Subject:	1/26/17 0915 Update OPA – Magellan Hanlontown Diesel Spill
Date:	Thursday, January 26, 2017 9:14:00 AM
Attachments:	IMG_0533.JPG IMG_0538.JPG

Current update from the onsite operations briefing for the Magellan pipeline diesel spill near the Iowa/Minnesota border.

- Magellan continues to recover product and clear trees to further the removal of impacted materials at the site.
- Throughout today the need for 24 hour operations will be evaluated.
- There are currently over 100 personnel onsite including representatives from Magellan, RP contractors, Local Responders, IDNR, and 2 EPA Region 7 OSCs.
- Magellan and its contractors are evaluating disposal options for impacted materials.
- Air monitoring is being conducted onsite and along the perimeter of the spill site.
- Magellan has H&S and Public Affairs personnel onsite. A press conference is being planned for today.
- No waterways appear to have been impacted. Currently 1 boom location has been established downstream in a creek and two additional booming locations are being added as a precautionary measure. Magellan is developing a contingency plan in case any waterways are determined to be impacted.

Additional updates will be provided as information is received.
