Subject:	RE: EOC Spot Report: Region 5, Magellan Pipeline Diesel Fuel Discharge (NRC # 1169441), Rice County, Minnesota
Date:	Wednesday, January 25, 2017 10:10:49 AM

Spoke to the HQ EOC – they are now aware that it is an R7 only release but will be borrowing an R5 OSC for a day or two. They are firmly aware it is not a multi-jurisdiction response and that we are now the lead and all information will be coming from R7 from this point forward.

EOC Spot Report: Region 5, Magellan Pipeline Diesel Fuel Discharge (NRC # 1169441), Rice County, Minnesota

US Environmental Protection Agency
Report as of January 25 2017, 9:45 AM ET

Overview: On January 25, 2017 at approximately 06:15 EST, Magellan Pipeline reported an alarm and estimated 2,500 barrel (107,500 gallon) discharge of diesel fuel from a 12” pipeline due to unknown reasons between Dodge City, Iowa and Faribault, Minnesota. The

Responsible Party (RP) is mobilizing personnel and contactors to begin investigating the pipeline pressure alarm and probable release of diesel fuel. EPA has mobilized a Region 5 OSC to assess the threat of release to a waterway and oversee the Responsible Party (RP) clean-up.

State, Local and other Federal Agency Actions: None reported at this time.

EPA Actions: A Region 5 OSC is mobilizing to the site to assess the situation.

Media Interest: None at this time.

The HQ EOC will continue to monitor and provide updates as needed.
