mmHg):	10-100
BOILING PT OR RANGE:	Not determined
pH:	ND
VISCOSITY:	ND
VAPOR DENSITY:	Heavier than air
FREEZING POINT:	ND
EVAPORATION RATE:	2-10 (n-Butyl acetate = 1)

9.1 EXPOSURE, PHYSICAL AND CHEMICAL PROPERTIES FOR INGREDIENTS

COMPONENT	TLV	PEL	STEL
ETHYL ACETATE	400 ppm	400 ppm	NE
ISOPROPYL ALCOHOL	400 ppm	400 ppm	500 ppm

COMPONENT	SPECIFIC GRAVITY g/ml	EVAP RATE N-BUTYL ACETATE=1	WATER SOL %	VAPOR PRES mmHg
ETHYL ACETATE	0.881	3.9	8%	74
ISOPROPYL ALCOHOL	0.783	1.44	100	33

10. STABILITY AND REACTIVITY

STABILITY
Stable under normal conditions.

CONDITIONS TO AVOID
Elevated temperatures in combination with sparks, open flames, or other sources of ignition.

INCOMPATIBILITY
Strong oxidizing agents.

HAZARDOUS DECOMPOSITION PRODUCTS
carbon dioxide; carbon monoxide

11. TOXICOLOGICAL INFORMATION

Ethyl acetate:
LC50 (rat): 16000 ppm (6-hour exposure).
LC50 (mouse): 44000 mg/m3 (12200 ppm) (3-hour exposure).
LD50 (oral, rat): 11.3 mL/kg (10200 mg/kg).

11. TOXICOLOGICAL INFORMATION (Cont.)

LD50 (oral, rat): 5600 mg/kg.
LD50 (oral, mouse): 4100 mg/kg.
LD50 (oral, rabbit): 4900 mg/kg.
LD50 (oral, guinea pig): 5500 mg/kg.
LD50 (dermal, rabbit): Greater than 20 mL/kg (18000 mg/kg).
Isopropyl alcohol:
LD50 (rat, oral): 4.42 - 5.84 g/kg
LD50 (mouse, oral): 4.8 g/kg
LD50 (rabbit, oral): 7.9 g/kg
LD50 (rabbit, dermal): 13 g/kg

12. ECOLOGICAL INFORMATION

Ethyl acetate:
LC50 Pimephales promelas (fathead minnow) 230 mg/l/96 hr.
If released into water ethyl acetate will be lost primarily by evaporation (half-life 10 hr in a typical river) and biodegradation.
Bioconcentration in fish will be insignificant.
In the atmosphere, ethyl acetate will react with photochemically produced hydroxyl radicals (half-life 8.3 days). A few percent an hour will disappear under photochemical smog situations.
2-Propanol:
LC50 Pimephales promelas (fathead minnows) 11,830 mg/l/1 hr, 11,160 mg/l/24 hr 11,130 mg/l/48 hr, 72 hr, 96 hr,
When released into water, isopropanol will volatilize and biodegrade.
In the atmosphere it will photodegrade primarily by reaction with hydroxyl radicals with a half-life of one to several days.

13. DISPOSAL CONSIDERATIONS

POTENTIAL EPA WASTE CODE(S):
D001; F003

DISPOSAL
Dispose of by incineration or waste water treatment following Federal, State, Local or Provincial regulations.

14. TRANSPORT INFORMATION, DOT and IATA:

DOT AND IATA: FLAMMABLE LIQUID, N.O.S., (ISOPROPANOL, ETHYL ACETATE), 3, UN1993, PGII
LABEL REQUIRED: FLAMMABLE LIQUID

15. REGULATORY INFORMATION

Those ingredients appearing on the following list that do not appear in Section 2 are present at <0.1% for carcinogens, <1% for other hazardous substances, or are not considered hazardous in this product.

CERCLA: The following components have CERCLA reportable quantities:

CAS NUMBER	CHEMICAL NAME
141-78-6	ETHYL ACETATE

SARA TITLE III: The following components are listed under Section 313:

CAS NUMBER	CHEMICAL NAME
67-63-0	ISOPROPYL ALCOHOL

WHMIS: The following components are WHMIS Workplace Hazardous Materials:

CAS NUMBER	CHEMICAL NAME
141-78-6	ETHYL ACETATE
67-63-0	ISOPROPYL ALCOHOL

TSCA: All chemicals in this product are on the USEPA TSCA 8(b) inventory.

TSCA: The following components are subject to TSCA 12(b) regulations:

CAS NUMBER	CHEMICAL NAME
141-78-6	ETHYL ACETATE
67-63-0	ISOPROPYL ALCOHOL

RCRA: The following components are subject to RCRA land disposal restrictions:

CAS NUMBER	CHEMICAL NAME
141-78-6	ETHYL ACETATE

MATERIAL SAFETY DATA SHEET

(COMPLIES WITH 29CFR 1910.1200)

SECTION I - CHEMICAL PRODUCT & COMPANY IDENTIFICATION

Identity (As Used on Label and List): Multi-Clean #2 Glass & Surface Cleaner
Product Class: General purpose water-based cleaner
Emergency Telephone Number: 800-255-3924
Telephone Number for Information: 651-481-1900
Manufacturer's Name and Address:
Multi-Clean®, A Division of Minuteman International, Inc.
600 Cardigan Road
Shoreview, MN 55126

SECTION II - COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous Components (Specific Chemical Identity):

Chemical	Common Name(s)	%
A	Propylene glycol methyl ether CAS #107-98-2	10 - 30
B	Propylene glycol n-butyl ether CAS #5131-66-8	3 - 7
C	Surfactant (proprietary)	1 - 5
D	Water CAS #7732-18-5	60 - 100

SECTION III - HAZARDS IDENTIFICATION

Emergency Overview

Appearance and Odor: Blue liquid, mild odor.
Primary Hazards: Combustible, irritant.

Potential Health Hazards

Route(s) of Entry: **Skin Absorption:** X **Ingestion:** **Inhalation:** X
Eye: May cause irritation on contact.
Skin: May cause irritation on prolonged or repeated contact.
Ingestion: May be harmful if swallowed.
Inhalation: Overexposure to vapors may be harmful.
Signs and Symptoms of Exposure: Excessive exposure may cause headaches or narcotic effects.
Carcinogenicity: **NTP?** No **IARC Monographs?** No
OSHA Regulated? No
Target Organ (s): Skin, eyes, liver and kidneys.
Medical Conditions Generally Aggravated by Exposure: *N. Av.*
Health Hazards, Chronic: N. Av.

SECTION IV - FIRST AID MEASURES

Emergency and First Aid Procedures:
If Swallowed: Drink two glasses of water and call a physician immediately. **Eye Contact:** *Flush eyes with running water for at least 15 minutes. If irritation persists, obtain medical* attention. **Skin Contact:** Flush thoroughly with cool water. Remove and wash contaminated clothing before reuse.
Sources Used: Raw material data, general toxicology from the trade for *similar products.*

SECTION V - FIRE FIGHTING MEASURES

Flammability: Combustible **Autoignition Temperature:** N. Av.
Flash Point (method used): 147°F closed cup
Flammable Limits: N. Av. LEL N Av. UEL N. Av.
Extinguishing Media
Water? **Foam?** **Water Fog?**
Alcohol Foam? X **CO_2?** X **Dry Chemical?** X
Vaporizing Liquid? **Other?**
Special Fire Fighting Procedures: Water hose stream may spread fire. Use water spray to keep containers cool.
Unusual Fire and Explosion Hazards: *Vapors are heavier than air and may travel over distances to ignition sources (heat, flames, sparks, pilot lights, etc) where ignition may occur. Ground all equipment.*
TDG Flammability Classification: Unknown
Sensitivity to Mechanical Impact: None
Sensitivity to Static Discharge: N. Av.

SECTION VI - ACCIDENTAL RELEASE MEASURES

Steps to be Taken in Case Material is Released or Spilled:
Extinguish all sources of possible ignition (flames, sparks, pilot lights, etc.) and provide ventilation. For large spills, dike and contain spill with inert material (sand, earth, etc.). Collect spill with absorbent material (example; floor-dri). For small spills, wipe up spill with mop or rag. Dispose of or treat mop or rag properly to avoid fire.

SECTION VII - HANDLING AND STORAGE

Precautions to be Taken in Handling and Storing:
Do not store near heat, sparks or flame.
Other Precautions: Keep out of reach of children. Keep from freezing.

SECTION VIII - EXPOSURE CONTROLS/PERSONAL PROTECTION

Respiratory Protection (Specify Types): Not required. Avoid breathing spray mist.
Ventilation: **Local Exhaust:** Not required **Special:** Not required
Mechanical (General): As required to keep vapor level below TLVs and PELs (Section XI) **Other:** Not required
Protective Gloves: Natural rubber or synthetic.
Eye Protection: Approved safety goggles or glasses. **Footwear:** Not required
Other Protective Clothing or Equipment: Not required
Work/Hygienic Practices: Do not contaminate food or beverages with cleaning chemicals.

SECTION IX - PHYSICAL/CHEMICAL CHARACTERISTICS

Boiling Point: Approximately 212°F (100°C) **pH:** 10.9
Specific Gravity (H20) = 1: 1.005 **% Volatile:** > 95
Vapor Density (Air = 1): > 1 **Odor Threshold:** N. Av.
Evaporation Rate (Butyl Acetate = 1): N. Av. **Oil/Water Distribution Coefficient:** N. Av.
Solubility in Water: Complete
Vapor Pressure (MM HG): N. Av.
Melting Point: N. Ap.

SECTION X - STABILITY AND REACTIVITY

Stability: **Unstable:** **Stable:** X
Conditions to Avoid: N. Ap.
Incompatibility (materials to avoid): Oxidizing material
Hazardous Decomposition or By-products: *N. Av.*
Hazardous Polymerization: ***May occur:*** ***Will not occur:*** X
Conditions to Avoid: N. Ap.

SECTION XI - TOXICOLOGICAL INFORMATION

Chemical	OSHA PEL	ACGIH TLV	Recom.	LD50	LC50
A	100 ppm	100 ppm	N. Av.	6,600 mg/kg (rat, oral)	> 200 mg/l (rat, 1 hr.)
B	None	None	N. Av.	3,300 mg/kg (rat, oral)	N. Av.

(1) % Of Alloying Material Varies With Grade Of Material.

(2) 1996 ACGIH Threshold Limit Value.
(3) 1993 OSHA Permissable Exposure Limit.

Section III

Material Is (At Normal Conditions)	Appearance and Odor
Solid	Copper Metallic, Odorless
Melting Point (Base Metal)	**Specific Gravity**
>1800° F	> 8

Section IV

Extinguishing Media
NA

Special Firefighting Procedures
Products in the solid state present no fire or explosion hazard.

Unusual Fire and Explosion Hazards
Dust hazard exists under favoring conditions of small particle size.
Dispersion in air and strong ignition source may result in an explosion.

MOR 000698

Section V

Stability	Incompatability (Materials to Avoid)
Stable	Mercury, Ammonia, Acetylene, Acids

Conditions to Avoid
Exposure during storage to strong acids, bases or oxidizing agents.

Hazardous Decomposition Products
Toxic gases, aerosols and vapors may be released in a fire involving copper alloys if fumes of other compounds or other contacting materials are involved.

Product
Copper

NOTE: STEEL PRODUCTS IN THE NATURAL STATE DO NOT PRESENT AN INHALATION, INGESTION OR CONTACT HAZARD. HOWEVER, OPERATIONS SUCH AS BURNING, WELDING, SAWING, BRAZING AND GRINDING MAY RELEASE FUMES AND/OR DUSTS WHICH MAY PRESENT HEALTH HAZARDS IF TLV'S ARE EXCEEDED

MAJOR EXPOSURE HAZARD

☒ **Inhalation** ☒ **Skin Contact** ☐ **Skin Absorption** ☐ **Eye Contact** ☒ **Ingestion**

Effects of Overexposure

Short term exposure to fumes/dust may produce irritation of eyes and respiratory system. Inhalation of high concentrations of freshly formed oxide fumes of copper and lead may cause metal fume fever characterized by a metallic taste in the mouth and irritation of the throat and influenzalike symptoms.

Inhalation or ingestion of lead particles may result in lead-induced systemic toxicity. Symptoms of lead poisoning include abdominal cramps, anemia, muscle weakness and headache. Prolonged exposure can cause behavioral changes, kidney damage, CNS damage and reproductive effects.

Suspected Cancer Agent? _X_ NO: This product's ingredients are not found in the lists below.
____ YES: ____ Federal OSHA ____ NTP ____ IARC

Emergency and First Aid Procedures

If exposed to excessive levels of metal fumes, remove to fresh air, seek medical aid immediately.

Eyes - Flush with water for at least 15 minutes.

Spill or Leak Procedures

NA

Waste Disposal Methods

According to local, state and federal regulations

Respiratory

NIOSH/MSHA - Approved dust and fume, respirator should be used to avoid excessive inhalation of particulates when exposure exceeds TLV's.

Ventilation

Local exhaust ventilation should be utilized when welding, burning, sawing, brazing, grinding or machining when exposure exceeds TLV's.

Eye Protection and Protective Clothing

Safety glasses or goggles should be utilized as required by exposure. Other protective equipment should be utilized as required by the welding standards.

In welding, precautions should be taken for airborne contaminants which may originate from components of the welding rod.

Arc or spark generated when welding or burning could be a source of ignition for combustible and flammable materials.

MOR 000699

SECTION III - PHYSICAL DATA

MOR 000702

PRODUCT WEIGHT: 5.53 LB./GAL. EVAPORATION RATE: FASTER THAN ETHER

SPECIFIC GRAVITY: 0.67 VAPOR DENSITY: HEAVIER THAN AIR

BOILING POINT: LT 0 -212 F. MELTING POINT: N.A.

VOLATILE VOLUME: 99% SOLUBILITY IN WATER: N.A.

VOLATILE WEIGHT: 98.05% (LESS FEDERALLY EXEMPT SOLVENTS)

HMIS: 3 4 0

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT	LEL	UEL
PROPELLANT LT 0 F.	1.1	12.7

EXTINGUISHING MEDIA:

CARBON DIOXIDE, DRY CHEMICAL, FOAM

UNUSUAL FIRE AND EXPLOSION HAZARDS: ISOLATE FROM HEAT, ELECTRICAL EQUIPMENT SPARKS, AND OPEN FLAME. CLOSED CONTAINERS MAY EXPLODE WHEN EXPOSED TO EXTRE HEAT. APPLICATION TO HOT SURFACES REQUIRES SPECIAL PRECAUTIONS. DURING EMERGENCY CONDITIONS OVEREXPOSURE TO DECOMPOSITION PRODUCTS MAY CAUSE A HEA HAZARD. SYMPTOMS MAY NOT BE IMMEDIATELY APPARENT. OBTAIN MEDICAL ATTENTION.

SPECIAL FIRE FIGHTING PROCEDURES: FULL PROTECTIVE EQUIPMENT INCLUDING SELF-CONTAINED BREATHING APPARATUS SHOULD BE USED. WATER SPRAY MAY BE INEFFECTIV IF WATER IS USED, FOG NOZZLES ARE PREFERABLE. WATER MAY BE USED TO COOL CLO CONTAINERS TO PREVENT PRESSURE BUILD-UP AND POSSIBLE AUTOIGNITION OR EXPLOS WHEN EXPOSED TO EXTREME HEAT.

SECTION V - HEALTH HAZARD DATA

ROUTES OF EXPOSURE: EXPOSURE MAY BE BY INHALATION AND/OR SKIN OR EYE CONTAC DEPENDING ON CONDITIONS OF USE. TO MINIMIZE EXPOSURE, FOLLOW RECOMMENDATION FOR PROPER USE, VENTILATION, AND PERSONAL PROTECTIVE EQUIPMENT.

ACUTE HEALTH HAZARDS:

EFFECTS OF OVEREXPOSURE: IRRITATION OF EYES, SKIN AND RESPIRATORY SYSTEM. M CAUSE NERVOUS SYSTEM DEPRESSION. EXTREME OVEREXPOSURE MAY RESULT IN UNCONSCIOUSNESS AND POSSIBLY DEATH.

SIGNS AND SYMPTOMS OF OVEREXPOSURE: HEADACHE, DIZZINESS, NAUSEA, AND LOSS O COORDINATION ARE INDICATIONS OF EXCESSIVE EXPOSURE TO VAPORS OR SPRAY MISTS

REDNESS AND ITCHING OR BURNING SENSATION MAY INDICATE EYE OR EXCESSIVE SKIN EXPOSURE.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: NONE GENERALLY RECOGNIZED.

3M757

EMERGENCY AND FIRST AID PROCEDURES:

IF INHALED: IF AFFECTED, REMOVE FROM EXPOSURE. RESTORE BREATHING. KEEP WARM QUIET.

IF ON SKIN: WASH AFFECTED AREA THOROUGHLY WITH SOAP AND WATER. REMOVE CONTAMINATED CLOTHING AND LAUNDER BEFORE RE-USE.

IF IN EYES: FLUSH EYES WITH LARGE AMOUNTS OF WATER FOR 15 MINUTES. GET MEDI ATTENTION.

IF SWALLOWED: NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. DO NOT INDUCE VOMITING. GIVE CONSCIOUS PATIENT SEVERAL GLASSES OF WATER. SEEK MEDI ATTENTION.

CHRONIC HEALTH HAZARDS:

NO INGREDIENT IN THIS PRODUCT IS AN IARC, NTP OR OSHA LISTED CARCINOGEN.

REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OVEREXPOSURE TO SOLVENTS WIT PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE.

SECTION VI - REACTIVITY DATA

STABILITY: STABLE.

CONDITIONS TO AVOID: NONE KNOWN.

INCOMPATIBILITY: NONE KNOWN.

HAZARDOUS DECOMPOSITION PRODUCTS: BY FIRE: CARBON DIOXIDE, CARBON MONOXIDE.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR.

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: REMOVE ALL SOURC OF IGNITION. VENTILATE AND REMOVE WITH INERT ABSORBENT.

WASTE DISPOSAL METHOD: WASTE FROM THIS PRODUCT MAY BE HAZARDOUS AS DEFINED UNDER THE RESOURCE CONSERVATION AND RECOVERY ACT (RCRA) 40 CFR 261.

WASTE MUST BE TESTED FOR IGNITABILITY TO DETERMINE THE APPLICABLE EPA HAZAR WASTE NUMBERS.

DO NOT INCINERATE. DEPRESSURIZE CONTAINER. DISPOSE OF IN ACCORDANCE WITH FEDERAL, STATE, AND LOCAL REGULATIONS REGARDING POLLUTION.

2W757

SECTION VIII - PROTECTION INFORMATION

PRECAUTIONS TO BE TAKEN IN USE: USE ONLY WITH ADEQUATE VENTILATION. AVOID BREATHING VAPOR AND SPRAY MIST. AVOID CONTACT WITH SKIN AND EYES. WASH HAND AFTER USING.

VENTILATION: LOCAL EXHAUST PREFERABLE. GENERAL EXHAUST ACCEPTABLE IF THE EXPOSURE TO MATERIALS IN SECTION II IS MAINTAINED BELOW APPLICABLE EXPOSURE LIMITS. REFER TO OSHA STANDARDS 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION: IF PERSONAL EXPOSURE CANNOT BE CONTROLLED BELOW APPLICABLE LIMITS BY VENTILATION, WEAR A PROPERLY FITTED ORGANIC VAPOR/ PARTICULATE RESPIRATOR APPROVED BY NIOSH/MSHA FOR PROTECTION AGAINST MATERI IN SECTION II.

PROTECTIVE GLOVES: NONE REQUIRED FOR NORMAL APPLICATION OF AEROSOL PRODUCTS WHERE MINIMAL SKIN CONTACT IS EXPECTED. FOR LONG OR REPEATED CONTACT, WEAR CHEMICAL RESISTANT GLOVES.

EYE PROTECTION: WEAR SAFETY SPECTACLES WITH UNPERFORATED SIDESHIELDS.

SECTION IX - PRECAUTIONS

DOL STORAGE CATEGORY: 1A

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: KEEP AWAY FROM HEAT, SPARK AND OPEN FLAME. VAPORS WILL ACCUMULATE READILY AND MAY IGNITE EXPLOSIVELY.

DURING USE AND UNTIL ALL VAPORS ARE GONE: KEEP AREA VENTILATED - DO NOT SMO EXTINGUISH ALL FLAMES, PILOT LIGHTS, AND HEATERS - TURN OFF STOVES, ELECTRI TOOLS AND APPLIANCES, AND ANY OTHER SOURCES OF IGNITION.

CONSULT NFPA CODE. USE APPROVED BONDING AND GROUNDING PROCEDURES.

CONTENTS UNDER PRESSURE. DO NOT PUNCTURE, INCINERATE, OR EXPOSE TO TEMPERAT ABOVE 120 F. HEAT FROM SUNLIGHT, RADIATORS, STOVES, HOT WATER, AND OTHER HE SOURCES COULD CAUSE CONTAINER TO BURST. DO NOT TAKE INTERNALLY. KEEP OUT OF REACH OF CHILDREN.

OTHER PRECAUTIONS: INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS CAN BE HARMFUL OR FATAL.

SECTION X - OTHER REGULATORY INFORMATION:

SARA 313 (40 CFR 372.65C) SUPPLIER NOTIFICATION:

CAS NO.	CHEMICAL/COMPOUND	% BY WT	% ELEMENT

NO INGREDIENTS IN THIS PRODUCT ARE SUBJECT TO SARA 313 (40 CFR 372.65C) SUPPLIER NOTIFICATION.

2W737

CALIFORNIA PROPOSITION 65:
WARNING: THIS PRODUCT CONTAINS CHEMICALS KNOWN TO THE STATE OF CALIFORNIA T CAUSE CANCER AND BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM.

TSCA CERTIFICATION: ALL CHEMICALS IN THIS PRODUCT ARE LISTED, OR ARE EXEMPT FROM LISTING, ON THE TSCA INVENTORY.

THE ABOVE INFORMATION PERTAINS TO THIS PRODUCT AS CURRENTLY FORMULATED, AND BASED ON THE INFORMATION AVAILABLE AT THIS TIME. ADDITION OF REDUCERS OR OT ADDITIVES TO THIS PRODUCT MAY SUBSTANTIALLY ALTER THE COMPOSITION AND HAZAR OF THE PRODUCT. SINCE CONDITIONS OF USE ARE OUTSIDE OUR CONTROL, WE MAKE NO WARRANTIES, EXPRESS OR IMPLIED, AND ASSUME NO LIABILITY IN CONNECTION WITH USE OF THIS INFORMATION.

TSCA INVENTORY STATUS : Reported/Included
NFPA-HMIS RATINGS : Health: 2 Flammability: 1 Reactivity: 0
Personal Protection rating to be supplied by user depending on use conditions.

COMPONENTS

Material	CAS Number	%
DIMETHYL GLUTARATE	1119-40-0	55-75
DIMETHYL ADIPATE	627-93-0	10-25
DIMETHYL SUCCINATE	106-65-0	19-26
METHANOL	67-56-1	<0.2

PHYSICAL DATA

Boiling Point	: 196 to 225 deg C (385 to 437 deg F)
Vapor Pressure	: 0.2 mm Hg at 20 deg C (68 deg F)
Melting Point	: ~-20 deg C (~-4.0 deg F)
Evaporation Rate	: <0.1 (Butyl Acetate = 1.0)
Water Solubility	: 5.3 WT % at 20 deg C (68 deg F)
Odor	: Sweet
Form	: Liquid
Color	: Colorless
Specific Gravity	: 1.092 at 20 deg C (68 deg F)
Odor Threshold	: 0.1 ppm 100% and 0.01 ppm 50% of the test panel detected it.

HAZARDOUS REACTIVITY

Instability	: Stable.
Incompatibility	: Incompatible with strong oxidants, acids, and alkalies.
Decomposition	: Decomposes with heat.
Polymerization	: Polymerization will not occur.

FIRE AND EXPLOSION DATA

Flash Point	: 100 deg C (212 deg F)
Method	: TCC
Autoignition	: 370 deg C (698 deg F)

Explosive Limits in Air, % by Volume

LEL	: 0.9
UEL	: 8.0

FIRE AND EXPLOSION HAZARDS

Vapor forms explosive mixture with air. Hazardous gases/vapors produced in fire are carbon monoxide.

EXTINGUISHING MEDIA

Water Spray. Foam. Dry Chemical.

Carbon Dioxide (CO2).

SPECIAL FIRE FIGHTING INSTRUCTIONS

Wear self-contained breathing apparatus. Wear full protective equipment. Cool tank/container with water spray.

Keep personnel removed and upwind of fire.

HEALTH HAZARD INFORMATION

The mixture may cause skin, eye and upper respiratory tract irritation.

ANIMAL DATA:

Inhalation 4-hour LC50:		>11 mg/L in rats
Inhalation 1-hour LC50:		>10.7 mg/L in rats
Oral LD50	:	8,191 mg/kg in rats
Skin absorption LD50	:	>2,250 mg/kg in rabbits

Mixed dibasic esters is a mild to severe skin irritant and a moderate eye irritant, but is not a skin sensitizer in laboratory animals. Instillation of various volumes into the eye caused transient corneal opacity and corneal anaesthesia.

Upper respiratory tract irritation and transient corneal opacity were observed in animals following a single inhalation exposure. Repeated inhalation exposures caused decreased weight gain and liver weights, and generation of olfactory epithelium (nasal tissue). A single dose to animals by skin contact, ocular instillation or inhalation exposure caused a transient increase in the distance from the cornea to the anterior surface of the lens. The material does not produce genetic damage in animals or bacterial cell cultures, but was positive in one mammalian cell culture study. Animal testing indicates that this material does not have developmental or reproductive effects.

HUMAN HEALTH EFFECTS:

Contact with skin may cause skin irritation with discomfort or rash. Eye contact may cause eye irritation with discomfort, tearing or blurring of vision. Some individuals who have been overexposed by inhalation or skin contact have experienced blurry vision. Inhalation overexposure may cause irritation of the upper respiratory system.

The mechanism of blurred vision in humans is unknown. It is possible that some symptoms of pre-existing eye diseases could be aggravated by overexposure to this material.

CARCINOGENICITY

None of the components in this material is listed by IARC, NTP, OSHA, or ACGIH as a carcinogen.

EXPOSURE LIMITS

DBE

AEL * (Du Pont): 1.5 ppm, 10 mg/m3 - 8 Hr TWA
This limit is for DBE.

(HEALTH HAZARD INFORMATION - Continued)

TLV (ACGIH) : None Established
PEL (OSHA) : None Established

OTHER APPLICABLE EXPOSURE LIMITS

METHANOL

AEL * (Du Pont): 200 ppm - 8 & 12 Hr. TWA - Skin
TLV (ACGIH) : 200 ppm, 262 mg/m3 - 8 Hr TWA
STEL 250 ppm, 328 mg/m3 - Skin
PEL (OSHA) : 200 ppm, 260 mg/m3 - 8 Hr TWA
STEL 250 ppm, 325 mg/m3 - Skin

* AEL is Du Pont's Acceptable Exposure Limit. Where governmentally imposed occupational exposure limits which are lower than the AEL are in effect, such limits shall take precedence.

SAFETY PRECAUTIONS

Avoid breathing vapors or mist. Avoid contact with eyes, skin, or clothing. Wash thoroughly after handling.

FIRST AID

INHALATION

If inhaled, immediately remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT

Flush skin with water after contact. Wash contaminated clothing before reuse.

EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

INGESTION

If swallowed, do not induce vomiting. Immediately give two glasses of water or activated charcoal slurry. Never give anything by mouth to an unconscious person. Call a physician.

NOTE:

To prepare activated charcoal slurry, suspend 50 grams activated charcoal in 400 mL water and mix thoroughly. Administer 5 mL/kg, or 350 mL for an average adult.

PROTECTION INFORMATION

GENERALLY APPLICABLE CONTROL MEASURES AND PRECAUTIONS

Keep container tightly closed. Do not mix with strong oxidants, acids, or alkalies.

Use with sufficient ventilation to keep employee exposure to airborne concentrations below exposure limits.

PERSONAL PROTECTIVE EQUIPMENT

EYE/FACE PROTECTION

Wear safety glasses. Wear coverall chemical splash goggles when the possibility exists for eye contact due to splashing or spraying of material.

RESPIRATORS

A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.

PROTECTIVE CLOTHING

Wear impervious clothing, such as gloves, apron, boots or whole bodysuit made from butyl rubber, as appropriate.

DISPOSAL INFORMATION

AQUATIC TOXICITY

Dibasic Esters
96-hour LC50, fathead minnows : 18-24 mg/L
48-hour LC50, Daphnia magna : 112-150 mgL

Dimethyl Glutarate
96-hour LC50, bluegill sunfish: 30.9 mg/L

SPILL, LEAK, OR RELEASE

NOTE: Review FIRE AND EXPLOSION HAZARDS and SAFETY PRECAUTIONS before proceeding with clean up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean up.
Remove source of heat, sparks, flame, impact, friction or electricity. Dike spill. Prevent liquid from entering sewers, waterways or low areas. Recover free liquid for reuse or reclamation. Recover undamaged and minimally contaminated material for reuse or reclamation. Soak up with sawdust, sand, oil dry or other absorbent material.

(DISPOSAL INFORMATION - Continued)

WASTE DISPOSAL

Treatment, storage, transportation and disposal must be in accordance with applicable Federal, State, and local regulations. Recover nonusable free liquid and dispose of in an approved and permitted incinerator or in an approved and permitted biological treatment system. Recover contaminated water and dispose of in an approved and permitted biological treatment system or in an approved and permitted deepwell. Remove nonusable solid material and/or contaminated soil, for disposal in an approved and permitted landfill. Do not flush to surface water or sanitary sewer system.

SHIPPING INFORMATION

Shipping Containers
- Tank Car - 170,000 lbs
- Tank Truck - 42,000 lbs
- Steel Drums - 485 lbs

NOT REGULATED AS A HAZARDOUS MATERIAL BY THE DOT, IMO, OR IATA.

STORAGE CONDITIONS

Store in well ventilated area. Keep container tightly closed.

TITLE III HAZARD CLASSIFICATIONS

Acute : Yes
Chronic : No
Fire : No
Reactivity : No
Pressure : No

LISTS:

Extremely Hazardous Substance	-No
CERCLA Hazardous Substance	-No
Toxic Chemical	-No

CANADIAN WHMIS CLASSIFICATION:

D2B

ADDITIONAL INFORMATION AND REFERENCES

The hydrogen cyanide concentration in DBE is so low as to be toxicologically insignificant when DBE is used as a solvent. However, when DBE is chemically reacted with alcohols, and methanol is recovered from that reaction and purified for reuse by distillation, concentration of highly volatile impurities such as hydrogen cyanide to toxicologically significant levels can occur in the waste stream from this process. Processors using DBE as a raw material should be aware of this potential hazard.

MATERIAL SAFETY DATA SHEET

(COMPLIES WITH 29CFR 1910.1200)

SECTION I - CHEMICAL PRODUCT & COMPANY IDENTIFICATION

Identity (As Used on Label and List): Multi-Clean #7 Spray & Wipe Degreaser
Product Class: Water-based floor finish stripper
Emergency Telephone Number: 800-255-3924
Telephone Number for Information: 612-481-1900
Manufacturer's Name and Address:
Multi-Clean®, A Division of Minuteman International, Inc.
600 Cardigan Road
Shoreview, MN 55126

SECTION II - COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous Components (Specific Chemical Identity):

Chemical	Common Name(s)	%
A	Dipropylene glycol methyl ether CAS #34590-94-8	10 - 30
B	Sodium metasilicate CAS #6834-92-0	3 - 7
C	Sodium carbonate CAS #497-19-8	3 - 7
D	Surfactant (proprietary)	1 - 5
E	Surfactant (proprietary)	1 - 5
F	Surfactant (proprietary)	1 - 5
G	Propylene glycol n-butyl ether CAS #5131-66-8	1 - 5
H	Water CAS #7732-18-5	60 - 100

SECTION III - HAZARDS IDENTIFICATION

Emergency Overview

Appearance and Odor: Scarlet liquid, floral/solvent aroma.
Primary Hazards: Corrosive

Potential Health Hazards

Route(s) of Entry: Skin Absorption: X Ingestion: Inhalation: X
Eye: May cause chemical burns on contact.
Skin: May cause chemical burns on contact.
Ingestion: May be harmful if swallowed.
Inhalation: No hazardous vapors.
Signs and Symptoms of Exposure: Eye Contact: Possible burning, tearing, redness and corneal damage. Skin Contact: Possible slippery feeling, redness, swelling and burns. Symptoms may be delayed.
Carcinogenicity: NTP? No IARC Monographs? No
OSHA Regulated? No
Target Organ (s): Eyes, skin and mucous membranes.
Medical Conditions Generally Aggravated by Exposure: N. Av.
Health Hazards, Chronic: N. Av.

SECTION IV - FIRST AID MEASURES

Emergency and First Aid Procedures:
For Eye Contact: Immediately flush eyes with sanitary eye wash solution or running water for at least 15 minutes. Obtain medical attention. Continue to flush eyes until medical attention arrives. If Swallowed: Do not induce vomiting. Drink two glasses of water, follow with orange juice and immediately call a physician. For Skin Contact: Flush thoroughly with cool water. Remove and wash contaminated clothing before reuse. Never give anything by mouth to an unconscious person.
Sources Used: Raw material data, general toxicology from the trade for similar products.

SECTION V - FIRE FIGHTING MEASURES

Flammability: No **Autoignition Temperature:** N. Ap.
Flash Point (method used): None
Flammable Limits: N. Ap. LEL UEL
Extinguishing Media N. Ap.
Water? Foam? Water Fog?
Alcohol Foam? CO_2? Dry Chemical?
Vaporizing Liquid? Other?
Special Fire Fighting Procedures: N. Ap.
Unusual Fire and Explosion Hazards: N. Av.
TDG Flammability Classification: Non-flammable
Sensitivity to Mechanical Impact: None
Sensitivity to Static Discharge: None

SECTION VI - ACCIDENTAL RELEASE MEASURES

Steps to be Taken in Case Material is Released or Spilled:
Dike and contain spill with inert material (sand, earth, etc). Collect spill with mop, absorbent material (example: floor-dri) or vacuum. Thoroughly rinse affected area with water.

SECTION VII - HANDLING AND STORAGE

Precautions to be Taken in Handling and Storing:
Normal care in handling and storage.
Other Precautions: Keep out of reach of children. Keep from freezing.

SECTION VIII - EXPOSURE CONTROLS/PERSONAL PROTECTION

Respiratory Protection (Specify Types): Not required
Ventilation: Local Exhaust: Not required Special: Not required
Mechanical (General): As required to keep vapor levels below TLV & PEL, listed in Section XI. Other: Not required
Protective Gloves: Natural rubber or synthetic.
Eye Protection: Approved safety goggles or shield. *Footwear:* Rubber footwear.
Other Protective Clothing or Equipment: Not required
Work/Hygienic Practices: Do not contaminate food or beverages with cleaning chemicals.

SECTION IX - PHYSICAL/CHEMICAL CHARACTERISTICS

Boiling Point: Approximately 212°F (100°C) **pH:** 13 - 14
Specific Gravity (H20) = 1: 1.07 **% Volatile:** 60 - 100
Vapor Density (Air = 1): N. Av. **Odor Threshold:** N. Av.
Evaporation Rate (Butyl Acetate = 1): N. Av. **Oil/Water Distribution Coefficient:** N. Av.
Solubility in Water: Complete
Vapor Pressure (MM HG): N. Av.
Melting Point: N. Ap.

SECTION X - STABILITY AND REACTIVITY

Stability: Unstable: Stable: X
Conditions to Avoid: N. Ap.
Incompatibility (materials to avoid): N. Av.
Hazardous Decomposition or By-products: N. Av.
Hazardous Polymerization: May occur: Will not occur: X
Conditions to Avoid: N. Ap.

SECTION XI - TOXICOLOGICAL INFORMATION

Chemical	OSHA PEL	ACGIH TLV	Recom.	LD50	LC50
A	100 ppm (skin)	100 ppm (skin)	N. Av.	> 5 ml/kg (rat)	N. Av.
B	None	None	C2 mg/M3	800 mg/kg (rat, oral)	N. Av.
C	N. Ap.	N. Ap.	N. Av.	4,000 mg/kg (rat, oral)	N. Av.

DOW CORNING(R) 340 HEAT SINK COMPOUND

1. IDENTIFICATION OF THE SUBSTANCE AND OF THE COMPANY

Dow Corning Corporation
South Saginaw Road
Midland, Michigan 48686

24 Hour Emergency Telephone: (517) 496-5900
Customer Service: (517) 496-6000
Product Disposal Information: (517) 496-6315
CHEMTREC: (800) 424-9300

MSDS No.: 01015443 Revision Date: 2000/05/31

Generic Description: Silicone compound
Physical Form: Paste
Color: White
Odor: Odorless
NFPA Profile: Health 0 Flammability 1 Instability/Reactivity 0

Note: NFPA = National Fire Protection Association

2. OSHA HAZARDOUS COMPONENTS

None present. This is not a hazardous material as defined in the OSHA Hazard Communication Standard.

3. EFFECTS OF OVEREXPOSURE

Acute Effects

Eye: Direct contact may cause temporary redness and discomfort.

Skin: No significant irritation expected from a single short-term exposure.

Inhalation: No significant effects expected from a single short-term exposure.

Oral: Low ingestion hazard in normal use.

Prolonged/Repeated Exposure Effects

Skin: No known applicable information.

Inhalation: No known applicable information.

Oral: No known applicable information.

Signs and Symptoms of Overexposure

No known applicable information.

Medical Conditions Aggravated by Exposure

No known applicable information.

DOW CORNING

DOW CORNING CORPORATION
Material Safety Data Sheet

DOW CORNING(R) 340 HEAT SINK COMPOUND

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions, component data and/or expert review of the product. Please refer to Section 11 for the detailed toxicology information.

4. FIRST AID MEASURES

Eye:	Immediately flush with water.
Skin:	No first aid should be needed.
Inhalation:	No first aid should be needed.
Oral:	No first aid should be needed.
Comments:	Treat symptomatically.

5. FIRE FIGHTING MEASURES

Flash Point:	Not applicable - Solid
Autoignition Temperature:	Not determined.
Flammability Limits in Air:	Not determined.
Extinguishing Media:	On large fires use dry chemical, foam or water spray. On small fires use carbon dioxide (CO2), dry chemical or water spray. Water can be used to cool fire exposed containers.
Fire Fighting Measures:	Self-contained breathing apparatus and protective clothing should be worn in fighting large fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan. Use water spray to keep fire exposed containers cool.
Unusual Fire Hazards:	None.

Hazardous Decomposition Products

Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Silicon dioxide. Carbon oxides and traces of incompletely burned carbon compounds. Formaldehyde.

6. ACCIDENTAL RELEASE MEASURES

DOW CORNING

DOW CORNING CORPORATION
Material Safety Data Sheet

DOW CORNING(R) 340 HEAT SINK COMPOUND

Containment/Clean up: Observe all personal protection equipment recommendations described in Sections 5 and 8. Wipe up or scrape up and contain for salvage or disposal. Clean area as appropriate since some silicone materials, even in small quantities, may present a slip hazard. Final cleaning may require use of steam, solvents or detergents. Dispose of saturated absorbant or cleaning materials appropriately, since spontaneous heating may occur. Local, state and federal laws and regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which federal, state and local laws and regulations are applicable. Sections 13 and 15 of this MSDS provide information regarding certain federal and state requirements.

Note: See section 8 for Personal Protective Equipment for Spills. Call Dow Corning Corporation, (517) 496-5900, if additional information is required.

7. HANDLING AND STORAGE

Use with adequate ventilation. Avoid eye contact.

Use reasonable care and store away from oxidizing materials.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Component Exposure Limits

There are no components with workplace exposure limits.

Engineering Controls

Local Ventilation:	None should be needed.
General Ventilation:	Recommended.

Personal Protective Equipment for Routine Handling

Eyes:	Use proper protection - safety glasses as a minimum.
Skin:	Washing at mealtime and end of shift is adequate.
Suitable Gloves:	No special protection needed.
Inhalation:	No respiratory protection should be needed.
Suitable Respirator:	None should be needed.

Personal Protective Equipment for Spills

Eyes:	Use proper protection - safety glasses as a minimum.
Skin:	Washing at mealtime and end of shift is adequate.
Inhalation/Suitable Respirator:	No respiratory protection should be needed.

DOW CORNING

DOW CORNING CORPORATION
Material Safety Data Sheet

DOW CORNING(R) 340 HEAT SINK COMPOUND

Precautionary Measures: Avoid eye contact. Use reasonable care.

Note: These precautions are for room temperature handling. Use at elevated temperature or aerosol/spray applications may require added precautions.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical Form:	Paste
Color:	White
Odor:	Odorless
Specific Gravity @ 25°C:	2.0
Viscosity:	Not determined.
Freezing/Melting Point:	Not determined.
Boiling Point:	Not determined.
Vapor Pressure @ 25°C:	Not determined.
Vapor Density:	Not determined.
Solubility in Water:	0 g/l
pH:	Not determined.
Volatile Content:	0.00 %

Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications.

10. STABILITY AND REACTIVITY

Chemical Stability:	Stable.
Hazardous Polymerization:	Hazardous polymerization will not occur.
Conditions to Avoid:	None.
Materials to Avoid:	Oxidizing material can cause a reaction.

Section IV -- FIRE AND EXPLOSION HAZARD DATA

FLASH POINT	LEL	UEL
Propellant < 0 F	1.1	12.7

EXTINGUISHING MEDIA

Carbon Dioxide, Dry Chemical, Foam

UNUSUAL FIRE AND EXPLOSION HAZARDS

Isolate from heat, electrical equipment, sparks, and open flame.
Closed containers may explode when exposed to extreme heat.
Application to hot surfaces requires special precautions. During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain

Waste must be tested for ignitability to determine the applicable EPA hazardous waste numbers.
Do not incinerate. Depressurize container. Dispose of in accordance with Federal, State, and Local regulations regarding pollution.

Section VIII -- PROTECTION INFORMATION

PRECAUTIONS TO BE TAKEN IN USE

Use only with adequate ventilation. Avoid breathing vapor and spray mist. Avoid contact with skin and eyes. Wash hands after using.

VENTILATION

Local exhaust preferable. General exhaust acceptable if the exposure to materials in Section II is maintained below applicable exposure limits. Refer to OSHA Standards 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION

If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly fitted organic vapor/particulate respirator approved by NIOSH/MSHA for protection against materials in Section II.

PROTECTIVE GLOVES

None required for normal application of aerosol products where minimal skin contact is expected. For long or repeated contact, wear chemical resistant gloves.

EYE PROTECTION

Wear safety spectacles with unperforated sideshields.

Section IX -- PRECAUTIONS

DOL STORAGE CATEGORY

1A

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Keep away from heat, sparks, and open flame. Vapors will accumulate readily and may ignite explosively.
During use and until all vapors are gone: Keep area ventilated - Do not smoke - Extinguish all flames, pilot lights, and heaters - Turn off stoves, electric tools and appliances, and any other sources of ignition.
Consult NFPA Code. Use approved Bonding and Grounding procedures.
Contents under pressure. Do not puncture, incinerate, or expose to temperature above 120F. Heat from sunlight, radiators, stoves, hot water, and other heat sources could cause container to burst. Do not take internally. Keep out of the reach of children.

OTHER PRECAUTIONS

Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

The above information pertains to this product as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to this product may substantially alter the composition and hazards of the product. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.

medical attention.

SPECIAL FIRE FIGHTING PROCEDURES

Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

Section V -- HEALTH HAZARD DATA

ROUTES OF EXPOSURE

Exposure may be by INHALATION and/or SKIN or EYE contact, depending on conditions of use. To minimize exposure, follow recommendations for proper use, ventilation, and personal protective equipment.

ACUTE Health Hazards

EFFECTS OF OVEREXPOSURE

Irritation of eyes, skin and respiratory system. May cause nervous system depression. Extreme overexposure may result in unconsciousness and possibly death.

SIGNS AND SYMPTOMS OF OVEREXPOSURE

Headache, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mists.

Redness and itching or burning sensation may indicate eye or excessive skin exposure.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

None generally recognized.

EMERGENCY AND FIRST AID PROCEDURES

If INHALED: If affected, remove from exposure. Restore breathing. Keep warm and quiet.

If on SKIN: Wash effected area thoroughly with soap and water. Remove contaminated clothing and launder before re-use.

If in EYES: Flush eyes with large amounts of water for 15 minutes. Get medical attention.

If SWALLOWED: Never give anything by mouth to an unconscious person. DO NOT INDUCE VOMITING. Give several glasses of water. Seek medical attention.

CHRONIC Health Hazards

No ingredient in this product is an IARC, NTP or OSHA listed carcinogen. Prolonged overexposure to solvent ingredients in Section II may cause adverse effects to the liver and urinary systems.

Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

Section VI -- REACTIVITY DATA

STABILITY -- Stable

CONDITIONS TO AVOID

None known.

INCOMPATIBILITY

None known.

HAZARDOUS DECOMPOSITION PRODUCTS

By fire: Carbon Dioxide, Carbon Monoxide

HAZARDOUS POLYMERISATION

Will not occur

Section VII -- SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Remove all sources of ignition. Ventilate and remove with inert absorbent.

WASTE DISPOSAL METHOD

Waste from this product may be hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261.

0017198439 HAZARDOUS MATERIAL WARNING (HAZMAT) 2W757

When shipment is complete, retain for daily Hazmat audit.

SECTION III - PHYSICAL DATA

BOILING RANGE: 250.0 TO 345.0 F VAPOR DENSITY: HEAVIER THAN AIR
EVAPORATION RATE: SLOWER THAN ETHER
PERCENT VOLATILE BY VOLUME: 56.5 VOC (less water): 3.98 LBS/GAL
WEIGHT PER GALLON:9.91 POUNDS
V.O.C. IS DETERMINED PER EPA REFERENCE METHOD 24 USING ASTM PROCEDURES D2369 D1475 AND D3960.
VAPOR PRESSURE: 5.79 MM/HG MELTING POINT: NOT APPLICABLE
SOLUBILITY IN WATER: NEGLIGIBLE
APPEARANCE AND ODOR: RED LIQUID WITH PAINT ODOR

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

OSHA CATEGORY: FLAMMABLE LIQUID

FLASH POINT: 72 F PENSKY MARTIN LEL: 1.0 UEL: N/A
EXTINGUISHING MEDIA:
Carbon dioxide, dry chemical or foam
UNUSUAL FIRE AND EXPLOSION HAZARDS:
Pressure may build up in closed containers that are exposed to heat.
Solvent vapors are heavier than air and may travel a considerable

Provided By Electrical Insulation Suppliers Inc.

distance along the ground to an ignition source and "flash back".

SPECIAL FIRE FIGHTING PROCEDURES:
Water may be ineffective, however, water may be used to cool closed containers that are exposed to heat. Firefighting personnel should wear self-contained breathing apparatus.

SECTION V - HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE: SEE SECTION II
PRIMARY ROUTE(S) OF ENTRY:
Inhalation and skin contact
EFFECTS OF OVEREXPOSURE:
Headache, nausea, dizziness, confusion, irritability.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:
Respiratory difficulties or preexisting skin sensitization.
CARCINOGENICITY:
None of the components of this product are reported carcinogens in A/C with OSHA, NTP, IARC and NIOSH.
EMERGENCY FIRST AID PROCEDURES:
INHALATION: Remove to fresh air. Administer artificial respiration or oxygen if breathing is difficult.
SKIN: Wash affected area with soap and water. Remove and launder contaminated clothing. Consult a physician if irritation persists.
EYES: Flush immediately with large amounts of water for at least 15 minutes. Take to a physician for medical treatment.
INGESTION: Call a physician immediately.

ACUTE: Skin and eye contact: Primary irritation.
CHRONIC: Xylene contained in this material has been found to cause the follo wing effects in laboratory animals:amenia,liver abnormalities,liver and eye damage.
Pre-Exiting liver and/or kidney disorders may be aggrevated by exposure to xylene. Reports have associated repeated and prolonged occupational overexpo sure to xylene with permanent brain and nervous system damage.

SECTION VI - REACTIVITY DATA

STABILITY: NORMAL STABLE
CONDITIONS TO AVOID:
None known
INCOMPATIBILITY (Materials to avoid)
Strong acids and bases
HAZARDOUS DECOMPOSITION PRODUCTS:
BY FIRE: Normal products of incomplete combustion.
HAZARDOUS POLYMERIZATION: DOES NOT OCCUR
CONDITIONS TO AVOID:
None known

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Provide adequate ventilation. Remove all possible ignition sources. Absorb and dispose using non-sparking tools.
Eliminate all sources of ignition. Evacuate unprotected personnel. Water spray may be used. To contain run-off, cover with an absorbent material and place in containers for proper disposal. Flush area with water to remove residue.
WASTE DISPOSAL METHOD:
Dispose in accordance with local applicable regulations.
Disposal of using an approved incineration process or in accordance with local, state, and federal regulations regarding health and pollution.

SECTION VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION:
In outdoor or open areas use Bureau of Mines approved mechanical filter respirator to remove solid airborne particulates of overspray. Indoors, where ventilation is inadequate. use Bureau of Mines

approved chemical-mechanical respirators designed to remove both particulate and vapor.

VENTILATION:

PROTECTIVE GLOVES:

Recommended if skin contact is likely.

EYE PROTECTION:

Chemical splash goggles recommended if potential for splash or eye contact is likely.

OTHER PROTECTIVE EQUIPMENT:

Recommended as needed to avoid contact.

SECTION IX · SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING OR STORING:

Store in a cool dry place away from heat, sparks and open flame. Keep containers closed and upright to prevent leakage. Outside or detached storage is preferred. Inside storage should be in a standard flammable liquid storeroom or cabinet. Metal containers should be grounded when transferring material from one container to another. Do not reuse product container for any purpose.

OTHER PRECAUTIONS:

PREPARED BY: TECHNICAL STAFF
REFERENCE DATE: JUNE 1997

THE INFORMATION AND RECOMMENDATIONS CONTAINED HEREIN ARE BASED UPON DATA BELIEVED TO BE CORRECT. HOWEVER, NO GUARANTEE OR WARRANTY OF ANY KIND, *EXPRESSED OR IMPLIED*, IS MADE WITH RESPECT TO THE INFORMATION ABOVE.

TO WHOM IT MAY CONCERN: EFFECTIVE JAN 1, 1989, WE ARE REQUIRED BY SARA TIT LE III SECTION 313 OF THE RIGHT TO KNOW LEGISLATION, TO INFORM YOU OF THE PERCENTAGE OF ANY INGREDIENT IN A PRODUCT WHICH IS IN THE 313 LIST OR AS AN LISTING AS A COMPONENT OF A MATERIAL WHICH IS IN A CATEGORY OF CHEMICAL LIST.

PRODUCT: 1201 GLYPTAL

34.5% XYLENE (CAS NUMBER 1330-20-7)

IF YOU WILL MULTIPLY YOUR TOTAL PURCHASES FROM US AS WELL AS FROM OTHER SU PPLIERS BY THE PERCENTAGE OF EACH INGREDIENT FOUND IN EACH PRODUCT AND IF THE TOTAL QUANTITY EXCEEDS THE REPORTABLE QUANTITY FOR THAT INGREDIENT YOU ARE REQUIRED TO FILE FORM R REPORTS.

SECTION 1 IDENTIFICATION

PRODUCT NAME: ECCOBOND A-401-37

General Chemical Description: Epoxy Adhesive

SECTION 2 INGREDIENTS

Components	% by Weight	Exposure Guidelines OSHA PEL	ACGIH TLV
Pigments Curing Agents Modifiers			
Total of the above:	< 11	NA	NA
Epoxy Resin	80-90%	NE	NE
Amorphous Fumed Silica	< 5%	6 mg/m3	10 mg/m3

SECTION 3 PHYSICAL DATA

Boiling Point (Degree °F): ND
Vapor Pressure (mm Hg @ 25°C): < 1
Percent Volatiles by Weight: *Negligible*
Specific Gravity (water = 1): 1.20
Solubility in Water: ND
Vapor Density: ND
Appearance and Odor: Black liquid

SECTION 4 FIRE AND EXPLOSION HAZARD DATA

Flash Point (Degree °F):
> 200

Flammable Limits:
Not Established

Extinguishing Media:
Use carbon dioxide, dry chemical, foam, water fog.

MOR 000737

Unusual Fire or Explosion Hazard:
Decomposition and combustion products may be toxic. Containers exposed to elevated temperatures for extended periods of time may result in spontaneous exothermic polymerization of material, possibly resulting in violent rupturing of sealed containers.

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

Special Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5 REACTIVITY DATA

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:
Incompatible with strong oxidizers, acids, bases; uncontrolled mixing with amines, anhydrides, mercaptans, imidazoles may cause hazardous polymerization.

Hazardous Decomposition Products:
Carbon monoxide, carbon dioxide, aldehydes, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on the conditions of combustion. Prolonged exposure to elevated temperatures may cause uncontrolled exothermic reactions resulting in decomposition and charring of the material. Fumes and vapors from the thermal and chemical decomposition may vary widely in composition and toxicity.

Conditions to Avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

SECTION 6 RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:
Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

MOR 000738

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

Large Spills:

Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

SECTION 7 HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to to use.

Personal Protection:

This product can cause eye irritation. Prevent eye contact through the use of chemical safety glasses, splash-proof chemical goggles, or face shield. This product can cause skin irritation and may cause allergic skin reactions. Wear appropriate protective gloves. If necessary, a proper chemical-resistant apron and additional impervious clothing should be used to prevent skin contact and contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower should be available.

Ventilation Recommendations and Respiratory Protection:

Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing. Ventilation must be sufficient to maintain airborne levels of Section 2 ingredients below their PEL/TLV values. Use an appropriate, properly fitted respirator if exposures exceed PEL/TLV values. The type of protection selected (SCBA, air-purifying, etc.) will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage:

Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

MOR 000739

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

ECCOBOND A-401-37

SECTION 8 HEALTH DATA

Routes of Exposure:
Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:
Exposure may aggravate preexisting skin and/or eye disorders.

Eye Contact:
Contains materials irritating to the eyes. Symptoms may include blurred vision, burning sensation and tearing.

Skin Contact:
Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals; symptoms include rash, itching, hives, swelling of the extremities.

Inhalation:
Heating can generate vapors that may cause respiratory irritation, nausea and headaches. Inhalation hazard at room temperature is unlikely, due to the low volatility of this product.

Ingestion:
Harmful if swallowed.

Chronic Health Effects:
Although the significance is unknown, the DGEBA epoxy resin in this product has been shown to be mutagenic in some microbial tests, but has failed to show mutagenicity in others. Chromosomal aberrations were observed in cultured rat liver cells. Two-year bioassays on mice exposed by the dermal route to DGEBA resins yielded only very limited evidence of weak carcinogenicity. Based on this and other evidence, the International Agency for Research on Cancer (IARC) concluded in 1988 that DGEBA epoxy resins are not classifiable as carcinogens.

SECTION 9 FIRST AID PROCEDURES:

Eye Contact:
Flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get medical attention.

Skin Contact:
Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

MOR 000740

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
Dilute by giving plenty of water to drink, if victim is conscious and alert. Never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate attention.

SECTION 10 ADDITIONAL INFORMATION

TSCA Status:
All components of this product are listed in the EPA Toxic Substance Control Act Inventory.

SARA Status:
This product does not contain any substances regulated by the SARA Section 313 amendments to RCRA.

This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

SECTION IV-FIRE AND EXPLOSION HAZARD DATA

Flash Point (°F): 390 (Tag Closed Cup: ASTM D56)

Flammable Limits: Not Established

Extinguishing Media: Carbon dioxide, dry chemical, foam, water fog.

Unusual Fire or Explosion Hazards: Toxic vapors may be evolved upon exposure to heat or open flame.

Special Firefighting Procedures: Firefighters should wear self-contained breathing apparatus.

SECTION V-REACTIVITY DATA

Product Stability: Product is stable; hazardous polymerization will not occur.

Incompatibilities: strong oxidizers, amines, amides, strong Lewis or mineral acids, thiosulfates, carboxylic acids, alcohol, mercaptans. Reaction with curing agents is exothermic;smoke or toxic fumes may be evolved if heat of reaction becomes excessive due to high curing temperature or curing of large masses of material.

Hazardous decomposition products:Carbon monoxide, carbon dioxide, oxides of nitrogen.

Conditions to avoid: Storage in open containers, intense heat or open flame, uncontrolled mixing with (or exposure to) incompatible substances (above)

MOR 000743

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

SECTION VI-SPILL OR LEAK PROCEDURES

Handling Precautions: See section VIII

For small spills: Wipe up, or absorb with vermiculite or other absorbent material. Collect waste in sealed containers. Scrub area with soapy water and rinse. Prevents rinses from entering drains or other waterways. Spilled material and water rinses are classified as chemical waste, and must be disposed of in accordance with current local, state, and federal regulations.

For large spills: Dike area to contain spilled material and to prevent runoff into drains, sewers, and other waterways. Shovel or pump to drum or salvage tank. Absorb residual material with sand, vermiculite, or other absorbent material. Scrape or shovel absorbed waste and absorbent into containers. Scrub area with soapy water and rinse. Prevents rinses from entering drains or other waterways. Spilled material and water rinses are classified as chemical waste, and must be disposed of in accordance with current local, state, and federal regulations.

SECTION VII-SPECIAL PRECAUTIONS

Personal Protection: Avoid skin and eye contact. Wear gloves and protective clothing to prevent exposure. Protective eye goggles should be worn.

Storage: Store in cool, dry place; keep removed from any heat or open flame. Keep container closed when not in use.

Ventilation Requirements: Good general workplace ventilation is recommended. Flexible ductwork should extend to areas of high concentration to prevent local buildup of vapor. Provide special ventilation at elevated temperatures.

Flammability/ Explosion Precautions: Keep away from intense heat, open flames.

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

SECTION VIII-HEALTH HAZARD DATA

Effects of Acute Overexposure	Emergency First Aid Procedures
Inhalation	
Vapors at excessively high temperatures may produce irritation of nose and throat	Remove to fresh air. Give artificial respiration if not breathing. Give oxygen if breathing difficult. Get immediate medical attention.
Eye contact	
Irritation upon direct contact	Immediately flush eyes with water for 15 minutes; get medical attention
Skin contact	
Irritation upon direct contact. Prolonged exposure may result in skin sensitization	Remove contaminated clothing wash affected area with water.
Ingestion	
Harmful if swallowed	Dilute with large quantities water; induce vomiting only if victim is conscious and alert. Get immediate medical attention.

MOR 000745

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

Effects of Chronic Overexposure:
It is very unlikely that normal work operations with this product could produce atmospheric epichlorohydrin concentrations approaching the OSHA limit. Nevertheless, you should be aware that ECH has been reported to produce cancer in laboratory animals and to produce mutagenic changes in bacteria and cultured human cells. An analysis of all the evidence to date (through 1979) in an ongoing epidemiology study of ECH workers has been reported to show "weak" evidence that exposure to ECH poses a cancer risk to humans.

MOR 000746

ECCOGEL 1265 Part B

SECTION VI-SPILL OR LEAK PROCEDURES

Note: Protective gloves, clothing, respiratory protection and chemical splash goggles must be worn during entire clean-up procedure.Cleanup of large spills should be done in accordance with the provisions of OSHA 29CFR 1910.120 ("Hazardous Waste Operations and Emergency Response").

For small spills: Wipe up, or absorb with vermiculite or other absorbent material. Collect waste in sealed containers.
Scrub area with soapy water and rinse. Prevents rinses from entering drains or other waterways.
Spilled material and water rinses are classified as chemical waste, and must be disposed of in accordance with current local, state, and federal regulations.

For large spills: Turn on ventilation equipment to evacuate vapors from the area.Dike area to contain spilled material and to prevent runoff into drains, sewers, and other waterways.
Shovel or pump to drum or salvage tank.
Absorb residual material with sand, vermiculite, or other absorbent material.
Scrape or shovel absorbed waste and absorbent into containers.
Scrub area with soapy water and rinse. Prevents rinses from entering drains or other waterways.
Spilled material and water rinses are classified as chemical waste, and must be disposed of in accordance with current local, state, and federal regulations.

SECTION VII-SPECIAL PRECAUTIONS

WARNING: Corrosive Material

Personal Protection: Do not get on skin, eyes, or clothing. Wear proper protective gloves. chemical splash goggles, and clothing to prevent exposure. Remove contaminated clothing and wash before reusing. Do not ingest or swallow this material.

Storage: Store in cool, dry place; keep removed from any heat or open flame.
Keep container closed when not in use.

Ventilation Requirements: Prevent breathing of vapors, mist, or spray. Use only with proper mechanical exhaust ventilation. Wear an appropriate, properly fitted respirator when contaminant levels exceed the recommended exposure limits.

Flammability/ Explosion Precautions: Keep away from intense heat, open flames.

ECCOGEL 1265 Part B

SECTION VIII-HEALTH HAZARD DATA

WARNING: Corrosive material - contact with skin and eyes may cause burns.

Route of Exposure: Skin Contact/Absorption, Inhalation

Effects of Acute Overexposure	Emergency First Aid Procedures
Inhalation	
Inhalation of vapors may cause respiratory tract irritation.	Remove to fresh air. Give oxygen if breathing difficult; give artificial respiration if not breathing; get immediate medical attention.
Eye contact	
Very severe irritation upon contact; can cause permanent damage or blindness	Immediately flush eyes with water and continue flushing until medical attention is obtained
In contact	
Very severe irritation upon direct contact May cause burns and/or blistering Prolonged exposure may result in skin sensitization	Remove contaminated clothing under shower. Wash affected area thoroughly with water. Obtain medical attention if burns result.
Ingestion	
Harmful if swallowed	Dilute with large quantities of water- do not induce vomiting. Get immediate medical attention.

ECCOSTRIP 93

----------SECTION VI-SPILL OR LEAK PROCEDURES----------

Corrosive Material Note: Protective gloves, clothing, respiratory protection and chemical splash goggles must be worn during entire clean-up procedure.NIOSH-approved respirators should be worn during clean-up of large spills.

For small spills: Turn on ventilation equipment to evacuate vapors from the area. Wipe up, or absorb with vermiculite or other absorbent material.
Collect waste in sealed containers.
Scrub area with soapy water and rinse. Prevents rinses from entering drains or other waterways.
Soilled material and water rinses are classified as hazardous waste, and must be disposed of in accordance with current local, state, and federal regulations.

For large spills: Turn on ventilation equipment to evacuate vapors from the area.Dike area to contain spilled material and to prevent runoff into drains, sewers, and other waterways.
Shovel or pump to drum or salvage tank.
Absorb residual material with sand, vermiculite, or other absorbent material.
Scrape or shovel absorbed waste and absorbent into containers.
Scrub area with soapy water and rinse. Prevents rinses from entering drains or other waterways.
Soilled material and water rinses are classified as hazardous waste, and must be disposed of in accordance with current local, state, and federal regulations.

THE MOREY CORP

----------SECTION VII-SPECIAL PRECAUTIONS----------

WARNING:: Corrosive Material

Personal Protection: Avoid skin and eye contact. Protective gloves and clothing, and eye goggles with side shields must be worn. Avoid breathing vapors. Use only with adequate ventilation.

Storage: Store in cool, dry place; keep removed from any heat or open flame. Keep container closed when not in use. Activated mixture can cause pressure build-up if stored in sealed containers. Containers for such mixtures should be loosely covered, not tightly sealed, in such manner as to permit venting and release of pressure during storage.

Ventilation Requirements: Flexible ductwork should extend to areas of high concentration to prevent local buildup of vapor. NIOSH-approved self-contained breathing apparatus should be used in the absence of mechanical ventilation when working with large quantities of material.

Flammability/ Explosion Precautions: Keep away from intense heat, open flames.

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. ECCOSTRIP 93

----------SECTION VIII-HEALTH HAZARD DATA----------

WARNING: Corrosive Material - contact with skin or eyes may result in burns. Contact with eyes may result in permanent damage or blindness.

Contains Phenol - toxic if Phenol is absorbed through skin

Contains Formic Acid. Toxic material - may be fatal if swallowed

Effects of Acute Overexposure	Emergency First Aid Procedures
Inhalation	
Vapors may cause nausea, headache, dizziness, narcosis, anaethesia	Remove victim to fresh air. Give artificial respiration if not breathing. Give oxygen if breathing difficult. Get immediate medical attention.
Overexposure to high concentrations may result in loss of consciousness	
Eye contact	
Very severe irritation upon contact; can cause permanent damage or blindness	Immediately flush eyes with water and continue flushing until medical attention is obtained
Skin contact	
Very severe irritation upon direct contact May cause burns and/or blistering	Remove contaminated clothing under shower. Wash affected area thoroughly with water. Obtain medical attention if burns result.
Ingestion	
Harmful if swallowed.	Dilute with water. Get immediate medical attention

Emerson & Cuming
a National Starch & Chemical Company

MATERIAL SAFETY DATA SHEET

EMERSON & CUMING
46 MANNING ROAD
BILLERICA, MASSACHUSETTS 01821

IN THE EVENT OF A CHEMICAL EMERGENCY INVOLVING A SPILL, LEAK, FIRE, EXPOSURE, OR ACCIDENT, NOTIFY:
CHEMTREC USA: 800-424-9300
INTERNATIONAL: 202-483-7616 (COLLECT)

SECTION 1: IDENTIFICATION

Product Name: CATALYST 23LV
General Chemical Description: Aliphatic Amine

SECTION 2: INGREDIENTS

		Exposure Guidelines	
Hazardous Components	***% by Weight***	***OSHA PEL***	***ACGIH TLV***
Polyoxypropylene Polyamine	30-60%	NE	NE
Polyglycol Diamine	30-60%	NE	NE

SECTION 3: PHYSICAL DATA

Boiling Point (°F): >480
Vapor Pressure (mm Hg @ 25°C): <0.001
Percent Volatiles by Weight: ND
Specific Gravity (water = 1): 1.00
Solubility in Water: Soluble
Vapor Density: Heavier than air
Appearance and Odor: Amber liquid, strong amine odor

SECTION 4: FIRE AND EXPLOSION HAZARD DATA

Flash Point (°F):
>200 (PMCC)

Flammable Limits
Not Established

Extinguishing Media:
Use carbon dioxide, dry chemical, foam, water fog.

Unusual Fire or Explosion Hazard:
Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions.

Special Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5: REACTIVITY DATA

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility: Incompatible with strong oxidizers, acids, bases. Uncontrolled mixing with epoxides may result in hazardous exothermic polymerization, with possible evolution of smoke and toxic fumes.

Hazardous Decomposition Products:
Carbon monoxide, carbon dioxide, oxides of nitrogen, amines and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on the conditions of combustion.

Conditions to Avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with epoxies or exposure to incompatible substances.

SECTION 6: RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:
Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

Large Spills:
Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

SECTION 7: HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection:
This product can cause eye burns. Prevent eye contact through the use of a face shield used in conjunction with either splash-proof chemical goggles or chemical safety glasses. This product can cause skin burns and may cause allergic skin responses. Components of this product may also be absorbed through the skin. Wear appropriate protective gloves, a proper chemical-resistant apron and additional impervious clothing to prevent all skin contact, contamination of clothing and possible absorption through the skin. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

Ventilation Recommendations and Respiratory Protection:
Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing.

Storage:
Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8: HEALTH DATA

Routes of Exposure:
Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:
Exposure may aggravate preexisting skin, eye and/or respiratory disorders.

Eye Contact:
Contains materials corrosive to the eyes; may cause burns and possible corneal injury. Permanent impairment of vision or blindness may occur.

Skin Contact:
Contains materials corrosive to the skin; may cause severe burns and blistering. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals; symptoms include rash, itching, hives, swelling of the extremities. May be harmful if absorbed through the skin.

Inhalation:
Vapors may cause irritation, nausea, and headaches.

Ingestion:
Harmful if swallowed. May cause burns to the mouth and upper gastro-intestinal tract.

Chronic Health Effects:
None known

SECTION 9: FIRST AID PROCEDURES

Eye Contact:
Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

Skin Contact:
Immediately flush the affected area of the skin with plenty of water, while removing contaminated clothing or shoes. Follow by thoroughly washing with soap and water. Avoid scrubbing, as this action could increase skin absorption and worsen the effect of chemical contact. Get immediate medical attention. Do not reuse contaminated clothing until properly cleaned. Contaminated leather articles, including shoes, cannot be decontaminated and should be destroyed.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

Ingestion:
DO NOT induce vomiting. If victim is conscious and alert, dilute by giving water to drink; never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

SECTION 4: FIRE AND EXPLOSION HAZARD DATA

Flash Point (°F):
> 200

Flammable Limits
Not Established

Extinguishing Media:
Use carbon dioxide, dry chemical, foam, water fog.

Unusual Fire or Explosion Hazard:

MOR 000759

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

Decomposition and combustion products may be toxic. Reaction with curing agents is exothermic; smoke or toxic fumes may be evolved if heat of reaction becomes excessive due to high curing temperatures or curing of large masses of material. See Section 5, "Hazardous Decomposition Products".

Special Firefighting Procedures:

Firefighters/rescue personnel should wear positive pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5: REACTIVITY DATA

Product Stability:

Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:

Incompatible with strong oxidizers, acids, bases; uncontrolled mixing with amines, anhydrides, mercaptans, imidazoles may cause hazardous polymerization.

Hazardous Decomposition Products:

Carbon monoxide, carbon dioxide, nitrogen compounds, phenols, aldehydes, acids, traces of cyanides and other organic substances may be formed during combustion.

Conditions to Avoid:

Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

SECTION 6: RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:

Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

Large Spills:

Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

SECTION 7: HANDLING PRECAUTIONS

MOR 000760

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection:

This product can cause eye irritation. Prevent eye contact through the use of chemical safety glasses, splash-proof chemical goggles, or face shield. This product can cause skin irritation and may cause allergic skin reactions. Wear appropriate protective gloves. If necessary, a proper chemical-resistant apron and additional impervious clothing should be used to prevent skin contact and contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower should be available.

Ventilation Recommendations and Respiratory Protection:

Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing. Ventilation must be sufficient to maintain airborne levels of Section 2 ingredients below their PEL/TLV values. Use an appropriate, properly fitted respirator if exposures exceed PEL/TLV values. The type of protection selected (SCBA, air-purifying, etc.) will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage:

Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8: HEALTH DATA

Routes of Exposure:

Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:

Exposure may aggravate preexisting skin and/or eye disorders.

Eye Contact:

Contains materials irritating to the eyes. Symptoms may include blurred vision, burning sensation and tearing.

Skin Contact:

Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals; symptoms include rash, itching, hives, swelling of the extremities.

Inhalation:

Heating can generate vapors that may cause respiratory irritation, nausea and headaches. Inhalation hazard at room temperature is unlikely, due to the low volatility of this product.

Ingestion:

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

Harmful if swallowed.

Chronic Health Effects:
Although the significance is unknown, the DGEBA epoxy resin in this product has been shown to be mutagenic in some microbial tests, but has failed to show mutagenicity in others. Chromosomal aberrations were observed in cultured rat liver cells. Two-year bioassays on mice exposed by the dermal route to DGEBA resins yielded only very limited evidence of weak carcinogenicity. Based on this and other evidence, the International Agency for Research on Cancer (IARC) concluded in 1988 that DGEBA epoxy resins are not classifiable as carcinogens.

The International Agency for Research on Cancer (IARC) has classified free carbon black as a Class 2B carcinogen, in that there is sufficient evidence for carcinogenicity in animals (based on inhalation studies), but evidence for carcinogenicty in humans is nonexistent. Exposure to free carbon black, however, is unlikely, unless the cured product is machined or ground in such a manner to evolve dusts; or in spray applications where vapors or fumes containing carbon black may become airborne, thus creating potential for inhalation exposure.

SECTION 9: FIRST AID PROCEDURES

Eye Contact:
Flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get medical attention.

Skin Contact:
Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
Dilute by giving plenty of water to drink, if victim is conscious and alert. Never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

Use carbon dioxide, dry chemical, foam, water fog.

Unusual Fire or Explosion Hazard:
Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions.

Special Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5 REACTIVITY DATA

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:
Incompatible with strong oxidizers, acids, bases, epoxides

Hazardous Decomposition Products:
Carbon monoxide, carbon dioxide, oxides of nitrogen, and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on the conditions of combustion.

Conditions to Avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with epoxies or exposure to incompatible substances.

MOR 000765

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

SECTION 6 RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:

Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

Large Spills:

Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

SECTION 7 HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to to use.

Personal Protection:

This product can cause eye burns. Prevent eye contact through the use of a face shield used in conjunction with either splash-proof chemical goggles or chemical safety glasses. This product can cause skin burns and may cause allergic skin responses. Components of this product may also be absorbed through the skin. Wear appropriate protective gloves, a proper chemical-resistant apron and additional impervious clothing to prevent all skin contact, contamination of clothing and possible absorption through the skin. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.

MOR 000766

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

Ventilation Recommendations and Respiratory Protection:

Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing. Ventilation must be sufficient to maintain airborne levels of Section 2 ingredients below their PEL/TLV values. Use an appropriate, properly fitted respirator if exposures exceed PEL/TLV values. The type of protection selected (SCBA, air-purifying, etc.) will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage:

Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8 HEALTH DATA

Routes of Exposure:

Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:

Exposure may aggravate preexisting skin, eye and/or respiratory disorders.

Eye Contact:

Contains materials corrosive to the eyes; may cause burns and possible corneal injury. Permanent impairment of vision or blindness may occur.

Skin Contact:

Contains materials corrosive to the skin; may cause severe burns and blistering. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals. May be harmful if absorbed through the skin.

Inhalation:

Vapors may cause irritation, nausea, and headaches.

Ingestion:

Harmful if swallowed. May cause burns to the mouth and upper gastrointestinal tract.

Chronic Health Effects:

Exposure to the filler material listed in Section 2 is unlikely to occur unless the product is applied in a manner which results in the generation of mists or fumes, or when machining of the cured product results in generation of dust particles.

MOR 000767

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

STYCAST 2754, PART B

SECTION 9 FIRST AID PROCEDURES:

Eye Contact:
Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

Skin Contact:
Immediately flush the affected area of the skin with plenty of water, while removing contaminated clothing or shoes. Follow by thoroughly washing with soap and water. Avoid scrubbing, as this action could increase skin absorption and worsen the effect of chemical contact. Get immediate medical attention. Do not reuse contaminated clothing until properly cleaned. Contaminated leather articles, including shoes, cannot be decontaminated and should be destroyed.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
DO NOT induce vomiting. If victim is conscious and alert, dilute by giving water to drink; never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

SECTION 10 ADDITIONAL INFORMATION

Product NPCA Hazardous Material Identification System (HMIS) Rating:
Health: 3 Flammability: 1 Reactivity: 0

TSCA Status:
All components of this product are listed in the EPA Toxic Substance Control Act Inventory.

SARA Status:
This product does not contain any substances regulated by the SARA Section 313 amendments to RCRA.

STYCAST 2754, PART A

SECTION 4 FIRE AND EXPLOSION HAZARD DATA

Flash Point (Degree °F):
› 200

Flammable Limits:
Not established

Extinguishing Media:
Use carbon dioxide, dry chemical, foam, water fog.

Unusual Fire or Explosion Hazard:
Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions.

Special Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5 REACTIVITY DATA

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:
Incompatible with strong oxidizers, acids, bases; uncontrolled mixing with amines, anhydrides, mercaptans, imidazoles may cause hazardous polymerization.

Hazardous Decomposition Products:
Carbon monoxide, carbon dioxide, aldehydes, isocyanates, phenols, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-prod ucts will vary widely depending on the conditions of combustion.

Conditions to Avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

MOR 000770

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

Ventilation Recommendations and Respiratory Protection:
Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing. Ventilation must be sufficient to maintain airborne levels of Section 2 ingredients below their PEL/TLV values. Use an appropriate, properly fitted respirator if exposures exceed PEL/TLV values. The type of protection selected (SCBA, air-purifying, etc.) will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage:
Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8 HEALTH DATA

Routes of Exposure:
Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:
Exposure may aggravate preexisting skin and/or eye disorders.

Eye Contact:
Contains materials irritating to the eyes. Symptoms may include blurred vision, burning sensation and tearing.

Skin Contact:
Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals; symptoms include rash, itching, hives, swelling of the extremities.

Inhalation:
Heating can generate vapors that may cause respiratory irritation, nausea and headaches. Inhalation hazard at room temperature is unlikely, due to the low volatility of this product.

Ingestion:
Harmful if swallowed.

MOR 000772

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

SECTION 6 RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:

Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

Large Spills:

Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

SECTION 7 HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to to use.

Personal Protection:

This product can cause eye irritation. Prevent eye contact through the use of chemical safety glasses, splash-proof chemical goggles, or face shield. This product can cause skin irritation and may cause allergic skin reactions. Wear appropriate protective gloves. If necessary, a proper chemical-resistant apron and additional impervious clothing should be used to prevent skin contact and contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower should be available.

MOR 000771

The information contained herein is based upon data considered true and accurate. However, Grace makes no warranties, express or implied, as to the accuracy or adequacy of the information contained herein or the results to be obtained from the use thereof. This information is offered solely for the user's consideration, investigation and verification. Since the use and conditions of use of this information and the material described herein are not within the control of Grace, Grace assumes no responsibility for injury to the user or third persons. The material described herein is sold only pursuant to Grace's Terms and Conditions of Sale, including those limiting warranties and remedies contained therein. It is the responsibility of the user to determine whether any use of this data and information is in accordance with applicable federal, state or local laws and regulations.

Chronic Health Effects:
Although the significance is unknown, the DGEBA epoxy resin in this product has been shown to be mutagenic in some microbial tests, but has failed to show mutagenicity in others. Chromosomal aberrations were observed in cultured rat liver cells. Two-year bioassays on mice exposed by the dermal route to DGEBA resins yielded only very limited evidence of weak carcinogenicity. Based on this and other evidence, the International Agency for Research on Cancer (IARC) concluded in 1988 that DGEBA epoxy resins are not classifiable as carcinogens.

Recent studies indicate that Butyl and Phenyl Glycidyl Ethers may induce mutagenic changes in laboratory animals. This has not been related to human exposures, however, good ventilation and industrial hygiene practices should be followed when handling compounds containing either BGE or PGE.

Products similar to the aliphatic gylcidyl ethers listed in Section II are reported to be mutagenic (causes genetic changes) in some laboratory animal tests.

Exposure to the filler material listed in Section 2 is unlikely to occur unless the product is applied in a manner which results in the generation of mists or fumes, or when machining of the cured product results in generation of dust particles.

The International Agency for Research on Cancer (IARC) has classified free carbon black as a Class 2B carcinogen, in that there is sufficient evidence for carcinogenicity in animals (based on inhalation studies), but evidence for carcinogenicty in humans is nonexistent. Exposure to free carbon black, however, is unlikely, unless the cured product is machined or ground in such a manner to evolve dusts; or in spray applications where vapors or fumes containing carbon black may become airborne, thus creating potential for inhalation exposure.

SECTION 9 FIRST AID PROCEDURES:

Eye Contact:
Flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get medical attention.

Skin Contact:
Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

MATERIAL SAFETY DATA SHEET

EMERSON & CUMING
46 MANNING ROAD
BILLERICA, MASSACHUSETTS 01821

IN THE EVENT OF A CHEMICAL EMERGENCY INVOLVING A SPILL, LEAK, FIRE, EXPOSURE, OR ACCIDENT, NOTIFY:
CHEMTREC USA: 800-424-9300
INTERNATIONAL: 202-483-7616 (COLLECT)

SECTION 1: IDENTIFICATION

Product Name: STYCAST® 2651MM UNPIGMENTED
General Chemical Description: Epoxy Resin

SECTION 2: INGREDIENTS

		Exposure Guidelines	
Components	***% by Weight***	***OSHA PEL***	***ACGIH TLV***
Calcium Carbonate	45-55%	15 mg/m3 (*)	10 mg/m3
DGEBA Epoxy Resin	40-50%	NE	NE
n-Butyl Glycidyl Ether	2-5%	50 ppm	25 ppm

(*) Total dust (5 mg/m3 respirable)

SECTION 3: PHYSICAL DATA

Boiling Point (°F): ND
Vapor Pressure (mm Hg @ 25°C): <0.1
Percent Volatiles by Weight: <3.0
Specific Gravity (water = 1): 1.50-1.65
Solubility in Water: Insoluble
Vapor Density: Heavier than air
Appearance and Odor: Off-white liquid, mild odor

SECTION 4: FIRE AND EXPLOSION HAZARD DATA

Flash Point (°F):
>200

Flammable Limits
Not established

Extinguishing Media:
Use carbon dioxide, dry chemical, foam, water fog.

MOR 000780

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

Unusual Fire or Explosion Hazard:
Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions. Reaction with curing agents is exothermic; smoke or toxic fumes may be evolved if heat of reaction becomes excessive due to high curing temperatures or curing of large masses of material. See Section 5, "Hazardous Decomposition Products".

Special Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5: REACTIVITY DATA

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:
Incompatible with strong oxidizers, acids, bases; uncontrolled mixing with amines, anhydrides, mercaptans, imidazoles may cause hazardous polymerization.

Hazardous Decomposition Products:
Carbon monoxide, carbon dioxide, aldehydes, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on the conditions of combustion.

Conditions to Avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

SECTION 6: RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:
Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

Large Spills:
Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

SECTION 7: HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection:
This product can cause eye irritation. Prevent eye contact through the use of chemical safety glasses, splash-proof chemical goggles, or face shield. This product can cause skin irritation and may cause allergic skin reactions. Wear appropriate protective gloves. If necessary, a proper chemical-resistant apron and additional impervious clothing should be used to prevent skin contact and contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower should be available.

Ventilation Recommendations and Respiratory Protection:
Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing. Ventilation must be sufficient to maintain airborne levels of Section 2 ingredients below their PEL/TLV values. Use an appropriate, properly fitted respirator if exposures exceed PEL/TLV values. The type of protection selected (SCBA, air-purifying, etc.) will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage:
Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8: HEALTH DATA

Routes of Exposure:
Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:
Exposure may aggravate preexisting skin and/or eye disorders.

Eye Contact:
Contains materials irritating to the eyes. Symptoms may include blurred vision, burning sensation and tearing.

Skin Contact:
Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals; symptoms include rash, itching, hives, swelling of the extremities.

Inhalation:
Heating can generate vapors that may cause respiratory irritation, nausea and headaches. Inhalation hazard at room temperature is unlikely, due to the low volatility of this product.

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

Ingestion:
Harmful if swallowed.

Chronic Health Effects:
Although the significance is unknown, the DGEBA epoxy resin in this product has been shown to be mutagenic in some microbial tests, but has failed to show mutagenicity in others. Chromosomal aberrations were observed in cultured rat liver cells. Two-year bioassays on mice exposed by the dermal route to DGEBA resins yielded only very limited evidence of weak carcinogenicity. Based on this and other evidence, the International Agency for Research on Cancer (IARC) concluded in 1988 that DGEBA epoxy resins are not classifiable as carcinogens.

Recent laboratory studies on Salmonella bacterium (i.e. - Ames Test) indicated that Butyl Glycidyl Ether (BGE) may induce mutagenic changes, a possible precursor to cancer; However, subsequent laboratory cancer studies have shown no increase in carcinogenic potential resulting from BGE exposure.

SECTION 9: FIRST AID PROCEDURES

Eye Contact:
Flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get medical attention.

Skin Contact:
Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
Dilute by giving plenty of water to drink, if victim is conscious and alert. Never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

SECTION 10: ADDITIONAL INFORMATION

Product NPCA Hazardous Material Identification System (HMIS) Rating:
Health: 2 Flammability: 1 Reactivity: 0

TSCA Status::
All components of this product are listed in the EPA Toxic Substance Control Act Inventory. This product contains the following substances which are subject to TSCA subject to TSCA Section 12(b) Export notification requirements:

Diglycidyl Ether of Bisphenol A (1675-54-3)

MOR 000783

intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection:
This product can cause eye burns. Prevent eye contact through the use of a face shield used in conjunction with either splash-proof chemical goggles or chemical safety glasses. This product can cause skin burns. Components of this product may also be absorbed through the skin. Wear appropriate protective gloves, a proper chemical resistant apron and additional impervious clothing to prevent all skin contact, contamination of clothing and possible absorption through the skin. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.

Ventilation Recommendations and Respiratory Protection:
Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing.

SECTION 8: HEALTH DATA

Routes of Exposure:
Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:
Exposure may aggravate preexisting skin, eye and/or respiratory disorders.

Eye Contact:
Contains materials corrosive to the eyes; may cause burns and possible corneal injury. Permanent impairment of vision or blindness may occur.

Skin Contact:
Contains materials corrosive to the skin; may cause severe burns and blistering.

Inhalation:
Vapors may cause irritation, nausea, and headaches.

Ingestion:
Harmful if swallowed. May cause burns to the mouth and upper gastro-intestinal tract.

Chronic Health Effects:
None Established

MOR 000792

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

SECTION 9: FIRST AID PROCEDURES

Eye Contact:
Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

Skin Contact:
Immediately flush the affected area of the skin with plenty of water, while removing contaminated clothing or shoes. Follow by thoroughly washing with soap and water. Avoid scrubbing, as this action could increase skin absorption and worsen the effect of chemical contact. Get immediate medical attention. Do not reuse contaminated clothing until properly cleaned. Contaminated leather articles, including shoes, cannot be decontaminated and should be destroyed.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
DO NOT induce vomiting. If victim is conscious and alert, dilute by giving water to drink; never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

SECTION 1: IDENTIFICATION

Product Name: STYCAST® 2850FT BLACK
General Chemical Description: Epoxy Resin

SECTION 2: INGREDIENTS

		Exposure Guidelines	
Hazardous Components	***% by Weight***	***OSHA PEL***	***ACGIH TLV***
Mineral Filler, Modifiers			
DGEBA Epoxy Resin	10-30%	NE	NE
n-Butyl Glycidyl Ether	1-10%	50 ppm	25 ppm
Carbon Black	< 0.5%	3.5 mg/m3	3.5 mg/m3

Non-Hazardous Components	***% by Weight***
Mineral Filler, Modifiers	60-90%

SECTION 3: PHYSICAL DATA

Boiling Point (°F): ND
Vapor Pressure (mm Hg @ 25°C): < 0.1
Percent Volatiles by Weight: < 2
Specific Gravity (water = 1): 2.35 - 2.45
Solubility in Water: Insoluble
Vapor Density: Heavier than air
Appearance and Odor: Black liquid, mild odor

SECTION 4: FIRE AND EXPLOSION HAZARD DATA

Flash Point (°F):
> 200

Flammable Limits
Not Established

Extinguishing Media:
Use carbon dioxide, dry chemical, foam, water fog.

MOR 000795

Unusual Fire or Explosion Hazard:

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions. Reaction with curing agents is exothermic; smoke or toxic fumes may be evolved if heat of reaction becomes excessive due to high curing temperatures or curing of large masses of material. See Section 5, "Hazardous Decomposition Products".

Special Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5: REACTIVITY DATA

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:
Incompatible with strong oxidizers, acids, bases; uncontrolled mixing with amines, anhydrides, mercaptans, imidazoles may cause hazardous polymerization.

Hazardous Decomposition Products:
Carbon monoxide, carbon dioxide, aldehydes, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on the conditions of combustion.

Conditions to Avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

SECTION 6: RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:
Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

Large Spills:
Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

SECTION 7: HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application,

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection:
This product can cause eye irritation. Prevent eye contact through the use of chemical safety glasses, splash-proof chemical goggles, or face shield. This product can cause skin irritation and may cause allergic skin reactions. Wear appropriate protective gloves. If necessary, a proper chemical-resistant apron and additional impervious clothing should be used to prevent skin contact and contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower should be available.

Ventilation Recommendations and Respiratory Protection:
Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing. Ventilation must be sufficient to maintain airborne levels of Section 2 ingredients below their PEL/TLV values. Use an appropriate, properly fitted respirator if exposures exceed PEL/TLV values. The type of protection selected (SCBA, air-purifying, etc.) will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage:
Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8: HEALTH DATA

Routes of Exposure:
Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:
Exposure may aggravate preexisting skin and/or eye disorders.

Eye Contact:
Contains materials irritating to the eyes. Symptoms may include blurred vision, burning sensation and tearing.

Skin Contact:
Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals; symptoms include rash, itching, hives, swelling of the extremities.

Inhalation:
Heating can generate vapors that may cause respiratory irritation, nausea and headaches. Inhalation hazard at room temperature is unlikely, due to the low volatility of this product.
Ingestion:
Harmful if swallowed.

Chronic Health Effects:
Although the significance is unknown, the DGEBA epoxy resin in this product has been shown to be mutagenic in some microbial tests, but has failed to show mutagenicity in others. Chromosomal aberrations were observed in cultured rat liver cells. Two-year bioassays on mice exposed by the dermal

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

route to DGEBA resins yielded only very limited evidence of weak carcinogenicity. Based on this and other evidence, the International Agency for Research on Cancer (IARC) concluded in 1988 that DGEBA epoxy resins are not classifiable as carcinogens.

Recent laboratory studies on Salmonella bacterium (i.e. - Ames Test) indicated that Butyl Glycidyl Ether (BGE) may induce mutagenic changes, a possible precursor to cancer; However, subsequent laboratory cancer studies have shown no increase in carcinogenic potential resulting from BGE exposure.

The International Agency for Research on Cancer (IARC) has classified free carbon black as a Class 2B carcinogen, in that there is sufficient evidence for carcinogenicity in animals (based on inhalation studies), but evidence for carcinogenicty in humans is nonexistent. Exposure to free carbon black, however, is unlikely, unless the cured product is machined or ground in such a manner to evolve dusts; or in spray applications where vapors or fumes containing carbon black may become airborne, thus creating potential for inhalation exposure.

SECTION 9: FIRST AID PROCEDURES

Eye Contact:
Flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get medical attention.

Skin Contact:
Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
Dilute by giving plenty of water to drink, if victim is conscious and alert. Never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

SECTION 10: ADDITIONAL INFORMATION

Product NPCA Hazardous Material Identification System (HMIS) Rating:
Health: 2 Flammability: 1 Reactivity: 0

TSCA Status::
All components of this product are listed in the EPA Toxic Substance Control Act Inventory. This product contains the following substances which are subject to TSCA subject to TSCA Section 12(b) Export notification requirements:

Diglycidyl Ether of Bisphenol A (1675-54-3)

Foreign Inventory Status:
Canadian DSL: All components listed or exempt
European EINECS: All components listed or exempt
Japanese MITI ENCS: All components listed
Korean ECL: All components listed
Australian AICS: All components listed

MOR 000798

SARA Status:
This product does not contain any substances regulated by the SARA Section 313 amendments to RCRA.

The information given and the recommendations made herein apply to our product(s) alone and are not combined with other product(s). Such are based on our research and on data from other reliable sources and are believed to be accurate. No guaranty of accuracy is made. It is the purchaser's responsibility before using any product to verify this data under their own operating conditions and to determine whether the product is suitable for their purposes.

N.E. - Not Established, S - Skin Designation, C - Ceiling

SECTION 3 - HAZARDS IDENTIFICATION

***** EMERGENCY OVERVIEW ***:** Amber Liquid, with Amine odor. May cause skin and eye irritation. May cause allergic skin reaction. May cause respiratory tract irritation.

EFFECTS OF OVEREXPOSURE - EYE CONTACT: May cause eye irritation.

EFFECTS OF OVEREXPOSURE - SKIN CONTACT: May cause skin irritation. May cause skin sensitization. May cause dermatitis.

EFFECTS OF OVEREXPOSURE - INHALATION: May cause respiratory tract irritation.

EFFECTS OF OVEREXPOSURE - INGESTION: Harmful if swallowed. Ingestion is not an expected route of entry in industrial or commercial uses.

EFFECTS OF OVEREXPOSURE - CHRONIC HAZARDS: Chronic skin contact may cause dermatitis.

(Continued on Page 2)

SECTION 3 - HAZARDS IDENTIFICATION

PRIMARY ROUTE(S) OF ENTRY: SKIN CONTACT INHALATION INGESTION EYE CONTACT

SECTION 4 - FIRST AID MEASURES

FIRST AID - EYE CONTACT: Flush eyes immediately with large amount of water for at least 15 minutes holding eyelids open while flushing. Get prompt medical attention.

FIRST AID - SKIN CONTACT: Flush contaminated skin with large amounts of water while removing contaminated clothing. Wash affected skin areas with soap and water. Get medical attention if symptoms occur.

FIRST AID - INHALATION: Move person to fresh air. Restore and support continued breathing. If breathing is difficult, give oxygen. Get immediate medical attention.

FIRST AID - INGESTION: If swallowed, do not induce vomiting. Give victim one or two glasses of water or milk. Call a physician or poison control center immediately for further instructions. Never give anything by mouth to an unconscious person.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POINT: >200F, >93C (SETAFLASH CLOSED CUP)

LOWER EXPLOSIVE LIMIT: N.A.
UPPER EXPLOSIVE LIMIT: N.A.

AUTOIGNITION TEMPERATURE: N.D.

OSHA FLAMMABILITY CLASSIFICATION: COMBUSTIBLE LIQUID - CLASS IIIB

EXTINGUISHING MEDIA: CO2 DRY CHEMICAL FOAM WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDS: Keep containers tightly closed. Closed containers may rupture when exposed to extreme heat. Use water spray to keep fire exposed containers cool.

SPECIAL FIREFIGHTING PROCEDURES: Wear full firefighting protective clothing, including self-contained breathing apparatus (SCBA). If water is used, fog nozzles are preferable. During a fire, irritating and/or toxic gases and particulate may be generated by thermal decomposition or combustion.

(Continued on Page 3)

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Keep non-essential personnel a safe distance away from the spill area. Avoid breathing vapors. Use self-contained breathing equipment. Notify appropriate authorities if necessary. Avoid contact. Before attempting cleanup, refer to hazard caution information in other sections of the MSDS form. Scoop spilled material into an appropriate container for proper disposal. (If necessary, use inert absorbent material to aid in containing the spill).

SECTION 7 - HANDLING AND STORAGE

HANDLING: Keep closure tight and container upright to prevent leakage. Avoid skin and eye contact. Wash thoroughly after handling. Avoid breathing of vapor or spray mists. Do not handle until all safety precautions have been read and understood. Empty containers should not be re-used. Use with adequate ventilation.

STORAGE: Store only in well-ventilated areas. Keep container closed when not in use.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Sufficient ventilation in pattern and volume should be provided in order to maintain air contaminant levels below recommended exposure limits.

