Subject: Fwd: Diesel Spill Update - Worth County

Good afternoon. Below is a note from the Iowa Homeland Security Emergency Management Department duty officer concerning potential protests related to the Magellan pipeline release in worth county.

Thanks,

Adam

All,

Ray Huftalin, Worth County EMA, called this morning to provide an update on the current

status of the local response efforts on the Magellan diesel spill that occurred north of Hanlontown on Wednesday (1/25).

EMA indicated that the Minnesota Sheriff's Department trailer (MN County not identified) that was being used as the Incident Command Post was demobilized yesterday and has since been replaced with the much smaller, much more modestly equipped, Worth County EMA trailer. EMA indicated the road was closed on each side of the spill site and that local law enforcement (Worth County Sheriffs Office) maintained a 24/7 presence at the site for access control. Weather conditions at the site remain less than ideal, with current conditions at 9 degrees with a 25 MPH wind.

EMA noted that a local resident has been active on social media expressing outrage at the situation and has been advocating protests. This local resident is reportedly well connected and has allegedly been in contact with Senator Bernie Sanders' office concerning the spill. EMA indicated that local law enforcement has already contacted the Iowa Fusion Center and the Iowa State Patrol regarding the potential for protests at the site.

EMA indicated that there were no requests for state resources at this time, however, should protests occur LLEA would likely request law enforcement assistance directly from the Iowa State Patrol.

EMA did not provide any sort of update on the status of clean-up operations.

Thanks and let me know if you have any questions!
