HAZARD IDENTIFICATION groundwater contamination

McPhee

DATE	COMMENT
	345-4606
10/30/79	Called Ken Mensing (618-345-0700). Co. has apparently in contact with State water and land permits people - Co. will install "containment" for washings by spring 1983 (concrete/hypalon tanks), install "chemical treatment" by mid 1982 wants to connect to POTW mid-1983. State lab says lagoon sample was "vegetable oil".
10/30/79	McPhee will call State, get copy of file from State & review before conference call.
11-6	McPhee - same assignment
11-13	McPhee ~~called~~ called Mensing who referred him to IEPA attorney
11-20	See conference call notes. McPhee calling Bill Seltzer to get info.
11-27	See McPhees memo. State has nothing going on case but State says it's a mess. Jay or SEA can schedule a recon - get back on date next week we will advise State
12-4	State ~~was~~ & AH MD was supposed to visit Ken Mensing will go along. ~ week of 12/17
12-11	Inspection for week of 12/17 still on

12-18 Recon. survey this week

1-15 No feedback from Hole (Co. on permit) AHMD will report next week

1-22 Talked on conference call.

1-29 Conf. call

CC 2-1 Hole - state has not received plans & application as required - Co. moving slowly on this.

2-5 - AHMD will draft letter to Co. on problems submitting plans & application.

2-12 Co. submitted application for wastewater treatment system. Joint review between IEPA water & land pollution personnel. ED to contact state wastewater people about addressing leaking lagoons in permit. Do lagoon leaking? Find out past info on lagoons. If State doesn't know anything, what info can state get on lagoons. If no info available, a 305 may be needed.

SIA (Mortensen) when in area can check lagoons.

2-19 SIA visit next week