RESPIRATORY PROTECTION: Use a NIOSH/MSHA approved air-purifying organic vapor respirator if occupational limits are exceeded. For emergency situations, confined space use, or other conditions where exposure limits may be greatly exceeded, use an approved air-supplied respirator. Observe OSHA regulations (29CFR 1910.134) for respirator use.

SKIN PROTECTION: Use neoprene, nitrile, or rubber gloves to prevent skin contact.

EYE PROTECTION: Use safety eyewear including safety glasses with side shields and chemical goggles where splashing may occur.

OTHER PROTECTIVE EQUIPMENT: Remove and wash contaminated clothing before reuse.

HYGIENIC PRACTICES: Wash hands before eating, smoking, or using toilet facility. Food or beverages should not be consumed anywhere this product is handled or stored. Wash thoroughly after handling.

(Continued on Page 4)

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

BOILING RANGE	: 527 - 630 F	**VAPOR DENSITY**	: Is heavier than air
APPEARANCE	: Amber	**ODOR THRESHOLD**	: N.D.
PHYSICAL STATE	: Liquid	**EVAPORATION RATE:**	Is slower than Ether
ODOR	: Amine	**DENSITY, LB/GAL**	: 9.33
SOLUBILITY IN H2O	: Insoluble	**SPECIFIC GRAVITY:**	0.99
FREEZE POINT	: N.D.	**pH**	: N.A.
VOLATILE BY WEIGHT:	0.0 %	**VOLATILE BY VOL**	: 0.0 %
VAPOR PRESSURE	: N.D.		

COEFFICIENT OF WATER/OIL DISTRIBUTION: N.D.

(See Section 16 for abbreviation legend)

SECTION 10 - STABILITY AND REACTIVITY

CONDITIONS TO AVOID: High temperatures.

INCOMPATIBILITY: Strong acids, bases, and strong oxidizers.

HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, carbon dioxide, organic or inorganic nitrogen compounds including traces of hydrogen cyanide.

HAZARDOUS POLYMERIZATION: Will not occur under normal conditions.

STABILITY: This product is stable under normal storage conditions.

SECTION 11 - TOXICOLOGICAL PROPERTIES

No product toxicological information is available.

SECTION 12 - ECOLOGICAL INFORMATION

ECOLOGICAL INFORMATION: No Information.

SECTION 13 - DISPOSAL CONSIDERATIONS

DISPOSAL METHOD: Disposal should be done in accordance with Federal (40CFR Part 261), state and local environmental control regulations. If waste is determined to be hazardous, use licensed hazardous waste transporter and disposal facility.

SECTION 1 - IDENTIFICATION

PRODUCT (TRADE) NAME: OMEGABOND® 101 Epoxy (Part A)

CHEMICAL FAMILY: Epoxy Resin

GENERAL DESCRIPTION: Two-part Epoxy Resin; "A" Component (Black)

SUPPLIER: OMEGA ENGINEERING INC.
PO BOX 4047

STAMFORD, CT 06907

TELEPHONE: (203) 359-1660

SECTION 2 - INGREDIENTS

Components	% by Weight	Exposure Guidelines OSHA PEL / ACGIH TLV
DGEBA Epoxy Resin	>20%	NE / NE
Amorphous Fumed Silica	3-5%	6 mg/m^3 / 10 mg/m^3
Modifier	<5%	NA / NA
Pigment	<1%	NA / NA

SECTION 3 - PHYSICAL DATA

Boiling Point (Degree °F):	ND
Vapor Pressure (mm Hg @ 25°C)	Negligible
Percent Volatiles by Weight:	Negligible
Specific Gravity (water = 1):	1.1–1.2
Solubility in Water:	Insoluble
Vapor Density:	ND
Appearance and Odor:	Black paste

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point (Degree °F): >200
Flammable Limits: NE

Extinguishing Media: Use carbon dioxide, dry chemical, foam, water fog.

Unusual Fire or Explosion Hazard: Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions.

Special Firefighting Procedures: *Firefighters/rescue personnel should wear positive* pressure self-contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION 5 - REACTIVITY DATA

Product Stability: Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid any *incompatible substances.*

Incompatibility: Incompatible with strong oxidizers, acids, bases; uncontrolled mixing with amines, anhydrides, mercaptans, imidazoles may cause hazardous polymerization.

Hazardous Decomposition Products: Carbon monoxide, carbon dioxide, aldehydes, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on the conditions of combustion.

Conditions to Avoid: Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

SECTION 6 - RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills: Activate available exhaust ventilation equipment in the immediate spill area. Wipe up or absorb spilled material with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate containers. Dispose of in accordance with current Federal, State, and local regulations.

Large Spills: Limit access to the immediate spill area. Shut off source of the release if this can be done without risk of injury. Activate available exhaust ventilation systems in the area. Dike area to contain the spill and prevent releases to sewers, drains or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering waterways. Transfer absorbed material and

MOR 000806

water rinses to appropriate waste containers. Dispose of in accordance with current Federal, State and local regulations.

SECTION 7 - HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer applications, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection: This product can cause eye irritation. Prevent eye contact through the use of chemical safety glasses, splash-proof chemical goggles, or face shield. This product can cause skin irritation and may cause allergic skin reactions. Wear appropriate protective gloves. *If necessary, a proper chemical-resistant apron and additional impervious clothing should be* used to prevent skin contact and contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower should be available.

Ventilation Recommendations and Respiratory Protection: Provide effective mechanical exhaust ventilation to draw vapors, mists, or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing. Ventilation must be sufficient to maintain airborne levels of Section 2 Ingredients below their PEL/TLV values. Use an appropriate, properly fitted respirator if exposures exceed PEL/TLV values. The type of protection selected (SCBA, air-purifying, etc.) will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage: Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8 - HEALTH DATA

Routes of Exposure: Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure: Exposure may aggravate preexisting skin and/or eye disorders.

Eye Contact: Contains materials irritating to the eyes. Symptoms may include blurred vision, burning sensation and tearing.

Skin Contact: Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals; symptoms include rash, itching, hives, swelling of the extremities.

Inhalation: Heating can generate vapors that may cause respiratory irritation, nausea and headaches. Inhalation hazard at room temperature is unlikely, due to the low volatility of this product.

Ingestion: Harmful if swallowed.

Chronic Health Effects: Although the significance is unknown, the DGEBA epoxy resin in this product has been shown to be mutagenic in some microbial tests, but has failed to show mutagenicity in others. Chromosomal abberations were observed in cultured rat liver cells. Two-year bioassays on mice exposed by the dermal route to DGEBA resins yielded only very limited evidence of weak carcinogenicity. Based on this and other evidence, the International Agency for Research on Cancer (IARC) concluded in 1988 that DGEBA epoxy resins are not classifiable as carcinogens.

SECTION 9 - FIRST AID PROCEDURES

Eye Contact: Flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get medical attention.

Skin Contact: Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get immediate medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

Inhalation: Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion: Dilute by giving plenty of water to drink, if victim is conscious and alert. Never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate attention.

SECTION 10 - ADDITIONAL INFORMATION

ISCA Status: All components of this product are listed in the EPA Toxic Substance Control Act Inventory.

SARA Status: This product does not contain any substances regulated by the SARA Section 313 amendments to RCRA.

SECTION 7 - HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection: This product can cause severe eye irritation. Prevent eye contact through the use of a face shield used in conjunction with either splash-proof chemical goggles or chemical safety glasses. This product can cause severe skin irritation and may cause allergic skin responses. Components of this product may also be absorbed through the skin. Wear appropriate protective gloves, a proper chemical resistant apron and additional impervious clothing to prevent all skin contact, contamination of clothing and possible absorption through the skin. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.
Ventilation Recommendations and Respiratory Protection: Provide effective mechanical exhaust ventilation to draw vapors, mists or fumes generated during processing away from the worker and prevent routine inhalation. This is necessary especially during elevated temperature processing. Ventilation must be sufficient to maintain airborne levels of Section 2 ingredients below their PEL/TLV values. Use an appropriate, properly fitted respirator if exposures exceed PEL/TLV values. The type of protection selected (SCBA, air-purifying, etc.) will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage: Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Keep away from open flames and heat sources. Consult the product Technical Bulletin for detailed storage information.

SECTION 8 - HEALTH DATA

Routes of Exposure: Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure: Exposure may aggravate preexisting skin, eye and/or respiratory disorders.

Eye Contact: Contains materials severely irritating to the eyes; may cause burns.

Skin Contact: Contains materials corrosive to the skin; may cause severe burns and blistering. This product may cause skin sensitization/allergic skin reactions which may be severe in certain individuals. May be absorbed through the skin; however, this product as a whole has not been tested for dermal toxicity.

Inhalation: Vapors may cause irritation, nausea, and headaches.
Ingestion: Harmful is swallowed.
Chronic Health Effects: None known.

SECTION 9 - FIRST AID PROCEDURES

Eye Contact: Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

Skin Contact: Immediately flush the affected area of the skin with plenty of water, while removing contaminated clothing or shoes. Follow by thoroughly washing with soap and water. Avoid scrubbing, as this action could increase skin absorption and worsen the effect of chemical contact. Get immediate medical attention. Do not reuse contaminated clothing until properly cleaned. Contaminated leather articles, including shoes, cannot be decontaminated and should be destroyed.

Inhalation: Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion: Dilute by giving plenty of water to drink, if victim is conscious and alert. Never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate attention.

SECTION 10 - ADDITIONAL INFORMATION

TSCA Status: All components of this product are listed in the EPA Toxic Substance Control Act Inventory.
SARA Status: This product does not contain any substances regulated by the SARA Section 313 amendments to RCRA.

Abbreviations: **NA** = Not Applicable **NE** = Not Established **ND** = Not Determined **ppm** = Parts per Million **mg/m^3** = Milligrams Per Cubic Meter **C** = Ceiling Concentration **STEL** = Short Term Exposure Limit

Carbon black	1333-86-4	1.0%	3.5	N.E.	3.5	N.E.	mg/m3	
Epoxy resin	Proprietary	40%	N.E.	N.E.	N.E.	N.E.		

N.E. - Not Established, S - Skin Designation, C - Ceiling

SECTION 3 - HAZARDS IDENTIFICATION

***** EMERGENCY OVERVIEW ***:** Viscous, black liquid, with No odor. May cause skin and eye irritation. May cause allergic skin reaction. May cause respiratory tract irritation.

EFFECTS OF OVEREXPOSURE - EYE CONTACT: May cause eye irritation.

EFFECTS OF OVEREXPOSURE - SKIN CONTACT: May cause skin irritation. May cause skin sensitization. May cause dermatitis.

EFFECTS OF OVEREXPOSURE - INHALATION: May cause respiratory tract irritation.

EFFECTS OF OVEREXPOSURE - INGESTION: Harmful if swallowed. Ingestion is not an expected route of entry in industrial or commercial uses.

EFFECTS OF OVEREXPOSURE - CHRONIC HAZARDS: Chronic skin contact may cause dermatitis. IARC has designated carbon black as Group 2B - inadequate evidence for carcinogenicity in humans, but sufficient evidence in experimental animals.

(Continued on Page 2)

SECTION 3 - HAZARDS IDENTIFICATION

PRIMARY ROUTE(S) OF ENTRY: INHALATION INGESTION EYE CONTACT SKIN CONTACT

SECTION 4 - FIRST AID MEASURES

FIRST AID - EYE CONTACT: Flush eyes immediately with large amount of water for at least 15 minutes holding eyelids open while flushing. Get prompt medical attention.

FIRST AID - SKIN CONTACT: Flush contaminated skin with large amounts of water while removing contaminated clothing. Wash affected skin areas with soap and water. Get medical attention if symptoms occur.

FIRST AID - INHALATION: Move person to fresh air. Restore and support continued breathing. If breathing is difficult, give oxygen. Get immediate medical attention.

FIRST AID - INGESTION: If swallowed, do not induce vomiting. Give victim one or two glasses of water or milk. Call a physician or poison control center immediately for further instructions. Never give anything by mouth to an unconscious person.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POINT: >200F, >93C (SETAFLASH CLOSED CUP)

LOWER EXPLOSIVE LIMIT: N.A.
UPPER EXPLOSIVE LIMIT: N.A.

AUTOIGNITION TEMPERATURE: N.D.

OSHA FLAMMABILITY CLASSIFICATION: COMBUSTIBLE LIQUID - CLASS IIIB

EXTINGUISHING MEDIA: CO2 DRY CHEMICAL FOAM WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDS: Keep containers tightly closed. Closed containers may rupture when exposed to extreme heat. Use water spray to keep fire exposed containers cool.

SPECIAL FIREFIGHTING PROCEDURES: Wear full firefighting protective clothing, including self-contained breathing apparatus (SCBA). If water is used, fog nozzles are preferable. During a fire, irritating and/or toxic gases and particulate may be generated by thermal decomposition or combustion.

(Continued on Page 3)

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Avoid breathing vapors. Notify appropriate authorities if necessary. Avoid contact. Use appropriate respiratory protection for large spills or spills in confined area. Keep non-essential personnel away from spill area. Scoop spilled material into an appropriate container for proper disposal. (If necessary, use inert absorbent material to aid in containing the spill).

SECTION 7 - HANDLING AND STORAGE

HANDLING: Keep closure tight and container upright to prevent leakage. Avoid skin and eye contact. Wash thoroughly after handling. Do not handle until all safety precautions have been read and understood. Empty containers should not be re-used. Use with adequate ventilation.

STORAGE: Store only in well-ventilated areas. Keep container closed when not in use.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Sufficient ventilation in pattern and volume should be provided in order to maintain air contaminant levels below recommended exposure limits.

RESPIRATORY PROTECTION: Use a NIOSH/MSHA approved air-pprifying organic vapor respirator if occupational limits are exceeded. For emergency situations, confined space use, or other conditions where exposure limits may be greatly exceeded, use an approved air-supplied respirator. Observe OSHA regulations (29CFR 1910.134) for respirator use.

SKIN PROTECTION: Use neoprene, nitrile, or rubber gloves to prevent skin contact.

EYE PROTECTION: Use safety eyewear including safety glasses with side shields and chemical goggles where splashing may occur.

OTHER PROTECTIVE EQUIPMENT: Use disposable or impervious clothing if work clothing contamination is likely. Remove and wash contaminated clothing before reuse.

HYGIENIC PRACTICES: Wash hands before eating, smoking, or using toilet facility. Food or beverages should not be consumed anywhere this product is handled or stored. Wash thoroughly after handling.

(Continued on Page 4)

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

BOILING RANGE	: N.A.	**VAPOR DENSITY**	: Is heavier than air
APPEARANCE	: Viscous, black	**ODOR THRESHOLD**	: N.D.
PHYSICAL STATE	: Liquid	**EVAPORATION RATE:**	Is slower than Ether
ODOR	: No	**DENSITY, LB/GAL**	: 13.70
SOLUBILITY IN H2O	: Insoluble	**SPECIFIC GRAVITY:**	1.64
FREEZE POINT	: N.D.	**pH**	: N.A.
VOLATILE BY WEIGHT:	0.4 %	**VOLATILE BY VOL**	: 0.7 %
VAPOR PRESSURE	: N.D.		

COEFFICIENT OF WATER/OIL DISTRIBUTION: N.D.

(See Section 16 for abbreviation legend)

SECTION 10 - STABILITY AND REACTIVITY

CONDITIONS TO AVOID: High temperatures.

INCOMPATIBILITY: Amines, acids, water, hydroxyl, or active hydrogen compounds.

HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, carbon dioxide, aldehydes.

HAZARDOUS POLYMERIZATION: Will not occur under normal conditions.

STABILITY: This product is stable under normal storage conditions.

SECTION 11 - TOXICOLOGICAL PROPERTIES

PRODUCT LD50 (ORAL) : No Data
(DERMAL): No Data
PRODUCT LC50 : No Data

SECTION 12 - ECOLOGICAL INFORMATION

ECOLOGICAL INFORMATION: No Information.

SECTION 13 - DISPOSAL CONSIDERATIONS

DISPOSAL METHOD: Disposal should be done in accordance with Federal (40CFR Part 261), state and local environmental control regulations. If waste is determined to be hazardous, use licensed hazardous waste transporter and disposal facility.

(Continued on Page 5)

SECTION 14 - TRANSPORTATION INFORMATION

DOT PROPER SHIPPING NAME: NOT REGULATED

DOT HAZARD CLASS: NONE **EMERGENCY RESPONSE GUIDE NUMBER:** NONE

DOT UN/NA NUMBER: NONE **PACKING GROUP** : NONE

SECTION 15 - REGULATORY INFORMATION

U.S. FEDERAL REGULATIONS: AS FOLLOWS -

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200)

SARA SECTION 313:
This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

---------- CHEMICAL NAME ---------- CAS NUMBER WT % IS LESS THAN
NONE

TOXIC SUBSTANCES CONTROL ACT:

INVENTORY STATUS
The chemical substances in this product are on the TSCA Section 8 Inventory.

EXPORT NOTIFICATION
This product contains the following chemical substances subject to the reporting requirements of TSCA 12(B) if exported from the United States:

---------- CHEMICAL NAME ---------- CAS NUMBER
Resin

INTERNATIONAL REGULATIONS: AS FOLLOWS -

CANADIAN WHMIS: This MSDS has been prepared in compliance with Controlled Product Regulations except for use of the 16 headings.

CANADIAN WHMIS CLASS: No information available.

SECTION 16 - OTHER INFORMATION

HMIS RATINGS - HEALTH: 2* **FLAMMABILITY: 1** **REACTIVITY: 0**

* - Indicates a chronic hazard; see Section 3

(Continued on Page 6)

SECTION 16 - OTHER INFORMATION

REASON FOR REVISION: Update Section 15; Export Notification

VOLATILE ORGANIC COMPOUNDS (VOCS): 0.06 lbs/gal, 7 grams/ltr

LEGEND: N.A. - Not Applicable, N.E. Not Established,
N.D. - Not Determined

The information contained herein is, to the best of our knowledge and belief, accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by use of this material. It is the responsibility of the user to comply with all applicable federal, state and local laws and regulations.

Section I

Manufacturer: Fendall Company	**Emergency Telephone:** 847-577-7400
Address: 5 East College Drive Arlington Heights, IL 60004	**Information Telephone:** 800-543-4842
	Date Prepared: 01/15/98

Section II - Hazardous Ingredients/Identity Information

Hazardous Components (Specific Chemical Identity; Common Name(s))	OSHA PEL	ACGIH TLV	Other limits recommended	% (optional)
BENZALKONIUM CHLORIDE CAS #8001-54-5	NONE	NONE	N/A	<0.1%

Section III - Physical/Chemical Characteristics

Boiling Point: 212° F (100° C)	**Specific Gravity (H2 O)=1:** NOT DETERMINED
Vapor Pressure (mm Hg.): 760	**Melting Point:** N/A
Vapor Density (Air = 1): NOT DETERMINED	**Evaporation Rate (Butyl Acetate = 1):** NOT DETERMINED
Solubility in Water: 100%	
Appearance and Odor: COLORLESS LIQUID WITH NO DISCERNIBLE ODOR.	

Section IV - Fire and Explosion Hazard Data

Flash Point (Method Used): N/A	**Flammable Limits:**	**LEL:** N/A	**UEL:** N/A
Extinguishing Media: ***THIS IS A NONFLAMMABLE AQUEOUS SOLUTION***			
Special Fire Fighting Procedures: N/A			
Unusual Fire and Explosion Hazards: N/A			

Section V - Reactivity Data

Stability	**Unstable:** NO **Stable:** YES	**Conditions to Avoid:** THIS PRODUCT IS STABLE. CONSIDERED NON-REACTIVE AND STABLE UNDER NORMAL CONDITIONS OF STORAGE AND USAGE.
Incompatibility (Materials to Avoid): NONE KNOWN		
Hazardous Decomposition or Byproducts: NONE		
Hazardous Polymerization	**May Occur:** NO **Will Not Occur:** YES	**Conditions to Avoid:** NONE

Section VI - Health Hazard Data

Route(s) of Entry: **Inhalation?** NO **Skin?** NO **Ingestion?** YES
Health Hazards (Acute and Chronic): INGESTION OF VOLUMES IN EXCESS OF 20 LITERS MAY CAUSE GASTRIC IRRITATION.
Carcinogenicity: **NTP?** NO **IARC Monographs?** NO **OSHA Regulated?** NO
Signs and Symptoms of Exposure: N/A
Medical Conditions Generally Aggravated by Exposure: N/A
Emergency First Aid Procedures: NOTES TO PHYSICIAN: IN THE UNLIKELY EVENT OF RAPID INGESTION OF LARGE VOLUMES OF THE SOLUTION, INDUCE VOMITING AND OBSERVE THE PATIENT FOR GASTRIC IRRITATION.

Section VII - Precautions for Safe Handling and Use

Steps to Be Taken in Case Material is Released or Spilled: FLUSH AREA WITH WATER. THE SOLUTION IS NOT RCRA HAZARDOUS WASTE.
Waste Disposal Method: N/A
Precautions to Be Taken in Handling and Storing: DO NOT FREEZE OR EXPOSE TO TEMPERATURES IN EXCESS OF 110° F (43° C) FOR EXTENDED PERIODS.
Other Precautions: N/A

Section VIII - Control Measures

Respiratory Protection: N/A			
Ventilation	**Local Exhaust:** N/A		**Special:** N/A
	Mechanical: N/A		**Other:** N/A
Protective Gloves: N/A		**Eye Protection:** N/A	
Other Protective Clothing: N/A			
Work Hygienic Practices: N/A

ETHYL CYANOACRYLATE

(SEE **SUPERGLUE**)

CHEMTRONICS® INC.

MSDS #0213

1140483

223454

SECTION 1: CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Company Address:
8125 Cobb Center Drive
Kennesaw, GA 30152

Product Information: 800-TECH-401
Customer Service: 800-645-5244

Emergency: (Chemtrec) 800-424-9300
Revision Date: October 6, 1997

Product Identification

ELECTRO-WASH® PX
(Formerly CFC-Free Electro-Wash 2000)

Product Code: ES1210 (NSN 6850-01-393-9054), ES810B

SECTION 2: COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS No.	Wt. % Range
Isohexane, a mixture of:		
n-hexane	110-54-3	0.1-25.0
2-methylpentane	107-83-5	1.0-46.0
3-methylpentane	96-14-0	1.0-25.0
2,3-Dimethylbutane	79-29-8	1.0-25.0
2,2-Dimethylbutane	75-83-2	1.0-25.0
Denatured alcohol a mixture of:		
Ethanol	64-17-5	1.0-25.0
Methanol	67-56-1	0.1-10.0
Ethyl acetate	141-78-6	0.1-10.0
Isopropanol	67-63-0	1.0-20.0
Carbon dioxide	124-38-9	1.0-20.0

SECTION 3: HAZARD IDENTIFICATION

Emergency Overview: Clear, colorless liquid with mild hydrocarbon solvent. This product is extremely flammable. Liquid will irritate eyes and skin under repeated or prolonged exposure. Breathing high concentrations of product may produce drowsiness and a headache

Potential Health Effects:

Eyes: Liquid, aerosols and vapors of this product are irritating and can cause pain, tearing, reddening and swelling accompanied by a stinging sensation.

Skin: Contact causes skin irritation

Ingestion: Harmful if swallowed. Irritating to the mouth, throat and stomach. May cause vomiting. Inhalation: Harmful if inhaled. High concentrations in immediate area can displace oxygen and cause dizziness, unconsciousness and even death with longer exposure. Keep people away from such vapors without self-contained breathing apparatus. Pre-Existing Medical Conditions Aggravated by Exposure: Heart, lung, skin, eye.

SECTION 4: FIRST AID MEASURES

Eyes: Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Have eyes examined and tested by medical personnel if irritation develops or persists.

Skin: Wash skin with soap and water. Remove contaminated clothing. Get medical attention if irritation develops or persists. Wash clothing separately before reuse.

Ingestion: If swallowed, do not induce vomiting. Keep head below knees to minimize chance of aspirating material into the lungs. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Inhalation. Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

SECTION 5: FIRE FIGHTING MEASURES

Flash Point: -20°F (isohexane) LEL/UEL: 1.2/7.7 (% by volume in air) Extinguishing Media: Use alcohol foam, carbon dioxide or water spray when fighting fires involving this material. Fire Fighting Instructions: As in any fire, wear self-contained breathing apparatus (pressure demand, MSHA/NIOSH approved or equivalent) and full protective gear.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Large Spills: Shut off leak if possible and safe to do so. Wear self-contained breathing apparatus and appropriate personal protective equipment. Absorb spill with inert material (i.e. dry sand or earth), then place in a chemical waste container for proper disposal. Do not flush to sewer. Avoid runoff into storm sewers and ditches that lead to waterways. Small Spills: Absorb spill with inert material (i.e. dry sand or earth), then place in a chemical waste container for proper disposal.

SECTION 7: HANDLING AND STORAGE

Avoid prolonged or repeated contact with skin, eyes or clothing. Wash hands before eating. Use with adequate ventilation. Avoid breathing product vapor. Do not reuse this container. Store in a cool dry place, away from heat, sparks or flames. Keep container tightly closed when not in use. Do not store in direct sunlight.

KEEP OUT OF REACH OF CHILDREN.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Guidelines:

CHEMICAL NAME	ACGIH TWA	OSHA PEL	OSHA STEL
n-Hexane	50 ppm	500 ppm	NA
2-methylpentane	NA	NA	NA
3-methylpentane	NA	NA	NA
2,3-Dimethylbutane	NA	NA	NA
2,2-Dimethylbutane	NA	NA	NA
Denatured alcohol, a mixture of:			
Ethanol	1000 ppm	1000 ppm	NA
Methanol	200ppm	200ppm	250ppm
Ethyl acetate	400 ppm	400 ppm	NA
Isopropanol	400 ppm	400 ppm	500 ppm
Carbon dioxide	5000 ppm	5,000 ppm	30,000ppm

MOR 000818

Work/Hygienic Practices: Good general ventilation should be sufficient to control airborne levels. Local exhaust ventilation may be necessary to control any air contaminants to within their TLVs during the use of this product. Wear safety glasses with side shields, goggles and rubber or other chemically resistant gloves when handling this material.

NFPA and HMIS Codes:	NFPA	HMIS
Health	1	1
Flammability	3	3
Reactivity	1	1
Personal Protection	-	B

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Clear, colorless liquid
Odor: Mild hydrocarbon solvent
pH: NA
Vapor Pressure: 198 mm Hg @ 68 F (liquid)
Vapor Density: 3 (isohexanes) (Air 1)
Solubility in Water: Negligible
Specific Gravity: 0.70 @ 68F
Evaporation Rate: <1 (Butyl acetate=1)
Viscosity: Not established (Water =1)
Percent Volatile: 100

SECTION 10: STABILITY AND REACTIVITY

Stability: This product is stable. Conditions to Avoid: Do not spray near open flames, red hot surfaces or other sources of ignition.
Incompatibility: Do not mix powdered alkali and alkaline earth metals or strong oxidizing agents.
Products of Decomposition: Thermal decomposition may release carbon monoxide, carbon dioxide and incompletely burned hydrocarbons.
Hazardous Polymerization: Will not occur. Conditions to avoid: NA

SECTION 11: TOXICOLOGICAL INFORMATION (NIOSH RTECS through October 1995)

Inhalation:			Ingestion:		
Ethanol	LC50 rats	20,000 ppm/10 hr	Ethanol	LD50 rats	7060 mg/kg
Ethyl acetate	LC50 rats	200gm/m³	Ethyl acetate	LD50 rats	5620 mg/kg
Isopropanol	LC50 rats	16,000 ppm/8 hrs	Isopropanol	LD50 rats	5,045mg/kg
Skin:			Eyes:		
Isopropanol	LD50 rabbits	12,800 mg/kg	Isopropanol	rabbit	100 mg SEV
Ethanol	rabbit	400 mg open MILD	Ethanol	rabbit	500 mg SEV
Ethyl acetate	LD50 rabbit	>20 mL/kg			

Cancer Information: No ingredients listed as human carcinogens by NTP or IARC

SECTION 12: ECOLOGICAL INFORMATION

Environmental Impact Information
Avoid runoff into storm sewers and ditches which lead to waterways. Water runoff can cause environmental damage.

REPORTING
US regulations require reporting spills of this material that could reach any surface waters. The toll free number for the US Coast Guard National Response Center is: **1-800-424-8802**

Environmental Impact Data
(percent by weight)

CFC	0.0%	VOC	95.7%
HCFC	0.0%	HFC	0.0%
Cl. Solv.	0.0%	ODP	0.00

For more information call: 1-800-645-5244

SECTION 13: DISPOSAL CONSIDERATIONS

Dispose of in accordance with all federal, state and local regulations.

SECTION 14: TRANSPORTATION INFORMATION

	Proper Shipping Name	UN Number	Class	Sub. Risk	Pkg. Group	Hazard Label	Pkg. Instr.	Max. Quantity
Air:	Aerosols Flammable, n.o.s.	UN 1950	2.1	NA	NA	Flammable Gas	203/ Y203	75/ 30 kg
Ground:	Consumer Commodity ORM-D	NA	NA	NA	NA	ORM-D	Pkg. Auth.	173.306

SECTION 15: REGULATORY INFORMATION

SECTION 313 SUPPLIER NOTIFICATION

This product contains the following toxic chemicals subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 (40CFR372). This information should be included on all MSDSs copied and distributed for this material.

Chemical Name	CAS No.	Wt. % Range
Methanol	67-56-1	1.0-3.8

TOXIC SUBSTANCES CONTROL ACT (TSCA). All ingredients of this product are listed on the TSCA Inventory.

SECTION 16: OTHER INFORMATION

Product is a Level 3 aerosol. Do not puncture or incinerate containers. Normal ventilation for standard manufacturing practices is usually adequate. Local exhaust should be used when large amounts are released. NOTE: This MSDS is applicable to all product containers with date codes of 01175 or later.

Section II - Hazardous Ingrediants/Identity Information

Hazardous Components (Specific Chemical Identity, Common Name[s])	OSHA PEL	ACGIH TLV	Other Limits Recommended	% (optional)
Dipropylene Glycol Monomethyl Ether (CAS #034590-94-8)		100 ppm	150 ppm	3-4
Diethylene Glycol Ethyl Ether (CAS #111-90-0)			30 ppm	2-3
Ammonia (CAS #7664-41-7)	NE	25 ppm	25 ppm	.01 max

This product contains the following toxic chemical subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 and of 40 CFR372: CAS-111-90-0, Diethylene Glycol Ethyl Ether, 2-3% by weight.

Modified Acrylic Polymer (NonHaz)	35-40
Emulsified Waxes (NonHaz)	5-10
dH_2O (NonHaz)	Balance

HMIS RATING: Health: 1 Reactivity: 0
Flammability: 0 Personal Protection: B

Section III - Physical/Chemical Characteristics

Boiling Point	>200°F	Specific Gravity (H_2O = 1)	>1.0
Vapor Pressure (mm hg.)	N/A	Melting Point	N/A
Vapor density (AIR = 1)	N/A	Evaporation Rate (Butyl Acetate = 1)	N/A

Solubility in Water
Complete, pH 8-9

Appearance and Odor
Opaque, tan liquid with wax or ammoniacal odor

Section IV - Fire and Explosion Hazard Data

Flash Point (Method Used)	Flammable Limits	LEL	UEL
N/A	N/A		

Extinguishing Media
Foam, CO_2, DC and water

Special Fire Fighting Procedures
None required

Unusual Fire and Explosion Hazards
None known

Section V - Reactivity Data

Stability			Conditions to Avoid
	Unstable		Temperatures above 49°C/120°F Below: 1°C/34°F
	Stable	X	

Incompatibility *(Materials to Avoid)*
N/A

Hazardous Decomposition or Byproducts
None known.

Hazardous Polymerization			Conditions to Avoid
	May occur		N/A
	Will Not Occur	X	

Section VI - Health Hazard Data

Route(s) of Entry:	Inhalation?	Skin?	Ingestion?
	Minor Irritation	Minor Irritation	Dilute with water

Health Hazards *(Acute and Chronic)*:
None known

Carcinogonicity:	NTP?	IARC Monographs?	OSHA Regulated?
	None	None	None

Signs and Symptoms of Exposure:
Inhalation: Minor irritation. Skin: Slight irritation. Eyes: Slight irritation. Ingestion: None known.

Medical Conditions
Generally Aggravated by Exposure: Overexposure may aggravata Asthma.

Emergency and First Aid Procedures
Inhalation: Move subject to fresh air. Skin: Wash with soap and water. Ingestion: Drink several glasses of water (do not induce vomiting). Contact a physician. Eyes: flush 15 minutes with water.

Section VII - Precautions for Safe Handling and Use

Steps to Be Taken In Case Material is Released or Spilled
Keep spectators away. Dike and contain spill with inert material (e.g. sand, earth). Keep spills and cleaning runoffs out of municipal sewers and open bodies of water.

Waste Disposal Method
Coagulate the emulsion by the stepwise of Ferric Chloride and Lime. Remove the clear supernatant liquid and flush to a chemical sewer. Incinerate the solids and the contaminated diking material according to local, state, and federal regulations.

Precautions to be Taken in Handling and Storing
Storage temperature: Max. 49°C/120°F 1°C/34°F

Other Precautions
Keep from freezing - product may coagulate

Section VIII - Control Measures

Respiratory Protection *(Specify Type)*
Wear MSHA/NIOSH-approved respirator where exposure limits are exceeded.

Ventilation	Local Exhaust	Special
	Mechanical at point of contamination release	None
	Mechanical (General)	Other

Protective Gloves
Impervious/Neoprene

Eye Protection
Chemical splash goggles (ANSI Z-87.1)

Other Protective Clothing or Equipment
Eyewash station

Work/Hygienic Practices
Wash hands before eating, smoking or using washroom facilities

N/A = Not Applicable; NE = None Established

METHANOL	67-56-1	200 ppm(skin)	200 ppm(skin)	40-50

SECTION II PHYSICAL/CHEMICAL CHARACTERISTICS

BOILING POINT: (°F) 148-177 SPECIFIC GRAVITY (WATER=1): @25°C .81

VAPOR PRESSURE(mm Hg.) @68°F 64 PERCENT VOLATILE BY VOLUME: 97
VAPOR DENSITY(AIR=1): 1.6 EVAPORATION RATE (BUTYL ACETATE=1) 1.8
APPEARANCE AND ODOR: CLEAR, MOBILE LIQUID WITH ALCOHOLIC ODOR.
SOLUBILITY IN WATER: SOLUBLE

SECTION III FIRE AND EXPLOSION HAZARD DATA

FLASH POINT (METHOD USED): 55°F (ACC) FLAMMABLE LIMITS: LEL: 3 UEL: 24
EXTINGUISHING MEDIA: CARBON DIOXIDE, ALCOHOL RESISTANT FOAM, DRY CHEMICAL

SPECIAL FIRE FIGHTING PROCEDURES: EVACUATE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR PROTECTIVE CLOTHING, INCLUDING NIOSH APPROVED SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS: NONE KNOWN

SECTION IV REACTIVITY DATA

STABILITY: UNSTABLE? NO STABLE? YES

CONDITIONS TO AVOID: AVOID HEAT, SPARKS, OPEN FLAMES.

INCOMPATIBILITY (MATERIALS TO AVOID): STRONG OXIDIZERS

HAZARDOUS DECOMPOSITION OR BYPRODUCTS: CARBON MONOXIDE, CARBON DIOXIDE

HAZARDOUS POLYMERIZATION: MAY OCCUR? NO WILL NOT OCCUR? YES

CONDITIONS TO AVOID: NONE KNOWN

N/A - NOT APPLICABLE

SECTION V HEALTH HAZARD DATA REV. 2 No. 1131

ROUTE(S) OF ENTRY: INHALATION? YES SKIN? NO INGESTION? YES OTHER: NONE

HEALTH HAZARDS (ACUTE AND CHRONIC)
ACUTE: LIQUID OR VAPOR CONTACT MAY CAUSE IRRITATION OF THE EYES, SKIN, NOSE, THROAT, AND RESPIRATORY SYSTEM AND MAY RESULT IN CENTRAL NERVOUS SYSTEM (CNS) DEPRESSION. THIS MATERIAL IS TOXIC AND MAY BE HARMFUL IF SWALLOWED. CHRONIC: PROLONGED CONTACT WITH THE SKIN MAY CAUSE REDNESS, DRYING AND CRACKING TO THE SKIN. PROLONGED OVEREXPOSURE TO SOLVENTS MAY CAUSE PERMANENT BRAIN AND NERVOUS DAMAGE.

CARCINOGENICITY: NTP? NO IARC MONOGRAPHS? NO OSHA REGULATED? NO OTHER: NONE
NO INGREDIENTS LISTED AS CARCINOGENS.

SIGNS AND SYMPTOMS OF EXPOSURE:
IRRITATION, HEADACHE, DIZZINESS, NAUSEA, INCOORDINATION, DROWSINESS AND LOSS OF CONSCIOUSNESS.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE:
NONE PRESENTLY KNOWN.

EMERGENCY AND FIRST AID PROCEDURES:
EYES: FLUSH WITH COPIOUS QUANTITIES OF WATER. GET MEDICAL ATTENTION.
SKIN: WASH WITH SOAP AND WATER. INHALATION: REMOVE FROM EXPOSURE. GET MEDICAL ATTENTION IF EXPERIENCING EFFECT OF OVEREXPOSURE. INGESTION: GET IMMEDIATE MEDICAL ATTENTION. INDUCE VOMITING BY TOUCHING FINGER TO BACK OF THROAT. KEEP VICTIM'S HEAD BELOW HIPS WHILE VOMITING.

SECTION VI PRECAUTIONS FOR SAFE HANDLING AND USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
ELIMINATE ALL IGNITION SOURCES. HANDLING EQUIPMENT MUST BE GROUNDED TO PREVENT SPARKING. EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. ABSORB SPILLED MATERIAL WITH ABSORBENT MATERIAL AND PLACE IN NON-LEAKING CONTAINER.

WASTE DISPOSAL METHOD:
DISPOSE OF IN ACCORDANCE WITH LOCAL, STATE, FEDERAL REGULATIONS. RECOMMENDED METHOD IS INCINERATION.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING:
KEEP AWAY FROM HEAT, SPARKS, AND OPEN FLAMES. KEEP CONTAINERS TIGHTLY CLOSED. GROUND ALL HANDLING EQUIPMENT. STORE IN A COOL, DRY PLACE.

OTHER PRECAUTIONS: MINIMIZE SKIN CONTACT.

SECTION VII CONTROL MEASURES

RESPIRATORY PROTECTION (SPECIFY TYPE):
IF EXPOSURE EXCEEDS LIMITS, USE A NIOSH-APPROVED RESPIRATOR.

VENTILATION: LOCAL EXHAUST: PREFERABLE SPECIAL: NONE NEEDED
MECHANICAL (GENERAL): ADEQUATE OTHER: NONE NEEDED
PROTECTIVE GLOVES: NEOPRENE, VITON, BUTYL, NITRILE EYE PROTECTION: CHEMICAL GOGGLES

OTHER PROTECTIVE CLOTHING OR EQUIPMENT:
WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. SAFETY SHOWER AND EYE WASH STATION.

WORK/HYGIENIC PRACTICES:
WASH WITH SOAP AND WATER BEFORE EATING, DRINKING, SMOKING, OR USING TOILET FACILITIES.

SECTION I. GENERAL INFORMATION

TMC# 122425-6.
RT# 113271
8-21-97

PRODUCT NAME (NUMBER)	Lonco SLS 65 Flux
CHEMICAL FAMILY	Mixture.
D.O.T. HAZARD CLASS	Flammable liquid.

SECTION II. HAZARDOUS INGREDIENTS

INGREDIENTS	CAS NUMBER	WEIGHT PERCENT	OSHA PEL	ACGIH TLV
Isopropyl Alcohol (2-Propanol)	67-63-0	90-92	400 ppm Stel 500 ppm	400 ppm Stel 500 ppm
Aliphatic Dibasic Ester	1119-40-0	<3.0	NE	NE
Dicarboxylic Acids	68937-72-4	<2.5	NE	NE

SECTION III. PHYSICAL DATA

(PUBLISHED OR ESTIMATED VALUES)

BOILING POINT Deg F. (760 mm Hg)	180	SPECIFIC GRAVITY (H2O=1) (@ 77 deg F)	0.801
VAPOR PRESSURE (mm Hg at 20 Deg. C.)	30	% VOLATILE BY WEIGHT	90-92
VAPOR DENSITY (AIR=1)	>2	EVAPORATION RATE (BUAC=1)	2.3
SOLUBILITY IN WATER	Appreciable	pH (5% aqueous soln.)	3.4
APPEARANCE AND ODOR	Clear, colorless liquid, alcohol odor.		

SECTION IV. FIRE AND EXPLOSION HAZARD DATA

ESTIMATED FLAMMABLE LIMITS (% By Volume in Air) LEL: 2.0 UEL: 12.7

FLASH POINT Deg F.	53 closed cup.
EXTINGUISHING MEDIA	Alcohol type or all-purpose-type foam for large fires. Carbon dioxide or dry chemical media for small fires.
SPECIAL FIRE FIGHTING PROCEDURES	Use NIOSH approved self-contained breathing apparatus and protective clothing. Cool fire exposed containers with water.
UNUSUAL FIRE AND EXPLOSION HAZARD	Vapors are heavier than air and may travel along ground. Never use welding torch on or near containers (even empty). May produce a floating fire hazard.

NA - NOT APPLICABLE NE - NOT ESTABLISHED NL - NOT LISTED UN - UNKNOWN

Lonco SLS 65 Flux

SECTION V.(A) HEALTH HAZARD DATA (Symptoms/Effects Of Overexposure)

INHALATION: Can cause irritation of the respiratory tract with coughing and chest discomfort. High concentrations of vapor may cause headache and drowsiness.

INGESTION: Slightly toxic. May cause abdominal discomfort, nausea, vomiting and diarrhea. Drowsiness and/or loss of consciousness may occur.

SKIN: May cause minor irritation with itching and possible slight local redness. Prolonged or repeated contact may cause defatting and drying. Absorption; exposure to small quantities are not anticipated to cause adverse health effects. Widespread and prolonged exposure may result in the absorption of harmful amounts of material, leading to signs and symptoms as described for ingestion.

EYES: Causes irritation, may cause corneal injury.

LISTED CARCINOGENS: None of the materials in this product are listed in NTP, IARC, or OSHA as carcinogens.

SECTION V.(B) HEALTH HAZARD DATA (Emergency and First Aid Procedures)

INHALATION: Remove to fresh air. If not breathing give artificial respiration. If breathing is difficult administer oxygen. Obtain medical attention.

INGESTION: If fully conscious give two glasses of water, INDUCE vomiting. Never give anything by mouth to an unconscious person.

SKIN CONTACT: Remove contaminated clothing. Wash with soap and water. If irritation persists or if contact has been prolonged obtain medical attention.

EYE CONTACT: Immediately flush with water for several minutes. Obtain medical attention.

SECTION VI. REACTIVITY DATA

STABILITY
STABLE: X UNSTABLE:

CONDITIONS TO AVOID: Heat, sparks and open flames.

INCOMPATABILITY (Materials to Avoid): Strong oxidizing agents.

HAZARDOUS DECOMPOSITION PRODUCTS: Burning can produce carbon monoxide and/or carbon dioxide.

HAZARDOUS POLYMERIZATION
WILL OCCUR: WILL NOT OCCUR: X

CONDITIONS TO AVOID: None

Lonco SLS 65 Flux

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Ventilate if in enclosed area. Eliminate all ignition sources.
SMALL SPILL: Absorb liquid on paper, vermiculite, floor absorbent, or other absorbent material and transfer to hood.
LARGE SPILL: See Section X.

WASTE DISPOSAL: Destroy by approved incineration or deposit in approved landfill.

Must be in accordance with Federal, State and Local Laws and Regulations

SECTION VIII - SPECIAL PROTECTION

RESPIRATORY: No special requirements with adequate ventilation present, approved respiratory protective equipment used when vapor or mist concentrations exceed applicable standards.

EYEWEAR: Chemical type protective goggles.
Provide eye bath near work site.

CLOTHING/ GLOVES: Wear resistant gloves such as rubber, neoprene or plastic.

VENTILATION: Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below TLVs.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Observe precautions for a flammable liquid. Keep container closed when not in use. Store away from ignition sources in cool dry area. Use adequate ventilation. Read all container labeling.

Avoid the use of metal drum spigots. Use Polyethylene, Polypropylene or Teflon.

OTHER PRECAUTIONS:

Containers: Since empty containers may retain product residues (vapor, liquid, or solid) all labeled hazard precautions must be observed. FOR INDUSTRIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.

Lonco SLS 65 Flux

SECTION X. ADDITIONAL INFORMATION

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: (continued)
LARGE SPILL:
Persons not wearing protective equipment should be excluded from area.
Dike area of spill to prevent spreading. Pump liquid to salvage tank.
Take up remaining liquid with absorbent material. Shovel into containers.

NOTES TO PHYSICIAN:
There is no specific antidote. Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

---------- REGULATORY INFORMATION ----------

Toxic Substance Control Act (TSCA) Status:
All ingredients of this product are listed on the TSCA inventory.

SARA TITLE III (Section 313):
Components present in this product at a level which could require reporting under the statute are:

None

(See Section 8.0, "Exposure Controls/Personal Protection", for exposure guidelines)

Issued: July 16, 1999

3.0 HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: Danger! Extremely flammable. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness, and nausea, and may lead to unconsciousness or death. Harmful if swallowed and/or aspirated into the lungs. Prolonged or repeated contact may cause irritation and/or dermatitis. Use as motor fuel only. Long-term exposure to vapors has caused cancer in laboratory animals.
POTENTIAL HEALTH EFFECTS:

EYE CONTACT: High concentrations of vapor/mist may cause eye discomfort.

SKIN CONTACT: Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.

INHALATION: Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness, and nausea, and may lead to unconsciousness or death. See "Toxicological Information" section (Section 11.0).

INGESTION: Harmful or fatal if liquid is aspirated into lungs. Ingestion causes gastrointestinal irritation and diarrhea. See "Toxicological Information" section (Section 11.0).

HMIS CODE: (Health:1) (Flammability:3) (Reactivity:0) CHRONIC HEALTH HAZARD.
NFPA CODE: (Health:1) (Flammability:3) (Instability:0)

4.0 FIRST AID MEASURES

EYE: Flush eyes with plenty of water. Get medical attention if irritation persists.

SKIN: Wash exposed skin with soap and water. Remove contaminated clothing, including shoes, and thoroughly clean and dry before reuse. Get medical attention if irritation develops.

INHALATION: If adverse effects occur, remove to uncontaminated area. Give artificial respiration if not breathing. Get medical attention.

INGESTION: If swallowed, do NOT induce vomiting. Get immediate medical attention.

Issued: July 16, 1999

5.0 FIRE FIGHTING MEASURES

FLASHPOINT: -45'

UEL: 7.6%

LEL: 1.3%

AUTOIGNITION TEMPERATURE: 495.0'

FLAMMABILITY CLASSIFICATION: Extremely Flammable Liquid.

EXTINGUISHING MEDIA: Agents approved for Class B hazards (e.g., dry chemical, carbon dioxide, foam, steam) or water fog. Water may be ineffective but should be used to cool-fire exposed containers, structures and to protect personnel.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Extremely flammable vapor/air mixtures form. Extinguishment of fire before source of vapor is shut off can create an explosive mixture in air. Product gives off vapors that are heavier than air which can travel considerable distances to a source of ignition and flashback. Runoff to sewer may cause a fire or explosion hazard.

FIRE-FIGHTING EQUIPMENT: Firefighters should wear full bunker gear, including a positive pressure self-contained breathing apparatus.

PRECAUTIONS: Keep away from sources of ignition (e.g., heat and open flames). Keep container closed. Use with adequate ventilation.

HAZARDOUS COMBUSTION PRODUCTS: Combustion of this product in an area without adequate ventilation may result in hazardous levels of combustion products (e.g., carbon monoxide, carbon dioxide) and inadequate oxygen levels.

6.0 ACCIDENTAL RELEASE MEASURES

Remove or shut off all sources of ignition. Wear respirator and spray with water to disperse vapors. Increase ventilation if possible. Prevent spreading by diking, ditching, or absorbing on inert materials. Keep out of sewers and waterways.

Issued: July 16, 1999

7.0 HANDLING AND STORAGE

HANDLING: Use with adequate ventilation. Keep away from ignition sources (e.g., heat, sparks, or open flames). Ground and bond containers when transferring materials. Wash thoroughly after handling.

STORAGE: Store in flammable liquids storage area. Keep container closed. Store away from heat, ignition sources, and open flame in accordance with applicable regulations.

SPECIAL PRECAUTIONS: Keep out of sewers and waterways. Avoid strong oxidizers. Report spills to appropriate authorities. USE AS MOTOR FUEL ONLY.

8.0 EXPOSURE CONTROLS / PERSONAL PROTECTION

EYE: None required; however, use of eye protection is good industrial practice.

SKIN: Avoid prolonged or repeated skin contact. Wear protective clothing and gloves if prolonged or repeated contact is likely.

INHALATION: Use with adequate ventilation. Avoid breathing vapor and/or mist. If ventilation is inadequate, use NIOSH certified respirator that will protect against organic vapor and dust/mist.

ENGINEERING CONTROLS: Control airborne concentrations below the exposure guidelines.

EXPOSURE GUIDELINES:

Component	CAS#	Exposure Limits
Gasoline	8006-61-9	OSHA PEL: 300 ppm (1989); Not established. (1971) OSHA STEL: 500 ppm (1989); Not established. (1971) ACGIH TLV-TWA: 300 ppm ACGIH TLV-STEL: 500 ppm

9.0 CHEMICAL AND PHYSICAL PROPERTIES

APPEARANCE AND ODOR:	Clear. Liquid. Hydrocarbon odor.
pH:	Not determined.
VAPOR PRESSURE:	7-15 lb RVP (ASTM D323)
VAPOR DENSITY:	3.0-4.0
BOILING POINT:	80.0-430.0°F (range)
MELTING POINT:	Not determined.
SOLUBILITY IN WATER:	Negligible, below 0.1%
SPECIFIC GRAVITY (WATER=1):	0.75

10.0 STABILITY AND REACTIVITY

STABILITY: Burning can be started easily.

CONDITIONS TO AVOID: Keep away from ignition sources (e.g. heat, sparks, and open flames).

MATERIALS TO AVOID: Avoid chlorine, fluorine, and other strong oxidizers.

HAZARDOUS DECOMPOSITION: None identified.

HAZARDOUS POLYMERIZATION: Will not occur.

11.0 TOXICOLOGICAL INFORMATION

ACUTE TOXICITY DATA:

EYE IRRITATION: This product had a primary eye irritation score (PEIS) of 0/110.0 (rabbit)

SKIN IRRITATION: This product had a primary skin irritation score (PDIS) of 1.1/8.0 (rabbit)

DERMAL LD50: greater than 5 ml/kg (rabbit).

ORAL LD50: 18.8 ml/kg (rat).

INHALATION LC50: 20.7 mg/l (rat)

Issued: July 16, 1999

OTHER TOXICITY DATA:

Excess exposure to vapors may produce headaches, dizziness, nausea, drowsiness, irritation of eyes, nose and throat and central nervous system depression. Aspiration of this material into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this product. Inhalation of unleaded gasoline vapors did not produce birth defects in laboratory animals. Ingestion of this material can cause gastrointestinal irritation and diarrhea.

In a long-term inhalation study of whole unleaded gasoline vapors, exposure-related kidney damage and kidney tumors were observed in male rats. Similar kidney effects were not seen in female rats or in mice. At the highest exposure level (2056 ppm), female mice had an increased incidence of liver tumors. Results from subsequent scientific studies have shown that a broad variety of chemicals cause these kidney effects only in the male rat. Further studies have discovered the means by which the physiology of the male rat uniquely predispose it to these effects. Consequently, the Risk Assessment Forum of the Environmental Protection Agency has recognized that these responses are not predictive of a human health hazard. The liver tumors that were increased in the high-dose female mice are likewise of questionable significance because of their high spontaneous occurrence even without chemical exposure and because the rate of their occurrence is accelerated by a broad spectrum of chemicals not commonly considered to be carcinogens (e.g., phenobarbital). Thus, the significance of the mouse liver tumor response in terms of human health is questionable.

Gasoline is a complex mixture of hydrocarbons and contains benzene (typically no more than 2 volume%), toluene, and xylene. Chronic exposure to high levels of benzene has been shown to cause cancer (leukemia) in humans and other adverse blood effects (anemia). Benzene is considered a human carcinogen by IARC, NTP and OSHA. Over exposure to xylene and toluene can cause irritation to the upper respiratory tract, headache and narcosis. Some liver damage and lung inflammation were seen in chronic studies on xylene in guinea pigs but not in rats.

Solvent "sniffing" (abuse) or intentional overexposure to vapors can produce serious central nervous system effects, including unconsciousness, and possibly death.

This product contains/may contain methyl tertiary-butyl ether (MTBE). In a long-term inhalation study with laboratory rodents, very high exposures (>3000 ppm) to MTBE produced liver and kidney tumors. Both IARC and NTP do not consider these data sufficient for classification of MTBE as a probable human carcinogen. MTBE has produced developmental toxicity to the offspring of mice, but only at maternally toxic concentrations (>4000 ppm). Similar studies in rats and rabbits were negative.

Issued: July 16, 1999

This product contains/may contain ethyl tertiary-butyl ether (ETBE). In rats exposed by inhalation to ETBE, testicular degeneration was observed in males and bone marrow degeneration was observed in females that were exposed to 1750 and 5000 ppm for 90 days. Neither effect was seen at 500 ppm. Slight blood and organ weight changes have been observed in rats following 28-day inhalation exposure to ETBE at 2000 ppm and higher.

This product contains/may contain tertiary-amyl methyl ether (TAME). Chronic inhalation exposure of rats and mice to high levels of TAME (250-3500 ppm) for 90 days resulted in slight blood and organ weight effects. However, these were either transient during the exposure period, or reversible after exposure ceased.

12.0 ECOLOGICAL INFORMATION

Ecological testing has not been conducted on this material by BP Amoco.

13.0 DISPOSAL INFORMATION

Residues and spilled material are hazardous waste due to ignitability. Disposal must be in accordance with applicable federal, state, or local regulations. Enclosed-controlled incineration is recommended unless directed otherwise by applicable ordinances.

The container for this product can present explosion or fire hazards, even when emptied! To avoid risk of injury, do not cut, puncture, or weld on or near this container. Since the emptied containers retain product residue, follow label warnings even after container is emptied.

15.0 REGULATORY INFORMATION

CERCLA SECTIONS 102A/103 HAZARDOUS SUBSTANCES (40 CFR PART 302.4): This product is exempt from the CERCLA reporting requirements under 40 CFR Part 302.4. However, if spilled into waters of the United States, it may be reportable under 33 CFR Part 153 if it produces a sheen.

SARA TITLE III SECTION 302 EXTREMELY HAZARDOUS SUBSTANCES (40 CFR PART 355): This product is not regulated under Section 302 of SARA and 40 CFR Part 355.

SARA TITLE III SECTIONS 311/312 HAZARDOUS CATEGORIZATION (40 CFR PART 370): This product is defined as hazardous by OSHA under 29 CFR Part 1910.1200(d). Hazardous categories for this product are: Acute = yes; Chronic = yes; Fire = yes; Pressure = no; Reactive = no.

SARA TITLE III SECTION 313 (40 CFR PART 372): This product contains the following substance(s), which is on the Toxic Chemicals List in 40 CFR Part 372:

Component/CAS Number	Weight Percent
Benzene 71-43-2	4
Trimethylbenzene 95-63-6	7
Cyclohexane 110-82-7	5
Ethylbenzene 100-41-4	2
Xylene 1330-20-7	10
Methyl tertiary butyl ether (MTBE) 1634-04-4	18
Hexane 110-54-3	5
Naphthalene 91-20-3	1.1
Toluene 108-88-3	22

Component/CAS Number Weight Percent

U.S. INVENTORY (TSCA): Listed on inventory.

This product may contain methyl tertiary-butyl ether (CAS #1634-04-4) or tert-amyl methyl ether (CAS #994-05-8), both of which are currently undergoing review and testing under TSCA Section 4. Notification to the U.S. EPA Office of Toxic Substances is required prior to export of this material from the United States.

OSHA HAZARD COMMUNICATION STANDARD: Flammable liquid. Irritant. Contains components listed by ACGIH. Contains components listed by OSHA. Contains a carcinogenic component.

Issued: July 16, 1999

WHMIS CONTROLLED PRODUCT CLASSIFICATION: B2, D2A, D2B.

EC INVENTORY (EINECS/ELINCS): One or more components not listed on inventory.

JAPAN INVENTORY (MITI): One or more components not listed on inventory.

AUSTRALIA INVENTORY (AICS): One or more components not listed on the inventory.

KOREA INVENTORY (ECL): One of more components not listed on inventory.

CANADA INVENTORY (DSL): One or more of the components of this product is not listed on the DSL.

PHILIPPINE INVENTORY (PICCS): One or more components not listed on the inventory.

16.0 OTHER INFORMATION

When gasoline is mixed with ethyl alcohol, the DOT proper shipping name for domestic shipments is:

Gasohol, 3, NA1203, II.

This material contains an ingredient/ingredients present on the following State Right-To-Know lists:

-Florida- -Massachusetts- -New Jersey- -Pennsylvania- -California- -Minnesota-

This product contains an ingredient/ingredients known to the state of California to cause cancer and/or reproductive toxicity.

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

OSHA CATEGORY: FLAMMABLE LIQUID

RECEIVED
AUG 16 1999
THE MOACT CORP.

FM : CIRC.SUPPLY/COM-KYL SCHAUMBURG PHONE NO. : 847 882 2489 Aug. 16 1999 09:07AM P1

FLASH POINT: 72 F PENSKY MARTIN LEL: 1.0 UEL: N/A
EXTINGUISHING MEDIA:
Carbon dioxide, dry chemical or foam
UNUSUAL FIRE AND EXPLOSION HAZARDS:
Pressure may build up in closed containers that are exposed to heat. Solvent vapors are heavier than air and may travel a considerable distance along the ground to an ignition source and "flash back".
SPECIAL FIRE FIGHTING PROCEDURES:
Water may be ineffective, however, water may be used to cool closed containers that are exposed to heat. Firefighting personnel should wear self-contained breathing apparatus.

SECTION V - HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE: SEE SECTION II
PRIMARY ROUTE(S) OF ENTRY:
Inhalation and skin contact
EFFECTS OF OVEREXPOSURE:
Headache, nausea, dizziness, confusion, irritability.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:
Respiratory difficulties or preexisting skin sensitization.
CARCINOGENICITY:
None of the components of this product are reported carcinogens in A/C with OSHA, NTP, IARC and NIOSH.
EMERGENCY FIRST AID PROCEDURES:
INHALATION: Remove to fresh air. Administer artificial respiration or oxygen if breathing is difficult.
SKIN: Wash affected area with soap and water. Remove and launder contaminated clothing. Consult a physician if irritation persists.
EYES: Flush immediately with large amounts of water for at least 15 minutes. Take to a physician for medical treatment.
INGESTION: Call a physician immediately.

ACUTE: Skin and eye contact: Primary irritation.
CHRONIC: Xylene contained in this material has been found to cause the following effects in laboratory animals:amenia,liver abnormalities,liver and eye damage.
Pre-Exiting liver and/or kidney disorders may be aggrevated by exposure to xylene. Reports have associated repeated and prolonged occupational overexposure to xylene with permanent brain and nervous system damage.

SECTION VI - REACTIVITY DATA

STABILITY: NORMAL STABLE
CONDITIONS TO AVOID:
None Known
INCOMPATIBILITY (Materials to avoid)
Strong acids and bases
HAZARDOUS DECOMPOSITION PRODUCTS:
BY FIRE: Normal products of incomplete combustion.
HAZARDOUS POLYMERIZATION: DOES NOT OCCUR
CONDITIONS TO AVOID:
None Known

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Provide adequate ventilation. Remove all possible ignition sources. Absorb and dispose using non-sparking tools. Eliminate all sources of ignition. Evacuate unprotected personnel. Water

RECEIVED
AUG 16 1999
THE MORLY CORP.

FROM : CIRC.SUPPLY/COM-KYL SCHAUMBURG PHONE NO. : 847 882 2489 Aug. 16 1999 09:08AM P2

spray may be used. To contain run-off, cover with an absorbent material and place in containers for proper disposal. Flush area with water to remove residue.

WASTE DISPOSAL METHOD:
Dispose in accordance with local applicable regulations.
Disposal of using an approved incineration process or in accordance with local, state, and federal regulations regarding health and pollution.

SECTION VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION:
In outdoor or open areas use Bureau of Mines approved mechanical filter respirator to remove solid airborne particulates of overspray. Indoors, where ventilation is inadequate, use Bureau of Mines approved chemical-mechanical respirators designed to remove both particulate and vapor.

VENTILATION:

PROTECTIVE GLOVES:
Recommended if skin contact is likely.

EYE PROTECTION:
Chemical splash goggles recommended if potential for splash or eye contact is likely.

OTHER PROTECTIVE EQUIPMENT:
Recommended as needed to avoid contact.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING OR STORING:
Store in a cool dry place away from heat, sparks and open flame. Keep containers closed and upright to prevent leakage. Outside or detached storage is preferred. Inside storage should be in a standard flammable liquid storeroom or cabinet. Metal containers should be grounded when transferring material from one container to another. Do not reuse product container for any purpose.

OTHER PRECAUTIONS:

PREPARED BY: TECHNICAL STAFF
REFERENCE DATE: JUNE 1997

THE INFORMATION AND RECOMMENDATIONS CONTAINED HEREIN ARE BASED UPON DATA BELIEVED TO BE CORRECT. HOWEVER, NO GUARANTEE OR WARRANTY OF ANY KIND, EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO THE INFORMATION ABOVE.

TO WHOM IT MAY CONCERN: EFFECTIVE JAN 1, 1989, WE ARE REQUIRED BY SARA TITLE III SECTION 313 OF THE RIGHT TO KNOW LEGISLATION, TO INFORM YOU OF THE PERCENTAGE OF ANY INGREDIENT IN A PRODUCT WHICH IS IN THE 313 LIST OR AS AN LISTING AS A COMPONENT OF A MATERIAL WHICH IS IN A CATEGORY OF CHEMICAL LIST.

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

persists.
EYES: Flush immeditately with large amounts of water for at least 15 minutes. Take to a physician for medical treatment.
INGESTION: Call a physicain immediately.

ACUTE: Skin and eye contact: Primary irritation
CHRONIC: Xylene contained in this material has been found to cause the following effects in laboratory animals: anemia, liver abnormalities, liver and eye damage.

SECTION VI - REACTIVITY DATA

STABILITY: NORMALLY STABLE
CONDITIONS TO AVOID:
None known
INCOMPATABILITY (Materials to avoid)
Strong acids and bases
HAZARDOUS DECOMPOSITION PRODUCTS:
BY FIRE: Normal products of incomplete combustion.
HAZARDOUS POLYMERIZATION: WILL NOT OCCUR
CONDITIONS TO AVOID:
None known

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Provide adequate ventilation. Remove all possible ignition sources. Absorb and dispose using non-sparking tools.
Eliminate all sources of ignition. Evacuate unprotected personnel. Water spray may be used. To contain run-off, cover with an absorbent material and place in containers for proper disposal. Flush area with wate remove residue.
WASTE DISPOSAL MEHTOD:
Dispose in accordance with local applicable regulations.
Dispose of using an approved incineration process or in accordance with local, state, and federal regulations regarding health and pollution.

SECTION VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION:
In outdoor or open areas use Bureau of Mines approved mechanical filter respirator to remove solid airborne particulated of overspray. Indoors, where bentilation is inadequate. Use Bureau of Mines approved chemical-mechanical respirators designed to remove both particulater and vapor.
VENTILATION:
PROTECTIVE GLOVES:
Recommended if skin contact is likely.
EYE PROTECTION:
Chemical splash goggles recommended if potential for splash or eye contact is likely.
OTHER PROTECTIVE EQUIPMENT:
Recommended as needed to avoid contact.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING OR STORING:
Store in a cool dry place away from heat, sparks and open flame. Keep containers closed and upright to prevent leakage. Outside or detached storage is preferred. Inside storage should be in a standard flammable liquid storeroom or cabinet. Metal containers should be grounded when transferring material from one container to another. Do not reuse product container for any purpose.

Generic Description: Silicone compound
Physical Form: Viscous Liquid
Color: Translucent white
Odor: Odorless
NFPA Profile: Health NA Flammability 1 Reactivity 0

Note: NFPA = National Fire Protection Association

SECTION 2. OSHA HAZARDOUS COMPONENTS

CAS Number	Wt%	Component	Exposure Limits
007631869	9	Silica, amorphous	OSHA PEL: TWA 15 mg/m3 total dust, 5 mg/m3 respirable fraction. ACGIH TLV: TW A 10 mg/m3 total dust.

Comments: The above components are hazardous as defined in 29 CFR 1910.1200.

SECTION 3. EFFECTS OF OVEREXPOSURE

Acute Effects

Eye: Direct eye contact may cause temporary discomfort with mild redness and dryness similar to windburn.

DOW CORNING CORPORATION
MATERIAL SAFETY DATA SHEET

DOW CORNING(R) HIGH VACUUM GREASE

Skin: A single prolonged exposure (24 to 48 hours) causes no known adverse effect.

Inhalation: No irritation to eyes and respiratory passages. No injury is likely from relatively short exposures of less than 8 hours.

Oral: Small amounts transferred to the mouth by fingers during use, etc., should not injure. Swallowing large amounts may cause digestive discomfort.

Repeated Exposure Effects

Skin: None Known.

Inhalation: None Known.

Oral: None Known.

Special Hazards

This material contains the following components with the special hazards listed below.

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

DOW CORNING CORPORATION
MATERIAL SAFETY DATA SHEET

DOW CORNING(R) HIGH VACUUM GREASE

None Known
Comments: Please read the additional information below.
The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

SECTION 4. FIRST AID MEASURES

Eye:	Immediately flush with water.
Skin:	No first aid should be needed.
Inhalation:	No first aid should be needed.
Oral:	No first aid should be needed.
Comments:	Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point (Method):	212.00 DEGREE F / 100.00 DEGREE C
Autoignition Temperature:	Not Determined
Flammability Limits in Air:	Not Determined
Extingushing Media:	Carbon dioxide (CO2). Water. Water fog (or spray). Dry chemical. Foam.
Unsuitable Extinguishing Media:	None
Fire Fighting Procedures:	Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals.
Unusual Fire Hazards:	None

DOW CORNING CORPORATION
MATERIAL SAFETY DATA SHEET

DOW CORNING(R) HIGH VACUUM GREASE

Hazardous Decomposition Products: Carbon oxides and traces of incompletely burned carbon compounds. Silicon dioxide. Formaldehyde.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Mop up, or wipe up, or soak up with absorbent and contain for salvage or disposal. For large spills, provide diking or other appropriate containment to keep material from spreading. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. Observe all personal protection equipment recommendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

SECTION 7. HANDLING AND STORAGE

Handling: No special precautions.

Storage: No special precautions. Use reasonable care.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

DOW CORNING CORPORATION
MATERIAL SAFETY DATA SHEET

DOW CORNING(R) HIGH VACUUM GREASE

Engineering Controls

Local exhaust:	None should be needed
General Ventilation:	Recommended

Personal Protective Equipment For Routine Handling

Eyes:	Use proper protection - safety glasses as a minimum.
Skin:	Washing at mealtime and end of shift is adequate.
Suitable Gloves:	No special protection needed.
Inhalation:	No respiratory protection should be needed.
Suitable Respirator:	None should be needed.

Personal Protective Equipment For Spills

Eye:	Use proper protection - safety glasses as a minimum.
Skin:	Washing at mealtime and end of shift is adequate.
Inhalation/ Suitable Respirator:	No respiratory protection should be needed.

Precautionary Measures: Avoid eye contact. Use reasonable care.

Comments: None

Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

DOW CORNING CORPORATION
MATERIAL SAFETY DATA SHEET

DOW CORNING(R) HIGH VACUUM GREASE

Physical form:	Viscous Liquid
Color:	Translucent white
Odor:	Odorless
Specific Gravity @ 25C:	1.10
Viscosity:	2000000.00 CST
Freezing/Melting Point:	Not Applicable.
Boiling Point:	Not Determined.
Vapor Pressure @ 25C:	Not Determined.
Vapor Density:	Not Determined.
Solubility in Water:	None.
pH:	Not Applicable.
Volatile content (Wt%):	Not Determined.

Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications.

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability: Stable.

Hazardous Polymerization: Hazardous polymerization will not occur.

Conditions to Avoid: None.

Materials to Avoid: Oxidizing material can cause a reaction.

Comments: None

SECTION 11. TOXICOLOGICAL INFORMATION

OPTIONAL SECTION - Complete information not yet available.

SECTION 12. ECOLOGICAL INFORMATION

MSDS for Grainger Stock Number 4ZF13

Rec. 6-15-01

INHALATION: REMOVE FROM FURTHER EXPOSURE. IF RESPIRATORY IRRITATION, DIZZIN NAUSEA, OR UNCONSCIOUSNESS OCCURS, SEEK IMMEDIATE MEDICAL ASSISTANCE AND CA PHYSICIAN. IF BREATHING HAS STOPPED, USE MOUTH TO MOUTH RESUSCITATION.

INGESTION: NOT EXPECTED TO BE A PROBLEM WHEN INGESTED. IF UNCOMFORTABLE SEE MEDICAL ASSISTANCE.

5. FIRE-FIGHTING MEASURES

EXTINGUISHING MEDIA: CARBON DIOXIDE, FOAM, DRY CHEMICAL AND WATER FOG.

SPECIAL FIRE FIGHTING PROCEDURES: WATER OR FOAM MAY CAUSE FROTHING. USE WAT TO KEEP FIRE EXPOSED CONTAINERS COOL. WATER SPRAY MAY BE USED TO FLUSH SPIL AWAY FROM EXPOSURE. PREVENT RUNOFF FROM FIRE CONTROL OR DILUTION FROM ENTER STREAMS, SEWERS, OR DRINKING WATER SUPPLY.

SPECIAL PROTECTIVE EQUIPMENT: FOR FIRES IN ENCLOSED AREAS, FIRE FIGHTERS MU USE SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS: NONE.

FLASH POINT C(F): GT 204(399) (ASTM D-92).

FLAMMABLE LIMITS - LEL: NA UEL: NA.

NFPA HAZARD ID: HEALTH: 1 FLAMMABILITY: 1 REACTIVITY: 0

HAZARDOUS DECOMPOSITION PRODUCTS: PHOSPHORUS OXIDES. SULFUR OXIDES. CARBON MONOXIDE.

6. ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES: REPORT SPILLS AS REQUIRED TO APPROPRIATE AUTHORITI U.S. COAST GUARD REGULATIONS REQUIRE IMMEDIATE REPORTING OF SPILLS THAT COU *REACH ANY WATERWAY INCLUDING INTERMITTENT DRY CREEKS. REPORT SPILL TO COAST* GUARD TOLL FREE NUMBER (800) 424-8802. IN CASE OF ACCIDENT OR ROAD SPILL NO CHEMTREC (800) 424-9300.

PROCEDURES IF MATERIAL IS RELEASED OR SPILLED: ADSORB ON FIRE RETARDANT TRE SAWDUST, DIATOMACEOUS EARTH, ETC. SHOVEL UP AND DISPOSE OF AT AN APPROPRIAT WASTE DISPOSAL FACILITY IN ACCORDANCE WITH CURRENT APPLICABLE LAWS AND REGULATIONS, AND PRODUCT CHARACTERISTICS AT TIME OF DISPOSAL.

ENVIRONMENTAL PRECAUTIONS: PREVENT SPILLS FROM ENTERING STORM SEWERS OR DRA AND CONTACT WITH SOIL.

PERSONAL PRECAUTIONS: SEE SECTION 8.

MOR 000865

Copyright © 2001 W.W. Grainger, Inc., All Rights Reserved.

7. HANDLING AND STORAGE

HANDLING: NO SPECIAL PRECAUTIONS ARE NECESSARY BEYOND NORMAL GOOD HYGIENE PRACTICES. SEE SECTION 8 FOR ADDITIONAL PERSONAL PROTECTION ADVICE WHEN HANDLING THIS PRODUCT.

STORAGE: DO NOT STORE IN OPEN OR UNLABELLED CONTAINERS. STORE AWAY FROM STR OXIDIZING AGENTS OR COMBUSTIBLE MATERIAL.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

VENTILATION: USE IN WELL VENTILATED AREA.

RESPIRATORY PROTECTION: NO SPECIAL REQUIREMENTS UNDER ORDINARY CONDITIONS O USE AND WITH ADEQUATE VENTILATION.

EYE PROTECTION: NORMAL INDUSTRIAL EYE PROTECTION PRACTICES SHOULD BE EMPLOY

SKIN PROTECTION: NO SPECIAL EQUIPMENT REQUIRED. HOWEVER, GOOD PERSONAL HYGI PRACTICES SHOULD ALWAYS BE FOLLOWED.

EXPOSURE LIMITS: THIS PRODUCT DOES NOT CONTAIN ANY COMPONENTS WHICH HAVE RECOGNIZED EXPOSURE LIMITS. HOWEVER, AN EXPOSURE LIMIT OF 5.00 MG/M3 IS SUGGESTED FOR OIL MIST.

9. PHYSICAL AND CHEMICAL PROPERTIES

TYPICAL PHYSICAL PROPERTIES ARE GIVEN BELOW. CONSULT PRODUCT DATA SHEET FOR SPECIFIC DETAILS.

APPEARANCE: LIQUID
COLOR: BROWN
ODOR: MILD
ODOR THRESHOLD-PPM: NE
PH: NA

10. STABILITY AND REACTIVITY

STABILITY (THERMAL, LIGHT, ETC.): STABLE.
CONDITIONS TO AVOID: EXTREME HEAT.
INCOMPATIBILITY (MATERIALS TO AVOID): STRONG OXIDIZERS.
HAZARDOUS DECOMPOSITION PRODUCTS: PHOSPHORUS OXIDES. SULFUR OXIDES. CARBON MONOXIDE.
HAZARDOUS POLYMERIZATION: WILL NOT OCCUR.

11. TOXICOLOGICAL DATA

ACUTE TOXICOLOGY:

ORAL TOXICITY (RATS): PRACTICALLY NON-TOXIC (LD50: GREATER THAN 2000 MG/KG) ---BASED ON TESTING OF SIMILAR PRODUCTS AND/OR THE COMPONENTS.
DERMAL TOXICITY (RABBITS): PRACTICALLY NON-TOXIC (LD50: GREATER THAN 2000 MG/KG). ---BASED ON TESTING OF SIMILAR PRODUCTS AND/OR THE COMPONENTS.
INHALATION TOXICITY (RATS): NOT ESTABLISHED
EYE IRRITATION (RABBITS): PRACTICALLY NON-IRRITATING. (DRAIZE SCORE: 0 OR GREATER BUT 6 OR LESS). ---BASED ON TESTING OF SIMILAR PRODUCTS AND/OR THE COMPONENTS.
SKIN IRRITATION (RABBITS): PRACTICALLY NON-IRRITATING. (PRIMARY IRRITATION INDEX: GREATER THAN 0.5 BUT LESS THAN 3). ---BASED ON TESTING OF SIMILAR PRODUCTS AND/OR THE COMPONENTS.

SUBCHRONIC TOXICOLOGY (SUMMARY):

SEVERELY SOLVENT REFINED AND SEVERELY HYDROTREATED MINERAL BASE OILS HAVE B TESTED AT MOBIL ENVIRONMENTAL AND HEALTH SCIENCES LABORATORY BY DERMAL APPLICATION TO RATS 5 DAYS/WEEK FOR 90 DAYS AT DOSES SIGNIFICANTLY HIGHER T THOSE EXPECTED DURING NORMAL INDUSTRIAL EXPOSURE. EXTENSIVE EVALUATIONS INCLUDING MICROSCOPIC EXAMINATION OF INTERNAL ORGANS AND CLINICAL CHEMISTRY BODY FLUIDS, SHOWED NO ADVERSE EFFECTS.

CHRONIC TOXICOLOGY (SUMMARY):

THE BASE OILS IN THIS PRODUCT ARE SEVERELY SOLVENT REFINED AND/OR SEVERELY HYDROTREATED. CHRONIC MOUSE SKIN PAINTING STUDIES OF SEVERELY TREATED OILS SHOWED NO EVIDENCE OF CARCINOGENIC EFFECTS.

12. ECOLOGICAL INFORMATION

ENVIRONMENTAL FATE AND EFFECTS: NOT ESTABLISHED.

MOR 000867

13. DISPOSAL CONSIDERATIONS

WASTE DISPOSAL: PRODUCT IS SUITABLE FOR BURNING IN AN ENCLOSED, CONTROLLED BURNER FOR FUEL VALUE OR DISPOSAL BY SUPERVISED INCINERATION. SUCH BURNING BE LIMITED PURSUANT TO THE RESOURCE CONSERVATION AND RECOVERY ACT. IN ADDIT

Copyright © 2001 W.W. Grainger, Inc., All Rights Reserved.

THE PRODUCT IS SUITABLE FOR PROCESSING BY AN APPROVED RECYCLING FACILITY OR BE DISPOSED OF AT AN APPROPRIATE GOVERNMENT WASTE DISPOSAL FACILITY. USE OF THESE METHODS IS SUBJECT TO USER COMPLIANCE WITH APPLICABLE LAWS AND REGULATIONS AND CONSIDERATION OF PRODUCT CHARACTERISTICS AT TIME OF DISPOSA

RCRA INFORMATION: THE UNUSED PRODUCT, IN OUR OPINION, IS NOT SPECIFICALLY LISTED BY THE EPA AS A HAZARDOUS WASTE (40 CFR, PART 261D), NOR IS IT FORMULATED TO CONTAIN MATERIALS WHICH ARE LISTED HAZARDOUS WASTES. IT DOES EXHIBIT THE HAZARDOUS CHARACTERISTICS OF IGNITABILITY, CORROSIVITY, OR REACTIVITY AND IS NOT FORMULATED WITH CONTAMINANTS AS DETERMINED BY THE TOXICITY CHARACTERISTIC LEACHING PROCEDURE (TCLP). HOWEVER, USED PRODUCT MA REGULATED.

14. TRANSPORT INFORMATION

USA DOT: NOT REGULATED BY USA DOT.
IMO: NOT REGULATED BY IMO.
IATA: NOT REGULATED BY IATA.

15. REGULATORY INFORMATION

GOVERNMENTAL INVENTORY STATUS: ALL COMPONENTS COMPLY WITH TSCA AND DSL.

EU LABELING: EU LABELING NOT REQUIRED.

U.S. SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT (SARA) TITLE III: THIS PRODUCT CONTAINS NO "EXTREMELY HAZARDOUS SUBSTANCES".

SARA (311/312) REPORTABLE HAZARD CATEGORIES: NONE.

THIS PRODUCT CONTAINS NO CHEMICALS REPORTABLE UNDER SARA (313) TOXIC RELEAS PROGRAM.

THE FOLLOWING PRODUCT INGREDIENTS ARE CITED ON THE LISTS BELOW:

MATERIAL SAFETY DATA SHEET
MSDS

Heraeus Inc. Cermalloy Division
24 Union Hill Industrial Park
West Conshohocken, PA 19428

Office Telephone: (215)825-6050
Emergency Telephone: (800)255-3924
Date Prepared: 1/92
Date Revised: 4/26/95

Section 1: IDENTIFICATION

Product Name: PD860002SP, PD860002SA and PD860002S surface mount non-conductive adhesive. Also Pd 911 .
CAS Registry Number: not applicable since product is a mixture.

Section 2: COMPONENT HAZARD DATA (3)

Hazardous Components	CAS No.	Exposure Limits
epoxy resin	25068-38-6	not established
silica, amorphous	7631-86-9	10mg/M3 ACGIH (1)

(1) TLV is very unlikely to be reached since material is in the paste form; hence no airborne particles. Provide adequate ventilation in the firing room to remove any evolved fumes.

(2) Supplementary data on lead attached if applicable.

(3) Per 29 CFR 1910 the mixture has not been tested as a whole. All hazardous components which comprise >=1% of the mixture (0.1% if carcinogenic) are listed. Percentages of individual components are not listed as this information is considered a Trade Secret; it is not required that it be disclosed.

Section 3: PHYSICAL DATA

Appearance and Odor: Physical State - thick paste
Color - red
Odor -mild
Initial Boiling Point of Organic Mixture: (>400 ^{o}F)
Specific Gravity: 1
Vapor Pressure (Estimated for mixture, 20^{o}C): N/AP
Vapor Density (Air = 1): N/AP
Evaporation Rate (Estimated for mixture, n-butyl acetate = 1, 20^{o}C): N/AP
Solubility in water: insoluble

MOR 000873

Section 4: FIRE, REACTIVITY, AND EXPLOSION HAZARD DATA
Flash Point (Most flammable solvents): (>200 ^{o}F)
Autoignition Temperature (Most Flammable Solvents):N/AV
Flammable Limits in Air (Most Flammable Solvent):N/AV
Extinguishing Media: Water Fog, Alcohol Foam, Dry Chemical
Special Fire Fighting Procedures: Cool exposed containers with water. When fighting use NIOSH approved self-contained breathing apparatus with full face piece operated in positive pressure mode, as evolved fumes are toxic and cause respiratory irritation.
Unusual Fire and Explosion Hazards: Store below flash point away from open flame or sparks.
Stability: The material is stable under normal use conditions. Avoid temperatures > 40oC and moisture.
Incompatibility: Will not react with water. Avoid mixing with strong oxidizing agents, acids, and caustics.
Hazardous Decomposition Products: Combustion produces carbon monoxide, carbon dioxide, and various hydrocarbons.
Hazardous Polymerization: Will not occur in masses in syringe or jar.

Section 5: Health Hazards of Components *
OSHA Permissible Exposure Limit: Not Established for Mixture

Components listed as carcinogenic by NTP, IARC, or OSHA: None

Primary Routes of Entry:
Organic Components - Inhalation, Skin Absorption
Inorganic Components - Ingestion

ROUTE EXPOSURE	ACUTE & CHRONIC SYSTEMS	MEDICAL CONDITIONS AGGRAVATED	EMERGENCY FIRST AID
Inhalation	Irritant	Unknown	Remove to fresh air. If breathing difficult give oxygen. If breathing has stopped, start artificial respiration.
Skin Contact	Irritant	Unknown	Remove contaminated clothing and launder before reuse. Wash thoroughly with soap and water.
Eye Contact	Moderate	Unknown	Flush with running water for 15 mins. lifting upper and lower lids.

Ingestion	Irritation of the GI system	Unknown	Drink large quantities of water

* If necessary, copies of toxicology studies provided to HICD by the manufacturers of the above hazardous components can be supplied. Synergistic or additive effects of the above chemicals are unknown, as are the effects of exposure to these chemicals in addition to others present in the workplace.

** In all cases keep individuals warm and quiet and get medical attention.

Section 6: PERSONAL PROTECTION AND CONTROLS

Personal Protection: Avoid prolonged skin contact.
Respiratory: Not required if local exhaust is satisfactory. Ten (10) air changes per hour are recommended. If overexposure occurs, use NIOSH-OSHA approved air supply respirator suitable for organic vapors. Administrative or engineering controls should be implemented to reduce exposure .
Eye: Chemical splash goggles or OSHA approved glasses.
Skin: Solvent resistant gloves
Engineering Controls: Recommended ventilation, provide sufficient mechanical (general or local exhaust) ventilation to maintain concentrations below TLV -10 air changes per hour.
Hygienic Practices: Prevent eye contact with glasses or goggles, minimize skin contact, use with adequate ventilation to minimize inhalation of vapor. Do not smoke or eat in work areas. Wash hands thoroughly prior to smoking or eating.

Section 7: *STORAGE, SPILL, AND DISPOSAL*

Special storage conditions: Keep containers closed and sealed when not in use. Steps to be taken in case material is released or spilled:
Clean spill with disposable paper towels (wear rubber gloves) and wash area with soap and water.
Waste Disposal Method: Dispose in accordance with all local, state and federal regulations.
EPA Waste Class:

Section 8: TRANSPORTATION

DOT ID No.

Section 9: REFERENCES

This MSDS is compilation of information supplied in the MSDS's obtained from the manufacturers of the chemicals present in this product. Also, 29 CFR.1210 was consulted for TLV information.

Flash Point : *54 F TCC*
Autoignition Temperature : *750 F*
Extinguishing Media : *WATER*
Flammable Limits (Air)
Upper Limit : *12*
Lower Limit: 2
Special fire fighting procedures :
USE WATER TO COOL FIRE EXPOSED CONTAINERS. WEAR PROTECTIVE CLOTHING.
Unusual fire & explosion hazards :
FLAMMABLE LIQUID VAPORS MAY TRAVEL GREAT DISTANCES TO IGNITION SOURCE & FLASH BACK.

REACTIVITY DATA

STABLE. *HAZARDOUS POLYMERIZATION WON'T OCCUR.*
Conditions to avoid :
DIRECT HEAT, OPEN FLAMES, STORAGE IN ALUMINUM.
Incompatability :
ANHYDRIDES, HALOGENS, PHOSPHORUS, TRICHLORIDES, MONOMERS, ALDEHYDES.
Hazardous decomposition products :
CARBON DIOXIDE/CARBON MONOXIDE, UNIDENTIFIED ORGANICS DURING COMBUSTION.

ACUTE & CHRONIC EFFECTS OF OVEREXPOSURE

Inhalation :
VAPORS MAY CAUSE HEADACHES, DIZZINESS.
Skin contact :
PROLONGED CONTACT MAY CAUSE IRRITATION AND DERMATITIS.
Skin absorption :
PROLONGED CONTACT MAY CAUSE IRRITATION AND DERMATITIS.
Eye contact :
VAPORS MAY BE IRRITATING, LIQUID MAY DAMAGE EYE TISSUE.
Ingestion :
MAY CAUSE PERSISTENT NAUSEA, VOMITING, ABDOMINAL PAIN.

EMERGENCY & FIRST AID PROCEDURES

Eyes :
IMMEDIATELY FLUSH WITH WATER FOR AT LEAST 15 MINUTES.
GET PROMPT MEDICAL ATTENTION.
Skin :
WASH AFFECTED AREAS WITH SOAP & WATER.
REMOVE CONTAMINATED CLOTHING.
IF IRRITATION PERSISTS GET MEDICAL ATTENTION.
Inhalation :
REMOVE FROM EXPOSURE.
IF BREATHING IS STOPPED, ADMINISTER ARTIFICIAL RESPIRATION
GET PROMPT MEDICAL ATTENTION.
Ingestion :
DO NOT INDUCE VOMITING.
GIVE LUKEWARM WATER.
GET EMERGENCY MEDICAL ATTENTION.
Decontamination procedures :
NO SPECIAL PROCEDURES KNOWN TO US.

MPLOYEE PROTECTION INFORMATION

Ventilation requirements :
FACE VELOCITY > 2.1 CUBIC FEET/MINUTE IN CONFINED AREAS.
Recommended personal protection equipment

Respirators :
NIOSH/MSHA APPROVED ORGANIC VAPOR CARTRIDGE.
Eyes :
SPLASH GOGGLES OR FACE SHIELD.
Gloves :
CHEMICALLY RESISTANT GLOVES.
Special clothing & equipment :
EYE WASH & SAFETY SHOWER SHOULD BE AVAILABLE AT ALL TIMES.
LONG SLEEVE CLOTHING SHOULD BE WORN.

PRECAUTIONARY STATEMENT

As conditions and methods of use are beyond our control, we DO NOT assume any responsibility and expressly disclaim any liability for any use of the material. Information contained here in is believed to be true but all suggestions are made without any warranty.

GROUND ALL HANDLING EQUIPMENT ; AVOID ALL POTENTIAL IGNITION SOURCES

DISPOSAL, SPILL OR LEAK PROCEDURES

Aquatic toxicity classification :
NOT ESTABLISHED
Procedure for release or spill :
ELIMINATE SOURCES OF IGNITION. STOP DISCHARGE SOURCE.
USE ABSORBENTS OR PUMP INTO STORAGE CONTAINER.
Regulatory Information :
ALL COMPONENTS IN THIS PRODUCT ARE LISTED ON THE TSCA INVENTORY.
IF SPILLED, NO REPORTING UNDER CERCLA IS REQUIRED. SARA TITLE III,
SECTIONS 311/312 CLASSIFIES THIS PRODUCT UNDER IMMEDIATE HEALTH, DELAYED HEALTH, FIRE CATAGORIES. CARCINOGENICITY CLASSIFICATION: NOT LISTED UNDER IARC, ACGIH, OR NTP.

THIS MSDS IS BEING PROVIDED TO YOUR COMPANY FOR THE PURPOSE OF PROVIDING CURRENT HEALTH AND SAFETY INFORMATION TO YOUR MANAGEMENT AND FOR YOUR EMPLOYEES WHO WORK WITH THIS MATERIAL.
PLEASE READ THE INFORMATION ON THESE SHEETS, AND THEN PROVIDE THIS INFORMATION TO THOSE PEOPLE AT YOUR COMPANY WHOSE RESPONSIBILITY IT IS TO COMPLY WITH FEDERAL AND STATE RIGHT TO KNOW REGULATIONS. ALSO MAKE THIS INFORMATION AVAILABLE TO ANY EMPLOYEE WHO REQUESTS IT.

SOLUBILITY IN WATER: Negligible - less than 0.1 percent.
APPEARANCE AND ODOR: Water clear, low viscosity liquid, fruity odor.
FLASH POINT (METHOD USED): (Tag Closed Cup): 62F
FLAMMABLE LIMITS: LEL: NE UEL: NE
EXTINGUISHING MEDIA: Foam, carbon dioxide and dry chemical.
SPECIAL FIRE FIGHTING PROCEDURES: Fight as a flammable liquid fire; wear self contained breathing apparatus.UNUSUAL FIRE AND EXPLOSION HAZARDS: Vapor is flammable and heavier than air and may travel to source of ignition and flashback.
ROUTES OF ENTRY: SKIN: Yes. INHALATION: Yes. INGESTION: Yes.
EFFECTS OF EXPOSURE:
Eyes: Short term contact may result in slight eye irritation and conjunctivitis.Prolonged contact with liquid can result in corneal burns.High vapor concentrations>approx. 1000PPM are irritating to the eyes.

HUMISEAL DIVISION/CHASE CORPORATION HUMISEAL TYPE: 1B31LSE

Skin: Prolonged and repeated liquid contact can cause defatting and drying of the skin, which may result in skin irritation and dermatitis. Dermal LD(50)(Rabbits):>2000mg/Kg.Skin absorption may add significantly to exposure.
Inhalation: Causes central nervous system depression. Mild exposure causes
dizziness, weakness, headache, nausea, etc.. More severe exposures, greater than approx. 1000PPM, may cause respirator depression, convulsions and death.Cardiac arrhythmias, including fatal ventricular fibrillation, may occur.1h1-rat LCLo: 4000PPM/4 hrs. Olfactory detection level is 50 PPM. However, sense of smell is dulled by continuous exposure, so unsatisfactory as a means of detection. Ingestion: Moderately toxic, LD(50)(rats):5g/kg. LD(Lo)(Human):50mg/kg. Causes burning sensation in mouth and stomach and is likely to produce symptoms similar to those described for inhalation. More serious hazard posed by vomiting after swelling resulting in aspiration(breathing) of vomitus into lungs-which may resulting chemical pneumonitis and pulmonary edema/hemorrhage,and may be fatal
CARCINOGENICITY: This product is not listed by the National Toxicology Program the International Agency for Research on Cancer or the Occupational Safety and Health Administration.
EMERGENCY AND FIRST AID PROCEDURES: Eyes: Flush with water for 15 minutes while holding eyelids open.Get medical attention.
Skin: Flush with water while removing contaminated clothing and shoes, follow by washing with soap and water. Do not reuse clothing or shoes until properly cleaned.If irritation persists, get medical attention.
Inhalation:Remove victim to fresh air and provide oxygen if breathing is difficult.Give artificial respiration if not breathing.Get medical attention.Ingestion:
DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into lungs.Get medical attention
immediately.
NOTE TO PHYSICIAN: If more than 2 ml/kg has been ingested, and vomiting has not occurred, emesis should be induced with supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric
lavarge using a cuffed endotracheal tube should be considered.
ACTION LEVEL: 4g/L Hippuric Acid level in urine(sampled at end of workday).
STABILITY (choose one):( )UNSTABLE (X) STABLE.
CONDITIONS TO AVOID: Not Applicable
INCOMPATIBILITY (MATERIALS TO AVOID): Avoid contact with strong oxidizing agents.
HAZARDOUS DECOMPOSITION PRODUCTS: Carbon Monoxide, Carbon Dioxide.
HAZARDOUS POLYMERIZATION (choose one): ()MAY OCCUR (X)WILL NOT OCCUR.
CONDITIONS TO AVOID: Not Applicable
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Absorb with inert material (sand, vermiculite, etc.) Large spills may be scooped up with non-sparking tools. Remove sources of ignition. Provide ventilation and/or respiratory protection.
WASTE DISPOSAL METHOD: Disposal of HumiSeal products requires strict compliance with local, state and federal regulations pertaining to disposing hazardous waste materials. Contact the appropriate environmental agencies.
RESPIRATORY PROTECTION (SPECIFY TYPE): Respirator-organic vapor type if TLV is exceeded(NIOSH approved).
VENTILATION:LOCAL EXHAUST: Yes.
MECHANICAL (GENERAL): Explosion proof.
SPECIAL: Designed and maintained to provide volume and patterned to prevent vapor. OTHER: Concentration in excess of TLV or PEL.
PROTECTIVE GLOVES: Impervious to chemical and petroleum(BUNA-N,Solvex etc.).
EYE PROTECTION: Chemical type goggles must be worn.
OTHER PROTECTIVE EQUIPMENT: Prevent contact to workers as required.
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Keep away from heat, sparks and open flames. Store at ambient temperature. Ground to protect from static charge.Keep container closed.Use adequate ventilation.

HumiSeal 1B31LOC
Acrylic Coating

RECEIVED
MAR 3 0 2000
THE MOREY CORP.

System Description

HumiSeal 1B31LOC is a very low VOC - under 250 grams per liter* - non ODC solvent based conformal coating that complies with all current air quality regulations. 1B31LOC is a fast air drying, single component, acrylic coating providing excellent moisture and environmental protection for printed circuit assembles. The final film demonstrates excellent flexibility, is easily repairable and retains all of the film properties of the standard 1B31. Qualification to MIL-I-46058C, Type AR. Fluoresces under UV light for ease of inspection.. (Federal EPA VOC exemption for the primary solvent).

