Subject:	R7 dispatching OSC"s to Magellan pipeline spill northern Iowa
Date:	Wednesday, January 25, 2017 9:38:58 AM
Attachments:	Spill Summary Report for NRC Report _1169441.pdf

Mary,
R7 Superfund Division is dispatching OSC Frey and OSC Fisher to a Magellan pipeline spill up near the Iowa / Minnesota border. The Oil Spill Liability Trust Fund has been opened. Eric Nold, OSC is the EPA phone duty officer. EPA R7 is coordinating with R5, IDNR and local Emergency Management officials. The weather is horrible – a foot of blowing snow and all roads in northern Iowa are snow packed.

Initial reports are that there may have been 1,500 – 2,500 barrels (63,000 – 105,000 gallons) of diesel released. The closest town is Hanlontown, Iowa. IDNR has dispatched Carl Berg from the local IDNR field office. Magellan has deployed multiple response and recovery resources. We will not be using the REOC today (big screens / comms are not functioning); but, we will be coordinating our response activities out of the day-time spill phone duty officer room. We will send out an update when we have an on-site presence.

EPA R7 has confirmed that there are no downstream drinking water intakes or tribal lands immediately downstream from the spill in Worth County, Iowa. Willow Creek flows into the Winnebago River, which flows southeast towards Mason City. We will keep you posted as additional info becomes available. Please call Adam if you need anything urgent – my cell phone is still non-functional.
Thanks
Ken

Subject: Emailing - Spill Summary Report for NRC Report _1169441.pdf

FYI – the original NRC report came into R5 as they thought the spill was in Minnesota. Magellan regional coordinator Tristan Grover (515-971-1560) contacted the R7 spill line informing that the spill was actually in R7 Iowa. Location of the release is reportedly in the area of 390th Street and Wheelerwood Rd near Hanlontown, IA. R7 OSCs will be dispatched.