Properties of Liquid HumiSeal

Specific weight, (lb. per gal.) per ASTM, Meth. D1475	11.2 ± .2
Solids Content, % by weight per Fed-Std-141, Meth.4044	23 ± 3
Viscosity, centipoise per Fed-Std–141, Meth. 4287	500 max.
Flashpoint, ^{0}C (^{0}F) per ASTM, Meth. D56	22°C (71°F)
Drying Time to Handle per Fed-Std-141, Meth.4061	10 minutes
Recommended Curing Conditions	24 hrs @ rm. temp or 30 min.@ 170^{0}F
Time Required to Reach Optimum Properties	7 days
Thinner, if needed (dipping & brushing)	Contact Factory
(spraying)	Contact Factory
Pot Life at Room Temperature	12 months
Shelf Life at Room Temperature	12 months
V.O.C. (grams per liter)	<250

Properties of Cured HumiSeal

Thermal Properties	
Continuous Use Operating Range ^{0}C(^{0}F)	-65^{0}C (-85^{0}F) to +125^{0}C (257^{0}F)
Thermal Shock, per MIL-I-46058C	Passes
Solderability	Excellent
Coefficient of Thermal Expansion - DMA	55ppm / ^{0}C
Glass Transition Temperature - TMA	14^{0}C
Young's Modulus - DMA	7154psi
Physical Properties	
Clarity	Transparent
Build per Dip, mils, per ASTM,Meth.D823	2
Flexibility, per MIL-I-46058C	Excellent
Adhesion, per ASTM, Meth. D2197	Excellent
Flammability, per ASTM, Meth. D635	Self-Extinguishing
Weather Resistance	Very Good
Electrical Properties	
Dielectric Withstand Voltage, volts per MIL-I-46058C	>1,500
Dielectric Breakdown Voltage, volts, per ASTM, Meth. D149	7500
Dielectric Constant, at 1MHz and 25^{0}C, per ASTM-D150-65T	2.5
Dissipation Factor, at 1MHz and 25^{0}C, per ASTM-D150-65T	0.01
Insulation Resistance, ohms, per MIL-I-46058C	800 x 10^{12}
Moisture Resistance, ohms, per MIL-I-46058C	60 x 10^9
Chemical Properties	
Main Constituent	Acrylic
Fungus Resistance, per ASTM-G21	Excellent
Resistance to Chemicals	Fair

Values are not intended for use in preparation specifications

HumiSeal 1B31LOC
Acrylic Coating

RECEIVED
MAR 3 0 2000
THE MOREY CORP.

APPLICATION

Cleanliness of the substrate is of extreme importance for the successful application of a conformal coating. Surfaces must be free of moisture, dirt, wax, grease and all other contaminants. Contamination under the coating will cause problems which may lead to assembly failures.

HumiSeal coatings may be applied by brush, dip or spray.

Dipping
Depending on the complexity, density and configuration of components on the assembly, it may be necessary to reduce the viscosity of HumiSeal 1B31LOC with HumiSeal Thinner 701 in order to obtain a uniform film. Once optimum viscosity is determined, a controlled rate of immersion and withdrawal (2 to 6" per minute) will further insure even deposition of the coating and ultimately a uniform film. During the application, evaporation of solvent causes an increase in viscosity which should be adjusted by adding small amounts of Thinner 503. Viscosity in the dip tank should be regularly checked by the use of a simple measuring device such as a Zahn or Ford viscosity cup.

Spraying
HumiSeal Type 1B31LOC can be sprayed using conventional spraying equipment. As a rule, the addition of Thinner 701 is necessary to assure a uniform spray pattern resulting in pinhole free film. The amount of thinner and spray pressure will depend on the specific type of spray equipment used. The spraying should be done under an exhaust hood so that the vapor and mist are carried away from the operator.

Brushing
HumiSeal Type 1B31LOC may be brushed with a small addition of HumiSeal Thinner 701. Uniformity of the film depends on component density and operator's technique.

Storage
HumiSeal Type 1B31LOC should be stored at room temperature, away from excessive heat, in tightly closed containers. HumiSeal products may be stored at temperatures of 0-100°F. Avoid direct sunlight. Prior to use, allow the product to equilibrate for 24 hours at 65-90°F.

Caution
Liquid HumiSeal coatings are flammable. Do not use in presence of open flame or sparks. Avoid inhalation of vapors or spray. Use only in well-ventilated areas. Avoid contact with skin and eyes. If contact occurs, wash with soap and water. If swallowed, call physician immediately.

All technical data in this bulletin is based on test results and is believed to be correct. However, since the end use of HumiSeal materials (and the manner of storing and handling them) is beyond our control, we make no warranty-expressed or implied as to the fitness of use, results to be obtained from or effects of use with respect to these materials. Their use shall be solely by the judgment of and at the risk of the user notwithstanding any statement in this bulletin. © Copyright 1992 CHASE CORPORATION.

Vapor is flammable and heavier than air and may travel to source of ignition and flashback.
ROUTES OF ENTRY: SKIN: Yes. **INHALATION:** Yes. **INGESTION:** Yes.
EFFECTS OF EXPOSURE:
Eyes: Short term contact may result in slight eye irritation and conjunctivitis.Prolonged contact with liquid can result in corneal burns.High vapor concentrations>approx. 1000PPM are irritating to the eyes.
Skin: Prolonged and repeated liquid contact can cause defatting and drying of the skin, which may result in skin irritation and dermatitis. Dermal LD(50)(Rabbits):>2000mg/Kg.Skin absorption may add significantly to exposure.
Inhalation: Causes central nervous system depression. Mild exposure causes dizziness, weakness, headache, nausea, etc.. More severe exposures, greater than approx. 1000PPM, may cause respirator depression, convulsions and death.Cardiac arrhythmias, including fatal ventricular fibrillation, may occur.1h1-rat LCLo: 4000PPM/4 hrs. Olfactory detection level is 50 PPM. However, sense of smell is dulled by continuous exposure, so unsatisfactory as a means of detection. Ingestion: Moderately toxic, LD(50)(rats):5g/kg. LD(Lo)(Human):50mg/kg. Causes burning sensation in mouth and stomach and is likely to produce symptoms similar to those described for inhalation. More serious hazard posed by vomiting after swelling resulting in aspiration(breathing) of vomitus into lungs-which may resulting chemical pneumonitis and pulmonary edema/hemorrhage,and may be fatal
CARCINOGENICITY: This product is not listed by the National Toxicology Program the International Agency for Research on Cancer or the Occupational Safety and Health Administration.
EMERGENCY AND FIRST AID PROCEDURES: Eyes: Flush with water for 15 minutes while holding eyelids open.Get medical attention.
Skin: Flush with water while removing contaminated clothing and shoes, follow by washing with soap and water. Do not reuse clothing or shoes until properly cleaned.If irritation persists, get medical attention.
Inhalation:Remove victim to fresh air and provide oxygen if breathing is difficult.Give artificial respiration if not breathing.Get medical attention.Ingestion:
DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into lungs.Get medical attention immediately.
NOTE TO PHYSICIAN: If more than 2 ml/kg has been ingested, and vomiting has not occurred, emesis should be induced with supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavarge using a cuffed endotracheal tube should be considered.

MECHANICAL (GENERAL): Explosion proof.
SPECIAL: Designed and maintained to provide volume and patterned to prevent vapor. **OTHER:** Concentration in excess of TLV or PEL.
PROTECTIVE GLOVES: Impervious to chemical and petroleum(BUNA-N,Solvex etc.),
EYE PROTECTION: Chemical type goggles must be worn.
OTHER PROTECTIVE EQUIPMENT: Prevent contact to workers as required.
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Keep away from heat, sparks and open flames. Store at ambient temperature. Ground to protect from static charge.Keep container closed.Use adequate ventilation.

HUMISEAL DIVISION/CHASE CORPORATION HUMISEAL TYPE: THINNER 521

ROUTES OF ENTRY: SKIN: Yes INHALATION: Yes INGESTION: Yes
EFFECTS OF OVEREXPOSURE:Eyes: Liquid is minimally irritating to the eyes.High vapor concentration may also be irritating.Skin:Contact with liquid is mildly irritating.Prolonged or repeated contact can result in defatting and drying of the skin, resulting in dermatitis.
INHALATION: Vapors may be irritating to the nose, throat and respiratory tract.High vapor concentrations may cause CNS depression.
INGESTION: Liquid is moderately toxic and can be harmful if swallowed. May produce CNS depression, may result in vomiting.Aspiration of vomitus must be avoided as even small quantities may result in Aspiration Pneumonitis. Early to moderate CNS depression may be evidenced by giddiness,headache,dizziness and nausea.
EXTREME CASES: Unconsciousness and death may occur.Aspiration Pneumonitis may be evidenced by coughing,labored breathing and cyanosis(bluish skin), in severe cases death may occur. Preexisting eye skin and respiratory conditions may be aggravated by exposure to this product. Near fatal exposures may result in congestive effects to a wide variety of organs.Lab animals exposed by various routes to high doses showed evidence in the liver,kidneys,lungs,spleen,heart and adrenal. Rats exposed to vapor during pregnancy showed embryo/fetotoxic effects. Mice exposed orally to doses producing maternal toxicity also showed embryo/fetotoxic effects.
CARCINOGENICITY: This product is not listed by the National Toxicology Program the International Agency for Research on Cancer or the Occupational Safety and Health Administration.
EMERGENCY AND FIRST AID PROCEDURES: EYE CONTACT: Flush with water for 15 minutes while holding eyelids open.GET MEDICAL ATTENTION. SKIN CONTACT: Wash with soap and water, remove contaminated clothing, do not use until cleaned. If persistent irritation occurs, GET MEDICAL ATTENTION.
INHALATION: Remove victim to fresh air and provide oxygen if breathing is difficult. Give artificial respiration if not breathing.
GET MEDICAL ATTENTION. INGESTION: DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into lungs.
GET MEDICAL ATTENTION: NOTE TO THE PHYSICIAN: If more than 2ml/kg has been ingested and vomiting has not occurred, emesis should be induced with supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions, or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.
STABILITY (choose one): ( )UNSTABLE (X)STABLE.
CONDITIONS TO AVOID: Not Applicable.INCOMPATABILITY: (MATERIALS TO AVOID): Avoid contact with strong oxidizing agents.
HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, Carbon dioxide.
HAZARDOUS POLYMERIZATION (choose one): ( )MAY OCCUR (X)WILL NOT OCCUR.CONDITIONS TO AVOID:Not Applicable.
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Absorb with inert material (sand, vermiculite, etc.). Large spills may be scooped up with non-sparking tools. Remove sources of ignition.Provide ventilation and/or respiratory protection.
WASTE DISPOSAL METHOD: Disposal of HumiSeal products requires strict compliance with local, state and federal regulations pertaining to disposing hazardous waste materials. Contact the appropriate environmental agencies.RCRA Waste No./RQ: Toluene;U220/1000Lbs. Xylene;U239/1000lbs. Ethyl Benzene ;No./1000lbs. CERCLA: Toluene;1000lbs. Xylene;1000lbs. Ethyl Benzene 1000lbs.
RESPIRATORY PROTECTION (SPECIFY TYPE): Respiratory-organic vapor type if TLV is exceeded(NIOSH approved).
VENTILATION: LOCAL EXHAUST: Yes.
MECHANICAL (GENERAL): Explosion proof SPECIAL: Designed and maintained to provide volume and patterned to prevent vapor.
OTHER: Concentration in excess of TLV or PEL.
PROTECTIVE GLOVES: Impervious to chemical and petroleum(BUNA-N,Solvex etc.).
EYE PROTECTION: Chemical type goggles must be worn.
OTHER PROTECTIVE EQUIPMENT: Prevent contact to workers as required.
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Keep away from heat, sparks and open flames. Store at ambient temperature. Ground containers when pouring to prevent static spark. Keep containers closed. Use adequate ventilation.

BULLETIN HM7804

HYSOL 7804

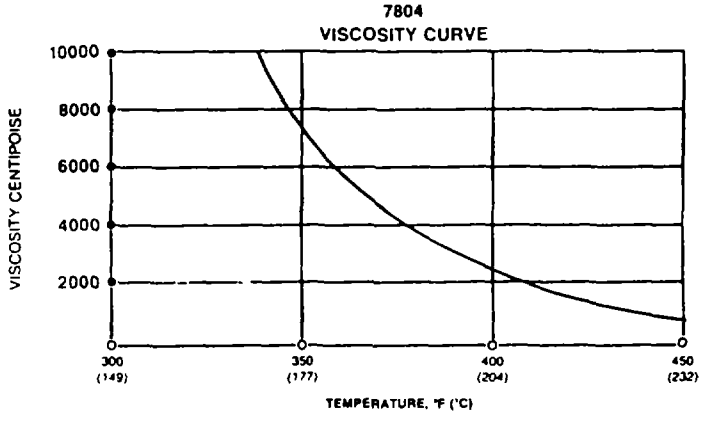
Polyamide Hot Melt Adhesive

DESCRIPTION

Hysol 7804 is a tough, elastomeric, high performance polyamide hot melt with excellent impact resistance at low temperatures. It is recommended for demanding applications where substrates may be exposed to temperature extremes. 7804 bonds to many difficult substrates including: metals, plastics, wood, leather, fabric, non-woven fabric, films, and foils.

PRODUCT SPECIFICATIONS

		Test Method
Softening Point, °F (°C)	280 (137)	ASTM E28-67
Viscosity @ 350°F (177° C), centipoise	7000	*Thermosel
Specific Gravity @ RT, g/cc	1.01	ASTM 1475
Tensile Strength, PSI	340	ASTM D638-68
Elongation, %	900	ASTM D638-68



PERFORMANCE CHARACTERISTICS

Adhesive Tensile, PSI		ASTM 897-72
PVC/PVC	200	
Nylon/Nylon	105	
ABS/ABS	100

IMPORTANT: User shall determine the suitability of the product for his intended use and assume all risk and liability in connection therewith. All information supplied by Dexter is based on our belief that it is reliable and is intended for use by persons having technical skill at their own discretion and risk. Since conditions of use are outside of Dexter's control, we can assume no liability for results obtained or damages incurred through the application of the data presented.

*ELECTRICAL PROPERTIES		Test Method
Dielectric Strength V/mil	600	ASTM D-149
Dielectric Constant, K	6.0	MIL-1-16923
Dissipation Factor, D	0.14	ASTM D-150
Volume Resistivity, ohm-cm (pv)	2.0×10^{13}	ASTM D-257
Surface Resistivity, ohm-cm (sv)	2.4×10^{13}	ASTM D-257

APPLICATION

Hysol offers a complete line of reliable, portable, hand held applicators specifically designed to accurately dispense all shaped hot melt formulations. There are many excellent bulk hot melt applicators available. Your local Hysol salesman will be happy to help you with your selection.

AVAILABILITY

Available forms include pellets in poly-lined 40 lb. cartons and shaped forms for hand held applicators.

*Tests run @ 77°F (25°C)

SPECIAL FIRE FIGHTING PROCEDURES-
None

UNUSUAL FIRE AND EXPLOSION HAZARDS-
None

SECTION V - HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE-
Not Applicable

EFFECTS OF OVEREXPOSURE-
Unknown

EMERGENCY AND FIRST AID PROCEDURES-
Skin:Wash with soap and water
Eyes:Flush with water

WARNING!
Molten hot melt adhesive can cause severe burns upon contact with skin.

SECTION VI - REACTIVITY DATA

STABILITY STABLE

CONDITIONS TO AVOID-
None known

INCOMPATIBILITY (MATERIALS TO AVOID)-
Not Applicable

HAZARDOUS DECOMPOSITION PRODUCTS-
Carbon monoxide(from partial combustion as for most organic materials)

HAZARDOUS POLYMERIZATION-
Will not occur

CONDITIONS TO AVOID-
None known

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED-
Sweep up to avoid any slipping hazard

WASTE DISPOSAL METHOD-
Dispose of according to all local, state and federal laws.

SECTION VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION (SPECIFY TYPE)-
None when using adequate ventilation

VENTILATION-
Recommended when heating

PROTECTIVE GLOVES-
Heat protective gloves

EYE PROTECTION-
Goggles

OTHER PROTECTIVE EQUIPMENT-
Not required

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN STORAGE AND HANDLING-
None known

OTHER PRECAUTIONS-

WARNING!

SECTION IX - SPECIAL PRECAUTIONS JM7804 CONTINUED...

Molten hot melt adhesive can cause severe burns upon contact with skin.

UNION CARBIDE CHEMICALS AND PLASTICS COMPANY INC.

Solvents & Coatings Materials Division

MATERIAL SAFETY DATA SHEET

EFFECTIVE DATE 09/23/94

Union Carbide urges each customer or recipient of this MSDS to study it carefully to become aware of and understand the hazards associated with the product. The reader should consider consulting reference works or individuals who are experts in ventilation, toxicology, and fire prevention, as necessary or appropriate to use and understand the data contained in this MSDS.

To promote safe handling, each customer or recipient should: (1) notify its employees, agents, contractors and others whom it knows or believes will use this material or the information in this MSDS and any other information regarding hazards or safety; (2) furnish this same information to each of its customers for the product; and (3) request its customers to notify their employees, customers, and other users of the product of this information.

I. IDENTIFICATION

PRODUCT NAME:	ISOPROPANOL, ANHYDROUS

UNION CARBIDE CHEMICALS AND PLASTICS COMPANY INC
Solvents & Coatings Materials Division
39 Old Ridgebury Road, Danbury, CT 06817-0001

PRODUCT NAME: ISOPROPANOL, ANHYDROUS

VAPOR DENSITY (AIR = 1): 2.07

EVAPORATION RATE (Butyl Acetate = 1): 2.88

SOLUBILITY IN WATER by wt: Complete at 20 C

APPEARANCE: Transparent colorless

ODOR: Characteristic

PHYSICAL STATE: Liquid

PERCENT VOLATILES (by weight): 100

III. INGREDIENTS

%	MATERIAL	CAS#	EXPOSURE LIMIT
~100	Isopropanol	67-63-0	See Section V

IV. FIRE AND EXPLOSION HAZARD DATA

FLASH POINT:

53 F (12 C)
Tag Closed Cup ASTM D 56

63 F (17 C)
Tag Open Cup ASTM D 1310

FLAMMABLE LIMITS IN AIR % by volume: LOWER: 2.0 UPPER: 12.7 @ 200 F

EXTINGUISHING MEDIA: Apply alcohol-type or all-purpose-type foam by manufacturer's recommended techniques for large fires. Use carbon dioxide or dry chemical media for small fires.

SPECIAL FIRE FIGHTING PROCEDURES:

Use water spray to cool fire-exposed containers and structures.
Use water spray to disperse vapors; re-ignition is possible.
Use self-contained breathing apparatus and protective clothing.

PRODUCT NAME: ISOPROPANOL, ANHYDROUS

UNUSUAL FIRE AND EXPLOSION HAZARDS:

Vapors form from this product and may travel or be moved by air currents and ignited by pilot lights, other flames, smoking, sparks, heaters, electrical equipment, static discharges or other ignition sources at locations distant from product handling point.
Vapors from this material may settle in low or confined areas or travel a long distance to an ignition source and flash back explosively.
This material may produce a floating fire hazard.
See "Other Precautions" in Section IX.

V. HEALTH HAZARD DATA

EXPOSURE LIMIT(S):

Isopropanol: 400 ppm TWA, OSHA & ACGIH
500 ppm STEL, OSHA & ACGIH

EFFECTS OF ACUTE OVEREXPOSURE:

SWALLOWING:

Slightly toxic. May cause abdominal discomfort, nausea, vomiting and diarrhea.
Loss of consciousness may occur.
Drowsiness may occur.

SKIN ABSORPTION:

Exposure to small quantities is not expected to cause adverse health effects.
Widespread or prolonged exposure may result in the absorption of harmful amounts of material, particularly in infants, leading to signs and symptoms as described for swallowing.

INHALATION:

Vapor causes irritation of the respiratory tract, with coughing and chest discomfort.
High concentrations of vapor may cause headache and drowsiness.

SKIN CONTACT:

May cause minor irritation with itching and possible slight local redness.
Prolonged or repeated contact may cause defatting and drying of the skin.

EYE CONTACT:

Causes irritation, experienced as stinging and discomfort or pain.
Corneal injury may occur.

EFFECTS OF REPEATED OVEREXPOSURE:

No adverse effects anticipated from available information.

OTHER HEALTH HAZARDS:

None currently known.

MEDICAL CONDITIONS AGGRAVATED BY OVEREXPOSURE:

Skin contact may aggravate an existing dermatitis.

ADDITIONAL TOXICITY INFORMATION:

The following is a summary of TSCA Section 4 Test Rule results:
Large doses (>800 mg/kg/day) of isopropanol given orally to pregnant rats during the critical period of gestation produced slight decreases in fetal weight. These doses also caused evidence of toxicity in the mothers. Oral doses as high as 480 mg/kg/day caused evidence of toxicity in pregnant rabbits

but did not produce evidence of embryo or fetal toxicity. Isopropanol did not produce an increased incidence of malformations (teratogenicity) in either species. An indication of reduced mating performance in 2nd generation male rats was noted at oral doses of 1000 mg/kg/day in a two generation reproductive study. Increased neonatal mortality was also seen at doses of 500 mg/kg/day and greater in this study.
No evidence of neurotoxic effects was observed in studies specifically designed to assess neurobehavioral functions in neonatal rats after oral dosing of mothers during gestation and lactation. In an acute vapor inhalation study, high concentrations of isopropanol (1500 ppm and greater) caused a spectrum of transient effects indicative of narcosis. In repeated inhalation exposure studies, high vapor concentrations (5000 ppm) produced an increase in motor activity in rats first noted after 4 weeks of exposure. The effect was reversible completely resolving within 14 days after 13 weeks of exposure. No evidence of damage to nerve tissue was seen in this study. Repeated exposure to isopropanol vapor produced hyaline droplet nephropathy in male rats, an effect considered not to have relevance to human health hazard assessment. No other target organ effects were seen in either rats or mice after 3 months of exposure to vapor concentrations up to 5000 ppm. No evidence suggestive of carcinogenic activity was noted in chronic vapor inhalation studies with isopropanol in rats and mice.

EMERGENCY AND FIRST AID PROCEDURES:

SWALLOWING:	If patient is fully conscious, give two glasses of water. Induce vomiting. Obtain medical attention.
SKIN:	Remove contaminated clothing. Wash skin with soap and water. If irritation persists or if contact has been prolonged, obtain medical attention.
INHALATION:	Remove to fresh air. Give artificial respiration if not breathing. If breathing is difficult, oxygen may be given by qualified personnel. Obtain medical attention.
EYES:	Immediately flush eyes with water and continue washing for several minutes. Remove contact lenses, if worn. Obtain medical attention.
NOTES TO PHYSICIAN:	There is no specific antidote. Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

VI. REACTIVITY DATA

STABILITY: Stable

CONDITIONS TO AVOID: None known.

INCOMPATIBILITY (materials to avoid):

Strong oxidizing agents.
Halogens.
Strong inorganic acids.
Aldehydes.
Halogen compounds.

HAZARDOUS COMBUSTION OR DECOMPOSITION PRODUCTS:

Burning can produce the following products:
Carbon monoxide and/or carbon dioxide.

PRODUCT NAME: ISOPROPANOL, ANHYDROUS

Carbon monoxide is highly toxic if inhaled; carbon dioxide in sufficient concentrations can act as an asphyxiant.

HAZARDOUS POLYMERIZATION: Will Not Occur

CONDITIONS TO AVOID: None known.

VII. SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Extinguish and do not turn on any ignition source until the area is determined to be free from fire or explosion hazard.
Wear suitable protective equipment.
Avoid contact with eyes.
Small spills can be flushed with large amounts of water; larger spills should be collected for disposal.

WASTE DISPOSAL METHOD:

Incinerate in a furnace where permitted under Federal, State, and local regulations.
At very low concentrations in water, this product is biodegradable in a biological wastewater treatment plant.

VIII. SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION:

Use self-contained breathing apparatus in high vapor concentrations.

VENTILATION:

General (mechanical) room ventilation is expected to be satisfactory where this product is stored and handled in closed equipment.
Special, local ventilation is needed at points where vapors can be expected to escape to the workplace air.

PROTECTIVE GLOVES:

Plastic
Rubber

EYE PROTECTION: Monogoggles

OTHER PROTECTIVE EQUIPMENT:

Eye Bath, Safety Shower

IX. SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

WARNING!
FLAMMABLE.
CAUSES EYE IRRITATION.

Keep away from heat, sparks and flame.
Avoid contact with eyes.
Keep container closed.
Use with adequate ventilation.
Vapors form from this product and may travel or be moved by air currents and ignited by pilot lights, other

flames, smoking, sparks, heaters, electrical equipment, static discharges or other ignition sources at locations distant from product handling point.
Wash thoroughly after handling.

FOR INDUSTRY USE ONLY

OTHER PRECAUTIONS:

PROCESS HAZARD: Sudden release of hot organic chemical vapors or mists from process equipment operating at elevated temperature and pressure, or sudden ingress of air into vacuum equipment, may result in ignitions without the presence of obvious ignition sources. Published "autoignition" or "ignition" temperature values cannot be treated as safe operating temperatures in chemical processes without analysis of the actual process conditions.

Any use of this product in elevated-temperature processes should be thoroughly evaluated to establish and maintain safe operating conditions. Further information is available in a technical bulletin entitled "Ignition Hazards of Organic Chemical Vapors."

TRANSFER HAZARD: Vapors of this product may be ignited by static sparks. Use proper bonding and grounding during liquid transfer as described in National Fire Protection Association document NFPA 77.

X. REGULATORY INFORMATION

STATUS ON SUBSTANCE LISTS:

The concentrations shown are maximum or ceiling levels (weight %) to be used for calculations for regulations. Trade Secrets are indicated by "TS".

FEDERAL EPA

Comprehensive Environmental Response Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center of release of quantities of Hazardous Substances equal to or greater than the reportable quantities (RQs) in 40 CFR 302.4.

Components present in this product at a level which could require reporting under the statute are:

*** NONE ***

Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires emergency planning based on Threshold Planning Quantities (TPQs) and release reporting based on Reportable Quantities (RQs) in 40 CFR 355 (used for SARA 302, 304, 311 and 312).

Components present in this product at a level which could require reporting under the statute are:

*** NONE ***

Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires submission of annual reports of release of toxic chemicals that appear in 40 CFR 372 (for SARA 313). This information must be included in all MSDSs that are copied and distributed for this material.

Components present in this product at a level which could require reporting under the statute are:

*** NONE ***

Toxic Substances Control Act (TSCA) STATUS:

The ingredients of this product are on the TSCA inventory.

SECTION 3 -- PHYSICAL DATA

BOILING RANGE: 174-410 DEG. F

VAPOR DENSITY: HEAVIER THAN AIR

EVAPORATION RATE: SLOWER THAN ETHER

SEE SECTION 1 FOR VOC DATA.
SEE SECTION 1 FOR WEIGHT PER GAL. DATA

SECTION 4 -- FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION:
OSHA CLASSIFICATION: Class II Combustible Liquid; DOT CLASSIFICATION: Combustible Liquid

OTHER COMMENTS:
NFPA RATING: H-2 F-2 R-0

FLASH POINT:
125F - 135F (SETA FLASH)

LOWER EXPLOSIVE LEVEL:
0.8 % Vol. in Air

EXTINGUISHING MEDIA:
Foam- CO2- Dry Chemical- Water Spray.

UNUSUAL FIRE AND EXPLOSION HAZARDS:
Isolate from heat, electrical equipment, sparks, and open flame. Closed containers may explode when exposed to extreme heat.

SPECIAL FIREFIGHTING PROCEDURES:
Water may be ineffective but may be used to cool containers. The use of self-contained breathing apparatus is recommended for fire fighters.

SECTION 5 -- HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:
Eye contact with the liquid, its vapors or mists may cause burning, tearing, redness and eye damage. Repeated and prolonged skin contact may cause slight irritation or mild dermatitis characterized by dryness, chapping and redness. This material may be absorbed through the skin. Overexposure by inhalation may cause respiratory tract irritation or nervous system disorders such as headaches, dizziness, weakness and fatigue. Ingestion may cause gastrointestinal tract irritation and signs of nervous system depression. Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Repeated and prolonged overexposure to lead by ingestion may cause a metallic taste in the mouth, nausea, digestive disorders, abdominal cramps & insomnia as well as blood, nervous, urinary and reproductive disorders and birth defects. "Inorganic Lead and Lead Compounds" is classified as a Group 2B carcinogen by IARC. "Chromium and certain chromium compounds" is included in the NTP and IARC lists of carcinogens. Cadmium and its compounds are listed as suspect carcinogens by NTP and IARC. There is no conclusive evidence that cadmium pigments are occupational carcinogens. N-Butanol has apparently been found to cause anemia, liver abnormalities, kidney, eye and lung damage in lab animals. Ethanol may cause liver abnormalities, kidney, eye, lung, spleen, brain & nervous system damage in lab animals. Dipropylene Glycol Methyl Ether has apparently been found to cause liver abnormalities & kidney damage in lab animals. Diacetone Alcohol has been found to cause kidney and liver injury and blood disorders in lab animals. CALIFORNIA PROPOSITION 65: The following statement is made in order to comply with the California Safe Drinking Water and Toxic Enforcemnet Act of 1986: This product contains a chemical(s) known to the State of California as a carcinogen and/or reproductive toxicant.

DICAL CONDITIONS PRONE TO AGGRAVATE BY EXPOSURE:
Persons with pre-existing skin or lung disorders may be more susceptible to the effects of this material. Repeated and prolonged overexposure and/or individual sensitivity may increase the potential for and degree of adverse health effects.

PRIMARY ROUTE(S) OF ENTRY:
Dermal (Contact/Absorption) - Inhalation - Ingestion

EMERGENCY AND FIRST AID PROCEDURES:
SKIN CONTACT: Wash with soap and water, contact physician if irritation persists EYE CONTACT: Flush well with running water for a minimum of 15 minutes, contact physician if irritation persists. INHALATION: Remove to fresh air, restore breathing, contact physician. INGESTION: Contact physician or Poison Control Center immediately.

OTHER COMMENTS:
The potential health effects of this product are based on the hazards of

OTHER COMMENTS:
its components. TSCA Inventory: All ingredients listed.

SECTION 6 -- REACITIVITY DATA

STABILITY:
Stable.

CONDITIONS TO AVOID:
Heat, sparks and open flame.

INCOMPATIBILITY (WITH MATERIALS):
Strong oxidizing agents, alkalis, and reactive chemicals.

HAZARDOUS DECOMPOSITION PRODUCTS:
Carbon Monoxide, Carbon Dioxide and other noxious gases.

HAZARDOUS POLYMERIZATION:
Will not occur.

SECTION 7 -- SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Remove all sources of ignition. Ventilate area. Avoid breathing vapors. Contain release and remove with inert absorbent. Avoid contact. Use non-sparking tools to place material in appropriate container for disposal.

WASTE DISPOSAL METHOD:
Dispose of in accordance with applicable local, county, state, and federal regulations.

SECTION 8 -- SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION:
If vapor concentration exceeds the TLV listed in Section II, use NIOSH approved respirator with organic chemical cartridge. Contact a reputable safety supply company for the appropriate respirator.

VENTILATION:
Use applicable engineering controls, work practices, and personal protective equipment to keep the vapor concentration below the TLV listed in Section II.

PROTECTIVE GLOVES:
Use neoprene, nitrile or other gloves resistant to solvents listed in Section II. Contact a reputable safety supply company for appropriate gloves.

EYE PROTECTION:
Use splash-proof goggles or safety glasses. Contact a reputable safety supply company for appropriate eye protection.

OTHER PROTECTION:
Solvent resistant aprons and availability of an eye wash are recommended. Smoke in designated areas only.

HYGIENIC PRACTICES:
Wash with soap and water before eating, smoking or using toilet facilities. Remove contaminated clothing to prevent prolonged skin contact.

SECTION 9 -- SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING:
Store in closed containers in cool, dry, well ventilated area away from sources of ignition. Keep containers closed when not in use.

OTHER PRECAUTIONS:
Avoid prolonged or repeated overexposure to this product. Empty containers should be disposed of in an environmentally safe manner in accordance with applicable regulations.

SECTION 10 -- DISCLOSURE

DISCLOSURE INFORMATION:
The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind express or implied is made with respect to the information contained herein.

MATERIAL SAFETY DATA SHEET

Complies with OSHA Hazard Communication Standard 29 CFR 1910.1200

Date of Prep: 12/3/96

SECTION 1

SUNNYSIDE CORPORATION
225 CARPENTER AVENUE
WHEELING, ILLINOIS 60090
EMERGENCY TELEPHONE (847) 541-5700 - SUNNYSIDE CORPORATION
(800) 424-9300 - CHEM TREC

FOR INFORMATION: (847) 541-5700

Rec 8/17/89

Product Class: Petroleum Hydrocarbon
Trade Name: KEROSENE

Manufacturer's Code: 801
NPCA HMIS: Health: 1
Fire: 2
Reactivity: 0

Product Appearance and Odor: Clear, water-white liquid; mild characteristic odor.

SECTION 2 -- HAZARDOUS INGREDIENTS

OCCUPATIONAL EXPOSURE LIMITS

INGREDIENT	CAS #	PERCENT	ACGIH TLV (TWA)	ACGIH TLV (STEL)	OSHA PEL (TWA)	OSHA PEL (STEL)	VAPOR PRESSURE
Petroleum Distillate	8008-20-6		Not Est.		400 PPM (For Petroleum Distillates - Naphtha)		0.5 MM Hg @ 100° F
Naphthalene	91-20-3		10 PPM	15 PPM	10 PPM	15 PPM	Not Known

SECTION 3 -- EMERGENCY AND FIRST AID PROCEDURES

Eye Contact: Flush eyes with plenty of water for 15 minutes while holding eyelids open. Get medical attention.

Skin Contact: Remove contaminated clothing/shoes. Flush skin with water. Follow by washing with soap and water. If irritation occurs, get medical attention. Do not reuse clothing until cleaned.

Inhalation: Remove victim to fresh air and provide oxygen if breathing is difficult. Give artificial respiration if not breathing.

Ingestion: Do not induce vomiting. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into the lungs. Get medical attention.

SECTION 4 -- PHYSICAL DATA

The following data represent approximate or typical values. They do not constitute product specifications.

Boiling Range: 350-572° (F)
Evaporation Rate: Slower than ether
Weight Per Gallon: 6.75 lbs.
Solubility in Water: Negligible

Vapor Density: Heavier than air
% Volatile By Volume: 100%

SECTION 5 -- FIRE AND EXPLOSION DATA

Flammability Classification: Combustible Liquid-Class II

Flash Point: 125° (F) Minimum (Tag. Closed Cup)

Autoignition Temperature: 450°(F)

Lower Explosive Limit: 0.7 Vol. %

Extinguishing Media: Carbon Dioxide, foam, dry chemical, water spray. Do not use direct water stream; it will spread fire.

Unusual Fire and Explosion Hazards: Do not store or mix with strong oxidants.

Special Fire Fighting Procedures: Use air-supplied rescue equipment for enclosed areas. Cool exposed containers with water.

SECTION 6 -- HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE: See Section 2.

EFFECTS OF OVEREXPOSURE

Acute

Eye Contact: Contact may cause mild eye irritation, including stinging, watering and redness.

Skin Contact: Skin irritant. Contact may cause redness and burning. Prolonged or repeated contact may cause drying and cracking of the skin and severe skin damage. No harmful effects to humans from skin absorption have been reported. Prolonged and repeated dermal exposures of rabbits to kerosene produced multi-focal necrosis of the liver.

Inhalation: Vapors may cause irritation to nose, throat and respiratory tract. Petroleum hydrocarbons of similar composition have been shown to cause kidney damage and tumors in male rats following prolonged inhalation exposures. This effect appears to be unique to the male rat.

Ingestion: Ingestion may result in vomiting, aspiration (breathing) of vomitus into the lungs must be avoided as even small quantities may result in aspiration pneumonitis.

Chronic: Repeated skin contact may aggravate an existing dermatitis (skin condition).

Target Organs: Potential hazard to kidney and liver.

Carcinogenicity: Application to mouse skin twice a week for 12 months, resulted in an increased incidence of skin tumors. Kerosene has not been identified as a carcinogen by NTP, IARC or OSHA. Female mice exposed via inhalation to Naphthalene developed alveolar adenomas. This effect was not seen in male mice. Naphthalene has not been identified as a carcinogen by NTP, IARC or OSHA.

Medical Conditions Aggravated by Exposure: Conditions aggravated by exposure may include skin disorders, respiratory (asthma-like) disorders d liver disorders.

SECTION 7 -- REACTIVITY DATA

Stability: Stable

Conditions to Avoid: Heat, sparks and flame.

Incompatibility (Materials to Avoid): Strong oxidizing agents like liquid chlorine, concentrated oxygen, strong acids, selected amines and bases.

Hazardous Decomposition Products: Thermal decomposition may yield carbon dioxide and carbon monoxide.

Hazardous Polymerization: Will not occur.

SECTION 8 -- SPILL OR LEAK PROCEDURES

Steps to be taken in case material is spilled or released: Remove ignition sources, evacuate area, avoid breathing vapor or contact with liquid. Recover free liquid or stop leak if possible. Dike large spills and use absorbent material for small spills. Keep spilled material out of sewers, ditches and bodies of water.

Waste disposal method: Incinerate under safe conditions; dispose of in accordance with local, state and federal regulations.

SECTION 9 -- SAFE HANDLING AND USE INFORMATION

Respiratory Protection: Appropriate vapor canister, self-contained breathing apparatus or supplied-air hose mask, if needed.

Ventilation: Sufficient, in volume and pattern, to keep workroom concentration below current applicable OSHA safety and health requirements. See Section 2. Use explosion-proof equipment. No smoking.

Protective Gloves: Rubber or neoprene.
Eye Protection: Chemical safety goggles.
Other Protective Equipment: Impervious clothing or boots, if needed.

SECTION 10 -- SPECIAL PRECAUTIONS

Dept. of Labor Storage Category:	Combustible Liquid - Class II
Hygienic Practices:	Keep away from heat, sparks and open flame. Keep containers closed when not in use. Avoid eye contact. Avoid prolonged or repeated contact with skin. Wash skin with soap and water after contact.
Additional Precautions:	Ground containers when transferring liquid to prevent static accumulation and discharge. Additional information regarding safe handling of products with static accumulation potential can be ordered by contacting the American Petroleum Institute (API) for API Recommended Practice 2003, entitled "Protection Against Ignitions Arising Out of Static, Lighting, and Stray Currents" (American Petroleum Institute, 1720 L Street Northwest, Washington,DC 20005), or the National Fire Protection Association (NFPA) for NFPA 77 entitled "Static Electricity" (National Fire Protection Association, 1 Batterymarch Park, P.O. Box 9101, Quincy, MA 02269-9101).
Empty Container Warning:	"Empty" containers retain residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, sparks or other sources of ignition; they may explode and cause injury or death. Do not attempt to clean since residue is difficult to remove. "Empty" drums should be completely drained, properly bunged and promptly returned to supplier or disposed of in an environmentally safe manner and in accordance with governmental regulations.

SECTION 11 -- ADDITIONAL INFORMATION

This product contains the following toxic chemical(s) which are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

TOXIC CHEMICAL	CAS #	APPROXIMATE % BY WEIGHT
Naphthalene	91-20-3	< 1.0%

SARA Title III Hazard Categories:	Immediate (Acute) Health, Delayed (Chronic) Health
Common Names:	Solvent Naphtha (Petroleum), Aliphatic Hydrocarbon, Petroleum Distillate
California Proposition 65:	This product contains trace amounts of Benzene, a chemical known to the State of California to cause cancer, and Toluene, a chemical known to the State of California to cause birth defects or other reproductive harm.

SECTION IV - PHYSICAL HAZARDS

Stability:	(x) Stable ( ) Unstable
Conditions to Avoid:	Sources of Ignition
Incompatible Materials to Avoid:	Alkaline Substances
Hazardous Decomposition Products:	Alkaline Substances
Hazardous Polymerization:	( ) May Occur (x) Will Not Occur

SECTION V - HEALTH HAZARDS

Toxicity: Isopropyl Alcohol

1. Acute Overexposure: Stomach Discomfort, Vomiting, Nausea, Irritation to Mouth & Throat, Scarcery Irritation, Respiratory Irritation and Anesthesia.
2. Chronic Overexposure: Respiratory Ailments, Liver and Kidney Damage, Corneal Damage, Pulmonary Edema

Medical Conditions Generally Aggravated By Overexposure: None Known

National Toxicity Program (NTP):	( ) Yes	(x) No
IARC Monographs	( ) Yes	(x) No
OSHA	( ) Yes	(x) No

OSHA Permissible Exposure Limit (PEL):	Not Established
ACGIH Threshold Limit Value (TLV):	5.84 g/kg (Rat) Oral LD50
Other Exposure Limit Used:	16 ml/kg (Rabbit) Dermal LD50

Emergency and First Aid Procedures:

1. **Inhalation:** Remove to fresh air.
2. **Eyes:** Flush with water for 15 minutes, lifting eyelids occasionally. Seek medical attention if irritation persists.
3. **Skin:** Wash with solvent then wash with soap and water. Removed exposed clothing and wash thoroughly before reuse.
4. **Ingestion:** Give victim large amounts of water. Seek medical attention.

SECTION VI - SPECIAL PROTECTION INFORMATION

Respiratory Protection:	Use NIOSH approved respirator.
Ventilation:	Use only in a well ventilated area.
Local Exhaust:	Recommended
Mechanical:	Recommended
Special:	N/A
Other:	N/A
Protective Gloves:	Chemical Resistant Gloves
Eye Protection:	Chemical safety goggles or face shield recommended
Other Protective Clothing or Equipment:	Safety Shower, Eye Bath, Apron

SECTION VII - SPECIAL PRECAUTIONS AND SPILL/LEAK PROCEDURES

Precautions to be Taken in Handling/Storage: Keep container closed when not in use. Do not store near sources of ignition. Store below 20°C.

Other Precautions: Avoid contact with skin and eyes

Steps to be Taken in Case Material is Released or Spilled: Contain spill with absorbent material. Dike large spills using absorbent material. Dispose of in a DOT approved container. Increase ventilation.

Waste Disposal Methods: Dispose of in accordance with all local, state and federal regulations and ordinances.

SECTION VII - SHIPPING INFORMATION

Proper Shipping Name:	Isopropyl Alcohol Mixture
Hazard Classification:	Flammable Liquid

SOLUBILITY IN WATER	Complete	*pH* (10% aqueous soln.)	3.5
APPEARANCE AND ODOR	White, crystalline solid, irritating odor.		

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

ESTIMATED FLAMMABLE LIMITS (% By Volume in Air) LEL:NA UEL:NA

FLASH POINT Deg. F. NA

EXTINGUISHING MEDIA Not combustible. Select extinguishing agent appropriate to other materials involved.

SPECIAL FIRE FIGHTING PROCEDURES Wear full protective clothing and self-contained breathing apparatus.

UNUSUAL FIRE AND EXPLOSION HAZARD Dangerous when exposed to heat or flame. Decomposition products include toxic and corrosive fumes.

. Overexposure)

...e irritation to nose, throat
... and possibly lung damage, wheezing,
...y with breathing, headache, nausea, vomiting.

INGESTION: Swallowing may cause corrosion of mouth, throat and digestive tract. Systemic effects similar to those resulting from inhalation.

SKIN: Will cause chemical burns. Absorption may be a significant route for exposure. Contact may have systemic effects similar to those resulting from inhalation.

EYES: Dust will cause severe conjunctival irritation and corneal damage.

CARCINOGENICITY: None known.

REPRODUCTIVE/DEVELOPMENTAL TOXICITY: None known.

SECTION V(b) - HEALTH HAZARD DATA

(Emergency & First Aid Procedures)

INHALATION Remove from exposure. Keep warm and at rest. If breathing stops or shows signs of failing, give artificial respiration. If loss of consciousness occurs, place in recovery position. Obtain medical attention urgently.

INGESTION Wash out mouth with water. Contact Poison Control Center immediately. IF CONSCIOUS, give 1-3 glasses of water. DO NOT induce vomiting. If breathing stops or shows signs of failing, apply artificial respiration. Obtain medical attention urgently.

SKIN CONTACT Immediately flood the skin with large quantities of water, preferably under a shower. Remove contaminated clothing as washing proceeds. Obtain medical attention urgently.

EYE CONTACT Immediately flood the eye(s) with plenty of water for at least 15 minutes, holding the eye lids open. Obtain medical attention urgently.

SECTION VI - REACTIVITY DATA

STABILITY
STABLE: X *UNSTABLE:*

CONDITIONS TO AVOID Heat or flame.

INCOMPATIBILITY (Materials to Avoid) Strong acids.

HAZARDOUS DECOMPOSITION PRODUCTS Combustion will generate toxic fluorine compounds.

HAZARDOUS POLYMERIZATION
*WILL OCCUR: WILL NOT OCCUR:*X

CONDITIONS TO AVOID None

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Wear respiratory protection and appropriate protective clothing.
Sweep or preferably vacuum up and collect in suitable containers for recovery or disposal. Avoid creating dust.
Environmental Precautions: See Section X.

WASTE DISPOSAL

Must be in accordance with Federal, State, and Local Laws and Regulation

SECTION VIII - SPECIAL PROTECTION

RESPIRATORY	If threshold limit value is exceeded, use MSHA/NIOSH approved dust respirator for corrosive fumes.
EYEWEAR	Chemical goggles or face shield in compliance with OSHA regulations are advised. DO NOT wear contact lenses. Provide eye bath near work site.
CLOTHING/GLOVES	Wear butyl, natural rubber or neoprene gloves and rubber apron. Provide safety shower near work site.
VENTILATION	Provide process or personnel enclosure, mechanical ventilation (dilution and local exhaust), and control of process conditions to maintain exposure levels below TLVs.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Store in a cool dry area, under cover. Store in original containers. Avoid creating a dust. Avoid inhaling dust. Avoid contact with eyes, skin and clothing. Keep containers tightly closed when not in use.

OTHER PRECAUTIONS:

CONTAINERS: Since empty containers may retain product residues (vapor, liquid, or solid) all labeled hazard precautions must be observed. FOR INDUSTRIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.

surveillance for 48 hours.

SPILL OR LEAK PROCEDURES: (continued)
Try to prevent the material from entering drains or water courses. Advise authorities if spillage has entered water course or sewer or has contaminated soil or vegetation.

TOXICOLOGICAL INFORMATION:
ACUTE TOXICITY: The product contains components that are harmful by the following route of exposure; ingestion, inhalation and skin contact.
IRRITANCY-EYES: Data for a closely related material suggests that ths product will produce severe conjunctival irritation and corneal damage.
IRRITANCY-SKIN: Data for a closely related material suggests that this product will produce burns.
SKIN SENSITIZATION: None known.
ECOLOGICAL INFORMATION:
MOBILITY: The product will dissolve rapidly in water.
PERSISTANCE/DEGRADABILITY: The product is readily biodegradable.
BIO-ACCUMULATION: Product is not expected to bioaccumulate.
ECOTOXICITY: The product is rated as slightly toxic to aquatic species.

REGULATORY INFORMATION
Toxic Substance Control Act (TSCA) Status:
All ingredients of this product are listed on the TSCA inventory.

SARA TITLE III (Section 313):
Components present in this product at a level which could require reporting under the statute are:
None

California State Proposition 65:
This product does not contain chemicals which the State of California has found to cause cancer, birth defects or other reproductive harm.

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT	LEL	UEL
PROPELLANT LT 0 F.	1.1	12.7

EXTINGUISHING MEDIA:

CARBON DIOXIDE, DRY CHEMICAL, FOAM

UNUSUAL FIRE AND EXPLOSION HAZARDS: ISOLATE FROM HEAT, ELECTRICAL EQUIPMENT SPARKS, AND OPEN FLAME. CLOSED CONTAINERS MAY EXPLODE WHEN EXPOSED TO EXTRE HEAT. APPLICATION TO HOT SURFACES REQUIRES SPECIAL PRECAUTIONS. DURING EMERGENCY CONDITIONS OVEREXPOSURE TO DECOMPOSITION PRODUCTS MAY CAUSE A HEA HAZARD. SYMPTOMS MAY NOT BE IMMEDIATELY APPARENT. OBTAIN MEDICAL ATTENTION.

SPECIAL FIRE FIGHTING PROCEDURES: FULL PROTECTIVE EQUIPMENT INCLUDING SELF-CONTAINED BREATHING APPARATUS SHOULD BE USED. WATER SPRAY MAY BE INEFFECTIV IF WATER IS USED, FOG NOZZLES ARE PREFERABLE. WATER MAY BE USED TO COOL CLO CONTAINERS TO PREVENT PRESSURE BUILD-UP AND POSSIBLE AUTOIGNITION OR EXPLOS WHEN EXPOSED TO EXTREME HEAT.

SECTION V - HEALTH HAZARD DATA

ROUTES OF EXPOSURE: EXPOSURE MAY BE BY INHALATION AND/OR SKIN OR EYE CONTAC DEPENDING ON CONDITIONS OF USE. TO MINIMIZE EXPOSURE, FOLLOW RECOMMENDATION FOR PROPER USE, VENTILATION, AND PERSONAL PROTECTIVE EQUIPMENT.

ACUTE HEALTH HAZARDS:

EFFECTS OF OVEREXPOSURE: IRRITATION OF EYES, SKIN AND RESPIRATORY SYSTEM. M CAUSE NERVOUS SYSTEM DEPRESSION. EXTREME OVEREXPOSURE MAY RESULT IN UNCONSCIOUSNESS AND POSSIBLY DEATH.

SIGNS AND SYMPTOMS OF OVEREXPOSURE: HEADACHE, DIZZINESS, NAUSEA, AND LOSS O COORDINATION ARE INDICATIONS OF EXCESSIVE EXPOSURE TO VAPORS OR SPRAY MISTS

REDNESS AND ITCHING OR BURNING SENSATION MAY INDICATE EYE OR EXCESSIVE SKIN EXPOSURE.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: NONE GENERALLY RECOGNIZED.

2W757

EMERGENCY AND FIRST AID PROCEDURES:

IF INHALED: IF AFFECTED, REMOVE FROM EXPOSURE. RESTORE BREATHING. KEEP WARM QUIET.

IF ON SKIN: WASH AFFECTED AREA THOROUGHLY WITH SOAP AND WATER. REMOVE CONTAMINATED CLOTHING AND LAUNDER BEFORE RE-USE.

IF IN EYES: FLUSH EYES WITH LARGE AMOUNTS OF WATER FOR 15 MINUTES. GET MEDI ATTENTION.

IF SWALLOWED: NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. DO NOT INDUCE VOMITING. GIVE CONSCIOUS PATIENT SEVERAL GLASSES OF WATER. SEEK MEDI ATTENTION.

CHRONIC HEALTH HAZARDS:

NO INGREDIENT IN THIS PRODUCT IS AN IARC, NTP OR OSHA LISTED CARCINOGEN.

REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OVEREXPOSURE TO SOLVENTS WIT PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE.

SECTION VI - REACTIVITY DATA

STABILITY: STABLE.

CONDITIONS TO AVOID: NONE KNOWN.

INCOMPATIBILITY: NONE KNOWN.

HAZARDOUS DECOMPOSITION PRODUCTS: BY FIRE: CARBON DIOXIDE, CARBON MONOXIDE.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR.

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: REMOVE ALL SOURC OF IGNITION. VENTILATE AND REMOVE WITH INERT ABSORBENT.

WASTE DISPOSAL METHOD: WASTE FROM THIS PRODUCT MAY BE HAZARDOUS AS DEFINED UNDER THE RESOURCE CONSERVATION AND RECOVERY ACT (RCRA) 40 CFR 261.

WASTE MUST BE TESTED FOR IGNITABILITY TO DETERMINE THE APPLICABLE EPA HAZAR WASTE NUMBERS.

DO NOT INCINERATE. DEPRESSURIZE CONTAINER. DISPOSE OF IN ACCORDANCE WITH FEDERAL, STATE, AND LOCAL REGULATIONS REGARDING POLLUTION.

2W757

SECTION VIII - PROTECTION INFORMATION

PRECAUTIONS TO BE TAKEN IN USE: USE ONLY WITH ADEQUATE VENTILATION. AVOID BREATHING VAPOR AND SPRAY MIST. AVOID CONTACT WITH SKIN AND EYES. WASH HAND AFTER USING.

VENTILATION: LOCAL EXHAUST PREFERABLE. GENERAL EXHAUST ACCEPTABLE IF THE EXPOSURE TO MATERIALS IN SECTION II IS MAINTAINED BELOW APPLICABLE EXPOSURE LIMITS. REFER TO OSHA STANDARDS 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION: IF PERSONAL EXPOSURE CANNOT BE CONTROLLED BELOW APPLICABLE LIMITS BY VENTILATION, WEAR A PROPERLY FITTED ORGANIC VAPOR/ PARTICULATE RESPIRATOR APPROVED BY NIOSH/MSHA FOR PROTECTION AGAINST MATERI IN SECTION II.

PROTECTIVE GLOVES: NONE REQUIRED FOR NORMAL APPLICATION OF AEROSOL PRODUCTS WHERE MINIMAL SKIN CONTACT IS EXPECTED. FOR LONG OR REPEATED CONTACT, WEAR CHEMICAL RESISTANT GLOVES.

EYE PROTECTION: WEAR SAFETY SPECTACLES WITH UNPERFORATED SIDESHIELDS.

SECTION IX - PRECAUTIONS

DOL STORAGE CATEGORY: 1A

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: KEEP AWAY FROM HEAT, SPARK AND OPEN FLAME. VAPORS WILL ACCUMULATE READILY AND MAY IGNITE EXPLOSIVELY.

DURING USE AND UNTIL ALL VAPORS ARE GONE: KEEP AREA VENTILATED - DO NOT SMO EXTINGUISH ALL FLAMES, PILOT LIGHTS, AND HEATERS - TURN OFF STOVES, ELECTRI TOOLS AND APPLIANCES, AND ANY OTHER SOURCES OF IGNITION.

CONSULT NFPA CODE. USE APPROVED BONDING AND GROUNDING PROCEDURES.

CONTENTS UNDER PRESSURE. DO NOT PUNCTURE, INCINERATE, OR EXPOSE TO TEMPERAT ABOVE 120 F. HEAT FROM SUNLIGHT, RADIATORS, STOVES, HOT WATER, AND OTHER HE SOURCES COULD CAUSE CONTAINER TO BURST. DO NOT TAKE INTERNALLY. KEEP OUT OF REACH OF CHILDREN.

OTHER PRECAUTIONS: INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS CAN BE HARMFUL OR FATAL.

SECTION X - OTHER REGULATORY INFORMATION:

SARA 313 (40 CFR 372.65C) SUPPLIER NOTIFICATION:

CAS NO.	CHEMICAL/COMPOUND	% BY WT	% ELEMENT

NO INGREDIENTS IN THIS PRODUCT ARE SUBJECT TO SARA 313 (40 CFR 372.65C) SUPPLIER NOTIFICATION.

2W757

CALIFORNIA PROPOSITION 65:
WARNING: THIS PRODUCT CONTAINS CHEMICALS KNOWN TO THE STATE OF CALIFORNIA T CAUSE CANCER AND BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM.

TSCA CERTIFICATION: ALL CHEMICALS IN THIS PRODUCT ARE LISTED, OR ARE EXEMPT FROM LISTING, ON THE TSCA INVENTORY.

THE ABOVE INFORMATION PERTAINS TO THIS PRODUCT AS CURRENTLY FORMULATED, AND BASED ON THE INFORMATION AVAILABLE AT THIS TIME. ADDITION OF REDUCERS OR OT ADDITIVES TO THIS PRODUCT MAY SUBSTANTIALLY ALTER THE COMPOSITION AND HAZAR OF THE PRODUCT. SINCE CONDITIONS OF USE ARE OUTSIDE OUR CONTROL, WE MAKE NO WARRANTIES, EXPRESS OR IMPLIED, AND ASSUME NO LIABILITY IN CONNECTION WITH USE OF THIS INFORMATION.

LIQUID MASK TMC# 1090257

Techform Laboratories Material Safety Data Sheet

to comply with 29 CFR 1910.1200. OSHA's Hazard Communication Standard

TC 533

Section I:

Techform Laboratories
2021 N. Glassell Street
Orange, CA 92665

Emergency Telephone 1-(714)-921-9054
CHEMTREC after hours 1-(800)-424-9300
Revised: 1/4/94

Section II: Hazardous Ingredients/Identity information

Hazardous Component	CAS#	OSHA PEL	ACGIH TLV	Other limits	%
AMMONIUM HYDROXIDE	1336-21-6	50.0	18.00mg/m^3	NE	< 1%

Only those ingredients listed in this section have been determinded to be hazardous as defined in 29CFR 1910.1200. An ingredient marked with an asterisk(*) is also listed in 29CFR 1910.1200(D) #4 as a known or suspected cancer hazard.
+ Denotes a chemical regulated as toxic by the Environmental Protection Agency (EPA) as outlined in 40CFR Part 372 (Section 313).

Section III: Physical/Chemical Characteristics

Boiling Point: 212°F
Vapor Pressure (mm Hg): = Water
Vapor Density: = Water
Solubility in water: (10.0 - 99.9%)
Specific Gravity: 1.0
Melting Point: NE
Evaporation Rate (butyl acetate=1): <1.0
Appearance and odor: Milky liquid, slight ammonia odor.

Section IV: Fire and Explosion Hazard Data

Flash Point: NE
Flammable limits lel NE uel NE
Extinguishing media: Dry chemical, water, CO^2
Special fire fighting procedures: Use self contained breathing apparatus.
Unusual Fire and Explosion Hazards: NONE

Section V: Reactivity Data

Stability : STABLE Conditions to avoid : none
Incompatability (materials to avoid): NE
Hazardous Decomposition or Byproducts: CO, CO2
Hazardous Polymerization: WILL NOT OCCUR Conditions to avoid: none

Product name: TC 533 **Revised: 1/4/94**

Section VI: Health Hazard Data
Routes of entry: Inhalation Yes Skin No Ingestion No
Health Hazards (acute and chronic)
Contact may cause irritation. Prolonged or repeated contact may cause allergic dermatitis.
Carcinogenicity: not determined NTP? no IARC Monographs? no OSHA Regulated? no

Signs and symptoms of exposure: Inhalation-Headache, dizziness, difficulty breathing. Ingestion-nausea, vomiting. Skin-redness, burning, rash, dryness.
Eye-redness, burning, tearing, blurred vision.
Medical Conditions Aggravated by exposure: Skin allergies and respiratory conditions.

EMERGENCY FIRST AID PROCEDURES:

Skin:	Flush with water immediately - Seek medical attention if irritation persists
Eyes:	Flush with water for 15 minutes - Seek medical attention if irritation persists
Ingestion:	Drink large amounts of water - seek medical attention. Never give liquids to an unconscious person.
Inhalation:	Remove to fresh air. Support respiration. If required - Seek medical attention.

Section VII: Precautions for Safe Handling and Use
Steps to be taken if material is released or spilled: Flush into a chemical sewer or soak up with a suitable absorbant.
Waste Disposal Method: dispose of in accordance with all local state and federal regulations
Other Precautions: Avoid contact as much as possible.

Section VIII: Control Measures
Respiratory Protection (type): Organic vapor mask for fumes over TLV.
Ventilation Local Exhaust preferred Special NE
Mechanical OK Other NE
Protective Gloves: plastic or rubber Eye Protection: Goggles or face shield
Other Protective Clothing or Equipment: as required to avoid contact.
Work/Hygienic Practices: Wash after use. Follow good industrial hygienic practices.

Section IX: Additional Information
DOT Hazard Classification: None
NFPA Hazard Class:(NFPA 325M, 8th Edition)(Health, Flammability, Reactivity):1-0-0
Other: None

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles. Avoid contact lenses.
Skin:	Rubber or plastic gloves.
Ventilation:	Provide local ventilation for prolonged use in a confined area.
Respiratory	Not available
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Base: Black paste.
Odor:	Mild.
Boiling Point:	Not Applicable, Polymeric
pH:	7-8
Solubility in Water:	Polymerized
Specific Gravity	1.31

9. PHYSICAL AND CHEMICAL PROPERTIES (continued)

Volatile Organic Compound (EPA Method 24)	4.01%; 52.5 grams per liter
Vapor Pressure:	Less than 5mm at 70°F.
Vapor Density:	3.0
Evaporation Rate (Ether = 1)	Not available

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	Strong oxidizers. Polymerized by contact with moisture.
Conditions to Avoid:	Not available
Hazardous Decomposition	

Products (non-thermal): Methyl ethyl ketoxime

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Cured rubber can be incinerated or landfilled following EPA and local regulations

EPA Hazardous Waste Number: NH - Not a RCRA Hazardous Waste Material

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)
Domestic Ground Transport
- Proper Shipping Name: Unrestricted
- Hazard Class or Division: Unrestricted
- Identification Number: None
- Marine Pollutant: None

IATA
- Proper Shipping Name: Unrestricted
- Class or Division: Unrestricted
- UN or ID Number: None

15. REGULATORY INFORMATION

CA Proposition 65: WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
Traces of ethylene oxide, propylene oxide and dioxane.

16. OTHER INFORMATION

Estimated NFPA(R) Code:
- Health Hazard: 1
- Fire Hazard: 1
- Reactivity Hazard: 0
- Specific Hazard: No water

Estimated HMIS(R) Code:
- Health Hazard: 1
- Flammability Hazard: 1
- Reactivity Hazards: 0
- Personal Protection: See Section 8.

NFPA is a registered trademark of the National Fire Protection Assn.
HMIS is a registered trademark of the National Paint and Coatings Assn.

Rec. 8/7/00

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: FLANGE SEALANT 509 300ML CQ
Item No.: 21525
Product Type: Anaerobic Adhesive

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
Urethane Methacrylate Resin	Proprietary	55-60
Substituted hydroxyalkyl methacrylate	Proprietary	20-25
Poly(ethylene)	9002-88-4	15-20
SILICA, AMORPHOUS, FUMED, CRYSTALLINE-FREE	112945-52-5	1-3
Polyglycol dimethacrylate	25852-47-5	1-3
1-Acetyl-2-phenylhydrazine	114-83-0	0.1-1
CUMENE HYDROPEROXIDE*	80-15-9	0.1-1
SACCHARIN	81-07-2	0.1-1

* This component is listed as a SARA Section 313 Toxic Chemical.

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
SILICA, AMORPHOUS, FUMED, CRYSTALLINE-FREE	10 mg/m3 TWA	6 mg/m3 TWA	3 mg/m3 TWA resp. dust
CUMENE HYDROPEROXIDE	None	None	1ppm(6mg/m3) Skin(WEEL)

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: Possible mild eye irritant.
Primary Routes of Entry: None known
Signs and Symptoms of Exposure: May cause dermatitis on prolonged contact with sensitive individuals.
Existing Conditions Aggravated by Exposure: None known

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. Keep individual calm. Obtain medical attention.
Inhalation: Does not apply
Skin Contact: Wash with soap and water.
Eye Contact: Flush at least 15 minutes with water.

Product Name: FLANGE SEALANT 509 300ML CQ
Item No.: 21525

5. FIRE FIGHTING MEASURES

Flash Point:	More than 200°F Method: Tag Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Not available
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Soak up with an inert absorbent. Store in partly filled, closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage:	Store below 100°F
(Contact Loctite Customer	Service 1-800-243-4874 for shelf life information)
Handling:	Avoid prolonged skin contact. Keep away from eyes.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Rubber or plastic gloves.
Ventilation:	Does not apply
Respiratory	Not available
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Blue liquid
Odor:	Mild
Boiling Point:	More than 300°F
pH:	Does not apply
Solubility in Water:	Slight
Specific Gravity	1.12
Volatile Organic Compound (EPA Method 24)	12.88%; 131.4 grams per liter
Vapor Pressure:	Less than 5mm
Vapor Density:	Not available
Evaporation Rate (Ether = 1)	Not available

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	None
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	None

11. TOXICOLOGICAL INFORMATION

Estimated oral LD50 more than 5000 mg/kg.
Estimated dermal LD50 more than 2000 mg/kg.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal:	Incinerate following EPA and local regulations.
EPA Hazardous Waste Number	NH - Not a RCRA Hazardous Waste Material

14. TRANSPORTATION INFORMATION

HARDENER	Proprietary	1-5
Carbitol acetate	112-15-2	1-5

* This component is listed as a SARA Section 313 Toxic Chemical.

The following numbers have been used to register components of this product as trade secrets for the State of New Jersey:
NJ 06-070-1067-5041P
NJ 06-070-1067-5042P
NJ 06-070-1067-5090P
NJ 06-070-1067-5091P
NJ 06-070-1067-5092P

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
SILVER	0.1 mg/m3 TWA	0.01mg/m3 TWA	None

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: May irritate eyes, skin, and gastrointestinal tract. Prolonged or repeated exposure may cause allergic skin reaction. Prolonged expoxure to silver may cause argyria which is a pigmentation of skin and other body tissue.

Primary Routes of Entry: Inhalation, ingestion, eyes, skin.

Signs and Symptoms of Exposure: Inhalation may produce allergic reactions in some individuals. Ingestion may cause gastrointestinal irritation, nausea, vomiting, and diarrhea. Eye contact may cause severe irritation, burning sensation, blurred vision. Skin contact may produce allergic reaction in some individuals.

Existing Conditions Aggravated by Exposure: None known

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. Keep individual calm. Seek medical attention immediately.

Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.

Skin Contact: Remove contaminated clothing, wash immediately

	with soap and water. Wash contaminated clothing thoroughly before reuse. If irritation persists, obtain medical attention.
Eye Contact:	Flush thoroughly with water. If irritation persists, obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point:	More than 200°F Method:Pensky-Martens Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Use self-contained breathing supply.
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Take up with an inert absorbent. Store in a closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage:	Store below 80°F. Refrigerated storage (-40°F) is recommended to extend shelf life
(Contact Loctite Customer	Service 1-800-243-4874 for shelf life information)
Handling:	Avoid prolonged skin contact. Keep away from eyes. Avoid prolonged inhalation of mists or vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Wear chemical splash goggles.
Skin:	Wear solvent resistant gloves.
Ventilation:	Provide sufficient local exhaust ventilation to maintain exposure below TLV(s).
Respiratory	If the TLV of the product is exceeded, a mechanical or self contained breathing appartus is advised.
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Silver liquid\paste
Odor:	Faint epoxy
Boiling Point:	More than 300°F
pH:	Does not apply
Solubility in Water:	Not available
Specific Gravity	2.44
Volatile Organic Compound (EPA Method 24)	3.04 %; 74.26 grams/liter
Vapor Pressure:	Not available
Vapor Density:	Not available
Evaporation Rate (Ether = 1)	Not available

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	Strong oxidizers
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	Amines, aldehydes

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

Product Name: 3880 Adhesive Electrically Conductive
Item No.: 30077

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal:	Do not landfill. Dispose of commercial material and empty containers through a licensed/permitted disposal contractor.
EPA Hazardous Waste Number	D011 / TCLP hazardous when disposed of per 40 CFR 261.24 (Silver).

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)

Methyl ethyl ketoxime	None	None	3 ppm TWA 10 ppm STEL

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: Skin and eye irritant. Moderately toxic ingestion.
When heated to temperatures above 300°F (150°C) in the presence of air, this product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard and a known skin and respiratory sensitizer. Vapors irritate eyes, nose and throat. Safe handling conditions may be maintained by keeping vapor concentrations below the OSHA permissible limit for formaldehyde.

Primary Routes of Entry: Skin, ingestion, inhalation.

Signs and Symptoms of Exposure: Methyl ethyl ketoxime produced during cure is toxic and irritates eyes, nose and throat.

Existing Conditions Aggravated by Exposure: None known

Product Type: Anaerobic

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
Polyurethane methacrylate resin	Proprietary	65-70
Aromatic dimethacrylate ester	24448-20-2	5-10
Hydroxyalkyl methacrylate	868-77-9	5-10
SILICA, AMORPHOUS, FUMED, CRYSTALLINE-FREE	112945-52-5	5-10
ACRYLIC ACID*	79-10-7	5-7
CUMENE HYDROPEROXIDE*	80-15-9	1-3
1-Acetyl-2-phenylhydrazine	114-83-0	0.1-1
SACCHARIN	81-07-2	0.1-1

* This component is listed as a SARA Section 313 Toxic Chemical.

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
Hydroxyalkyl methacrylate	None	None	3 ppm ceiling
SILICA, AMORPHOUS, FUMED, CRYSTALLINE-FREE	10 mg/m3 TWA	6 mg/m3 TWA	3 mg/m3 TWA resp. dust
ACRYLIC ACID	2 ppm TWA skin 5.9 mg/m3 skin	10 ppm TWA skin 30 mg/m3 skin	1 ppm TWA skin 3 ppm STEL skin
CUMENE HYDROPEROXIDE	None	None	1ppm(6mg/m3) Skin(WEEL)

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: Liquid is an eye and skin irritant.
Vapors may irritate eye, nose and throat.
Estimated oral LD50 more than 5000 mg/kg.
Estimated dermal LD50 more than 2000 mg/kg.

Primary Routes of Entry: None known

Signs and Symptoms of Exposure: Irritation of eyes, skin , nose or throat. May cause dermatitis on,prolonged contact in sensitive individuals.

Existing Conditions Aggravated by Exposure: Acrylic acid: Upper respiratory and lung diseases, dermatitis

Product Name: 300ML HIGH TEMP FLANGE SLT
Item No.: 12666

4. FIRST AID MEASURES

Ingestion:	Do not induce vomiting. Keep individual calm. Obtain medical attention.
Inhalation:	Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact:	Wash with soap and water.
Eye Contact:	Flush at least 15 minutes with water. Obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point:	More than 200°F Method: Tag Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Not available
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors
Unusual Fire or Explosion Hazards:	None

Explosive Limits:

(% by volume in air)Lower	2.0%	Acrylic acid
(% by volume in air)Upper	8.0%	Acrylic acid

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Scrape up as much as possible and store in a half filled, closed container until disposal. Residues may be cleaned up with solvent.

7. HANDLING AND STORAGE

Safe Storage:	Store below 100°F
(Contact Loctite Customer	Service 1-800-243-4874 for shelf life information)
Handling:	Avoid prolonged skin contact. Keep away from eyes. Avoid prolonged breathing of vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Rubber or plastic gloves.
Ventilation:	Must be adequate to avoid exceeding TLV.
Respiratory	Not available

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Blue Gel
Odor:	Sharp
Boiling Point:	More than 300°F
pH:	Does not apply
Solubility in Water:	Low
Specific Gravity	1.1 at 80°F
Volatile Organic Compound (EPA Method 24)	Not available
Vapor Pressure:	Less than 5mm at 80°F
Vapor Density:	Not available
Evaporation Rate (Ether = 1)	Not available

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	None
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	None

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

Product Name: 300ML HIGH TEMP FLANGE SLT
Item No.: 12666

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Incinerate following EPA and local regulations.
EPA Hazardous Waste Number: NH - Not a RCRA Hazardous Waste Material

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)
Domestic Ground Transport
Proper Shipping Name: Unrestricted
Hazard Class or Division: Unrestricted
Identification Number: None
Marine Pollutant: None
IATA
Proper Shipping Name: Unrestricted
Class or Division: Unrestricted
UN or ID Number: None

15. REGULATORY INFORMATION

CA Proposition 65: *WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.*
Ethylene Oxide

This product contains Saccharin. No Prop65 hazard warning is necessary if this product is used as reasonably anticipated.

16. OTHER INFORMATION

Estimated NFPA(R) Code:
Health Hazard: 2
Fire Hazard: 1
Reactivity Hazard: 1
Specific Hazard: Does not apply

Estimated HMIS(R) Code:
Health Hazard: 2
Flammability Hazard: 1
Reactivity Hazards: 1
Personal Protection: See Section 8.

NFPA is a registered trademark of the National Fire Protection Assn.
HMIS is a registered trademark of the National Paint and Coatings Assn.

Loctite(R) ODC-Free Cleaner & Degreaser
20260

Tmc 128260

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Item No.: 20260
Product Type: Hydrocarbon blend

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
Hydrotreated heavy naphtha	64742-48-9	75-85
d-Limonene	5989-27-5	15-25

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
Hydrotreated heavy naphtha	5mg/m3 TWA mist	5mg/m3 TWA mist	400 ppm
d-Limonene	None	None	30 ppm

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)
Hydrotreated heavy naphtha	10 mg/m3 mist	None

3. HAZARDS IDENTIFICATION

Toxicity: High concentrations of vapors may be mildly irritating to lungs and mucous membranes of the nose and throat.
Vapors will irritate and may harm eyes.
Contact may defat skin.
Ingestion causes irritation and effects similar to inhalation. If swallowed, may be aspirated into the lungs resulting in inflamation and possible fluid accumulation.

Primary Routes of Entry: Inhalation, eye and skin contact.

Signs and Symptoms of Exposure: Inhalation: dizziness, excitation, headache, drowsiness, incoordination, and anesthesia.
Eye contact: tearing, swelling, irritation.
Skin contact: irritation, reddening, swelling, rash.
Ingestion: irritation, dizziness, excitation, drowsiness, incoordination, anesthesia, and headache.

3. HAZARDS IDENTIFICATION (continued)

Existing Conditions
Aggravated by Exposure: Skin disorders, asthma-like disorders

Ingredients	Literature Referenced Target Organ and Other Health Effects	Carcinogen NTP	IARC	OSHA
Hydrotreated heavy naphtha	NTO	NO	NO	NO
d-Limonene	IRR	NO	N/A	NO

Abbreviations

N/A Not Applicable
NTO No Target Organs
IRR Irritant

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting or give anything by mouth because this material can enter the lungs and cause severe lung damage. Get medical attention immediately.

Inhalation: Remove to fresh air. If victim experiences continued breathing difficulties, administer oxygen until medical assistance can be rendered. If breathing stops, begin artificial respiration and obtain immediate medical attention.

Skin Contact: Wash with soap and water. Remove contaminated clothing Obtain medical attention if irritation persists.

Eye Contact: Immediately flush at least 15 minutes with water. Obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point: 120°F Method: Tag Closed Cup

Recommended Extinguishing Agents: Carbon dioxide, foam, dry chemical (B-C)

Special Firefighting Procedures: The use of self contained breathing apparatus is recommeneded for fire fighters. Water may be unsuitable as an extingushing media, but helpful in keeping adjacent containers cool. Avoid spreading burning liquid with water used for cooling purposes.

Hazardous Products formed by Fire or Thermal Decomp: Oxides of carbon.

5. FIRE FIGHTING MEASURES (continued)

Unusual Fire or Explosion Hazards: Vapors are heavier than air and may travel along the ground or be moved by ventilation and ignited by heat, pilot lights, other flames and ignition sources at locations distant from material handling point. Never use welding or cutting torch on or near drums (even empty) because product or

residues can ignite explosively. Keep work areas free of hot metal surfaces and other sources of ignition.

Explosive Limits:
(% by volume in air)Lower 0.7%
(% by volume in air)Upper 4.4%

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak: Spilled liquid is combustible and can be ignited by heat, sparks, flames, or other sources of ignition. REmove all sources of ignition. Vapors are heavier than air and may travel along the ground or be moved by ventilation and ignited by heat, pilot lights, other flames and ignition sources at locations distant from material handling point. Keep sources of ignition and hot metal surfaces isolated from the spill. Maintain adequate ventilation. Do not allow liquid to enter sewers, storm drains, other unauthorized treatment facilities, and natural waterways. Use explosion-proof equipment. Absorb spilled liquid with inert material and place in a closed chemical waste container until disposal.

7. HANDLING AND STORAGE

Safe Storage: Do not store near fire, sparks, or flame. Do not puncture or incinerate container.

(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)

Handling: Use with adequate ventilation. Avoid prolonged skin contact. Keep away from eyes. Avoid breathing vapors. Do not use near heat, sparks, open flame or other sources of ignition. Keep out of the reach of children.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Safety glasses, chemical goggles, and/or face shields.

Skin: Impermeable nitrile gloves and aprons.

Ventilation: General mechanical ventilation may be sufficient to keep vapor/mist concentrations within specified time-weighted TLV ranges. If general ventilation proves inadequate to maintain safe vapor/mist concentrations, supplemental local exhaust may be required.

Respiratory NIOSH approved respirator if ventilation is inadequate.

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Slightly hazy liquid
Odor:	Citrus
Boiling Point:	310°F-410°F
pH:	Does not apply
Solubility in Water:	Insoluble
Specific Gravity	0.72-0.78
Volatile Organic Compound (EPA Method 24)	100%; 720-780 grams per liter
Vapor Pressure:	20.8 mm Hg at 72.5°F
Vapor Density:	Heavier than air
Evaporation Rate (Ether = 1)	Not available

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	Strong oxidizing agents, strong acids or bases, selected amines.
Conditions to Avoid:	Do not use or store near fire, sparks, or flame. Do not puncture or incinerate container. Exposure to temperatures above 120°F may cause container to burst.
Hazardous Decomposition Products (non-thermal):	Hydrocarbons

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal:	Incinerate following EPA and local regulations.

4. FIRST AID MEASURES

Ingestion: Give water to dilute. Do not induce vomiting. Keep individual calm. Obtain medical attention.

Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.

Skin Contact: Wash with soap and water.

Eye Contact: Flush with water for at least 15 minutes. Obtain medical attention.

Product Name: Tak Pak(R) 7452 Accelerator Metered Mist
Item No.: 18637

5. FIRE FIGHTING MEASURES

Flash Point:	144°F (Base) -165°F (Propellants)	Method: Tag Closed Cup Method: Open Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical	
Special Firefighting Procedures:	Not available	
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors	
Unusual Fire or Explosion Hazards:	Cans may explode in fires.	
Explosive Limits:		
(% by volume in air)Lower	1.2% N,N-Dialkyltoluidine 2.6% Acetone 1.8% Isobutane 2.1% Propane	
(% by volume in air)Upper	7% N,N-Dialkyltoluidine 13% Acetone 8.4% Isobutane 9.8% Propane	

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak: Avoid flame, sparks and other sources of ignition. Maintain adequate ventilation. Soak up in an inert absorbent. Store in a closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage: Store away from flame, sparks and other sources of ignition. Store below 100°F.

(Contact Loctite Customer Service 1-800-243-4874 for shelf Life information)

Handling: Avoid prolonged breathing of fumes. Avoid skin or eye contact. Do not use near heat, sparks, or open flame.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Rubber or plastic gloves.
Ventilation:	Sufficient to maintain vapor concentration below TLV.
Respiratory	Not available

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Clear to amber liquid
Odor:	Acetone
Boiling Point:	135°F (Base only)
pH:	Does not apply
Solubility in Water:	Miscible
Specific Gravity	0.7926 (Base only)
Volatile Organic Compound (EPA Method 24)	1.02%;808 grams per liter of material (Base only)
Vapor Pressure:	Approximately 180mm at 68°F (Base only)
Vapor Density:	Approximately 2 (Base only)
Evaporation Rate (Ether = 1)	1.9 (Base only)

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	Strong oxidizers
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	None

Product Name: Tak Pak(R) 7452 Accelerator Metered Mist
Item No.: 18637

III. CHEMICAL AND PHYSICAL PROPERTIES

Vapor Pressure:	Less than 5mm at 80°F
Vapor Density:	Not available
Solubility in Water:	Slight
Specific Gravity:	1.1 at 75°F
Boiling Point:	More than 300°F
Volatile Organic Compound (EPA Method 24)	13.3%; 146 grams per liter
Evaporation Rate (Ether = 1)	Not available
!:	Does not apply
Appearance:	Blue liquid
Odor:	Mild

IV. FLAMMABILITY AND EXPLOSIVE PROPERTIES

Flash Point:	More than 200°F Method: Tag Closed Cup
Estimated NFPA Code:	
Health Hazard:	1
Fire Hazard:	1
Reactivity Hazard:	1
Specific Hazard:	Does not apply
Estimated HMIS Code:	
Health Hazard:	1
Flammability Hazard:	1
Reactivity Hazard:	1
Personal Protection:	See Section X.
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Hazardous Products Formed by Fire or Thermal Decomp	Irritating organic vapors; oxides of carbon.
Unusual Fire or Explosion Hazards:	None
Compressed Gases:	None
Pressure at Room Temp.:	Does not apply

NOV 17 1995
THE MOREY CORP.

V. SPILL OR LEAK AND DISPOSAL PROCEDURES

Steps to be taken in case of spill or leak:	Soak up in an inert absorbent. Store in a partly filled, closed container until disposal.
:commended methods of disposal:	Incinerate following EPA and local regulations

Product Name: Removable Threadlocker 242
Item No.: 24231

VI. STORAGE AND HANDLING PROCEDURES

Safe Storage: Store below 100°F.
(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)
Handling: Avoid prolonged skin contact. Keep away from eyes.

VII. SHIPPING REGULATIONS

DOT (49 CFR 172)
Domestic Ground Transport
Proper Shipping Name: Unrestricted
Hazard Class or Division: Unrestricted
Identification Number: None
Marine Pollutant: None
IATA
Proper Shipping Name: Unrestricted
Class or Division: Unrestricted
UN or ID Number: None

VIII. REACTIVITY DATA

Stability: Stable
Hazardous Polymerization: Will not occur.
Hazardous Decomposition Products (non-thermal): None
Incompatability: None

IX. EMERGENCY TREATMENT PROCEDURES

Ingestion: Do not induce vomiting. Keep individual calm. Obtain medical attention
Inhalation: Does not apply
Skin Contact: Wash with soap and water
Eye Contact: Flush at least 15 minutes with water. Obtain medical attention.

X. PERSONAL PROTECTION

Eyes: Safety glasses or goggles
Skin: Neoprene, rubber, or butyl rubber gloves.
Ventilation: Does not apply

XI. HEALTH HAZARD DATA

Toxicity: Mild eye irritant
Oral LD50 more than 10000 mg/kg.
Dermal LD50 more than 5000 mg/kg.
Primary Routes of Entry: Eye, skin contact.
Signs and Symptoms of Exposure: May cause dermatitis on prolonged contact in sensitive individuals
Existing Conditions Aggravated by Exposure: None known

NOV 17 1995
THE MOREY CORP.

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER

MATERIAL SAFETY DATA SHEET

I. PRODUCT IDENTIFICATION THREADLOCKER 620

Product Name:	Retaining Compound 620 High Temperature
Item No.:	62040
Product Type:	Anaerobic

II. COMPOSITION

Ingredients	CAS No.	%
Aromatic dimethacrylate ester	24448-20-2	75-80
Maleimide resin	3006-93-7	10-15
CUMENE HYDROPEROXIDE*	80-15-9	1-3
Hydroxyalkyl methacrylate	27813-02-1	1-3
METHYL ALCOHOL*	67-56-1	1-3
SILICA, AMORPHOUS TREATED	112945-52-5	1-3
1-Acetyl-2-phenylhydrazine	114-83-0	0.1-1
N,N-Dialkyltoluidines	613-48-9	0.1-1
MALEIC ACID	110-16-7	0.1-1
SACCHARIN	81-07-2	0.1-1

* This component is listed as a SARA Section 313 Toxic Chemical.

III. CHEMICAL AND PHYSICAL PROPERTIES

Vapor Pressure:	Less than 5mm at 80°F
Vapor Density:	Not available
Solubility in Water:	Slight
Specific Gravity:	1.1 at 80°F
Boiling Point:	More than 300°F
Volatile Organic Compound (VOC) Content:	0.10, 01.1 g/... g/... 1:1...
Evaporation Rate (Ether = 1)	Not available
pH:	Does not apply
Appearance:	Green liquid
Odor:	Mild

IV. FLAMMABILITY AND EXPLOSIVE PROPERTIES

Flash Point:	More than 200°F Method: Tag Closed Cup
Estimated NFPA Code:

Exposure Limits (STEL) gredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: May be harmful if swallowed. Eye, skin, and inhalation irritant. Possible sensitizer.

Primary Routes of Entry: Dermal, eye contact, skin absorbtion.

Signs and symptoms of Exposure: Irritation of eyes, skin, or respiratory tract. This irritation may be delayed up to two days. Ingestion may cause nausea, abdominal discomfort, vomiting, or diarrhea.

Existing Conditions Aggravated by Exposure: Eczema and other skin allergies, asthma and other respiratory disorders; systemic diseases.

Inhalation:	Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact:	Wash with soap and water.
Eye Contact:	Flush at least 15 minutes with water. Obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point:	More than 200°F Method: Tag Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Hazardous Products formed by Fire or Thermal Decomp	Oxides of carbon and nitrogen.
Unusual Fire or Explosion Hazards:	Uncontrolled polymerization may occur at high temperatures resulting in explosions or rupturing of storage containers.
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Spontaneous hazardous polymerization may occur. Eliminate sources of ignition. Use eye and skin protection. Maintain adequate ventilation. Soak up with an inert absorbent. Store in a half filled, closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage:	Store between 50°F and 90°F.
(Contact Loctite Customer	Service 1-800-243-4874 for shelf Life information)
Handling:	Avoid eye and skin contact. Avoid breathing vapors. Do not use near sources of ignition.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Chemical splash safety goggles conforming to ANSI 287.1 - 1990.
Skin:	Neoprene gloves.
Ventilation:	Sufficient to maintain vapor concentration below TLV.
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: Severe eye irritant. Skin, inhalation, and ingestion irritant. Possible sensitizer. Toxic by ingestion and inhalation.

Primary Routes of Entry: N-Vinyl-2-pyrrolidinone: Absorbtion or contact.

Signs and Symptoms of Exposure: Skin contact: May cause allergenic response in sensitive individuals; nausea, vomiting, convulsions.
Inhalation of high concentrations: Headache, nausea, dizziness, narcosis, pallor, lack of coordination, stupor.
Ingestion: Nausea, vomiting, diarrhea.
Eye contact: Burning, stinging, watering, inflammation.

Existing Conditions Aggravated by Exposure: None known

3. HAZARDS IDENTIFICATION

Toxicity: Contact may injure eyes, skin or respiratory tract Eye, skin, and inhalation irritant. Possible sensitizer. Moderately toxic by ingestion. Tests have indicated that the triacrylate ester may cause lymphoma in mice. Breathing heated vapors may cause nausea, dizziness, or respiratory irritation resulting in severe or permanent allergic respiratory reaction.

Primary Routes of Entry: Eyes, skin.

Signs and Symptoms of Exposure: Irritation of eyes, skin, or respiratory tract.

Existing Conditions Aggravated by Exposure: Skin, eye, lung, and systemic diseases.

4. FIRST AID MEASURES

Ingestion:	Do not induce vomiting. Keep individual calm. Obtain medical attention.
Inhalation:	Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact:	Wash with soap and water.
Eye Contact:	Flush at least 15 minutes with water. Obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point:	189°F Method: Tag Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Not available
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors; oxides of carbon and nitrogen.
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Remove sources of ignition. Maintain adequate ventilation. Soak up with an inert absorbent. Store in partly filled, closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage:	Store below 100°F away from sources of ignition.
(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)	
Handling:	Avoid prolonged skin contact. Keep away from eyes. Avoid breathing vapors. Keep away from sources of ignition.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Rubber or plastic gloves.
Ventilation:	Local, explosion-proof exhaust ventilation should be used.
Respiratory	Not available

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Clear, water-white liquid
Odor:	Mild ester and amine
Boiling Point:	More than 300°F

INFORMATION FOR FIRST AID AND CASUALTY ON TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT
Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present a health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags, or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

SKIN ADHESION
First immerse the bonded surfaces in warm, soapy water. Peel or roll the surfaces apart with the aid of a blunt edge, e.g. a spatula or a teaspoon handle; then remove adhesive from the skin with soap and water. Do not try to pull surfaces apart with a direct opposing action.

EYELID TO EYELID OR EYEBALL ADHESION
In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL
Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH
If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

NOV 17 1995
THE MOREY CORP.

BURNS
Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn. Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY
It should never be necessary to use such a drastic method to separate accidentally bonded skin

In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL
Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH
If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

BURNS
Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn.
Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY
It should never be necessary to use such a drastic method to separate accidentally bonded skin.

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. Keep individual calm. Obtain medical attention.

Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.

Skin Contact: Wash with soap and water.

Eye Contact: Flush at least 15 minutes with water. Obtain medical attention.

Product Name: Loctite(R) 712 Accelerator Tak Pak(R)
Item No.: 20352

5. FIRE FIGHTING MEASURES

Flash Point:	53°F Method: Tag closed cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Not available
Hazardous Products formed by Fire or Thermal Decomp	Oxides of carbon
Unusual Fire or Explosion Hazards:	Distant ignition sources may ignite vapors traveling with moving air currents.
Explosive Limits: (% by volume in air) Lower	2.0% Isopropyl alcohol 1.2% Dialkyl toluidine
(% by volume in air) Upper	12.7% isopropyl alcohol at 200°F 7% Dialkyltoluidine

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Remove sources of ignition. Allow to evaporate with good ventilation.

7. HANDLING AND STORAGE

Safe Storage:	Store below 110°F away from sources of ignition.
(Contact Loctite Customer	Service 1-800-243-4874 for shelf Life information)
Handling:	Avoid prolonged breathing of vapor. Keep away from eyes. Avoid prolonged skin contact.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Rubber or plastic gloves.
Ventilation:	Provide adequate local ventilation to maintain vapor concentration below TLV.
Respiratory	Not available

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Clear liquid
Odor:	Alcoholic
Boiling Point:	180°F
pH:	Does not apply
Solubility in Water:	95-100%
Specific Gravity	0.79
Volatile Organic Compound (EPA Method 24)	99.9%; 789 grams/liter
Vapor Pressure:	33 mm at 70°F
Vapor Density:	2.1
Evaporation Rate (Ether = 1)	7.7

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	Strong oxidizing agents, aluminum, nitric acid, sulfuric acid, amines, ammonia, halogen acids and chlorides, aldehydes
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	None

INFORMATION FOR FIRST AID AND CASUALTY ON TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT: Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present a health hazard even when bonded to the skin. Avoid contact with clothes, fabrics, rags, or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of

adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

SKIN ADHESION: First immerse the bonded surfaces in warm, soapy water. Peel or roll the surfaces apart with the aid of a blunt edge, e.g. a spatula or a teaspoon handle; then remove adhesive from the skin with soap and water. Do not try to pull surfaces apart with a direct opposing action.

EYELID TO EYELID OR EYEBALL ADHESION: In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL: Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH: If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

BURNS: Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn. Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY: It should never be necessary to use such a drastic method to separate accidentally bonded skin.

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: May irritate eyes, skin, and gastrointestinal tract. Prolonged or repeated exposure may cause allergic skin reaction. Prolonged expoxure to silver may cause argyria which is a pigmentation of skin and other body tissue.

Primary Routes of Entry: Inhalation, ingestion, eyes, skin.

Signs and Symptoms of Exposure: Inhalation may produce allergic reactions in some individuals. Ingestion may cause gastrointestinal irritation, nausea, vomiting, and diarrhea. Eye contact may cause severe irritation, burning sensation, blurred vision. Skin contact may produce allergic reaction in some individuals.

Existing Conditions Aggravated by Exposure: None known

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. Keep individual calm. Seek medical attention immediately.

Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.

Skin Contact: Remove contaminated clothing, wash immediately

	with soap and water. Wash contaminated clothing thoroughly before reuse. If irritation persists, obtain medical attention.
Eye Contact:	Flush thoroughly with water. If irritation persists, obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point:	More than 200°F Method:Pensky-Martens Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Use self-contained breathing supply.
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Take up with an inert absorbent. Store in a closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage:	Store below 80°F. Refrigerated storage (-40°F) is recommended to extend shelf life
(Contact Loctite Customer Handling:	Service 1-800-243-4874 for shelf life information) Avoid prolonged skin contact. Keep away from eyes. Avoid prolonged inhalation of mists or vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Wear chemical splash goggles.
Skin:	Wear solvent resistant gloves.
Ventilation:	Provide sufficient local exhaust ventilation to maintain exposure below TLV(s).
Respiratory	If the TLV of the product is exceeded, a mechanical or self contained breathing appartus is advised.
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Silver liquid\paste

Revision Date: January 27, 1999 Revision: 0005

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: Loctite(R) 509 Gasket Eliminator(R) Flange Sealant
Item No.: 21525
Product Type: Anaerobic Adhesive

2. COMPOSITION, INFORMATION ON INGREDIENTS

Rec. 12/4/00 SDF

Ingredients	CAS No.	%
Urethane Methacrylate Resin	Proprietary	55-60
Substituted hydroxyalkyl methacrylate	Proprietary	20-25
Poly(ethylene)	9002-88-4	15-20
SILICA, AMORPHOUS, FUMED, CRYSTALLINE-FREE	112945-52-5	1-3
Polyglycol dimethacrylate	25852-47-5	1-3
1-Acetyl-2-phenylhydrazine	114-83-0	0.1-1
CUMENE HYDROPEROXIDE*	80-15-9	0.1-1
SACCHARIN	81-07-2	0.1-1

* This component is listed as a SARA Section 313 Toxic Chemical.

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
SILICA, AMORPHOUS, FUMED, CRYSTALLINE-FREE	10 mg/m3 TWA	6 mg/m3 TWA	3 mg/m3 TWA resp. dust
CUMENE HYDROPEROXIDE	None	None	1ppm(6mg/m3) Skin(WEEL)

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: Possible mild eye irritant.
Primary Routes of Entry: None known
Signs and Symptoms of Exposure: May cause dermatitis on prolonged contact with sensitive individuals.
Existing Conditions Aggravated by Exposure: None known

Ingredients	Literature Referenced Target Organ and Other Health Effects	Carcinogen NTP	IARC	OSHA

NUI Nuisance dust	SOM Evidence of some carcinogenicity

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. Keep individual calm. Obtain medical attention.
Inhalation: Does not apply
Skin Contact: Wash with soap and water.
Eye Contact: Flush at least 15 minutes with water.

Product Name: Loctite(R) 509 Gasket Eliminator(R) Flange Sealant
Item No.: 21525

5. FIRE FIGHTING MEASURES

Flash Point:	More than 200°F Method: Tag Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Not available
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Soak up with an inert absorbent. Store in partly filled, closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage:	Store below 100°F
(Contact Loctite Customer	Service 1-800-243-4874 for shelf life information)
Handling:	Avoid prolonged skin contact. Keep away from eyes.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Rubber or plastic gloves.
Ventilation:	Does not apply
Respiratory	Not available

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Blue liquid
Odor:	Mild
Boiling Point:	More than 300°F
pH:	Does not apply
Solubility in Water:	Slight
Specific Gravity	1.12
Volatile Organic Compound (EPA Method 24)	12.88%; 131.4 grams per liter
Vapor Pressure:	Less than 5mm
Vapor Density:	Not available
Evaporation Rate (Ether = 1)	Not available

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	None
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	None

11. TOXICOLOGICAL INFORMATION

Estimated oral LD50 more than 5000 mg/kg.
Estimated dermal LD50 more than 2000 mg/kg.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal:	Incinerate following EPA and local regulations.
EPA Hazardous Waste Number	NH - Not a RCRA Hazardous Waste Material

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172) Domestic Ground Transport Proper Shipping Name:	Unrestricted

Product Name: Loctite(R) 509 Gasket Eliminator(R) Flange Sealant
Item No.: 21525

Hazard Class or Division: Unrestricted
Identification Number: None
Marine Pollutant: None

IATA
Proper Shipping Name: Unrestricted
Class or Division: Unrestricted
UN or ID Number: None

15. REGULATORY INFORMATION

CA Proposition 65: WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
Ethylene Oxide

This product contains Saccharin. No Prop65 hazard warning is necessary if this product is used as reasonably anticipated.

16. OTHER INFORMATION

Estimated NFPA(R) Code:
Health Hazard: 1
Fire Hazard: 1
Reactivity Hazard: 1
Specific Hazard: Does not apply

Estimated HMIS(R) Code:
Health Hazard: 1*
Flammability Hazard: 1
Reactivity Hazards: 1
Personal Protection: See Section 8.

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: Output(TM) 3151 Thermally Conductive Adh.
Item No.: 18843
Product Type: UV/Heat Cure

Sample for Cat MSS

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
Aluminum hydroxide, hydrated	21645-51-2	65-70
Polyurethane methacrylate resin	Proprietary	15-20
Hydroxyalkyl methacrylate	868-77-9	5-10
Hydroxyalkyl methacrylate	27813-02-1	1-3
METHACRYLIC ACID	79-41-4	1-3
ACRYLIC ACID*	79-10-7	0.1-1
tert-BUTYL PEROXYBENZOATE	614-45-9	0.1-1
Dyed melamine resin	39277-28-6	0.1-1
Photoinitiator	24650-42-8	0.1-1
SACCHARIN	81-07-2	0.1-1
Glass	65997-17-3	0.1-1
Substituted silane	2530-85-0	0.1-1

* This component is listed as a SARA Section 313 Toxic Chemical.

The polyurethane methacrylate resin is registered with the state of New Jersey as a trade secret: NJ TSRN 06-070-1067-5068P.

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
Aluminum hydroxide, hydrated	10 mg/m3 dust	15 mg/m3 dust 5 mg/m3 respir.	None

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: Liquid is an eye and skin irritant. Eye irritation may be severe. Vapors may irritate eye, nose and throat. May be harmful if swallowed. May cause kidney or liver damage.

Primary Routes of Entry: Skin and eye contact, inhalation, dermal absorbtion.

Signs and Symptoms of Exposure: Irritation of eyes, skin, nose or throat. May cause severe dermatitis on prolonged contact in sensitive individuals.

Existing Conditions Aggravated by Exposure: Acrylic acid: Upper respiratory and lung diseases, dermatitis

Explosive Limits:

(% by volume in air)Lower	2.0% Acrylic acid
(% by volume in air)Upper	8.0% Acrylic acid

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Maintain adequate ventilation. Soak up in an inert absorbent. Store in a partly filled, closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage:	Store below 90°F. Avoid exposure to light.
(Contact Loctite Customer	Service 1-800-243-4874 for shelf life information)
Handling:	Avoid prolonged skin contact. Keep away from eyes. Avoid prolonged breathing of vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Rubber or plastic gloves.
Ventilation:	Sufficient to maintain vapor concentration below TLV.
Respiratory	NIOSH/MSHA approved respirator if ventilation is inadequate.

See Section 2 for Exposure Limits.

Product Name: Output(TM) 3151 Thermally Conductive Adh.
Item No.: 18843

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Pink liquid
Odor:	Sharp, irritating
Boiling Point:	More than 300°F
pH:	Does not apply
Solubility in Water:.	Slight
Specific Gravity	1.8

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. Keep individual calm. Obtain medical attention.

Inhalation: Remove to fresh air. If symptoms persist, obtain

Product Name: LOW BREAKLOOSE PST 250ML TUBE
Item No.: 11415

medical attention.
Skin Contact: Flush with water.
Eye Contact: Flush with water.

5. FIRE FIGHTING MEASURES

Flash Point: More than 200°F Method: Tag Closed Cup
Recommended Extinguishing Agents: Carbon dioxide, foam, dry chemical
Special Firefighting Procedures: Not available
Hazardous Products formed by Fire or Thermal Decomp Toxic fluorides.
Unusual Fire or Explosion Hazards: None

Explosive Limits:
(% by volume in air)Lower 0.75% at 187°C Diethyl phthalate
(% by volume in air)Upper Decomposes Diethyl phthalate

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak: Soak up with an inert absorbent. Store in partly filled, closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage: Store below 100 deg. F
(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)
Handling: Avoid prolonged skin contact. Do not use for prolonged periods in confined area without adaquate ventilation.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Safety glasses or goggles recommended.
Skin: Rubber or plastic gloves recommended.
Ventilation: Local ventilation recommended for prolonged use.
Respiratory Not available

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: White Paste
Odor: Mild
Boiling Point: Greater than 300°F
pH: Does not apply
Solubility in Water: Slight
Specific Gravity 1.32 at 72°F
Volatile Organic Compound (EPA Method 24) Not available
Vapor Pressure: Less than 10mm at 80°F
Vapor Density: Not available
Evaporation Rate (Ether = 1) Not Available

10. STABILITY AND REACTIVITY

Stability: Stable
Hazardous Polymerization: Will not occur
Incompatibility: None
Conditions to Avoid: Not available
Hazardous Decomposition Products (non-thermal): None

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

MOR 001028

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Incinerate following EPA and local regulations.
EPA Hazardous Waste Number U088 - Hazardous waste per 40CFR 261.11(3)/ Diethyl Phthalate

Product Name: LOW BREAKLOOSE PST 250ML TUBE
Item No.: 11415

CHEMTRONICS® INC.

MSDS #0707L

Static Free Hand Guard Lotion.

SECTION 1: CHEMICAL PRODUCT AND COMPANY INFORMATION

Company Address:
8125 Cobb Center Drive
Kennesaw, GA 30152

Product Information: 800-TECH-401 | Emergency: (Chemtrec) 800-424-9300
Customer Service: 800-645-5244 | Revision Date: October 6, 1997

Product Identification

STATIC FREE™ HAND GUARD™ (Liquid)
(Formerly Hand Guard)

Product Code: C105, C805

SECTION 2: COMPOSITION, INFORMATION ON INGREDIENTS

Chemical Name	CAS#	Wt. % Range
Deionized Water	7732-18-5	80.00-85.00
Stearic Acid	57-11-4	6.00-10.00
Isopropyl Palmitate	142-91-6	1.00-5.00
Propylene Glycol	57-55-6	1.00-4.00
Glyceral Stearate	31566-31-1	1.00-3.00

SECTION 3: HAZARD IDENTIFICATION

Emergency Overview: Opaque, off-white cream. Nontoxic and nonhazardous. This product is not flammable.

Potential Health Effects:
Eyes: May cause slight irritation with prolonged contact.
Skin: No acute or chronic effects from contact expected.
Ingestion: May cause slight stomach upset if ingested in large quantities.
Inhalation: No acute or chronic effects expected from prolonged contact.

Pre-Existing Medical Conditions Aggravated by Exposure: None known.

SECTION 4: FIRST AID MEASURES

Eyes: Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Have eyes examined and tested by medical personnel if irritation develops or persists.
Skin: No acute chronic effects expected from prolonged contact.
Ingestion: Swallowing less than an ounce will not cause significant harm. For larger amounts, DO NOT induce vomiting, but give one or two glasses of water to drink and get medical attention.
Inhalation: No acute or chronic effects expected from prolonged contact.

SECTION 5: FIRE FIGHTING MEASURES

Flash Point: None | LEL/UEL: Not established (% by volume in air)
Extinguishing Media: Alcohol foam, carbon dioxide, or water spray are compatible when fighting fires in proximity to this material.
Fire Fighting Instructions: As in any fire, wear self-contained breathing apparatus (pressure-demand, (MSHA/NIOSH approved or equivalent) and full protective gear.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Scrape up spilled product and place in waste container for proper disposal.

SECTION 7: HANDLING AND STORAGE INFORMATION

Special precautions are usually not required. Protect from freezing.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

No published data are available on the exposure guidelines for the ingredients of this product.
Work/Hygienic Practices: Special precautions are usually not required.

SECTION 10: STABILITY AND REACTIVITY

Stability: This product is stable.

Conditions to Avoid: None known.

Incompatibility: Strong oxidizing agents, acids or bases.

Products of Decomposition: Thermal decomposition may release carbon monoxide, carbon dioxide and incompletely burned hydrocarbons.

Hazardous Polymerization: Will not occur.

Conditions to Avoid: NA

SECTION 11: TOXICOLOGICAL INFORMATION

Inhalation:
No signs or symptoms indicative of an adverse health effect are with this product.

Ingestion:
No signs or symptoms indicative of toxicity expected on contact are expected.

Skin: No irritation expected.

Cancer Information: No ingredients listed as human carcinogens by NTP or IARC

SECTION 12: ECOLOGICAL INFORMATION

Environmental Impact Information

No other information is available.

SECTION 13: DISPOSAL CONSIDERATIONS

Dispose of in accordance with all federal, state and local regulations.

SECTION 14: TRANSPORTATION INFORMATION - This product is not currently regulated under IATA or DOT.

SECTION 15: REGULATORY INFORMATION

SECTION 313 SUPPLIER NOTIFICATION

Product does not contain any Section 313 listed chemicals.

SECTION 16: OTHER INFORMATION

Do not puncture or incinerate containers. Normal ventilation for standard manufacturing practices is usually adequate.

To the best of our knowledge, the information contained herein is accurate. However, all materials may present unknown hazards and should be used with caution. In particular, improper use of our products and their inappropriate combination with other products and substances may produce harmful results which cannot be anticipated. Final determination of the suitability of any material is the sole responsibility of the user. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that may exist.

LUBRIPLATE®

MATERIAL SAFETY DATA SHEET

Section 1

PRODUCT NAME OR NUMBER
LUBRIPLATE DS-ES

FORMULA
Lithium Soap, Mineral Oil and Additives

GENERIC/CHEMICAL NAME:
Petroleum Lubricating Grease

USDA AUTHORIZATION:
H-2

Manufacturer's Name
Fiske Brothers Refining Co.

Emergency Telephone Number
1-800-255-3924 - CHEM-TEL (24 hour)

Address
1500 Oakdale Ave., Toledo, Ohio 43605 - 129 Lockwood St., Newark, NJ 07105

Telephone Number for Information
419-691-2491 - Toledo Office

Section 2 - Hazardous Ingredients/Identity Information

Hazardous Components	OSHA PEL	ACGIH TLV	Other Limits Recommended	% (optional)
Non-hazardous				

Hazardous Material Identification System (HMIS): Health - 1, Flammability - 1, Reactivity - 0
Not a Controlled Product under (WHMIS) - Canada **Special Protection: See Section 9**

Section 3 - Health Hazard Data

Threshold Limit Value 5 mg/m^3 for oil mist in air. OSHA Regulation 29 CFR 1910.1000

Effects of Overexposure Prolonged or repeated skin contact may cause skin irritation. Product contacting the eyes may cause eye irritation. Human health risks vary from person to person. As a precaution, exposure to liquids, vapors, mists and fumes should be minimized. This product has a low order of acute oral toxicity, but minute amounts aspirated into the lungs during ingestion may cause mild to severe pulmonary injury.

Carcinogenicity: NTP? No IARC Monographs? No OSHA Regulated? No

Section 4 - Emergency and First Aid Procedures

EYE CONTACT: Flush with clear water for 15 minutes or until irritation subsides. If irritation persists, consult a physician.

SKIN CONTACT: Remove any contaminated clothing and wash with soap and warm water. If injected by high pressure under skin, regardless of the appearance or its size, contact a physician IMMEDIATELY. Delay may cause loss of affected part of the body.

INHALATION: Vapor pressure is very low and inhalation at room temperature is not a problem. If overcome by vapor from hot product, immediately remove from exposure and call a physician.

INGESTION: If ingested, call a physician immediately. Do not induce vomiting.

Section 5 - Fire and Explosion Hazard Data

Flash Point (Method Used)	COC - 425°F **Flammable Limits** LEL 0.9% UEL 7.0%
Extinguishing Media	Foam, Dry Chemical, Carbon Dioxide or Water Spray (Fog)
Special Fire Fighting Procedures	Cool exposed containers with water. Use air-supplied breathing equipment for enclosed or confined spaces.
Unusual Fire and Explosion Hazards	Do not store or mix with strong oxidants. Empty containers retain residue. Do not cut, drill, grind, or weld, as they may explode.

PRODUCT NAME OR NUMBER - LUBRIPLATE DS-ES

Section 6 - Physical/Chemical Characteristics

Boiling Point	>550°F	**Specific Gravity (H_2O = 1)**	0.91
Vapor Pressure (mm Hg.)	<0.01	**Melting Point**	Semi-solid
Vapor Density (AIR = 1)	>5	**Evaporation Rate (Butyl Acetate = 1)**	<0.01
Solubility in Water	Negligible		
Appearance and Odor	Off-white grease with mineral oil odor.		

Section 7 - Reactivity Data

Stability Unstable / Stable X — **Conditions to Avoid** N/A

Incompatibility (Materials to Avoid) Avoid contact with strong oxidants like liquid chlorine, concentrated oxygen.

Hazardous Decomposition or Byproducts May form SO_2. If incomplete combustion, Carbon Monoxide.

Hazardous Polymerization May Occur / Will Not Occur X — **Conditions to Avoid** N/A

Section 8 - Spill or Leak Procedures

Steps to be taken in case material is released or spilled
Scrape up grease, wash remainder with suitable petroleum solvent or add absorbent. Keep petroleum products out of sewers and water courses. Advise authorities if product has entered or may enter sewers and water courses.

Waste disposal method
Assure conformity with applicable disposal regulations. Dispose of absorbed material at an approved waste disposal facility or site.

SARA/TITLE III, Section 313 Status - Zinc Compounds - <5%

Section 9 - Special Protection Information

Respiratory Protection (Specify type) Normally not needed

Ventilation Local Exhaust — Used to capture fumes and vapors — **Special** N/A
Mechanical (General) — **Other** N/A

Protective Gloves Use oil-resistant gloves, if needed. **Eye Protection** If chance of eye contact, wear goggles.

Other Protective Equipment Use oil-resistant apron, if needed.

Section 10 - Special Precautions

Precautions to be taken in handling and storing
Keep containers closed when not in use. Do not handle or store near heat, sparks, flame, or strong oxidants.

Other Precautions
Remove oil-soaked clothing and launder before reuse. Cleanse skin thoroughly after contact.

The above information is furnished without warranty, expressed or implied, except that it is accurate to the best knowledge of Fiske Brothers Refining Company. The data on these sheets relates only to the specific material designated herein. Fiske Brothers Refining Company assumes no legal responsibility for use or reliance upon this data.

LUBRIPLATE DS-ES LUBRICANT

LUBRIPLATE DS-ES Lubricant is developed specifically for the electrical and electronics industry. LUBRIPLATE DS-ES Lubricant is being used extensively in automotive switches and contact units where performance is exceeding all of the new safety standards set for this equipment.

LUBRIPLATE DS-ES Lubricant is also highly recommended as a bearing lubricant for electrical motors, spindles and other mechanical devices where low torque, high speeds and long life are essential. Due to the aniline point of this product, seal compatibility is excellent.

LUBRIPLATE DS-ES Lubricant is recommended in the Automotive Industry by these specifications or part numbers:

Chrysler/AMC	MS-3701 MS-8677
Ford Motor Company	ESB-MIC-158-A
Delco-Remy Div., General Motors	5384-011
ITT Automotive Electrical Products	1502-20007-D116
Saginaw Steering Gear Div.,	
General Motors	7809311 7813685 7826313
White Truck Group	16100-5002

LUBRIPLATE DS-ES Lubricant is recommended for:

Battery Posts - Head Lamps - Tail Lamps
Electrical Harness Plug Assemblies
Backup Lamp Connector Sockets
Electrical Switch Contacts - Radio Antenna Assemblies
Aircraft Switch Assemblies
High Voltage Breaker Assemblies
Connectors in the Primary Circuit of Solid-State Ignition

RECEIVED
MAR 1 8 1988
THE GLIDDEN CORP.

Advantages

- Exceptional oxidation resistance for extended operating life.
- Low Torque start-up capabilities especially in cold weather conditions.
- Excellent metal, rubber, and plastic compatibility.

SECTION I - GENERAL INFORMATION

PRODUCT NAME (NUMBER)	**Lonco SLS 65 Flux**
CHEMICAL FAMILY	Mixture.
D.O.T HAZARD CLASS	Flammable liquid.

SECTION II - HAZARDOUS INGREDIENTS

INGREDIENTS	*CAS NUMBER*	*WEIGHT PERCENT*	*OSHA PEL*	*ACGIH TLV*
Isopropyl Alcohol(2-Propanol)	67-63-0	90-92	400 ppm Stel 500 ppm	400 ppm Stel 500 ppm
Aliphatic Dibasic Ester Dicarboxylic Acids	1119-40-0 68937-72-4	4.0 <2.5	NE NE	NE NE

SECTION III - PHYSICAL DATA

(PUBLISHED or ESTIMATED VALUES)

BOILING POINT Deg. F. (760 mm Hg)	180	*SPECIFIC GRAVITY (H_2O=1)* (@ 77 deg F)	0.801
VAPOR PRESSURE (mm Hg AT 20 Deg. C.)	30	*% VOLATILE by WEIGHT*	90-92
VAPOR DENSITY (AIR=1)	>2	*EVAPORATION RATE*(BUAC=1)	2.3
SOLUBILITY IN WATER	Appreciable	*pH* (5% aqueous soln.)	3.4
APPEARANCE AND ODOR	Clear, colorless liquid, alcohol odor.		

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

ESTIMATED FLAMMABLE LIMITS (% By Volume in Air) *LEL*:2.0 *UEL*:12.7

FLASH POINT Deg. F. 53 closed cup.

EXTINGUISHING MEDIA Alcohol type or all-purpose-type foam for large fires.
Carbon dioxide or dry chemical media for small fires.

SECTION V(a) - HEALTH HAZARD DATA
(Symptoms/Effects of Overexposure)

INHALATION: Can cause irritation of the respiratory tract with coughing and chest discomfort. High concentrations of vapor may cause headache and drowsiness.

INGESTION: Slightly toxic. May cause abdominal discomfort, nausea, vomiting and diarrhea. Drowsiness and/or loss of consciousness may occur.

SKIN: May cause minor irritation with itching and possible slight local redness. Prolonged or repeated contact may cause defatting and drying. Absorption; exposure to small quantities are not anticipated to cause adverse health effects. Widespread and prolonged exposure may result in the absorption of harmful amounts of material, leading to signs and symptoms as described for ingestion.

EYES: Causes irritation, may cause corneal injury.

LISTED CARCINOGENS: None of the materials in this product are listed in NTP, IARC, or OSHA as carcinogens.

SECTION V(b) - HEALTH HAZARD DATA
(Emergency & First Aid Procedures)

INHALATION Remove to fresh air. If not breathing give artificial respiration. If breathing is difficult administer oxygen. Obtain medical attention.

INGESTION If fully conscious give two glasses of water, INDUCE vomiting. Never give anything by mouth to an unconscious person.

SKIN CONTACT Remove contaminated clothing. Wash with soap and water. If irritation persists or if contact has been prolonged obtain medical attention.

EYE CONTACT Immediately flush with water for several minutes. Obtain medical attention.

SECTION VI - REACTIVITY DATA

STABILITY
STABLE: X *UNSTABLE:*

CONDITIONS TO AVOID Heat, sparks and open flames.

INCOMPATIBILITY (Materials to Avoid) Strong oxidizing agents.

HAZARDOUS DECOMPOSITION PRODUCTS Burning can produce carbon monoxide and/or carbon dioxide.

HAZARDOUS POLYMERIZATION
*WILL OCCUR: WILL NOT OCCUR:*X

CONDITIONS TO AVOID None

SPECIAL FIRE FIGHTING PROCEDURES	Use NIOSH approved self-contained breathing apparatus and protective clothing. Cool fire exposed containers with water.
UNUSUAL FIRE AND EXPLOSION HAZARD	Vapors are heavier than air and may travel along ground. Never use welding torch on or near containers (even empty). May produce a floating fire hazard.

SECTION VI! - SPILL or LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Ventilate if in enclosed area. Eliminate all ignition sources.
SMALL SPILL: Absorb liquid on paper, vermiculite, floor absorbent, or other absorbent material and transfer to hood.
LARGE SPILL: See Section X.

WASTE DISPOSAL Destroy by approved incineration or deposit in approved landfill.

Must be in accordance with Federal, State, and Local Laws and Regulation

SECTION VIII - SPECIAL PROTECTION

RESPIRATORY No special requirements with adequate ventilation present, approved respiratory protective equipment used when vapor or mist concentrations exceed applicable standards.

EYEWEAR Chemical type protective goggles.
Provide eye bath near work site.

CLOTHING/GLOVES Wear resistant gloves such as rubber, neoprene or plastic.

VENTILATION Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below TLVs.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Observe precautions for a flammable liquid. Keep container closed when not in use. Store away from ignition sources in cool dry area. Use adequate ventilation. Read all container labeling.

Avoid the use of metal drum spigots. Use Polyethylene, Polypropylene or Teflon.

OTHER PRECAUTIONS:

CONTAINERS: Since empty containers may retain product residues (vapor, liquid, or solid) all labeled hazard precautions must be observed. FOR INDUSTRIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.

SECTION X - ADDITIONAL INFORMATION

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: (continued)

LARGE SPILL:

Persons not wearing protective equipment should be excluded from area.
Dike area of spill to prevent spreading. Pump liquid to salvage tank.
Take up remaining liquid with absorbent material. Shovel into containers.

NOTES TO PHYSICIAN:

There is no specific antidote. Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

---------- REGULATORY INFORMATION ----------

Toxic Substance Control Act (TSCA) Status:
All ingredients of this product are listed on the TSCA inventory.

SARA TITLE III (Section 313):
Components present in this product at a level which could require *reporting under the statute are:*
None

EMERGENCY TELEPHONE NUMBER

CHEMTRONICS® INC. MSDS #0716

SECTION 1: CHEMICAL PRODUCT AND COMPANY INFORMATION

Company Address:
8125 Cobb Center Drive
Kennesaw, GA 30152

Product Information: 800-TECH-401 Emergency: (Chemtrec) 800-424-9300
Customer Service: 800-645-5244 Revision Date: February 26, 1999

Product Identification

CHEMASK® DA

Product Code: CDA1, CDA5, CDA8

SECTION 2: COMPOSITION/INFORMATION ON INGREDIENTS

Product Ingredient Information	CAS#	Wt. % Range
Deionized water	7732-18-5	35.0-60.0
Acrylic polymer	mixture	25.0-50.0
Polyurethane resin	mixture	1.0-5.0

SECTION 3: HAZARD IDENTIFICATION

Emergency Overview: Viscous, opaque white liquid. This product is not flammable. Liquid may irritate eyes and skin under repeated or prolonged exposure

Potential Health Effects:

Eyes: Liquid and vapors of this product are irritating and can cause pain, tearing, reddening and swelling accompanied by a stinging sensation.

Skin: Contact causes skin irritation. Sensitizer - may cause allegic skin reaction

Ingestion: Harmful if swallowed. Irritating to mouth, throat and stomach. May cause nausea, vomiting, and diarrhea.

Inhalation: High concentrations of vapors may cause headaches, nausea, dizziness, and respiratory irritation if inhaled.

Pre-Existing Medical Conditions Aggravated by Exposure: Lung, eye, skin

SECTION 4: FIRST AID MEASURES

Eyes: Immediately flush with large amounts of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Have eyes examined and tested by medical personnel if irritation develops or persists.

Skin: Wash skin with soap and water. Remove contaminated clothing. Get medical attention if irritation develops or persists. Wash clothing separately before reuse.

Ingestion: If swallowed, seek medical attention immediately.

Inhalation: In case of exposure to high concentrations of vapor, remove to fresh air. If breathing is difficult, give oxygen and get medical attention.

SECTION 5: FIRE FIGHTING MEASURES

Flash Point: None to boiling (TCC) LEL/UEL: NA (% by volume in air)

Extinguishing Media: Use alcohol foam, carbon dioxide, or water spray when fighting fires involving this material.

Fire Fighting Instructions: As in any fire, wear self-contained breathing apparatus (pressure-demand, MSHA/NIOSH approved or equivalent) and full protective gear.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Large Spills: Shut off leak if possible and safe to do so. Wear self-contained breathing apparatus and appropriate personal protective equipment. Absorb spill with inert absorbant material, then place in a chemical waste container for proper disposal. Do not flush to sewer. Avoid runoff into storm sewers and ditches which lead to waterways.

Small Spills: Absorb spill with absorbent material, then place in a chemical waste container for proper disposal.

SECTION 7: HANDLING AND STORAGE

Avoid prolonged or repeated contact with eyes, skin, and clothing. Wash hands before eating. Use with adequate ventilation. Avoid breathing product vapor. Do not reuse this container. Store in a cool dry place away from heat, sparks and flame. Keep container closed when not in use. Do not store in direct sunlight.

KEEP OUT OF REACH OF CHILDREN.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Guidelines:

CHEMICAL NAME	ACGIH TWA	OSHA PEL	OSHA STEL
Acrylic polymer	NA	NA	NA
Polyurethane resin	NA	NA	NA

Work/Hygienic Practices: Good general ventilation should be sufficient to control airborne levels. Local exhaust ventilation may be necessary to control any air contaminants to within their TLVs during the use of this product. Wear safety glasses with side shields (or goggles) and rubber or other chemically resistant gloves when handling this material.

NFPA and HMIS Codes:	NFPA	HMIS

Odor: Mild, latex-like
Vapor Pressure: NA
Vapor Density: (Air=1) NA
Color: White
Boiling Range: >212°F
pH: 6.0-8.0

Solubility in Water: Dispersible
Specific Gravity: NA
Evaporation Rate: >1
(Butyl Alcohol= 1)
Viscosity: NA
Percent Volatile: <0.5

MOR 001044

SECTION 10: STABILITY AND CHEMICAL PROPERTIES

Stability - Stable.
Conditions to Avoid: Storage above 120° F, exposure to light, loss of polymerization inhibitor, contamination with incompatible materials.
Incompatibility: Do not mix with powdered alkali and alkaline earth metals or strong oxidizing agents.
Products of Decomposition: Thermal decomposition may release carbon monoxide, carbon dioxide, HCN, and hydrocarbons
Hazardous Polymerization: Will not occur

SECTION 11: TOXICOLOGICAL INFORMATION

Inhalation: NA
Ingestion: NA
Skin: NA
Cancer Information: No ingredients listed as human carcinogens by NTP or IARC

SECTION 12: ECOLOGICAL INFORMATION

Environmental Impact Information
Avoid runoff into storm sewers and ditches which lead to waterways. Water runoff can cause environmental damage.
REPORTING
US regulations require reporting spills of this material that could reach any surface waters. The toll free number for the US Coast Guard National Response Center is:
1-800-424-8802

SECTION 13: DISPOSAL CONSIDERATIONS

Dispose of in accordance with all federal, state and local regulations. Water runoff can cause environmental damage.

SECTION 14: TRANSPORTATION INFORMATION

Air: Coating Compound, Not Regulated
Ground: Coating Compound, Not Regulated

SECTION 15: REGULATORY INFORMATION

SECTION 313 SUPPLIER NOTIFICATION
This product contains the following toxic chemicals subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 (40 CFR 372)
This product contains no reportable chemicals listed under Section 313
This information should be included on all MSDSs copied and distributed for this material.
TOXIC SUBSTANCES CONTROL ACT (TSCA).
All ingredients of this product are listed on the TSCA Inventory.

SECTION 16: OTHER INFORMATION

Normal ventilation for standard manufacturing practices is usually adequate. Local exhaust should be used when large amounts are released
WHMIS Ingredient Disclosure list: None
Status: Noncontrolled

To the best of our knowledge, the information contained herein is accurate. However, all materials may present unknown hazards and should be used with caution. In particular, improper use of our products and their inappropriate combination with other products and substances may produce harmful results which cannot be anticipated. Final determination of the suitability of any material is the sole responsibility of the user. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that may exist.

MOR 001045

MATERIAL SAFETY DATA SHEET
MCLUBE 1775X

TMC-109 0369

Rec. 8/13/99

IDENTIFICATION

Manufacturer's Name and Address:
McGee Industries Inc.
9 Crozerville Road
Aston, PA 19014

Chemical Name and Synonyms:
Fluoropolymer/Organic Resin Binder

Emergency Telephone No:
Business Hours: (800)262-5823
After Hours: (800)424-9300

Effective Date:
October, 1992

Trade Name and Synonyms:
McLube 1775X

INGREDIENTS

Hazardous:	CAS No.	% By Wt.	TLV
2-Butanone	78-93-3	35-42	200 ppm
Toluene	108-88-3	35-40	100 ppm
Isopropyl alcohol	67-63-0	5-8	400 ppm
Organic resin mixture	N/A	3-8	N/A

Nonhazardous:

PHYSICAL DATA

Boiling Pt. (760 mm.Hg.) (°F): 175-231
Melting Point: N/A
Specific Gravity: 0.9
Vapor Pressure(mm.Hg.20°C): 70
Vapor Density (Air=1): 2-5
Solubility in Water(% by Wt.): Nil
% Volatiles by Weight: 87-94
Evaporation Rate (Ether=1): 0.2
Appearance and Odor: Yellowish-white, translucent liquid, slight ethereal odor.

FIRE AND EXPLOSION DATA

Flash Point (Test Method): 16°F. (TOC), 30°F. (TCC).

Flammable Limits (Wt. % 77°F):	Lower	Upper
	1.8	10

Extinguishing Media: CO_2, dry chemical, freon
Special Fire Fighting Procedures: Full protective equipment including self-contained breathing apparatus should be used.
Unusual Fire and Explosion Hazards: Keep containers tightly closed. Isolate from heat, electrical equipment, sparks and open flame. Closed containers may explode when exposed to extreme heat.

REACTIVITY DATA

Stability: Stable.

Incompatibility (Materials to avoid): Oxidizing materials.

Hazardous Decomposition Products: Carbon monoxide, carbon dioxide, possibly small quantities hydrogen fluoride and organic fluorides.
Polymerization: Will not occur.

HEALTH HAZARD INFORMATION

Exposure Limit: TLV 100 ppm.

ROUTES OF EXPOSURE AND EFFECTS

Inhalation: 220 ppm for prolonged periods may cause headache, dizziness, loss of balance; higher levels can lead to unconsciousness or even death.

Skin Contact: Irritation; prolonged contact may cause dermatitis.

Eye Contact: Irritation.

Ingestion: Harmful if swallowed.

Carcinogenicity: None of the components in this product is listed by IARC, NTP, or OSHA as a carcinogen.

EMERGENCY AND FIRST AID PROCEDURES

Eyes: Flush with water. Call a physician.

Skin: Wash off in flowing water.

Inhalation: Remove to fresh air. Call a physician.

Ingestion: Do not induce vomiting. Call a physician.

PROTECTION INFORMATION

Ventilation: Control vapor to standard. OSHA standard 100 ppm.

Personal Protective Equipment

Respiratory: In absence of environmental control, approved organic vapor-type respirator.

Eye: Safety glasses.

Gloves: Impermeable gloves recommended.

Other: Boots and apron may be necessary depending on extent and severity of exposure.

DISPOSAL PROCEDURES

Spill or Leak: Eliminate ignition sources. Soak up with inert absorbent such as sand, earth or vermiculite and put in closed container for prompt disposal.

Waste Disposal: Incinerate in compliance with local, state and federal regulations.

PRECAUTIONARY STATEMENTS AND ADDITIONAL INFORMATION

Keep containers closed.

Contents may be under pressure; open containers slowly to release pressure.

When transferring product, follow proper grounding procedures.

Avoid breathing of vapor; use with adequate ventilation especially in enclosed areas.

Flammable liquid and vapor - keep away from flames and other ignition sources.

Avoid contact with eyes or skin; wash hands thoroughly after handling.

Empty containers retain product residue; follow label warnings even after container is emptied; residual vapors may explode on ignition; do not cut, drill or weld on or near container.

2-Butanone and toluene are toxic chemicals subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986 and 40 CFR 372.

Toluene contains traces of benzene and the resin mixture is reported to contain traces of formaldehyde, chemicals which are on the California Proposition 65 list of chemicals classed as carcinogens.

This information relates to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is to the best of our knowledge and belief, accurate and reliable as of the date compiled. However, no representation, warranty or guarantee is made as to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability and completeness of such information for his own particular use. We do not accept liability for any loss or damage that may occur from the use of this information nor do we offer warranty against patent infringement.

MATERIAL SAFETY DATA SHEET

McLUBE 2003 (MIL-L-60326 Type III)

Rec. 8/13/99

IDENTIFICATION

Manufacturer's Name and Address:
McGee Industries, Inc.
9 Crozerville Road
Aston, PA 19014

Emergency Telephone No:
Business Hours: (800) 262-5823
After Hours: (800) 424-9300

Effective Date:
January, 1992

Chemical Name and Synonyms:
Fluorochemical Polymer Dispersion

Trade Name and Synonyms:
McLube 2003

INGREDIENTS

Hazardous:	CAS No.	% By Wt.	TLV
1,1,2-Trichloro-1,2,2-trifluoroethane	76-13-1	95-99	1000 ppm

Nonhazardous:

PHYSICAL DATA

Boiling Pt. (760 mm.Hg.) (°F): 117.6
Melting Point: (Solids) 572°F.
Specific Gravity: 1.65
Vapor Pressure(mm.Hg. 20°C): 334
Vapor Density (Air=1): 6.4
Solubility in Water (% by Wt.): Nil
% Volatiles by Weight: 95-99
Evaporation Rate (Ether=1): 0.5
Appearance and Odor: White, translucent liquid, slight ethereal odor.

FIRE AND EXPLOSION DATA

Flash Point (Test Method): None (TOC, TCC, COC)

Flammable Limits (Wt. % 77°F):	Lower	Upper
	N/A	N/A

Extinguishing Media: Water fog.

Special Fire Fighting Procedures: Nothing special.

Unusual Fire and Explosion Hazards: In presence of open flame, can produce toxic fumes requiring respirator.

REACTIVITY DATA

Stability: Stable.

Incompatibility (Materials to avoid): Avoid reactive metals, especially powders.

Hazardous Decomposition Products: Hydrogen chloride, hydrogen fluoride, and possibly carbonyl halides.

Polymerization: Will not occur.

Exposure Limit: TLV 1000 ppm.

Routes of Exposure and Effects

Inhalation: Prolonged breathing of high concentrations of vapor may cause light-headedness, dizziness and loss of balance and may lead to cardiac irregularities, unconsciousness or even death.

Skin Contact: Mild irritation, not a sensitizer.

Eye Contact: Mild irritation.

Ingestion: Low oral toxicity.

Carcinogenicity: None of the components in this product is listed by IARC, NTP or OSHA as a carcinogen.

EMERGENCY AND FIRST AID PROCEDURES

Eyes: Flush with water immediately for at least 5 minutes.

Skin: Wash off in flowing water.

Inhalation: If large amounts inhaled, remove to fresh air; if not breathing, have qualified person give mouth-to-mouth resuscitation; if breathing difficult, give oxygen and call a physician.

Ingestion: Do not induce vomiting. Call a physician.

PROTECTION INFORMATION

Ventilation: Control vapor to standard, OSHA standard 1000 ppm.

Personal Protective Equipment

Respiratory: In absence of environmental control, approved organic vapor-type respirator required. For emergencies, positive-pressure breathing apparatus or full-face respirator with approved organic canister recommended.

Eye: Safety glasses when handling liquid.

Gloves: Impermeable gloves recommended.

Other: None.

DISPOSAL PROCEDURES

Spill or Leak: Soak up with inert absorbent such as sand, earth or vermiculite and put in closed container for prompt disposal.

Waste Disposal: Send to approved landfill in compliance with local, state and federal regulations.

PRECAUTIONARY STATEMENTS AND ADDITIONAL INFORMATION

Contents may be under pressure; open containers slowly to release pressure.
Heating solid active ingredient above 500°F may cause formation of potentially toxic substances.
Avoid breathing vapor.
Use with adequate ventilation especially in enclosed areas.
Keep away from flames and other ignition sources.
Do not smoke while using nor contaminate tobacco products.
Wash hands thoroughly after handling.

THIS INFORMATION RELATES TO THE SPECIFIC MATERIAL DESIGNATED AND MAY NOT BE VALID FOR SUCH MATERIAL USED IN COMBINATION WITH ANY OTHER MATERIALS OR IN ANY PROCESS. SUCH INFORMATION IS TO THE BEST OF OUR KNOWLEDGE AND BELIEF, ACCURATE AND RELIABLE AS OF THE DATE COMPILED. HOWEVER, NO REPRESENTATION, WARRANTY OR GUARANTEE IS MADE AS TO ITS ACCURACY, RELIABILITY OR COMPLETENESS. IT IS THE USER'S RESPONSIBILITY TO SATISFY HIMSELF AS TO THE SUITABILITY AND COMPLETENESS OF SUCH INFORMATION FOR HIS OWN PARTICULAR USE. WE DO NOT ACCEPT LIABILITY FOR ANY LOSS OR DAMAGE THAT MAY OCCUR FROM THE USE OF THIS INFORMATION NOR DO WE OFFER WARRANTY AGAINST PATENT INFRINGEMENT.

1. PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: MOBILITH SHC 100

SUPPLIER: MOBIL OIL CORP.

NORTH AMERICA MARKETING AND REFINING

3225 GALLOWS RD.

FAIRFAX, VA 22037

24 - HOUR EMERGENCY (CALL COLLECT): 609-737-4411

PRODUCT AND MSDS INFORMATION: 800-662-4525 609-224-4644

CHEMTREC: 800-424-9300 202-483-7616

---

2. COMPOSITION/INFORMATION ON INGREDIENTS

CHEMICAL NAMES AND SYNONYMS: SYN. HYDROCARBONS AND ADDITIVES

INGREDIENTS CONSIDERED HAZARDOUS TO HEALTH:

THIS PRODUCT IS NOT FORMULATED TO CONTAIN INGREDIENTS WHICH HAVE EXPOSURE LIMITS ESTABLISHED BY U.S. AGENCIES. IT IS NOT HAZARDOUS TO HEALTH AS DEFINED BY THE EUROPEAN UNION DANGEROUS SUBSTANCES/PREPARATIONS DIRECTIVES. SEE SECTION 15 FOR A REGULATORY ANALYSIS OF THE INGREDIENTS.

SEE SECTION 15 FOR EUROPEAN LABEL INFORMATION.

SEE SECTION 8 FOR EXPOSURE LIMITS (IF APPLICABLE).

---

3. HAZARDS IDENTIFICATION

US OSHA HAZARD COMMUNICATION STANDARD: PRODUCT ASSESSED IN ACCORDANCE WITH OSHA 29 CFR 1910.1200 AND DETERMINED NOT TO BE HAZARDOUS.

EFFECTS OF OVEREXPOSURE: NO SIGNIFICANT EFFECTS EXPECTED.

EMERGENCY RESPONSE DATA: RED GREASE. DOT REG NO. - NA

---

4. FIRST AID MEASURES

EYE CONTACT: FLUSH THOROUGHLY WITH WATER. IF IRRITATION OCCURS, CALL A PHYSICIAN.

SKIN CONTACT: WASH CONTACT AREAS WITH SOAP AND WATER. HIGH PRESSURE ACCIDENTAL INJECTION THROUGH THE SKIN REQUIRES IMMEDIATE MEDICAL ATTENTION FOR POSSIBLE INCISION, IRRIGATION AND/OR DEBRIDEMENT.

INHALATION: NOT EXPECTED TO BE A PROBLEM.

INGESTION: NOT EXPECTED TO BE A PROBLEM. HOWEVER, IF GREATER THAN 1/2 LITER (PINT) INGESTED, SEEK MEDICAL ATTENTION.

---

5. FIRE-FIGHTING MEASURES

EXTINGUISHING MEDIA: CARBON DIOXIDE, FOAM, DRY CHEMICAL AND WATER FOG.

SPECIAL FIRE FIGHTING PROCEDURES: WATER OR FOAM MAY CAUSE FROTHING.

USE WATER TO KEEP FIRE EXPOSED CONTAINERS COOL. WATER SPRAY MAY

BE USED TO FLUSH SPILLS AWAY FROM EXPOSURE. PREVENT RUNOFF FROM

FIRE CONTROL OR DILUTION FROM ENTERING STREAMS, SEWERS, OR

DRINKING WATER SUPPLY.

SPECIAL PROTECTIVE EQUIPMENT: FOR FIRES IN ENCLOSED AREAS, FIRE

FIGHTERS MUST USE SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS: NONE. FLASH POINT C(F): >

204(400) (ASTM D-93). FLAMMABLE LIMITS - LEL: NA, UEL: NA.

NFPA HAZARD ID: HEALTH: 0, FLAMMABILITY: 1, REACTIVITY: 0

HAZARDOUS DECOMPOSITION PRODUCTS: CARBON MONOXIDE. METAL OXIDES.

ELEMENTAL OXIDES.

---

6. ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES: REPORT SPILLS AS REQUIRED TO APPROPRIATE

AUTHORITIES. U. S. COAST GUARD REGULATIONS REQUIRE IMMEDIATE

REPORTING OF SPILLS THAT COULD REACH ANY WATERWAY INCLUDING

INTERMITTENT DRY CREEKS. REPORT SPILL TO COAST GUARD TOLL FREE

NUMBER (800) 424-8802. IN CASE OF ACCIDENT OR ROAD SPILL NOTIFY

CHEMTREC (800) 424-9300.

PROCEDURES IF MATERIAL IS RELEASED OR SPILLED: SHOVEL UP AND DISPOSE

OF AT AN APPROPRIATE WASTE DISPOSAL FACILITY IN ACCORDANCE WITH

CURRENT APPLICABLE LAWS AND REGULATIONS, AND PRODUCT

CHARACTERISTICS AT TIME OF DISPOSAL.

ENVIRONMENTAL PRECAUTIONS: PREVENT SPILLS FROM ENTERING STORM SEWERS

OR DRAINS AND CONTACT WITH SOIL.

PERSONAL PRECAUTIONS: SEE SECTION 8

---

7. HANDLING AND STORAGE

HANDLING: HIGH PRESSURE INJECTION UNDER THE SKIN MAY OCCUR DUE TO THE

RUPTURE OF PRESSURIZED LINES. ALWAYS SEEK MEDICAL ATTENTION.

STORAGE: DO NOT STORE IN OPEN OR UNLABELLED CONTAINERS. STORE AWAY

FROM STRONG OXIDIZING AGENTS OR COMBUSTIBLE MATERIAL.

---

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

VENTILATION: NO SPECIAL REQUIREMENTS UNDER ORDINARY CONDITIONS OF USE

AND WITH ADEQUATE VENTILATION.

RESPIRATORY PROTECTION: NO SPECIAL REQUIREMENTS UNDER ORDINARY

CONDITIONS OF USE AND WITH ADEQUATE VENTILATION.

EYE PROTECTION: GENERALLY EYE CONTACT IS UNLIKELY WITH THIS TYPE

MATERIAL. IF EYE CONTACT IS LIKELY, SAFETY GLASSES WITH SIDE

SHIELDS OR CHEMICAL TYPE GOGGLES SHOULD BE WORN.

SKIN PROTECTION: IF PROLONGED OR REPEATED SKIN CONTACT IS LIKELY, OIL

IMPERVIOUS GLOVES SHOULD BE WORN. GOOD PERSONAL HYGIENE

PRACTICES SHOULD ALWAYS BE FOLLOWED.

EXPOSURE LIMITS: THIS PRODUCT DOES NOT CONTAIN ANY COMPONENTS WHICH

HAVE RECOGNIZED EXPOSURE LIMITS.

---

HAZARDOUS DECOMPOSITION PRODUCTS: CARBON MONOXIDE. METAL OXIDES.

ELEMENTAL OXIDES.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR.

---

11. TOXICOLOGICAL DATA

---ACUTE TOXICOLOGY---

ORAL TOXICITY (RATS): PRACTICALLY NON-TOXIC (LD50: GREATER THAN 2000 MG/KG). ---BASED ON TESTING OF SIMILAR PRODUCTS AND/OR THE COMPONENTS.

DERMAL TOXICITY (RABBITS): PRACTICALLY NON-TOXIC (LD50: GREATER THAN 2000 MG/KG). ---BASED ON TESTING OF SIMILAR PRODUCTS AND/OR THE COMPONENTS.

INHALATION TOXICITY (RATS): NOT APPLICABLE ---HARMFUL CONCENTRATIONS OF MISTS AND/OR VAPORS ARE UNLIKELY TO BE ENCOUNTERED THROUGH ANY CUSTOMARY OR REASONABLY FORESEEABLE HANDLING, USE, OR MISUSE OF THIS PRODUCT.

EYE IRRITATION (RABBITS): PRACTICALLY NON-IRRITATING. (DRAIZE SCORE: GREATER THAN 6 BUT 15 OR LESS). ---BASED ON TESTING OF SIMILAR PRODUCTS AND/OR THE COMPONENTS.

SKIN IRRITATION (RABBITS): PRACTICALLY NON-IRRITATING. (PRIMARY IRRITATION INDEX: GREATER THAN 0.5 BUT LESS THAN 3). ---BASED ON TESTING OF SIMILAR PRODUCTS AND/OR THE COMPONENTS.

OTHER ACUTE TOXICITY DATA: THE ACUTE TOXICOLOGICAL RESULTS SUMMARIZED ABOVE ARE BASED ON TESTING OF REPRESENTATIVE MOBIL PRODUCTS.

---SUBCHRONIC TOXICOLOGY (SUMMARY)---

REPRESENTATIVE MOBIL FORMULATIONS HAVE BEEN TESTED AT THE MOBIL ENVIRONMENTAL AND HEALTH SCIENCES LABORATORY BY DERMAL APPLICATIONS TO RATS 5 DAYS/WEEK FOR 90 DAYS AT DOSES SIGNIFICANTLY HIGHER THAN THOSE EXPECTED DURING NORMAL INDUSTRIAL EXPOSURE. EXTENSIVE EVALUATIONS, INCLUDING MICROSCOPIC EXAMINATION OF INTERNAL ORGANS AND CLINICAL CHEMISTRY OF BODY

FLUIDS. SHOWED NO ADVERSE EFFECTS.

---REPRODUCTIVE TOXICOLOGY (SUMMARY)---

DERMAL EXPOSURE OF PREGNANT RATS TO REPRESENTATIVE FORMULATIONS DID NOT CAUSE ADVERSE EFFECTS IN EITHER THE MOTHERS OR THEIR OFFSPRING.

---SENSITIZATION (SUMMARY)---

REPRESENTATIVE MOBIL FORMULATIONS HAVE NOT CAUSED SKIN SENSITIZATION IN GUINEA PIGS.

---OTHER TOXICOLOGY DATA---

THIS PRODUCT IS FORMULATED WITH A SYNTHETIC HYDROCARBON AS THE BASE STOCK. THE MOBIL ENVIRONMENTAL AND HEALTH SCIENCES LABORATORY HAS TESTED REPRESENTATIVE SYNTHETIC BASE STOCKS TO ASSESS THEIR POTENTIAL ADVERSE EFFECTS ON HUMAN HEALTH. ASSESSMENT OF HUMAN HEALTH EFFECTS WAS BASED ON ACUTE ORAL, DERMAL, AND INHALATION TOXICITY; EYE AND SKIN IRRITATION; SUBCHRONIC DERMAL TOXICITY AND REPRODUCTIVE STUDIES; GUINEA PIG SENSITIZATION; AND MUTAGENICITY AND CHROMOSOMAL DAMAGE ASSAYS. NONE OF THESE BASE STOCKS APPEARS TO POSE A HEALTH HAZARD TO HUMANS UNDER CONDITIONS OF EXPECTED USE.

---

12. ECOLOGICAL INFORMATION

ENVIRONMENTAL FATE AND EFFECTS: THIS PRODUCT IS EXPECTED TO BE INHERENTLY BIODEGRADABLE. THERE IS NO EVIDENCE TO SUGGEST BIOACCUMULATION WILL OCCUR.

ACUTE LC/EC50: JUVENILE RAINBOW TROUT: PRACTICALLY NON-TOXIC ---BASED ON TESTING OF SIMILAR PRODUCTS.

ACCIDENTAL SPILLAGE MAY LEAD TO PENETRATION IN THE SOIL AND GROUNDWATER. HOWEVER, THERE IS NO EVIDENCE THAT THIS WOULD CAUSE ADVERSE ECOLOGICAL EFFECTS.

---

13. DISPOSAL CONSIDERATIONS

WASTE DISPOSAL: PRODUCT IS SUITABLE FOR BURNING IN AN ENCLOSED, CONTROLLED BURNER FOR FUEL VALUE OR DISPOSAL BY SUPERVISED INCINERATION. SUCH BURNING MAY BE LIMITED PURSUANT TO THE RESOURCE CONSERVATION AND RECOVERY ACT. IN ADDITION, THE PRODUCT IS SUITABLE FOR PROCESSING BY AN APPROVED RECYCLING FACILITY OR CAN BE DISPOSED OF AT AN APPROPRIATE GOVERNMENT WASTE DISPOSAL FACILITY. USE OF THESE METHODS IS SUBJECT TO USER COMPLIANCE WITH APPLICABLE LAWS AND REGULATIONS AND CONSIDERATION OF PRODUCT CHARACTERISTICS AT TIME OF DISPOSAL.

RCRA INFORMATION: THE UNUSED PRODUCT, IN OUR OPINION, IS NOT SPECIFICALLY LISTED BY THE EPA AS A HAZARDOUS WASTE (40 CFR, PART 261D), NOR IS IT FORMULATED TO CONTAIN MATERIALS WHICH ARE LISTED HAZARDOUS WASTES. IT DOES NOT EXHIBIT THE HAZARDOUS CHARACTERISTICS OF IGNITABILITY, CORROSIVITY, OR REACTIVITY AND IS NOT FORMULATED WITH CONTAMINANTS AS DETERMINED BY THE TOXICITY CHARACTERISTIC LEACHING PROCEDURE (TCLP). HOWEVER, USED PRODUCT MAY BE REGULATED.

---

14. TRANSPORT INFORMATION

USA DOT: NOT REGULATED BY USA DOT.

RID/ADR: NOT REGULATED BY RID/ADR.

IMO: NOT REGULATED BY IMO.

IATA: NOT REGULATED BY IATA.

---

15. REGULATORY INFORMATION

GOVERNMENTAL INVENTORY STATUS: ALL COMPONENTS COMPLY WITH TSCA, AND EINECS/ELINCS.

EU LABELING: EU LABELING NOT REQUIRED.

U.S. SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT (SARA) TITLE III:

THIS PRODUCT CONTAINS NO "EXTREMELY HAZARDOUS SUBSTANCES".

SARA (311/312) REPORTABLE HAZARD CATEGORIES: NONE.

THIS PRODUCT CONTAINS NO CHEMICALS REPORTABLE UNDER SARA (313) TOXIC RELEASE PROGRAM.

THE FOLLOWING PRODUCT INGREDIENTS ARE CITED ON THE LISTS BELOW:

The dried film of this product is hazardous when removed by sanding, grinding, or welding.
(SKIN) absorption may contribute to the overall exposure to this material. Take appropriate measures to prevent skin contact.
(N/E = not established)

SECTION III PHYSICAL DATA

boiling point	: not established		% volatile by volume	: 71.85	(Theoretical)
evaporation rate	: < 1 (ether = 1)		% volatile by weight	: 54.21	(Theoretical)
vapor density	: > 1 (air = 1)		weight per gallon	: 8.76	(Theoretical)
			specific gravity	: 1.051	(Theoretical)

SECTION IV HEALTH INFORMATION

EYE CONTACT
PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE EYES. EXPOSURE MAY CAUSE CORNEAL INJURY. PRODUCT VAPORS AND/OR MISTS MAY ALSO BE IRRITATING TO THE EYES.

SKIN CONTACT
BASED ON THE PRESENCE OF COMPONENT 10 PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE SKIN. PROLONGED CONTACT MAY CAUSE DAMAGE TO THE SKIN. BASED ON THE PRESENCE OF COMPONENTS 6, 10 AND 14 ABSORPTION THROUGH THE SKIN MAY RESULT IN SYMPTOMS OF EXPOSURE AS THOSE DESCRIBED FOR INHALATION AND INGESTION. PROLONGED OR REPEATED CONTACT MAY RESULT IN DEFATTING AND DRYING OF THE SKIN WHICH MAY RESULT IN DERMATITIS.

INHALATION
EXPOSURE MAY PRODUCE IRRITATION TO THE NOSE, THROAT, RESPIRATORY TRACT, AND OTHER MUCOUS MEMBRANES. EXPOSURE TO HIGH CONCENTRATIONS OF VAPOR MAY PRODUCE CENTRAL NERVOUS SYSTEM DEPRESSION. REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL.

INGESTION
MODERATELY TOXIC. BASED ON THE PRESENCE OF COMPONENT 10 INGESTION MAY CAUSE RED BLOOD CELL HEMOLYSIS LEADING TO KIDNEY AND LIVER DAMAGE. SMALL AMOUNTS OF THE LIQUID ASPIRATED INTO THE LUNGS DURING INGESTION OR FROM VOMITING MAY RESULT IN SEVERE LUNG DAMAGE. INGESTION MAY CAUSE CENTRAL NERVOUS SYSTEM DEPRESSION.

NOV 17 1995
THE MUREY CO.

SIGNS AND SYMPTOMS
SYMPTOMS OF EYE IRRITATION INCLUDE PAIN, TEARING, REDDENING AND SWELLING. SYMPTOMS OF SKIN IRRITATION INCLUDE REDDENING, SWELLING, RASH AND REDNESS. SYMPTOMS OF RESPIRATORY IRRITATION INCLUDE RUNNY NOSE, SORE THROAT, COUGHING, CHEST DISCOMFORT, SHORTNESS OF BREATH AND REDUCED LUNG FUNCTION. SYMPTOMS OF GASTROINTESTIONAL IRRITATION INCLUDE SORE THROAT, ABDOMINAL PAIN, NAUSEA, VOMITING AND DIARRHEA. CENTRAL NERVOUS SYSTEM DEPRESSION MAY BE EVIDENCED BY HEADACHE, DIZZINESS, NAUSEA AND SYMPTOMS OF INTOXICATION; IN EXTREME CASES, UNCONSCIOUSNESS AND DEATH MAY OCCUR. SYMPTOMS OF CHRONIC OVEREXPOSURE INCLUDE LOSS OF MEMORY, LOSS OF INTELLECTUAL ABILITY AND LOSS OF COORDINATION.

AGGRAVATED MEDICAL CONDITIONS
PREEXISTING SKIN, EYE AND RESPIRATORY DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT. IMPAIRED KIDNEY, LIVER, BLOOD, CENTRAL NERVOUS SYSTEM FUNCTIONS FROM PREEXISTING DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT.

OTHER HEALTH EFFECTS
BASED ON THE PRESENCE OF COMPONENTS 6, 10 AND 14 CHRONIC OVEREXPOSURE MAY CAUSE INJURY TO THE KIDNEYS AND LIVER. BASED ON THE PRESENCE OF COMPONENT 10 CHRONIC OVEREXPOSURE MAY CAUSE DAMAGE TO THE RED BLOOD CELLS. BASED ON THE PRESENCE OF COMPONENTS 6 AND 10 CHRONIC OVEREXPOSURE MAY CAUSE DAMAGE TO THE LUNGS. BASED ON THE PRESENCE OF COMPONENT 8 CHRONIC OVEREXPOSURE TO TiO2 DUST MAY CAUSE SLIGHT LUNG FIBROSIS. BASED ON THE PRESENCE OF COMPONENT 7 CHRONIC OVEREXPOSURE TO TALC DUST MAY CAUSE SCARRING OF THE LUNGS. BASED ON THE PRESENCE OF COMPONENT 4 CHRONIC OVEREXPOSURE TO PRODUCT DUST MAY PRODUCE A BENIGN PNEUMOCONIOSIS TERMED 'SIDEROSIS'.

SECTION V — EMERGENCY AND FIRST AID PROCEDURES

EYE CONTACT
IMMEDIATELY FLUSH EYES WITH COPIOUS AMOUNTS OF WATER FOR AT LEAST 15 MINUTES HOLDING EYELIDS OPEN. SEEK PROMPT MEDICAL ATTENTION.

SKIN CONTACT
REMOVE CONTAMINATED CLOTHING AND SHOES. WIPE EXCESS FROM SKIN AND FLUSH WITH WATER USING SOAP IF AVAILABLE. SEEK MEDICAL ATTENTION IF IRRITATION OCCURS. DO NOT REUSE CLOTHING UNTIL THOROUGHLY DECONTAMINATED.

INHALATION
REMOVE VICTIM TO FRESH AIR AND TREAT SYMPTOMATICALLY. PROVIDE OXYGEN IF BREATHING IS DIFFICULT. GIVE ARTIFICIAL RESPIRATION IF THE VICTIM IS NOT BREATHING. SEEK PROMPT MEDICAL ATTENTION.

INGESTION
DO NOT INDUCE VOMITING. IF VOMITING SPONTANEOUSLY OCCURS, KEEP THE VICTIM'S HEAD BELOW THE HIPS TO PREVENT ASPIRATION INTO THE LUNGS. SINCE ASPIRATION INTO THE LUNGS CAN CAUSE VERY SERIOUS, PERMANENT DAMAGE, THE DECISION OF WHETHER TO INDUCE VOMITING OR NOT SHOULD BE MADE BY A PHYSICIAN. DANGER FROM LUNG ASPIRATION MUST BE WEIGHED AGAINST TOXICITY WHEN CONSIDERING EMPTYING THE STOMACH. CONSULT A PHYSICIAN, HOSPITAL OR POISON CONTROL CENTER AND/OR TRANSPORT TO AN EMERGENCY FACILITY IMMEDIATELY.

>> COMPONENTS 1, 2, 3 AND 12 MAY CAUSE SEVERE, PERMANENT DAMAGE IF ASPIRATED AND VOMITING SHOULD NOT BE INDUCED.

SECTION VI — FIRE AND EXPLOSION HAZARDS

OSHA FLAMMABILITY CLASSIFICATION
FLAMMABLE LIQUID - CLASS IB

FLASH POINT : 68 degrees F. (Theoretical)

DOT PROPER SHIPPING NAME
PAINT
3
UN1263
PGII

EXTINGUISHING MEDIA
USE WATER FOG, FOAM, DRY CHEMICAL OR CARBON DIOXIDE.

SPECIAL FIRE FIGHTING PROCEDURES AND PRECAUTIONS
WARNING. FLAMMABLE. CLEAR FIRE AREA OF UNPROTECTED PERSONNEL. DO NOT ENTER CONFINED FIRE SPACE WITHOUT HELMET, FACE SHIELD, BUNKER COAT, GLOVES, RUBBER BOOTS, AND A POSITIVE PRESSURE NIOSH-APPROVED SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS
CONTAINERS EXPOSED TO INTENSE HEAT FROM FIRES SHOULD BE COOLED WITH WATER TO PREVENT VAPOR PRESSURE BUILDUP WHICH COULD RESULT IN CONTAINER RUPTURE. CONTAINER AREAS EXPOSED TO DIRECT FLAME CONTACT SHOULD BE COOLED WITH LARGE QUANTITIES OF WATER AS NEEDED TO PREVENT WEAKENING OF CONTAINER STRUCTURE.

NOV 17 1995
THE MOREY CORP.

SECTION VII REACTIVITY

STABILITY : STABLE HAZARDOUS POLYMERIZATION : WILL NOT OCCUR

CONDITIONS AND MATERIALS TO AVOID
AVOID OXIDIZING MATERIALS. BASED ON THE PRESENCE OF COMPONENT IO AVOID STRONG ALKALIES.

HAZARDOUS DECOMPOSITION PRODUCTS
CARBON DIOXIDE. CARBON MONOXIDE. AND UNIDENTIFIED ORGANIC COMPOUNDS MAY BE FORMED DURING COMBUSTION.

SECTION VIII EMPLOYEE PROTECTION

RESPIRATORY PROTECTION
USE VENTILATION AS REQUIRED TO CONTROL VAPOR. MIST. AND/OR DUST CONCENTRATIONS - AT LEAST 10 AIR CHANGES PER HOUR ARE RECOMMENDED FOR GOOD GENERAL ROOM VENTILATION. IF EXPOSURE EXCEEDS THE PEL/TLV. USE THE APPROPRIATE NIOSH-APPROVED RESPIRATOR.

PROTECTIVE CLOTHING
WEAR SAFETY GLASSES. GOGGLES. OR A SPLASH SHIELD TO PREVENT EYE CONTACT. CONTACT LENSES SHOULD NOT BE WORN. WEAR APPROPRIATE GLOVES AND PROTECTIVE CLOTHING TO PREVENT CONTACT WITH SKIN AND CLOTHING.

ADDITIONAL PROTECTIVE MEASURES
EYE WASH FOUNTAINS AND SAFETY SHOWERS SHOULD BE AVAILABLE FOR USE IN AN EMERGENCY.

SECTION IX ENVIRONMENTAL PROTECTION

SPILL OR LEAK PROCEDURES
LARGE SPILLS >> EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR APPROPRIATE RESPIRATOR AND PROTECTIVE CLOTHING. SHUT OFF SOURCE OF LEAK ONLY IF SAFE TO DO SO. DIKE AND CONTAIN. IF VAPOR CLOUD FORMS. WATER FOG MAY BE USED TO SUPPRESS; CONTAIN RUN-OFF. REMOVE WITH VACUUM TRUCKS OR PUMP TO STORAGE/SALVAGE VESSELS. SOAK UP RESIDUE WITH AN ABSORBENT SUCH AS CLAY. SAND OR OTHER SUITABLE MATERIAL; PLACE IN NON-LEAKING CONTAINERS FOR PROPER DISPOSAL. FLUSH AREA WITH WATER TO REMOVE TRACE RESIDUE; DISPOSE OF FLUSH SOLUTIONS AS ABOVE. SMALL SPILLS >> TAKE UP WITH AN ABSORBENT MATERIAL AND PLACE IN NON LEAKING CONTAINERS.

WASTE DISPOSAL
OBSERVE ALL FEDERAL. STATE. AND LOCAL REGULATIONS REGARDING PROPER DISPOSAL.

SECTION X ADDITIONAL PRECAUTIONS

KEEP LIQUID AND VAPOR AWAY FROM HEAT. SPARKS. AND FLAME. EXTINGUISH PILOT LIGHTS. CIGARETTES AND TURN OFF OTHER POSSIBLE SOURCES OF IGNITION PRIOR TO USE AND UNTIL VAPORS ARE GONE. SURFACES THAT ARE SUFFICIENTLY HOT MAY IGNITE PRODUCT IN THE ABSENCE OF SPARKS OR FLAME. VAPORS MAY ACCUMULATE AND TRAVEL TO IGNITION SOURCES DISTANT FROM HANDLING SITE. KEEP CONTAINERS CLOSED WHEN NOT IN USE. USE WITH ADEQUATE VENTILATION. CONTAINERS. EVEN IF EMPTY. CAN CONTAIN EXPLOSIVE VAPORS. DO NOT CUT.DRILL. GRIND. OR WELD NEAR CONTAINERS.

CONTAINERS CAN CONTAIN HAZARDOUS PRODUCT RESIDUES EVEN WHEN EMPTY. WASH WITH SOAP AND WATER BEFORE EATING. DRINKING. SMOKING. OR USING TOILET FACILITIES.

THE INFORMATION CONTAINED HEREIN IS BASED ON THE DATA AVAILABLE TO US AND IS BELIEVED TO BE CORRECT. HOWEVER. WE MAKE NO WARRANTY. EXPRESSED OR IMPLIED. REGARDING THE ACCURACY OF THIS DATA OR THE RESULTS TO BE OBTAINED FROM THE USE THEREOF. WE ASSUME NO RESPONSIBILITY FOR INJURY FROM THE USE OF THE PRODUCT DESCRIBED HEREIN.

Section 3 - Physical Data

Material Is (At Normal Conditions)
Solid

Appearance and Odor
Gray-Black, Odorless

Melting Point (Base Metal)
>2300º F

Specific Gravity
Approximately 7

Section 4 - Fire And Explosion

Extinguishing Media
NA

Special Firefighting Procedures
Steel products in the solid state present no fire or explosion hazard.

Unusual Fire and Explosion Hazards
NA

MOR 001064

Section 5 - Reactivity Data

Stability
Stable

Incompatability (Materials to Avoid)
Reacts with strong acids to produce hydrogen gas.

Conditions to Avoid
NA

Hazardous Decomposition Products
Metallic dust or fumes may be produced during welding, burning, grinding and possibly machining.
Refer to ANSI Z49.1

Product
Nickel

Section 5 - Health Hazard Data

NOTE: STEEL PRODUCTS IN THE NATURAL STATE DO NOT PRESENT AN INHALATION, INGESTION OR CONTACT HAZARD. HOWEVER, OPERATIONS SUCH AS BURNING, WELDING, SAWING, BRAZING AND GRINDING MAY RELEASE FUMES AND/OR DUSTS WHICH MAY PRESENT HEALTH HAZARDS IF TLV'S ARE EXCEEDED

MAJOR EXPOSURE HAZARD

☒ Inhalation ☐ Skin Contact ☐ Skin Absorption ☐ Eye Contact ☐ Ingestion

Effects of Overexposure

Short term exposure to fumes/dust may produce irritation of eyes and respiratory system. Inhalation of high concentrations of freshly formed oxide fumes of iron, manganese and copper may cause metal fume fever characterized by a metallic taste in the mouth, dryness and irritation of the throat and influenzalike symptoms.

Chronic inhalation of high concentrations of iron oxide fumes or dust may lead to a benign pneumoconiosis (siderosis). Inhalation of high concentrations of ferric oxide may possibly enhance the risk of lung cancer development in workers exposed to pulmonary carcinogens.

Chromium and nickel and their compounds are listed in the 3rd Annual Report on Carcinogens, as prepared by the National Toxicology Program (NTP). Exposure to high concentrations of dust and fumes can cause sensitization dermatitis, inflammation and/or ulceration of upper respiratory tract and possibly cancer of nasal passages and lungs.

Recent epidemiological studies of workers melting and working alloys containing nickel/chromium have found no increased risk of cancer.

Suspected Cancer Agent? _____ NO: This product's ingredients are not found in the lists below.
__X__ YES: ____ Federal OSHA __X__ NTP ____ IARC

Emergency and First Aid Procedures

If exposed to excessive levels of metal fumes, remove to fresh air, seek medical aid immediately.

Eyes - Flush with water for at least 15 minutes.

Section 7 - Spill or Leak Procedures

Spill or Leak Procedures

NA

Waste Disposal Methods

According to local, state and federal regulations

Section 8 - Special Protection

Respiratory

NIOSH/MSHA - Approved dust and fume, respirator should be used to avoid excessive inhalation of particulates when exposure exceeds TLV's.

Ventilation

Local exhaust ventilation should be utilized when welding, burning, sawing, brazing, grinding or machining when exposure exceeds TLV's.

Eye Protection and Protective Clothing

Safety glasses or goggles should be utilized as required by exposure. Other protective equipment should be utilized as required by the welding standards.

Section 9 - Special Precautions

In welding, precautions should be taken for airborne contaminants which may originate from components of the welding rod.

Arc or spark generated when welding or burning could be a source of ignition for combustible and flammable materials.

MOR 001065

The information in this MSDS was obtained from sources which we believe are reliable. However, the information is provided without any representation or warranty, express or implied, regarding the accuracy or correctness.

The conditions or methods of handling storage, use and disposal of the product are beyond our control and may be beyond our knowledge. SECTION V - HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE:

NOT ESTABLISHED.

(CONTINUED) - SECTION V - HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE :

- ACUTE - (SHORT TERM EXPOSURE)

EYES: MAY CAUSE IRRITATION, REDNESS, SWELLING.
SKIN: MAY CAUSE IRRITATION, REDNESS, RASH.
INGESTION: SWALLOWING LARGE AMOUNTS MAY CAUSE DIGESTIVE DISCOMFORT.

- CHRONIC - (LONG TERM EXPOSURE)

NO CHRONIC DATA ESTABLISHED.
TARGET ORGANS: NONE KNOWN.
ALTHOUGH NO THERE IS NO PRIMARY ROUTE OF ENTRY INTO THE BODY, THE PRIMARY ROUTE OF EXPOSURE IS BY EYE AND SKIN CONTACT.

PRIMARY ROUTE OF ENTRY: <-- INHALATION <-- INGESTION <-- ABSORPTION

EMERGENCY & FIRST AID PROCEDURES

INHALATION :
REMOVE FROM THE AREA TO FRESH AIR. SEEK MEDICAL ATTENTION IF RESPIRATORY IRRITATION DEVELOPS OR IF BREATHING BECOMES DIFFICULT.

EYE CONTACT:
RINSE THE EYES WITH WATER. REMOVE ANY CONTACT LENSES AND CONTINUE FLUSHING WITH PLENTY OF WATER FOR SEVERAL MINUTES. SEEK MEDICAL ATTENTION IF IRRITATION DEVELOPS.

SKIN CONTACT:
WASH AFFECTED AREAS WITH PLENTY OF SOAP AND WATER FOR SEVERAL MINUTES. SEEK MEDICAL ATTENTION IF IRRITATION DEVELOPS.

INGESTION :
GIVE 3 TO 4 GLASSES OF WATER. INDUCE VOMITING BY PLACING FINGER OR BLUNT OBJECT ON THE BACK OF THE VICTIM'S TONGUE. GIVE FLUIDS UNTIL THE VOMITUS IS CLEAR. SEEK MEDICAL ATTENTION.

NOTES TO PHYSICIAN :
N/A

Material Safety Data Sheet

SECTION 1 CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

LUBRICATING OIL 100

MOTOR OIL, INC.
1490 JARVIS AVENUE
ELK GROVE VILLAGE, IL 60007
Phone (847) 956-7550 Fax (847) 956-0399

Rec. 8/17/99

CAS Registry Number	64742-54-7
Product Type	High quality lubricating oil and non-detergent motor oil. SAE 30.
Preparation/Revision Date	04/19/1995

SECTION 2 COMPOSITION/INFORMATION ON INGREDIENTS

Component Name	CAS Number	OSHA PEL	ACGIH TLV	% (Optional)
Petroleum Lubricating Base Oil	64742-54-7	5 mg/m³	5 mg/m³	100

SECTION 3 HAZARDS IDENTIFICATION

Principal Hazard(s) Contains petroleum oil. Avoid breathing mists or vapors. Avoid prolonged or repeated skin contact.

MOR 001071

SECTION 4 FIRST AID MEASURES

Oral **DO NOT induce vomiting.** Get immediate medical attention.

Eye Flush with water for at least 15 minutes or until irritation subsides. Get medical attention if eye irritation develops or persists.

Skin Wash with soap and water. Immediately remove contaminated clothing. Get medical attention if irritation develops. Launder contaminated clothing before reuse. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

Inhalation Vapor pressure is very low. Vapor inhalation under ambient conditions is normally not a problem. If adverse effects are observed, remove exposed person to fresh air. If breathing is labored, administer oxygen. If breathing has stopped, apply artificial respiration. If overexposed to oil mist, remove from further exposure until excessive oil mist subsides.

1024K21,22

SECTION 5	FIRE FIGHTING MEASURES
Flash Point	490 °F COC Typical
Upper Flammable Limit	Not Determined
Lower Flammable Limit	Not Determined
Extinguishing Media	Carbon Dioxide, dry chemical, water spray (fog) and foam. Note: water, fog and foam may cause frothing and spattering.
Special Firefighting Procedures	Wear self-contained breathing apparatus. Avoid breathing fumes and vapors. Use water spray (fog) to cool containers exposed to high heat or open flame.
Unusual Fire & Explosion Hazards	Empty containers contain residue and/or vapors. DO NOT WELD, CUT, PRESSURIZE, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, SPARKS, FLAME, STATIC ELECTRICITY OR OTHER SUCH SOURCES OF IGNITION. Keep empty containers closed and dispose of in an environmentally safe manner and in accordance with all governmental regulations.
Autoignition Temperature	Not Determined

SECTION 6	ACCIDENTAL RELEASE MEASURES
Spill Procedures	Evacuate all non-essential personnel. Personal Protective Equipment must be worn, see Personal Protection Section for PPE recommendations. Remove sources of ignition. Ventilate spill area. Prevent entry into sewers and waterways. Pick up free liquid for recycle and/or disposal. Residual liquid can be absorbed on inert material. Assure conformity with applicable Federal, state and local regulations.

SECTION 7	HANDLING AND STORAGE
Handling Procedures	Keep away from potential sources of ignition. Avoid breathing vapors if present. Keep containers closed when not in use. Wash thoroughly after handling. Make sure that proper warning labels are affixed in accordance with 29 CFR 1910.1200. Use good personal hygiene around product.
Storage Procedures	Do not store near potential sources of ignition. Store in a well ventilated area. Store in a dry area. Do not store around food or eating areas.

SECTION 8	EXPOSURE CONTROLS/PERSONAL PROTECTION
Ventilation Procedures	Use material in well ventilated areas only. Additional ventilation or exhaust may be required to maintain air concentrations below recommended exposure limits.
Gloves Protection	Use chemical-resistant gloves, if needed, to avoid prolonged or repeated skin contact.
Eye Protection	Safety glasses. Use splash goggles or face shield when eye contact may occur.
Respiratory Protection	Under normal conditions, respirator is not usually required. Use NIOSH/MSHA approved disposable dust/mist mask if the recommended exposure limit is exceeded.
Clothing Recommendation	Use a chemical -resistant apron or other impervious clothing, if needed, to avoid contaminating regular clothing, which could result in prolonged or repeated skin contact.

1024K21,22

SECTION 9	PHYSICAL AND CHEMICAL PROPERTIES		
Appearance	*Yellow colored liquid*	**Vapor Pressure**	*Not Determined*
Specific Gravity	0.88	**Vapor Density (Air = 1)**	Greater than 5
Viscosity	100 cSt @ 40 °C	**Evaporation Rate**	Not Determined
Odor	Typical oil odor	**Pour or Melting Point**	15 °F
Odor Threshold	Not Determined	**Percent Volatile**	Not Determined
pH	Essentially neutral	**Boiling Point**	IBP approximately 635 °F
Water Solubility	Negligible	**Molecular Weight**	Not Determined

SECTION 10	STABILITY AND REACTIVITY
Stability	Material is normally stable at room temperature and pressure. See the Handling and Storage Section for further details.
Incompatibility	Oxidizing agents.
Hazardous Polymerization	Will not occur.
Thermal Decomposition	Fumes, smoke, carbon monoxide, sulfur oxides, aldehydes and other decomposition products, in the case of incomplete combustion.

SECTION 11	TOXICOLOGICAL INFORMATION
Oral Toxicity	*Not determined.*
Eye Irritation	Product contacting eyes may cause eye irritation.
Skin Irritation	May cause skin irritation. Prolonged or repeated contact may cause dermatitis. Symptoms may include redness, edema, drying, defatting and cracking of skin.
Dermal Toxicity	Not determined.
Inhalation Toxicity	Not determined.
Respiratory Irritation	If material is misted or if vapors are generated from heating, exposure may cause irritation of mucous membranes and the upper respiratory tract.
Dermal Sensitivity	No data available to indicate product or components may be skin sensitizer.
Inhalation Sensitivity	No data available to indicate product or components may be respiratory sensitizers.
Chronic Toxicity	Not determined.
Carcinogenicity	The components of this product have not been found to be a carcinogen under either NTP, IARC Monographs or current OSHA regulations.
Other	Under conditions which may generate mists, observe the OSHA PEL 5mg/m³.

Petroleum resins	64742-16-1	
Proprietary additives	Mixture	Less than 6%

This product, as manufactured by Exxon, does not contain polychlorinated biphenyls (PCB's).
All components of this product are listed on the U.S. TSCA inventory.
See Section E for Health and Hazard Information.
See Section H for additional Environmental Information.

HAZARDOUS MATERIALS IDENTIFICATION SYSTEM (HMIS)

Health	Flammability	Reactivity	BASIS
1	1	0	Recommended by Exxon

EXPOSURE LIMIT FOR TOTAL PRODUCT	BASIS
5 mg/m3 for oil mist (aerosol) for an 8-hour workday	OSHA Regulation 29 CFR 1910.1000 and recommended by the American Conference of Governmental Industrial Hygienists (ACGIH). ACGIH states that the air is to be sampled by a method that does not collect vapor; in addition, it lists a 10 mg/m3 STEL.

C. PRIMARY ROUTES OF ENTRY AND EMERGENCY AND FIRST AID PROCEDURES

EYE CONTACT
If splashed into the eyes, flush with clear water for 15 minutes or until irritation subsides. If irritation persists, call a physician.

SKIN
In case of skin contact, remove any contaminated clothing and wash skin with soap and water. Launder or dry-clean clothing before reuse. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

INHALATION
Vapor pressure is very low. Vapor inhalation under ambient conditions is normally not a problem. If overcome by vapor from hot product, immediately remove from exposure and call a physician. If breathing is irregular or has stopped, start resuscitation; administer oxygen, if available. If overexposed to oil mist, remove from further exposure until excessive oil mist condition subsides.

INGESTION
If ingested, DO NOT induce vomiting; call a physician immediately.

D. FIRE AND EXPLOSION HAZARD INFORMATION

FLASH POINT (MINIMUM)	AUTOIGNITION TEMPERATURE
249°C (480°F)	Greater than 260°C (500°F)

ASTM D 92, Cleveland Open Cup

NATIONAL FIRE PROTECTION ASSOCIATION (NFPA) - HAZARD IDENTIFICATION

Health	Flammability	Reactivity	BASIS
1	1	0	Recommended by Exxon

HANDLING PRECAUTIONS

Use product with caution around heat, sparks, pilot lights, static electricity, and open flame.

FLAMMABLE OR EXPLOSIVE LIMITS (APPROXIMATE PERCENT BY VOLUME IN AIR)

Estimated values: Lower Flammable Limit 0.9% Upper Flammable Limit 7%

EXTINGUISHING MEDIA AND FIRE FIGHTING PROCEDURES

Foam, water spray (fog), dry chemical, carbon dioxide and vaporizing liquid type extinguishing agents may all be suitable for extinguishing fires involving this type of product, depending on size or potential size of fire and circumstances related to the situation. Plan fire protection and response strategy through consultation with local fire protection authorities or appropriate specialists.

The following procedures for this type of product are based on the recommendations in the National Fire Protection Association's "Fire Protection Guide on Hazardous Materials", Tenth Edition (1991):

Use water spray, dry chemical, foam or carbon dioxide to extinguish the fire. Use water to keep fire-exposed containers cool. If a leak or spill has not ignited, use water spray to disperse the vapors and to provide protection for persons attempting to stop a leak. Water spray may be used to flush spills away from exposures. Minimize breathing of gases, vapor, fumes or decomposition products. Use supplied-air breathing equipment for enclosed or confined spaces or as otherwise needed.

DECOMPOSITION PRODUCTS UNDER FIRE CONDITIONS

Fumes, smoke, carbon monoxide, sulfur oxides, aldehydes and other decomposition products, in the case of incomplete combustion.

"EMPTY" CONTAINER WARNING

"Empty" containers retain residue (liquid and/or vapor) and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

Do not attempt to refill or clean containers since residue is difficult to remove. "Empty" drums should be completely drained, properly bunged and promptly returned to a drum reconditioner. All other containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

For work on tanks refer to Occupational Safety and Health Administration regulations, ANSI Z49.1, and other governmental and industrial references pertaining to cleaning, repairing, welding, or other contemplated operations.

E. HEALTH AND HAZARD INFORMATION

VARIABILITY AMONG INDIVIDUALS

Health studies have shown that many petroleum hydrocarbons and synthetic lubricants pose potential human health risks which may vary from person to person. As a precaution, exposure to liquids, vapors, mists or fumes should be minimized.

EFFECTS OF OVEREXPOSURE (Signs and symptoms of exposure)

[illegible] and increased incidence of infection.

In accordance with the current OSHA Hazard Communication Standard criteria, this product does not require a cancer hazard warning. This is because the product is formulated from base stocks which are severely hydrotreated, severely solvent extracted, and/or processed by mild hydrotreatment and extraction. Alternatively, it may consist of components not otherwise affected by IARC criteria, such as atmospheric distillates or synthetically derived materials, and as such is not characterized by current IARC classification criteria.

Prolonged or repeated skin contact with this product tends to remove skin oils, possibly leading to irritation and dermatitis; however, based on human experience and available toxicological data, this product is judged to be neither a "corrosive" nor an "irritant" by OSHA criteria.

Product contacting the eyes may cause eye irritation.

Product has a low order of acute oral and dermal toxicity, but minute amounts aspirated into the lungs during ingestion or vomiting may cause mild to severe pulmonary injury and possibly death.

This product is judged to have an acute oral LD50 (rat) greater than 5 g/kg of body weight, and an acute dermal LD50 (rabbit) greater than 3.16 g/kg of body weight.

PRE-EXISTING MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED BY EXPOSURE

None recognized

F. PHYSICAL DATA

The following data are approximate or typical values and should not be used for precise design purposes.

BOILING RANGE
IBP Approximately 321°C (610°F)
by ASTM D 2887

SPECIFIC GRAVITY (15.6°C/15.6°C)
0.92

MOLECULAR WEIGHT
Not determined

pH
Essentially neutral

POUR, CONGEALING OR MELTING POINT
-7°C (20°F)
Pour Point by ASTM D 97

VISCOSITY
429 cSt @ 40°C

VAPOR PRESSURE
less than 0.01 mm Hg @ 20°C

VAPOR DENSITY (AIR = 1)
Greater than 5

PERCENT VOLATILE BY VOLUME
Negligible from open container in 4 hours @ 38°C (100°F)

EVAPORATION RATE @ 1 ATM. AND 25°C (77°F) (n-BUTYL ACETATE = 1)
Less than 0.01

SOLUBILITY IN WATER @ 1 ATM. AND 25°C (77°F)
Negligible; less than 0.1%

G. REACTIVITY

...may present a serious explosion hazard.

H. ENVIRONMENTAL INFORMATION

CLEAN WATER ACT / OIL POLLUTION ACT
This product may be classified as an oil under Section 311 of the Clean Water Act, and under the Oil Pollution Act. Discharges or spills into or leading to surface waters that cause a sheen must be reported to the National Response Center (1-800-424-8802).

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED
Recover free product. Add sand, earth or other suitable absorbent to spill area. Minimize breathing vapors. Minimize skin contact. Open all windows and doors. Keep product out of sewers and watercourses by diking or impounding. Advise authorities if product has entered or may enter sewers, watercourses, or extensive land areas.
Assure conformity with applicable governmental regulations.

THE FOLLOWING INFORMATION MAY BE USEFUL IN COMPLYING WITH VARIOUS STATE AND FEDERAL LAWS AND REGULATIONS UNDER VARIOUS ENVIRONMENTAL STATUTES:

THRESHOLD PLANNING QUANTITY (TPQ), EPA REGULATION 40 CFR 355
(SARA Sections 301-304)
No TPQ for product or any constituent greater than 1% or 0.1% (carcinogen).
TOXIC CHEMICAL RELEASE REPORTING, EPA REGULATION 40 CFR 372 (SARA Section 313)
No toxic chemical is present greater than 1% or 0.1% (carcinogen).
HAZARDOUS CHEMICAL REPORTING, EPA REGULATION 40 CFR 370 (SARA Sections 311-312)
EPA Hazard Classification Code: Not Applicable

I. PROTECTION AND PRECAUTIONS

VENTILATION
Use local exhaust to capture vapor, mists or fumes, if necessary. Provide ventilation sufficient to prevent exceeding recommended exposure limit or buildup of explosive concentrations of vapor in air. No smoking, or use of flame or other ignition sources.

RESPIRATORY PROTECTION
Use supplied-air respiratory protection in confined or enclosed spaces, if needed.

PROTECTIVE GLOVES
Use chemical-resistant gloves, if needed, to avoid prolonged or repeated skin contact.

EYE PROTECTION
Use splash goggles or face shield when eye contact may occur.

OTHER PROTECTIVE EQUIPMENT
Use chemical-resistant apron or other impervious clothing, if needed, to avoid contaminating regular clothing, which could result in prolonged or repeated skin contact.

To prevent fire or explosion risk from static accumulation and discharge, effectively bond and/or ground product transfer system in accordance with (THE) National Fire Protection Association PUBLICATIONS.
Keep containers closed when not in use. Do not store near heat, sparks, flame or strong oxidants.
In order to prevent fire or explosion hazards, use appropriate equipment. Information on electrical equipment appropriate for use with this product may be found in the latest edition of the National Electrical Code (NFPA-70). This document is available from the National Fire Protection Association, Batterymarch Park, Quincy, Massachusetts 02269.

PERSONAL HYGIENE
Minimize breathing vapor, mist or fumes. Avoid prolonged or repeated contact with skin. Remove contaminated clothing; launder or dry-clean before re-use. Remove contaminated shoes and thoroughly clean before re-use; discard if oil-soaked. Cleanse skin thoroughly after contact, before breaks and meals, and at end of work period. Product is readily removed from skin by waterless hand cleaners followed by washing thoroughly with soap and water.

J. TRANSPORTATION AND OSHA RELATED LABEL INFORMATION

TRANSPORTATION INCIDENT INFORMATION
For further information relative to spills resulting from transportation incidents, refer to latest Department of Transportation Emergency Response Guidebook for Hazardous Materials Incidents.

U.S. DOT HAZARDOUS MATERIALS SHIPPING DESCRIPTION
Not regulated

OSHA REQUIRED LABEL INFORMATION
In compliance with hazard and right-to-know requirements, where applicable OSHA Hazard Warnings may be found on the label, bill of lading or invoice accompanying this shipment.
Note: Product label may contain non-OSHA related information also.

The health and safety information presented herein must be used in conjunction with the pertinent standards for training, work practices and facilities design established by OSHA, NIOSH, NFPA, API, NEC, NSC, UNDERWRITERS, BUREAU OF MINES, and similar organizations.

The information and recommendations contained herein are, to the best of Exxon's knowledge and belief, accurate and reliable as of the date issued. Exxon does not warrant or guarantee their accuracy or reliability, and Exxon shall not be liable for any loss or damage arising out of the use thereof.

The information and recommendations are offered for the user's consideration and examination, and it is the user's responsibility to satisfy itself that they are suitable and complete for its particular use. If buyer repackages this product, legal counsel should be consulted to insure proper health, safety and other necessary information is included on the container.

to provide additional health and hazard classification information. The ratings recommended are based upon the criteria supplied by the developers of these rating systems, together with Exxon's interpretation of the available data.

Give your pneumatic equipment a new lease on life . . .

with NFO's AIR LUBE, a specially formulated lubricant for pneumatic equipment

Keep your pneumatic equipment running longer – up to three times longer – cleaner with less downtime and greater power using NFO's AIR LUBES.

THE ISSUE

Virtually every manufacturing or processing plant utilizes pneumatic powered equipment. The life and performance of these air tools are essential to the productivity and operation of the plant. Excessive downtime, slower performing tools and shorter tool life can easily destroy productivity gains made elsewhere. Inadequate lubrication of these pneumatic operated tools is one of the major contributors to poor performance.

THE PERFORMANCE

Air contains moisture, dirt, dust, and other contaminates that can interfere with the proper functioning of pneumatic equipment. Moisture exists in virtually all air lines due to the relative humidity in the air and the condensation caused by the expansion and cooling of compressed air. Air line lubricants that are not specially formulated to operate in the presence of moisture can interact with the moisture to form sludge, rust, and gum. This can be especially true for tools that are left in storage for any length of time. Other contaminates can pass through the filter system and cause varnishes and sticky substances to form in the tools and air lines thus lowering the performance of the tools. Lubricants such as hydraulic oils, motor oils, and penetrating oils, commonly used in air tools are not designed for air systems and are not able to combat the moisture and contaminates.

THE SOLUTION

NFO's AIR LUBE family of products is specifically designed for pneumatic equipment and air operated tools.

- AIR LUBE's special emulsifiers can absorb up to 10% of its weight in water which prevents the formation of gum and sludge.

- AIR LUBE's base oil, unlike most conventional oils, will not leave hard carbon deposits that can rob equipment of power.

- AIR LUBEs contain anti-wear and extreme pressure additives which will provide additional lubrication for the gears and other moving parts of heavily loaded tools.

- AIR LUBE's corrosion preventative package helps prevent the rust that can occur in tools and airlines due to the moisture carried in the air.

- AIR LUBE's formulation is designed not to affect rubber or plastic valves and seals.

THE RESULTS

With as few as three drops a minute of NFO's AIR LINE lubricant, you can expect the following added benefits from your pneumatic equipment and tools:

- Increased Life
- More power
- Longer service life
- Storage protection
- Lower lubricant usage
- Decreased total cost of pneumatic system

Application		General purpose for the majority of applications.	For older equipment using Neoprene or Buna-s rubber parts and seals.	Winter Grade for low temp conditions	USDA H-1 approved for food service requirements.	Synthetic base for wider temp range and elastomer compatibility.	Air Tool Cleaner for removal of rust, dirt, and varnish.

These high quality AIR LUBES are available in a wide variety of package sizes that allow the end user to choose the application method best suited to their environment. The packages include, 55 gallon drums, 120 lb. kegs, 5 gallon pails, 1 gallon cans, and plastic pint bottles. NFO AIR LUBEs are also available in several other viscosity grades for extreme applications.

A partial listing of leading manufacturers that recommend or use NFO's AIR LUBE

• General Motors • Chrysler • Ford • Union Pacific Railroad • Amtrak • Boeing • Ingersol Rand/ARO •
• Cooper Power Tools • Anheuser Busch • Chicago Pneumatic • Snap-On Tools • Pepsi Cola • John Deere •
• Kenworth Truck • Georgia Pacific • ITW Paslode • Stanley Air Tools • Rotor Tool • Magnus Equipment •
• Beardsley & Piper • Kent Tool • Cleveland Vibrator • Intool, formerly Dresser •

MATERIAL SAFETY DATA SHEET

ORANGE INDUSTRIAL LUBE. 390

NFPA HAZARD RATING
4 - EXTREME
3 - HIGH
2 - MODERATE
1 - SLIGHT
0 - INSIGNIFICANT

DIVISION AND LOCATION - SECTION 1

DIVISION: Famous Lubricants, Inc.
LOCATION: 124 W. 47TH Street
Chicago, Illinois 60609
EMERGENCY TELEPHONE NUMBER: 312-268-2555

CHEMICAL AND PHYSICAL PROPERTIES - SECTION II

CHEMICAL NAME: petroleum hydrocarbon plus additives
FORMULA: not applicable
HAZARDOUS DECOMPOSITION PRODUCTS:
oxides of phosphorous from burning
hydrochloric acid on burning or decompostion
oxides of sulfur
sulfur dioxide or hydrogen sulfide, depending upon decomposition conditions
oxides of nitrogen
carbon monoxide and carbon dioxide from burning
chlorinated hydrocarbons
INCOMPATIBILITY (KEEP AWAY FROM):
strong oxidizers such as hydrogen peroxide, bromine, and chromic acid.

TOXIC AND HAZARDOUS INGREDIENTS:	%	CAS#
none		

FORM: semi-solid ODOR: mineral oil
APPEARANCE: grease COLOR: dark amber
SPECIFIC GRAVITY (WATER = 1): @ room temperature .935
BOILING POINT: no data available
MELTING POINT: not applicable
SOLUBILITY IN WATER (BY WEIGHT %): negligible at 25°C
VOLATILE (BY WEIGHT%): not applicable
EVAPORATION RATE: not applicable
VAPOR PRESSURE (mm Hg AT 20°C): not applicable
VAPOR DENSITY (AIR=1): not applicable
pH (AS IS): not applicable
STABILITY: product is stable under normal conditions
VISCOSITY SUS @ 100°F: ≥ 100

1997

MATERIAL SAFETY DATA SHEET

FIRE AND EXPLOSION DATA - SECTION III

SPECIAL FIRE FIGHTING PROCEDURES:
dense smoke. fire fighters should wear an approved self-contained breathing apparatus.
do no use water except as fog.

UNUSUAL FIRE AND EXPLOSION HAZARDS:
dense smoke

FLASHPOINT: (Method Used) Cleveland Open Cup > 170°C (338°F)

FLAMMABLE LIMITS %: no data available

EXTINGUISHING AGENTS:
dry chemical or water fog or CO_2 or foam or sand/earth
water may cause frothing
closed containers exposed to fire may be cooled with water

HEALTH HAZARD DATA - SECTION IV

PERMISSIBLE CONCENTRATIONS (air): not applicable

CHRONIC EFFECTS OF OVEREXPOSURE: none when used with good personal hygiene practices. may otherwise cause skin and eye irritation upon prolonged or repeated contact.

ACUTE TOXICOLOGICAL PROPERTIES:
no data available

EMERGENCY FIRST AID PROCEDURES:
EYES: immediately flush with large quantities of water for at least 15 minutes and call a physician.
SKIN CONTACT: remove excess with cloth or paper. wash thoroughly with soap and water. for high pressure injection under skin see physician immed.
INHALATION: remove exposed person to fresh air if discomfort is experienced while handling hot product.
IF SWALLOWED: contact physician immediately.

ADVICE TO PHYSICIANS:
high velocity injection under the skin may result in serious injury. if left untreated the affected area is subject to infection,disfigurement, lack of blood circulation and may require amputation. when dispensed by high pressure equipment this material can easily penetrate the skin and leave a bloodless puncture wound. material injected into a finger be deposited into the palm of the hand. within 24-48 hours the patient may experience swelling, discoloration, and throbbing pain in the affected area. immediate treatment by a surgical specialist is recommended.

SPECIAL PROTECTION INFORMATION - SECTION V

VENTILATION TYPE REQUIRED (Local, mechanical, special):
none

RESPIRATORY PROTECTION (Specify type):
none

continued on next page

MATERIAL SAFETY DATA SHEET
ORANGE INDUSTRIAL LUBE. 390

EYE PROTECTION:
chemical safety goggles and, if handled hot, full face shield
PROTECTIVE GLOVES:
none
OTHER PROTECTIVE EQUIPMENT:
none

HANDLING OF SPILLS OR LEAKS - SECTION V1

PROCEDURES FOR CLEAN-UP:
transfer bulk of mixture into another container. absorb residue with an inert material such as earth, sand, or vermiculite. sweep up and dispose as solid waste in accordance with local, state, and federal regulations.
WASTE DISPOSAL:
dispose of in accordance with all applicable federal, state and local regulations.

SPECIAL PRECAUTIONS - SECTION VII

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:
keep containers closed until ready for use.

TRANSPORTATION DATA - SECTION VII

D.O.T.: not required
REPORTABLE QUANTITY: not applicable
FREIGHT CLASSIFICATION: petroleum lubricating grease.
SPECIAL TRANSPORTATION NOTES:

ENVIRONMENTAL/SAFETY REGULATIONS - SECTION IX

SECTION 313 (TITLE III SUPERFUND AMENDMENT AND REAUTHORIZATION ACT):
this product does not contain any chemical in sufficient quantity to be subject to reporting requirements of Section 313 of Title III of the Superfund Ammendments and Reauthorization Act of 1986 and 40 CFR Part 372.
STATE RIGHT TO KNOW INFORMATION:
NEW JERSEY - petroleum oil (grease)
PENNSYLVANIA - formula trade secret

ROUTES OF ENTRY AND FIRST AID PROCEDURES

EYE CONTACT
If splashed into the eyes, flush with clear water for 15 minutes or until irritation subsides. If irritation persists, call a physician.

SKIN
In case of skin contact, remove any contaminated clothing and wash skin thoroughly with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressur injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

INHALATION
Vapor pressure is very low. Vapor inhalation under ambient conditions is normally not a problem. If overcome by vapor from hot product, immediately remove from point of exposure and call a physician. If breathing is irregular or has stopped, start resuscitation and administer oxygen. If over exposed to oil mist, remove from further exposure until excessive oil mist subsides.

INGESTION
DO NOT induce vomiting if ingested: CALL A PHYSICIAN AT ONCE

FIRE AND EXPLOSION DATA

FLASH POINT ASTM D 92 Cleveland Open Cup	AUTOIGNITION TEMP.
400°F	>500°F

NATIONAL FIRE PROTECTION ASSOC. -NFPA- HAZARD IDENTIFICATION

0=Insignificant	1=Slight	2=Moderate	3=High	4=Extreme

HANDLING PRECAUTIONS
Use product with caution, around heat, sparks, pilot lights, open flame, and static electricity.

FLAMMABLE OR EXPLOSIVE LIMITS - VOLUME % IN AIR - ESTIMATED VALUES
Lower Flammable Limit - 0.9% Upper Flammable Limit - 7%

EXTINGUISHING MEDIA AND FIRE FIGHTING PROCEDURES
Foam, water spray (fog), dry chemical, carbon dioxide and vaporizing liquid type extinguishing agents may all be suitable for fires involving this type of product, depending on size of fire and circumstances related to the situation. Plan fire protection and response strategy through consultation with local fire protection authorities. The following procedures for this type of product are based on the recommendations in the NFPA'S "FIRE PROTECTION GUIDE on HAZARDOUS MATERIALS", 8th Ed. : Use water spray, dry chemical, foam or carbon dioxide.

MATERIAL SAFETY DATA SHEET

ORANGE TURBINE OIL 150

Use water to keep fire exposed containers cool. If a leak or a spill has not ignited use water spray to disperse the vapor and to provice protection for men attempting to stop a leak. Water spray may be used to flush spills away from exposures. Minimize breathing gases, vapor, fumes or products of decomposition. Use supplied-air breathing apparatus for enclosed and confined areas.

DECOMPOSITION PRODUCTS UNDER FIRE CONDITIONS

Fumes, smoke, carbon monoxide, sulfur oxides, aldehydes, nitrogen oxides, and other decomposition products, in the case of incomplete combustion.

EMPTY CONTAINER WARNING

Empty containers can retain residue, either liquid or vapor and could be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, sparks, static electricity or other sources of ignition; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to clean since residue is difficult to remove. Empty drums should be completely drained, properly bunged and promptly returned to the lubricant supplier or to a drum reconditioner. All other containers should be disposed of in environmentally safe manner and in accordance with governmental regulations.

HEALTH AND HAZARD INFORMATION

HEALTH STUDIES

Health studies have shown that many petroleum hydrocarbons pose potential human health risks which may vary from person to person. As a precaution, exposure to liquids, vapors, mists or fumes should be minimized.

SIGNS AND SYMPTOMS OF EXPOSURE OR OVEREXPOSURE

Prolonged or repeated skin contact may cause skin irritation.

NATURE OF HAZARD AND TOXICITY

Repeated and prolonged overexposure to oil mists may result in droplet deposition, oil granuloma formation, inflammation and increased incidence of infection.

Current OSHA Hazard Communication Standards do not require this product to have a cancer hazard warning. This is because the product is formulated from base oils which are either severely hydrotreated or severely solvent extracted. Repeated skin contact with this product tends to remove skin oils, possibly leading to irritation or dermatitis. Based on human experience and available toxicological data, this product is judged to be neither a "corrosive" nor an "irritant" by OSHA. Product contacting the eyes may cause eye irritation. The product has a low order of acute oral and dermal toxicity. However, minute amounts aspirated into the lungs during ingestion or vomiting may cause mild to severe pulmonary injury and possible death. This product is judged to have and an acute Oral Lethal Dose 50% (rat) greater than 5 g/Kg of body weight and an acute Dermal Lethal Dose 50% (rabbit) greater than 3.16 g/Kg of body weight. There are no recognized pre-existing medical conditions which may be aggravated by exposure to this product.

PRE-EXISTING MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED BY EXPOSURE

None recognized

MATERIAL SAFETY DATA SHEET

ORANGE TURBINE OIL 150

REACTIVITY DATA

This product is stable and will NOT react violently with water.
Hazardous polymerization will NOT occur.
Avoid contact with strong oxidants such as liquid chlorine, concentrated oxygen, sodium hypochlorite and calcium hypochlorite.

ENVIRONMENTAL INFORMATION

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED
Recover spilled product. Add sand, earth or other suitable absorbant to spill area. Minimize breathing vapors. Minimize skin contact. Open all windows and doors. Keep product out of sewers and watercourses. Advise authorities if product has entered or may enter sewers, watercourses, or extensive land areas. Conform with all governmental regulations.

REPORTABLE QUANTITY (RQ) EPA REG. 40 CFR 302 CERCLA SECT. 102
No RQ for product or any constituent greater than 1% or 0.1% (carcinogen).

THRESHOLD PLANNING QUANTITY (TPQ) EPA REG. 40 CFR 355 SARA SECT.301-304
No TPQ for product or any constituent greater than 1% or 0.1% (carcinogen).

TOXIC CHEMICAL RELEASE REPORTING EPA REG. 40 CFR 372 SARA SECT.313
No toxic chemical is present greater than 1% or 0.1% (carcinogen).

EPA HAZARD CLASSIFICATION CODE EPA REG. 40 CFR 370 SARA SECT.311-312
No Acute No Chronic No Fire No Pressure No Reactive XX Not applicable

CLEAN WATER ACT
Under Section 311 (b) (4) Clean Water Act, discharges of crude oil and petroleum products in any kind or form to surface waters must be immediately reported to the National Response Center 800-424-8802.

TOXIC SUBSTANCE CONTROL ACT
This product does not contain any TSCA 12b reportable chemical substance:

SPECIAL PROTECTION INFORMATION

VENTILATION
Use local exhaust to capture vapor, mists or fumes. Provide enough ventilation to prevent exceeding recommended exposure limit or build-up of explosive concentrations of vapor in air. Use explosion-proof equipment. No smoking or open flame.

RESPIRATORY PROTECTION
Use supplied-air respiratory protection in confined or enclosed areas.

PROTECTIVE GLOVES
Use chemical-resistant gloves, if needed, to prevent prolonged contact.

MOR 001094

EYE PROTECTION
Use splash goggles or face shield when eye contact may occur.

OTHER PROTECTIVE EQUIPMENT
Use chemical-resistant apron, if needed, to avoid contaminating regular clothing which could result in prolonged skin contact.

RECEIVED
1997

MATERIAL SAFETY DATA SHEET

ORANGE TURBINE OIL 150

WORK PRACTICES AND CONTROLS

Keep containers closed when not in use. DO NOT store near heat. Keep away from sparks, open flame and/or strong oxidants. Store below 150°F.

PERSONAL HYGIENE

Minimize breathing vapor, mist or fumes. Avoid prolonged skin contact. Remove contaminated clothing, launder before using again. Thoroughly clean oil soaked shoes, discard if necessary. Cleanse skin thoroughly after contact. Product is readily removed from skin by waterless hand cleaners followed by washing thoroughly with soap and water.

TRANSPORTATION AND LABEL DATA

DEPARTMENT OF TRANSPORTATION INFORMATION

MATERIAL SAFETY DATA SHEET

I. PRODUCT IDENTIFICATION

Manufacturer:	WD-40 Company	Telephone:	
Address:	1061 Cudahy Place (92110) P.O. Box 80607 San Diego, California 92138-0607	Emergency Only:	1 (800) 424-9300 (CHEMTREC)
		Information:	(619) 275-1400
		Chemical Name:	Organic Mixture
		Trade Name:	Three-In-One Multi-Purpose Oil

II. HAZARDOUS INGREDIENTS

Chemical Name	CAS Number	%	Exposure Limit ACGIH/OSHA
Severely Hydrotreated Heavy Naphthenic Oil	64742-52-5	> 97	5 mg/M³ TWA (mist)
Non-hazardous Ingredients		< 3	

III. PHYSICAL DATA

Appearance:	Clear amber liquid	Volatiles:	Nil
Odor:	Faint citronella	pH:	Not applicable
Boiling Point:	Above 550°F	Specific Gravity:	0.886 - 0.923 @ 20°C
Freezing Point:	Not applicable	Vapor Pressure:	Not determined
Solubility in Water:	Insoluble	Vapor Density (Air = 1):	Not determined

IV. FIRE AND EXPLOSION

Flash Point:	Above 305°F TOC
Flame Extension:	Not applicable
Extinguishing Media:	CO_2, Dry Chemical, Foam, Water Spray
Fire Fighting Procedures:	Use water to keep fire-exposed containers cool.

V. HEALTH HAZARD / ROUTE(S) OF ENTRY

Symptoms of Overexposure

Inhalation (Breathing): May cause anesthesia, headache, dizziness, nausea and upper respiratory irritation.
Skin Contact: May cause drying of skin and/or irritation.
Eye Contact: May cause irritation, tearing and redness.
Ingestion (Swallowed): May cause irritation, nausea, vomiting and diarrhea.

MOR 001096

First Aid Procedures

Ingestion (Swallowed): Do not induce vomiting. Seek medical attention.
Eye Contact: Immediately flush eyes with large amounts of water for 15 minutes.
Skin Contact: Wash with soap and water.
Inhalation (Breathing): Remove to fresh air. Give artificial respiration if necessary. If breathing is difficult, give oxygen.

DANGER!

Aspiration Hazard: If swallowed, can enter lungs and may cause chemical pneumonitis. Do not induce vomiting. Call Physician immediately.

Suspected Cancer Agent

Yes _____ No __x__ The components in this mixture have been found to be noncarcinogenic by NTP, IARC and OSHA.

VI. REACTIVITY DATA

Stability:	Stable __x__	Unstable _____
Conditions to avoid:	NA	
Incompatibility:	Strong oxidizing materials	
Hazardous decomposition products:	Thermal decomposition may yield carbon monoxide and/or carbon dioxide.	
Hazardous polymerization:	May occur _____	Will not occur __x__

VII. SPILL OR LEAK PROCEDURES

Spill Response Procedures

Absorb small quantities with sand, earth, sawdust. Large quantities pump into tank.

Waste Disposal Method

Incinerate liquid, bury saturated absorbent in land fill. Dispose of in accordance with local, state and federal regulations.

VIII. SPECIAL HANDLING INFORMATION

Ventilation Requirements:	Use local exhaust to capture vapor, mists or fumes, if necessary. Provide ventilation sufficient to prevent exceeding recommended exposure limit or build-up of explosive concentrations of vapor in air. No smoking, or use of flame or other ignition sources.
Respiratory Protection:	Use air respiratory protection in confined or enclosed spaces, if needed.
Protective Gloves:	Use chemical-resistant gloves, if needed, to avoid prolonged or repeated skin contact.
Eye Protection:	Use splash goggles or face shield when eye contact may occur.

IX. SPECIAL PRECAUTIONS

Keep from open flame. Do not take internally. Avoid excessive inhalation of vapors. Keep from children.

X. REGULATORY INFORMATION

All ingredients for this product are listed on the TSCA inventory.

IV. FIRE AND EXPLOSION

Flash Point:	Tag Open Cup 110°F (minimum)
Flammable Limits:	(Solvent Portion) [Lel] 1.0% [Uel] 6.0%
Extinguishing Media:	CO_2, Dry Chemical, Foam
Special Fire Fighting Procedures:	Contents Under Pressure
Unusual Fire and Explosion Hazards:	FLAMMABLE – U.F.C. level 3 AEROSOL

V. HEALTH HAZARD / ROUTE(S) OF ENTRY

Threshold Limit Value

Aliphatic Petroleum Distillates (Stoddard solvent) lowest TLV (ACGIH 100 ppm.)

Symptoms of Overexposure

Inhalation (Breathing):	May cause anesthesia, headache, dizziness, nausea and upper respiratory irritation.
Skin Contact:	May cause drying of skin and/or irritation.
Eye Contact:	May cause irritation, tearing and redness.
Ingestion (Swallowed):	May cause irritation, nausea, vomiting and diarrhea.

MOR 001098

First Aid Emergency Procedures

Ingestion (Swallowed):	Do not induce vomiting, seek medical attention.
Eye Contact:	Immediately flush eyes with large amounts of water for 15 minutes.
Skin Contact:	Wash with soap and water.
Inhalation (Breathing):	Remove to fresh air. Give artificial respiration if necessary. If breathing is difficult, give oxygen.

Pre-existing medical conditions such as eye, skin and respiratory disorders may be aggravated by exposure.

DANGER!

Aspiration Hazard: If swallowed, can enter lungs and may cause chemical pneumonitis. Do not induce vomiting. Call Physician immediately.

Suspected Cancer Agent

Yes _____ No __x__ The components in this mixture have been found to be noncarcinogenic by NTP, IARC and OSHA.

VI. REACTIVITY DATA

Stability:	Stable __x__	Unstable ____
Conditions to avoid:	NA	
Incompatibility:	Strong oxidizing materials	
Hazardous decomposition products:	Thermal decomposition may yield carbon monoxide and/or carbon dioxide.	
Hazardous polymerization:	May occur _____	Will not occur __x__

VII. SPILL OR LEAK PROCEDURES

Spill Response Procedures

Spill unlikely from aerosol cans. Leaking cans should be placed in plastic bag or open pail until pressure has dissipated.

Waste Disposal Method

Empty aerosol cans should not be punctured or incinerated; bury in land fill. Liquid should be incinerated or buried in land fill. Dispose of in accordance with local, state and federal regulations.

VIII. SPECIAL HANDLING INFORMATION

Ventilation:	Sufficient to keep solvent vapor less than TLV.
Respiratory Protection:	Advised when concentrations exceed TLV.
Protective Gloves:	Advised to prevent possible skin irritation.
Eye Protection:	Approved eye protection to safeguard against potential eye contact, irritation or injury.
Other Protective Equipment:	None required.

IX. SPECIAL PRECAUTIONS

Keep from sources of ignition. Avoid excessive inhalation of spray particles, do not take internally. Do not puncture, incinerate or store container above 120°F. Exposure to heat may cause bursting. Keep can away from electrical current or battery terminals. Electrical arcing can cause burn-through (puncture) which may result in flash fire, causing serious injury. Keep from children.

CHEMICAL	TLV (TWA)	PEL (Transitional Limits)	STEL	Hazard Action Level
Methyl Ethyl Ketone	200 ppm, 590 mg/cu m	200 ppm, 259 mg/cu m	300 ppm, 885 mg/cu m	N/A
Acetone	750 ppm, 1800 mg/cu m	1000 ppm, 2400 mg/cu m	1000 ppm, 2400 mg/cu m	N/A

SECTION 5 REGULATED IDENTIFICATION

DOT PROPER SHIPPING NAME..... CONSUMER COMMODITY ORM-D; Cleaning Compound.
DOT HAZARD CLASS..... N/A
SHIPPING ID NUMBER..... N/A
EPA HAZARDOUS WASTE ID NUMBER... F-005
EPA HAZARD WASTE CLASS..... Ignitable Waste/Toxic Waste

SECTION 6 EFFECTS OF EXPOSURE

ENTRY ROUTE..... INHALE - YES INGEST - YES SKIN - YES EYE - YES
INHALATION..... May cause irritation of mucous membranes, nose & throat, headache, dizziness, nausea, numbness of the extremities and narcosis in high concentrations. Has caused CNS depression & liver damage in animals, and concentrations of 1000-3000 ppm caused retardation of fetal development in rats.
SKIN..... Chronic contact may lead to irritation & dermatitis. Chronic exposure to vapors of high concentration may cause dermatitis. May possibly be absorbed through the skin.
EYE..... Vapors or direct contact may cause irritation.
INGESTION..... May be aspirated into the lungs or cause systemic effects described under inhalation.
TARGET ORGANS... Eye, Skin, Lung, Central Nervous System

SECTION 7 EMERGENCY AND FIRST AID PROCEDURES - 303/623-5716 COLLECT

SKIN..... If irritation arises, wash thoroughly with soap and water. Seek medical attention if irritation persists.
EYES..... If fumes cause irritation, move to fresh air and irrigate eyes with water for 15 minutes. If irritation persists, seek medical attention.
INHALATION... Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Keep victim quiet and warm. Call a poison control center or physician immediately.
INGESTION.... Drink water and call a poison control center or physician immediately. Avoid alcoholic beverages. Never give anything by mouth to an unconscious person.

OATEY CLEANER

SECTION 8 PHYSICAL AND CHEMICAL PROPERTIES

NFPA HAZARD SIGNAL	HEALTH 2 STABILITY 1 FLAMMABILITY 3 SPECIAL NONE
BOILING POINT	133 Degrees F / 56 C
MELTING POINT	N/A
VAPOR PRESSURE	186 mmHg @ 20 Degrees C
VAPOR DENSITY (AIR = 1)	2.0
VOLATILE COMPONENTS	100%
SOLUBILITY IN WATER	27.1% wt. @ 20 degrees C
PH	N/A
SPECIFIC GRAVITY	0.793
EVAPORATION RATE	(BUAC = 1) = 7.7
APPEARANCE	Colorless Liquid
ODOR	Sharp, penetrating odor.
WILL DISSOLVE IN	Water, organic solvents
MATERIAL IS	Liquid

SECTION 9 FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY	LEL =2.15 % Volume UEL= 13.0 % Volume
FLASHPOINT AND METHOD USED	0 - 3 Degrees F. / PMCC
STABILITY	Stable CONDITIONS TO AVOID: Heat, sparks and open flame. HAZARDOUS DECOMP. PDTS.: Carbon monoxide/ carbon dioxide/hydrogen chloride/smoke.
HAZARDOUS POLYMERIZATION	Will not Occur. CONDITIONS TO AVOID: none
INCOMPATIBILITY/MAT. TO AVOID	Acids, oxidizing materials, alkalis, chlorinated inorganics (potassium, calcium and sodium hypochlorite), copper or copper alloys
SPECIAL FIRE FIGHTING PROCEDURE	FOR SMALL FIRES: Use dry chemical, CO2, water or foam extinguisher. FOR LARGE FIRES: Evacuate area and call Fire Department immediately.

SECTION 10 SPILL AND DISPOSAL INFORMATION

SPILL OR LEAK PROCEDURES	Ventilate area, stop leak if it can be done without risk. Take up with sand, earth, or other non-combustible absorbing material.
WASTE DISPOSAL	Dispose of according to local, state, and Federal regulations.

SECTION 11 SAFE USAGE DATA

PROTECTIVE EQUIPMENT TYPES	EYES: Safety glasses with side shields. RESPIRATORY: NIOSH-approved cannister respirator in absence of adequate ventilation. GLOVES: Rubber Gloves OTHER: Eye wash and safety shower should be available.
VENTILATION	GENERAL MECHANICAL: Exhaust ventilation capable of maintaining emissions at the point of use below PEL. LOCAL EXHAUST: Open doors & windows. If used in enclosed area, use exhaust fans.
PRECAUTIONS	HANDLING & STORAGE: Keep away from heat, sparks and flames; store in cool, dry place. OTHER: Containers, even empties will retain residue and vapors.

SECTION 12 MANUFACTURER OR SUPPLIER DATA

FIRM NAME & MAILING ADDRESS	OATEY CO., 4700 West 160th Street P.O. Box 35906 Cleveland, Ohio 44135
OATEY PHONE NUMBER	(216) 267-7100
EMERGENCY PHONE NUMBER	For Emergency First Aid call (303) 623-5716 COLLECT For chemical transportation emergencies ONLY, call Chemtrec at 1-800-424-9300

SECTION 13 DISCLAIMER

The information herein has been compiled from sources believed to be reliable, up-to-date, and is accurate to the best of our knowledge. ********** VI. FIRE AND EXPLOSION HAZARD DATA **********

FLASH POINT F(C): > 400(204) (ASTM D-92)
FLAMMABLE LIMITS. LEL: .6 UEL: 7.0
EXTINGUISHING MEDIA: Carbon dioxide, foam, dry chemical and water fog.
SPECIAL FIRE FIGHTING PROCEDURES: Water or foam may cause frothing. Use water to keep fire exposed containers cool. Water spray may be used to flush spills away from exposure. For fires in enclosed areas, firefighters must use self-contained breathing apparatus. Prevent runoff from fire control or dilution from entering streams or drinking water supply.
UNUSUAL FIRE AND EXPLOSION HAZARDS: None.
NFPA HAZARD ID: Health: 0, Flammability: 1, Reactivity: 0

********** VII. REACTIVITY DATA **********

STABILITY (Thermal, Light, etc.): Stable
CONDITIONS TO AVOID: Strong oxidation
INCOMPATIBILITY (Materials to Avoid): Strong oxidizers
HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide.
HAZARDOUS POLYMERIZATION: Will not occur.

********** VIII. SPILL OR LEAK PROCEDURE **********

ENVIRONMENTAL IMPACT: Report spills as required to appropriate authorities. U. S. Coast Guard regulations require immediate reporting of spills that could reach any waterway including intermittent dry creeks. Report spill to Coast Guard toll free number (800) 424-8802.
PROCEDURES IF MATERIAL IS RELEASED OR SPILLED: Absorb on fire retardant treated sawdust, diatomaceous earth, etc. Shovel up and dispose of at an appropriate waste disposal facility in accordance with current applicable laws and regulations, and product characteristics at time of disposal.
WASTE MANAGEMENT: Product is suitable for burning in an enclosed, controlled burner for fuel value or disposal by supervised incineration. Such burning may be limited pursuant to the resource conservation and recovery act. In addition, the product is suitable for processing by an approved recycling facility or can be disposed of at any government approved waste disposal facility. Use of these methods is subject to user compliance with applicable laws and regulations and consideration of product characteristics at time of disposal.

********** IX. SPECIAL PROTECTION INFORMATION **********

EYE PROTECTION: No special equipment required.
SKIN PROTECTION: No special equipment required. However, good personal hygiene practices should always be followed.
RESPIRATORY PROTECTION: No special requirements under ordinary conditions of use and with adequate ventilation.
VENTILATION: No special requirements under ordinary conditions of use and with adequate ventilation.

********** X. SPECIAL PRECAUTIONS **********

No special precautions required.

Mobil

MOBIL VACUUM PUMP OIL 601906-00 Page 3 of 5

********** XI. TOXICOLOGICAL DATA **********

---ACUTE TOXICOLOGY---
ORAL TOXICITY (RATS): LD50: > 15 g/kg Nontoxic (estimated) ---Based on testing of similar products and/or the components.
DERMAL TOXICITY (RABBITS): LD50: > 8 g/kg Nontoxic (estimated) --- Based on testing of similar products and/or the components.
INHALATION TOXICITY (RATS): Not applicable ---Harmful concentrations of mists and/or vapors are unlikely to be encountered through any customary or reasonably foreseeable handling, use, or misuse of this product.
EYE IRRITATION (RABBITS): Expected to be non-irritating. ---Based on testing of similar products and/or the components.
SKIN IRRITATION (RABBITS): Expected to be non-irritating. ---Based on testing of similar products and/or the components.

---SUBCHRONIC TOXICOLOGY (SUMMARY)---
Severely solvent refined and severely hydrotreated mineral base oils have been tested at Mobil Environmental and Health Sciences Laboratory by dermal application to rats 5 days/week for 90 days at doses significantly higher than those expected during normal industrial exposure. Extensive evaluations including microscopic examination of internal organs and clinical chemistry of body fluids, showed no adverse effects.

---CHRONIC TOXICOLOGY (SUMMARY)---
The base oils in this product are severely solvent refined and/or severely hydrotreated. Chronic mouse skin painting studies of similar oils showed no evidence of carcinogenic effects.

Mobil

MOBIL VACUUM PUMP OIL 601906-00 Page 4 of 5

********** XII. REGULATORY INFORMATION **********

GOVERNMENTAL INVENTORY STATUS: All components registered in accordance with TSCA.

DOT:
Shipping Name: Not applicable
Hazard Class: Not applicable

US OSHA HAZARD COMMUNICATION STANDARD: Product assessed in accordance with OSHA 29 CFR 1910.1200 and determined not to be hazardous.

RCRA INFORMATION: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D); does not exhibit the hazardous characteristics of ignitability, corrosivity, or reactivity, and is not formulated with the contaminants listed in the Toxicity Characteristic (TC) Rule as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

THIS PRODUCT HAS BEEN CSOA APPROVED UNDER THE FOLLOWING CATEGORY: H2 - Lubricants With No Food Contact

U.S. Superfund Amendments and Reauthorization Act (SARA) Title III:
This product contains no "EXTREMELY HAZARDOUS SUBSTANCES".

SARA (302) REPORTABLE HAZARD CATEGORIES: None

This product contains no chemicals reportable under SARA (313) toxic release program.

THE FOLLOWING PRODUCT INGREDIENTS ARE CITED ON THE LISTS BELOW:

CHEMICAL NAME	CAS NUMBER	LIST CITATIONS
*** NO REPORTABLE INGREDIENTS ***		

--- KEY TO LIST CITATIONS ---
1 = OSHA Z, 2 = ACGIH, 3 = IARC, 4 = NTP, 5 = NCI,
6 = EPA CARC, 7 = NFPA 49, 8 = NFPA 325M, 9 = DOT MNT, 10 = CA RTK,
11 = IL RTK, 12 = MA RTK, 13 = MN RTK, 14 = NJ RTK, 15 = NJ 293,
16 = FL RTK, 17 = PA RTK, 18 = CA P65.
--- NTP, IARC, AND OSHA INCLUDE CARCINOGENIC LISTINGS ---

NOTE: MOBIL PRODUCTS ARE NOT FORMULATED TO CONTAIN PCBS.

Product: **PC-101 Protective Coating**
Code: PC-101; Key: PC-101
Synthetic Resin

MATERIAL SAFETY DATA SHEET

Product Identification

Trade Name: PC-101 Protective Coating
Chemical Family: Synthetic Resin
Date Prepared: October 30, 1993
Dot Class: Flammable Liquid (Xylene and Toluene), Liquid, NA1993

Pan American Research Hazard Rating		Scale
Toxicity	2	4 - Extreme
Fire	3	3 - High
Reactivity	0	2 - Moderate
Special	-	1 - Slight
		0 - Insignificant

Component Information

This information must be included in all material safety data sheets that are copied and distributed for this product.

Component Number	Chemical Name	% By Weight	CAS REG NO.
1	Acrylic copolymer	35-38	Not Hazardous
2	Butyl methacrylate	1 max	97-88-1
3	*Toluene	< 20	108-88-3
4	*Xylene	< 43	1330-20-7

* This chemical is subject to S.A.R.A. Title III Section 313 and 40 CFR372 reporting.

EMERGENCY RESPONSE INFORMATION

First Aid Procedures

INHALATION — Move subject to fresh air. Give artificial respiration if breathing has stopped. Call a physician.

INGESTION — If swallowed, give 2 glasses of water to drink. Consult a physician. Never give anything by mouth to an unconscious person. Do not induce vomiting.

EYE AND SKIN CONTACT — IMMEDIATELY flush eyes with a large amount of water for at least 15 minutes. See a physician. Wash affected skin areas thoroughly with soap and water. Remove and wash contaminated clothing thoroughly.

NOTE TO PHYSICIAN — Acute massive exposure to toluene can cause transient hematuria and albumnuria. Cardiac dysrhythmias can occur after massive inhalation.

Fire Fighting Information

UNUSUAL HAZARDS	Vapors can travel to a source of ignition and flash back.
EXTINGUISHING AGENTS	Use the following extinguishing media when fighting fires involving this material: (1) polar solvent (alcohol foam), (2) carbon dioxide, (3) water spray, or (4) dry chemical.
PERSONAL PROTECTIVE EQUIPMENT	Wear self-contained breathing apparatus (pressure-demand MSHA/NIOSH approved or equivalent) and full protective gear.
SPECIAL PROCEDURES	Use water spray to cool containers exposed to fire.

Spill or Leak Handling Information

PERSONAL PROTECTION	Appropriate protective equipment must be worn when handling a spill of this material. See the PERSONAL PROTECTION MEASURES section for recommendations. If exposed to material during clean-up operations, see the FIRST AID PROCEDURES section for actions to follow.
PROCEDURES	Eliminate all ignition sources. Evacuate the spill area. Floor may be slippery; use care to avoid falling. Contain spills immediately with inert materials (e.g. sand, earth). Transfer liquids and solid diking material to separate suitable containers for recovery or disposal. Keep dust to a minimum. CAUTION: Keep spills and cleaning runoff out of municipal sewers and open bodies of water. NOTE: Spills on porous surfaces can contaminate ground water.

HAZARD INFORMATION

Health Effects From Overexposure

PRIMARY ROUTES OF EXPOSURE	Inhalation, Skin Contact, and Eye Contact
INHALATION	Inhalation of solvent vapor or mist can cause the following: (1) irritations of nose, throat, and lungs, (2) drowsiness, (3) slurred speech, (4) headache, (5) nausea, (6) dizziness, (7) stupor, and/or (8) unconsciousness.
EYE CONTACT	Material can cause the following: (1) substantial irritation and/or (2) corneal clouding.
SKIN CONTACT	Material can cause the following: (1) moderate skin irritation and/or (2) defatting and drying of the skin which can lead to irritation and dermatitis.

Health Effects From Overexposure - Continued

DELAYED EFFECTS	Prolonged or repeated overexposure to toluene/xylene can cause the following: (1) irritation of the respiratory tract, (2) enlarged liver, (3) kidney effects, (4) cardiac sensitization, and/or (5) severe skin irritation.

Fire And Explosive Properties

FLASH POINT	7°C / 45°F Pensky Martens Closed Cup
LOWER EXPLOSIVE LIMIT	1.2% Estimate
UPPER EXPLOSIVE LIMIT	7.1% Estimate

Reactivity Information

INSTABILITY	This material is considered stable.
HAZARDOUS DECOMPOSITION PRODUCTS	There are no known hazardous decomposition products for this material.
HAZARDOUS POLYMERIZATION	Product will not undergo polymerization.
INCOMPATIBILITY	Avoid contact with strong oxidizing agents.

ACCIDENT PREVENTION INFORMATION

Component Exposure Information

This product contains the following chemicals. This information must be included in all material safety data sheets that are copied and distributed for this product.

Component Number	Chemical Name	% By Weight	CAS REG NO.
1	Acrylic copolymer	35-38	Not Hazardous
2	Butyl methacrylate	1 max	97-88-1
3	*Toluene	< 20	108-88-3
4	*Xylene	< 43	1330-20-7

* This chemical is subject to S.A.R.A. Title III Section 313 and 40 CFR372 reporting.

MOR 001106

Exposure Limit Information

Component		OSHA		ACGIH	
Number	Units	TWA	STEL	TWA	STEL
1		None	None	None	None
2	ppm	None	None	None	None
3	ppm	100	150	100	150
4	ppm	100	150	100	150

Personal Protection Measures

RESPIRATORY PROTECTION

A respiratory protection program meeting OSHA 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use. None required if airborne concentrations are maintained below the TWA/TLV's listed in the COMPONENT EXPOSURE INFORMATION section.

Up to 10 times the TWA/TLV: MSHA/NIOSH approved (or equivalent) half-mask, air-purifying respirator.

Up to 100 times the TWA/TLV: MSHA/NIOSH approved (or equivalent) full-face piece, air-purifying respirator.

Above 100 times or Unknown: MSHA/NIOSH approved (or equivalent) self-contained breathing apparatus in the positive pressure mode, OR MSHA/NIOSH approved (or equivalent) full-face piece airline respirator in the positive pressure mode with emergency escape provisions.

Air-purifying respirators should be equipped with organic vapor cartridges.

EYE PROTECTION

Use chemical splash goggles (ANSI Z87.1 or approved equivalent).

HAND PROTECTION

The glove(s) listed below may provide protection against permeation. Gloves of other chemically resistant materials may not provide adequate protection: Nitrile. Gloves should be removed and replaced immediately if there is any indication of degradation or chemical breakthrough.

OTHER PROTECTION

Use chemically resistant apron or other impervious clothing to avoid prolonged or repeated skin contact.

MOR 001107

Facility Control Measures

VENTILATION	Use explosion proof local exhaust ventilation with a minimum capture velocity of 100 ft/min (10 m/min) at the point of vapor evolution. Refer to the current edition of *Industrial Ventilation: A Manual of Recommended Practice* published by the American Conference of Governmental Industrial Hygienists for information on the design, installation, use, and maintenance of exhaust systems.
OTHER PROTECTIVE EQUIPMENT	Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower.

Storage And Handling Information

STORAGE CONDITIONS	Material can burn; limit indoor storage to approved areas equipped with automatic sprinklers. Store away from excessive heat (e.g. steam pipes, radiators), from sources of ignition and from reactive materials. Low temperature storage can cause handling problems. Viscosity of material will increase.
HANDLING PROCEDURES	Ground all containers when transferring material.
OTHER	CONTAINERS HAZARDOUS WHEN EMPTY. Since emptied containers retain product residue (vapors and/or liquid) follow all MSDS and label warnings even after container is emptied. Residual vapors in empty containers may explode on ignition. DO NOT cut, drill, grind or weld on or near container.

SUPPLEMENTAL INFORMATION

Typical Physical Properties

APPEARANCE	Clear
COLOR	Amber
STATE	Liquid
ODOR CHARACTERISTICS	Aromatic Hydrocarbon
VISCOSITY @ 75°	160 cps
SPECIFIC GRAVITY (WATER = 1)	0.95
VAPOR DENSITY (AIR = 1)	> 1
VAPOR PRESSURE	22 mm Hg @20°C/68°F Estimated
MELTING POINT	-95°C/-139°F Initial
BOILING POINT	110°C/230°F Initial
SOLUBILITY IN WATER	Practically insoluble
PERCENT VOLATILITY	62-66%
EVAPORATION RATE (BAC = 1)	> 1

MOR 001108

Toxicity Information

ACUTE DATA

The information shown in the HEALTH EFFECTS FROM OVEREXPOSURE section is based on toxicity profiles of similar materials or on the solvents present in this material.

Oral LD50 (rat):	5000 mg/kg
Dermal LD50 (rabbit):	12124 mg/kg
Inhalation LCLo (rat):	4000 ppm for 4 hrs
Skin Irritation (rabbit):	moderate irritation
Eye Irritation (rabbit):	severe irritation

REPRODUCTIVE/TERATOLOGY DATA

Toluene has been demonstrated to be embryofetotoxic and teratogenic in laboratory animals.

Waste Disposal

Procedure

Dispose of this material at a facility that complies with local, state, and federal regulations.

REGULATORY INFORMATION

Workplace Classifications

This product is considered hazardous under the OSHA Hazard Communication Standard (29CFR 1910.1200) and is a *controlled product* under the Canadian Workplace Hazardous Materials Information System (WHMIS).

Transportation

US DOT Hazard Class FLAMMABLE LIQUID

The above information applies to the U.S. DOT classification of this material (49CFR 172.101). Various exemptions and/or restrictions may apply.

Emergency Planning & Community Right-To-Know (SARA Title 3)

SECTION 311/312 CATEGORIZATIONS (40CFR 370) This product is a hazardous chemical under 29CFR 1910.1200, and is categorized as an immediate and delayed health, and flammability physical hazard.

SECTION 313 INFORMATION (40CFR 372) This product contains chemicals which are listed in Section 313 above *de minimis* concentrations. The following listed chemicals are present: (Quantity present is found elsewhere on this MSDS) Toluene (108-88-3), Xylene (1330-20-7).

Cercla Information (40CFR 302.4)

This material has a component or components with a reportable quantity under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Superfund Amendments and Re authorization Act (SARA) Title III section 304. The components, CAS numbers, and reportable quantities are listed below. Spills of a component in excess of its reportable quantity must be reported to the National Response Center (1-800-424-8802) and to the appropriate state and local emergency response organizations: Toluene (108-88-3) 1000lbs, Xylene (1330-20-7) 1000lbs.

RCRA Information

When a decision is made to discard this material as supplied, it is classified as a RCRA hazardous waste with the characteristic of ignitablility, hazardous waste number: D0001.

Chemical Control Law Status

All components of this product are listed or are excluded from listing on the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

PC-101® is a trademark of Pan American Research & Development Corp or one of its subsidiaries or affiliates.

Material Safety Data Sheet

Section I

Product Name or Number (As it appears on label) PANASERT MP GREASE	
Manufacturer's Name: Sato Special Oil Co., Ltd.	Emergency Phone No 06-932-2451 (Osaka, Japan)
Manufacturer's Address: 4-17, 1-chome, Imafuku-higashi, Jotoku, Osaka, Japan	
Hazardous Material Description, Proper Shipping Name, Hazard Classes, ID No: None	
Additional Hazard Classes: None	
Chemical Family: Hydrocarbon-based Grease	Formula: Mixture

Section II — Ingredients (List all ingredients)

Chemical Names	CAS No.	Wt%	Listed as a Carcinogen in NTP, IARC, or OSHA 1910(z) (specify)
alpha olefin	68037-01-4	72.7	None
lithium 12-hydroxystearate	7620-77-1	6.0	None
2,2'-methylenebis(4-methyl-)-6-tert-butylphenol	119-47-1	0.3	None
sulfonic acids, petroleum, barium salts	61790-48-5	0.5	None
pentaerithrytol fattyacid ester	11138-60-6	20.0	None
zinc alkyldithiophosphate	14324-55-1	0.5	None

Section III — Physical Data

Boiling Point: Not relevant		Specific Gravity = (Water = 1)	0.9	Vapor Pressure: (@25°C)	Neg.
Percent Volatile = by Volume(%) .	N.A.	Percent Solid(s) = by Weight(%)	<15	Vapor Density (Air =.1) =	N.A.
Evaporation Rate = (= 1)	N.A.	Solubility in Water =	<0.1 %		
Appearance and Odor: Grease , white .Very little odor			Is Meterial: (Circle)	~~Liquid~~ Gas	~~Solid~~ Paste ~~Powder~~

Section IV — Fire and Explosion Hazard Data

Flash Point @base oil >220°C	Method Used: (C.O.C)	Flammable Limits:	LEL N.A.	UEL N.A.
Extinguishing Media: Foam , dry chemical , carbon dioxide.				
Special Fire Fighting Procedures: Not Required.				
Unusual Fire and Explosion Hazards: Not Required.				

Section V — Health Hazard Data

Effects of Over Exposure:Conditions to avoid Skin Contact: No significant effect. Eye Contact : May cause slight irritation.	Threshold Limit Value	N.A.
	Permissible Exposure Limit	N.A.
	Other Limit	N.A.
Primary Routes of Entry ___ Inhalation ___ Skin Contact (Specify)	Other:	
Emergency and First Aid Procedures: Skin: Remove paste from skin with dry cloth or towel and wash exposed area with soap. Eye : Rinse with plenty of water. In serious cases seek medical advice.		

Section VI - Reactivity Data

Stability	Unstable		Conditions to Avid:
	Stable	X	
Incompatibility(Materials to avoid): None			
Hazardous Decomposition Products: None			
Hazardous Polymerization	May Occur		Conditions to avoid: None
	Will Not Occur	X	

Section VII - Spill or leak Procedures

Steps to be taken in case materials is released or spilled:
Contain the spill or leak. Scrap up with cardboard or rag and place in Container.

Waste Disposeal Method:
Can be burned in accordance with regulation.

Reportable Quantites(in lbs)	CERCLA	N.A.	SARA	N.A.	Other	N.A.	Specify

RCRA Hazardous Waste Number(s):

Volatile Organic Compounds(VOC)(as packaged minus water).

Theoretical(lbs/Gal)	N.A.	Analytical(lbs/Gal)	N.A.

Section VIII - Sepecial Protection Information

Respiratory Protection: Not Required.
(Specify type)

Ventilation	Local Exhaust(Specify Rates) Not Required.	Special N.A.
Requirements	Mechanical(General) (Special Rate) N.A.	Other N.A.
Protective Gloves: Plastic film or Rubber gloves (Specify Type)		Eye Protection: Safety Glasses (Specify Type)

Equipment: Eyewash equipment

Section IX – Special Precautions

Precautions to be taken in Handling and Storing and/or other precautions:

1. Keep container closed.
2. Store in a cool place.
3. Keep away from heat and flame.
4. Don't lay the container on its side.
5. Avoid contact with eyes and prolonged or repeated skin contact.

Manufacturer's TSCA Certificate

CERTIFICATE

Name of Product: PANASERT TOUCH LUBE
Model Number : N990PANA-021

We hereby certify that all chemical substances found in the listed product companies with all applicable rules and orders found under TSCA(Toxic Substance Control Act). It consists of the following chemical substances,which are included in the TSCA inventory.

Ingredient(s) Chemical Name	Common Name	CAS Number
Distillates,petroleum,solvent-refined heavy paraffinic	Highly refined minersl oils	64741-88-4
Residual oils,petroleum,solvent-refined	Highly refined minersl oils	64742-01-4
2-Methyl Penetans	iso-Hexane	107-83-5
Polytetrafluoroethylene plastics	Teflon	9002-84-0
sulfonic acids,petroleum,barium salts	barium sulfonate	61790-48-5

Date : 3 FEBRUARY 1999
Name : Hiromi Kuma
Signature: Hiromi Kuma
Title : General Manager

MATERIAL SAFETY DATA SHEET
HISSAN TRADING CO., LTD.

Date Prepared : 28, February 1998
Date Revised :
Page 1 of 6

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name : Panasert Touch Lube
Model Number : N990PANA-021
Manufactured By : HISSAN TRADING CO., LTD
14TH FLOOR , B WING SHUWA SHIBA-PARK BLDG.
4-1, SHIBA-KOEN, 2-CHOME,
MINATOKU, TOKYO, 105-0001 JAPAN
Tel : 81-3-5405-6105
Fax : 81-3-5405-6106

2. COMPOSITION / INFORMATION ON INGREDIENTS

INGREDIENTS	CAS #
Distillates, petroleum, solvent-refined heavy paraffinic	64741-88-4
Residual oils, petroleum, solvent-refined	64742-01-4
2-Methyl Pentane	107-83-5
Polytetrafluoroethylene plastics	9002-84-0
Sulfonic acids, petroleum, barium salts	61790-48-5

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW : Brown Liquid with white powder.
Extremely flammable.

POTENTIAL HEALTH EFFECTS

Eye Effects : May cause slight eye and mucous membrane irritation.
Skin Effects : May cause slight skin irritation.
Ingestion Effects : No exposure expected under normal conditions.
Inhalation Effects : Large amount of mist if inhaled, may cause Irritation of nose and throat mucous membranes.

Chronic Effects/Carcinogenicity : None of the components in this material is listed by IARC, EU or ACGIH as a carcinogen.

4. FIRST AID MEASURES

Eye	: Flush with large amount of water, lifting upper and lower lids occasionaly, get medical attention.
Skin	: Thoroughly wash exposed area with soap and water.
Ingestion	: Get medical attention immediately.
Inhalation	: If affected, remove individual to fresh air, keep person warm, quiet and get medical attention.

5. FIRE FIGHTING MEASURES

Flash Point	: -20 ℃
Flammable Limits	: No data
Autoignition Temperature	: 280 ℃
Unusual Fire and Explosion Hazard	: Highly flammable liquid. Can release vapors that form flammable mixutures with air.
Extinguishing Media	: Powder, Foam, Carbon Dioxide, Sand
Fire Fighting	: Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes. Keep container(s) exposed to fire cool by spraying with water.
Hazardous Combustion Products	: Carbon Monoxide, Carbon Dioxide.

(Continued on page 3)

6. ACCIDENTAL RELEASE MEASURES

Spill and Leakage Procedures : Handle as a flammable liquid. Absorb on sand, clay, or other absorbent materials. Eliminate ignition sources. Dispose of in accordance with local, state and federal regulations governing combustible waste.

7. HANDLING AND STORAGE

Handling : Use only in well ventilated areas. Avoid prolonged inhalation of excessive vapor and contact with eyes.

Prevention of Fire and Explosion : Keep away from heat, spark, flames and other sources of ignition. Protect containers from direct sunlight and do not expose to temperatures exceeding 50℃ .

Storage : Keep out of reach of children. Keep in a dry, cool, and dark place

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

INGREDIENTS	MAK-value
Mineral Oil	None established
2-Methyl Pentane	200ppm
Teflon	None established

Engineering Controls : Not required under normal conditions.

Respiratory Protection : Use respirator if it is needed.

Skin Protection : Not required under normal conditions.

Eye Protection : Not required under normal conditions.

(Continued on page 4)

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance : Brown liquid with white Teflon powder
Odor : Odor of mixture of mineral oil and solvent
PH : No data
Vapor Pressure : No data
Vapor Density : No data
Evaporation Rate : No data
Boiling Point : No data
Specific Gravity : 0.85
Viscosity : 8.3cst(40℃)
Flash Point : -20℃

10. STABILITY AND REACTIVITY

Stability : stable
Incompatibility : Oxidizers
Hazardous Decomposition : Carbon monoxide and Carbon dioxide.

11. TOXICOLOGICAL INFORMATION

Acute oral toxicity : 22g/kg(rat)
Eye irritation : No data
Skin irritation : No data

(Continued on page 5)

Skin sensitizatio : No data
Inhalation : No data
Mutagenicity : No data
Carcinogenicity : No data

12. ECOLOGICAL INFORMATION

No data

13. DISPOSAL CONSIDERATIONS

Dispose in accordance with local, state and federal regulations governing combustible waste.

14. TRANSPORT INFORMATION

UN No. : 1268

15. REGULATORY INFORMATION

Warning symbol : F+
Risk-phrase : Extremely Flammable(R12)
Safety-phrase : Keep out of reach of children(S2)
Keep away from sources of ignition-No Smoking(S16)
Do not breathe gas/fumes/vapour/spray(S23)
Use only in well ventilated areas(S51)

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50℃. Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material.

(Continued on page 6)

Permabond
a division of National Starch and Chemical Corporation

Ref No 073184

Technical Data Sheet
PERMABOND ESP308, ESP309, and ESP310

PERMABOND ESP—SINGLE PART TOUGHENED EPOXY ADHESIVE

Permabond ESP toughened epoxies form a new class of adhesives. They combine the structural strength of standard epoxies with unparalleled peel, impact and cleavage resistance. Often metal deformation or metal fatigue results before the adhesive fails. These epoxies also have excellent adhesion to a wide range of other materials.

Permabond ESP are pre-mixed and thus require less handling than two-component epoxies. They require a heat cure in the range of 300-400°F. Cure through large volumes can easily be effected, thus making it also suitable for potting applications.

Physical Properties	ESP308	ESP309	ESP310
Color	silver grey	cream	silver grey
Filler type	metallic	inorganic	metallic
Specific gravity (g/cc)	1.5	1.6	1.5
Viscosity at 25°C/77°F, cps	200,000	150,000	400,000
Flow characteristics (at cure temp)	free flow	partial flow	no flow
Shelf life @ 25°C/77°F	10 weeks		
@ 5°C/40°F	9 months		

Electrical and Thermal Properties	ESP308	ESP309	ESP310
Thermal expansion coefficient, in/in/°C			
below Tg	53.4×10^{-6}	58.6×10^{-6}	57.7×10^{-6}
above Tg	178×10^{-6}	176×10^{-6}	173×10^{-6}
Glass transition temperature—Tg	118°C	113°C	118°C
Thermal conductivity, $\frac{BTU/ft}{ft^2/hr/°F}$	0.41	0.32	0.40
Volume resistivity, ohm-cm	1.5×10^{4}	3×10^{13}	3.1×10^{6}
Dielectric strength, Volts/mil	—	1400	—

Curing Conditions	150°C/ 300°F	180°C/ 355°F	200°C/ 390°F
Gel Time (seconds)	140	40	20
Cure Time (minutes)*	45	17	12

*These times are typical for components cured in an air circulating oven. If other methods of heating (i.e. Induction, Infra-Red, Hot Plate) are used then the cure time can be significantly reduced. If large components are involved then additional time may be required to allow for heating up.

Performance Characteristics—All Grades

Tensile Shear Strength: (ASTM D-1002, Chemically treated substrates)

	Aluminum	Steel	StSteel	Copper	Brass	Carbide	Ferrite	SMC Plastic
MPa	40	41	40	28	26	40	15*	12*
psi	5800	6000	5800	4000	3800	5800	2200*	1800*

*Denotes failure of the bonded material not the adhesive joint.

NON WARRANTY The information given and the recommendations made herein are based on our research and are believed to be accurate but no guaranty of their accuracy is made. In every case we urge and recommend the purchasers before using any product in full scale production make their own tests to determine to their own satisfaction whether the product is of acceptable quality and is suitable for their particular purpose under their own operating conditions. The products discussed herein are sold without any warranty, expressed or implied. No representative of ours has any authority to make any representation, guaranty or warranty not contained herein and you, and each of your customers, agree and know the circumstances prevailing in their business. Nothing contained herein shall be construed to imply the non existence of any relevant patents or to constitute a permission, inducement or recommendation to practice any invention covered by any patent without authority from the owner of the patent.

Hazard: No effects anticipated.

3. HAZARDS IDENTIFICATION

Emergency Overview:
Appearance: Clear, colorless liquid
Odor: Mild hydrocarbon

HMIS:
Health: 1
Flammability: 1
Reactivity: 0
Protective Equipment: X - See protective equipment, Section 8.
NFPA:
Health: 0
Flammability: 1
Reactivity: 0
Symbol: Not applicable
Potential Health Effects:
Eye Contact: Causes mild irritation
Skin Contact: Causes mild irritation
Skin Absorption: No effects anticipated
Target Organs: Not applicable
Ingestion: Very large doses may cause: central nervous system depression kidney damage rapid pulse and respirations convulsions
Target Organs: None reported
Inhalation: No effects anticipated
Target Organs: Not applicable
Medical Conditions Aggravated: None reported
Chronic Effects: None reported
Cancer / Reproductive Toxicity Information:
This product does NOT contain any OSHA listed carcinogens.

This product does NOT contain any IARC listed chemicals.

This product does NOT contain any NTP listed chemicals.

Additional Cancer / Reproductive Toxicity Information: None reported
Toxicologically Synergistic Products: None reported

4. FIRST AID

Eye Contact: Immediately flush eyes with water for 15 minutes. Call physician.
Skin Contact (First Aid): Wash skin with plenty of water. Call physician if irritation develops.
Ingestion (First Aid): Give large quantities of water. Call physician immediately.
Inhalation: Remove to fresh air.

5. FIRE FIGHTING MEASURES

Flammable Properties: Can burn in fire, releasing toxic vapors.
Flash Point: >100° C (>212° F)
Method: Open cup
Flammability Limits:
Lower Explosion Limits: 2.6%
Upper Explosion Limits: 12.6%
Autoignition Temperature: 371° C (700° F)
Hazardous Combustion Products: Toxic fumes of: carbon monoxide, carbon dioxide.
Fire / Explosion Hazards: May react violently with: oxidizers
Extinguishing Media: Carbon dioxide Alcohol foam. Dry chemical. Water.
Fire Fighting Instruction: As in any fire, wear self-contained breathing apparatus pressure-demand and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Spill Response Notice:
Only persons properly qualified to respond to an emergency involving hazardous substances may respond to a spill according to federal regulations (OSHA 29 CFR 1910.120(a)(v)) and per your company's emergency response plan and guidelines/procedures. See Section 13, Special Instructions for disposal assistance.
Containment Technique: Absorb spilled liquid with non-reactive sorbent material. Dike large spills to keep spilled material from entering sewage and drainage systems or bodies of water.
Clean-up Technique: Absorb spilled liquid with non-reactive sorbent material. Sweep up material. Place material in a plastic bag. Mark bag 'Non-hazardous trash', and dispose of as normal refuse. Decontaminate the area of the spill with a soap solution.
Evacuation Procedure: Evacuate as needed to perform spill clean-up. If conditions warrant, increase the size of the evacuation.
Special Instructions (for accidental release): Not applicable
304 EHS RQ (40 CFR 355): Not applicable
D.O.T. Emergency Response Guide Number: None

7. HANDLING / STORAGE

Handling: Avoid contact with eyes Wash thoroughly after handling. Maintain general industrial hygiene practices when using this product.
Storage: Protect from: heat Keep away from: oxidizers
Flammability Class: Class IIIB

8. EXPOSURE CONTROLS / PROTECTIVE EQUIPMENT

Engineering Controls: Have an eyewash station nearby. Maintain general industrial hygiene practices when using this product.
Personal Protective Equipment:

Eye Protection: safety glasses with top and side shields
Skin Protection: disposable latex gloves
Inhalation Protection: adequate ventilation
Precautionary Measures: Avoid contact with: eyes Wash thoroughly after handling. Protect from: heat Keep away from: oxidizers
TLV: Not established
PEL: Not established

9. PHYSICAL / CHEMICAL PROPERTIES

Appearance: Clear, colorless liquid
Physical State: Liquid
Molecular Weight: Not applicable
Odor: Mild hydrocarbon
pH: 6.1
Vapor Pressure: Not determined
Vapor Density (air = 1): Not determined
Boiling Point: 188° C (370° F)
Melting Point: Not determined
Specific Gravity (water = 1): 1.032
Evaporation Rate (water = 1): 0.01
Volatile Organic Compounds Content: Not determined
Partition Coefficient (n-octanol / water): Not applicable
Solubility:
Water: Soluble
Acid: Soluble
Other: Not determined
Metal Corrosivity:
Steel: Not determined
Aluminum: Not determined

10. STABILITY / REACTIVITY

Chemical Stability: Stable when stored under proper conditions.
Conditions to Avoid: Extreme temperatures
Reactivity / Incompatibility: May react violently in contact with: oxidizers
Hazardous Decomposition: Heating to decomposition releases toxic fumes of carbon monoxide and carbon dioxide.
Hazardous Polymerization: Will not occur.

11. TOXICOLOGICAL INFORMATION

Product Toxicological Data:
LD50: None reported
LC50: None reported
Dermal Toxicity Data: Propylene Glycol: rabbit LD50 = 20.8 g/kg
Skin and Eye Irritation Data: Propylene Glycol: Skin human 500 mg/7D - MILD; Eye rabbit 500 mg/24H - MILD
Mutation Data: Propylene Glycol: Cytogenetic analysis, DNA inhibition mouse - subcutaneous - 8000 mg/kg

Reproductive Effects Data: Propylene Glycol: Intraperitoneal mouse TDLo = 100 gm/kg -fetoxicity, post implantation mortality

--

Ingredient Toxicological Data: Propylene Glycol: Oral rat LD50 = 20 g/kg

12. ECOLOGICAL INFORMATION

Product Ecological Information: --
No ecological data available for this product.
Ingredient Ecological Information: --
No ecological data available for the ingredients of this product.

13. DISPOSAL CONSIDERATIONS

EPA Waste ID Number: None
Special Instructions (Disposal): Not applicable
Empty Containers: Rinse three times with an appropriate solvent. Dispose of empty container as normal trash.
NOTICE (Disposal): These disposal guidelines are based on federal regulations and may be superseded by more stringent state or local requirements. Please consult your local environmental regulators for more information.

15. REGULATORY INFORMATION

U.S. Federal Regulations:

O.S.H.A.: This product meets the criteria for a hazardous substance as defined in the Hazard Communication Standard. (29 CFR 1910.1200)

E.P.A.:

S.A.R.A. Title III Section 311/312 Categorization (40 CFR 370): Immediate (Acute) Health Hazard

S.A.R.A. Title III Section 313 (40 CFR 372): This product does NOT contain any chemical subject to the reporting requirements of Section 313 of Title III of SARA.

302 (EHS) TPQ (40 CFR 355): Not applicable

304 CERCLA RQ (40 CFR 302.4): Not applicable

304 EHS RQ (40 CFR 355): Not applicable

Clean Water Act (40 CFR 116.4): Not applicable

RCRA: Contains no RCRA regulated substances.

C.P.S.C.: Not applicable

State Regulations:

California Prop. 65: No Prop. 65 listed chemicals are present in this product.

Identification of Prop. 65 Ingredient(s): None

Trade Secret Registry: Not applicable

National Inventories:

U.S. Inventory Status: All ingredients in this product are listed on the TSCA 8(b) Inventory (40 CFR 710).

TSCA CAS Number: Not applicable

(970) 669-3050

Autoignition Temperature: Not available
Hazardous Combustion Products: Toxic fumes of: carbon monoxide, carbon dioxide.
Fire / Explosion Hazards: None reported
Extinguishing Media: Dry chemical, Carbon dioxide Alcohol foam.
Fire Fighting Instruction: As in any fire, wear self-contained breathing apparatus pressure-demand and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Spill Response Notice:
Only persons properly qualified to respond to an emergency involving hazardous substances may respond to a spill according to federal regulations (OSHA 29 CFR 1910.120(a)(v)) and per your company's emergency response plan and guidelines/procedures. See Section 13, Special Instructions for disposal assistance.
Containment Technique: Releases of this material may contaminate the environment. Remove all combustible material from spill area. Remove all ignition and spark-creating sources from the spill area. Cover spilled liquid with a commercially available flammable liquid sorbent such as vapor barrier blanket or activated carbon to avoid evolution of fumes. Vapors may travel to a source of ignition and flash back. May be ignited by: heat, sparks, or flames. Dike the material to create a barrier to combustibles.
Clean-up Technique: Eliminate all sources of ignition. Do not breathe the fumes. Cover with an inert material, such as sand. Use only non-sparking tools. Sweep up material. Incinerate material at an E.P.A. approved hazardous waste facility. Decontaminate the area of the spill with a soap solution.
Evacuation Procedure: Evacuate as needed to perform spill clean-up. If conditions warrant, increase the size of the evacuation.
Special Instructions (for accidental release): Not applicable
304 EHS RQ (40 CFR 355): Not applicable
D.O.T. Emergency Response Guide Number: None

7. HANDLING / STORAGE

Handling: Avoid contact with eyes skin clothing Do not breathe mist or vapors. Wash thoroughly after handling. Maintain general industrial hygiene practices when using this product.
Storage: Protect from: sparks, flames and other ignition sources
Flammability Class: Class IIIB

8. EXPOSURE CONTROLS / PROTECTIVE EQUIPMENT

Engineering Controls: Have an eyewash station nearby. Maintain general industrial hygiene practices when using this product.
Personal Protective Equipment:
Eye Protection: chemical splash goggles
Skin Protection: disposable latex gloves lab coat
Inhalation Protection: adequate ventilation
Precautionary Measures: Avoid contact with: eyes skin clothing Do not breathe: mist/vapor Wash thoroughly after handling. Protect from: heat

Material Safety Data Sheet

I. PRODUCT IDENTIFICATION

FOR PRODUCT EMERGENCY CONTACT: CHEM-TEL INC. 1-800-255-3924

Product Name:	Poly Prep Primer
Item No.:	6 10 12
Product Type:	Primer/ Accelerator

II. COMPOSITION

Ingredients	CAS No.	%
n-HEPTANE	142-82-5	95-100
Substituted amidine	6674-22-2	0.1-0.5

III. CHEMICAL AND PHYSICAL PROPERTIES

Vapor Pressure:	35 mm at 68-F
Vapor Density:	3.45
Solubility in Water:	Immiscible
Specific Gravity:	0.68
Boiling Point:	205-210-F
Volatile Organic Compound (EPA Method 24)	99.9%; 680 grams/liter
Evaporation Rate (Ether = 1)	2.7
pH:	Does not apply
Appearance:	Clear liquid
Odor:	Aliphatic

IV. FLAMMABILITY AND EXPLOSIVE PROPERTIES

Flash Point:	30-F	Method: Tag closed cup
Estimated NFPA Code:		
Health Hazard:	1	
Fire Hazard:	3	
Reactivity Hazard:	0	
Specific Hazard:	Does not apply	
Estimated HMIS Code:		
Health Hazard:	1	
Flammability Hazard:	3	
Reactivity Hazard:	0	
Personal Protection:	See Section X.	
Explosive Limits:		
(% by volume in air)Lower	1.1%	
(% by volume in air)Upper	6.7%	
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical	
Hazardous Products Formed by Fire or Thermal Decomp	Irritating organic vapors	
Unusual Fire or Explosion Hazards:	None	
Compressed Gases:	None	
Pressure at Room Temp.:	Does not apply

THE MOREST CORP

V. SPILL OR LEAK AND DISPOSAL PROCEDURES

Steps to be taken in case of spill or leak:	Maintain good ventilation. Eliminate ignition sources. Soak up remainder in an inert absorbent and store in a closed container until disposal.
Recommended methods of disposal:	Incinerate following EPA and local regulations.

VI. STORAGE AND HANDLING PROCEDURES

Storage:	Store below 120-F in a tightly closed container away from oxidizing materials and sources of ignition.
Handling:	Keep away from flame. Avoid prolonged breathing of vapors. Avoid skin or eye contact.

VII. SHIPPING REGULATIONS

DOT (49 CFR 172)
Domestic Ground Transport
Proper Shipping Name: Consumer Commodity (Not more than one liter); Heptanes solution (More than one liter)
Hazard Class or Division: ORM-D (Not more than one liter); Class 3, Packing Group II (More than one liter)
Identification Number: None (Not more than one liter); UN 1206 (More than one liter)
Marine Pollutant: None
IATA
Proper Shipping Name: Heptane Solution
Class or Division: Class 3, Packing Group II
UN or ID Number: UN 1206

VIII. REACTIVITY DATA

Stability: Stable
Hazardous Polymerization: Will not occur.
Hazardous Decomposition Products (non-thermal): None
Incompatability: Strong oxidizers.

IX. EMERGENCY TREATMENT PROCEDURES

Ingestion: Induce vomiting. Obtain medical attention.
Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact: Wash with soap and water.
Eye Contact: Flush at least 15 minutes with water. Obtain medical attention.

X. PERSONAL PROTECTION

Eyes: Safety glasses or goggles.
Skin. Rubber or plastic gloves.
Ventilation: Adequate to avoid exceeding TLV.

XI. HEALTH HAZARD DATA

Toxicity: Eye irritant. Anesthetic. Moderately toxic by ingestion. Residue after evaporation of solvent is destructive to tissue of the mucous membranes, and upper respiratory tract, eyes, and skin.
Primary Routes of Entry: Heptane: Inhalation, ingestion, contact.
Signs and Symptoms of Exposure: Dizziness, anesthesia, unconsciousness.
Existing Conditions Aggravated by Exposure: None known

MATERIAL SAFETY DATA SHEET

I. PRODUCT IDENTIFICATION

Product Name LOCQUIC® PRIMER N Part No. 764-55, 764-71
Product Type Primer Formula No.

II. COMPOSITION

Ingredients	% by Wt.	Hazard
1,1,1-Trichloroethane*	98+	TLV = 350 ppm, Toxic
Organo-Copper Salt	<1	
Trialkylamine Carboxylate	<1	Toxic
Aliphatic carboxylic acid	<1	Irritant

*1,1,1-Trichloroethane (methyl chloroform) has been shown to cause reproductive affects and kidney and liver damage in experimental animals on prolonged inhalation. It is our best technical judgment, that, with proper precautions, normal use of this product poses no such hazards.

III. CHEMICAL AND PHYSICAL PROPERTIES

Vapor Pressure 100 mm at 70°F Specific Gravity 1.32 at 70°F
Vapor Density ~4.5 Boiling Point ~170°F
Solubility in Water Nil pH dna
Appearance Green Liquid Odor Sharp

IV. TOXICITY AND HEALTH HAZARD DATA

Toxicity Possible eye irritant. Moderately toxic by ingestion.
TLV 350 ppm
Est. Dermal LD 50 >2000 mg/kg
Symptoms of Overexposure Headache, nausea, dizziness. Narcosis at high concentration.

Emergency Treatment Procedures
Ingestion: Do not induce vomiting. Keep individual calm. Obtain medical attention.
Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact: Flush with water.
Eye Contact: Flush thoroughly with water. Obtain medical attention.

Personal Protection
Eyes: Safety glasses or goggles recommended.
Skin: Rubber or plastic gloves recommended.
Ventilation: Provide adequate local ventilation to maintain vapor concentration below TLV.

SECTION IV FIRST AID MEASURES

Ingestion : Ingestion is not likely. See supplemental page for emergency procedures.
Inhalation : Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact: Soak in warm water. See supplemental page for emergency procedures.
Eye Contact : See supplemental page for emergency procedures. Obtain medical attention.

SECTION V - FIRE FIGHTING MEASURES

Flash Point : Approximately 185 deg F Method: Tag Closed Cup
Recommended
Extinguishing Agents : Carbon dioxide, foam, dry chemical

Special Firefighting
Procedures : Not available

Hazardous Products Formed
by Fire or Thermal Decomp: Irritating organic vapors.
Unusual Fire or Explosion
Hazards : None
Explosive Limits
(% by volume in air) Lower : Not available
(% by volume in air) Upper : Not available

SECTION VI - ACCIDENTAL RELEASE MEASURES

Steps to be taken in case
of spill or leak : Flood with water to polymerize. Soak up with an inert absorbent.

SECTION VII - HANDLING AND STORAGE

Safe Storage : Store at or below 75 deg F
(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)
Handling : Avoid contact with skin and eyes. Avoid breathing vapor.

SECTION VIII - EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes : Safety glasses or goggles.
Skin : Nitrile or polyethylene gloves and aprons. Do not use cotton.
See supplemental page for additional information.
Ventilation: Local ventilation may be desirable when using large amounts in a confined area.

See Section 2 for Exposure Limits.

SECTION IX - PHYSICAL AND CHEMICAL PROPERTIES

Appearance	: Water white to straw colored liquid.
Odor	: Negligible
Boiling Point	: More than 300 deg F
pH	: Does Not Apply
Solubility in Water	: Polymerized by water
Specific Gravity	: 1.1
Volatile Organic Compound (EPA Method 24)	: 65.0%; 715 grams per liter
Vapor Pressure	: Less than 0.02 mm
Vapor Density	: Not available
Evaporation Rate (Ether = 1)	: Not available

SECTION X - STABILITY AND REACTIVITY

Stability : Stable
Hazardous Polymerization: Will not occur.
Incompatibility : Polymerized by contact with water, alcohols, amines, alkalies.
Hazardous Decomposition
Products (non-thermal) : None

SECTION XI - TOXICOLOGICAL INFORMATION

See Section III

SECTION XII - ECOLOGICAL INFORMATION

No data available

SECTION XIII - DISPOSAL CONSIDERATIONS

Recommended methods of
disposal : Polymerize as above. Incinerate following EPA and local regulations.
EPA Hazardous Waste
Number NH - Not a RCRA Hazardous Waste Material

SECTION XIV - TRANSPORTATION INFORMATION

SECTION XIII - SUPPLEMENT

INFORMATION FOR FIRST AID AND CASUALTY TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT

Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

SKIN ADHESION

First immerse the bonded surfaces in warm, soapy water. Peel or roll the surfaces apart with the aid of a blunt edge, e.g., a spatula or a teaspoon handle; then remove adhesive from the skin with sooap and water. Do not try to pull surfaces apart with a direct opposing action.

EYELID TO EYELID OR EYEBALL ADHESION

In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. *There will be no residual damage. Do not try to open the eyes by manipulation.*

ADHESIVE ON THE EYEBALL

Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is acheived. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH

If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

BURNS

Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn. Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY

It should never be necessary to use such a drastic method to separate accidentally bonded skin.

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

SECTION IV HEALTH INFORMATION

EYE CONTACT
PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE EYES. PRODUCT VAPORS AND/OR MISTS MAY ALSO BE IRRITATING TO THE EYES.

SKIN CONTACT
BASED ON THE PRESENCE OF COMPONENTS 3 AND 7 PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE SKIN. PROLONGED CONTACT MAY CAUSE DAMAGE TO THE SKIN. BASED ON THE PRESENCE OF COMPONENT 9 ABSORPTION THROUGH THE SKIN MAY RESULT IN SYMPTOMS OF EXPOSURE AS THOSE DESCRIBED FOR INHALATION AND INGESTION. PROLONGED OR REPEATED CONTACT MAY RESULT IN DEFATTING AND DRYING OF THE SKIN WHICH MAY RESULT IN DERMATITIS. BASED ON THE PRESENCE OF COMPONENTS 3 AND 7 CONTACT MAY RESULT IN A PRONOUNCED PHOTOSENSITIZATION EFFECT.

INHALATION
EXPOSURE MAY PRODUCE IRRITATION TO THE NOSE, THROAT, RESPIRATORY TRACT, AND OTHER MUCOUS MEMBRANES. EXPOSURE TO HIGH CONCENTRATIONS OF VAPOR MAY PRODUCE CENTRAL NERVOUS SYSTEM DEPRESSION. REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL.

INGESTION
MODERATELY TOXIC. SMALL AMOUNTS OF THE LIQUID ASPIRATED INTO THE LUNGS DURING INGESTION OR FROM VOMITING MAY RESULT IN SEVERE LUNG DAMAGE. INGESTION MAY CAUSE CENTRAL NERVOUS SYSTEM DEPRESSION.

SIGNS AND SYMPTOMS
SYMPTOMS OF EYE IRRITATION INCLUDE PAIN, TEARING, REDDENING AND SWELLING. SYMPTOMS OF SKIN IRRITATION INCLUDE REDDENING, SWELLING, RASH AND REDNESS. SYMPTOMS OF RESPIRATORY IRRITATION INCLUDE RUNNY NOSE, SORE THROAT, COUGHING, CHEST DISCOMFORT, SHORTNESS OF BREATH AND REDUCED LUNG FUNCTION. SYMPTOMS OF GASTROINTESTIONAL IRRITATION INCLUDE SORE THROAT, ABDOMINAL PAIN, NAUSEA, VOMITING AND DIARRHEA. CENTRAL NERVOUS SYSTEM DEPRESSION MAY BE EVIDENCED BY HEADACHE, DIZZINESS, NAUSEA AND SYMPTOMS OF INTOXICATION; IN EXTREME CASES, UNCONSCIOUSNESS AND DEATH MAY OCCUR. SYMPTOMS OF CHRONIC OVEREXPOSURE INCLUDE LOSS OF MEMORY, LOSS OF INTELLECTUAL ABILITY AND LOSS OF COORDINATION.

AGGRAVATED MEDICAL CONDITIONS
PREEXISTING SKIN, EYE AND RESPIRATORY DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT. IMPAIRED CENTRAL NERVOUS SYSTEM FUNCTIONS FROM PREEXISTING DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT.

OTHER HEALTH EFFECTS
BASED ON THE PRESENCE OF COMPONENT 9 CHRONIC OVEREXPOSURE MAY CAUSE INJURY TO THE KIDNEYS AND LIVER. BASED ON THE PRESENCE OF COMPONENT 5 CHRONIC OVEREXPOSURE TO TiO2 DUST MAY CAUSE SLIGHT LUNG FIBROSIS. BASED ON THE PRESENCE OF COMPONENT 2 CHRONIC OVEREXPOSURE TO PRODUCT DUST MAY PRODUCE A BENIGN PNEUMOCONIOSIS TERMED 'SIDEROSIS'.

SECTION V EMERGENCY AND FIRST AID PROCEDURES

EYE CONTACT
IMMEDIATELY FLUSH EYES WITH COPIOUS AMOUNTS OF WATER FOR AT LEAST 15 MINUTES HOLDING EYELIDS OPEN. SEEK PROMPT MEDICAL ATTENTION.

SKIN CONTACT
REMOVE CONTAMINATED CLOTHING AND SHOES. WIPE EXCESS FROM SKIN AND FLUSH WITH WATER USING SOAP IF AVAILABLE. SEEK MEDICAL ATTENTION IF IRRITATION OCCURS. DO NOT REUSE CLOTHING UNTIL THOROUGHLY DECONTAMINATED.

INHALATION
REMOVE VICTIM TO FRESH AIR AND TREAT SYMPTOMATICALLY. PROVIDE OXYGEN IF BREATHING IS DIFFICULT. GIVE ARTIFICIAL RESPIRATION IF THE VICTIM IS NOT BREATHING. SEEK PROMPT MEDICAL ATTENTION.

INGESTION
DO NOT INDUCE VOMITING. IF VOMITING SPONTANEOUSLY OCCURS, KEEP THE VICTIM'S HEAD BELOW THE HIPS TO PREVENT ASPIRATION INTO THE LUNGS. SINCE ASPIRATION INTO THE LUNGS CAN CAUSE VERY SERIOUS, PERMANENT DAMAGE. THE DECISION OF WHETHER TO INDUCE VOMITING OR NOT SHOULD BE MADE BY A PHYSICIAN. DANGER FROM LUNG ASPIRATION MUST BE WEIGHED AGAINST TOXICITY WHEN CONSIDERING EMPTYING THE STOMACH. CONSULT A PHYSICIAN, HOSPITAL OR POISON CONTROL CENTER AND/OR TRANSPORT TO AN EMERGENCY FACILITY IMMEDIATELY.

>> COMPONENTS 1, 3, 4, 6, 7, 8 AND 9 MAY CAUSE SEVERE, PERMANENT DAMAGE IF ASPIRATED AND VOMITING SHOULD NOT BE INDUCED.

RECEIVED
NOV 17 1995
THE MOREY CORP.

SECTION X ADDITIONAL PRECAUTIONS

KEEP LIQUID AND VAPOR AWAY FROM HEAT. SPARKS. AND FLAME. EXTINGUISH PILOT LIGHTS. CIGARETTES AND TURN OFF OTHER POSSIBLE SOURCES OF IGNITION PRIOR TO USE AND UNTIL VAPORS ARE GONE. SURFACES THAT ARE SUFFICIENTLY HOT MAY IGNITE PRODUCT IN THE ABSENCE OF SPARKS OR FLAME. VAPORS MAY ACCUMULATE AND TRAVEL TO IGNITION SOURCES DISTANT FROM HANDLING SITE. KEEP CONTAINERS CLOSED WHEN NOT IN USE. USE WITH ADEQUATE VENTILATION. CONTAINERS. EVEN IF EMPTY. CAN CONTAIN EXPLOSIVE VAPORS. DO NOT CUT.DRILL. GRIND. OR WELD NEAR CONTAINERS.

CONTAINERS CAN CONTAIN HAZARDOUS PRODUCT RESIDUES EVEN WHEN EMPTY. WASH WITH SOAP AND WATER BEFORE EATING. DRINKING. SMOKING. OR USING TOILET FACILITIES.

THE INFORMATION CONTAINED HEREIN IS BASED ON THE DATA AVAILABLE TO US AND IS BELIEVED TO BE CORRECT. HOWEVER. WE MAKE NO WARRANTY. EXPRESSED OR IMPLIED. REGARDING THE ACCURACY OF THIS DATA OR THE RESULTS TO BE OBTAINED FROM THE USE THEREOF. WE ASSUME NO RESPONSIBILITY FOR INJURY FROM THE USE OF THE PRODUCT DESCRIBED HEREIN.

NOV 17 1995
THE MOREY CORP.

SECTION VI FIRE AND EXPLOSION HAZARDS

OSHA FLAMMABILITY CLASSIFICATION
FLAMMABLE LIQUID - CLASS IB

FLASH POINT : 50 degrees F. (Theoretical)

DOT PROPER SHIPPING NAME
PAINT
3
UN1263
PGII

EXTINGUISHING MEDIA
USE WATER FOG. FOAM. DRY CHEMICAL OR CARBON DIOXIDE.

SPECIAL FIRE FIGHTING PROCEDURES AND PRECAUTIONS
WARNING. FLAMMABLE. CLEAR FIRE AREA OF UNPROTECTED PERSONNEL. DO NOT ENTER CONFINED FIRE SPACE WITHOUT HELMET, FACE SHIELD, BUNKER COAT, GLOVES, RUBBER BOOTS, AND A POSITIVE PRESSURE NIOSH-APPROVED SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS
CONTAINERS EXPOSED TO INTENSE HEAT FROM FIRES SHOULD BE COOLED WITH WATER TO PREVENT VAPOR PRESSURE BUILDUP WHICH COULD RESULT IN CONTAINER RUPTURE. CONTAINER AREAS EXPOSED TO DIRECT FLAME CONTACT SHOULD BE COOLED WITH LARGE QUANTITIES OF WATER AS NEEDED TO PREVENT WEAKENING OF CONTAINER STRUCTURE.

SECTION VII REACTIVITY

STABILITY : STABLE

HAZARDOUS POLYMERIZATION : WILL NOT OCCUR

CONDITIONS AND MATERIALS TO AVOID
AVOID OXIDIZING MATERIALS. BASED ON THE PRESENCE OF COMPONENT 9 AVOID HIGH TEMPERATURES.

HAZARDOUS DECOMPOSITION PRODUCTS
IRRITATING ALDEHYDES AND KETONES. CARBON DIOXIDE. CARBON MONOXIDE. AND UNIDENTIFIED ORGANIC COMPOUNDS MAY BE FORMED DURING COMBUSTION.

SECTION VIII EMPLOYEE PROTECTION

RESPIRATORY PROTECTION
USE VENTILATION AS REQUIRED TO CONTROL VAPOR, MIST, AND/OR DUST CONCENTRATIONS - AT LEAST 10 AIR CHANGES PER HOUR ARE RECOMMENDED FOR GOOD GENERAL ROOM VENTILATION. IF EXPOSURE EXCEEDS THE PEL/TLV, USE THE APPROPRIATE NIOSH-APPROVED RESPIRATOR.

PROTECTIVE CLOTHING
WEAR SAFETY GLASSES, GOGGLES, OR A SPLASH SHIELD TO PREVENT EYE CONTACT. CONTACT LENSES SHOULD NOT BE WORN. WEAR APPROPRIATE GLOVES AND PROTECTIVE CLOTHING TO PREVENT CONTACT WITH SKIN AND CLOTHING.

ADDITIONAL PROTECTIVE MEASURES
EYE WASH FOUNTAINS AND SAFETY SHOWERS SHOULD BE AVAILABLE FOR USE IN AN EMERGENCY.

SECTION IX ENVIRONMENTAL PROTECTION

SPILL OR LEAK PROCEDURES
LARGE SPILLS >> EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR APPROPRIATE RESPIRATOR AND PROTECTIVE CLOTHING. SHUT OFF SOURCE OF LEAK ONLY IF SAFE TO DO SO. DIKE AND CONTAIN. IF VAPOR CLOUD FORMS, WATER FOG MAY BE USED TO SUPPRESS; CONTAIN RUN-OFF. REMOVE WITH VACUUM TRUCKS OR PUMP TO STORAGE/SALVAGE VESSELS. SOAK UP RESIDUE WITH AN ABSORBENT SUCH AS CLAY, SAND OR OTHER SUITABLE MATERIAL; PLACE IN NON-LEAKING CONTAINERS FOR PROPER DISPOSAL. FLUSH AREA WITH WATER TO REMOVE TRACE RESIDUE; DISPOSE OF FLUSH SOLUTIONS AS ABOVE. SMALL SPILLS >> TAKE UP WITH AN ABSORBENT MATERIAL AND PLACE IN NON LEAKING CONTAINERS.

WASTE DISPOSAL
OBSERVE ALL FEDERAL, STATE, AND LOCAL REGULATIONS REGARDING PROPER DISPOSAL.

SECTION 2 - COMPOSITION/INFORMATION ON INGREDIENTS

ITEM	CHEMICAL NAME	CAS NUMBER	WT/WT % LESS THAN
01	Diphenylmethane Diisocyanate (2,2:2,4)	26447-40-5	10.0-30.0
02	4,4'-diphenylmethanediisocyanate	101-68-8	30.0-60.0

EXPOSURE LIMITS

ITEM	ACGIH TLV-TWA	ACGIH TLV-STEL	OSHA PEL-TWA	OSHA PEL-CEILING	COMPANY TLV-TWA	SKIN
01	N.E.	N.E.	N.E.	N/E	N.E.	NO
02	.005ppm	N.E.	N/A	0.02ppm	N.E.	NO

(See Section 16 for abbreviation legend)

SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: May cause target organ or system damage. Refer to chronic health effects section. Contents may develop pressure if exposed to water. At elevated temperatures may cause irritation of the eyes and respiratory tract. May cause allergic skin reaction. May cause allergic respiratory reaction. May cause skin and eye irritation.

ACUTE EFFECTS - EYE CONTACT: Moderately irritating to the eyes.

ACUTE EFFECTS - SKIN CONTACT: Moderate irritant. Prolonged contact may cause dermatitis.

ACUTE EFFECTS - INHALATION: Liquid particles breathed into the lungs may cause injury to the lungs, liver, or kidneys. Vapors and/or aerosols which may be formed at elevated temperatures may be irritating. Causes respiratory tract irritation. Strong respiratory sensitizer.

ACUTE EFFECTS - INGESTION: Irritating to mouth, throat and stomach, with nausea.

CHRONIC OVEREXPOSURE EFFECTS: Chronic overexposure to isocyanate may cause respiratory sensitization which may cause future reactions even at levels below the TLV. Reaction may be immediate or delayed up to several hours after exposure. Additionally, there are reports that sensitized individuals can experience symptoms when exposed to dust, cold air, or other irritants. Such sensitization and/or increased lung sensitivity may be temporary or permanent. Dermal/respiratory cross-sensitization reactions are possible.

SECTION 3 - HAZARDS IDENTIFICATION

OTHER INFORMATION: Not Applicable.

PRIMARY ROUTE(S) OF ENTRY: SKIN CONTACT, INHALATION, EYE CONTACT,

SECTION 4 - FIRST AID MEASURES

EYE CONTACT: Immediately flush eyes with plenty of water for at least 15 minutes. Get immediate medical attention.

SKIN CONTACT: Immediately flush affected area(s) thoroughly with water at least 15 minutes. Remove and wash contaminated clothing. Contaminated leather articles should be disposed of. Obtain medical attention.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

INGESTION: Swallowing less than an ounce will not cause significant harm. For larger amounts, do not induce vomiting, but give one or two glasses of water to drink and get medical attention.

NOTES TO PHYSICIAN: The manifestations of respiratory symptoms, including pulmonary edema, resulting from acute overexposure may be delayed. No specific antidote. Supportive care. Treat symptomatically.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POINT: 300 F (TAGLIABUE CLOSED CUP)
LOWER EXPLOSIVE LIMIT: N.A.
UPPER EXPLOSIVE LIMIT: N.A.
AUTOIGNITION TEMPERATURE: No data

EXTINGUISHING MEDIA: CO2, DRY CHEMICAL, FOAM, WATER FOG.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Closed containers may rupture or explode (due to pressure build-up) when exposed to extreme heat. Irritating and/or toxic gases or fumes may be generated by thermal decomposition or combustion.

SPECIAL FIREFIGHTING PROCEDURES: Use NIOSH-approved self-contained breathing apparatus and full protective clothing. Use water to cool exposed containers. Water stream directed into fire may cause frothing with subsequent spread of flame.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Treat waste material in waste container with neutralizing solution of 90% water, 8% concentrated ammonia, and 2% detergent. Add about 10 parts neutralizer per one part of isocyanate, with mixing. Allow to stand uncovered for 48 hours. Rinse floor with same solution as above, letting the solution remain on the contaminated area for at least 15 minutes before removal.

SECTION 7 - HANDLING AND STORAGE

HANDLING: Use only in a well ventilated area. Follow all MSDS/label precautions even after container is emptied because it may retain product residues. Avoid breathing vapors from heated material. Avoid contact with eyes, skin, and clothing. DO NOT take internally. FOR INDUSTRIAL USE ONLY.

(Continued on Page 3)

RECEIVED
AUG 16 1999
THE MOREY CORP.

SECTION 5 - FIRE FIGHTING MEASURES

STORAGE: Store away from heat. Store in a tightly closed container. Purge container with nitrogen before resealing. Keep dry.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: No special ventilation normally required. Local exhaust as needed to control vapor or dust levels to below lowest component TLV.

RESPIRATORY PROTECTION: If use is performed in a poorly-ventulated space, if vapor levels exceeed TLV/PEL, or if effects occur, use NIOSH-approved positive-pressure supplied-air respirator in accordance with applicable health and safety regulations and manufacturer's recommendations.

SKIN PROTECTION: Clean clothing to cover skin. Saranex gloves. Butyl rubber gloves. Nitrile gloves. Supported PVA gloves.
EYE PROTECTION: Chemical splash goggles.
OTHER PROTECTIVE EQUIPMENT: Accessible eye wash and safety shower.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

HYGIENIC PRACTICES: Follow good general industrial safety practices during use. Do not smoke or eat during use. Wash after handling. Use only with adequate ventilation. DO NOT reuse empty containers without commercial clean or recondition. Follow all MSDS/label precautions even after container is emptied.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

BOILING RANGE	: 381 - 381 F	VAPOR DENSITY	: Is heavier than air
ODOR	: Mild musty	ODOR THRESHOLD	: No data
APPEARANCE	: Brown	EVAPORATION RATE	: Is slower than Butyl Acetate
SOLUBILITY IN H2O	: Reacts with water		
FREEZE POINT	: No data	SPECIFIC GRAVITY	: 1.2392
VAPOR PRESSURE	: Very low	pH @ 0.0 %	: N/A
PHYSICAL STATE	: Liquid	VISCOSITY	: Low

COEFFICIENT OF WATER/OIL DISTRIBUTION: No data
(See Section 16 for abbreviation legend)

SECTION 10 - STABILITY AND REACTIVITY

CONDITIONS TO AVOID: Prolonged exposure to heat. Exposure to moisture.
INCOMPATIBILITY: Strong Lewis or mineral acids. Strong bases or oxidants. Metals. Surface-active compounds. Water. Alcohols. Amines.

HAZARDOUS DECOMPOSITION PRODUCTS: Oxides of carbon. Oxides of nitrogen, ammonia. Toxic monomers. Traces of hydrogen cyanide in oxygen-deficient environments.

HAZARDOUS POLYMERIZATION: Will not occur under normal conditions.
STABILITY: This product is stable under normal storage conditions.

SECTION 11 - TOXICOLOGICAL PROPERTIES

No product or component toxicological information is available.

SECTION 12 - ECOLOGICAL INFORMATION

ECOLOGICAL TEST DATA: Not Applicable.

SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: Not hazardous in normal industrial use.

ACUTE EFFECTS - EYE CONTACT: May cause slight irritation.

ACUTE EFFECTS - SKIN CONTACT: No hazard in normal industrial use.

ACUTE EFFECTS - INHALATION: No hazard in normal industrial use.

ACUTE EFFECTS - INGESTION: May cause nausea and vomiting.

CHRONIC OVEREXPOSURE EFFECTS: None known.

OTHER INFORMATION: Not Applicable.

PRIMARY ROUTE(S) OF ENTRY: Unknown

SECTION 4 - FIRST AID MEASURES

EYE CONTACT: Immediately flush eyes wih plenty of water. Get medical attention, if irritation persists.

SKIN CONTACT: Wash with soap and water. Get medical attention if irritation develops or persists.

INHALATION: No specific treatment is necessary since this material is not likely to be hazardous by inhalation. If exposed to excessive levels of dusts or fumes, remove to fresh air and get medical attention if cough or other symptoms develop.

SECTION 3 - HAZARDS IDENTIFICATION

INGESTION: If swallowed, do NOT induce vomiting. Give victim a glass of water or milk. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

NOTES TO PHYSICIAN: Not Applicable.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POINT: 350 F (TAG,TAGUE CLOSED CUP)
LOWER EXPLOSIVE LIMIT: N.A.
UPPER EXPLOSIVE LIMIT: N.A.
AUTOIGNITION TEMPERATURE: No data

EXTINGUISHING MEDIA:ALCOHOL FOAM,CO2,DRY CHEMICAL,FOAM,WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDS: Closed containers may rupture or explode (due to pressure build-up) when exposed to extreme heat. Irritating and/or toxic gases or fumes may be generated by thermal decomposition or combustion.

SPECIAL FIREFIGHTING PROCEDURES: Use NIOSH-approved self-contained breathing apparatus and full protective clothing. Use water to cool exposed containers. Water stream directed into fire may cause frothing with subsequent spread of flame.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Reclaim clean material. Contaminated material should be swept or shoveled into appropriate waste container and disposed of in accordance with applicable federal, state and local regulations.

SECTION 7 - HANDLING AND STORAGE

HANDLING: Wash hands before eating. Avoid prolonged or repeated contact with skin. DO NOT take internally. FOR INDUSTRIAL USE ONLY.

STORAGE: Store away from heat. KEEP OUT OF THE REACH OF CHILDREN.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: General ventilation usually adequate.

RESPIRATORY PROTECTION: None normally required under general ventilation. If exposure levels are unknown, if levels exceed TLV/PEL, or if effects occur, use NIOSH-approved dust/mist respirator in accordance with applicable health and safety regulations and manufacturer's recommendations.

SKIN PROTECTION: Clean clothing to cover skin. Cloth or synthetic gloves.
EYE PROTECTION: Safety glasses.
OTHER PROTECTIVE EQUIPMENT: Accessible eye wash and safety shower.

HYGIENIC PRACTICES: Follow general industrial safety practices during use. DO NOT reuse empty containers without commercial clean or recondition. Follow all MSDS/label precautions even after container is emptied.

See Section 15 for description of any WHMIS Trade Secret(s).

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:
White Solid
Vinegar odor
Avoid contact with eyes.
May irritate the skin.
Uncured product contact irritates eyes.
Refer to other MSDS sections for detailed information.

POTENTIAL HEALTH EFFECTS:

INGESTION:
May be harmful if swallowed.

SKIN CONTACT:
Uncured product contact will irritate lips,gums and tongue.
Uncured product contact may irritate the skin.

INHALATION:

Causes irritation of the mouth,nose,and throat.
Applies only in uncured state.

EYE CONTACT:
Uncured product contact irritates eyes.

MEDICAL CONDITIONS AGGRAVATED:
None known.

SUBCHRONIC (TARGET ORGAN) EFFECTS:
None known.

CHRONIC EFFECTS/CARCINOGENICITY:
This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by NTP, IARC, or OSHA.

PRODUCTS/INGREDIENTS
This space reserved for special use.

PRINCIPLE ROUTES OF EXPOSURE:
Dermal - skin.
Eyes.
Inhalation.

OTHER:
Acetic acid released during curing.
This product contains Methylpolysiloxanes which can generate Formaldehyde at approximately 300 degrees farenheit (150'C) and above, in atomospheres which contain oxygen. Formaldehyde is a skin and respiratory sensitizer, eye and throat irritant, acute toxicant, and potential cancer hazard. An MSDS for Formaldehyde is available from GE Silicones.

4. FIRST AID MEASURES

INGESTION:
Rinse mouth with water several times.

SKIN:
To clean from skin, remove completely with a dry cloth or paper towel, before washing with detergent and water.
Get medical attention if irritation persists.

INHALATION:
Move person to fresh air.

EYES:
In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention if irritation persists.

NOTE TO PHYSICIAN:
None known.

5. FIRE FIGHTING MEASURES

FLASH POINT:		NA	(C) NA	(F)
METHOD	:	NA		
IGNITION TEMP	:	UNK	(C) UNK	(F)
FLAMMABLE LIMITS IN AIR - LOWER (%):		UNK		
FLAMMABLE LIMITS IN AIR - UPPER (%):		UNK		
SENSITIVITY TO MECHANICAL IMPACT (Y/N):		NO		

SENSITIVITY TO STATIC DISCHARGE:
Sensitivity to static discharge is not expected.

EXTINGUISHING MEDIA:
All standard firefighting media

SPECIAL FIREFIGHTING PROCEDURES:
None known.

6. ACCIDENTAL RELEASE MEASURES

MOR 001174

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

*** CONTINUED ON NEXT PAGE ***

Wipe, scrape or soak up in an inert material and put in a container for disposal.
Wash walking surfaces with detergent and water to reduce slipping hazard.
Wear proper protective equipment as specified in the protective equipment section.

7. HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:
Keep container closed when not in use.
Avoid contact with skin and eyes.
Caution]
Remove contact lenses before using sealant. Do not handle lenses until all sealant has been cleaned from the fingertips, nails and cuticles. Residual sealant may remain on fingers for several days and transfer to lenses and cause severe eye irritation.
Product releases acetic acid during application and curing.
Use mechanical ventilation to stay below TLV of 10 ppm acetic acid.
Uncured product contact irritates eyes.
Uncured product contact may irritate skin.
Use in a well ventilated area to prevent irritation by vapors.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS:
Eyewash stations.
Use in a well ventilated area.
RESPIRATORY PROTECTION:
Use approved NIOSH respiratory protection if TLV exceeded.....
Or over exposure is likely.
PROTECTIVE GLOVES:
Cloth gloves.
EYE AND FACE PROTECTION:
Safety glasses.
OTHER PROTECTIVE EQUIPMENT:
None known.
VENTILATION:
Use only in well ventilated area.

9. PHYSICAL AND CHEMICAL PROPERTIES

SECTION 2 -- COMPOSITION, INFORMATION ON INGREDIENTS

CHEMICAL NAME; COMMON NAME; CAS NUMBER	PERCENT BY WEIGHT	OCCUPATIONAL EXPOSURE LIMITS ACGIH TLV	OCCUPATIONAL EXPOSURE LIMITS OSHA PEL	VAPOR PRESSURE IN mmHg	NOTES
ALIPHATIC DIBASIC ACID ESTERS; DIBASIC ESTER MIXTURE; CAS #: NOT ESTABLISHED	70	NOT ESTABLISHED	NOT ESTABLISHED	0.2 @ 20C	(1)
CYCLOHEXANONE; PIMELIC KETONE; CAS #: 108-94-1	30	25 ppm Skin	25 ppm Skin	2.0 @ 20C	

1) Supplier recommended exposure limit of 10 mg/m3.

The recommended permissible exposure limits (PEL) indicated above reflect the levels adopted by OSHA in 1989. Although, some of the 1989 levels have since been vacated, the Nazdar Company recommends that the lower exposure levels be observed as reasonable worker protection.

SECTION 3 -- HAZARDS IDENTIFICATION

GENERAL HEALTH EFFECTS

THE FOLLOWING INFORMATION HAS BEEN DEVELOPED BASED UPON USING THE PRODUCT AS INTENDED BY THE MANUFACTURER. The potential health effects of this product are based on the hazards of its components. The use of this product in combination with other products may produce synergistic (additive) health effects. Cautionary labeling and material safety data sheets of all materials used with this product should be reviewed before use.

EYES

Eye contact with liquid, vapors or mists may cause severe irritation including burning, tearing, redness or swelling and eye damage.

SKIN

Skin contact may cause irritation. Symptoms may include dryness, chapping and redness. Repeated or prolonged overexposure may cause burns to the skin. This material may be absorbed through the skin. Toxic if absorbed through the skin.

INHALATION

Repeated and prolonged overexposure by inhalation may cause respiratory tract irritation. Symptoms may include central nervous system disorders such as headaches, dizziness, weakness and fatigue.

INGESTION

Ingestion may cause gastrointestinal tract irritation. Symptoms may include headaches, nausea and vomiting. Ingestion may cause vomiting. Aspiration of material into lungs may cause chemical pneumonitis which can be fatal.

CHRONIC EFFECTS/TARGET ORGANS

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

ANIMAL STUDIES

Aliphatic dibasic acid esters (or its components) have been suggested as a cause of the following effects in lab animals, after overexposure, and may aggravate pre-existing disorders of these organs in humans; mild, reversible liver effects, nasal damage. Cyclohexanone has caused liver and kidney damage in animal tests. For animal studies, reference TSCA Section 4 Test Rule Results or contact the manufacturer for further details.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Pregnant women and persons with pre-existing health disorders should consult their physician before using this product. Repeated and prolonged overexposure and/or individual sensitivity may increase the potential for and degree of adverse health effects. See Section 3 "Hazards Identification" for effects of certain hazardous ingredients.

ROUTES OF EXPOSURE
Primary exposure routes: Inhalation-Dermal (Contact/Absorption)-Ingestion

SECTION 4 -- FIRST AID MEASURES

EYES
After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. If irritation persists have eyes examined and tested by medical personnel.

SKIN
In case of contact, immediately wash skin with a mild soap and plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Cool water is initially suggested to prevent the pores of the skin from opening. This will minimize both the area and time of skin contact. Lukewarm water may then be used to ensure all contaminants are removed. Skin should be monitored for reddening or chemical burns. Mild soap is suggested to help prevent abrading the skin or rubbing the chemicals into pores during cleansing. Get medical attention if irritation persists or significant contact has occurred. Thoroughly wash (or discard) clothing and shoes before reuse.

INHALATION
Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention if breathing difficulty is experienced.

INGESTION
If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

OTHER COMMENTS
No Data Available

SECTION 5 -- FIRE FIGHTING MEASURES

FLASH POINT
Lowest flashing component 110 Degrees - 115 Degrees (TCC)

OSHA FLAMMABILITY CLASSIFICATION (NFPA)
Class II Combustible Liquid

FLAMMABLE LIMITS (LEL-LOWER EXPLOSIVE LIMIT)
0.9% volume in air

EXTINGUISHING MEDIA
Foam-CO2-Dry Chemical-Water Spray

FIRE AND EXPLOSION HAZARDS
Isolate from heat, electrical equipment, sparks, and open flame. Keep containers tightly closed. Vapors may be heavier than air and can travel to a source of ignition then flash back. Closed containers may explode when exposed to extreme heat.

FIRE FIGHTING EQUIPMENT
Full protective equipment including self-contained breathing apparatus (SCBA) is recommended to protect firefighters.

SPECIAL FIRE FIGHTING PROCEDURES
Water may be ineffective but may be used to cool containers. Fumes released on burning may be toxic and dangerous.

SECTION 6 -- ACCIDENTAL RELEASE MEASURES

RELEASE MANAGEMENT MEASURES
Remove all sources of ignition (flames, hot surfaces and electrical, static or frictional sparks). Avoid contact or breathing vapors. Ventilate area. Contain release and remove with inert absorbent. Use non-sparking tools to place material in appropriate container for disposal. The National Response Center (800-424-8802) and local authorities should be contacted for any reportable spill/release.

SECTION 7 -- HANDLING AND STORAGE

HANDLING AND STORAGE METHODS
Use in a well ventilated area. Follow all MSDS/label precautions even after container is emptied; container may retain product residues. Store in closed containers in cool, dry, well ventilated area away from sources of ignition. Keep containers closed when not in use. Smoke in designated areas only. Avoid prolonged or repeated overexposure to this product. Keep out of reach of children. Follow label directions carefully. Do not take internally. Harmful or fatal if swallowed.

SECTION 8 -- EXPOSURE CONTROLS, PERSONAL PROTECTION

RESPIRATORY PROTECTION
If concentrations of hazardous ingredients exceed exposure limits listed in Section 2 an appropriate NIOSH (National Institute for Occupational Safety and Health) approved respirator with an organic vapor cartridge should be used. If material is handled under mist, spray or dust forming conditions, a P100 (99.97% efficiency) filter should be used in addition to the organic vapor cartridge. If no exposure limits are listed in Section 2, follow general safety guidelines in 29 CFR 1910.134 Respiratory Protection or other applicable respiratory standard.

SKIN PROTECTION
Use neoprene, nitrile or other gloves resistant to chemicals listed in Section 2. Contact a reputable safety supply company for appropriate gloves. Solvent resistant aprons are recommended. Prevent prolonged skin contact with contaminated clothing.

EYE PROTECTION
Use ANSI (American National Standards Institute) approved safety glasses, faceshield or splash proof goggles to prevent eye contact. Contact a reputable safety supply company for appropriate eye protection. The availability of an eye wash is highly recommended.

EXPOSURE GUIDELINES
See Section 2 "Composition, Information on Ingredients" for occupational exposure limits.

HYGIENIC PRACTICES
Wash with soap and water before eating, smoking or using toilet facilities. Separately wash or discard clothing and footwear before reuse. NEVER try to remove ink from the skin by using solvent or thinner. Such action is likely to increase the possibility of undesirable effects. Remove contaminated clothing to prevent prolonged skin contact.

ENGINEERING CONTROLS
Use applicable engineering controls, work practices and personal protective equipment to ensure all concentrations are kept below the exposure limits listed in Section 2. Adequate controls should be implemented to ensure employee safety from fine mists which may be produced under some printing conditions.

OTHER PROTECTION
No Data Available

SECTION 9 -- PHYSICAL AND CHEMICAL PROPERTIES

**

APPEARANCE:
Thin liquid

ODOR:
Characteristic

PHYSICAL STATE:
Liquid

pH
Not applicable

VAPOR PRESSURE
See Section 2 for individual ingredients.

VAPOR DENSITY
Heavier than air

BOILING POINT
Greater than 300 degrees Fahrenheit

FREEZING POINT
Not available

SOLUBILITY IN WATER
Not tested

EVAPORATION RATE
Slower than ether

PERCENT VOLATILE BY VOLUME: 100.00 %

WEIGHT PER GALLON: 8.71 lbs/gal

VOC: 1044.84 g/L

8.71 lb/gal

PHOTOCHEMICALLY REACTIVE
No

Percent volatile = Percent VOC

SECTION 10 -- STABILITY AND REACTIVITY

CHEMICAL STABILITY
Stable

CONDITIONS TO AVOID
Avoid excessive heat, ignition sources, sparks and open flame.

INCOMPATIBILITY WITH OTHER MATERIALS
Strong acids/bases, oxidizing/reducing agents and reactive chemicals.

HAZARDOUS DECOMPOSITION PRODUCTS
May produce hazardous fumes when heated to decomposition e.g. carbon monoxide, carbon dioxide and other noxious gases.

HAZARDOUS POLYMERIZATION
Not anticipated during normal printing and storage conditions.

SECTION 11 -- TOXICOLOGICAL INFORMATION

EXPERIMENTAL TOXICITY DATA
Refer to Section 3 Hazards Identification for additional toxicological data. Experimental toxicity data on cyclohexanone has given the following results: Oral LD50 Rat; 1620 mg/kg: Dermal LD50 Rabbit; 1000 mg/kg: Inhalation TCLO Human; 75 ppm.

SECTION 12 -- ECOLOGICAL INFORMATION

ECOTOXICITY
Because this product may be a mixture of chemicals, some of which may be ecologically toxic, it is strongly suggested that it not be disposed of into the environment, i.e. soil, water courses, lakes, landfills, sewers, etc.

ENVIRONMENTAL FATE
No Data Available

SECTION 13 -- DISPOSAL CONSIDERATIONS

DISPOSAL METHODS
Dispose of in accordance with applicable local, county, state, provincial and federal regulations. Emptied containers may retain hazardous properties. Empty containers should be disposed of in an environmentally safe manner in accordance with applicable regulations.

SECTION 14 -- TRANSPORT INFORMATION

TRANSPORT INFORMATION
DOT Proper Shipping Description: Paint Related Material, 3, UN1263, PG III. In the U.S. and Canada, this material may be reclassified as a combustible liquid and is not regulated, via surface transportation, in containers less than 119 gallons or 450 liters [per 49 CFR 173.150(f)] [per Transportation of Dangerous Goods Regulations Part 2.23.2(1)].

SECTION 15 -- REGULATORY INFORMATION

SARA TITLE III 313 INFORMATION
See Section 2 "Composition, Information on Ingredients" for applicable chemicals.

TOXIC SUBSTANCES CONTROL ACT STATUS
All ingredients in Section 2 are listed on the U.S. Environmental Protection Agency's Toxic Substances Control Act (TSCA) Inventory and the Canadian Domestic Substance List.

OTHER REGULATORY INFORMATION
OCCUPATIONAL SAFETY and HEALTH ADMINISTRATION (OSHA) - MSDS is compliant with Occupational Safety and Health Administration Hazard Communication Standard - 29 CFR 1910.1200. AMERICAN NATIONAL STANDARDS INSTITUTE - This MSDS follows the ANSI Z400.1-1993 format. WORKPLACE HAZARDOUS MATERIAL INFORMATION SYSTEM (WHMIS) - This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

WHMIS CLASSIFICATION (CANADA):
No Data Available

SECTION 16 -- OTHER INFORMATION

DISCLOSURE

The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind express or implied is made with respect to the information contained herein. The data in this MSDS relates only to the specific material designated herein and does not apply to use in combination with any other material or process.

DEFINITIONS

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association

CEILING: (TLV-Ceiling and PEL Ceiling Limit) The ceiling exposure limit or concentration not to be exceeded for even brief times.

DOT: Department of Transportation

HMIS: The Hazardous Materials Identification System (HMIS) developed by the National Paint and Coatings Association (NPCA) to provide information on the acute health hazards, reactivity and flammability of products encountered in the workplace at room temperatures.

HMIS codes assigned for this product are only suggested ratings based on anticipated normal screen printing applications. The employer has the ultimate responsibility for assigning these ratings and should fully evaluate the MSDS, work practices and environmental conditions prior to assigning the appropriate ratings.

HMIS Personal Protection Index of "X-Ask your supervisor" is given on this MSDS due to varying work conditions which may dictate different levels of protection. Please review this MSDS before determining appropriate protective equipment and beginning work.

IARC: International Agency for Research on Cancer

NFPA: National Fire Protection Association

NTP: National Toxicology Program

STEL: Short-Term Exposure Limit: ACGIH terminology for the short-term exposure limit or maximum concentration for a continuous exposure period of 15 minutes.

TLV: Threshold Limit Value. A term ACGIH uses to express the airborne concentration of a material to which most workers can be exposed during a normal daily and weekly work schedule without adverse effects.

TWA: Time-Weighted Average

VOC: Volatile Organic Compound

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

EMERGENCY OVERVIEW:
This section not in use
POTENTIAL HEALTH EFFECTS:
INGESTION:
MAY BE harmful if swallowed.
SKIN CONTACT:
UNCURED PRODUCT WILL IRRITATE LIPS, GUMS AND TONGUE.
UNCURED PRODUCT CONTACT MAY IRRITATE THE SKIN.
INHALATION:
CAUSES MILD RESPIRATORY IRRITATION.
APPLIES ONLY IN UNCURED STATE.
EYE CONTACT:
UNCURED PRODUCT CONTACT IRRITATES EYES.
MEDICAL CONDITIONS AGGRAVATED:
NONE KNOWN.
SUBCHRONIC (TARGET ORGAN) EFFECTS:
NONE KNOWN.
CHRONIC EFFECTS/CARCINOGENICITY:
This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by

NTP, IARC, or OSHA.
PRODUCTS/INGREDIENTS
This space reserved for special use.
PRINCIPLE ROUTES OF EXPOSURE:
Eyes.
DERMAL-SKIN
OTHER:
METHANOL RELEASED DURING CURING. THIS PRODUCT CONTAINS METHYL-POLYSILOXANES WHICH CAN GENERATE FORMALDEHYDE AT APPROXIMATELY 300 DEGREES FARENHEIT (150'C) AND ABOVE, IN ATMOSPHERES WHICH CONTAIN OXYGEN. FORMALDEHYDE IS A SKIN AND RESPIRATORY SENSITIZER, EYE AND THROAT IRRITANT, ACUTE TOXICANT, AND POTENTIAL CANCER HAZARD. AN MSDS FOR FORMALDEHYDE IS AVAILABLE FROM GE SILICONES.

4. FIRST AID MEASURES

INGESTION:
RINSE MOUTH WITH WATER SEVERAL TIMES.
SKIN:
TO CLEAN FROM SKIN, REMOVE COMPLETELY WITH A DRY CLOTH OR PAPER TOWEL, BEFORE WASHING WITH DETERGENT AND WATER. GET MEDICAL ATTN. IF IRRITATION PERSISTS.
INHALATION:
MOVE PERSON TO FRESH AIR.
EYES:
In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention IF IRRITATION PERSISTS.
NOTE TO PHYSICIAN:
None Known.

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:
This section not in use
POTENTIAL HEALTH EFFECTS:
INGESTION:
May be harmful if swallowed.

*** CONTINUED ON NEXT PAGE ***

NOV 17 1995
THE MOREY CORP.

SKIN CONTACT:
Uncured product contact will irritate lips,gums and tongue.
May cause mild skin irritation.
INHALATION:
Causes mild respiratory irritation.
Applies only in uncured state.
EYE CONTACT:
Uncured product contact irritates eyes.
MEDICAL CONDITIONS AGGRAVATED:
None known.
SUBCHRONIC (TARGET ORGAN) EFFECTS:
None known.
CHRONIC EFFECTS/CARCINOGENICITY:
This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by NTP, IARC, or OSHA.
PRODUCTS/INGREDIENTS
This space reserved for special use.
PRINCIPLE ROUTES OF EXPOSURE:
Eyes.
OTHER:
This product contains Methylpolysiloxanes which can generate Formaldehyde at approximately 300 degrees farenheit (150'C) and above, in atmospheres which contain oxygen. Formaldehyde is a skin and respiratory sensitizer, eye and throat irritant, acute toxicant, and potential cancer hazard. An MSDS for Formaldehyde is available from GE Silicones.
Product releases methanol (1-3% by weight) during cure process.

---

4. FIRST AID MEASURES

INGESTION:
Do not induce vomiting. Slowly dilute with 1-2 glasses of water or milk and seek medical attention. Never give anything by mouth to an unconscious person.
SKIN:
To clean from skin, remove completely with a dry cloth or paper towel, before washing with detergent and water.
INHALATION:
Move person to fresh air.
EYES:
In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention if irritation persists.
NOTE TO PHYSICIAN:
None known.

5. FIRE FIGHTING MEASURES

FLASH POINT:		NA	(C) NA	(F)
METHOD	:	NA		
IGNITION TEMP	:	NA	(C) NA	(F)
FLAMMABLE LIMITS IN AIR - LOWER (%):		NA		
FLAMMABLE LIMITS IN AIR - UPPER (%):		NA		
SENSITIVITY TO MECHANICAL IMPACT (Y/N):		NO		

SENSITIVITY TO STATIC DISCHARGE:
Sensitivity to static discharge is not expected.
EXTINGUISHING MEDIA:
All standard firefighting media
SPECIAL FIREFIGHTING PROCEDURES:
None known.

6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:
Wipe, scrape or soak up in an inert material and put in a container for disposal.
Wash walking surfaces with detergent and water to reduce slipping hazard.
Wear proper protective equipment as specified in the protective equipment section.

7. HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:
Avoid contact with skin and eyes.
Use only in a well ventilated area.
Remove contact lenses before using sealant. Do not handle lenses until all sealant has been cleaned from the fingertips, nails and cuticles. Residual sealant may remain on fingers for several days and transfer to lenses and cause severe eye irritation.
Product releases methanol during application and curing. (methanol TLV = 200 ppm).
Uncured product contact irritates eyes.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS:
Eyewash stations.

*** CONTINUED ON NEXT PAGE ***

CSL safetydata

Prepared October, 24, 1988 Reviewed January 12, 1994 **MSDS NO. 250**

I PRODUCT IDENTIFICATION

PRODUCT NAME	CSL 588 *Electronic Grade Sealant/Adhesive*
CHEMICAL NAME	Not Applicable
CHEMICAL FORMULA	Silicone Sealant
MOLECULAR WEIGHT	Polymer

II HAZARDOUS INGREDIENTS OF MATERIAL

MATERIAL	%	CAS Number	ACGIH TLV	LD50
Amorphous Silica	5-10	7631-86-9	5mg/m^3	>5000 mg/kg oral/rat
Oximino Silane	1-5	22984-54-9	Not Est.	2400-3700 mg/kg oral/rat
Amino Alkyl Silane	1-5	919-30-2	Not Est.	1780/kg oral/rat 4000 mg/kg Skin Rabbit

III PHYSICAL DATA

Boiling Point (°C)	Not Available
Freezing Point (°C)	Not Available
Vapor Pressure (mmHg)	Negligible @ 25°C.
Vapor Density (Air = 1)	Not Applicable
% Volatile by Volume	2 - 10
Specific Gravity (Water = 1)	1.03 - 1.04
Solubility in Water	Insoluble
Solubility in Other Solvents	Soluble in most organic solvents
Evaporation Rate (Butyl Acetate = 1)	Not Applicable
Appearance and Odor	Smooth, thixotropic paste, almost odorless
Odor Threshold	Not Applicable

IV FIRE AND EXPLOSION DATA

Flash Point of Curing Byproduct and Method	85°C. P.M.C.C. ASTM D-93
Lower Explosive Limit %	Not Established
Upper Explosive Limit %	Not Established
Autoignition Temperature	No Data
Fire Extinguishing Agents	Dry Chemical, Waterspray, Chemical Foam, CO_2
Fire Fighting Procedures	Wear Self Contained Breathing Apparatus (SCBA) which provides eye protection and which is NIOSH approved. Sealant will burn if strongly heated. Water can be used to cool material below flash point.
Unusual Fire/Explosion Hazard	None
Hazardous Combustion Products	Carbon Dioxide, Carbon Monoxide, Silicon Dioxide, Nitrogen Oxides

V HEALTH HAZARD AND TOXICOLOGICAL DATA

A. EFFECTS OF CHRONIC EXPOSURE

Health Effects	Pulmonary Edema, Dermatitis
Toxicological Data	LD50 of mixture (calculated) Ingestion/Rat 3810-4670 mg/kg
Carcinogenicity Data	The ingredients of this product are not listed as carcinogens by the National Toxicology Program, and have not been evaluated by the International Agency for Research on Cancer or the American Conference of Governmental Industrial Hygienists.
Reproductive Data	No information available and no adverse reproductive effects are anticipated.
Mutagenicity Data	No information available and no adverse mutagenic effects are anticipated.
Teratogenicity Data	No information available and no adverse teratogenic effects are anticipated.
Synergistic Products	None known
Delayed Effects	Decomposition product Methyl Ethyl Ketoxime (MEKO). Preliminary results from a lifetime study of rats and mice indicate potential for long term health effects. Until the study is completed we do not know if these effects will be relevant to human health. Until such time, exposure to MEKO should be as low as reasonably achievable. Exposure levels experienced by users indicate exposures of 2 ppm or less.

B. EFFECTS OF ACUTE EXPOSURE

Inhalation	Not normally an inhalation hazard. At high vapor concentration, curing by-product has a narcotic action with no irreversible effects.
Eyes	Moderate irritation. Can cause burns.
Skin	Mild irritant; may cause transient reddening of skin.

JUN 09 199

Ingestion	Very low oral toxicity. May cause some nausea and an obstruction to gastro-intestinal tract.
Delayed	(Subchromic & Chronic) Effects: Decomposition product Methyl Ethyl Ketoxime (MEKO). In a chronic oral toxicity animal study, methyl ethyl ketoxime produced an adverse effect upon red blood cells. This was found for all dose levels tested. Gross histopathologic alterations were observed in the spleen, lung, and kidney. In an acute dermal animal study, 200 mg/kg caused mild hematologic (blood) effects. No effects were seen at 20 mg/kg.

FIRST AID PROCEDURES

..alation	No emergency care anticipated. Treat symptomatically. If symptoms persist, consult physician.
Eye Contact	Do not attempt to physically remove solids or gums from eye. Immediately flush the contaminated eye(s) with lukewarm, gently flowing water for 20 minutes, by the clock, holding the eyelid(s) open. Obtain medical attention immediately.
Skin Contact	Remove contaminated clothing. Wash gently and thoroughly with water and non-abrasive soap. If symptoms persist, obtain medical attention. Contaminated clothing should be laundered before re-use.
Ingestion	Never give anything by mouth if victim is rapidly losing consciousness, or is unconscious or convulsing. DO NOT INDUCE VOMITING. Have the victim drink 8 to 10 ozs. (240 to 300 ml) of water or milk to dilute material in the stomach. If vomiting occurs naturally, have the victim lean forward to reduce the risk of aspiration. Repeat the administration of water/milk. Obtain medical attention immediately.
First Aid	Provide general supportive measures (comfort, warmth, rest). Consult a physician and/or the nearest Poison Control Center for all exposures except minor instances of inhalation or skin contact. Solid or plastic material should be removed only by a physician.

VII REACTIVITY DATA

Product Stability	Stable
Hazardous Polymerization	Will not occur
Incompatible Materials	CONCENTRATED ACIDS OR BASES - cause degradation of polymer. Boiling water may soften and weaken material.
Hazardous Decomposition Products	Combustion will produce silicon dioxide, carbon monoxide and carbon dioxide.

VIII PREVENTATIVE MEASURES

A. PERSONAL PROTECTION EQUIPMENT

Respiratory Protection	Not required unless normal ventilation is inadequate.
Eye/Face Protection	Chemical splash goggles
Skin Protection	Gloves, coveralls, apron may be useful to prevent contamination of skin or clothing.
Resistance of Materials for Protective Clothing	No specific data. Most rubbers and plastics are adequate.
Ventilation Requirements	Local exhaust to provide sufficient removal of vapors.

B. STORAGE AND HANDLING

Storage Conditions	Store under cool dry conditions. Keep container tightly sealed when not in use.
Handling Procedure	No special measures required. Do not inhale vapor or ingest sealant. Cured CSL Product requires no special precautions.

C. ENVIRONMENTAL PROTECTION

Spill and Leak Procedure	Restrict access to the area of spill. Provide ventilation and protective clothing if necessary. Scrape-up sealant with cardboard/rag and place in container.
Waste Disposal	Review environmental regulations prior to disposal. Silicone wastes can often be incinerated in approved facilities. Solid wastes may be sent to a designated landfill site.

MSDS No: 01015788 Current Version: 10/20/95

Generic Description: Silicone elastomer
Physical Form: Liquid
Color: Translucent white
Odor: Slight odor
NFPA Profile: Health 1 Flammability 1 Reactivity 0

Note: NFPA = National Fire Protection Association

SECTION 2. OSHA HAZARDOUS COMPONENTS

CAS Number	Wt%	Component	Exposure Limits
001185553	6	Methyltrimethoxysilane	Dow Corning guide: TWA 50 ppm. Also see methyl alcohol comments.
068909206	16	Trimethylated silica	Dow Corning guide: 5 mg/m3 Ceiling (as dust).

Comments: Methyl alcohol forms on contact with water or humid air. Provide adequate ventilation to control exposures within guidelines of OSHA PEL: TWA 200 ppm and ACGIH TLV-skin: TWA 200 ppm, STEL 250 ppm. The effects of overexposure listed in Section 3 include health effects related to conversion of methoxysilanes to methyl alcohol upon exposure to moist or humid air.

SECTION 3. EFFECTS OF OVEREXPOSURE

Acute Effects

Eye: Direct contact irritates slightly with redness and swelling.

Skin: A single relatively short exposure causes no known adverse effect. Several repeated or prolonged exposures (24 to 48 hours) may irritate.

Inhalation: Vapor may irritate nose and throat. Product generates methyl alcohol which may cause blindness and damage to nervous system. Vapor overexposure may cause drowsiness.

Oral: Product generates methyl alcohol which may cause blindness and possibly death if swallowed.

Repeated Exposure Effects

Skin: None Known.

Inhalation: Product generates methyl alcohol which may cause blindness and damage to nervous system.

Oral: Product generates methyl alcohol which may cause blindness and possibly death if swallowed.

Special Hazards

This material contains the following components with the special hazards listed below.

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

None Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

SECTION 4. FIRST AID MEASURES

Eye: Immediately flush with water for 15 minutes.

Skin: No first aid should be needed.

Inhalation: Remove to fresh air. Get medical attention if ill effects persist.

Oral: Get medical attention. If conscious, induce vomiting. Lie down, keep warm, and cover eyes to exclude light.

Comments: Treat same as methyl alcohol poisoning.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point (Closed Cup): > 213.98 DEGREE F / 101.10 DEGREE C
Autoignition Temperature: Not Determined

Flammability Limits in Air: Not Determined

Extinguishing Media: Carbon dioxide (CO2). Water spray. Dry chemical. Foam. Water can be used to cool fire exposed containers.

Unsuitable Extinguishing Media: None

Fire Fighting Procedures: Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan.

Unusual Fire Hazards: None

MOR 001216

Hazardous Decomposition Products:

Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Metal oxides. Carbon oxides and traces of incompletely burned carbon compounds. Silicon dioxide. Formaldehyde.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Mop up, or wipe up, or soak up with absorbent and contain for salvage or

disposal. For large spills, provide diking or other appropriate containment to keep material from spreading. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. Observe all personal protection equipment recommendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

SECTION 7. HANDLING AND STORAGE

Handling: No special precautions.

Storage: Keep container closed and store away from water or moisture.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Local exhaust: Recommended
General Ventilation: Recommended

Personal Protective Equipment For Routine Handling

Eyes: Use proper protection - safety glasses as a minimum.

Skin: Because of the nature of the fluorescent agent in this material, small amounts on the skin will fluoresce under UV light. This does not present a hazard. Washing at mealtime and end of shift is recommended. Continued washing with soap and water will eventually remove the fluorescing agent from the skin.

Suitable Gloves: No special protection needed.

Inhalation: Use respiratory protection unless adequate local exhaust ventilation is provided or air sampling data show exposures are within recommended exposure guidelines. Industrial Hygiene Personnel can assist in judging the adequacy of existing engineering controls.

Suitable Respirator: Self-contained breathing apparatus (SCBA) or other supplied-air respirator.

Personal Protective Equipment For Spills

Eye: Use full face respirator.

Skin: Because of the nature of the fluorescent agent in this material, small amounts on the skin will fluoresce under UV light. This does not present a hazard. Washing at mealtime and end of shift is recommended. Continued washing with soap and water will eventually remove the fluorescing agent from the skin.

Inhalation/
Suitable Respirator: Use self-contained breathing apparatus (SCBA) or other supplied-air respirator.

Precautionary Measures: Avoid eye contact. Avoid breathing vapor. Keep container closed. Do not take internally.

Comments: Product evolves methyl alcohol when exposed to water or humid air. Provide ventilation during use to control exposure within Section 2 guidelines or use air-supplied or self-contained breathing apparatus.

Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical form:	Liquid
Color:	Translucent white
Odor:	Slight odor
Specific Gravity @ 25C:	1.05
Viscosity:	300.00 P
Freezing/Melting Point:	Not Applicable.
Boiling Point:	Not Available.
Vapor Pressure @ 25C:	Not Determined.
Vapor Density:	Not Determined.
Solubility in Water:	Not Determined.
pH:	Not Applicable.
Volatile content:	Not Determined.

Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications.

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability: Stable.

Hazardous Polymerization: Hazardous polymerization will not occur.

Conditions to Avoid: None.

Materials to Avoid: Oxidizing material can cause a reaction.

Comments: Water, moisture, or humid air can cause hazardous vapors to form as described in Section 2.

SECTION 11. TOXICOLOGICAL INFORMATION

OPTIONAL SECTION - Complete information not yet available.

SECTION 12. ECOLOGICAL INFORMATION

OPTIONAL SECTION - Complete information not yet available.

SECTION 13. DISPOSAL INFORMATION

RCRA Hazard Class (40CFR 261)

When a decision is made to discard this material, as received, is it classified as a hazardous waste? N

Federal Hazardous Waste Code: NA

Characteristic Waste: Ignitable: NA Corrosive: NA Reactive: NA

TCLP: NA

State or local laws may impose additional regulatory requirements regarding disposal.

NA = Not Applicable

Call Dow Corning Corporate Environmental Management, (517)496-6315, if additional information is required.

SECTION 14. TRANSPORT INFORMATION

DOT Information (49CFR 172.101)

Proper Shipping Name: Not Applicable

Hazard Technical Name: Not Applicable

Hazard Class: Not Applicable

UN/NA Number: Not Applicable

Packing Group: Not Applicable

Call Dow Corning Transportation, (517)496-8577, if additional information is required.

SECTION 15. REGULATORY INFORMATION

Contents of this MSDS comply with the OSHA Hazard Communication Standard 29CFR 1910.1200

TSCA Status: All chemical substances found in this product comply with the Toxic Substances Control Act inventory reporting requirements.

EPA SARA Title III Chemical Listings:

Section 302 Extremely Hazardous Substances:
None

Section 304 CERCLA Hazardous Substances:
None

Section 312 Hazard Class:

Acute:	Y
Chronic:	Y
Fire:	N
Pressure:	N
Reactive:	N

Y = Yes N = No

Section 313 Toxic Chemicals:
None present or none present in regulated quantities.

Supplemental State Compliance Information

CAS Number	Wt%	Component

California

Warning: This product contains the following chemical(s) listed by the State of California under the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) as being known to cause cancer.

None Known.

Warning: This product contains the following chemical(s) listed by the State of California under the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) as being known to cause birth defects or other reproductive harm.

None Known.

Massachusetts

No ingredient regulated by MA Right-to-Know Law present.

SECTION 16. OTHER INFORMATION

Prepared by: Dow Corning Corporation

This information is offered in good faith as typical values and not as a product specification. No warranty, expressed or implied, is hereby made. The recommended industrial hygiene and safe handling procedures are believed to be generally applicable. However, each user should review these recommendations in the specific context of the intended use and determine whether they are appropriate.

DOW CORNING CORPORATION
MATERIAL SAFETY DATA SHEET

SILASTIC(R) E RTV SILICONE RUBBER BASE

SECTION 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Dow Corning Corporation South Saginaw Road Midland, Michigan 48686	24 Hour Emergency Telephone: Customer Service: Product Disposal Information: Transportation Information: CHEMTREC:	(517) 496-5900 (517) 496-6000 (517) 496-6315 (517) 496-8577 (800) 424-9300

MSDS No: 1231197 Current Version: 08/29/96

Generic Description: Liquid silicone rubber.
Physical Form: Viscous Liquid
Color: White
Odor: Not reported
NFPA Profile: Health 1 Flammability 1 Reactivity 0

Note: NFPA = National Fire Protection Association

SECTION 2. OSHA HAZARDOUS COMPONENTS

CAS Number	Wt%	Component	Exposure Limits
068909206	26	Trimethylated silica	Dow Corning guide: 5 mg/m3 Ceiling (as dust).
068988896	7	Dimethylvinylated and trimethylated silica	Dow Corning guide: 5 mg/m3 Ceiling (as dust).
None	3	Silylated titanium dioxide	Observe titanium dioxide limits: OSHA PEL (final rule) and ACGIH TLV: TWA 10 m g/m3 total dust.

Comments: The above components are hazardous as defined in 29 CFR 1910.1200.

SECTION 3. EFFECTS OF OVEREXPOSURE

Acute Effects

Eye: Direct eye contact may cause temporary discomfort with mild redness and dryness similar to windburn.

Skin: A single prolonged exposure (24 to 48 hours) causes no known adverse effect.

Inhalation: No irritation to eyes and respiratory passages. No injury is likely from relatively short exposures of less than 8 hours.

Oral: Small amounts transferred to the mouth by fingers during use, etc., should not injure. Swallowing large amounts may cause digestive discomfort.

Repeated Exposure Effects

Skin: None Known.

Inhalation: None Known.

Oral: None Known.

Special Hazards

This material contains the following components with the special hazards listed below.

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

None Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

SECTION 4. FIRST AID MEASURES

Eye: Immediately flush with water.

Skin: No first aid should be needed.

Inhalation: No first aid should be needed.

Oral: No first aid should be needed.

Comments: Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point (Closed Cup):	212.00 DEGREE F / 100.00 DEGREE C
Autoignition Temperature:	Not Determined
Flammability Limits in Air:	Not Determined
Extinguishing Media:	Water spray. Carbon dioxide (CO2). Dry chemical. Foam. Water can be used to cool fire exposed containers.
Fire Fighting Procedures:	Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals.
Unusual Fire Hazards:	None

Hazardous Decomposition Products:

Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Carbon oxides and traces of incompletely burned carbon compounds. Silicon dioxide. Formaldehyde.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Mop up, or wipe up, or soak up with absorbent and contain for salvage or disposal. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. For large spills, provide diking or other appropriate containment to keep material from spreading. Observe all personal protection equipment recommendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

SECTION 7. HANDLING AND STORAGE

Handling: No special precautions.

Storage: No special precautions. Use reasonable care.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Local exhaust: None should be needed
General Ventilation: Recommended

Personal Protective Equipment For Routine Handling

Eyes: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

Suitable Gloves: No special protection needed.

Inhalation: No respiratory protection should be needed.

Suitable Respirator: None should be needed.

Personal Protective Equipment For Spills

Eye: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

Inhalation/
Suitable Respirator: No respiratory protection should be needed.

Precautionary Measures: Avoid eye contact. Use reasonable care.

Comments: None

Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical form:	Viscous Liquid
Color:	White
Odor:	Not reported
Specific Gravity @ 25C:	1.14
Viscosity:	800.00 P
Freezing/Melting Point:	Not Applicable.
Boiling Point:	Not Available.
Vapor Pressure @ 25C:	Not Determined.
Vapor Density:	Not Determined.
Solubility in Water:	Not Determined.
pH:	Not Applicable.
Volatile content:	< 5.00 %

Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications.

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability: Stable.

Hazardous Polymerization: Hazardous polymerization will not occur.

Conditions to Avoid: None.

Materials to Avoid: Oxidizing material can cause a reaction.

Comments: None

SILASTIC(R) E RTV SILICONE RUBBER CURING AGENT

SECTION 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Dow Corning Corporation South Saginaw Road Midland, Michigan 48686	24 Hour Emergency Telephone: Customer Service: Product Disposal Information: Transportation Information: CHEMTREC:	(517) 496-5900 (517) 496-6000 (517) 496-6315 (517) 496-8577 (800) 424-9300

MSDS No: 1004867 Current Version: 03/01/96

Generic Description: Silicone compound
Physical Form: Liquid
Color: White
Odor: Not reported
NFPA Profile: Health 1 Flammability 1 Reactivity 1

Note: NFPA = National Fire Protection Association

SECTION 2. OSHA HAZARDOUS COMPONENTS

CAS Number	Wt%	Component	Exposure Limits
068037592	34	Dimethyl, methylhydrogen siloxane	None established.
068988896	20	Dimethylvinylated and trimethylated silica	Dow Corning guide: 5 mg/m3 Ceiling (as dust).

Comments: The above components are hazardous as defined in 29 CFR 1910.1200.

SECTION 3. EFFECTS OF OVEREXPOSURE

Acute Effects

Eye: Direct eye contact may cause temporary discomfort with mild redness and dryness similar to windburn.

Skin: A single prolonged exposure (24 to 48 hours) causes no known adverse effect.

Inhalation: No irritation to eyes and respiratory passages. No injury is likely from relatively short exposures of less than 8 hours.

Oral: Small amounts transferred to the mouth by fingers during use, etc., should not injure. Swallowing large amounts may cause digestive discomfort.

Repeated Exposure Effects

Skin: None Known.

Inhalation: None Known.

Oral: None Known.

Special Hazards

This material contains the following components with the special hazards listed below.

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

None Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

SECTION 4. FIRST AID MEASURES

Eye: Immediately flush with water.

Skin: No first aid should be needed.

Inhalation: No first aid should be needed.

Oral: No first aid should be needed.

Comments: Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point (Closed Cup):	> 213.98 DEGREE F / 101.10 DEGREE C
Autoignition Temperature:	Not Determined
Flammability Limits in Air:	Not Determined
Extinguishing Media:	Water spray. Carbon dioxide (CO2). Dry chemical. Foam. Water can be used to cool fire exposed containers.
Fire Fighting Procedures:	Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan.
Unusual Fire Hazards:	None

Hazardous Decomposition Products:

Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Formaldehyde. Hydrogen. Carbon oxides and traces of incompletely burned carbon compounds. Silicon dioxide.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Determine whether to evacuate or isolate the area depending on such specific factors as site location, population density, traffic flow, size of the release or spill, weather conditions, the material's hazards and risks to people, and whether a fire is underway or possible. Mop up, wipe up, or soak up with absorbent and place in a vented container for salvage or disposal. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. For large spills, provide diking or other appropriate containment to keep material from spreading. Observe all personal protection equipment recom-

mendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

SECTION 7. HANDLING AND STORAGE

Handling: No special precautions.

Storage: Product evolves minute quantities of flammable hydrogen gas. Do not repackage or store in unvented containers. Adequately ventilate the work area to maintain vapors well below established flammability limits and exposure guidelines. Keep container closed and store away from water or moisture.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Local exhaust: None should be needed
General Ventilation: Recommended

Personal Protective Equipment For Routine Handling

Eyes: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

Suitable Gloves: No special protection needed.

Inhalation: No respiratory protection should be needed.

Suitable Respirator: None should be needed.

Personal Protective Equipment For Spills

Eye: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

Inhalation/
Suitable Respirator: No respiratory protection should be needed.

Precautionary Measures: Avoid eye contact. Use reasonable care.

Comments: None

Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical form:	Liquid
Color:	White
Odor:	Not reported
Specific Gravity @ 25C:	0.99
Viscosity:	3200.00 CST
Freezing/Melting Point:	Not Applicable.
Boiling Point:	Not Available.
Vapor Pressure @ 25C:	< 5.00 MM HG
Vapor Density:	Not Determined.
Solubility in Water:	Not Determined.
pH:	Not Applicable.
Volatile content:	2.00 %

Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications.

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability: Stable.

Hazardous Polymerization: Hazardous polymerization will not occur.

Conditions to Avoid: None.

Materials to Avoid: Oxidizing material can cause a reaction.

Comments: Water, alcohols, acidic or basic materials, and many metals or metallic compounds, when in contact with product, liberate flammable hydrogen gas, which can form explosive mixtures in air.

SECTION 11. TOXICOLOGICAL INFORMATION

OPTIONAL SECTION - Complete information not yet available.

SECTION 12. ECOLOGICAL INFORMATION

SILICONES UNLIMITED

MATERIAL SAFETY DATA SHEET

DATE ISSUED: April, 1998

SILICONES UNLIMITED, INC.
6306 PINEVIEW ROAD
DALLAS, TX 75248
(972) 701-8943
(770) 643-1880

I PRODUCT IDENTIFICATION

Product Identification: **SU 100 SILICONE SEALANT/ADHESIVE REMOVER**

II HAZARDOUS INGREDIENTS/IDENTITY INFORMATION

HAZARDOUS COMPONENTS (SPECIFIC CHEMICAL I.D., COMMON NAMES)

THIS PRODUCT IS HYDROCARBON BASED. DOES NOT CONTAIN CHLORINATED SOLVENTS, MEK, ACETONE, ALCOHOLS, XYLENE, TOLUENE OR SIMILAR DANGEROUS SOLVENTS. IT IS NOT A CARCINOGEN OR POTENTIAL CARCINOGEN.

HMIS RATINGS:	HEALTH:	1	FLAMMABILITY:	2
	REACTIVITY:	0	PROTECTION:	G

III PHYSICAL/CHEMICAL CHARACTERISTICS

BOILING POINT:	380F	SPECIFIC GRAVITY:	0.82
VAPOR PRESSURE:	1 @ 68F	MELTING POINT:	N/A
WEIGHT/GALLON:	6.8 LBS.	EVAPORATION RATE:	LESS THAN 1.0

SOLUBILITY IN WATER: COMPLETE
APPEARANCE: LIGHT TO DARK BROWN
ODOR: TYPICAL HYDROCARBON

IV FIRE AND EXPLOSION HAZARD

FLASH POINT (TCC): 158F
FLAMMABLE LIMITS: LEL: 1.4, UEL: 9.3

EXTINGUISHING MEDIA: WATER, FOAM, MIST, CO2, WHATEVER SURROUNDING MATERIALS ARE INVOLVED.

SPECIAL FIRE FIGHTING PROCEDURES: SELF CONTAINED BREATHING APPARATUS WITH FULL FACE PIECE AND PROTECTIVE CLOTHING RECOMMENDED.

UNUSUAL FIRE AND EXPLOSIVE HAZARDS: NONE KNOWN

V REACTIVITY DATA

STABILITY: STABLE CONDITIONS TO AVOID: DISCARD SOAKED ITEMS

INCOMPATIBILITY: STRONG OXIDIZING AND REDUCING AGENTS

HAZARDOUS DECOMPOSITION: NO UNUSUAL REACTIVITY

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR

CONDITIONS TO AVOID: NONE

VI HEALTH HAZARD DATA

ROUTES OF ENTRY:
INHALATION: YES SKIN: YES INGESTION: YES
HEALTH HAZARDS (ACUTE AND CHRONIC): ASPIRATION MAY CAUSE PULMONARY EDEMA
CARCINOGENICITY NTP? NO IARC MONOGRAPHS? NO
OSHA REGULATED? NO
SIGNS AND SYMPTOMS OF EXPOSURE: MAY CAUSE EYE AND SKIN IRRITATION
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: NONE KNOWN
EMERGENCY FIRST AID PROCEDURES: IF INGESTED, DRINK LARGE AMOUNTS OF WATER, DO NOT INDUCE VOMITING, CALL PHYSICIAN IMMEDIATELY

VII PRECAUTIONS FOR SAFE HANDLING & USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

ELIMINATE SOURCES OF IGNITION

ABSORB WITH SAND, EARTH OR INERT INGREDIENTS AND DISPOSE OF IN ACCORDANCE WITH FEDERAL, STATE AND LOCAL REGULATIONS.

WASTE DISPOSAL METHOD: DISPOSE OF AT A GOVERNMENTAL APPROVED LANDFILL, INCINERATOR OR RECOVERY FACILITY. OBSERVE ALL FEDERAL, STATE AND LOCAL REGULATIONS.

PRECAUTIONS IN HANDLING AND STORAGE: AVOID CONTACT WITH SKIN AND EYES, STORE IN COOL, DRY PLACE, REMOVE AND DISPOSE OF ANY CONTAMINATED CLOTHING

OTHER PRECAUTIONS: AVOID FREQUENT AND/OR PROLONGED SKIN CONTACT OR INHALATION EXTREMES.

VIII CONTROL MEASURES

RESPIRATORY PROTECTION: NIOSH APPROVED, HAVE RESPIRATORS PRESENT

SECTION I - IDENTIFICATION

PRODUCT (TRADE) NAME: Cho-Therm 1674

General Chemical Description: Solvent-based silicone

SECTION II - INGREDIENTS

Components	% by Weight	Exposure Guidelines OSHA PEL	ACGIH TLV
Aluminum Oxide	60-80%	10 mg/m3	10 mg/m3
Silicone Resin	15-305	NE	NE
Toluene	10-20%	100 ppm	50 ppm
Isopropanol	2-5%	50 ppm	50 ppm

SECTION III - PHYSICAL DATA

Boiling Point (Degree F):)200
Vapor Pressure (mm Hg @25 C): (4
Percent volatiles by weight: (20
Specific Gravity (water =1):) 1.75
Solubility in Water : Insoluble
Vapor Density : Heavier than air
Appearance and Odor : Gray liquid; solvent odor

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

Flash Point (Degree F):
40-50, based on toluene

Flammable limits:
Lel: 1.3% UEL: 7.1% for Toluene

Extinguishing Media:
Use carbon dioxide, dry chemical, foam.

Unusual Fire or Explosion Hazard:
Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions. Vapors may form flammable mixtures with air. Vapors from this product are heavier than air, and may travel a considerable distance to a source of ignition and flash back.

Special Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION V - REACTIVITY DATA

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:
Incompatible with strong oxidizers, acids, bases.

Hazardous Decompositions Products;
Carbon monoxide, carbon dioxide, aldehydes, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on th conditions of combustion.

Provided By Electrical Insulation Suppliers Inc.

Conditions to avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

SECTION VI - RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:
Activate all explosion-proof exhuast ventilation in the immediate spill area. Extinguish open flames and eliminate all other sources of ignition. Wipe up, or absorb with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate chemical waste containers. Dispose of as an ignitable waste in accordance with all current Federal, State, and local regulations.

Large Spills:
Evacuate all personnel not directly involved with control/cleanup operations from the immediate spill area. Extinguish open flames and all other sources of ignition. Activate explosion-proof exhaust ventilation in the immediate spill area. Shut off the source of the release if this can be done without risk of injury. Use only spill response equipment approved for use in potential flammable/explosive environments. Dike area to contain the spill and prevent releases to sewers or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering sewers or other waterways. Collect abosrbed material and water rinses in appropriate waste containers. Dispose of as an ignitable waste in accordance with Federal, State, and local regulations.

SECTION VII - HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection:
This product can cause severe eye irritation. Prevent eye contact through the use of splash-proof chemical goggles or face shield. This product can cause skin irritation. Components of this product may be absorbed through the skin. Wear appropriate protective gloves to minimize skin contact. If necessary a promper chemical-resistant apron and additional impervious clothing should be used to minimize skin contact and prevent contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.

Ventilation Recommendations and Respiratory Protection:
Provide effective explosion-proof mechanical exhaust ventilation to draw vapors, mists, or fumes generated during processing away from the worker and prevent routine inhalation. Ventilation must be sufficient to maintain airborne concentrations of Section 2 ingredients below their PEL/TLV values. The type of respiratory protection selected will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage:
Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Do not store near heat, sparks or open flame. To prevent fire or explosion risk from static electricity accumulation and discharge, effectively ground storage and transfer containers in accordance with NFPA standards. Empty containers may contain flammable liquid or vapor residue. Do not cut, weld, solder, drill, grind or expose container to heat, flame or other source of ignition. They may explode and

cause injury or death.

SECTION VIII - HEALTH DATA

Routes of Exposure:
Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:
Exposure may aggravate preexisting skin, eye and/or respriatory disorders.

Eye Contact:
Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. Toluene may be absorbed through the skin.

Inhalation:
High vapor concentrations may cause respiratory irritation, headaches, nausea, dizziness; may cause anesthetic efforts or other temporary central nervous system effects. Severity of effects will be dependent upon vapor concentration and severity of exposure.

Ingestion:
Harmful if swallowed.

Chronic Health Effects:
Overexposure to toluene has produced severe but reversible liver and kidney injury in humans. Repeated and prolonged overexposure has been associated with central nervous system injury and cardiac sensitization.

SECTION IX- FIRST AID PROCEDURES:

Eye Contact:
Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

Skin Contact:
Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
Do NOT induce vomiting. If victim is conscious and alert, dilute by giving water to drink; never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

SECTION X ADDITIONAL INFORMATION

TSCA STATUS:
All components of this product are listed in the EPA toxic Substance Control Act Inventory.

SARA STATUS:
The components listed in Section 2 which are substances regulated by the SARA Section 313 amendments to RCRA are as follows:
Toluene (108-88-3)

Special Notes:
Date prepared: 5/12/93
Document number : 1674

TRI-PURE HG

For Electronic Grade High Reliability Soldering

TRI-PURE HG is manufactured from virgin metals, with a new manufacturing process for Bar Solder that REDUCES DROSS by 12% to 18%. This will be a direct COST REDUCTION for our customers as this process will not add to the cost of our products. Manufacturing will also have the added benefit of LESS DROSS, MORE FLUID SOLDER BATH, STRONGER SOLDER JOINTS AND BRIGHTER CONNECTIONS. BOW ELECTRONIC SOLDERS feels this new process combined with their use of virgin metals will meet the demands of today's sophisticated electronic manufacturing processes.

Unusual Fire and Explosion Hazards
MOLTEN METALS PRODUCE FUME OR VAPOR THAT MAY BE TOXIC AND/OR RESPIRATORY IRRITANTS. REACTS VIOLENTLY WITH OXYDIZING AGENTS.

Fire Extinguishing Agents Recommended
USE CO2 OR DRY CHEMICAL ON SURROUNDING FIRE.

Fire Extinguishing Agents to Avoid
DO NOT USE WATER ON FIRE WHERE MOLTEN METAL IS PRESENT.

RCRA Status of Unused Material
IF DISCARDED IN UNALTERED FORM, MATERIAL SHOULD BE TESTED TO DETERMINE IF IT MUST BE CLASSIFIED AS A HAZARDOUS WASTE FOR DISPOSAL PURPOSES. UNDER SPECIFIC CIRCUMSTANCES, APPLICATION CAN BE MADE TO THE EPA ADMINISTRATOR TO HAVE A PARTICULAR WASTE DESIGNATED NON-HAZARDOUS.

D.O.T. HAZARD CLASS	N/A
D.O.T. PROPER SHIPPING NAME	*
D.O.T. LABELS REQUIRED	N/A
D.O.T. PLACARD REQUIRED	N/A
UN/NA CODE	N/A

*THIS PRODUCT IS NOT REGULATED BY THE D.O.T. AS SHIPPED. THIS MATERIAL IS ONLY REGULATED BY THE D.O.T. IF IN A POWDER FORM WITH A PARTICLE SIZE LESS THAN 100 MICROMETERS. (0.0040 INCHES)

11. CERCLA INFORMATION

THIS PRODUCT CONTAINS THE FOLLOWING CHEMICALS SUBJECT TO THE RELEASE REQUIREMENTS OF SECTION 302:

CHEMICAL NAME:	LEAD	
REPORTABLE QUANTITY(LBS)	1.0	CERLA STATUTORY RQ

SPILLS TO THE ENVIRONMENT EXCEEDING THE REPORTABLE QUANTITY IN ANY 24 HOUR PERIOD MUST BE REPORTED TO THE NATIONAL RESPONSE CENTER (800-424-8802). NO REPORTING OF RELEASES OF THE HAZARDOUS SUBSTANCE IS REQUIRED IF THE DIAMETER OF THE PIECES OF THE SOLID METAL RELEASED IS EQUAL TO OR EXCEEDS 100 MICROMETERS (0.400 INCHES).

This Material Safety Data Sheet is offered for your information, consideration and investigation. Bow Electronic Solders provides no warranties, either express or implied and assumes no responsibilities for the accuracy or completeness of the data contained in this document. The data in this Material Safety Data Sheet relates to this product and does not relate to use in combination with any other material or in any process.

Personal Hygiene
AVOID INHALATION OR INGESTION. PRACTICE GOOD HOUSEKEEPING AND PERSONAL HYGIENE PROCEDURES. A SHOWER IS RECOMMENDED IF SIGNIFICANT DUST EXPOSURE OCCURS.

Engineering Controls
LOCAL EXHAUST VENTILATION IS RECOMMENDED FOR DUST AND/OR FUME GENERATION OPERATIONS WHERE AIRBORN EXPOSURES MAY EXCEED PERMISSIBLE AIR CONCENTRATIONS.

Storage
GENERAL STORAGE PROCEDURES ACCEPTABLE.

Special Precautions, Procedures, Label Instruction
SPECIAL ATTENTION IS DRAWN TO THE REQUIREMENTS OF THE OSHA LEAD STANDARD (1910.1025) AND RESPIRATOR STANDARD (1910.134) SHOULD AIRBORN EXPOSURES EXCEED THE OSHA ACTION LEVEL OR PEL.

6. PERSONAL PROTECTIVE EQUIPMENT

Respiratory Protection
WHERE AIRBORN EXPOSURES MAY EXCEED OSHA/ACGIH PERMISSIBLE AIR CONCENTRATIONS, THE MINIMUM RESPIRATORY PROTECTION RECOMMENDED IS A NEGATIVE PRESSURE AIR PURIFYING RESPIRATOR WITH CARTRIDGES THAT ARE NIOSH/MSHA APPROVED AGAINST DUST, FUMES AND MISTS HAVING A TWA NOT LESS THAN 0/05 MG/CU M.

Eyes and Face
SAFETY GLASSES RECOMMENDED WHERE THE POSSIBILITY OF GETTING DUST PARTICLES IN EYES EXISTS OR WHEN HANDLING MOLTEN METAL.

Other Clothing and Equipment
GLOVES AND OTHER PROTECTIVE CLOTHING RECOMMENDED IF SKIN CONTACT IS APPRECIABLE.

7. REACTIVITY DATA

Stability: STABLE **Conditions to Avoid:** NOT APPLICABLE

Incompatibility: STRONG OXIDIZERS MAY CAUSE VIOLENT REACTION

Hazardous Decomposition Products: AT TEMPERATURES ABOVE THE MELTING POINT, TOXIC FUMES OR VAPORS MAY BE EMITTED.

8. ENVIRONMENTAL

Regulated by DOT? NO

Waste Disposal Method(DISPOSER MUST COMPLY WITH FEDERAL, STATE AND LOCAL DISPOSAL OR DISCHARGE LAWS)
IF HAZARDOUS UNDER 40 CFR 261, SUBPARTS B AND C, MATERIAL MUST BE TREATED OR DISPOSED IN A FACILITY MEETING THE REQUIREMENTS OF 40 CFR 254 OR 265. IF NON-HAZARDOUS, MATERIAL SHOULD BE DISPOSED IN A FACILITY MEETING THE REQUIREMENTS OF 40 CFR 257.

Special Fire Fighting Precautions
USE NIOSH/MSHA APPROVED SELF-CONTAINED BREATHING APPARATUS AND FULL BODY PROTECTIVE CLOTHING.

4. HEALTH HAZARD INFORMATION

Primary Routes of Entry
INGESTION X INHALATION ABSORPTION

Carcinogencity
THIS PRODUCT HAS NOT BEEN LISTED AS A SUSPECT CARCINOGEN BY NTP, IARC OR OSHA.

Acute Overexposure(symptoms and effects)
SEVERE SHORT-TERM OVEREXPOSURE MAY LEAD TO CENTRAL NERVOUS SYSTEM DISORDERS, CHARACTERIZED BY DROWSINESS, SEIZURES, COMA AND DEATH. IT SHOULD BE RECOGNIZED THAT EXPOSURES OF THIS MAGNITUDE IN AN INDUSTRIAL ENVIRONMENT ARE EXTREMELY UNLIKELY.

Chronic Overexposure(symptoms and effects)
PROLONGED OVEREXPOSURE TO LEAD CAN RESULT IN SYSTEMIC POISONING WITH SYMPTOMS OF METALLIC TASTE, ANEMIA, INSOMNIA, WEAKNESS, CONSTIPATION, ABDOMINAL PAIN, GASTROINTESTINAL DISORDERS, JOINT AND MUSCLE PAIN AND MUSCULAR WEAKNESS AND MAY CAUSE DAMAGE TO THE BLOOD-FORMING, NERVOUS, KIDNEYS AND REPRODUCTIVE SYSTEMS. DAMAGE MAY INCLUDE REDUCED FERTILITY IN BOTH MEN AND WOMEN, DAMAGE TO THE FETUS OF EXPOSED PREGNANT WOMEN, ANEMIA, MUSCULAR WEAKNESS AND KIDNEY DYSFUNCTION.

Medical Conditions Possibly Aggravated by Exposure
DISEASES OF THE BLOOD AND BLOOD FORMING ORGANS, KIDNEYS, NERVOUS AND POSSIBLY REPRODUCTIVE SYSTEMS.

First Aid Procedures
INHALATION: REMOVE FROM EXPOSURE AND CALL A PHYSICIAN.
SKIN CONTACT:WASH AFFECTED AREAS WITH SOAP AND WATER. IF BURNS SHOULD OCCUR FROM MOLTEN METAL, TREAT FOR BURN AND GET IMMEDIATE MEDICAL ASSISTANCE.
EYE CONTACT: FLUSH EYES WITH WATER FOR 15 MINUTES, CALL A PHYSICIAN.
INGESTION: INGEST LARGE QUANTITIES OF WATER, CALL A PHYSICIAN.

5. PRECAUTIONS/PROCEDURES

OVERHEATING OF ALLOY CAN PRODUCE METAL FUMES AND OXIDES. MACHINING OPERATIONS SUCH AS GRINDING, SAWING OR BUFFING CAN GENERATE AIRBORN PARTICULATES IN THE WORK AREA. EXPOSURE LEVELS INDICATED IN SECTION 1 ARE RELAVENT TO THESE AND OTHER OPERATIONS.

Normal Handling
USE OF APPROVED RESPIRATORS IS REQUIRED FOR APPLICATIONS WHERE ADEQUATE VENTILATION CANNOT BE PROVIDED. ACTIVITIES WHICH GENERATE DUST OR FUME SHOULD BE AVOIDED. WHEN MELTED, THE TEMPERATURE SHOULD BE KEPT AS LOW AS POSSIBLE.

Spill or Leak
ANY METHOD THAT KEEPS DUST TO A MINIMUM IS ACCEPTABLE. VACUUMING IS PREFERRED. USE OF APPROVED RESPIRATORY PROTECTION WHERE POSSIBILITY OF DUST/FUME EXPOSURE EXISTS. DO NOT USE COMPRESSED AIR FOR CLEANING.

Section V (Health Hazard Data)

Routes of Entry:
Inhalation? Yes Skin? No Ingestion? Yes Other: None

Health Hazards (Acute and Chronic)
Acute: Weakness, vomiting, loss of appetite, convulsions, stupor and possibly coma.
Chronic: Weakness, insomnia, hypertension, slight irritation of the eyes, headache, possible paralysis. Chronic overexposure to lead may result in damage to blood-forming, nervous, urinary and reproductive system.

California Proposition 65 Warning! This product contains a chemical known to the state of California to cause cancer, and that may cause birth defects or other reproductive harm.

Carcinogenicity: NTP? No IARC Monographs? Yes OSHA Regulated? No Other? No
Formaldehyde formed during the decomposition of rosin flux is listed as a suspected human carcinogen by ACGIH. Lead listed by IARC as 2B.

Signs and Symptoms of Exposure:
Dust, vapor and or fumes may be irritating to skin, eyes and respiratory system.

Medical Conditions Generally Aggravated by Exposure:
Note to physicians: Lead and its inorganic compounds are neurotoxins which may produce neuropathy. Rosin is an allergen.

Emergency First Aid Procedures
Eyes: Flush with copious quantities of water. Get medical attention.
Skin: Wash with soap and water.
Inhalation: *Remove from exposure. Get medical attention if experiencing effects of overexposure.*
Ingestion: Get immediate medical attention.

Section VI (Precautions for Safe Handling and Use)

Steps to be Taken In Case Material Is Released or Spilled:
Particulate matter should be stored in dry containers for later disposal. Dust material should be vacuumed or wet swept. Do not use compressed air or dry sweeping as a means of cleaning.

Waste Disposal Method:
Dispose of in accordance with local, state and federal regulations. Consult a licensed hazardous waste company.

Precautions to be Taken in Handling and Storing:
Wash hands with soap and water after handling solder. Store in dry area. Avoid skin contact. Avoid breathing smoke during soldering.

Other Precautions: None known.

Section VII (Control Measures)

Respiratory Protection (Specify Type):
As specified by 29 CFR 1910.1025 (F) if exposure exceeds PEL.

Ventilation:
Local exhaust : Remove smoke from breathing area. Special: None needed
Mechanical (General): Adequate Other: None needed.

Protective Gloves: Impervious
Eye Protection: Face shield or safety glasses

Other Protective Clothing or Equipment:
Personal clothing and shoes should be protected from contamination. Eye wash station.

Work/Hygenic Practices:
Do not eat, drink or smoke in work areas. Wash hands thoroughly before eating or smoking.

SECTION V.(A) HEALTH HAZARD DATA (Symptoms/Effects Of Overexposure)

LEAD: Exposure to high levels of airborne or ingested lead may produce symptoms of anemia, insomnia, weakness, constipation, nausea and abdominal pain. Overexposure may cause damage to blood-forming, nervous, reproductive, intestinal and urinary systems. For occupational exposure requirements see 29 CFR 1910.1025 Lead Standard and its appendices.

CHRONIC TOXICITY: Women of child bearing age should avoid exposure to lead and its inorganic compounds due to post-natal effects. Lead can cause potential injury to a developing fetus and possible effects on reproduction. For overexposure to TIN see Section X.

LISTED CARCINOGENS: None of the metal elements of this product are confirmed as human carcinogens at this time by NTP, IARC, or OSHA. IARC classifies lead and some lead compounds as 2B carcinogens (possibly carcinogenic to humans).

MEDICAL CONDITIONS POSSIBLY AGGRAVATED: See Section X.

SECTION V.(B) HEALTH HAZARD DATA (Emergency and First Aid Procedures)

INHALATION	If inhaled when heated to soldering temperatures, remove individual to fresh air. If breathing is difficult administer oxygen and consult a physician.
INGESTION	Call a physician or Poison Control Center immediately. Never give anything by mouth to an unconscious person.
SKIN CONTACT	Wash exposed area with soap and water. Remove contaminated clothing.
EYE CONTACT	Flush with large amounts of water, lifting upper and lower lids occasionally. Get medical attention.

SECTION VI. REACTIVITY DATA

STABILITY
STABLE: X UNSTABLE: CONDITIONS TO AVOID NA

MOR 001254

INCOMPATABILITY (Materials to Avoid): Oxidizing materials, strong acids.

HAZARDOUS DECOMPOSITION PRODUCTS: Thermal decomposition may produce CO, CO2, abietic acid, aliphatic aldehydes, terpenes and other acids.

HAZARDOUS POLYMERIZATION
WILL OCCUR: WILL NOT OCCUR: X CONDITIONS TO AVOID NA

Solder Paste 63Sn/37Pb Ultraprint 78 (86–90% Alloy)

SECTION VII. SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Material is a heavy viscous paste. Scoop into appropriate containers. Clean with degreasing detergent or solvent such as alcohol.

WASTE DISPOSAL: Reclaim (Recycle) solder alloy portion of paste or store in sealed containers for later disposal.
EPA Hazardous waste classification (D008).

Must be in accordance with Federal, State and Local Laws and Regulations

SECTION VIII. SPECIAL PROTECTION

RESPIRATORY: If threshold limit value is exceeded or ventilation is not adequate to remove smoke from the breathing zone, then a NIOSH/MSHA approved, cartridge type respirator for organic fume should be worn.

EYEWEAR: Safety glasses are recommended. Eye bath sould be located near work site.

CLOTHING/ GLOVES: Protective gloves or chemically resistant finger cots are recommended. Finger cots should not be re–used when contaminated.

VENTILATION: Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure levels below TLVs.

SECTION IX. SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Read all container labeling. Food and drink should not be consumed or tobacco products used, nor cosmetics applied in areas where solder paste may be used. Always wash hands after handling solder paste and before eating, drinking or smoking.
Material should be stored refrigerated upon receipt at 34 deg F to 45 deg F.

OTHER PRECAUTIONS:

MOR 001255

Containers: Since empty containers may retain product residues (vapor, liquid, or solid) all labeled hazard precautions must be observed. FOR INDUSTRIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.

Solder Paste 63Sn/37Pb Ultraprint 78 (86-90% Alloy)

SECTION X. ADDITIONAL INFORMATION

HEALTH HAZARD DATA: (continued)
MEDICAL CONDITIONS POSSIBLY AGGRAVATED:
Diseases of the blood and blood-forming organs, kidneys, nervous and possibly reproductive systems. Chemical hypersensitivity and diseases of the lungs.
CHRONIC TOXICITY:
TIN: Overexposure to dust or fume may cause irritation of the skin and mucous membranes, and may result in a benign pneumoconiosis (stannosis).

OVEREXPOSURE TO ROSIN:
INHALATION: Exposure to rosin fume may cause dizziness or headache. May also cause an allergic reaction such as throat and respiratory irritation or damage.
INGESTION: Essentially non-hazardous at room temperature. (NOT likely to occur.)
SKIN: Repeated exposure to rosin fume may cause a skin rash.
EYES: Can cause irritation. Not a primary irritant. Can be abrasive.

---------- REGULATORY INFORMATION ----------
Toxic Substance Control Act (TSCA) Status:
All ingredients of this product are listed on the TSCA inventory.

SARA TITLE III (Section 313):
Components present in this product at a level which could require reporting under the statute are:

Lead

California State Proposition 65:
"WARNING! This product contains LEAD known to the State of California to cause cancer, birth defects or other reproductive harm."

Section V (Health Hazard Data)

Routes of Entry:
Inhalation? Yes Skin? No Ingestion? Yes Other: None

Health Hazards (Acute and Chronic)
Acute: Weakness, vomiting, loss of appetite, convulsions, stupor and possibly coma.

Chronic: Weakness, insomnia, hypertension, slight irritation of the eyes, headache, possible paralysis. Chronic overexposure to lead may result in damage to blood-forming, nervous, urinary and reproductive system.

California Proposition 65 Warning! This product contains a chemical known to the state of California to cause cancer, and that may cause birth defects or other reproductive harm.

Carcinogenicity: NTP? No IARC Monographs? Yes OSHA Regulated? No Other? No
Formaldehyde formed during the decomposition of rosin flux is listed as a suspected human carcinogen by ACGIH. Lead listed by IARC as 2B.

Signs and Symptoms of Exposure:
Dust, vapor and or fumes may be irritating to skin, eyes and respiratory system.

Medical Conditions Generally Aggravated by Exposure:
Note to physicians: Lead and its inorganic compounds are neurotoxins which may produce neuropathy. Rosin is an allergen.

Emergency First Aid Procedures
Eyes: Flush with copious quantities of water. Get medical attention.
Skin: Wash with soap and water.
Inhalation: Remove from exposure. Get medical attention if experiencing effects of overexposure.
Ingestion: Get immediate medical attention.

Section VI (Precautions for Safe Handling and Use)

Steps to be Taken in Case Material is Released or Spilled:
Particulate matter should be stored in dry containers for later disposal. Dust material should be vacuumed or wet swept. Do not use compressed air or dry sweeping as a means of cleaning.

Waste Disposal Method:
Dispose of in accordance with local, state and federal regulations. Consult a licensed hazardous waste company.

Precautions to be Taken in Handling and Storing:
Wash hands with soap and water after handling solder. Store in dry area. Avoid skin contact. Avoid breathing smoke during soldering. Shelf life of 10 years if stored in a dry area at room temperature.

Other Precautions: None known.

Section VII (Control Measures)

Respiratory Protection (Specify Type):
As specified by 29 CFR 1910.1025 (F) if exposure exceeds PEL.

Ventilation:
Local exhaust: Remove smoke from breathing area. Special: None needed
Mechanical (General): Adequate Other: None needed.

Protective Gloves: Impervious
Eye Protection: Face shield or safety glasses

Other Protective Clothing or Equipment:
Personal clothing and shoes should be protected from contamination. Eye wash station.

Work/Hygenic Practices:
Do not eat, drink or smoke in work areas. Wash hands thoroughly before eating or smoking.

Flash Point (T.O.C.): NA °F NA °C Auto-Ignition Temperature: NA °F NA °C

Flammability Limits % by volume in air LEL:NA UEL: NA

Extinguishing Media: ( ) WATER ( ) CARBON DIOXIDE ( ) ALCOHOL FOAM ( ) DRY CHEMICAL

Hazardous Combustion Products: Melted solder may liberate carbon monoxide, carbon dioxide, lead oxide fumes.

Ex on Sensitivity: Impact - None Identified Static discharge - ( ) Yes (X) No

pecial Firefighting Procedures: Wear self-contained breathing apparatus if this material is in the vicinity of a fire.

nusual Fire and Explosion Hazards: Flux in cored solder may ignite when the solder melts in a fire.

SECTION 5 - REACTIVITY HAZARD DATA

TABILITY (X) Stable ( ) Unstable Conditions to Avoid: None

ompatability(materials to avoid): Strong acid, strong oxidizers.

azardous Decomposition Products: When heated to soldering temperatures, the solvent in the flux will boil away and carry droplets of rosin and thermal degradation products such as aliphatic aldehydes, acids and terpenes. No lead is detected in fumes from soldering below 1000 °F (537 °C).

AZARDOUS POLYMERIZATION:

) Occur Conditions To Avoid: NE

) Will Not Occur

RECEIVED

APR 22 1994

THE MOREY CORP.

SECTION 6 - HEALTH HAZARD DATA

EXPOSURE LIMITS: Ingested LD(50): NE g/Kg Inhaled LC(50): NE g/Kg

Primary exposure during soldering is to evaporated solvent which may contain droplets of rosin and / or other organic decomposition products.

PRIMARY ROUTES OF ENTRY: ( ) Skin (X) Eyes (X) Inhalation (X) Ingestion

TARGET ORGANS: Flux fumes: eyes, mucous membranes and respiratory system. Ingestion of lead metal can affect kidneys, gastrointestinal, reproductive and neurological systems.

EFFECTS OF ACUTE (severe short-term) EXPOSURE:

INHALATION: Flux fumes during soldering may cause irritation and damage of mucous membranes and respiratory system.

SKIN CONTACT: Possible local irritation by contact with flux or fumes.

SKIN ABSORPTION: None.

EYE CONTACT: Irritation from contact with smoke from soldering.

INGESTION: Not likely to occur.

RECEIVED
APR 22 1994
THE MOREY CORP.

EFFECTS OF CHRONIC (prolonged) EXPOSURE: Breathing fumes during soldering may cause respiratory irritation, headache and irritation of mucous membranes. Repeated ingestion of lead can result in systemic poisoning.

Medical Conditions Generally Aggravated by Exposure: Pre-existing conditions of the lungs, diseases of the blood and blood-forming organs, kidneys, nerves and possibly reproductive system

CARCINOGEN ( ) NTP ( ) OSHA (9) IARC ( ) Not Listed

EMERGENCY FIRST AID PROCEDURES: Seek medical assistance for further treatment, observation and support if needed

EYE CONTACT: For burns flush immediately with cool water. For fume irritation use eye drops and remove from exposure.

SKIN CONTACT: For burns flush immediately with cool water. If a rash develops from flux fumes, remove person from exposure and wash skin with soap and water.

INHALATION: Remove person from exposure to fumes.

INGESTION: NA

SECTION 7 - PROCEDURES FOR MATERIAL CONTROL

Steps to be Taken If Material Is Spilled Or Released: Melted solder will solidify on cooling and can be scraped up. Use caution to avoid breathing fumes if a gas torch is used to cut up large pieces.

Waste Disposal Methods: Solder can be reclaimed.

CAUTION : Empty containers may contain product residue. Observe all label precautions.

Precautions to be Taken in Handling and Storage: Store away from sources of sulfur. Wash hands after handling solder containing lead before eating or smoking. Avoid breathing smoke / fumes generated during soldering. Do not place flux cored solder into a hot solder pot because the flux may ignite.

SECTION 8 - PROTECTIVE MEASURES

Respiratory Protection: Usually not required. When ventilation is not sufficient to remove fumes from the breathing zone, a cartridge type respirator should be worn.

Protective Gloves: Usually not required. **Eye Protection:** When soldering, use goggles or face shield.

VENTILATION TO BE USED: Provide adequate exhaust ventilation (general and / or local) to meet TLV requirements

er Protective Clothing and Equipment: None.

Hygienic Work Practices: Wash hands thoroughly after handling solder containing lead before eating or smoking.

SECTION 9 - ADDITIONAL INFORMATION

If the solder contains lead, these precautions are applicable.
This product contains lead which is known to the State of California to cause cancer, birth defects or other reproductive harm.
Lead and its compounds have been placed in Class B2, probably carcinogenic to humans by USEPA.
IARC has placed lead and its compounds in Class 2B, possibly carcinogenic to humans.

RECEIVED
APR 22 1994

3. HAZARDS IDENTIFICATION

Toxicity: Skin and eye irritant. Moderately toxic ingestion.
When heated to temperatures above 300°F (150°C) in the presence of air, this product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard and a known skin and respiratory sensitizer. Vapors irritate eyes, nose and throat. Safe handling conditions may be maintained by keeping vapor concentrations below the OSHA permissible limit for formaldehyde.

Primary Routes of Entry: Skin, ingestion, inhalation.

Signs and Symptoms of Exposure: Methyl ethyl ketoxime produced during cure is toxic and irritates eyes, nose and throat.

Existing Conditions Aggravated by Exposure: None known

Ingredients	Literature Referenced Target Organ and Other Health Effects	Carcinogen NTP	IARC	OSHA

4. FIRST AID MEASURES

Ingestion:	Do not induce vomiting. Keep individual calm. Obtain medical attention
Inhalation:	Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact:	Wipe off paste with paper towel or cloth. Wash thoroughly with soap and water
Eye Contact:	Flush at least 15 minutes with water. Obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point:	More than 200°F Method: Tag Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Not available
Hazardous Products formed by Fire or Thermal Decomp	Formaldehyde, silica fume, oxides of carbon.
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Wipe or scrape up spilled material. Maintain good ventilation for large spills. Place scrap material in a well ventilated area and allow to cure to rubber.

7. HANDLING AND STORAGE

Safe Storage:	Store in a dry area below 90°F. Keep containers closed when not in use.
(Contact Loctite Customer	Service 1-800-243-4874 for shelf life information)
Handling:	Avoid skin and eye contact. Avoid breathing vapor.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles. Avoid contact lenses.
Skin:	Rubber or plastic gloves.
Ventilation:	Provide local ventilation for prolonged use in a confined area.
Respiratory	Not available
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Black paste.
Odor:	Mild.
Boiling Point:	Not Applicable, Polymeric
pH:	7-8
Solubility in Water:	Polymerized
Specific Gravity	1.31
Volatile Organic Compound (EPA Method 24)	4.01%; 52.5 grams per liter
Vapor Pressure:	Less than 5mm at 70°F.
Vapor Density:	3.0
Evaporation Rate (Ether = 1)	Not available

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	Strong oxidizers. Polymerized by contact with moisture.
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	Methyl ethyl ketoxime

Product Name: 5900 Silicone
Item No.: 20167

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Cured rubber can be incinerated or landfilled following EPA and local regulations

EPA Hazardous Waste Number: NH - Not a RCRA Hazardous Waste Material

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)
Domestic Ground Transport
- Proper Shipping Name: Unrestricted
- Hazard Class or Division: Unrestricted
- Identification Number: None
- Marine Pollutant: None

IATA
- Proper Shipping Name: Unrestricted
- Class or Division: Unrestricted
- UN or ID Number: None

15. REGULATORY INFORMATION

CA Proposition 65: WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
Traces of ethylene oxide, propylene oxide and dioxane.

16. OTHER INFORMATION

Estimated NFPA(R) Code:
- Health Hazard: 1
- Fire Hazard: 1
- Reactivity Hazard: 0
- Specific Hazard: No water

Estimated HMIS(R) Code:
- Health Hazard: 1
- Flammability Hazard: 1
- Reactivity Hazards: 0
- Personal Protection: See Section 8.

NFPA is a registered trademark of the National Fire Protection Assn.
HMIS is a registered trademark of the National Paint and Coatings Assn.

DOW CORNING CORPORATION
MATERIAL SAFETY DATA SHEET

Rec. 1/26/01

SILASTIC(R) E RTV SILICONE RUBBER BASE

SECTION 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Dow Corning Corporation South Saginaw Road Midland, Michigan 48686	24 Hour Emergency Telephone: Customer Service: Product Disposal Information: Transportation Information: CHEMTREC:	(517) 496-5900 (517) 496-6000 (517) 496-6315 (517) 496-8577 (800) 424-9300

MSDS No: 1231197 Current Version: 08/29/96

Generic Description: Liquid silicone rubber.
Physical Form: Viscous Liquid
Color: White
Odor: Not reported
NFPA Profile: Health 1 Flammability 1 Reactivity 0

Note: NFPA = National Fire Protection Association

SECTION 2. OSHA HAZARDOUS COMPONENTS

CAS Number	Wt%	Component	Exposure Limits
068909206	26	Trimethylated silica	Dow Corning guide: 5 mg/m3 Ceiling (as dust).
068988896	7	Dimethylvinylated and trimethylated silica	Dow Corning guide: 5 mg/m3 Ceiling (as dust).
None	3	Silylated titanium dioxide	Observe titanium dioxide limits: OSHA PEL (final rule) and ACGIH TLV: TWA 10 m g/m3 total dust.

Comments: The above components are hazardous as defined in 29 CFR 1910.1200.

SECTION 3. EFFECTS OF OVEREXPOSURE

Acute Effects

Eye: Direct eye contact may cause temporary discomfort with mild redness and dryness similar to windburn.

Skin: A single prolonged exposure (24 to 48 hours) causes no known adverse effect.

Inhalation: No irritation to eyes and respiratory passages. No injury is likely from relatively short exposures of less than 8 hours.

Oral: Small amounts transferred to the mouth by fingers during use, etc., should not injure. Swallowing large amounts may cause digestive discomfort.

Repeated Exposure Effects

Skin: None Known.

Inhalation: None Known.

Oral: None Known.

Special Hazards

This material contains the following components with the special hazards listed below.

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

None Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

SECTION 4. FIRST AID MEASURES

Eye: Immediately flush with water.

Skin: No first aid should be needed.

Inhalation: No first aid should be needed.

Oral:	No first aid should be needed.
Comments:	Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point (Closed Cup):	212.00 DEGREE F / 100.00 DEGREE C
Autoignition Temperature:	Not Determined
Flammability Limits in Air:	Not Determined
Extinguishing Media:	Water spray. Carbon dioxide (CO2). Dry chemical. Foam. Water can be used to cool fire exposed containers.
Fire Fighting Procedures:	Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals.
Unusual Fire Hazards:	None

Hazardous Decomposition Products:

Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Carbon oxides and traces of incompletely burned carbon compounds. Silicon dioxide. Formaldehyde.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Mop up, or wipe up, or soak up with absorbent and contain for salvage or disposal. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. For large spills, provide diking or other appropriate containment to keep material from spreading. Observe all personal protection equipment recommendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

SECTION 7. HANDLING AND STORAGE

Handling: No special precautions.

Storage: No special precautions. Use reasonable care.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Local exhaust: None should be needed
General Ventilation: Recommended

Personal Protective Equipment For Routine Handling

Eyes: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

Suitable Gloves: No special protection needed.

Inhalation: No respiratory protection should be needed.

Suitable Respirator: None should be needed.

Personal Protective Equipment For Spills

Eye: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

Inhalation/
Suitable Respirator: No respiratory protection should be needed.

Precautionary Measures: Avoid eye contact. Use reasonable care.

Comments: None

Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical form:	Viscous Liquid
Color:	White
Odor:	Not reported
Specific Gravity @ 25C:	1.14
Viscosity:	800.00 P
Freezing/Melting Point:	Not Applicable.
Boiling Point:	Not Available.
Vapor Pressure @ 25C:	Not Determined.
Vapor Density:	Not Determined.
Solubility in Water:	Not Determined.
pH:	Not Applicable.
Volatile content:	< 5.00 %

Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications.

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability: Stable.

Hazardous Polymerization: Hazardous polymerization will not occur.

Conditions to Avoid: None.

Materials to Avoid: Oxidizing material can cause a reaction.

Comments: None

SECTION 11. TOXICOLOGICAL INFORMATION

OPTIONAL SECTION - Complete information not yet available.

SECTION 12. ECOLOGICAL INFORMATION

OPTIONAL SECTION - Complete information not yet available.

SECTION 13. DISPOSAL INFORMATION

RCRA Hazard Class (40CFR 261)

When a decision is made to discard this material, as received, is it classified as a hazardous waste? N

Federal Hazardous Waste Code: NA

Characteristic Waste: Ignitable: NA Corrosive: NA Reactive: NA

TCLP: NA

State or local laws may impose additional regulatory requirements regarding disposal.

NA = Not Applicable

Call Dow Corning Corporate Environmental Management, (517)496-6315, if additional information is required.

SECTION 14. TRANSPORT INFORMATION

DOT Information (49CFR 172.101)

Proper Shipping Name:	Not Applicable
Hazard Technical Name:	Not Applicable
Hazard Class:	Not Applicable
UN/NA Number:	0000
Packing Group:	NA

0000 and NA = Not Applicable

Call Dow Corning Transportation, (517)496-8577, if additional information is required.

SECTION 15. REGULATORY INFORMATION

Contents of this MSDS comply with the OSHA Hazard Communication Standard 29CFR 1910.1200

TSCA Status: All chemical substances found in this product comply with the Toxic Substances Control Act inventory reporting requirements.

EPA SARA Title III Chemical Listings:

Section 302 Extremely Hazardous Substances:
None

Section 304 CERCLA Hazardous Substances:

001330207	.2	Xylene	100.00 LB RQ

Section 312 Hazard Class:

Acute:	N
Chronic:	N
Fire:	N

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:
This section not in use
POTENTIAL HEALTH EFFECTS:
INGESTION:
MAY BE harmful if swallowed.
SKIN CONTACT:
UNCURED PRODUCT WILL IRRITATE LIPS, GUMS AND TONGUE.
UNCURED PRODUCT CONTACT MAY IRRITATE THE SKIN.
INHALATION:
CAUSES MILD RESPIRATORY IRRITATION.
APPLIES ONLY IN UNCURED STATE.
EYE CONTACT:
UNCURED PRODUCT CONTACT IRRITATES EYES.
MEDICAL CONDITIONS AGGRAVATED:
NONE KNOWN.
SUBCHRONIC (TARGET ORGAN) EFFECTS:
NONE KNOWN.
CHRONIC EFFECTS/CARCINOGENICITY:
This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by

NTP, IARC, or OSHA.

PRODUCTS/INGREDIENTS

This space reserved for special use.

PRINCIPLE ROUTES OF EXPOSURE:

Eyes.

DERMAL·SKIN

OTHER:

METHANOL RELEASED DURING CURING. THIS PRODUCT CONTAINS METHYL-POLYSILOXANES WHICH CAN GENERATE FORMALDEHYDE AT APPROXIMATELY 300 DEGREES FARENHEIT (150°C) AND ABOVE, IN ATMOSPHERES WHICH CONTAIN OXYGEN. FORMALDEHYDE IS A SKIN AND RESPIRATORY SENSITIZER, EYE AND THROAT IRRITANT, ACUTE TOXICANT, AND POTENTIAL CANCER HAZARD. AN MSDS FOR FORMALDEHYDE IS AVAILABLE FROM GE SILICONES.

4. FIRST AID MEASURES

INGESTION:

RINSE MOUTH WITH WATER SEVERAL TIMES.

SKIN:

TO CLEAN FROM SKIN, REMOVE COMPLETELY WITH A DRY CLOTH OR PAPER TOWEL, BEFORE WASHING WITH DETERGENT AND WATER. GET MEDICAL ATTN. *IF IRRITATION PERSISTS.*

INHALATION:

MOVE PERSON TO FRESH AIR.

EYES:

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention IF IRRITATION PERSISTS.

NOTE TO PHYSICIAN:

None Known.

5. FIRE FIGHTING MEASURES

FLASH POINT:		NA	(C)	NA	(F)
METHOD	:	NA			
IGNTIION TEMP	:	NA	(C)	NA	(F)
FLAMMABLE LIMITS IN AIR · LOWER(%):		NA			
FLAMMABLE LIMITS IN AIR · UPPER(%):		NA			
SENSITIVITY TO MECHANICAL IMPACT (Y/N):		NO			

SENSITIVITY TO STATIC DISCHARGE:

Sensitivity to static discharge is NOT EXPECTED.

EXTINGUISHING MEDIA:

All standard firefighting media.

SPECIAL FIREFIGHTING PROCEDURES:

NONE KNOWN..

6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Wipe, scrape or soak up in an inert material and put in a container for disposal.

WASH WALKING SURFACES WITH DETERGENT AND WATER TO REDUCE SLIPPING HAZARD. WEAR PROPER PROTECTIVE EQUIPMENT AS SPECIFIED IN THE PROTECTIVE EQUIPMENT SECTION.

7. HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

AVOID CONTACT WITH SKIN AND EYES. CAUTION! COMBUSTIBLE. REMOVE CONTACT LENSES *BEFORE USING SEALANT. DO NOT HANDLE LENSES UNTIL* ALL SEALANT HAS BEEN CLEANED FROM THE FINGERTIPS, NAILS AND CUTICLES. RESIDUAL SEALANT MAY REMAIN ON FINGERS FOR SEVERAL DAYS AND TRANSFER TO LENSES AND CAUSE SEVERE EYE IRRITATION. PRODUCT RELEASES METHANOL DURING APPLICATION AND CURING. (METHANOL TLV=200 PPM).

UNCURED PRODUCT CONTACT IRRITATES EYES.

UNCURED PRODUCT CONTACT MAY IRRITATE SKIN.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS:

Eyewash stations.

Use in a well ventilated area.

RESPIRATORY PROTECTION:
USE IN A WELL VENTILATED AREA.
PROTECTIVE GLOVES:
CLOTH GLOVES.
EYE AND FACE PROTECTION:
Safety glasses.
OTHER PROTECTIVE EQUIPMENT:
NONE KNOWN.
VENTILATION:
Use only in well ventilated area.

DOW CORNING CORPORATION
MATERIAL SAFETY DATA SHEET

SILASTIC(R) E RTV SILICONE RUBBER CURING AGENT

SECTION 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Dow Corning Corporation South Saginaw Road Midland, Michigan 48686	24 Hour Emergency Telephone: Customer Service: Product Disposal Information: Transportation Information: CHEMTREC:	(517) 496-5900 (517) 496-6000 (517) 496-6315 (517) 496-8577 (800) 424-9300

MSDS No: 1004867 Current Version: 03/01/96

Generic Description: Silicone compound
Physical Form: Liquid
Color: White
Odor: Not reported
NFPA Profile: Health 1 Flammability 1 Reactivity 1

Note: NFPA = National Fire Protection Association

SECTION 2. OSHA HAZARDOUS COMPONENTS

CAS Number	Wt%	Component	Exposure Limits
068037592	34	Dimethyl, methylhydrogen siloxane	None established.
068988896	20	Dimethylvinylated and trimethylated silica	Dow Corning guide: 5 mg/m3 Ceiling (as dust).

Comments: The above components are hazardous as defined in 29 CFR 1910.1200.

SECTION 3. EFFECTS OF OVEREXPOSURE

Acute Effects

Eye: Direct eye contact may cause temporary discomfort with mild redness and dryness similar to windburn.

Skin: A single prolonged exposure (24 to 48 hours) causes no known adverse effect.

Inhalation: No irritation to eyes and respiratory passages. No injury is likely from relatively short exposures of less than 8 hours.

Oral: Small amounts transferred to the mouth by fingers during use, etc., should not injure. Swallowing large amounts may cause digestive discomfort.

Repeated Exposure Effects

Skin: None Known.

Inhalation: None Known.

Oral: None Known.

Special Hazards

This material contains the following components with the special hazards listed below.

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

None Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

SECTION 4. FIRST AID MEASURES

Eye: Immediately flush with water.

Skin: No first aid should be needed.

Inhalation: No first aid should be needed.

Oral: No first aid should be needed.

Comments: Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point (Closed Cup):	> 213.98 DEGREE F / 101.10 DEGREE C
Autoignition Temperature:	Not Determined
Flammability Limits in Air:	Not Determined
Extinguishing Media:	Water spray. Carbon dioxide (CO2). Dry chemical. Foam. Water can be used to cool fire exposed containers.
Fire Fighting Procedures:	Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan.
Unusual Fire Hazards:	None

Hazardous Decomposition Products:

Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Formaldehyde. Hydrogen. Carbon oxides and traces of incompletely burned carbon compounds. Silicon dioxide.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Determine whether to evacuate or isolate the area depending on such specific factors as site location, population density, traffic flow, size of the release or spill, weather conditions, the material's hazards and risks to people, and whether a fire is underway or possible. Mop up, wipe up, or soak up with absorbent and place in a vented container for salvage or disposal. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. For large spills, provide diking or other appropriate containment to keep material from spreading. Observe all personal protection equipment recom-

mendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

SECTION 7. HANDLING AND STORAGE

Handling: No special precautions.

Storage: Product evolves minute quantities of flammable hydrogen gas. Do not repackage or store in unvented containers. Adequately ventilate the work area to maintain vapors well below established flammability limits and exposure guidelines. Keep container closed and store away from water or moisture.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Local exhaust: None should be needed
General Ventilation: Recommended

Personal Protective Equipment For Routine Handling

Eyes: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

Suitable Gloves: No special protection needed.

Inhalation: No respiratory protection should be needed.

Suitable Respirator: None should be needed.

Personal Protective Equipment For Spills

Eye: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

Inhalation/
Suitable Respirator: No respiratory protection should be needed.

Precautionary Measures: Avoid eye contact. Use reasonable care.

Comments: None

Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical form:	Liquid
Color:	White
Odor:	Not reported
Specific Gravity @ 25C:	0.99
Viscosity:	3200.00 CST
Freezing/Melting Point:	Not Applicable.
Boiling Point:	Not Available.
Vapor Pressure @ 25C:	< 5.00 MM HG
Vapor Density:	Not Determined.
Solubility in Water:	Not Determined.
pH:	Not Applicable.
Volatile content:	2.00 %

Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications.

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability: Stable.

Hazardous Polymerization: Hazardous polymerization will not occur.

Conditions to Avoid: None.

Materials to Avoid: Oxidizing material can cause a reaction.

Comments: Water, alcohols, acidic or basic materials, and many metals or metallic compounds, when in contact with product, liberate flammable hydrogen gas, which can form explosive mixtures in air.

SECTION 11. TOXICOLOGICAL INFORMATION

OPTIONAL SECTION - Complete information not yet available.

SECTION 12. ECOLOGICAL INFORMATION

OPTIONAL SECTION - Complete information not yet available.

SECTION 13. DISPOSAL INFORMATION

RCRA Hazard Class (40CFR 261)

When a decision is made to discard this material, as received, is it classified as a hazardous waste? Y

Federal Hazardous Waste Code: NA

Characteristic Waste: Ignitable: NA Corrosive: NA Reactive: D003

TCLP: NA

State or local laws may impose additional regulatory requirements regarding disposal.

NA = Not Applicable

Call Dow Corning Corporate Environmental Management, (517)496-6315, if additional information is required.

SECTION 14. TRANSPORT INFORMATION

DOT Information (49CFR 172.101)

Proper Shipping Name: Not Applicable

Hazard Technical Name: Not Applicable

Hazard Class: Not Applicable

UN/NA Number: Not Applicable

Packing Group: Not Applicable

Call Dow Corning Transportation, (517)496-8577, if additional information is required.

SECTION 15. REGULATORY INFORMATION

Contents of this MSDS comply with the OSHA Hazard Communication Standard 29CFR 1910.1200

TSCA Status: All chemical substances found in this product comply with the Toxic Substances Control Act inventory reporting requirements.

EPA SARA Title III Chemical Listings:

Section 302 Extremely Hazardous Substances:
None

Section 304 CERCLA Hazardous Substances:

001330207	.4	Xylene	100.00 LB RQ

Section 312 Hazard Class:

Acute:	N
Chronic:	N
Fire:	N
Pressure:	N
Reactive:	Y

Y = Yes N = No

Section 313 Toxic Chemicals:
None present or none present in regulated quantities.

Supplemental State Compliance Information

CAS Number	Wt%	Component

California

Warning: This product contains the following chemical(s) listed by the State of California under the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) as being known to cause cancer.

None Known.

Warning: This product contains the following chemical(s) listed by the State of California under the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) as being known to cause birth defects or other reproductive harm.

None Known.

Massachusetts

No ingredient regulated by MA Right-to-Know Law present.

New Jersey

068083192	43	Dimethyl siloxane, dimethylvinyl-terminated

068037592	34	Dimethyl, methylhydrogen siloxane
068988896	20	Dimethylvinylated and trimethylated silica
002554065	2	Tetramethyl tetravinyl cyclotetrasiloxane

Pennsylvania

068988896	20	Dimethylvinylated and trimethylated silica
068083192	43	Dimethyl siloxane, dimethylvinyl-terminated
068037592	34	Dimethyl, methylhydrogen siloxane

SECTION 16. OTHER INFORMATION

Prepared by: Dow Corning Corporation

This information is offered in good faith as typical values and not as a product specification. No warranty, expressed or implied, is hereby made. The recommended industrial hygiene and safe handling procedures are believed to be generally applicable. However, each user should review these recommendations in the specific context of the intended use and determine whether they are appropriate.

MATERIAL SAFETY DATA SHEET
SLIDE PRODUCTS, INC.
430 S. WHEELING RD.
WHEELING, IL 60090

Rec. 8/13/99

PRODUCT NAME: SLIDE EPOXEASE AEROSOL

EMERGENCY TELEPHONE: 800-535-5053
INFORMATION TELEPHONE: 847-541-7220
D.U.N.S. NUMBER: 00-299-4168
PREPARED BY: MICHAEL MUTH

REVISION DATE: 6-1-97
PRODUCT NUMBER: 40616T
FAX NUMBER: 847-541-7986

SECTION I. IDENTIFICATION

CHEMICAL NAME: SYNTHETIC WAX DISPERSION
CHEMICAL FAMILY: SYNTHETIC WAX
FORMULA: 40616T
SYNONYMS: EPOXEASE
DOT HAZARD CLASSIFICATION: ORM-D
DOT SHIPPING NAME: CONSUMER COMMODITY
CHEMICAL ABSTRACT REGISTRY NUMBER: N/A, MIXTURE
IDENTIFICATION NUMBER: NONE
H.M.I.S. RATING: 1,3,0,1

SECTION II. PHYSICAL DATA

DATA IN SECTION II APPLIES TO CONCENTRATE BEFORE ADDING PROPELLANT

BOILING POINT: 103-337 DEGREES F.
FREEZING POINT: < -40 DEGREES F.
SPECIFIC GRAVITY: (H20 =1): 1.02
WEIGHT PER GALLON @ 60 F.: 8.58
VAPOR PRESSURE @ 70 F. (MM HG): 350
VAPOR DENSITY (AIR = 1): > 1
SOLUBILITY IN WATER, % BY WT.: NIL
PERCENT VOLATILE BY WEIGHT: 96
EVAPORATION RATE (MINUTES): 20
APPEARANCE AND ODOR: OPAQUE BROWN LIQUID - CHLORINATED SOLVENT ODOR

SECTION III. HAZARDOUS INGREDIENTS

MATERIAL:	APPROX. WEIGHT %:	CAS NUMBER:	PEL (OSHA)
TRICHLOROETHYLENE **	55-65	79-01-6	100 PPM
PROPANE A-108	10-20	74-98-6	1000
ALIPHATIC NAPHTHA	20-26	68513-03-1*	130
SYNTHETIC WAX	1-6	MIXTURE	N/A

##CONTAINS NO OZONE DEPLETING CHEMICALS##
ALL COMPONENTS OF THIS PRODUCT ARE LISTED ON THE TSCA DIRECTORY
**)SEE SECTIONS X AND XI FOR DETAILED CAUTIONS

SECTION IV. FIRE AND EXPLOSION HAZARD DATA

FLAMMABLE LIMITS IN AIR: LEL: 1.0 UEL: 9.5 (VOLUME %)
FLASH POINT: N/A
SPECIAL FIRE FIGHTING PROCEDURES: CHLORINATED HYDROCARBON FORM HCL, HF AND TRACES OF PHOSGENE UPON PYROLYSIS.
UNUSUAL FIRE & EXPLOSION HAZARDS: AEROSOLS MAY RUPTURE VIOLENTLY AT TEMPERATURES ABOVE 120' F.

SECTION V. REACTIVITY DATA

STABILITY: STABLE
INCOMPATIBILITY (MATERIALS TO AVOID): NONE KNOWN
HAZARDOUS COMBUSTION BY-PRODUCTS: SEE SECTION IV
HAZARDOUS POLYMERIZATION: WILL NOT OCCUR
CONDITIONS TO AVOID: TEMP. ABOVE 120' F. - DIRECT SUNLIGHT

SECTION VI. HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE: 100 PPM

* EFFECTS OF OVEREXPOSURE *

INGESTION (SWALLOWING): N/A
INHALATION: GIDDINESS, NAUSEA, POSSIBLE NARCOSIS
SKIN CONTACT: DEFATTING OF SKIN
EYE CONTACT: TEMPORARY IRRITATION

* EMERGENCY AND FIRST AID PROCEDURES *

SKIN: WASH WITH SOAP AND WATER, APPLY HAND CREAM
INHALATION: REMOVE TO FRESH-AIR LOCATION AWAY FROM EXPOSURE
EYES: RINSE WITH PLENTY COOL CLEAN WATER UNTIL IRRITATION SUBSIDES

SECTION VII. SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED: REMOVE LEAKING CONTAINER TO OUTSIDE DISPOSAL SITE.
WASTE DISPOSAL METHOD: EMPTY FULLY, INCLUDING GAS PRESSURE. DO NOT PUNCTURE OR INCINERATE. CAN MAY BE RECYCLED OR ALTERNATIVELY REMOVED TO A SANITARY LANDFILL - CHECK APPLICABLE REGULATIONS.

SECTION VIII. SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION: (SPECIFY TYPE): NOT NEEDED WITH ADEQUATE VENTILATION
VENTILATION: ADEQUATE VENTILATION RECOMMENDED
PROTECTIVE GLOVES: RECOMMENDED BUT NOT REQUIRED
EYE PROTECTION: PROPER EYE CARE IS NEEDED IN ALL INDUSTRIAL OPERATIONS
OTHER PROTECTIVE EQUIPMENT: AS REQUIRED BY YOUR COMPANY

SECTION IX. SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: STORE INDOORS AWAY FROM HEAT SOURCES OR DIRECT SUNLIGHT - DO NOT PUNCTURE OR INCINERATE - DO NOT DROP!
OTHER PRECAUTIONS: AVOID OVER-SPRAYING ONTO FLOORS OR SLIPPERY SURFACE MAY RESULT.

SECTION X. EFFECTS OF PROLONGED EXPOSURE

TRICHLOROETHYLENE: PROLONGED EXPOSURE MAY CAUSE SKIN IRRITATION. MAY BE ABSORBED THROUGH SKIN TO SOME DEGREE. EXCESSIVE INHALATION CAUSES IRRITATION TO UPPER RESPIRATORY TRACT AND MAY INCREASE SENSITIVITY TO EPINEPHRINE, AND INCREASED MYOCARDIAL IRRITABILITY (IRREGULAR HEART BEATS). MINIMAL ANESTHETIC EFFECTS AT LEVELS OF 200-400 PPM, DIZZINESS AT HIGHER LEVELS: AT 1000-2000 PPM UNCONSCIOUSNESS AND DEATH. CONCENTRATIONS OVER 6000 PPM ARE *IMMEDIATELY HAZARDOUS TO LIFE. LC50 FOR RATS IS 12,500 PPM FOR 4 HOURS.* ALCOHOL WILL ENHANCE ADVERSE EFFECTS. EXCESSIVE EXPOSURE MAY CAUSE LIVER OR KIDNEY EFFECTS: LOWER CONCENTRATIONS ABOVE ACCEPTED GUIDELINES MAY CAUSE CENTRAL OR PERIPHERAL NERVOUS SYSTEM EFFECTS.

SECTION XI. CARCINOGENIC HAZARD

PROLONGED EXPOSURE ABOVE THE OSHA PERMISSIBLE LIMITS MAY RESULT IN LIVER AND KIDNEY DAMAGE. TRICHLOROETHYLENE HAS BEEN EXTENSIVELY STUDIED FOR CHRONIC EFFECTS IN ANIMALS. WHILE THERE ARE STUDIES IN WHICH TUMORS WERE INDUCED IN MICE, THERE IS NO DOCUMENTED EVIDENCE THAT EXPOSURE TO TRICHLOROETHYLENE PRODUCES CANCER IN HUMANS. THRICHLOROETHYLENE IS LISTED IN GROUP 2A BY IARC BUT IS NOT LISTED BY NTP OR OSHA.

SECTION XII. SARA TITLE III REPORTING

THIS PRODUCT CONTAINS THE FOLLOWING CHEMICALS REQUIRED TO BE REPORTED UNDER SARA TITLE III, SECTION 313: TRICHLOROETHYLENE, CAS NUMBER 79-01-6 REPORTING REQUIREMENTS UNDER SECTION 304 (CERCLA) ARE 1000 POUNDS OR OVER.

THIS DATA IS OFFERED IN GOOD FAITH AS TYPICAL VALUES AND NOT AS A PRODUCTS SPECIFICATION. NO WARRANTY, EXPRESS OR IMPLIED, IS HEREBY MADE. THE *RECOMMENDED INDUSTRIAL HYGIENE AND SAFE HANDLING PROCEDURES ARE BELIEVED* TO BE GENERALLY APPLICABLE. HOWEVER, EACH USER SHOULD REVIEW THESE RECOMMENDATIONS IN THE SPECIFIC CONTEXT OF THE INTENDED USE AND DETERMINE WHETHER THEY ARE APPROPRIATE. THE INFORMATION CONTAINED IN THIS MATERIAL SAFETY DATA SHEET IS BELIEVED TO BE CORRECT AS OF THIS DATE. THE REGULATIONS PROMULGATED BY OSHA FOR HAZARD COMMUNICATION, 29 CFR 1910.1200, AS WELL AS SEVERAL STATE AND LOCAL LAWS AND REGULATIONS, HAVE BEEN CONSULTED IN PREPARING THIS M.S.D.S.

Chemtrec: (800)424-9300
Date: 3.1.93

SECTION I - IDENTITY INFORMATION

Product Name:	SS4-M951K	CAS#7439-92-1
Chemical Name:	Solder Paste	
Chemical Family:	Tin/Lead/Silver Alloy	
Formula:	Mixture	

SECTION II - HAZARDOUS INGREDIENTS

Principal Components (Chemical & Common Names)	%	TLV Units	CAS#
Lead	32	Lead 0.15ppm	7439-92-1
Tin	62	Tin 2 ppm	7440-31-5
Gum Rosin	3		N/A
Normal Chain Fatty Acid	<1		N/A

This product contains a chemical (lead) subject to 313, SARA Title III.

SECTION III - PHYSICAL AND CHEMICAL CHARACTERISTICS

Boiling Point (°C):	230°C
Melting Point (°C):	183°C
Freezing Point (°C):	<-10
Specific Gravity (water = 1)	6.0
Vapor Pressure (mmHg)(at 20°C)	0.01
Vapor Density (air = 1):	5.6
% Volatile By Volume (%):	<5
Evaporation Rate (BuAc = 1):	0.01
Solubility in Water:	Insoluble
Solubility in Organic Solvent:	Soluble (Partially) Acetone, Ethyl Acetate
Physical State:	Paste
Color:	Pale Grey
pH:	5.0
Odor:	Plant Oil (Mild)

SECTION IV - FIRE & EXPLOSION DATA

Flashpoint (°C):	120
Ignition point (°C):	<300
Flammable Limits In Air % By Volume:	Unknown
Acidity/Alkalinity	Mildly Acidic
Extinguishing Media:	CO_2, Foam, Sand, Water
Special Firefighting Procedures:	None Known
Unusual Fire and Explosion Hazards:	None Known

SECTION V- PHYSICAL HAZARDS

Stability:	(x) Stable ( ) Unstable
Conditions to Avoid:	Extreme Heat
Incompatible Materials to Avoid:	Alkaline Materials
Hazardous Decomposition Products:	Lead
Hazardous Polymerization:	( ) May Occur (x) Will Not Occur

SECTION VI - HEALTH HAZARDS

Toxicity: Lead

Ingestion: May cause stomach discomfort. Can cause vomiting, nausea, diarrhea, and paralysis. Irritation of the mouth, throat and stomach.
Skin contact: Mild irritant.
Inhalation: Causes respiratory irritation.
Eye contact: Irritates eyes.
Chronic Effects of Overexposure: Muscle pain. Stomach and muscle paralysis. Liver and kidney damage.

Medical Conditions Generally Aggravated By Overexposure: None Known
Chemical Listed as Carcinogen or Potential Carcinogen?: No

National Toxicity Program (NTP):	( )	Yes	(x)	No
IARC Monographs:	( )	Yes	(x)	No
OSHA:	( )	Yes	(x)	No

OSHA Permissible Exposure Limit (PEL): 0.15ppm
ACGIH Threshold Limit Value (TLV): N/D
Other Exposure Limit Used: Acute Oral LD50, 100~200 mg/kg (Guinea Pig)

Emergency and First Aid Procedures:

1. Inhalation: Move person to fresh air.
2. Eyes: In case of contact, immediately flush eyes with large amounts of water for at least 15 minutes and get medical attention if irritation persists.
3. Skin: Clean skin with solvent (Alcohol), wash skin with soap. Seek medical attention if irritation persists.
4. Ingestion: Rinse mouth with water several times, seek medical attention immediately.

Material Safety Data Sheet

Manufacturer: **Christopher Associates/Koki Co., Ltd.**

Santa Ana, CA 92707

Phone Numbers:
(714)979-7500
Chemtrec: (800)424-9300

SECTION VII - SPECIAL PROTECTION INFORMATION

Respiratory Type Protection: NIOSH Approved Corrosive Resistant Respirator.
Ventilation: Use only in a well ventilated area.
Local Exhaust: Recommended
Mechanical: Recommended
Special: N/A
Other: N/A

Protective Gloves: Plastic
Other Protective Clothing or Equipment: Safety Shower, Eye Bath, Apron, Mask, Chemical Safety Glasses, monogoggles

SECTION VIII - SPECIAL PRECAUTIONS AND SPILL/LEAK PROCEDURES

Precautions to be taken in handling/storage: Store in a refrigerated space, away from bases or oxidizers. Do not store at extreme temperatures.

Do not store near sources of ignition. Keep container closed when not in use.

Other Precautions: Do not consume food or drinks near product.

Steps to be taken in case material is spilled or released:

Wipe, scrape, or soak up in an inert non-combustible material and put in a container for disposal. This solder paste contains lead, and must be disposed of according to all local, state, and federal regulations.

Waste Disposal Methods: Dispose of according to all local, state, and federal regulations.

Proper Shipping Name: Solder Paste
D.O.T. Class: Not Regulated
Hazardous Classification: Solder Paste/Mixture

MATERIAL SAFETY DATA SHEET

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: SOLVENTLESS ACTVT 1 LT CN
Item No.: 18109
Product Type: Primer

Rec. 9/8/00

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
Hydroxyalkyl methacrylate	27813-02-1	95-100
METHACRYLIC ACID	79-41-4	0.1-2
2,6-DI-tert-BUTYL-p-CRESOL	128-37-0	0.1-1
Organocopper compound	13395-16-9	0.1-1

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
Hydroxyalkyl methacrylate	None	None	1 ppm TWA 3 ppm STEL
METHACRYLIC ACID	20 ppm TWA 70 mg/m3	20 ppm TWA skin 70 mg/m3 skin	4 ppm skin 10 ppm skinSTEL
2,6-DI-tert-BUTYL-p-CRESOL	None	None	10 mg/m3
Organocopper compound	Cu 0.2mg/m3fume Cu 1 mg/M3 dust	Cu 0.1mg/m3 TWA Cu 1 mg/M3 dust	None

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)

3. HAZARDS IDENTIFICATION

Toxicity: Severe eye irritant. Moderate skin irritant. Possible inhalation irritant. May be harmful if swallowed. May cause kidney or liver damage. Estimated oral LD50 more than 5000 mg/kg. Estimated dermal LD50 more than 2000 mg/kg.

Primary Routes of Entry: Eye, skin, inhalation, ingestion.

Signs and Symptoms of Exposure: May cause severe dermatitis on prolonged contact in sensitive individuals.

Existing Conditions Aggravated by Exposure: None known

Ingredients	Literature Referenced Target Organ and Other Health Effects	Carcinogen NTP	IARC	OSHA
Hydroxyalkyl methacrylate	ALG IRR	NO	NO	NO

4. FIRST AID MEASURES

Ingestion: Do not induce vomiting. Keep individual calm. Obtain medical attention.

Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.

Skin Contact: Wash with soap and water.

Eye Contact: Flush at least 15 minutes with water. Obtain medical attention.

5. FIRE FIGHTING MEASURES

Flash Point: More than 200°F Method: Tag Closed Cup

Recommended Extinguishing Agents: Carbon dioxide, foam, dry chemical

Special Firefighting Procedures: Not available

Hazardous Products formed by Fire or Thermal Decomp: Irritating organic vapors; oxides of carbon.

Product Name: SOLVENTLESS ACTVT 1 LT CN
Item No.: 18109

Unusual Fire or Explosion Hazards: None

Explosive Limits:
(% by volume in air)Lower Not available
(% by volume in air)Upper Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak: Soak up in an inert absorbent. Store in a partly filled, closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage: Store below 100°F
(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)
Handling: Avoid prolonged skin contact. Keep away from eyes. Avoid prolonged breathing of vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Safety glasses or goggles.
Skin: Neoprene or latex gloves.
Ventilation: Sufficient to maintain vapor concentration below TLV.
Respiratory Not available

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Pale blue liquid
Odor: Slightly acrylic
Boiling Point: 57°C at 0.5mm
pH: Approximately 5
Solubility in Water: 13%
Specific Gravity 1.07
Volatile Organic Compound (EPA Method 24) Not available
Vapor Pressure: 0.05mm at 68°F
Vapor Density: Approximately 1
Evaporation Rate (Ether = 1) Not available

10. STABILITY AND REACTIVITY

Stability: Stable
Hazardous Polymerization: Will not occur
Incompatibility: Oxidizing and reducing agents.
Conditions to Avoid: Not available
Hazardous Decomposition Products (non-thermal): None

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Incinerate following EPA and local regulations.
EPA Hazardous Waste Number NH - Not a RCRA Hazardous Waste Material

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)
Domestic Ground Transport
Proper Shipping Name: Unrestricted
Hazard Class or Division: Unrestricted
Identification Number: None
Marine Pollutant: None
IATA
Proper Shipping Name: Unrestricted
Class or Division: Unrestricted
UN or ID Number: None

Product Name: SOLVENTLESS ACTVT 1 LT CN
Item No.: 18109

15. REGULATORY INFORMATION

CA Proposition 65: Not available

16. OTHER INFORMATION

Estimated NFPA(R) Code:
- Health Hazard: 2
- Fire Hazard: 1
- Reactivity Hazard: 1
- Specific Hazard: Does not apply

Estimated HMIS(R) Code:
- Health Hazard: 2
- Flammability Hazard: 1
- Reactivity Hazards: 1
- Personal Protection: See Section 8.

Chemical Name: Not applicable
CAS No.: Not applicable
Chemical Formula: Not applicable
Chemical Family: Not applicable
Hazard: Causes burns.
Date of MSDS Preparation:
Day: 21
Month: September
Year: 1998

2. COMPOSITION / INFORMATION ON INGREDIENTS

Sodium Hydroxide
CAS No.: 1310-73-2
TSCA CAS Number: 1310-73-2
Percent Range: 25.0 - 35.0
Percent Range Units: weight / volume
LD50: Oral rat LDLo = 500 mg/kg.
LC50: None reported
TLV: 2 mg/m³
PEL: 2 mg/m³
Hazard: Causes severe burns. Toxic.

Demineralized Water
CAS No.: 7732-18-5
TSCA CAS Number: 7732-18-5
Percent Range: 65.0 - 75.0
Percent Range Units: volume / volume
LD50: None reported
LC50: None reported
TLV: Not established
PEL: Not established
Hazard: No effects anticipated.

3. HAZARDS IDENTIFICATION

Emergency Overview:

World Headquarters
Hach Company
P.O.Box 389
Loveland, CO USA 80539
(970) 669-3050

Appearance: Clear, colorless liquid
Odor: None
CAUSES SEVERE BURNS

HMIS:
Health: 3
Flammability: 0
Reactivity: 1
Protective Equipment: X - See protective equipment, Section 8.
NFPA:
Health: 3
Flammability: 0
Reactivity: 1
Symbol: Not applicable
Potential Health Effects:
Eye Contact: Causes severe burns.
Skin Contact: Causes severe burns May cause: scarring
Skin Absorption: None reported
Target Organs: None reported
Ingestion: Causes: severe burns May cause: abdominal pain collapse death
Target Organs: None reported
Inhalation: Causes: severe burns May cause: pneumonitis
Target Organs: None reported
Medical Conditions Aggravated: Pre-existing: Eye conditions Skin conditions Respiratory conditions
Chronic Effects: Chronic overexposure may cause destruction of any tissue contacted
Cancer / Reproductive Toxicity Information:
This product does NOT contain any OSHA listed carcinogens.

This product does NOT contain any IARC listed chemicals.

This product does NOT contain any NTP listed chemicals.

Additional Cancer / Reproductive Toxicity Information: None reported
Toxicologically Synergistic Products: None reported

4. FIRST AID

Eye Contact: Immediately flush eyes with water for 15 minutes. Call physician.
Skin Contact (First Aid): Wash skin with plenty of water for 15 minutes. Remove contaminated clothing. Call physician immediately.
Ingestion (First Aid): Do not induce vomiting. Give 1-2 glasses of water. Never give anything by mouth to an unconscious person. Call physician immediately.
Inhalation: Remove to fresh air. Give artificial respiration if necessary. Call physician.

5. FIRE FIGHTING MEASURES

Flammable Properties: Not Flammable, but reacts with most metals to form flammable hydrogen gas.
Flash Point: Not applicable
Method: Not applicable
Flammability Limits:

World Headquarters
Hach Company
P.O.Box 389
Loveland, CO USA 80539
(970) 669-3050

Lower Explosion Limits: Not applicable
Upper Explosion Limits: Not applicable
Autoignition Temperature: Not applicable
Hazardous Combustion Products: This material will not burn.
Fire / Explosion Hazards: This product will not burn or explode. Contact with metals gives off hydrogen gas which is flammable
Static Discharge: None reported.
Mechanical Impact: None reported
Extinguishing Media: Use media appropriate to surrounding fire conditions
Fire Fighting Instruction: As in any fire, wear self-contained breathing apparatus pressure-demand and full protective gear. Evacuate area and fight fire from a safe distance.

6. ACCIDENTAL RELEASE MEASURES

Spill Response Notice:
Only persons properly qualified to respond to an emergency involving hazardous substances may respond to a spill according to federal regulations (OSHA 29 CFR 1910.120(a)(v)) and per your company's emergency response plan and guidelines/procedures. See Section 13, Special Instructions for disposal assistance.
Containment Technique: Releases of this material may contaminate the environment. Absorb spilled liquid with non-reactive sorbent material. Stop spilled material from being released to the environment. Dike the spill to contain material for later disposal.
Clean-up Technique: Cover spilled material with a dry acid, such as citric or boric. Scoop up slurry into a large beaker. Adjust to a pH between 6 and 9 with an acid, such as sulfuric or citric. Flush reacted material to the drain with a large excess of water. Decontaminate the area of the spill with a soap solution.
Evacuation Procedure: Evacuate general area (50 foot radius or as directed by your facility's emergency response plan) when: a gallon or more of liquid is spilled. If conditions warrant, increase the size of the evacuation.
Special Instructions (for accidental release): Product is regulated as RCRA hazardous waste. Product is regulated as a hazardous water pollutant.
304 EHS RQ (40 CFR 355): Not applicable
D.O.T. Emergency Response Guide Number: 154 .

7. HANDLING / STORAGE

Handling: Avoid contact with eyes skin clothing Do not breathe mist or vapors. Wash thoroughly after handling. Maintain general industrial hygiene practices when using this product.
Storage: Store in a cool, dry place. Keep away from: heat acids / acid fumes.
Flammability Class: Not applicable

8. EXPOSURE CONTROLS / PROTECTIVE EQUIPMENT

Engineering Controls: Have an eyewash station nearby. Have a safety shower nearby. Maintain general industrial hygiene practices when using this product.
Personal Protective Equipment:
Eye Protection: safety glasses with top and side shields
Skin Protection: disposable latex gloves lab coat
Inhalation Protection: adequate ventilation
Precautionary Measures: Avoid contact with: eyes skin clothing Do not breathe: mist/vapor Wash thoroughly after handling. Use with adequate ventilation. Keep away from: acids/acid fumes heat
TLV: Not established
PEL: Not established

World Headquarters
Hach Company

Loveland, CO USA 80539
(970) 669-3050

9. PHYSICAL / CHEMICAL PROPERTIES

Appearance: Clear, colorless liquid
Physical State: Liquid
Molecular Weight: Not applicable
Odor: None
pH: 14
Vapor Pressure: Not determined
Vapor Density (air = 1): Not determined
Boiling Point: ~ 100°C (212°F)
Melting Point: Not determined
Specific Gravity (water = 1): 1.28
Evaporation Rate (water = 1): 0.19
Volatile Organic Compounds Content: None
Partition Coefficient (n-octanol / water): Not applicable
Solubility:
Water: Miscible
Acid: Miscible
Other: Not determined
Metal Corrosivity:
Steel: 0.00 in/yr (0.00 mm/yr)
Aluminum: > 20 in/yr (> 508 mm/yr)

10. STABILITY / REACTIVITY

Chemical Stability: Stable when stored under proper conditions.
Conditions to Avoid: Evaporation Extreme temperatures
Reactivity / Incompatibility: Incompatible with: acids halogenated organic compounds nitro compounds metals
Hazardous Decomposition: None reported
Hazardous Polymerization: Will not occur.

11. TOXICOLOGICAL INFORMATION

Product Toxicological Data:
LD50: None reported
LC50: None reported
Dermal Toxicity Data: None reported
Skin and Eye Irritation Data: None reported
Mutation Data: None reported
Reproductive Effects Data: None reported
Ingredient Toxicological Data: Sodium Hydroxide: Oral rat LDLo = 500 mg/kg; skin and eye irritation test data reported in RTECS.

12. ECOLOGICAL INFORMATION

Product Ecological Information: --
No ecological data available for this product.
Ingredient Ecological Information: --
No ecological data available for the ingredients of this product.

World Headquarters
Hach Company
P.O.Box 389
Loveland, CO USA 80539
(970) 669-3050

13. DISPOSAL CONSIDERATIONS

EPA Waste ID Number: D002
Special Instructions (Disposal): Dilute to 3 to 5 times the volume with cold water. Adjust to a pH between 6 and 9 with an acid, such as sulfuric or citric. Open cold water tap completely, slowly pour the reacted material to the drain. Allow cold water to run for 5 minutes to completely flush the system.
Empty Containers: Rinse three times with an appropriate solvent. Dispose of empty container as normal trash. Rinsate from empty containers may contain sufficient product to require disposal as hazardous waste.
NOTICE (Disposal): These disposal guidelines are based on federal regulations and may be superseded by more stringent state or local requirements. Please consult your local environmental regulators for more information.

MATERIAL SAFETY DATA SHEET

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: Super Bonder(R) 496 Instant Adhesive
Item No.: 49650
Product Type: Cyanoacrylate Ester

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
METHYL 2-CYANOACRYLATE	137-05-3	90-95
Poly (methyl methacrylate)	9011-14-7	5-10
HYDROQUINONE	123-31-9	0.1-0.5

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
METHYL 2-CYANOACRYLATE	2 ppm TWA 9.1 mg/M3	2 ppm TWA 8 mg/M3	None
HYDROQUINONE	2 mg/m3 TWA	2 mg/m3 TWA	2 mg/m3 TWA 4 mg/m3 STEL

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)
METHYL 2-CYANOACRYLATE	4 ppm 18 mg/M3	4 ppm 16 mg/M3

3. HAZARDS IDENTIFICATION

Toxicity: Skin contact may cause burns.
Bonds skin rapidly and strongly.
Skin and eye irritant.
Estimated oral LD50 more than 5000mg/kg.
Estimated dermal LD 50 more than 2000 mg/kg.

Primary Routes of Entry: None known

Signs and symptoms of Exposure: Vapor is irritating to eyes and mucous membranes above TLV. Prolonged and repeated overexposure t vapors may produce symptoms of non-allergic asthma in sensitive individuals.

Existing Conditions Aggravated by Exposure: None known

4. FIRST AID MEASURES

Ingestion: Ingestion is not likely. See supplemental page fo emergency procedures.

Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.

Skin Contact: Soak in warm water. See supplemental page for emergency procedures.

Product Name: Super Bonder(R) 496 Instant Adhesive
Item No.: 49550

4. FIRST AID MEASURES (continu

Eye Contact: Flush with water. See supplemental page for emergency procedures.

5. FIRE FIGHTING MEASURES

Flash Point: 150-200 F Method: Tag Closed Cup
Recommended Extinguishing Agents: Carbon dioxide, foam, dry chemical
Special Firefighting Procedures: Not available
Hazardous Products formed by Fire or Thermal Decomp: Irritating organic fragments.
Unusual Fire or Explosion Hazards: None

Explosive Limits:
(% by volume in air)Lower: Not available
(% by volume in air)Upper: Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak: Flood with water to polymerize. Soak up with an inert absorbent.

7. HANDLING AND STORAGE

Safe Storage: Store at or below 75 deg. F
(Contact Loctite Customer Service 1-800-243-4874 for shelf Life information
Handling: Avoid contact with skin and eyes. Avoid breathing vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Safety glasses or goggles.
Skin: Nitrile or polyethylene gloves and aprons. Do not use cotton.
See supplemental page for additional information.
Ventilation: Positive down-draft exhaust ventilation should be provided to maintain vapor concentration below TLV.
Respiratory: Not available

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Clear liquid
Odor: Sharp, irritating.
Boiling Point: More than 300 F
pH: Does not apply
Solubility in Water: Polymerized by water.
Specific Gravity: 1.09 at 75 F
Volatile Organic Compound (EPA Method 24): 92.6%; 1009.34 g/l
Vapor Pressure: Less than 0.2mm at 75 F
Vapor Density: Approximately 3
Evaporation Rate (Ether = 1): Not available

RECEIVED
AUG 06 1997
THE MOREY CORP.

10. STABILITY AND REACTIVITY

Stability: Stable
Hazardous Polymerization: Will not occur
Incompatibility: Polymerized by contact with water, alcohols, amines, alkalies.
Conditions to Avoid: Not available
Hazardous Decomposition Products (non-thermal): None

Product Name: Super Bonder(R) 496 Instant Adhesive
Item No.: 49650

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Polymerize as above. Incinerate in accordance with EPA and local regulations.

EPA Hazardous Waste Number: NH - Not a RCRA Hazardous Waste Material

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)
Domestic Ground Transport
- Proper Shipping Name: Unrestricted (Not more than 450 liters); Combustible liquids, n.o.s. (Cyanoacrylate ester) (More than 450 liters)
- Hazard Class or Division: Unrestricted (Not more than 450 liters) Combustible liquid (More than 450 liters)
- Identification Number: None (Not more than 450 liters); NA 1993 (More than 450 liters)
- Marine Pollutant: None

IATA
- Proper Shipping Name: Unrestricted (Not more than one pint); Other regulated substances (More than one pint)
- Class or Division: Unrestricted (Not more than one pint); Class 9 (More than one pint)
- UN or ID Number: None (Not more than one pint) ID 8027 (More than one pint)

15. REGULATORY INFORMATION

CA Proposition 65: No California Proposition 65 chemicals are known to be present.

16. OTHER INFORMATION

Estimated NFPA(R) Code:
- Health Hazard: 2
- Fire Hazard: 2
- Reactivity Hazard: 1
- Specific Hazard: Does not apply

Estimated HMIS(R) Code:
- Health Hazard: 2
- Flammability Hazard: 2
- Reactivity Hazards: 1
- Personal Protection: See Section 8.

INFORMATION FOR FIRST AID AND CASUALTY ON TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT
Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present a health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags, or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

SKIN ADHESION
First immerse the bonded surfaces in warm, soapy water. Peel or roll the surfaces apart with the aid of a blunt edge, e.g. a spatula or a teaspoon handle; then remove adhesive from the skin with soap and water. Do not try to pull surfaces apart with a direct opposing action.

EYELID TO EYELID OR EYEBALL ADHESION
In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL
Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH
If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

BURNS
Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn.
Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY
It should never be necessary to use such a drastic method to separate accidentally bonded skin

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

EMERGENCY/SAFETY INFORMATION: (617) 935-4850
OR: (617) 938-8630
ADDITIONAL MSDS: (617) 828-3300

SECTION I - IDENTIFICATION

PRODUCT (TRADE) NAME: Cho-Therm 1674

General Chemical Description: Solvent-based silicone

SECTION II - INGREDIENTS

Components	% by Weight	Exposure Guidelines OSHA PEL	ACGIH TLV
Aluminum Oxide	60-80%	10 mg/m3	10 mg/m3
Silicone Resin	15-305	NE	NE
Toluene	10-20%	100 ppm	50 ppm
Isopropanol	2-5%	50 ppm	50 ppm

SECTION III - PHYSICAL DATA

Boiling Point (Degree F):)200
Vapor Pressure (mm Hg @25 C): (4
Percent volatiles by weight: (20
Specific Gravity (water =1):) 1.75
Solubility in Water : Insoluble
Vapor Density : Heavier than air
Appearance and Odor : Gray liquid; solvent odor

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

Flash Point (Degree F):
40-50, based on toluene

Flammable limits:
Lel: 1.3% UEL: 7.1% for Toluene

Extinguishing Media:
Use carbon dioxide, dry chemical, foam.

Unusual Fire or Explosion Hazard:
Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions. Vapors may form flammable mixtures with air. Vapors from this product are heavier than air, and may travel a considerable distance to a source of ignition and flash back.

Special Firefighting Procedures:
Firefighters/rescue personnel should wear positive pressure self contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION V - REACTIVITY DATA

Product Stability:
Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:
Incompatible with strong oxidizers, acids, bases.

Hazardous Decompositions Products;
Carbon monoxide, carbon dioxide, aldehydes, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on th conditions of combustion.

Provided By Electrical Insulation Suppliers Inc.

Conditions to avoid:
Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

SECTION VI - RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

Small Spills:
Activate all explosion-proof exhuast ventilation in the immediate spill area. Extinguish open flames and eliminate all other sources of ignition. Wipe up, or absorb with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate chemical waste containers. Dispose of as an ignitable waste in accordance with all current Federal, State, and local regulations.

Large Spills:
Evacuate all personnel not directly involved with control/cleanup operations from the immediate spill area. Extinguish open flames and all other sources of ignition. Activate explosion-proof exhaust ventilation in the immediate spill area. Shut off the source of the release if this can be done without risk of injury. Use only spill response equipment approved for use in potential flammable/explosive environments. Dike area to contain the spill and prevent releases to sewers or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering sewers or other waterways. Collect abosrbed material and water rinses in appropriate waste containers. Dispose of as an ignitable waste in accordance with Federal, State, and local regulations.

SECTION VII - HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

Personal Protection:
This product can cause severe eye irritation. Prevent eye contact through the use of splash-proof chemical goggles or face shield. This product can cause skin irritation. Components of this product may be absorbed through the skin. Wear appropriate protective gloves to minimize skin contact. If necessary a promper chemical-resistant apron and additional impervious clothing should be used to minimize skin contact and prevent contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.

Ventilation Recommendations and Respiratory Protection:
Provide effective explosion-proof mechanical exhaust ventilation to draw vapors, mists, or fumes generated during processing away from the worker and prevent routine inhalation. Ventilation must be sufficient to maintain airborne concentrations of Section 2 ingredients below their PEL/TLV values. The type of respiratory protection selected will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

Storage:
Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Do not store near heat, sparks or open flame. To prevent fire or explosion risk from static electricity accumulation and discharge, effectively ground storage and transfer containers in accordance with NFPA standards. Empty containers may contain flammable liquid or vapor residue. Do not cut, weld, solder, drill, grind or expose container to heat, flame or other source of ignition. They may explode and

cause injury or death.

SECTION VIII - HEALTH DATA

Routes of Exposure:
Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:
Exposure may aggravate preexisting skin, eye and/or respriatory disorders.

Eye Contact:
Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. Toluene may be absorbed through the skin.

Inhalation:
High vapor concentrations may cause respiratory irritation, headaches, nausea, dizziness; may cause anesthetic efforts or other temporary central nervous system effects. Severity of effects will be dependent upon vapor concentration and severity of exposure.

Ingestion:
Harmful if swallowed.

Chronic Health Effects:
Overexposure to toluene has produced severe but reversible liver and kidney injury in humans. Repeated and prolonged overexposure has been associated with central nervous system injury and cardiac sensitization.

SECTION IX- FIRST AID PROCEDURES:

Eye Contact:
Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

Skin Contact:
Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

Inhalation:
Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

Ingestion:
Do NOT induce vomiting. If victim is conscious and alert, dilute by giving water to drink; never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

SECTION X ADDITIONAL INFORMATION

TSCA STATUS:
All components of this product are listed in the EPA toxic Substance Control Act Inventory.

SARA STATUS:
The components listed in Section 2 which are substances regulated by the SARA Section 313 amendments to RCRA are as follows:
Toluene (108-88-3)

Special Notes:
Date prepared: 5/12/93
Document number : 1674

Abbreviations: NA= Not Applicable NE = Not Established ND= Not Determined

Section 6 - Health Hazard Data

NOTE: STEEL PRODUCTS IN THE NATURAL STATE DO NOT PRESENT AN INHALATION, INGESTION OR CONTACT HAZARD. HOWEVER, OPERATIONS SUCH AS BURNING, WELDING, SAWING, BRAZING AND GRINDING MAY RELEASE FUMES AND/OR DUSTS WHICH MAY PRESENT HEALTH HAZARDS IF TLV'S ARE EXCEEDED

MAJOR EXPOSURE HAZARD

☒ **Inhalation** ☐ **Skin Contact** ☐ **Skin Absorption** ☐ **Eye Contact** ☐ **Ingestion**

Effects of Overexposure

Short term exposure to fumes/dust may produce irritation of eyes and respiratory system. Inhalation of high concentrations of freshly formed oxide fumes of iron, manganese and copper may cause metal fume fever characterized by a metallic taste in the mouth, dryness and irritation of the throat and influenzalike symptoms.

Chronic inhalation of high concentrations of iron oxide fumes or dust may lead to a benign pneumoconiosis (siderosis). Inhalation of high concentrations of ferric oxide may possibly enhance the risk of lung cancer development in workers exposed to pulmonary carcinogens.

Chromium and nickel and their compounds are listed in the 3rd Annual Report on Carcinogens, as prepared by the National Toxicology Program (NTP). Exposure to high concentrations of dust and fumes can cause sensitization dermatitis, inflammation and/or ulceration of upper respiratory tract and possibly cancer of nasal passages and lungs.

Recent epidemiological studies of workers melting and working alloys containing nickel/chromium have found no increased risk of cancer.

Suspected Cancer Agent? _____ NO: This product's ingredients are not found in the lists below.
__X__ YES: ____ Federal OSHA __X__ NTP ____ IARC

Emergency and First Aid Procedures

If exposed to excessive levels of metal fumes, remove to fresh air, seek medical aid immediately.

Eyes - Flush with water for at least 15 minutes.

Section 7 - Spill or Leak Procedures

Spill or Leak Procedures

NA

Waste Disposal Methods

According to local, state and federal regulations

Section 8 - Special Protection

Respiratory

NIOSH/MSHA - Approved dust and fume, respirator should be used to avoid excessive inhalation of particulates when exposure exceeds TLV's.

Ventilation

Local exhaust ventilation should be utilized when welding, burning, sawing, brazing, grinding or machining when exposure exceeds TLV's.

Eye Protection and Protective Clothing

Safety glasses or goggles should be utilized as required by exposure. Other protective equipment should be utilized as required by the welding standards.

Section 9 - Special Precautions

In welding, precautions should be taken for airborne contaminants which may originate from components of the welding rod.

Arc or spark generated when welding or burning could be a source of ignition for combustible and flammable materials.

MOR 001317

The information in this MSDS was obtained from sources which we believe are reliable. However, the information is provided without any representation or warranty, express or implied, regarding the accuracy or correctness.

The conditions or methods of handling storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product.

Data sheets of individual manufacturers may be obtained by contacting A. M. Castle & Co., 3400 N. Wolf Road, Franklin Park, IL 60131 Attn: Corp. Safety Mgr.

MATERIAL SAFETY DATA SHEET

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: Super Bonder(R) 496 Instant Adhesive
Item No.: 49650
Product Type: Cyanoacrylate Ester

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
METHYL 2-CYANOACRYLATE	137-05-3	90-95
Poly (methyl methacrylate)	9011-14-7	5-10
HYDROQUINONE	123-31-9	0.1-0.5

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
METHYL 2-CYANOACRYLATE	2 ppm TWA 9.1 mg/M3	2 ppm TWA 8 mg/M3	None
HYDROQUINONE	2 mg/m3 TWA	2 mg/m3 TWA	2 mg/m3 TWA 4 mg/m3 STEL

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)
METHYL 2-CYANOACRYLATE	4 ppm 18 mg/M3	4 ppm 16 mg/M3

3. HAZARDS IDENTIFICATION

Toxicity: Skin contact may cause burns.
Bonds skin rapidly and strongly.
Skin and eye irritant.
Estimated oral LD50 more than 5000mg/kg.
Estimated dermal LD 50 more than 2000 mg/kg.

Primary Routes of Entry: None known

Signs and symptoms of Exposure: Vapor is irritating to eyes and mucous membranes above TLV. Prolonged and repeated overexposure to vapors may produce symptoms of non-allergic asthma in sensitive individuals.

Existing Conditions Aggravated by Exposure: None known

Ingredients	Literature Referenced Target Organ and Other Health Effects	Carcinogen NTP	IARC	OSHA

4. FIRST AID MEASURES

Ingestion: Ingestion is not likely. See supplemental page for emergency procedures.

Inhalation: Remove to fresh air. If symptoms persist, obtain medical attention.

Skin Contact: Soak in warm water. See supplemental page for emergency procedures.

Product Name: Super Bonder(R) 496 Instant Adhesive
Item No.: 49650

4. FIRST AID MEASURES (continued)

Eye Contact:	Flush with water. See supplemental page for emergency procedures.

5. FIRE FIGHTING MEASURES

Flash Point:	150-200 F Method: Tag Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Not available
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic fragments.
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	Not available
(% by volume in air)Upper	Not available

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Flood with water to polymerize. Soak up with an inert absorbent.

7. HANDLING AND STORAGE

Safe Storage:	Store at or below 75 deg. F
(Contact Loctite Customer Service 1-800-243-4874 for shelf Life information)	
Handling:	Avoid contact with skin and eyes. Avoid breathing vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Nitrile or polyethylene gloves and aprons. Do not use cotton. See supplemental page for additional information.
Ventilation:	Positive down-draft exhaust ventilation should be provided to maintain vapor concentration below TLV.
Respiratory	Not available
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Clear liquid
Odor:	Sharp, irritating.
Boiling Point:	More than 300 F
pH:	Does not apply
Solubility in Water:	Polymerized by water.
Specific Gravity	1.09 at 75 F
Volatile Organic Compound (EPA Method 24)	92.6%; 1009.34 g/l
Vapor Pressure:	Less than 0.2mm at 75 F
Vapor Density:	Approximately 3
Evaporation Rate (Ether = 1)	Not available

RECEIVED
AUG 06 1997
THE MOREY CORP.

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous Polymerization:	Will not occur
Incompatibility:	Polymerized by contact with water, alcohols, amines, alkalies.
Conditions to Avoid:	Not available
Hazardous Decomposition Products (non-thermal):	None

Product Name: Super Bonder(R) 496 Instant Adhesive
Item No.: 49650

11. TOXICOLOGICAL INFORMATION

See Section 3.

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended methods of disposal: Polymerize as above. Incinerate in accordance with EPA and local regulations.

EPA Hazardous Waste Number: NH - Not a RCRA Hazardous Waste Material

14. TRANSPORTATION INFORMATION

DOT (49 CFR 172)
Domestic Ground Transport
- Proper Shipping Name: Unrestricted (Not more than 450 liters); Combustible liquids, n.o.s. (Cyanoacrylate ester) (More than 450 liters)
- Hazard Class or Division: Unrestricted (Not more than 450 liters) Combustible liquid (More than 450 liters)
- Identification Number: None (Not more than 450 liters); NA 1993 (More than 450 liters)
- Marine Pollutant: None

IATA
- Proper Shipping Name: Unrestricted (Not more than one pint); Other regulated substances (More than one pint)
- Class or Division: Unrestricted (Not more than one pint); Class 9 (More than one pint)
- UN or ID Number: None (Not more than one pint) ID 8027 (More than one pint)

15. REGULATORY INFORMATION

CA Proposition 65: No California Proposition 65 chemicals are known to be present.

16. OTHER INFORMATION

Estimated NFPA(R) Code:
- Health Hazard: 2
- Fire Hazard: 2
- Reactivity Hazard: 1
- Specific Hazard: Does not apply

Estimated HMIS(R) Code:
- Health Hazard: 2
- Flammability Hazard: 2
- Reactivity Hazards: 1
- Personal Protection: See Section 8.

INFORMATION FOR FIRST AID AND CASUALTY ON TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT

Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present a health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags, or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

SKIN ADHESION

First immerse the bonded surfaces in warm, soapy water. Peel or roll the surfaces apart with the aid of a blunt edge, e.g. a spatula or a teaspoon handle; then remove adhesive from the skin with soap and water. Do not try to pull surfaces apart with a direct opposing action.

EYELID TO EYELID OR EYEBALL ADHESION

In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL

Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH

If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

BURNS

Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn. Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY

It should never be necessary to use such a drastic method to separate accidentally bonded skin

* SUBJECT TO REPORTING REQUIREMENT OF SECTION 313 OF TITLE III OF SARA (40 CFR PART 372).

1) Industry recommended exposure limit of 100 ppm.
2) Supplier recommended exposure limit of 35 ppm.
   This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990 (Glycol Ethers Category).
3) See Section 8 Exposure Controls, Personal Protection - Exposure Guidelines for more information on exposure limits.
4) Supplier recommended exposure limit of 10 mg/m3.
5) This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990 (Glycol Ethers Category).

The recommended permissible exposure limits (PEL) indicated above reflect the levels adopted by OSHA in 1989. Although, some of the 1989 levels have since been vacated, the Nazdar Company recommends that the lower exposure levels be observed as reasonable worker protection.

SECTION 3 -- HAZARDS IDENTIFICATION

GENERAL HEALTH EFFECTS

THE FOLLOWING INFORMATION HAS BEEN DEVELOPED BASED UPON USING THE PRODUCT AS INTENDED BY THE MANUFACTURER. The potential health effects of this product are based on the hazards of its components. The use of this product in combination with other products may produce synergistic (additive) health effects. Cautionary labeling and material safety data sheets of all materials used with this product should be reviewed before use.

EYES

Eye contact with liquid, vapors or mists may cause irritation, including burning, tearing, redness or swelling.

SKIN

Repeated or prolonged overexposure may cause skin irritation or dermatitis. Symptoms may include dryness, chapping and redness. Skin absorption is possible but harmful effects are not expected from this route of exposure under normal conditions of handling and use.

INHALATION

Repeated and prolonged overexposure by inhalation may cause respiratory tract irritation. Symptoms may include central nervous system disorders such as headaches, dizziness, weakness and fatigue.

INGESTION

Ingestion may cause gastrointestinal tract irritation. Symptoms may include nervous system depression including drowsiness or unconsciousness. Ingestion may cause vomiting. Aspiration of material into lungs may cause chemical pneumonitis which can be fatal.

CHRONIC EFFECTS/TARGET ORGANS

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

ANIMAL STUDIES

Diethylene glycol butyl ether caused liver and blood abnormalities and kidney damage in lab animals after overexposure. Aliphatic dibasic acid esters (or its components) have been suggested as a cause of the following effects in lab animals, after overexposure, and may aggravate pre-existing disorders of these organs in humans; mild, reversible liver effects, nasal damage. 2-Butoxyethanol has caused reproductive and blood disorders resulting in kidney, liver and lung damage in lab animals. For animal studies, reference TSCA Section 4 Test Rule Results or contact the manufacturer for further details.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Pregnant women and persons with pre-existing health disorders should consult their physician before using this product. Repeated and prolonged overexposure and/or individual sensitivity may increase the potential for and degree of adverse health effects. See Section 3 "Hazards Identification" for effects of certain hazardous ingredients.

ROUTES OF EXPOSURE

Primary exposure routes: Inhalation-Dermal (Contact/Absorption)-Ingestion

SECTION 4 -- FIRST AID MEASURES

EYES

After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. If irritation persists have eyes examined and tested by medical personnel.

SKIN
In case of contact, immediately wash skin with a mild soap and plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Cool water is initially suggested to prevent the pores of the skin from opening. This will minimize both the area and time of skin contact. Lukewarm water may then be used to ensure all contaminants are removed. Skin should be monitored for reddening or chemical burns. Mild soap is suggested to help prevent abrading the skin or rubbing the chemicals into pores during cleansing. Get medical attention if irritation persists or significant contact has occurred. Thoroughly wash (or discard) clothing and shoes before reuse.

INHALATION
Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention if breathing difficulty is experienced.

INGESTION
If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

OTHER COMMENTS
No Data Available

SECTION 5 -- FIRE FIGHTING MEASURES

FLASH POINT
145 Degrees - 150 Degrees Fahrenheit (TCC)

OSHA FLAMMABILITY CLASSIFICATION (NFPA)
Class IIIA Combustible Liquid

FLAMMABLE LIMITS (LEL-LOWER EXPLOSIVE LIMIT)
0.5% volume in air

EXTINGUISHING MEDIA
Foam-CO2-Dry Chemical-Water Spray

FIRE AND EXPLOSION HAZARDS
Isolate from heat, electrical equipment, sparks, and open flame. Keep containers tightly closed. Vapors may be heavier than air and can travel to a source of ignition then flash back. Closed containers may explode when exposed to extreme heat.

FIRE FIGHTING EQUIPMENT
Full protective equipment including self-contained breathing apparatus (SCBA) is recommended to protect firefighters.

SPECIAL FIRE FIGHTING PROCEDURES
Water may be ineffective but may be used to cool containers. Fumes released on burning may be toxic and dangerous.

SECTION 6 -- ACCIDENTAL RELEASE MEASURES

RELEASE MANAGEMENT MEASURES
Remove all sources of ignition (flames, hot surfaces and electrical, static or frictional sparks). Avoid contact or breathing vapors. Ventilate area. Contain release and remove with inert absorbent. Use non-sparking tools to place material in appropriate container for disposal. The National Response Center (800-424-8802) and local authorities should be contacted for any reportable spill/release.

SECTION 7 -- HANDLING AND STORAGE

HANDLING AND STORAGE METHODS
Use in a well ventilated area. Follow all MSDS/label precautions even after container is emptied; container may retain product residues. Store in closed containers in cool, dry, well ventilated area away from sources of ignition. Keep containers closed when not in use. Smoke in designated areas only. Avoid prolonged or repeated overexposure to this product. Keep out of reach of children. Follow label directions carefully. Do not take internally. Harmful or fatal if swallowed.

SECTION 8 -- EXPOSURE CONTROLS, PERSONAL PROTECTION

RESPIRATORY PROTECTION
If concentrations of hazardous ingredients exceed exposure limits listed in Section 2 an appropriate NIOSH (National Institute for Occupational Safety and Health) approved respirator with an organic vapor cartridge should be used. If material is handled under mist, spray or dust forming conditions, a P100 (99.97% efficiency) filter should be used in addition to the organic vapor cartridge. If no exposure limits are listed in Section 2, follow general safety guidelines in 29 CFR 1910.134 Respiratory Protection or other applicable respiratory standard.

SKIN PROTECTION
Use neoprene, nitrile or other gloves resistant to chemicals listed in Section 2. Contact a reputable safety supply company

for appropriate gloves. Solvent resistant aprons are recommended. Prevent prolonged skin contact with contaminated clothing.

EYE PROTECTION
Use ANSI (American National Standards Institute) approved safety glasses, faceshield or splash proof goggles to prevent eye contact. Contact a reputable safety supply company for appropriate eye protection. The availability of an eye wash is highly recommended.

EXPOSURE GUIDELINES
See Section 2 "Composition, Information on Ingredients" for occupational exposure limits. Excessive concentrations of nuisance dusts or particulates not otherwise classified (PNOC) or regulated (PNOR) may reduce visibility and cause unpleasant deposits in the eyes, ears, and nasal passages. The TLV and PEL has been established for all non-toxic "nuisance dusts" that are not otherwise classified and refers to both organic and inorganic dusts. Exposure or generation of these dusts is not anticipated during normal printing operations. The use of dry pigments and powders, grinding or sanding of printed products may generate quantities of these particulates. Refer to Section 2 Composition, Information on Ingredients for exposure limits.

HYGIENIC PRACTICES
Wash with soap and water before eating, smoking or using toilet facilities. Separately wash or discard clothing and footwear before reuse. NEVER try to remove ink from the skin by using solvent or thinner. Such action is likely to increase the possibility of undesirable effects. Remove contaminated clothing to prevent prolonged skin contact.

ENGINEERING CONTROLS
Use applicable engineering controls, work practices and personal protective equipment to ensure all concentrations are kept below the exposure limits listed in Section 2. Adequate controls should be implemented to ensure employee safety from fine mists which may be produced under some printing conditions.

OTHER PROTECTION
No Data Available

SECTION 9 -- PHYSICAL AND CHEMICAL PROPERTIES

**

APPEARANCE:
Viscous liquid

ODOR:
Characteristic

PHYSICAL STATE:
Liquid

pH
Not applicable

VAPOR PRESSURE
See Section 2 for individual ingredients.

VAPOR DENSITY
Heavier than air

BOILING POINT
Greater than 300 degrees Fahrenheit

FREEZING POINT
Not available

SOLUBILITY IN WATER
Not tested

EVAPORATION RATE
Slower than ether

VISCOSITY
Greater than water

PERCENT VOLATILE BY VOLUME: SEE SECTION ONE

WEIGHT PER GALLON: SEE SECTION ONE

VOC: SEE SECTION ONE

PHOTOCHEMICALLY REACTIVE
No

Percent volatile = Percent VOC

SECTION 10 -- STABILITY AND REACTIVITY

CHEMICAL STABILITY
Stable

CONDITIONS TO AVOID
Avoid excessive heat, ignition sources, sparks and open flame.

INCOMPATIBILITY WITH OTHER MATERIALS
Strong acids/bases, oxidizing/reducing agents and reactive chemicals.

HAZARDOUS DECOMPOSITION PRODUCTS
May produce hazardous fumes when heated to decomposition e.g. carbon monoxide, carbon dioxide and other noxious gases.

HAZARDOUS POLYMERIZATION
Not anticipated during normal printing and storage conditions.

SECTION 11 -- TOXICOLOGICAL INFORMATION

EXPERIMENTAL TOXICITY DATA
Refer to Section 3 Hazards Identification for additional toxicological data. Experimental toxicity data on petroleum distillate CAS# 64742-94-5 has given the following results: Oral LD50 Rat; 10 ml/kg; Dermal LD50 Rabbit 4 ml/kg; Inhalation LC50 Rat; 3800 mg/m3 4 hours. Experimental toxicity data on 2-butoxyethanol has given the following results: Oral LD50 Rabbit; 320 mg/kg; Intraperitoneal LD50 Rat; 550 mg/kg.

SECTION 12 -- ECOLOGICAL INFORMATION

ECOTOXICITY
Because this product may be a mixture of chemicals, some of which may be ecologically toxic, it is strongly suggested that it not be disposed of into the environment, i.e. soil, water courses, lakes, landfills, sewers, etc.

ENVIRONMENTAL FATE
No Data Available

SECTION 13 -- DISPOSAL CONSIDERATIONS

DISPOSAL METHODS
Dispose of in accordance with applicable local, county, state, provincial and federal regulations. Emptied containers may retain hazardous properties. Empty containers should be disposed of in an environmentally safe manner in accordance with applicable regulations.

SECTION 14 -- TRANSPORT INFORMATION

TRANSPORT INFORMATION
Not regulated. The product(s) described by this Material Safety Data Sheet do not meet the definition of nor are they classified as a hazardous material/dangerous good as defined by the United States Department of Transportation (DOT), the International Civil Aviation Organization (ICAO), the International Maritime Organization (IMO) or the Canadian Transportation of Dangerous Goods Act (TDG).

SECTION 15 -- REGULATORY INFORMATION

SARA TITLE III 313 INFORMATION
See Section 2 "Composition, Information on Ingredients" for applicable chemicals.

TOXIC SUBSTANCES CONTROL ACT STATUS
All ingredients in Section 2 are listed on the U.S. Environmental Protection Agency's Toxic Substances Control Act (TSCA) Inventory and the Canadian Domestic Substance List.

OTHER REGULATORY INFORMATION
OCCUPATIONAL SAFETY and HEALTH ADMINISTRATION (OSHA) - MSDS is compliant with Occupational Safety and Health Administration Hazard Communication Standard - 29 CFR 1910.1200. AMERICAN NATIONAL STANDARDS INSTITUTE - This MSDS follows the ANSI Z400.1-1993 format. WORKPLACE HAZARDOUS MATERIAL INFORMATION SYSTEM (WHMIS) - This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

WHMIS CLASSIFICATION (CANADA):

No Data Available

SECTION 16 -- OTHER INFORMATION

DISCLOSURE

The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind express or implied is made with respect to the information contained herein. The data in this MSDS relates only to the specific material designated herein and does not apply to use in combination with any other material or process.

DEFINITIONS

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association

CEILING: (TLV-Ceiling and PEL Ceiling Limit) The ceiling exposure limit or concentration not to be exceeded for even brief times.

DOT: Department of Transportation

HMIS: The Hazardous Materials Identification System (HMIS) developed by the National Paint and Coatings Association (NPCA) to provide information on the acute health hazards, reactivity and flammability of products encountered in the workplace at room temperatures.

HMIS codes assigned for this product are only suggested ratings based on anticipated normal screen printing applications. The employer has the ultimate responsibility for assigning these ratings and should fully evaluate the MSDS, work practices and environmental conditions prior to assigning the appropriate ratings.

HMIS rating involves data interpretations that may vary from company to company.

HMIS Personal Protection Index of "X-Ask your supervisor" is given on this MSDS due to varying work conditions which may dictate different levels of protection. Please review this MSDS before determining appropriate protective equipment and beginning work.

IARC: International Agency for Research on Cancer

NFPA: National Fire Protection Association

NTP: National Toxicology Program

STEL: Short-Term Exposure Limit: ACGIH terminology for the short-term exposure limit or maximum concentration for a continuous exposure period of 15 minutes.

TLV: Threshold Limit Value. A term ACGIH uses to express the airborne concentration of a material to which most workers can be exposed during a normal daily and weekly work schedule without adverse effects.

TWA: Time-Weighted Average

VOC: Volatile Organic Compound

4. FIRST AID MEASURES

Ingestion:	Ingestion is not likely. See supplemental page for emergency procedures.
Inhalation:	Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact:	Soak in warm water. See supplemental page for emergency procedures.
Eye Contact:	Flush with water. See supplemental page for emergency procedures.

5. FIRE FIGHTING MEASURES

Flash Point:	150 - 200°F Method: Tag Closed Cup
Recommended Extinguishing Agents:	Carbon dioxide, foam, dry chemical
Special Firefighting Procedures:	Not available
Hazardous Products formed by Fire or Thermal Decomp	Irritating organic vapors
Unusual Fire or Explosion Hazards:	None
Explosive Limits:	
(% by volume in air)Lower	1.7% Phthalic anhydride
(% by volume in air)Upper	10.5% Phthalic anhydride

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:	Flood with water to polymerize. Soak up with an inert absorbent.

7. HANDLING AND STORAGE

Safe Storage:	Store at or below 75°F
(Contact Loctite Customer	Service 1-800-243-4874 for shelf Life information)
Handling:	Avoid contact with skin and eyes. Avoid breathing vapor.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes:	Safety glasses or goggles.
Skin:	Nitrile or polyethylene gloves and aprons. Do not use cotton. See supplemental page for additional information.
Ventilation:	Positive down-draft exhaust ventilation should be provided to maintain vapor concentration below TLV
Respiratory	Not available
	See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Clear liquid
Odor:	Sharp, irritating
Boiling Point:	More than 300°F
pH:	Does not apply
Solubility in Water:	Polymerized
Specific Gravity	1.05 at 75°F
Volatile Organic Compound (EPA Method 24)	85.6%; 899 grams per liter
Vapor Pressure:	Less than 0.2 mm at 75°F
Vapor Density:	Approximately 3
Evaporation Rate (Ether = 1)	Not available

INFORMATION FOR FIRST AID AND CASUALTY ON TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT
Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present a health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags, or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

SKIN ADHESION
First immerse the bonded surfaces in warm, soapy water. Peel or roll the surfaces apart with the aid of a blunt edge, e.g. a spatula or a teaspoon handle; then remove adhesive from the skin with soap and water. Do not try to pull surfaces apart with a direct opposing action.

EYELID TO EYELID OR EYEBALL ADHESION
In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL
Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH
If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

BURNS
Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn.
Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY
It should never be necessary to use such a drastic method to separate accidentally bonded skin.

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. *YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL* INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

EMERGENCY OVERVIEW:
This section not in use
POTENTIAL HEALTH EFFECTS:
INGESTION:
MAY BE harmful if swallowed.
SKIN CONTACT:
UNCURED PRODUCT WILL IRRITATE LIPS, GUMS AND TONGUE.
UNCURED PRODUCT CONTACT MAY IRRITATE THE SKIN.
INHALATION:
CAUSES MILD RESPIRATORY IRRITATION.
APPLIES ONLY IN UNCURED STATE.
EYE CONTACT:
UNCURED PRODUCT CONTACT IRRITATES EYES.
MEDICAL CONDITIONS AGGRAVATED:
NONE KNOWN.
SUBCHRONIC (TARGET ORGAN) EFFECTS:
NONE KNOWN.
CHRONIC EFFECTS/CARCINOGENICITY:
This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by

NTP, IARC, or OSHA.

PRODUCTS/INGREDIENTS

This space reserved for special use.

PRINCIPLE ROUTES OF EXPOSURE:

Eyes.
DERMAL-SKIN

OTHER:

METHANOL RELEASED DURING CURING. THIS PRODUCT CONTAINS METHYL-POLYSILOXANES WHICH CAN GENERATE FORMALDEHYDE AT APPROXIMATELY 300 DEGREES FARENHEIT (150'C) AND ABOVE, IN ATMOSPHERES WHICH CONTAIN OXYGEN. FORMALDEHYDE IS A SKIN AND RESPIRATORY SENSITIZER, EYE AND THROAT IRRITANT, ACUTE TOXICANT, AND POTENTIAL CANCER HAZARD. AN MSDS FOR FORMALDEHYDE IS AVAILABLE FROM GE SILICONES.

4. FIRST AID MEASURES

INGESTION:

RINSE MOUTH WITH WATER SEVERAL TIMES.

SKIN:

TO CLEAN FROM SKIN, REMOVE COMPLETELY WITH A DRY CLOTH OR PAPER TOWEL, BEFORE WASHING WITH DETERGENT AND WATER. GET MEDICAL ATTN. IF IRRITATION PERSISTS.

INHALATION:

MOVE PERSON TO FRESH AIR.

EYES:

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention IF IRRITATION PERSISTS.

NOTE TO PHYSICIAN:

None Known.

5. FIRE FIGHTING MEASURES

FLASH POINT:		NA	(C)	NA	(F)
METHOD	:	NA			
IGNTIION TEMP	:	NA	(C)	NA	(F)
FLAMMABLE LIMITS IN AIR - LOWER(%):		NA			
FLAMMABLE LIMITS IN AIR - UPPER(%):		NA			
SENSITIVITY TO MECHANICAL IMPACT (Y/N):		NO			

SENSITIVITY TO STATIC DISCHARGE:

Sensitivity to static discharge is NOT EXPECTED.

EXTINGUISHING MEDIA:

All standard firefighting media.

SPECIAL FIREFIGHTING PROCEDURES:

NONE KNOWN.

6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Wipe, scrape or soak up in an inert material and put in a container for disposal.
WASH WALKING SURFACES WITH DETERGENT AND WATER TO REDUCE SLIPPING HAZARD. WEAR PROPER PROTECTIVE EQUIPMENT AS SPECIFIED IN THE PROTECTIVE EQUIPMENT SECTION.

7. HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

AVOID CONTACT WITH SKIN AND EYES. CAUTION! COMBUSTIBLE. REMOVE CONTACT LENSES BEFORE USING SEALANT. DO NOT HANDLE LENSES UNTIL ALL SEALANT HAS BEEN CLEANED FROM THE FINGERTIPS, NAILS AND CUTICLES. RESIDUAL SEALANT MAY REMAIN ON FINGERS FOR SEVERAL DAYS AND TRANSFER TO LENSES AND CAUSE SEVERE EYE IRRITATION. PRODUCT RELEASES METHANOL DURING APPLICATION AND CURING. (METHANOL TLV=200 PPM).
UNCURED PRODUCT CONTACT IRRITATES EYES.
UNCURED PRODUCT CONTACT MAY IRRITATE SKIN.

C. Hazards Identification

********** EMERGENCY OVERVIEW **********

Appearance:
lear yellowish liquid. Faint characteristic odor.

FPA: Health 1 Flammability 1 Reactivity 0 Special
****

otential Health Effects
Eye: May cause eye irritation.
Skin Contact: May cause skin irritation.
Skin Absorption: No acute effects expected.
Ingestion: LD 50 not established. Do not ingest. Ingestion may irritate the gastrointestinal tract and may cause nausea and vomiting.
Inhalation: Vapors may irritate the mucosal membranes of mouth, nose, and throat. Intense and/or prolonged exposure to vapor concentrations exceeding the TLV/PEL may cause headache, nausea, and vomiting. Oil vapors may accumulate in the lungs, and may cause chemical pneumonitis.
Chronic Effects: A review of the literature does not show obvious long term hazard.
Carcinogenicity: No component known to be present in this product at >0.1% is presently listed as a carcinogen by IARC, NTP or OSHA, unless otherwise noted in Section P - Other Information.
outes of Exposure: Skin contact. Eye contact. Inhalation.

D. First Aid Measures

Eye: Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.
Skin: Wipe off, then wash thoroughly with soap and water. Get medical attention if irritation occurs.
Ingestion: If the individual is conscious, give 1-2 glasses of milk or water to dilute stomach content. Do not physically induce vomiting. Never give anything by mouth to an unconscious person. Get prompt medical attention.

Inhalation: Immediately remove the individual to fresh air. If breathing is difficult, administer oxygen. If breathing stops, administer artificial respiration. Get prompt medical attention.

E. Fire Fighting Measures

lammable Properties
Flash Point (degrees F/C): 545°F / 285°C Method:
Upper Flammable Limit: Not available
Lower Flammable Limit: Not available
Autoignition Temperature: Not determined
Hazardous Products of Combustion: Potential combustion products are oxides

E. Fire Fighting Measures (Cont.)

of carbon and nitrogen.

Properties That Could Increase Fire or Explosion Hazard:None known.

xtinguishing Media: Dry chemical, water-fog, chemical foam, or CO2. Direct water-stream may cause frothing.

ire Fighting Instructions: Wear self contained breathing apparatus when fire fighting in a confined space. Cool fire exposed containers with waterspray to prevent rupture.

F. Accidental Release Measures

ear adequate protection and eliminate all sources of ignition. Stop the leak, f it can be safely done. Ventilate the area and dike the spill to prevent ntry into sewer or watercourses. Absorb with an oil-absorbent. Advise uthorities if product has entered or may enter sewers, watercourses or xtensive land areas.

G. Handling and Storage

eep containers closed when not in use. Do not store near heat, sparks, flame r strong oxidants. Store in a clean, dry area below 49C/120F, away from all gnition sources and incompatible materials. Avoid contact with skin and eyes. void breathing mists.

H. Exposure Controls/Personal Protection

ersonal Protective Equipment (PPE)

Eye/Face Protection: Wear chemical safety goggles plus full face shield to protect against splashing.

Skin Protection: Oil-impervious and solvent-resistant (e.g. neoprene) type.

Respiratory Protection: Good industrial hygiene practices recommend that engineering controls be used to reduce environmental concentrations to the threshold limit value (TLV) or permissible exposure limit (PEL). If any associated TLV or PEL is exceeded, provide NIOSH approved respiratory protection. This product does not constitute a health or physical hazard during normal industrial use. As in all industrial applications, adequate ventilation and good hygienic practices are advisable.

)ther: Eyewash facility. Oil-impervious (e.g. neoprene) clothing to avoid skin contact.

Exposure Guidelines: See information provided in Section B, Ingredients.

Solubility in Water: Negligible
Specific Gravity at 60 degrees F (H20 = 1): 0.9900 +/-
Density: Not calculated
Softening Point (degrees F): Not determined
Evaporation Rate (n-Butyl Acetate = 1): Not determined
Viscosity: Not available
Bulk Density: Not determined
% Volatile: Not determined
VOC: Not testedlbs/gallon Method: Not Tested
Octanol/Water Partition Coefficient: Not determined
Saturated Vapor Concentration: Not determined
Molecular Weight: Not applicable

J. Stability and Reactivity

Chemical Stability: Stable under normal conditions.
Conditions To Avoid: Prolonged exposure to elevated temperatures.
Incompatibility With Other Materials: Strong oxidizers, acids and alkalies.
Hazardous Decomposition Products: Potential combustion products are oxides of carbon and nitrogen.

K. Toxicological Information

Eye Effects: May cause eye irritation.
Skin Effects, Contact: May cause skin irritation.
Skin Effects, Absorption: No acute effects expected.
Acute Oral Effects (Ingestion): LD 50 not established. Do not ingest. Ingestion may irritate the gastrointestinal tract and may cause nausea and vomiting.
Acute Inhalation Effects: Vapors may irritate the mucosal membranes of mouth, nose, and throat. Intense and/or prolonged exposure to vapor concentrations exceeding the TLV/PEL may cause headache, nausea, and vomiting. Oil vapors may accumulate in the lungs, and may cause chemical pneumonitis.
Chronic Effects: A review of the literature does not show obvious long term hazard.
Carcinogenicity: No component known to be present in this product at >0.1% is presently listed as a carcinogen by IARC, NTP or OSHA, unless otherwise noted in Section P - Other Information.

L. Ecological Information

Ecotoxicological Information: No specific ecological data available for this product.

M. Disposal Considerations

US EPA Hazardous Waste Numbers:
This product as purchased does not fall under current U.S. EPA RCRA definitions of hazardous waste. Under RCRA it is the generator's responsibility to determine the status of the waste at the time of its disposal.

General Disposal Considerations:
Dispose of in accordance with local, state and federal regulations. Disposal of this material to the land may be banned by federal law (40 CFR 268).

CERCLA Reportable Quantity: This product does not contain any CERCLA egulated materials.

N. Transport Information

Hazardous Materials Description/Proper Shipping Name:
Not Regulated.
Hazard Class: Same As Above
Identification Number (UN or NA Number): Same As Above
Packing Group: Same As Above
Freight Class:
NMFC 155250, PETROLEUM OILS, GREASES & RELATED PRODUCTS, NOI CLASS 65.

Telephone Number for Transport Instructions: 1-800-621-2661, SHEA Department

O. Regulatory Information

.S. Federal Regulations:
Hazardous per OSHA 29 CFR 1910.1200: Yes
CERCLA/EPCRA:
Section 302 Extremely Hazardous Substances (EHS):
No listed ingredients are present on the 302 list.

Section 311/312 Hazard Class(es): Immediate: YES Delayed: NO
Fire: NO Reactivity: NO Sudden Release of Pressure: NO

Section 313 Toxic Chemicals:
f none listed here or in Section B, there are no 313 chemicals present above hreshold value.

MOR 001344

O. Regulatory Information (Cont.)

Other U.S. Federal Regulations: This product is a mixture and is NOT listed in the TSCA inventory. The individual ingredients in the product ARE listed in the TSCA inventory.

International Regulations: CANADA: All components of this material are listed on the Canadian Domestic Substance List (DSL).

This product is non-controlled under W.H.M.I.S.

P. Other Information

No component known to be present in this product at >0.1% is presently listed as a carcinogen by IARC, NTP or OSHA.

Q. Disclaimer

Information presented herein has been compiled from information provided to us by our suppliers and other sources considered to be dependable, and is accurate and reliable to the best of our knowledge and belief, but is not guaranteed to be so. Nothing herein is to be construed as recommending any practice or the use of any product in violation of any patent, or in violation of any law or or regulation. It is the user's responsibility to determine the suitability of any material for a specific purpose, and to adopt such safety precautions as may be necessary. We make no warranty as to the results to be obtained in using any material and, since conditions of use are not under our control, must necessarily disclaim all liability with respect to the use of any material supplied by us.

See Special Precautions

Special Firefighting Procedures
See Special Precautions

MOR 001346

Unusual Fire and Explosion Hazards
This product does not burn, however, grinding or polishing this product in the absence of oxygen, such as under water, can result in a finely divided waste which is ignitable.

Section 5 Reactivity Data

Stability	*Incompatability (Materials to Avoid)*
Stable	Nitric Acid

Conditions to Avoid
Corrosion caused by red fuming nitric acid will explode on exposure to friction or heat. See Special Precautions.

Hazardous Decomposition Products
Metallic dust or fumes may be produced during welding, burning, grinding and possibly machining. Refer to ANSI Z49.1

Product
Titanium

Section 6 - Health Hazard Data

NOTE: STEEL PRODUCTS IN THE NATURAL STATE DO NOT PRESENT AN INHALATION, INGESTION OR CONTACT HAZARD. HOWEVER, OPERATIONS SUCH AS BURNING, WELDING, SAWING, BRAZING AND GRINDING MAY RELEASE FUMES AND/OR DUSTS WHICH MAY PRESENT HEALTH HAZARDS IF TLV'S ARE EXCEEDED

MAJOR EXPOSURE HAZARD

☒ Inhalation ☐ Skin Contact ☐ Skin Absorption ☐ Eye Contact ☐ Ingestion

Effects of Overexposure

The toxicity of titanium dioxide has been found to be relatively inert. Skin contact with titanium dust may cause physical abrasion. Eye contact with pure material has shown particulate irritation.

Aluminum and molybdenum dust/fines and fumes are low health risk by inhalation and should be treated as a nuisance dust.

Inhalation of high concentrations of freshly formed oxide fumes of iron, manganese and copper may cause metal fume fever, characterized by a metallic taste in the mouth, dryness and irritation of the throat and influenzalike symptoms.

Chromium and nickel and their compounds are listed in the 3rd Annual Report on Carcinogens, as prepared by the National Toxicology Program (NTP). Exposure to high concentrations of dust and fumes can cause sensitization dermatitus, inflammation and/or ulceration of upper respiratory tract and possible cancer of nasal passages and lungs.

Recent epidemiological studies of workers melting and working alloys containing nickel/chromium have found no increased risk of cancer.

Suspected Cancer Agent? _____ NO: This product's ingredients are not found in the lists below.
_X_ YES: ____ Federal OSHA _X_ NTP ____ IARC

Emergency and First Aid Procedures

If exposed to excessive levels of metal fumes, remove to fresh air, seek medical aid immediately.

Eyes - Flush with water for at least 15 minutes.

Section 7 - Spill or Leak Procedures

Spill or Leak Procedures

NA

Waste Disposal Methods

According to local, state and federal regulations

Section 8 - Special Protection

Respiratory

NIOSH/MSHA - Approved dust and fume, respirator should be used to avoid excessive inhalation of particulates when exposure exceeds TLV's.

Ventilation

Local exhaust ventilation should be utilized when welding, burning, sawing, brazing, grinding or machining when exposure exceeds TLV's.

Eye Protection and Protective Clothing

Safety glasses or goggles should be utilized as required by exposure. Other protective equipment should be utilized as required by the welding standards.

Section 9 - Special Precautions

MOR 001347

If ignitable waste is generated, special precautions and firefighting procedures should be followed:

1) Keep work areas free of the waste.
2) Store wet and keep away from heat and open flame - maintain humidity above 50% to prevent an electrostatic build-up.
3) No smoking in area.
4) Use non-sparking metal equipment.
5) Extinguishing media: dry chemical powders, salts or inert gas. Do not use water or liquid: explosion hazard could result.

The information in this MSDS was obtained from sources which we believe are reliable. However, the information is provided without any representation or warranty, express or implied, regarding the accuracy or correctness.

The conditions or methods of handling storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product.

Data sheets of individual manufacturers may be obtained by contacting A. M. Castle & Co., 3400 N. Wolf Road, Franklin Park, IL 60131 Attn: Corp. Safety Mgr.

APPEARANCE AND ODOR: CLEAR, MOBILE LIQUID WITH ALCOHOLIC ODOR.
SOLUBILITY IN WATER: SOLUBLE

SECTION III FIRE AND EXPLOSION HAZARD DATA

FLASH POINT (METHOD USED): 55 °F (ACC) FLAMMABLE LIMITS: LEL: 3 UEL: 24

EXTINGUISHING MEDIA: CARBON DIOXIDE, ALCOHOL RESISTANT FOAM, DRY CHEMICAL

SPECIAL FIRE FIGHTING PROCEDURES: EVACUATE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR PROTECTIVE CLOTHING, INCLUDING NIOSH APPROVED SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS: NONE KNOWN

SECTION IV REACTIVITY DATA

STABILITY: UNSTABLE? NO STABLE? YES

CONDITIONS TO AVOID: AVOID HEAT, SPARKS, OPEN FLAMES.

INCOMPATIBILITY (MATERIALS TO AVOID): STRONG OXIDIZERS

HAZARDOUS DECOMPOSITION OR BYPRODUCTS: CARBON MONOXIDE, CARBON DIOXIDE

HAZARDOUS POLYMERIZATION: MAY OCCUR? NO WILL NOT OCCUR? YES

CONDITIONS TO AVOID: NONE KNOWN

N/A - NOT APPLICABLE

SECTION V (HEALTH HAZARD DATA) REV. 2 No. 1133

ROUTE(S) OF ENTRY: INHALATION? YES SKIN? NO INGESTION? YES OTHER: NONE

HEALTH HAZARDS (ACUTE AND CHRONIC)
ACUTE: LIQUID OR VAPOR CONTACT MAY CAUSE IRRITATION OF THE EYES, SKIN, NOSE, THROAT, AND RESPIRATORY SYSTEM AND MAY RESULT IN CENTRAL NERVOUS SYSTEM (CNS) DEPRESSION. THIS MATERIAL IS TOXIC AND MAY BE HARMFUL IF SWALLOWED. CHRONIC: PROLONGED CONTACT WITH THE SKIN MAY CAUSE REDNESS, DRYING AND CRACKING TO THE SKIN. PROLONGED OVEREXPOSURE TO SOLVENTS MAY CAUSE PERMANENT BRAIN AND NERVOUS DAMAGE.

CARCINOGENICITY: NTP? NO IARC MONOGRAPHS? NO.. OSHA REGULATED? NO OTHER: NONE
NO INGREDIENTS LISTED AS CARCINOGENS.

SIGNS AND SYMPTOMS OF EXPOSURE:
IRRITATION, HEADACHE, DIZZINESS, NAUSEA, INCOORDINATION, DROWSINESS AND LOSS OF CONSCIOUSNESS.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE:
NONE PRESENTLY KNOWN.

EMERGENCY AND FIRST AID PROCEDURES:
EYES: FLUSH WITH COPIOUS QUANTITIES OF WATER. GET MEDICAL ATTENTION.
SKIN: WASH WITH SOAP AND WATER. INHALATION: REMOVE FROM EXPOSURE.
GET MEDICAL ATTENTION IF EXPERIENCING EFFECT OF OVEREXPOSURE. INGESTION:
GET IMMEDIATE MEDICAL ATTENTION. INDUCE VOMITING BY TOUCHING FINGER TO BACK OF THROAT. KEEP VICTIM'S HEAD BELOW HIPS WHILE VOMITING.

SECTION VI (PRECAUTIONS FOR SAFE HANDLING AND USE)

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
ELIMINATE ALL IGNITION SOURCES. HANDLING EQUIPMENT MUST BE GROUNDED TO PREVENT SPARKING. EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. ABSORB SPILLED MATERIAL WITH ABSORBENT MATERIAL AND PLACE IN NON-LEAKING CONTAINER.

WASTE DISPOSAL METHOD:
DISPOSE OF IN ACCORDANCE WITH LOCAL, STATE, FEDERAL REGULATIONS. RECOMMENDED METHOD IS INCINERATION.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING:
KEEP AWAY FROM HEAT, SPARKS, AND OPEN FLAMES. KEEP CONTAINERS TIGHTLY CLOSED. GROUND ALL HANDLING EQUIPMENT. STORE IN A COOL, DRY PLACE.

OTHER PRECAUTIONS: MINIMIZE SKIN CONTACT.

SECTION VII (CONTROL MEASURES)

RESPIRATORY PROTECTION (SPECIFY TYPE):
IF EXPOSURE EXCEEDS LIMITS, USE A NIOSH-APPROVED RESPIRATOR.

MOR 001349

VENTILATION: LOCAL EXHAUST: PREFERABLE SPECIAL: NONE NEEDED
MECHANICAL (GENERAL): ADEQUATE OTHER: NONE NEEDED
PROTECTIVE GLOVES: NEOPRENE, VITON, BUTYL, NITRILE EYE PROTECTION: CHEMICAL GOGGLES

OTHER PROTECTIVE CLOTHING OR EQUIPMENT:
WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. SAFETY SHOWER AND EYE WASH STATION.

D.O.T HAZARD CLASS	Flammable liquid.

SECTION II - HAZARDOUS INGREDIENTS

INGREDIENTS	*CAS NUMBER*	*WEIGHT PERCENT*	*OSHA PEL*	*ACGIH TLV*
Isopropyl Alcohol	67-63-0	100	400 ppm Stel 500 ppm	400 ppm Stel 500 ppm

This product is hazardous as defined in 29 CFR1910.1200. OSHA HAZARD-Eye irritant.

SECTION III - PHYSICAL DATA

(PUBLISHED or ESTIMATED VALUES)

BOILING POINT Deg. F. (760 mm Hg)	180	*SPECIFIC GRAVITY (H_2O = 1)* (@ 77 deg F)	0.783
VAPOR PRESSURE (mm Hg AT 20 Deg. C.)	33	*% VOLATILE by WEIGHT*	100
VAPOR DENSITY (AIR = 1)	2.0	*EVAPORATION RATE*(BUAC = 1)	2.3
SOLUBILITY IN WATER	Complete	*pH*	NA
APPEARANCE AND ODOR	Clear, colorless liquid, non-residual odor.		

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

ESTIMATED FLAMMABLE LIMITS (% By Volume in Air) *LEL:*2.0 *UEL:*12.0

FLASH POINT Deg. F. T.C.C. 54

EXTINGUISHING MEDIA	Carbon dioxide or dry chemical.
SPECIAL FIRE FIGHTING PROCEDURES	Use NIOSH approved self-contained breathing apparatus in enclosed area.
UNUSUAL FIRE AND EXPLOSION HAZARD	Vapors are heavier than air and may travel along ground. Never use welding torch on or near metal containers (even empty).

SECTION V(a) - HEALTH HAZARD DATA
(Symptoms/Effects of Overexposure)

INHALATION: Can cause nasal irritation, dizziness, nausea, headache.

INGESTION: Can cause gastrointestinal irritation, nausea, vomiting and diarrhea.

SKIN: Prolonged or repeated contact can cause defatting and dermatitis.

EYES: Can cause severe irritation, tearing, blurred vision. Will injure eye tissue if not removed promptly.

LISTED CARCINOGENS: None.

SECTION V(b) - HEALTH HAZARD DATA
(Emergency & First Aid Procedures)

INHALATION If affected, remove individual to fresh air. If breathing is difficult, administer oxygen. Get medical attention.

INGESTION Call physician or Poison Control Center immediately. DO NOT induce vomiting. Never give anything by mouth to an unconscious person.

SKIN CONTACT Wash exposed area with soap and water. Remove contaminated clothing.

EYE CONTACT Flush eyes with large amount of water lifting upper and lower lids occasionally. Get prompt medical attention.

SECTION VI - REACTIVITY DATA

STABILITY
STABLE: X *UNSTABLE:*

CONDITIONS TO AVOID Heat, sparks and open flames.

INCOMPATIBILITY (Materials to Avoid) Strong oxidizing agents.

HAZARDOUS DECOMPOSITION PRODUCTS Carbon dioxide and carbon monoxide.

HAZARDOUS POLYMERIZATION
WILL OCCUR: *WILL NOT OCCUR:*X

CONDITIONS TO AVOID NA

SECTION VII - SPILL or LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

SMALL SPILL: Absorb liquid on paper, vermiculite, floor absorbent, or other absorbent material and transfer to hood. Ventilate area.

LARGE SPILL: See section X.

WASTE DISPOSAL Destroy by approved incineration or deposit in approved landfill.

Must be in accordance with Federal, State, and Local Laws and Regulation

SECTION VIII - SPECIAL PROTECTION

RESPIRATORY If threshold limit value is exceeded, use NIOSH approved respirator for organic vapors.

EYEWEAR Chemical splash goggles in compliance with OSHA regulations are advised. Provide eye bath near work site. Always protect eyes.

CLOTHING/GLOVES Wear resistant gloves such as rubber, neoprene or plastic.

VENTILATION Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below TLVs.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Observe precautions for a flammable liquid. Keep container closed when not in use. Store away from ignition sources in cool dry area. Use adequate ventilation. Read all container labeling. Use eye protection.

OTHER PRECAUTIONS:

CONTAINERS: Since empty containers may retain product residues (vapor, liquid, or solid) all labeled hazard precautions must be observed. FOR INDUSTRIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.

SECTION X - ADDITIONAL INFORMATION

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: (continued)

LARGE SPILL:

Ventilate area. Eliminate all ignition sources (flares, flames including pilot lights, electrical sparks). Persons not wearing protective equipment should be excluded from area of spill. Dike area of spill to prevent spreading. Pump liquid to salvage tank. Remaining liquid may be taken up clay or other absorbent material and shoveled into containers.

---------- REGULATORY INFORMATION ----------

Toxic Substance Control Act (TSCA) Status:
All ingredients of this product are listed on the TSCA inventory.

SARA TITLE III (Section 313):
Components present in this product at a level which could require reporting under the statute are:
None

CALIFORNIA SCAQMD RULE 443.1 VOCS:
Contains 782 grams/liter of Isopropyl Alcohol.

CERCLA:
If this product is accidentally spilled, it is not subject to any special reporting under the requirements of the Comprehensive *Environmental Response, Compensation and Liability Act* (CERCLA). We recommend you contact local authorities to determine if there may be other local reporting requirements.

SARA TITLE III (Sections 311/312):
This product is classified into the following hazard categories;
Immediate health. Delayed health. Fire.

EMERGENCY TELEPHONE NUMBER

CHEMTREC 1-800-424-9300 DAY or NIGHT

The information contained herein is based on data considered accurate and is offered at no charge. *No warranty is expressed or implied regarding the accuracy of this data.* Liability is expressly disclaimed for loss or injury arising out of use of this information of the use of any materials designated.

EXTINGUISHING MEDIA

Carbon Dioxide, Dry Chemical, Foam

UNUSUAL FIRE AND EXPLOSION HAZARDS

Keep containers tightly closed. Isolate from heat, electrical equipment, sparks, and open flame. Closed containers may explode when exposed to extreme heat. Application to hot surfaces requires special precautions. During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention.

SPECIAL FIRE FIGHTING PROCEDURES

Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

Section V — HEALTH HAZARD DATA

ROUTES OF EXPOSURE

Exposure may be by INHALATION and/or SKIN or EYE contact, depending on conditions of use. To minimize exposure, follow recommendations for proper use, ventilation, and personal protective equipment.

ACUTE Health Hazards

EFFECTS OF OVEREXPOSURE

Irritation of eyes, skin and respiratory system. May cause nervous system depression. Extreme overexposure may result in unconsciousness and possibly death.

SIGNS AND SYMPTOMS OF OVEREXPOSURE

Headache, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mists.

Redness and itching or burning sensation may indicate eye or excessive skin exposure.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Enamel Hardeners may cause allergic respiratory and/or skin reaction in susceptible persons or sensitization. This effect may be delayed several hours after exposure.

EMERGENCY AND FIRST AID PROCEDURES

If INHALED: If any breathing problems occur during use, LEAVE THE AREA and get fresh air. If problems remain or occur later, IMMEDIATELY get medical attention.

If on SKIN: Wash affected area thoroughly with soap and water. Remove contaminated clothing and launder before re-use.

If in EYES: Flush eyes with large amounts of water for 15 minutes. Get medical attention.

If SWALLOWED: Get medical attention.

CHRONIC Health Hazards

No ingredient in these products is an IARC, NTP, or OSHA listed carcinogen.

Prolonged overexposure to solvent ingredients in Section II may cause adverse effects to the liver, urinary, blood forming, *cardio-vascular, and reproductive systems.*

Persons sensitive to isocyanates will experience increased allergic reaction on repeated exposure to isocyanates in Enamel Hardeners.

Methyl Ethyl Ketone may increase the nervous system effects of other solvents.

Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

Section VI — REACTIVITY DATA

STABILITY - Stable

CONDITIONS TO AVOID

None known.

INCOMPATIBILITY

Contamination of Hardeners with Water, Alcohols, Amines, and other compounds which react with isocyanates, may result in dangerous pressure in, and possible bursting of, closed containers.

HAZARDOUS DECOMPOSITION PRODUCTS

By fire: Carbon Dioxide, Carbon Monoxide

HAZARDOUS POLYMERIZATION - Will Not Occur

Section VII — SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Remove all sources of ignition. Ventilate and remove with inert absorbent.

If Enamel Hardeners are spilled, all personnel in the area should be protected as in Section VIII. Cover spill with absorbent material. Deactivate spilled material with a 10% ammonium hydroxide solution (household ammonia). *After 10 minutes, collect in open containers and add* more ammoni- Cover loosely. Wash spill area with soap and water.

WASTE DISPOSAL METHOD

Waste from these products may be hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Waste must be tested for ignitability to determine the applicable EPA hazardous waste numbers. Waste from products containing Methyl Ethyl Ketone may also require extractability testing.

Incinerate in approved facility. Do not incinerate closed container. Dispose of in accordance with Federal, State, and Local regulations regarding pollution.

Section VIII — PROTECTION INFORMATION

PRECAUTIONS TO BE TAKEN IN USE

NO PERSON SHOULD USE THE ENAMEL HARDENERS, OR BE IN THE AREA WHERE THE HARDENERS ARE BEING USED, IF THEY HAVE CHRONIC (LONG-TERM) LUNG OR BREATHING PROBLEMS OR IF THEY EVER HAD A REACTION TO ISOCYANATES.

Use all products only with adequate ventilation. Avoid breathing vapor and spray mist. Avoid contact with skin and eyes. Wash hands after using.

These coatings may contain materials classified as nuisance particulates (listed "as Dust" in Section II) which may be present at hazardous levels only during sanding or abrading of the dried film. If no specific dusts are listed in Section II, the applicable limits for nuisance dusts are ACGIH TLV 10 mg./m3 (total dust), OSHA PEL 15 mg./m3 (total dust), 5 mg./m3 (respirable fraction).

VENTILATION

Local exhaust preferable. General exhaust acceptable if the exposure to materials in Section II is maintained below applicable exposure limits. Refer to OSHA Standards 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION

ENAMEL HARDENERS -- Where overspray is present, a positive pressure air supplied respirator (T1C19C NIOSH/MSHA approved) should be worn. If unavailable, a properly fillted organic vapor/particulate respirator approved by NIOSH/MSHA for protection against materials in Section II may be effective. Follow respirator manufacturer's directions for use. Wear the respirator for the *whole time of spraying and until all vapors and mists are gone.* NO PERSONS SHOULD BE ALLOWED IN THE AREA WHERE THIS PRODUCT IS BEING USED UNLESS EQUIPPED WITH THE SAME RESPIRATOR PROTECTION RECOMMENDED FOR THE PAINTERS.

ALL OTHER PRODUCTS -- If personal exposure cannot be controlled below applicable limits by ventilation wear a properly fitted organic vapor/particulate respirator approved by NIOSH/MSHA for protection against materials in Section II.

When sanding or abrading the dried film, wear a particulate respirator approved by NIOSH/MSHA for protection against non-volatile materials in Section II.

PROTECTIVE GLOVES

Wear gloves which are recommended by glove supplier for protection against materials in Section II.

EYE PROTECTION

Wear safety spectacles with unperforated sideshields.

OTHER PROTECTIVE EQUIPMENT

Use barrier cream on exposed skin when using ENAMEL HARDENERS.

Section IX — PRECAUTIONS

DOL STORAGE CATEGORY - See TABLE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Contents are FLAMMABLE. Keep away from heat, sparks, and open flame. Vapors may accumulate readily and may ignite spontaneously. During use and until all vapors are gone: Keep area ventilated - Do not smoke - Extinguish all flames, pilot lights, and heaters - Turn off stoves, electric tools and appliances, and any other sources of ignition.

Consult NFPA Code. Use approved Bonding and Grounding procedures.

Keep container closed when not in use. Transfer only to approved containers with complete and appropriate labeling. Do not take internally. Keep out of the reach of children.

OTHER PRECAUTIONS

These products may be mixed with other components before use. Before opening the packages, READ AND FOLLOW WARNING LABELS ON ALL COMPONENTS.

Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

Section X — OTHER REGULATORY INFORMATION

CALIFORNIA PROPOSITION 65

WARNING: These products contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

MOR 001358

The above information pertains to these products as currently formulated, and is based on the information available at this time. *Addition of reducers or other additives to these* products may substantially alter the composition and hazards of the products. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.

MATERIAL SAFETY DATA SHEET

SECTION 1 - PRODUCT IDENTIFICATION AND USE

PRODUCT IDENTIFIER: Tribol 930 High Temperature Chain Oil

PRODUCT ID NO.: See SECTION 9

CHEMICAL NAME: Synthetic esters plus performance additives.
SYNONYMS: Not Applicable. Product is a mixture.
CHEMICAL FORMULA: Not Applicable. No single formula.
CHEMICAL FAMILY: Synthetic esters plus performance additives.
PRODUCT USE: Lubricant.
PRODUCT CAS NO.: Not Applicable. No single CAS number.

NFPA CLASSIFICATION: HEALTH: 1 FIRE: 1 REACTIVITY: 0
SPECIAL HAZARDS: None

MANUFACTURER:
Tribol
4801 W. 147th St.
Hawthorne, CA 90250-6795
U.S.A.

SECTION 2 - HAZARDOUS INGREDIENTS

	%	CAS NO	LD_{50}	LC_{50}	Exposure Limits (TWA*)
Synthetic Trimellitic anhydride ester	92-96	70225-05-7	Not found	Not found	None established (OSHA or ACGIH)
Para-dioctyl diphenylamine	1-3	68411-46-1	8g/kg Acute dermal (Rats)	Not found	None established (OSHA or ACGIH)

*TWA = 8-hour time-weighted average. Tribol's recommendation for the mixture: 5mg/m^3.

Note: Exposure limits may vary between jurisdictions. Employers are advised to contact regulatory agencies for the limits in effect in their areas.

SECTION 3 - PHYSICAL DATA

PHYSICAL STATE:	Liquid.
APPEARANCE AND ODOR:	Clear yellowish liquid. Faint characteristic odor.
ODOR THRESHOLD (ppm):	Not determined.
VAPOR PRESSURE (mm Hg):	Not determined.
VAPOR DENSITY (Air=1):	Not determined.
EVAPORATION RATE (Water = 1):	Not determined.
POUR POINT (C°/F°:	Not determined.
BOILING POINT (°C/°F):	Not determined.
MELTING POINT (°C/°F):	Not determined.
pH:	Not applicable.
SPECIFIC GRAVITY:	0.99 (typical)
PERCENT VOLATILE (By weight):	Not determined.
SOLUBILITY IN WATER:	Negligible (less than 0.1%).

MOR 001362

Title: Z:\2\4020\m0360103.gp4

ate: 02-09-99 09:47:12 AM

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY:	This product is not classified as flammable or combustible; however, it will burn if its temperature reaches or exceeds its flash point.
EXTINGUISHING MEDIA:	Dry Chemical, water-fog, chemical foam, or CO_2. Direct water-stream may cause frothing.
SPECIAL FIREFIGHTING PROCEDURE:	Use water to cool fire-exposed containers. Wear full emergency equipment with supplied-air respirator (SA), or self-contained breathing apparatus (SCBA).
UNUSUAL FIRE & EXPLOSION HAZARDS:	None known.
FLASH POINT (°C/°F) AND METHOD:	285/545, ASTM D 92 (C.O.C.)
FIRE POINT (°C°/F) AND METHOD:	Not determined.
FLAMMABLE LIMITS (% by volume):	Upper: Not determined. Lower: Not determined.
AUTOIGNITION TEMPERATURE (°C/°F):	Not determined.
HAZARDOUS COMBUSTION PRODUCTS:	Smoke and toxic gases including oxides of carbon and nitrogen.
EXPLOSION SENSITIVITY:	
Impact:	___ Sensitive _X_ Not Sensitive
Static Discharge:	___ Sensitive _X_ Not Sensitive
EMPTY/PARTIAL CONTAINER WARNING:	As with most synthetic lubricants, empty or partial containers may contain explosive vapors. Do not expose to direct flame or high temperature.

SECTION 5 - REACTIVITY DATA

CHEMICAL STABILITY:	_X_ Stable ___ Unstable
Conditions to Avoid:	Prolonged exposure to elevated temperature.
INCOMPATIBILITY:	_X_ Yes ___ No
Materials to Avoid:	Strong oxidizers, acids, and alkalies.
HAZARDOUS POLYMERIZATION:	___ Will Occur _X_ Will Not Occur
Conditions to Avoid:	None.
HAZARDOUS DECOMPOSITION PRODUCTS:	Smoke and toxic gases including oxides of carbon and nitrogen.

Title: Z:\2\4020\m0360104.gp4

ate: 02-09-99 09:47:04 AM

SECTION 6 - TOXICOLOGICAL PROPERTIES & HEALTH HAZARD DATA

ROUTES OF ENTRY: X Skin Contact ___ Skin Absorption
X Eye Contact X Inhalation
X Ingestion

SYMPTOMS AND EFFECTS OF ACUTE EXPOSURE:

Skin: May cause skin irritation.

Eyes: Product, vapors, and mist may cause eye irritation and burning.

Inhalation: Vapors may irritate the mucosal membranes of mouth, nose, and throat. Intense and/or prolonged exposure to vapor concentrations exceeding the TLV/PEL may cause headache, nausea, and vomiting. Oil vapors may accumulate in the lungs, and may cause chemical pneumonitis.

Ingestion: Ingestion via minor contamination of fingers or food is not likely to cause significant discomfort or adverse effect. However, aspiration (with vomitus) into the lungs may cause mild to severe pulmonary injury, and may be fatal.

SYMPTOMS AND EFFECTS OF CHRONIC EXPOSURE:

Skin: Prolonged or repeated contact tends to remove natural skin oil, and may cause irritation, rash, and possibly dermatitis.

Eyes: Product, vapors, and mist may cause eye irritation and burning.

Inhalation: Chronic inhalation may produce the same symptoms and effects discussed under Inhalation - ACUTE EXPOSURE, above.

Ingestion: In the normal course of industrial use, ingestion of large quantities of this product is unlikely. Nevertheless, ingestion may irritate the gastrointestinal tract and may cause nausea and vomiting. Aspiration (with vomitus) into the lungs may cause pulmonary injury and may be fatal.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Existing chronic dermal, respiratory, and possibly gastrointestinal diseases.

EXPOSURE LIMITS: Not determined for this product. See Section 2 - HAZARDOUS INGREDIENTS, in this MSDS, for ingredient(s) limits.

IRRITANCY: Possible irritancy of skin, eyes, mucosal membranes, and respiratory tract.

SENSITIZATION: None known.

CARCINOGENICITY: NTP Listed: ___ Yes X No
IARC Listed: ___ Yes X No
OSHA Listed: ___ Yes X No

TERATOGENICITY AND EMBRYOTOXICITY: This product is not known to contain, at 0.1% or higher, any ingredients known to cause teratogenic or embryonic toxicity.

MOR 001364

itle: Z:\2\4020\m0360105.gp4

)ate: 02-09-99 09:46:57 AM

REPRODUCTIVE TOXICITY:	This product is not known to contain, at 0.1% or higher, any ingredients known to cause reproductive toxicity.
MUTAGENICITY:	This product is not known to contain, at 0.1% or higher, any ingredients known to cause mutation in the living cell.
SYNERGISTIC PRODUCTS:	None known.

SECTION 7 - PREVENTIVE MEASURES AND PERSONAL PROTECTION

It is unlikely that serious overexposure to this product will occur during normal industrial use. Nevertheless, the user must exercise adequate precautions to protect against accidental spills, and to avoid undue exposure to sprays, mists, or vapors that may be inadvertently generated, especially at elevated temperatures. The following protective measures are recommended whenever undue exposure is unavoidable.

GLOVES:	Oil-impervious and solvent-resistant (e.g. neoprene) type.
RESPIRATOR:	OSHA/NIOSH-approved supplied-air respirator (SA), or self-contained breathing apparatus (SCBA).
EYE PROTECTION:	Chemical goggles or, preferably, full face-shield. Do not wear contact lenses in the work area.
FOOTWEAR:	Oil-impervious (e.g. neoprene) cover and anti-slip sole construction.
CLOTHING:	Oil-impervious (e.g., neoprene) apron or, preferably, coveralls.
OTHER PROTECTION:	As deemed necessary.

PERSONAL HYGIENE: Wash hands before eating or smoking. Do not smoke in the work area. Promptly remove contaminated clothing. Immediately clean up any spills, to prevent accidental slipping.

ENGINEERING CONTROLS: General ventilation, normally adequate, should be augmented with local exhaust whenever the TLV/PEL is exceeded, or worker discomfort is reported or observed.

LEAK AND SPILL PROCEDURE: Wear adequate protection and eliminate all sources of ignition. Stop the leak, if it can be safely done. Ventilate the area and dike the spill to prevent entry into sewer or watercourses. Suction or scoop the spill into appropriate disposal or recycling vessels, then cover the spill area with oil-absorbent. Label all waste containers appropriately, including all applicable hazard symbols. If spill enters U.S. navigable waters, the contiguous zone, or adjoining shorelines, notify the Coast Guard National Response Center (Tel. No. 800-424-8802).

WASTE DISPOSAL: Dispose of waste in accordance with applicable Federal, State (or Province), and local laws and regulations. (The services of licensed hazardous waste-disposal facilities may be utilized.) It is the user's responsibility to comply with the U.S. Clean Air Act, Clean Water Act, and Resource Conservation and Recovery Act. Refer to Section 10 - REGULATORY INFORMATION, in this MSDS.

HANDLING PROCEDURES & EQUIPMENT: Exercise prudent precautions to avoid accidental spillage, food contamination, vapor or mist inhalation, eye or skin contact, and ignition of this product.

STORAGE REQUIREMENTS: Store in a clean, dry area below 49°C/120°F, away from all ignition sources and incompatible materials listed in SECTION 5 - REACTIVITY DATA, in this MSDS.

SPECIAL SHIPPING INFORMATION: See Sections 9 & 10, in this MSDS.

Title: Z:\2\4020\m0360106.gp4

ıate: 02-09-99 09:46:50 AM

SECTION 8 - FIRST AID AND EMERGENCY MEASURES

SKIN: Wipe off, then wash thoroughly with soap and water.

EYES: Flush immediately with water for at least 15 minutes, occasionally lifting the eyelid. Get prompt medical attention.

INHALATION: Immediately remove the individual to fresh air. If breathing is difficult, administer oxygen. If breathing stops, administer artificial respiration. Keep the individual warm and quiet, and get prompt medical attention.

INGESTION: If the individual is conscious, give 1-2 glasses of milk or water to dilute stomach content. Do not physically induce vomiting. Never give anything by mouth to an unconscious person. As with all accidental chemical ingestions, use all available precautions to prevent aspiration of vomitus into the lungs, which may be fatal. Position the patient's head so as to facilitate expulsion of vomitus. Get prompt medical attention.

NOTE TO PHYSICIAN: Intubate the stomach. Aspirate the pharynx as regularly as possible to remove gagged or vomited stomach content.

SECTION 9 - TRANSPORTATION INFORMATION

PRODUCT IDENTIFICATION:	Not applicable.
DOT PROPER SHIPPING NAME:	Not applicable.
DOT HAZARD CLASS:	Not applicable.
DOT LABEL REQUIRED:	None.
IMO CLASS:	Not applicable.
CANADIAN (WHMIS) CLASSIFICATION:	Class: D Division: 2 Subdivision: B
CANADIAN (TDG ACT) CLASSIFICATION:	Primary: Not applicable Subsidiary: Not applicable
PACKAGING (PACKING) GROUP:	Not applicable.
FREIGHT CLASSIFICATION:	Lubricating Oil other than Petroleum.

Title: Z:\2\4020\m0360107.gp4

Date: 02-09-99 09:46:42 AM

SECTION 10 - REGULATORY INFORMATION

TOXIC SUBSTANCE CONTROL ACT (TSCA): To our best knowledge, all the ingredients in this product have been included, by their manufacturers/suppliers, on the TSCA inventory.

SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT (SARA)

SECTION 302 - EXTREMELY HAZARDOUS SUBSTANCES: This product contains the following ingredient(s) on this list: None.

SECTION 313 - TOXIC CHEMICALS: This product contains the following ingredient(s) at or above the de minimis concentrations: None.

COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION, AND LIABILITY ACT (CERCLA): Reporting of releases of this product is ___ required _X_ not required.

RESOURCE, CONSERVATION, AND RECOVERY ACT (RCRA): This product contains the following ingredient(s) on the Hazardous Wastes List: None.

CALIFORNIA HAZARDOUS SUBSTANCES LIST: This product contains the following ingredients at or above the de minimis concentrations: Oil at 98% (max.).

CALIFORNIA PROPOSITION 65: This product contains the following ingredient(s) listed in the Safe Drinking Water and Toxic Enforcement Act of 1986: None.

MICHIGAN CRITICAL MATERIALS: This product contains the following ingredient(s) at or above the de minimis concentrations: None.

CANADA'S WORKPLACE HAZARDOUS MATERIALS INFORMATION SYSTEM (WHMIS): This product contains the following substance(s) at or above the de minimis concentrations: None.

SECTION 11 - PREPARATION OF THE MSDS

HIGH TEMPERATURE CHAIN OIL

Product Data Sheet

Tribol 930 is a high temperature synthetic oven chain lubricant and is particularly suitable for use in tunnel ovens used in the lithograph and metal decorating industries. The engineered volatility of this blend of synthetic base fluids allows for extended application cycles and the control of product consumption and cleanliness. Tribol 930 has been approved by USDA as an H2 lubricant suitable for use in federally inspected meat and poultry packaging plants.

This highly stable synthetic blend is additionally compounded to protect against a corrosive atmosphere and resist oxidation at high temperatures. Its natural lubricating ability is fortified with antiwear agents for thin film protection during boundary lubrication.

DESCRIPTION

Tribol 930 is manufactured from a blend of complex ester fluids selected for their favorable volatility characteristics, as well as their physical and chemical stability at high temperatures.

The viscosity of Tribol 930 can support fluid film lubrication on chain pins even with temperatures in excess of 350°F/177°C. Tribol 930 contains antiwear additives for additional protection in boundary lubrication from surging loads and very high temperatures.

Tribol 930 contains inhibitors against corrosion and oxidation, further extending the life of the chain and the lubricant in service.

APPLICATIONS

Tribol 930 is recommended for use at temperatures above 350°F/177°C.

Tribol 930 is designed for the lubrication of roller chains, slides, cams, and general lubrication where a high temperature synthetic lubricant is needed and the viscosity of Tribol 930 meets the operating viscosity-temperature requirements.

Tribol 930 especially meets the needs of litho/coater oven chains in the metal decorating and coating industry, and various other oven conveyors used in baking, drying, and curing.

Application may be achieved by drip, spray, splash, pump, or automatic dispensing equipment that can handle an oil of SAE 40 viscosity classification.

ADVANTAGES

Application amount and frequency can be minimized due to the lubricant's volatility characteristics.

Soilage due to drip or "blow-off" is minimized by reduced application.

Chain wear is controlled by excellent fluid film and antiwear properties.

Built-in cleansing action virtually eliminates shutdowns for periodic cleaning of equipment and tends to dissolve and facilitate removal of gums, varnish, and carbonaceous residues from previous lubricants.

Fire and explosion possibilities are greatly reduced as Tribol 930 has extremely low carbon forming tendency, and an autoignition temperature far exceeding petroleum products.

Seal leakage is minimized when Tribol 930 is used in conjunction with Buna A, Viton, silicone rubber, and EPDM elastomer sealing materials.

Please see Reverse Side for Notes and Typical Properties.

MOR 001368

Title: Z:\2\4020\m0360109.gp4

Date: 02-09-99 09:47:33 AM

ADVANTAGES (Continued)

Cost reduction is accomplished by extended lubrication cycles, reduced spillage, decreased downtime for repairs and maintenance, and longer parts life.

NOTES

Tribol 930 High Temp Chain Oil is compatible with petroleum base lubricants. However, lubricating devices should be cleaned before beginning service with Tribol 930 so as not to introduce impurities from the former lubricant.

Tribol 930 should not be used around parts containing polycarbonates as it can have a softening effect. Under no circumstances should it be used where neoprene seals are present.

For specific terms, conditions, warranty, and availability, refer to Tribol Price List in effect at time of purchase.

Safety data sheet according to directive 91/155 EEC
Released: 02/1995
Last update: 06/25/99

Name: **Turmofluid 40 B**

Printed: 12.03.01 11:18

1. Commercial product name and company identification:

Trade name:	**Turmofluid 40 B**	
Company:	LUBRICANT CONSULT GMBH Gutenbergstrasse 13 D-63477 Maintal 2 (Germany)	
Additional information:		
Europe	Phone (+49) 06109 76 500	Fax (+49) 06109 76 50 51
North America	Phone 616-247-0129	Fax 616-247-0801

2. Composition / Information on ingredients:
Combination of synthetic hydrocarbons, synthetic esters and additives.
CAS Numbers: 9003-27-4, 90218-76-1

3. Hazards identification:
When properly handle this product is not dangerous to human health. Harmful effects are expected only in case of misuse, especially in case of thermal decomposition.

4. First aid measures:
Skin contact: Wash with water and soap. Remove contaminated clothing.
Eye contact: Flush with plenty of water for at least 15 minutes. See a physician* if the eye irritation remains.
Ingestion: See a physician* if necessary. Do not induce vomiting.
Inhalation: After inhaling of decomposition vapours: Remove the patient to fresh air.
*Show the physician this safety data sheet.

5. Fire fighting measures:
Suitable extinguishing media: dry chemicals, powder, foams, carbon dioxide. In the case of fire, try to take the containers out of the danger zone. Otherwise keep them cool by spraying with water. Use a respirator to protect from vapours.

6. Accidental release measures:
Absorb small amounts with inert material. Collect the released product and the used absorbent materials in suitable containers for disposal (s. sect. 13). Hold back large amounts of the liquid by embankment (mound of soil, sand or other inert material). Use pumps or call the fire department, if necessary. Avoid uncontrolled discharge in sewage systems, surface and underground water. Do not smoke when handling released product. Avoid the contact with fire and sparks. Take measures against electrical charge.

7. Handling and store measures:
Store in cool and dry areas. Ventilation in the store and in working areas is commendable. Do not eat, drink and smoke in working areas.

8. Exposure control / Personal protection:
Hand protection: Not necessary in normal use. When often handling the product wear rubber gloves.
Respiratory protection: Not necessary in normal use. Avoid breathing the aerosol or other vapours.
Eye protection: Not necessary in normal use. Wear safety glasses, if necessary.

9. Physical and chemical properties:

Physical state:	liquid		
Colour:	yellow - brownish		
Odour:	typical		
Pour point:	—		
Boiling point:	> +200°C (+392°F)		
Density:	0.915 g/cm³	@ +20°C (+68°F)	DIN 51757
Viscosity:	270 mm²/s	@ +40°C (+104°F)	DIN 51562
Solubility in water:	insoluble		
pH-value:	—		
Flash point:	> +260°C (+500°F)		
Ignition temperature:	+290°C (+554°F)		
Explosion limits:	not determined		

10. Stability and reactivity:
Thermal decomposition: > +250°C (+482°F)
Hazardous decomposition products: No decomposition under normal storage and handling conditions. In the case of misuse at temperatures above the decomposition temperature harmful vapours may arise from the product. Materials to avoid contact: strong oxidising agents (compressed or liquid oxygen), strong acids and alkalis.

11. Toxicological Information:
Experimental toxicological data: oral: LD_{50} > 2000 mg/kg (rat)
epidermal: weak eye irritation
Turmofluid 40 B when properly handled is not dangerous for human health and has no known effects of chronic or carcinogenesis (based on data of components).

12. Ecotoxicological Information:
Use the product according to the good working practices avoiding polluting the environment. Avoid the contamination of soil and water. WGK 1 (self classification)

13. Disposal considerations:
Destroy the waste product by incineration according to local laws and regulations. *Turmofluid 40 B* contains no halogens and no toxic metals.
Waste code number for filled containers: 598 01

14. Transport information:
The product is not dangerous for transportation

Road transportation:	(ADR)	not classified
Rail transportation:	(RID)	not classified
Sea transportation:	IMDG / IMO	not classified
Air transportation:	ICAO / IATA	not classified
U.N.-number:		not assigned
Packaging group:		not assigned

15. Regulatory information:
No regulation and classification according to EEC directives necessary, no labelling with hazard symbols required. Aquatic toxicity: 1 (= German water hazard classification)

16. Further Information:
The information given in this safety data sheet is for safety purpose only. It is given in good faith and based on the best knowledge and experience of the company at the date of issuing. The company is not responsible for damages caused by the use of the product in applications for which it was not intended or for conditions of use outside its control. Previous versions of this material safety data sheet are no longer valid.

TURMOFLUID 40 B

High Temperature Chain Oil

TURMOFLUID 40 B is a highly stable and extremely adherent chain oil for high as well low temperatures. Due to its low surface tension ***TURMOFLUID 40 B*** penetrates all parts of the chain providing optimum wear protection and reducing chain stretching. It forms an extremely adherent, transparent and odorless lubricating film even at high speeds and with all types of chains. ***TURMOFLUID 40 B*** is especially designed for the chains of the wood processing industry.
TURMOFLUID 40 B may be applied manually and by drip-feed lubricators as well as by central lubrication systems.

QUALITY FEATURES

- Temperature range up to +250°C(+482°F)
- Silicone free
- Excellent adhesion
- Reduced lubricant consumption
- Optimum wear protection
- Extremely low evaporation
- Low in formation of residues and smoke at high temperatures
- Fully mixable with mineral oil
- Excellent corrosion protection
- Aging resistance
- Resistant to hot water
- Good viscosity/temperature behavior

PACKAGING SIZES

5-gallon-pail
55-gallon-drum (200 liter)

Specifications	**TURMOFLUID 40 B**
Color, appearance	yellow, transparent
Density [g/cm³] DIN 51757 @ +20°C (+68°F)	0.915
Kinematic Viscosity [mm²/s] DIN 51562	
@ +40°C (+104°F)	270
@ +100°C (+212°F)	32
Viscosity index (VIE) ISO 2909	160
Flash point [°C (°F)] DIN 51758	+280 (+536)
Pour point [°C (°F)] DIN 51597	-35 (-31)
Service Temperature range [°C (°F)]	-40 to +250 (-40 to +482)
Evaporation loss [weight-%] DIN 51581 @ +250°C (+482°F)	2
SHELL Four-Ball-Test [N]	2,800/3,200

SECTION 1 -- CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT CODE.: RE180

TRADE NAME...: SCREEN INK THINNER

PRODUCT CLASS: THINNER

INK SERIES...:

- H M I S C O D E S -
HEALTH - 2*
FLAMMABILITY - 2
REACTIVITY - 0
PPE - X

SECTION 2 -- COMPOSITION, INFORMATION ON INGREDIENTS

CHEMICAL NAME: / COMMON NAME: / CAS NUMBER	PERCENT BY WEIGHT	OCCUPATIONAL EXPOSURE LIMITS ACGIH TLV	OCCUPATIONAL EXPOSURE LIMITS OSHA PEL	VAPOR PRESSURE IN mmHg	NOTES
* 2-BUTOXYETHANOL: / ETHYLENE GLYCOL MONOBUTYL ETHER: / CAS #: 111-76-2	> 95	20 ppm Skin	25 ppm Skin	0.6 @ 20C	(1)

* SUBJECT TO REPORTING REQUIREMENT OF SECTION 313 OF TITLE III OF SARA (40 CFR PART 372).

1) This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990 (Glycol Ethers Category).

The recommended permissible exposure limits (PEL) indicated above reflect the levels adopted by OSHA in 1989. Although, some of the 1989 levels have since been vacated, the Nazdar Company recommends that the lower exposure levels be observed as reasonable worker protection.

SECTION 3 -- HAZARDS IDENTIFICATION

GENERAL HEALTH EFFECTS
THE FOLLOWING INFORMATION HAS BEEN DEVELOPED BASED UPON USING THE PRODUCT AS INTENDED BY THE MANUFACTURER. The potential health effects of this product are based on the hazards of its components. The use of this product in combination with other products may produce synergistic (additive) health effects. Cautionary labeling and material safety data sheets of all materials used with this product should be reviewed before use.

EYES
Eye contact with liquid, vapors or mists may cause moderate to severe irritation, including burning, tearing, redness or swelling.

SKIN
Skin contact may cause irritation. Symptoms may include dryness, chapping and redness. Penetrates the skin readily. Toxic and may be harmful if absorbed through the skin.

INHALATION
Repeated and prolonged overexposure by inhalation may cause respiratory tract irritation. Symptoms may include central nervous system disorders such as headaches, dizziness, weakness and fatigue.

INGESTION
Ingestion may cause gastrointestinal tract irritation. Symptoms may include headaches, nausea and vomiting. Contains material that may be moderately toxic if ingested.

CHRONIC EFFECTS/TARGET ORGANS
Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

ANIMAL STUDIES
2-Butoxyethanol has caused reproductive and blood disorders resulting in kidney, liver and lung damage in lab animals. For animal studies, reference TSCA Section 4 Test Rule Results or contact the manufacturer for further details.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE
Pregnant women and persons with pre-existing health disorders should consult their physician before using this product. Repeated and prolonged overexposure and/or individual sensitivity may increase the potential for and degree of adverse health

effects. See Section 3 "Hazards Identification" for effects of certain hazardous ingredients.

ROUTES OF EXPOSURE
Primary exposure routes: Inhalation-Dermal (Contact/Absorption)-Ingestion

SECTION 4 -- FIRST AID MEASURES

EYES
After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. If irritation persists have eyes examined and tested by medical personnel.

SKIN
In case of contact, immediately wash skin with a mild soap and plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Cool water is initially suggested to prevent the pores of the skin from opening. This will minimize both the area and time of skin contact. Lukewarm water may then be used to ensure all contaminants are removed. Skin should be monitored for reddening or chemical burns. Mild soap is suggested to help prevent abrading the skin or rubbing the chemicals into pores during cleansing. Get medical attention if irritation persists or significant contact has occurred. Thoroughly wash (or discard) clothing and shoes before reuse.

INHALATION
Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention if breathing difficulty is experienced.

INGESTION
If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

OTHER COMMENTS
No Data Available

SECTION 5 -- FIRE FIGHTING MEASURES

FLASH POINT
150 Degrees Fahrenheit (TCC)

OSHA FLAMMABILITY CLASSIFICATION (NFPA)
Class IIIA Combustible Liquid

FLAMMABLE LIMITS (LEL-LOWER EXPLOSIVE LIMIT)
1.1% volume in air

EXTINGUISHING MEDIA
Foam-CO2-Dry Chemical-Water Spray

FIRE AND EXPLOSION HAZARDS
Isolate from heat, electrical equipment, sparks, and open flame. Keep containers tightly closed. Vapors may be heavier than air and can travel to a source of ignition then flash back. Closed containers may explode when exposed to extreme heat.

FIRE FIGHTING EQUIPMENT
Full protective equipment including self-contained breathing apparatus (SCBA) is recommended to protect firefighters.

SPECIAL FIRE FIGHTING PROCEDURES
Water may be ineffective but may be used to cool containers. Fumes released on burning may be toxic and dangerous.

SECTION 6 -- ACCIDENTAL RELEASE MEASURES

RELEASE MANAGEMENT MEASURES
Remove all sources of ignition (flames, hot surfaces and electrical, static or frictional sparks). Avoid contact or breathing vapors. Ventilate area. Contain release and remove with inert absorbent. Use non-sparking tools to place material in appropriate container for disposal. The National Response Center (800-424-8802) and local authorities should be contacted for any reportable spill/release.

SECTION 7 -- HANDLING AND STORAGE

HANDLING AND STORAGE METHODS
Use in a well ventilated area. Follow all MSDS/label precautions even after container is emptied; container may retain product residues. Store in closed containers in cool, dry, well ventilated area away from sources of ignition. Keep containers closed when not in use. Smoke in designated areas only. Avoid prolonged or repeated overexposure to this product. Keep out of reach of children. Follow label directions carefully. Do not take internally. Harmful or fatal if swallowed.

SECTION 8 -- EXPOSURE CONTROLS, PERSONAL PROTECTION

RESPIRATORY PROTECTION
If concentrations of hazardous ingredients exceed exposure limits listed in Section 2 an appropriate NIOSH (National Institute for Occupational Safety and Health) approved respirator with an organic vapor cartridge should be used. If material is handled under mist, spray or dust forming conditions, a P100 (99.97% efficiency) filter should be used in addition to the organic vapor cartridge. If no exposure limits are listed in Section 2, follow general safety guidelines in 29 CFR 1910.134 Respiratory Protection or other applicable respiratory standard.

SKIN PROTECTION
Use neoprene, nitrile or other gloves resistant to chemicals listed in Section 2. Contact a reputable safety supply company for appropriate gloves. Solvent resistant aprons are recommended. Prevent prolonged skin contact with contaminated clothing.

EYE PROTECTION
Use ANSI (American National Standards Institute) approved safety glasses, faceshield or splash proof goggles to prevent eye contact. Contact a reputable safety supply company for appropriate eye protection. The availability of an eye wash is highly recommended.

EXPOSURE GUIDELINES
See Section 2 "Composition, Information on Ingredients" for occupational exposure limits.

HYGIENIC PRACTICES
Wash with soap and water before eating, smoking or using toilet facilities. Separately wash or discard clothing and footwear before reuse. NEVER try to remove ink from the skin by using solvent or thinner. Such action is likely to increase the possibility of undesirable effects. Remove contaminated clothing to prevent prolonged skin contact.

ENGINEERING CONTROLS
Use applicable engineering controls, work practices and personal protective equipment to ensure all concentrations are kept below the exposure limits listed in Section 2. Adequate controls should be implemented to ensure employee safety from fine mists which may be produced under some printing conditions.

OTHER PROTECTION
No Data Available

SECTION 9 -- PHYSICAL AND CHEMICAL PROPERTIES

**

APPEARANCE:
Thin liquid

ODOR:
Characteristic

PHYSICAL STATE:
Liquid

pH
Not applicable

VAPOR PRESSURE
See Section 2 for individual ingredients.

VAPOR DENSITY
Heavier than air

BOILING POINT
Greater than 300 degrees Fahrenheit

FREEZING POINT
Not available

SOLUBILITY IN WATER
Not tested

EVAPORATION RATE
Slower than ether

PERCENT VOLATILE BY VOLUME: 100.00 %

WEIGHT PER GALLON: 7.52 lbs/gal

VOC: 902.54 g/L
7.52 lb/gal

PHOTOCHEMICALLY REACTIVE

No

Percent volatile = Percent VOC

SECTION 10 -- STABILITY AND REACTIVITY

CHEMICAL STABILITY
Stable

CONDITIONS TO AVOID
Avoid excessive heat, ignition sources, sparks and open flame.

INCOMPATIBILITY WITH OTHER MATERIALS
Strong acids/bases, oxidizing/reducing agents and reactive chemicals.

HAZARDOUS DECOMPOSITION PRODUCTS
May produce hazardous fumes when heated to decomposition e.g. carbon monoxide, carbon dioxide and other noxious gases.

HAZARDOUS POLYMERIZATION
Not anticipated during normal printing and storage conditions.

SECTION 11 -- TOXICOLOGICAL INFORMATION

EXPERIMENTAL TOXICITY DATA
Refer to Section 3 Hazards Identification for additional toxicological data. Experimental toxicity data on 2-butoxyethanol has given the following results: Oral LD50 Rabbit; 320 mg/kg: Intraperitoneal LD50 Rat; 550 mg/kg.

SECTION 12 -- ECOLOGICAL INFORMATION

ECOTOXICITY
Because this product may be a mixture of chemicals, some of which may be ecologically toxic, it is strongly suggested that it not be disposed of into the environment, i.e. soil, water courses, lakes, landfills, sewers, etc.

ENVIRONMENTAL FATE
No Data Available

SECTION 13 -- DISPOSAL CONSIDERATIONS

DISPOSAL METHODS
Dispose of in accordance with applicable local, county, state, provincial and federal regulations. Emptied containers may retain hazardous properties. Empty containers should be disposed of in an environmentally safe manner in accordance with applicable regulations.

SECTION 14 -- TRANSPORT INFORMATION

TRANSPORT INFORMATION
Not regulated. The product(s) described by this Material Safety Data Sheet do not meet the definition of nor are they classified as a hazardous material/dangerous good as defined by the United States Department of Transportation (DOT), the International Civil Aviation Organization (ICAO), the International Maritime Organization (IMO) or the Canadian Transportation of Dangerous Goods Act (TDG).

SECTION 15 -- REGULATORY INFORMATION

SARA TITLE III 313 INFORMATION
See Section 2 "Composition, Information on Ingredients" for applicable chemicals.

TOXIC SUBSTANCES CONTROL ACT STATUS
All ingredients in Section 2 are listed on the U.S. Environmental Protection Agency's Toxic Substances Control Act (TSCA) Inventory and the Canadian Domestic Substance List.

OTHER REGULATORY INFORMATION
OCCUPATIONAL SAFETY and HEALTH ADMINISTRATION (OSHA) - MSDS is compliant with Occupational Safety and Health Administration *Hazard Communication Standard - 29 CFR 1910.1200.* AMERICAN NATIONAL STANDARDS INSTITUTE - This MSDS follows the ANSI Z400.1-1993 format. WORKPLACE HAZARDOUS MATERIAL INFORMATION SYSTEM (WHMIS) - This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

WHMIS CLASSIFICATION (CANADA):
No Data Available

SECTION 16 -- OTHER INFORMATION

DISCLOSURE

The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind express or implied is made with respect to the information contained herein. The data in this MSDS relates only to the specific material designated herein and does not apply to use in combination with any other material or process.

DEFINITIONS

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association

CEILING: (TLV-Ceiling and PEL Ceiling Limit) The ceiling exposure limit or concentration not to be exceeded for even brief times.

DOT: Department of Transportation

HMIS: The Hazardous Materials Identification System (HMIS) developed by the National Paint and Coatings Association (NPCA) to provide information on the acute health hazards, reactivity and flammability of products encountered in the workplace at room temperatures.

HMIS codes assigned for this product are only suggested ratings based on anticipated normal screen printing applications. The employer has the ultimate responsibility for assigning these ratings and should fully evaluate the MSDS, work practices and environmental conditions prior to assigning the appropriate ratings.

HMIS Personal Protection Index of "X-Ask your supervisor" is given on this MSDS due to varying work conditions which may dictate different levels of protection. Please review this MSDS before determining appropriate protective equipment and beginning work.

IARC: International Agency for Research on Cancer

NFPA: National Fire Protection Association

NTP: National Toxicology Program

STEL: Short-Term Exposure Limit: ACGIH terminology for the short-term exposure limit or maximum concentration for a continuous exposure period of 15 minutes.

TLV: Threshold Limit Value. A term ACGIH uses to express the airborne concentration of a material to which most workers can be exposed during a normal daily and weekly work schedule without adverse effects.

TWA: Time-Weighted Average

VOC: Volatile Organic Compound

CAT. NO. 14381

CONDITIONS TO AVOID: Extreme temperatures, evaporation; Contact with acids, halogenated organic compounds, metals, nitro compounds

V. HEALTH HAZARD DATA

THIS PRODUCT MAY BE: corrosive to eyes, skin and respiratory tract.
ACUTE TOXICITY: Not determined
ROUTES OF EXPOSURE: Ingestion
TARGET ORGANS: Not determined
CHRONIC TOXICITY: Not determined
ROUTES OF EXPOSURE: Not determined
TARGET ORGANS: Not determined
CANCER INFORMATION: Not applicable
ROUTES OF EXPOSURE: Not applicable
TARGET ORGANS: Not applicable
OVEREXPOSURE: Causes burns to all body tissues contacted.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Pre-existing eye, skin, or respiratory conditions

VI. PRECAUTIONARY MEASURES

Avoid contact with eyes, skin and clothing
Do not breathe mist or vapor.
Wash thoroughly after handling.
PROTECTIVE EQUIPMENT: adequate ventilation, lab grade goggles, disposable latex gloves, lab coat

VII. FIRST AID

EYE AND SKIN CONTACT: Immediately flush eyes and skin with water for 15 minutes. Remove contaminated clothing. Call physician.
INGESTION: Do NOT induce vomiting. Give 1 - 2 glasses of water. Call a physician immediately. Never give anything by mouth to an unconscious person.
INHALATION: Remove to fresh air. Give artificial respiration if necessary. Call physician.

VIII. SPILL AND DISPOSAL PROCEDURES

IN CASE OF SPILL OR RELEASE: Cover spill with citric acid or another solid acidic material. Scoop slurry to beaker. Add water and neutralize liquid to a pH between 6 and 9. Flush neutralized waste to the drain with excess water.
DISPOSE OF IN ACCORDANCE WITH ALL FEDERAL, STATE, AND LOCAL REGULATIONS.

Product Class:	*Petroleum Solvent*	*Manufacturer's Code:*	822
Trade Name:	~~XYLENE (XYLOL)~~	NPCA HMIS:	Health: 2 Flammability: 3 Reactivity: 0
		NPCA: 704	Health: 2 Flammability: 3 Reactivity: 0

Product Appearance and Odor: Clear, water-white liquid; aromatic hydrocarbon odor.

SECTION 2 -- HAZARDOUS INGREDIENTS

OCCUPATIONAL EXPOSURE LIMITS

INGREDIENT	CAS #	PERCENT	ACGIH TLV (TWA)	ACGIH TLV (STEL)	OSHA PEL (TWA)	OSHA PEL (STEL)	VAPOR PRESSURE
Xylenes	1330-20-7		100 PPM	150 PPM	100 PPM	150 PPM	7 MM Hg @ 20°C
Ethyl Benzene	100-41-4		100 PPM	125 PPM	100 PPM	125 PPM	10 MM Hg @ 68°F

SECTION 3 -- EMERGENCY AND FIRST AID PROCEDURES

Eye Contact: Move victim away from exposure and into fresh air. Flush eyes with plenty of water for at least 15 minutes while holding eyelids open. Get medical attention.

Skin Contact: Remove contaminated clothing/shoes. Flush skin with water. Follow by washing with soap and water. If irritation *occurs, get medical attention. Do not reuse clothing until cleaned.*

Inhalation: If respiratory symptoms or other symptoms of exposure develop, move victim away from source of exposure and into fresh air. If symptoms persist, seek immediate medical attention. *If victim is not breathing, immediately begin artificial* respiration. If breathing difficulties develop, oxygen should be administered by qualified personnel. Seek immediate medical attention.

Ingestion: Do not induce vomiting. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into the lungs. Get immediate medical attention.

Note to Physicians: Exposure to high concentrations of this material (for example, use in enclosed spaces or in cases of deliberate abuse) may be associated with cardiac arrhythmias. Epinephrine and other sympathomimetic drugs may initiate cardiac arrhythmias in persons exposed to this material. Other drugs with less arrhythmogenic potential should be considered. If sympathomimetic drugs are administered, observe for the development of cardiac arrhythmias.

SECTION 4 -- PHYSICAL DATA

The following data represent approximate or typical values. They do not constitute product specifications.

Boiling Range:	276-289° (F)	Vapor Density:	Heavier than air
Evaporation Rate:	Slower than ether	% Volatile By Volume:	100%
Weight Per Gallon:	7.25 Lbs.		
Solubility in Water:	Negligible; less than 0.08%		

SECTION 5 -- FIRE AND EXPLOSION DATA

Flammability Classification:	Flammable Liquid - Class IB
Flash Point:	79° (F) (Tag. Closed Cup).
Autoignition Temperature:	930°F (Approximate)
Lower Explosive Limit:	1.0% @ 68°F
Extinguishing Media:	Carbon Dioxide, foam, dry chemical, water spray. Do not use direct water stream; it will spread fire.
Unusual Fire and Explosion Hazards:	Flammable. Vapors may cause a flash fire or ignite explosively. Vapors may travel considerable distance to a source of ignition and flash back. Prevent buildup of vapors or gases to explosive concentrations.
Special Fire Fighting Procedures:	Use air-supplied rescue equipment for enclosed areas. Cool exposed containers with water.

SECTION 6 -- HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE:	100 PPM (ACGIH - Time weighted average)
EFFECTS OF OVEREXPOSURE	
Eye Contact:	Liquid is minimally irritating to the eyes. High vapor concentrations may also be irritating.
Skin Contact:	Liquid is mildly irritating to the skin. Prolonged or repeated liquid contact can result in defatting and drying of the skin which may result in skin irritation and dermatitis.
Inhalation:	Vapors are irritating to the nose, throat and respiratory tract. High vapor concentrations may cause central nervous system depression.
Ingestion:	Liquid is moderately toxic and may be harmful if swallowed; may produce central nervous system depression. Ingestion of product may result in vomiting; aspiration (breathing) of vomitus into the lungs must be avoided as even small quantities may result in aspiration pneumonitis.
Carcinogenicity:	Xylene is not known to be mutagenic, carcinogenic or a skin sensitizer. However, the available experimental data are limited and insufficient to assess carcinogenic potential. Xylene is not listed as a carcinogen by NTP, IARC or OSHA.
Target Organs:	A six week inhalation study with Xylene produced hearing loss in rats. Laboratory animals exposed by various routes to high doses of Xylene have exhibited effects in liver, kidneys, lungs, spleen, heart, blood and adrenals.
Developmental:	Xylene produced limited evidence of developmental toxicity in laboratory animals. Inhalation and oral administration of Xylene resulted in decreased fetal weight, increased incidences of delayed ossification, skeletal variations and resorptions.

Medical Conditions Aggravated by Exposure: Pre-existing eye, skin and respiratory disorders may be aggravated by exposure to this product. Exposure to high concentrations of this material may cause irregular heartbeats (arrhythmias). Persons with pre-existing heart disorders may be more susceptible to this effect.

Chronic Effects: This product contains Ethyl Benzene. A draft report on a study conducted by the National Toxicology program states that lifetime inhalation exposure of rats and mice to concentrations of Ethyl Benzene (750 ppm) resulted in increases in certain types of cancer, including kidney tumors in rats and lung and liver tumors in mice. These effects were not observed in animals exposed to lower concentration of Ethyl Benzene (75 ppm or 250 ppm). The draft report does not address the relevance of these results to humans.

SECTION 7 -- REACTIVITY DATA

Stability:	Stable
Conditions to Avoid:	Heat, sparks and flame.
Incompatibility (Materials to Avoid):	Strong oxidizing agents like liquid chlorine or concentrated oxygen, concentrated nitric and sulfuric acids, halogen and molten sulphur.
Hazardous Decomposition Products:	Thermal decomposition may yield carbon dioxide and carbon monoxide.
Hazardous Polymerization:	Will not occur.

822

MATERIAL SAFETY DATA SHEET

Complies with OSHA Hazard Communication Standard 29 CFR 1910.1200

Date of Prep: 1/20/98

SECTION 1

Rec 8/17/98

SUNNYSIDE CORPORATION
225 CARPENTER AVENUE
WHEELING, ILLINOIS 60090
EMERGENCY TELEPHONE

FOR INFORMATION: (847) 541-5700

(847) 541-5700 - SUNNYSIDE CORPORATION
(800) 424-9300 - CHEM TREC

Product Class:	Petroleum Solvent	Manufacturer's Code:	822
Trade Name:	XYLENE (XYLOL)	NPCA HMIS:	Health: 2 Flammability: 3 Reactivity: 0
		NPCA: 704	Health: 2 Flammability: 3 Reactivity: 0

Product Appearance and Odor: Clear, water-white liquid; aromatic hydrocarbon odor.

SECTION 2 -- HAZARDOUS INGREDIENTS

OCCUPATIONAL EXPOSURE LIMITS

INGREDIENT	CAS #	PERCENT	ACGIH TLV (TWA)	ACGIH TLV (STEL)	OSHA PEL (TWA)	OSHA PEL (STEL)	VAPOR PRESSURE
Xylenes	1330-20-7		100 PPM	150 PPM	100 PPM	150 PPM	7 MM Hg @ 20°C
Ethyl Benzene	100-41-4		100 PPM	125 PPM	100 PPM	125 PPM	10 MM Hg @ 68°F

SECTION 3 -- EMERGENCY AND FIRST AID PROCEDURES

Eye Contact: Move victim away from exposure and into fresh air. Flush eyes with plenty of water for at least 15 minutes while holding eyelids open. Get medical attention.

Skin Contact: Remove contaminated clothing/shoes. Flush skin with water. Follow by washing with soap and water. If irritation occurs, get medical attention. Do not reuse clothing until cleaned.

Inhalation: If respiratory symptoms or other symptoms of exposure develop, move victim away from source of exposure and into fresh air. If symptoms persist, seek immediate medical attention. If victim is not breathing, immediately begin artificial respiration. If breathing difficulties develop, oxygen should be administered by qualified personnel. Seek immediate medical attention.

Ingestion: Do not induce vomiting. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into the lungs. Get immediate medical attention.

Note to Physicians: Exposure to high concentrations of this material (for example, use in enclosed spaces or in cases of deliberate abuse) may be associated with cardiac arrhythmias. Epinephrine and other sympathomimetic drugs may initiate cardiac arrhythmias in persons exposed to this material. Other drugs with less arrhythmogenic potential should be considered. If sympathomimetic drugs are administered, observe for the development of cardiac arrhythmias.

SECTION 4 -- PHYSICAL DATA

The following data represent approximate or typical values. They do not constitute product specifications.

Boiling Range:	276-289° (F)	Vapor Density:	Heavier than air
Evaporation Rate:	Slower than ether	% Volatile By Volume:	100%
Weight Per Gallon:	7.25 Lbs.		
Solubility in Water:	Negligible; less than 0.08%		

SECTION 11 -- ADDITIONAL INFORMATION

This product contains the following toxic chemical(s) which are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

TOXIC CHEMICAL	CAS #	APPROXIMATE % BY WEIGHT
Xylenes (Mixed Isomers)	1330-20-7	75 - 90%
Ethyl Benzene	100-41-4	10 - 25%

SARA Title III Hazard Categories: Immediate (Acute) Health, Delayed (Chronic) Health, Fire.

Common Names: Xylol, Dimethyl Benzene

California Proposition 65: This product contains trace amounts of Toluene, a chemical known to the State of California to cause birth defects or other reproductive harm, and trace amounts of Benzene, a chemical known to the State of California to cause cancer.

TRANSPORTATION (U.S. D.O.T. land transportation in packages of 119 gallons or less)

U.S. D.O.T. Proper Shipping Name: Flammable Liquid, N.O.S. (Contains Xylene, Ethyl Benzene)

U.S. D.O.T. Hazard Class & Packing Group: 3, III

U.S. D.O.T. I.D. Number: UN 1993

U.S. D.O.T. Hazardous Substance: Xylenes (mixed) RQ 100 lbs.
Ethyl Benzene RQ 1000 lbs.

Refer to 49 CFR for additional information. Exceptions or exemptions may exist for smaller quantities.

SECTION II - HAZARDOUS INGREDIENTS

DESIGNATIONS	(PPM)	EFFECTS (SEE NOTICE)	% IN PROD.

OSHA'S HAZARD COMMUNICATION STANDARD (29 CFR 1910 1200) DOES NOT REQUIRE THE LISTING OF ANY INGREDIENTS FOR THIS PRODUCT.

SECTION III - HEALTH HAZARD DATA

SPECIAL NOTE: MSDS data pertains to the product as dispensed from the container. Adverse health effects would not be expected under recommended conditions of use (diluted) so long as prescribed safety precautions are practiced.
ACUTE EFFECTS OF OVEREXPOSURE:
Product is considered non-toxic orally according to 16 CFR 1500.3 (Code of Federal Regulations 16, Federal Hazardous Substances Act Regulations, Part 1500 3). However, no product should be intentionally ingested Ingestion of an excessive amount of the product may cause complications.
There are no known effects from acute overexposure to this product. However, in light of good industrial hygiene, exposure to any chemical should be kept to a minimum.
CHRONIC EFFECTS OF OVEREXPOSURE:
There are no known effects from chronic exposure to this product.
None of the ingredients are listed as carcinogens by IARC, NTP, or OSHA.
EST D PEL/TLV: Not established PRIMARY ROUTES OF ENTRY: N/A

HMIS CODES: HEALTH 0; FLAM. 0; REACT. 0; PERS. PROTECT. A , CHRONIC HAZ. NO

FIRST AID PROCEDURES:
SKIN: Flush contaminated skin with plenty of water. Consult a physician if irritation develops.
EYES: Flush eyes thoroughly with plenty of water. If irritation persists, consult a physician.
INHALE: Move exposed person to fresh air. If irritation persists, get medical attention promptly.
INGEST: If this product is swallowed, do not induce vomiting. If victim is conscious give plenty of water to drink. Get medical attention at once.

SECTION IV - SPECIAL PROTECTION INFORMATION

PROTECTIVE CLOTHING: Wearing neoprene or nitrile gloves is recommended when prolonged excessive contact occurs (eg immersing hands)
EYE PROTECTION: Use of tight-fitting safety glasses or goggles is strongly recommended, especially when wearing contact lenses.
RESPIRATORY PROTECTION: No special measures are required.
VENTILATION: No special measures are required.

SECTION V - PHYSICAL DATA

BOILING POINT (F):	212	SPECIFIC GRAVITY:	1.00
VAPOR PRESSURE(mmHg):	N/D	EVAPORATION RATE (WATER=1)	1.0
VAPOR DENSITY(AIR=1):	N/D	pH(CONCENTRATE):	9.0-9.5
SOLUBILITY IN WATER:	COMPLETE	pH(USE DILUTION OF N/D):	N/D

VOC CONTENT (CONCENTRATE):
APPEARANCE AND ODOR: A CLEAR, GREEN LIQUID WITH A SASSAFRAS FRAGRANCE

SECTION VI - FIRE AND EXPLOSION DATA

FLASH POINT(C) (METHOD USED): N/A ( )
FLAMMABLE LIMITS: LEL: N/A UEL: N/A
EXTINGUISHING MEDIA: Noncombustible.
SPECIAL FIRE FIGHTING: Wear self-contained positive pres. breathing apparatus.
UNUSUAL FIRE HAZARDS: None

SECTION VII - REACTIVITY DATA

STABILITY: Stable
INCOMPATIBLILITY(AVOID): Strong oxidizing agents.
POLYMERIZATION: Will not occur.
HAZARDOUS DECOMPOSITION: Carbon dioxide, carbon monoxide, and other unidentified organic compounds.

SECTION VIII - SPILL AND DISPOSAL PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Observe safety procedures in section 4 & 9 during clean-up. Absorb spill on inert absorbent material (eg Zep-O-Zorb). Pick up and place residue in a suitable waste container or, if permitted, flush to sewer. Thoroughly rinse spill area with water.
WASTE DISPOSAL METHOD:
Liquid wastes are not permitted in landfills. This product is not considered a hazardous waste under RCRA. Unusable liquid may be absorbed on an inert absorbent material (eg. Zep-O-Zorb), drummed, and taken to a chemical or industrial landfill. In some areas disposal by flushing into a sanitary sewer with plenty of water may be permissible. Consult local, state, and federal agencies for proper disposal method in your area.
RCRA HAZ. WASTE NOS.: N/A

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN WHEN HANDLING AND STORING:
Store tightly closed container in a dry area at temps. between 40-120 degrees F.
Keep product out of eyes.
Avoid prolonged contact with skin
Clothing or shoes which become contaminated with substance should be removed promptly and not reworn until thoroughly cleaned.
Keep out of the reach of children.

MOR 001387

SECTION X - REGULATORY INFORMATION

DOT PROPER SHIPPING NAME: INDUSTRIAL CLEANERS N.O.I.,LIQUID KEEP FROM FREEZING
NOTE: DOT information applies to larger package sizes of affected products. For some products, DOT may require alternate names and labeling in accordance with packaging group requirements.

DOT HAZARD CLASS: DOT PACKING GROUP:
DOT I.D. NUMBER: DOT LABEL/PLACARD:
EPA TSCA CHEMICAL INVENTORY - ALL INGREDIENTS ARE LISTED
EPA CWA 40CFR PART 117 SUBSTANCE(RQ IN A SINGLE CONTAINER): SODIUM DODECYL BENZENE SULFONATE - 1000#

NOTICE

Thank you for your interest in, and use of, Zep products. Zep Manufacturing Co. is pleased to be of service to you by supplying this Material Safety Data Sheet for your files. Zep Manufacturing is concerned for your health and safety. Zep products can be used safely with proper protective equipment and proper handling practices consistent with label instructions and the MSDS. Before using any Zep product, be sure to read *the complete label and the Material Safety Data Sheet*.

As a further word of caution, Zep wishes to advise that serious accidents have resulted from the misuse of "emptied" containers. *"Empty" containers retain residue (liquid and/or* vapor) and can be dangerous. DO NOT pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, or other sources of ignition; they may explode or *develop harmful vapors and possibly cause injury or death.* Clean empty containers by triple rinsing with water or an appropriate solvent. Empty containers must be sent to a drum reconditioner before reuse.

TERMS AND ABBREVIATIONS LISTED ALPHABETICALLY BY SECTION

SECTION II: HAZARDOUS INGREDIENTS

CAR: Carcinogen - A chemical listed by the National Toxicology Program (NTP), the International Agency for Research on Cancer (IARC) or OSHA as a definite or possible human cancer causing agent.
CAS #: Chemical Abstract Services Registry Number - A universally accepted numbering system for chemical substances.
CBL: Combustible - At temperatures between 100F and 200F *chemical gives off enough vapor to ignite if a source of* ignition is present as tested with a closed cup tester
CNS: Central Nervous System depressant which reduces the activity of the brain and spinal cord.
COR: Corrosive - Causes irreversible injury to living tissue (e.g. burns).
DESIGNATIONS: Chemical and common names of hazardous ingredients.
EIR: Eye Irritant Only - Causes reversible reddening and/or *inflammation of eye tissues.*
EXPOSURE LIMITS: The time weighted average (TWA) airborne concentration at which most workers can be exposed without any expected adverse effects. Primary sources include ACGIH TLVs, *and OSHA PELs (TWA, STEL and ceiling limits).*
ACGIH: American Conference of Governmental Industrial Hygienists.
CEILING: The concentration that should not be exceeded in *the workplace during any part of the working exposure.*
OSHA: Occupational Safety and Health Administration
PEL: Permissible Exposure Limit - A set of time weighted average exposure values, established by OSHA, for a normal 8-hour day and a 40-hour work week
PPM: Parts per million - unit of measure for exposure limits.
(S) SKIN: Skin contact with substance can contribute to overall exposure
STEL: Short Term Exposure Limit - Maximum concentration for a continuous 15-minute exposure period.
TLV: Threshold Limit Value - A set of time weighted average exposure limits, established by the ACGIH, for a normal 8-hour day and a 40-hour work week
FPL: Flammable - Ma[illegible] [illegible] 100F, chemical gives off enough vapor to ignite if a source of ignition is present as tested with a closed cup tester
HAZARDOUS INGREDIENTS: Chemical substances determined to be potential health or physical hazards based on the criteria established in the OSHA Hazard Communication Standard - *29 CFR* 1910.1200
HTX: Highly toxic - the probable lethal dose for a 70kg (150 lb.) man and may be approximated as less than 6 teaspoons (2 tablespoons)
IRR: Irritant - Causes reversible effects in living tissues (e.g. inflammation) - primarily skin and eyes.
N/A: Not Applicable - Category is not appropriate for this *product.*
N.D: Not Determined - Insufficient information to make a determination for this item.
RTECS#: Registry of Toxic Effects of Chemical Substances - an *unreviewed listing of published toxicology data on chemical* substances.
SARA: Superfund Amendment and Reauthorization Act - Section 313 designates chemicals for possible reporting for the Toxics Release Inventory.
SEN: Sensitizer - Causes allergic reaction after repeated exposure.
TOX: Toxic - The probable lethal dose for a 70 kg (150 lb.) man is one ounce (2 tablespoons) or more.

(rev. 1/98)

SECTION III: HEALTH HAZARD DATA

ACUTE EFFECT: An adverse effect on the human body from a single exposure with symptoms developing almost immediately after exposure or within a relatively short time.
CHRONIC EFFECT: Adverse effects that are most likely to occur from repeated exposure over a long period of time.
EST. D PEL/TLV: This estimated, time-weighted average, exposure limit, developed by using a formula provided by the ACGIH, pertains to airborne concentrations from the product as a whole. This value should serve as guide for providing safe workplace conditions to nearly all workers.
HMIS CODES: Hazardous Material Identification System - a rating system developed by the National Paint and Coating Association for estimating the hazard potential of a chemical under normal workplace conditions. These risk estimates are indicated by a numerical rating given in each of three hazard areas (Health/Flammability/Reactivity) ranging from a low of zero to a high of 4. The presence of a chronic hazard is indicated with a yes. Consult HMIS training guides for Personal Protection letter codes which indicate necessary protective equipment.
PRIMARY ROUTE OF ENTRY: The way one or more hazardous *ingredients may enter the body and cause a generalized-systemic* or specific-organ toxic effect
ING: Ingestion - A primary route of exposure through swallowing of material
INH: Inhalation - A primary route of exposure through breathing of vapors.
SKIN: A primary route of exposure through contact with the skin.

SECTION IV: SPECIAL PROTECTION INFORMATION

Where respiratory protection is recommended, use only MSHA and NIOSH approved respirators and dust masks.
MSHA: Mine Safety and Health Administration
NIOSH: National Institute for Occupational Safety and Health

SECTION V: PHYSICAL DATA

EVAPORATION RATE: Refers to the rate of change from the liquid state to the vapor state at ambient temperature and *pressure in comparison to a given substance (e.g. water)*
pH: A value representing the acidity or alkalinity of an aqueous solution (Acidic pH = 1; Neutral pH = 7; Alkaline pH = 14)
VOC CONTENT: The percentage or amount in pounds per *gallon of the product that is regulated as a Volatile Organic* Compound under the Clean Air Act of 1990 and various state jurisdictions.
SOLUBILITY IN WATER: A description of the ability of the *product to dissolve in water.*

SECTION VII: REACTIVITY DATA

HAZARDOUS DECOMPOSITION: Breakdown products expected to be *produced upon product decomposition by extreme heat or fire.*
INCOMPATIBILITY: Material contact by extreme heat and the conditions to avoid to prevent hazardous reactions.
POLYMERIZATION: Indicates the tendency of the product's molecules to combine with themselves in a chemical reaction, releasing excess pressure and heat.
STABILITY: Indicates the susceptibility of the product to spontaneously and dangerously decompose.

SECTION VIII: SPILL AND DISPOSAL PROCEDURES

RCRA WASTE NOS: RCRA (Resource Conservation and Recovery Act) waste codes (40 CFR 261) applicable to the disposal of spilled or unusable product from the original container.

SECTION X: TRANSPORTATION DATA

CWA: Clean Water Act- Federal Law which regulates chemical releases to bodies of water.
RQ: Reportable Quantity - The amount of the specific ingredient that, when spilled to the ground and can enter a storm sewer or natural watershed, must be reported to the National Response Center, and other regulatory agencies.
TSCA: Toxic Substances Control Act - a federal law requiring all commercial chemical substances to appear on an inventory maintained by the EPA.

DISCLAIMER

All statements, technical information and recommendations contained herein are based on available scientific tests or data which we believe to be reliable. The accuracy and completeness of such data are not warranted or guaranteed. We cannot anticipate all conditions under which this information and our products, or the products of other manufacturers in combination with out products, may be used. Zep assumes no *liability or responsibility for loss or damage resulting from* the improper use or handling of our products, from incompatible product combinations, or from the failure to follow instructions, warnings, and advisories in the products label and Material Safety Data Sheet.

SECTION III - HEALTH HAZARD DATA

Special Note: MSDS data pertains to the product as dispensed from the container. Adverse health effects would not be expected under recommended conditions of use (diluted) so long as prescribed safety precautions are practiced.

Acute Effects of Overexposure:
This product can be an eye irritant. Inflammation of eye tissue is characterized by redness, watering, and/or itching. One of the ingredients in this product has caused sensitization reactions in a small percentage of the general population.

Chronic Effects of Overexposure:
Contact, especially if prolonged of repeated, may cause redness, itching, or blistering of the skin. None of the hazardous ingredients are listed as carcinogens by IARC, NTP, & OSHA

:t'd PEL/TLV: Not established — **Primary Routes of Entry:** N/A

1IS Codes: HEALTH 1;FLAM. 2;REACT. 0;PERS. PROTECT. B ;CHRONIC HAZ. NO

.IST AID PROCEDURES:
Skin: Wash contaminated skin thoroughly with soap or a mild detergent. Apply a skin cream with lanolin. Get medical attention if irritation persists.
Eyes: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting upper and lower lids. Get medical attention at once.
Inhale: Move exposed person to fresh air. If irritation persists, get medical attention promptly.
Ingest: If this product is swallowed, do not induce vomiting. If victim is conscious give plenty of water to drink. Get medical attention at once.

SECTION IV - SPECIAL PROTECTION INFORMATION

Protective Clothing: Wear nitrile gloves or use gloves with demonstrated resistance to the ingredients in this product.
Eye Protection: Wear tight-fitting splash-proof safety glasses especially if contact lenses are worn.
Respiratory Protection: No special measures are required.
Ventilation: No special measures are required.

SECTION V - PHYSICAL DATA

Boiling Point (°F):	338-375	**Specific Gravity:**	0.853	**Vapor Pressure (mmHg):**	N/A

NOTICE

Thank you for your interest in, and use of, Zep products. Zep Manufacturing Co. is pleased to be of service to you by supplying this Material Safety Data Sheet for your files. Zep Manufacturing is concerned for your health and safety. Zep products can be used safely with proper protective equipment and proper handling practices consistent with label instructions and the MSDS. Before using any Zep product, be sure to read the complete label and the Material Safety Data Sheet.

As a further word of caution, Zep wishes to advise that serious accidents have resulted from the misuse of "emptied" containers. "Empty" containers retain residue (liquid and/or vapor) and can be dangerous. DO NOT pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, or other sources of ignition; they *may explode or develop harmful vapors and possibly cause* injury or death. Clean empty containers by triple rinsing with water or an appropriate solvent. Empty containers must be sent to a drum reconditioner before reuse.

TERMS AND ABBREVIATIONS USED IN THE MSDS:
BY SECTION ALPHABETICALLY:

TION II: HAZARDOUS INGREDIENTS

CAR; Carcinogen - A chemical listed by the National Toxicology Program (NTP), the International Agency for Research on Cancer (IARC) or OSHA as a definite or possible human cancer causing agent.
CAS #; Chemical Abstract Services Registry Number - A universally accepted numbering system for chemical substances.
CBL; Combustible - At temperatures between 100°F and 200°F chemical gives off enough vapor to ignite if a source of ignition is present as tested with a closed cup tester.
CNS; Central Nervous System depressant reduces the activity of the brain and spinal cord.
COR; Corrosive - Causes irreversible alterations in living tissue (e.g. burns).
DESIGNATIONS; Chemical and common names of hazardous ingredients.
EIR; Eye Irritant Only - Causes reversible reddening and/or inflammation of eye tissues.
EXPOSURE LIMITS; The time weighted average (TWA) airborne concentration at which most workers can be exposed without any expected adverse effects. Primary sources include ACGIH TLV's, and OSHA PEL's (TWA, STEL and ceiling limits).
ACGIH; American Conference of Governmental Industrial Hygienists.
CEILING; The concentration that should not be exceeded in the workplace during any part of the working exposure.
OSHA; Occupational Safety and Health Administration
PEL; Permissible Exposure Limit- A set of time weighted average exposure values, established by OSHA, for a normal 8-hour day and a 40-hour work week.
PPM; Parts per million - unit of measure for exposure limits.
(S) SKIN; Skin contact with substance can contribute to overall exposure.
STEL; Short Term Exposure Limit- Maximum concentration for a continuous 15-minute exposure period.
TLV; Threshold Limit Value - A set of time weighted average exposure limits, established by the ACGIH, for a normal 8-hour day and a 40-hour work week.
FBL; Flammable - At temperatures under 100°F, chemical gives off enough vapor to ignite if a source of ignition is present as tested with a closed cup tester.
HAZARDOUS INGREDIENTS; Chemical substances determined to be potential health or physical hazards by the criteria established in the OSHA Hazard Communication Standard - 29 CFR 1910.1200
HTX; Highly toxic - the probable lethal dose for 70 kg (150 lb.) man and may be approximated as less than 6 teaspoons (2 tablespoons).
IRR; Irritant - Causes reversible effects in living tissues (e.g. inflammation) - primarily skin and eyes.
N/A; Not Applicable - Category is not appropriate for this product.
N/D; Not Determined - Insufficient information for a determination for this item.
RTECS #; Registry of Toxic Effects of Chemical Substances - an unreviewed listing of published toxicology data on chemical substances.
SARA; Superfund Amendments and Reauthorization Act - Section 313 designates chemicals for possible reporting for the Toxics Release Inventory.
SEN; Sensitizer - Causes allergic reaction after repeated exposure.
TOX; Toxic - The probable lethal dose for a 70 kg (150 lb.) man is one ounce (2 tablespoons) or more.

SECTION III: HEALTH HAZARD DATA

ACUTE EFFECT; An adverse effect on the human body from a single exposure with symptoms developing almost immediately after exposure or within a relatively short time.
CHRONIC EFFECT; Adverse effects that are most likely to occur from repeated exposure over a long period of time.
EST'D PEL/TLV; This estimated, time-weighted average, exposure limit, developed by using a formula provided by the ACGIH, pertains to airborne concentrations from the product as a whole. This value should serve as guide for providing safe workplace conditions to nearly all workers.
HMIS CODES; Hazardous Material Identification System - a rating system developed by the National Paint and Coating Association for estimating the hazard potential of a chemical under normal workplace conditions. These risk estimates are indicated by a numerical rating given in each of three hazard areas (Health/Flammability/Reactivity) ranging from a low of zero to a high of 4. A chronic hazard is indicated with a yes. Consult HMIS training guides for Personal Protection letter codes which indicate necessary protective equipment.
PRIMARY ROUTE OF ENTRY; The way one or more hazardous ingredients may enter the body and cause a generalized-systemic or specific-organ toxic effect.
ING; Ingestion - A primary route of exposure through swallowing of material.
INH; Inhalation - A primary route of exposure through breathing of vapors.
SKIN; A primary route of exposure through contact with the skin.

SECTION IV: SPECIAL PROTECTION INFORMATION

Where respiratory protection is recommended, use only MSHA and NIOSH approved respirators and dust masks.
MSHA; Mine Safety and Health Administration
NIOSH; National Institute for Occupational Safety and Health.

SECTION V: PHYSICAL DATA

EVAPORATION RATE; It refers to the rate of change from the liquid state to the vapor state at ambient temperature and pressure in comparison to a given substance (e.g. water).
pH; A value representing the acidity or alkalinity of an aqueous solution (Acidic pH = 1; Neutral pH = 7; Alkaline pH = 14)
PERCENT VOLATILE; The percentage of the product (liquid or solid) that will evaporate at 212°F and ambient pressure.
SOLUBILITY IN WATER; A description of the ability of the product to dissolve in water.

SECTION VII: REACTIVITY DATA

HAZARDOUS DECOMPOSITION; Breakdown products expected to be produced upon product decomposition or fire.
INCOMPATIBILITY; Material contact and conditions to avoid to prevent hazardous reactions.
POLYMERIZATION; Indicates the tendency of the product's molecules to combine in a chemical reaction releasing excess pressure and heat.
STABILITY; Indicates the susceptibility of the product to spontaneously and dangerously decompose.

SECTION VIII: SPILL AND DISPOSAL PROCEDURES

RCRA WASTE NOS; RCRA (Resource Conservation and Recovery Act) waste codes (40 CFR 261) applicable to the disposal of spilled or unusable product from the original container.

SECTION X: TRANSPORTATION DATA

CWA; Clean Water Act
RQ; Reportable Quantity - The amount of the specific ingredient that, when spilled to the ground and can enter a storm sewer or natural watershed, must be reported to the National Response Center, and other regulatory agencies.
TSCA; Toxic Substances Control Act - a federal law requiring all commercial chemical substances to appear on an inventory maintained by the EPA.

DISCLAIMER

All statements, technical information and recommendation contained herein are based on available scientific tests & data which we believe to be reliable. The accuracy and completeness of such data are not warranted or guaranteed. We cannot anticipate all conditions under which this information and our products, or the products of other manufacturers in combination with our products, may be used. Zep assumes no liability or responsibility for loss or damage resulting from the improper use or handling of our products, from incompatible product combinations, or from the failure to follow instructions, warnings, and advisories in the product's label and Material Safety Data Sheet.

EQ Resource Recovery, Inc.

an EQ company

Generator Approval Notification *October 22, 2001*

Customer: ENVIRONMENTAL WASTE SRVCS.
Fax: (630) 365-3112

FRED PFEIFFER
THE MOREY GROUP
100 MOREY DR.
WOODRIDGE, IL 60517

This Generator Approval Notification acknowledges the acceptability of waste material(s) into the EQ environmental protection facility identified below and ensures that this facility has the appropriate permit(s) issued by federal and state regulatory agencies to properly transport, treat, and/or disposal of the waste material(s).

EQ FACILITY: **EQ Resource Recovery, Inc. (MID060975844)**
36345 Van Born Road, Romulus, Michigan 48174

Approval Number: J06300D
Generator EPA ID #: ILG000060910 **Approved Container:** DRUM **Expires On:** 10/9/2002
Waste Common Name: Waste Flux
Comments:
Primary Waste Code: D001

The Approval(s) listed above are based upon characterization information supplied to EQRR by the Customer and the generator (if other than the Customer). The Customer is ultimately responsible for the accuracy and completeness of all such information, whether provided by the Customer or the generator. The Customer must notify the EQRR Approvals Department immediately upon knowledge of any changes to this information. This Approval and all wastes which are transported, delivered, or tendered to EQ under this Approval shall be subject to the attached Standard Terms and Conditions.

The Approval(s) will expire on the date(s) noted. Any new Approvals obtained from EQRR on future business will be valid for a period of one (1) year from the date of issuance. Within 30 days of the Approval Expiration Date, you will be notified of the requirements for recertification.

If you have any questions, please call us toll free at

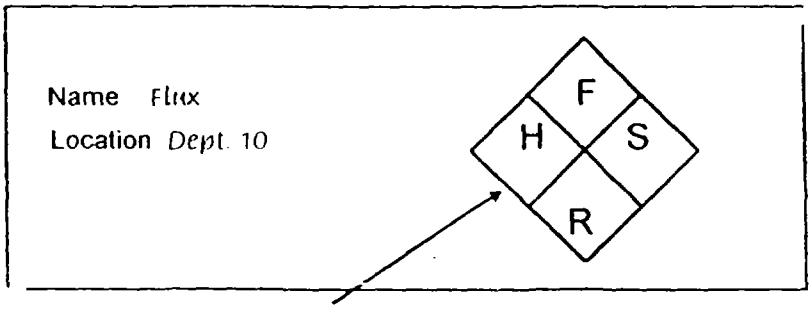
Hazardous Chemical Labeling Procedure

Hazardous chemicals must be labeled with the following information.

- The place where the chemical is stored (i.e. Paint Room, Post Wave etc.).
- The name of the chemical (Flux, Alcohol, etc.)
- The hazard diamond must be filled in with the hazard ratings in each of the four categories.

1. Flammability rating
2. Health hazards
3. Reactivity rating.
4. Specific hazards



The information needed to fill in the Hazard diamond can be found on the MSDS reference guide, or on the label of the original container, the chemical came in.

Each category is rated on a scale from zero to four, with four being the most hazardous.

for instance: Liquid Nitrogen has a flammability rating of 4
Isopropyl Alcohol has a flammability rating of 3
Crude oil has a flammability rating of 2
Wood has a flammability rating of 1
Water has a flammability rating of 0

PROGRAM FOR REMOVAL OF HAZARDOUS WASTE

Six Chemicals May Be Disposed Of In The 55 Gallon Drum Marked "HAZARDOUS WASTE." The Drum Is Located In The Flame Room.

1. **Waste Solder Flux**
2. **P.C. 101**
3. **P.C. 101 Thinner**
4. **Di-Basic Ester**
5. **Potting Compound**
6. **PAINT**

*** NOTE: No other chemicals are to be disposed of in this 55 gallon drum Mixing unknown chemicals may cause a reaction resulting in explosion or fire. Any waste chemicals not on this list should be stored in their original containers and given to the Safety Director For Disposal.**

Accumulating and Storing Wastes:

1). Proper Transfer Container --- 5 gallon drums acceptable, but must be emptied into larger 55 gallon drums within 30 days of it's filling with used chemical.
2). Proper Labeling --- Each container must be labeled with the following:
   A). Name (used flux, used P.C. 101)
   B). Where it came from (wave solder)
   C). Using the diamond shaped area on the Hazmat Label, fill in the 4 hazard categories.

      1). Health Hazard; rating - 1
      2). Fire Hazard; rating - 3
      3). Reactivity; rating - 0
      4). Specific Hazard; rating - 0

3). All containers must be poured directly into the 55 gallon drum at the time they are moved to the Flame Room
4). Each full 55 gallon drum of used flux should be disposed of as soon as it becomes full.
5). All containers must have lids in place.

The company ENVIRONMENTAL WASTE SERVICES (630) 365-1100 is our source for disposing of waste flux.

Disposal cost: $110.00 per 55 gallon drum
New Drum Cost: $35.00

Hazardous Waste Procedure

The Morey Corporation has been identified as a potential hazardous waste generator and therefore subject to regulation of such waste under the Resource Conservation and Recovery Act (RCRA) . Failure to follow RCRA may result in a civil penalty.

If waste exhibits the following characteristics it is considered to be hazardous:

1. Ignitability;
2. Corrosivity;
3. Reactivity;
4. Extraction Procedure Toxicity

Hazardous waste cannot be thrown out with the garbage. It must be disposed of in the following manner.

Supervisor's Responsibility:

A. Hazardous material cannot be mixed exept for the 6 chemicals allowed to be mixed in the hazardous waste drum

B. Containers for hazardous material must be identified with a label on the container.

C. Satelite waste containers must be dumped into a 55 gal. drum as soon as they become full. This applies to all chemicals.

D. All 55 gallon containers must be stored in the Fire Room until they are ready to be disposed of.

E. Once the 55 gal. drum is filled the Safety Supervisor is to fill out a disposal form and give it to the purchasing department.

STOCK ROOM:

A. It is the Safety Manager's responsibility to provide empty 55 gal. drums as required.

PURCHASING:

A. Upon receipt of the hazardous waste disposal form the purchasing department will Call Environmental Waste Services at (630) 365-1100

B. Environmental Waste Services will fill out the hazardous waste labels (one per container), and provide all necessary paperwork for transportation including Uniform Manifest.

C. The Safety Manager will receive 2 copies of the Uniform Manifest from the

Environmental Waste Services pick up person. One copy will be filed in the "Hazardous Waste Folder" in the safety file drawer located at the Safety manager's desk. The second copy must be mailed to the State of Michigan Department of Environmental Quality by the front office.

D. The Safety Manager will receive a copy of the Uniform Manifest from the State of Michigan. The copy must be filed in the "Hazardous Waste Folder" in the safety file drawer located at the Safety manager's desk.

This Lease, dated ~~November 1, 1979~~ February 5 , 1980

between Downers Grove National Bank and Trust, as Trustee under Trust No. 78-309

herein called the "Landlord," and MONTGOMERY WARD & CO., INCORPORATED, an Illinois corporation, with ~~General~~ Offices at ~~619 West Chicago Avenue~~, Chicago, Illinois, herein called the "Tenant,"
Regional 140 South State Street,

WITNESSETH:

1. The Landlord leases to the Tenant for a term commencing on * , and continuing to and including ** , the premises located in the City of Downers Grove , County of Dupage , and State of Illinois , described as follows:

See Exhibit "A", which is attached hereto and made a part hereof.

* the date Tenant takes possessic of the demised Premises provide Landlord has completed the work described in Paragraph #19 here unde

** Ten (10) years after the first day of the first month followi the month in which Tenant take possession.

including all improvements now or hereafter thereon and all appurtenances thereto. Said premises are commonly known as 2663 Wisconsin Avenue.

2. The Tenant shall pay rent to the Landlord at the annual rate of Twenty Five Thousand Seven Hundred and No/100 Dollars ($ 25,700.00) payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prorated. Anything contained herein to the contrary notwithstanding, the Tenant's obligation to pay rent hereunder shall not commence until actual and exclusive possession of the leased premises has been delivered to the Tenant and all repairs, alterations and improvements necessary to fit the premises for occupancy and use by the Tenant shall have been completed, all as contemplated by Paragraphs 19 & 20 hereinbelow.

3. All payments to the Landlord may be made by checks or drafts payable to the order of

The Morey Corporation and mailed to such payee at 2659 Wisconsin Avenue Downers Grove, Illinois 60515

4. The Tenant may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term, extend the term ~~to and including~~ an additional Five (5) years , upon the same terms and conditions as herein set forth, except that rent shall be adjusted upward ~~[illegible]~~ at the commencement of the extended term by the percentage in the CPI since the commencement of the term, but in no event shall the rent be increased by more than 75%.

MOR 001531

5. If the Tenant has exercised the foregoing option to extend the term, it may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term as extended, further extend the term ~~to and including~~ for an additional Five years upon the same terms and conditions as herein set forth, except that rent during the further extended term shall be adjusted upward at the commencement of the further extended term by the percentage change in the CPI since the commencement of the extended term, but in no event shall rent be increased by more than 75%.

~~graphed to the Landlord ( ) or more days before the effective date of the~~ cancellation, may cancel this lease as of

All rent and other ~~charges~~ paid in advance for any period after the effective date of such cancellation ~~shall be refunded to the Tenant.~~

7. The Landlord will not interrupt or disturb any entrances, exits, or approaches, or deprive the premises of any light or air now enjoyed by the premises.

8. The Landlord covenants and agrees to maintain the Tenant's quiet possession and enjoyment of the entire leased premises during the term hereof [illegible] The Landlord shall hold harmless the Tenant of and from any and all loss, damage and claims for damage to person or property resulting from his failure to comply with this agreement.

9. The Tenant, at its own expense, may from time to time install on the premises any equipment fixtures and improvements and remove them and may make any alterations or additions in a good and workmanlike manner in and to the premises and may erect or remove any signs on the premises which it may deem necessary or suitable for the conduct of its business. (except advertising signs)

10. Notwithstanding any other provision of this lease, the Tenant shall not be liable for any loss or damage to the premises caused by fire or the elements, whether or not such loss or damage shall result from the Tenant's negligence. [illegible]

11. If any default of either party continues uncorrected for sixty (60) days (thirty (30) days in the case of a default in the payment of rent) after receipt of written notice from the other party, stating with particularity the nature and extent of the default, the party giving such notice may cancel this lease by written notice of cancellation. [illegible] remedy provided in this lease shall be exclusive, but each shall be cumulative with all other remedies provided in this lease and at law or in equity.

12. The Tenant may sublet the premises or assign this lease; provided, however, that the Tenant shall not be relieved from its obligations under the lease by such subletting or assignment without the Landlord's consent.

13. The Tenant may holdover at the end of the term, without extending the term or renewing the lease, provided the Landlord, at least thirty (30) days prior to the expiration of the term, has not given written notice to the Tenant to vacate the premises at the expiration of the term. If the Tenant does so holdover, the tenancy thereafter shall continue upon the terms and conditions of this lease in effect during the last month of the term until terminated by either party by notice mailed to the other party at least thirty (30) days before the effective date of such termination.

14. The Tenant, on the last day of the term, or on the last day of any holdover, will surrender the premises in as good condition as when the Tenant takes possession, except for ordinary wear and tear, repairs and replacements required to be made by the Landlord, loss by fire or casualty, loss by any cause beyond the Tenant's control, and alterations, additions, and improvements herein permitted.

15. Tenant shall pay for all gas and electricity used by it on the demised premises.

16. (a) The Landlord shall pay when due all taxes and assessments of every kind and nature which have been or which shall during the term of this lease be levied, assessed or otherwise imposed upon the leased premises, including all improvements now or hereafter thereon, but nothing contained in this Section 16 shall be deemed to obligate the Landlord to pay any taxes levied or assessed against the personal property of the Tenant located in the leased premises or any taxes commonly known as "chain store taxes" imposed on the Tenant by reason of the fact that the Tenant operatesmore than one place of business in the jurisdiction imposing such tax, which personal property taxes and chain store shall be paid the Tenant.

(b) The Tenant, upon receipt of satisfactory evidence of the amount of such excess, shall reimburse the Landlord the amount by which the general real estate taxes levied and assessed against the leased premises for each subsequent tax fiscal year during the term of this lease exceed the general real estate taxes levied and assessed against the leased premises for the third tax fiscal year following Tenant's occupancy; provided, however, that the Tenant shall be obligated to pay only its pro rata share of such excess taxes for the tax fiscal year during which its obligation to pay rent under this lease ceases, said pro rata share to be based upon the number of days of the then current tax fiscal year for which the Tenant has been obligated to pay rent under this lease.

(c) Prior to the payment thereof, the Landlord shall submit to the Tenant copies of all general real estate tax bills, a portion of which the Tenant may be obligated to pay to the Landlord under this Section 18, together with a statement showing the computation of the amount owed by the Tenant to the Landlord hereunder, supported by such evidence as the Tenant may reasonably require, whereupon the Tenant (unless it shall contest such taxes as hereinafter provided) shall pay to the Landlord within thirty (30) days after receipt of such bills, statement and other evidence, that portion of such general real estate taxes required to be paid by the Tenant hereunder.

(d) In the event the Tenant shall desire to contest the validity or amount of any tax, a portion of which it may be required to pay to the Landlord hereunder, the Tenant, within thirty (30) days after being notified of the amount thereof, shall notify the Landlord of its intention to do so, whereupon the Landlord shall defer payment of any such tax so long as the validity or amount thereof shall be contested by the Tenant in good faith and by proper proceedings, except that the Landlord may make such payments under protest or take such other steps with regard to said tax as will not prejudice the Tenant's opportunity to successfully contest the validity or amount thereof. The Landlord agrees to render to the Tenant all assistance reasonably possible, without expense to the Landlord, in contesting the validity or amount of any such tax, including joining in and signing any protest or pleading which the Tenant may deem it advisable to file. Should any rebate be made on account of any tax a portion of which has been paid by the Tenant to the Landlord hereunder shall belong to and be paid to the Tenant.

17. Tenant shall maintain the parking lot areas, fence, and paved areas in good condition and repair, and shall also, as necessary, maintain, repair, and replace the gas pump and lighting facilities on the demised premises.

18. Tenant shall carry General Liability insurance, or at its option be self-insured, with limits of not less than Two Hundred and Fifty Thousand Dollars ($250,000.00).

[illegible]

[illegible]

[illegible]

(a) [illegible]

(b) [illegible]

[illegible] * approval of plans by Tenant as herinafter specified.

19. Within Thirty (30) days after * [illegible], Landlord shall commence, and thereafter diligently prosecute to completion, the following Landlord's work, as also more fully described an Exhibit "B", which is attached hereto and made a part hereof:

(a) Grade, compact, and gravel the parking areas so as to be suitable for Tenant's intended use.

(b) Install a six (6) foot chainlink fence (with barbed wire and sliding gate) around the perimeter of the demised area.

(c) Excavate for, position, and install a certain Eight Thousand (8000) gallon gasoline tank, and pump, located as shown on Exhibit "B", tank and pump to be supplied by Tenant promptly after last execution of this Lease.

(d) Provide electric service to the gas pump.

(e) Install and erect a lighting pylon, and attach lighting fixtures thereto, as shown on Exhibit "B".

(f) Lay concrete paving in and about the area of the gasoline pump as required.

(g) Pave a hard surface, all weather, access drive from the pump area to the adjoining parcel also leased by Tenant.

All work required to be performed by the Landlord hereunder shall be performed in a good and workmanlike manner. The Premises shall be left at the completion of such work in a safe, clean and tenantable condition and in good order and repair. Landlord shall perform all work provided for hereunder in conformity with all applicable construction and building codes and with every applicable requirement of law or duly constituted authority of law, or any Board of Underwriters, Rating Bureau or similar organization having jurisdiction, of carriers of insurance on the leased Premises.

See paragraph 19, continued on Page 4a.

20. Tenant shall take possession of the Leased premises within a reasonable time, not to exceed Thirty (30) days, after Landlord notifies Tenant that all Landlord's work pursuant to Paragraph #19 has been completed and that Tenant may have exclusive possession of the Premises. In the event the Landlord has not completed all work on or before June 1, 1980 , Tenant may cancel this Lease by sending written notice to Landlord, whereupon this Lease shall be terminated and of no further force and event.

21.1 Within thirty (30) days from the date of last execution of this Lease, Landlord shall [illegible], provide and deliver to Tenant (at the office of Tenant) a leasehold title insurance policy of a title company acceptable to Tenant in the amount of ONE HUNDRED THOUSAND and No/100 ($100,000.00) DOLLARS covering the date hereof, or if Tenant so elects, its preliminary report on title or title binder in said amount of $100,000.00 showing title in Landlord, subject only to matters to which this Lease is subject. All such title costs and premiums to be paid by [illegible] Tenant

If the report on title, title binder, or leasehold title insurance policy, so required, discloses any defects in title (other than such usual objections contained in Leasehold policies and matters to which this Lease is subject) Landlord shall, upon tendering the same to Tenant within thirty (30) days from the date of last execution of this Lease, have sixty (60) days, from the date which such title report, binder, or leasehold title insurance policy bears, to cure such defects and to furnish such title report, binder, or leasehold policy showing such defects cured or removed. If such defects in title are not so cured within sixty (60) days, Tenant may, at its option, terminate this Lease. In the event this Lease is so te[illegible]

MOR 001534

Paragraph 19 (continued)

Within Thirty (30) days after the last execution of this Lease, Landlord shall prepare appropriate plans, specifications and/or working drawingscovering the foregoing work, and submit same to Tenant for approval.

In the event Landlord does not complete the work diligently, Tenant may, at its option, cause the work to be completed and deduct the cost thereof from rent.

MOR 001535

21.2 Tenant may, at its option, record this Lease and the cost of all documentary stamps, or conveyancing, transfer tax and recording fees shall be paid ~~xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx~~ by Tenant.

21. Broker's Commissions - If there are any Broker's fees or commissions payable in connection with the bringing about of the execution and delivery of this lease, the Landlord agrees that Landlord will pay same, that the Tenant shall not be liable for such fees and commissions and that the Landlord will indemnify and save the Tenant harmless from any and all claims for such fees and commissions.

22. Landlord and Tenant acknowledge that Tenant is negotiating a Lease of substiantially like terms and conditions for Premises adjoining the Landlord's Premises, and that Tenant's use of the demised premises is not feasible without the use of said adjoining Premises. Notwithstanding anything in this Lease to the contrary, Tenant's rental obligation hereunder shall not commence until Tenant has taken possession of the adjoining Premises. When the commencement date of both leases has become fixed, Landlord and Tenant agree to execute a Lease Supplement fixing the commencement date and the termination date of the Lease.

If, due to fire, the elements, or the exercise of the right of eminent domain or other authority of law, or any other cause, the premises shall become untenantable, dangerous or unfit for the Tenant's use, rent payable under this lease shall abate during the continuance of that condition. If the conditions which give rise to an abatement of rent under this section continue for a period of ninety (90) days, then the Tenant may, at any time within sixty (60) days after such ninety (90) day period, cancel this lease and terminate its tenancy by giving the Landlord written notice of its intention to do so.

All notices, approvals, or requests in connection with this lease shall be sent by registered mail or telegram. Notices to the Landlord may be addressed to the Landlord at the address set forth in Section 3 above. Notices to the Tenant shall be addressed to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois, attention: Regional law Department.

Employees or agents of the Tenant have no authority to make or agree to make a lease. This instrument shall not be binding upon the Tenant until it has been executed on behalf of the Tenant by one of its corporate officers. No act or omission of any employee of the Tenant shall alter, change, or modify any of the provisions of this lease. Any alterations, changes, and modifications of this lease shall be effective only when made in writing and executed on behalf of the Tenant by one of its corporate officers.

All the grantors of the term shall be bound jointly and severally by this lease. This lease shall inure to the benefit of and be binding upon, the respective heirs, legal representatives, successors and assigns of the Landlord and the Tenant.

IN WITNESS WHEREOF, this lease has been duly executed under seal as of the first hereinabove written.

ASSUMPTION AGREEMENT

The undersigned, THE MOREY CORPORATION, a corporation of Illinois

being all (or a majority of) the beneficiaries of Downers Grove National Bank and Trust, as Trustee under Trust #78-309, dated _____, and the holders of appropriate power of direction thereunder, hereby expressly agree, in consideration of the execution of the lease to which this Assumption Agreement is attached, i.e., that certain Lease dated February 5, 1980 by and between the aforesaid mentioned Downers Grove National Bank and Trust, as Trustee, as Lessor, and Montgomery Ward & Co., Incorporated, as Lessee, that they will individually and personally, jointly and severally, perform each and every of the Lessor's undertakings and obligations assumed and expressed in the Lease to which this Assumption Agreement is attached.

This undertaking and obligation of the undersigned, shall be binding upon their successors, assignees, administrators and assigns, and they covenant and agree not to assign the said lease or any rights thereunder unless such assignee expressly assumes to perform all of the covenant and undertakings of said Lease.

IN WITNESS WHEREOF, we have hereunto set our hands and seals this 2nd day of April, 1980.

THE MOREY CORPORATION, a corporation of Illinois

EXHIBIT A

Lot 34 (except the North 385 feet thereof) in ELLSWORTH PARK Unit Number 5, being a Subdivision in the Southwest Quarter of Section 12, Township 38, Range 10, East of the Third Principal Meridian, according to the Plat thereof recorded January 10, 1962 as Document R62-993 in DuPage County, Illinois.

FIRST SUPPLEMENTAL AGREEMENT

The Morey Corp
RAW

THIS FIRST SUPPLEMENTAL AGREEMENT made this 29th day of December, 1989, ~~by and between DOWNERS GROVE NATIONAL BANK, a National Banking Association, as Trustee under Trust No. 28-5048~~, hereinafter called Landlord, and MONTGOMERY WARD & CO., INCORPORATED, an Illinois corporation, with corporate offices at One Montgomery Ward Plaza, Chicago, Illinois 60671, hereinafter called Tenant.

W I T N E S S E T H:

WHEREAS, the parties hereto entered into a certain Lease Agreement dated February 5, 1980, hereafter called the Lease, covering certain premises located in the City of Downers Grove, County of DuPage, State of Illinois, commonly known as 2663 Wisconsin Avenue, now occupied by Tenant and more fully described in said Lease, and

WHEREAS, the parties are mutually desirous of supplementing said Lease;

NOW THEREFORE, for and in consideration of the mutual covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

(1) The term of said Lease is hereby extended from and including the first (1st) day of October, 1990 to and including the thirtieth (30th) day of September, 1995.

(2) Tenant shall continue to pay rent to Landlord for the leased premises during the extended term herein provided at the annual rate of TWENTY FIVE THOUSAND SEVEN HUNDRED AND NO/100 DOLLARS ($25,700.00), payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prorated.

(3) Payments to the Landlord may be made by checks or drafts payable to the order of The Morey Corporation, and mailed to such payee at 2659 Wisconsin Avenue, Downers Grove, Illinois 60515.

(4) Effective as of the complete execution and delivery of this First Supplemental Agreement, Section 4 of said Lease shall be and is hereby cancelled and deleted therefrom, it being understood and agreed, however, that the Tenant shall continue to have the option granted to it in Section 5 of said Lease to further extend the term for an additional period of five (5) years from the end of the extended term herein provided, in accordance with said Section 5.

(5) In consideration of One Dollar ($1.00) paid by the Tenant to the Landlord, the receipt and sufficiency of which is hereby acknowledged, Landlord hereby agrees that the Tenant shall have the option to execute this First Supplemental Agreement at any time within thirty (30) days after receipt of the same duly executed by Landlord.

EXCEPT as above supplemented, the Lease, together with any previous Supplemental Agreements and/or Lease Amendments, is hereby ratified and confirmed. All of the covenants of said Lease, as amended, shall be interdependent and binding upon and shall inure to the benefit of the parties hereto, their respective successors and assigns.

RE: Parking lot lease, Montgomery Ward Service Facility 2701, Behind Walnut Avenue, Downers Grove, Illinois.

Dear Mr. Jensen:

As you are aware, Montgomery Ward has chosen to exercise the final five year option on the parking lot described above.

The lease terms provide for a 75% increase in rent effective on the October 1, 1995 renewal date.

We therefore request that you update your records and payment system to reflect a monthly rent of $3,747.91 as of October 1, 1995.

Please feel free to call the undersigned at (708) 964-2300 with any questions.

Very truly yours,

THE MOREY CORPORATION

RE: MONTGOMERY WARD - DOWNERS GROVE, IL
PARKING LOT LEASE RENT INCREASE

Dear Mr. Cunningham:

Your letter of January 19, 1996 was referred to me for handling. According to the terms of our Lease dated February 5, 1980 and the First Supplemental Agreement dated December 29, 1989, our rent shall be increased per section 5 during the option period 10/1/95 thru 9/30/2000. Our fixed rent during this further extended term shall be adjusted upward at the commencement of the extended term by the percentage change in the CPI since the commencement of the extended term, but in no event shall rent be increased by more than 75%.

Below you will find our calculation for this increase using the following indexes:

CPI-U (82 Series) $\frac{10/95 \quad 153.7}{10/90 \quad 133.5}$ - 15.13% Increase

Current monthly rent $2,141.67 x 15.13% = $2,465.70 mo.

I have adjusted our rent retroactively to 10/1/95 to the new monthly amount of $2,465.70. Our check in the amount of $1,620.15 representing the rent adjustment for period 10/1/95 thru 2/29/96 shall be forthcoming in about ten days. Please note your records.

Should you have any questions, feel free to contact me at #312/467-7798.

Sincerely,

Barbara Gianfrancesco

MOR 001546

ASSIGNMENT OF LEASE

THIS ASSIGNMENT OF LEASE is executed this 18th day of June, 1996, by THE MOREY CORPORATION (herein called the "Assignor") formerly the beneficiary of Downers Grove National Bank, as trustee under trust number 78-309 (herein called the "Trust"), and MOREY REALTY GROUP, INC., an Illinois corporation (herein called the "Assignee").

WHEREAS, pursuant to written lease (the "Lease") dated February 5, 1980, between Trust and Montgomery Ward & Co., Incorporated ("Tenant"), and amended by that First Supplemental Lease dated December 29, 1989, between Assignor (as successor to Trust) and Tenant, Tenant did lease the real property described therein; and

WHEREAS, in order to protect the real estate assets of Assignor from the possible liabilities attendant to the operation of Assignor'/s primary business, the Assignor did create a wholly owned subsidiary (Assignment) for purposes of owning and operating its real estate interests; and

WHEREAS, Assignor has transferred legal title to the Property which is the subject of the lease to Assignee;

NOW, THEREFORE, in consideration of the sum of Ten Dollars ($10.00) in hand paid to Assignor, the mutual covenants contained herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledge, the parties hereby agree as follows:

1. **Assignment of Lease.** Assignor hereby transfers and assigns to Assignee any and all right, title and interest (specifically including, but not limited to, entitlement to receipt of rental income from the tenant thereunder from and after the date hereof) which Assignor may have, as landlord or otherwise, in the Lease.

2. **Acceptance.** By executing this Assignment, Assignee hereby accepts and agrees to perform all of the terms, covenants and conditions of the Lease on the part of the landlord therein required to be performed, from and after the date hereof.

3. **Cross Indemnities.** Assignee covenants and agrees to indemnify, save and hold harmless Assignor from and against any and all losses, liabilities, costs, expenses, damages, claims or causes of action existing in favor of, or asserted by, the tenant under the Lease which arise out of or relate to Assignee's failure to perform any of the obligations as landlord under the Lease arising after the date hereof. Assignor covenants and agrees to indemnify, save and hold harmless Assignee from and against any and all losses, liabilities, costs, expenses, damages, claims or causes of action existing in favor of, or asserted by, the tenant under the Lease which arise out of or relate to Assignor's failure to perform any of the obligations as landlord under the Lease arising prior to the date hereof.

4. **Successors and Assigns.** This Assignment of Lease shall inure to the benefit of, and be binding upon, the successors, executors, administrators, legal representatives and assigns of the parties hereto.

5. Governing Law. This Assignment of Lease shall be construed under and enforced in accordance with the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have executed this Assignment of Lease as of the date set forth above.

ASSIGNOR:

THE MOREY CORPORATION, an Illinois corporation
