---

Hi Sean,

Thank you very much for your review. I agree with your changes and will make the edits to the poster.

Cheers,
Kyle Vickstrom

Hi Kyle,

Sorry for the delay. Just a few editorial notes.

Could we add "all media" and "sediment" in this sentence, probably very obvious, but if you have room:

Sixty-four contaminants of concern (COCs) in all media at PHSS, six of which are focused sediment COCs.

For this sentence, though we debiased them, do we want to add "qualified" since we stated for the record that comparatives were not strictly speaking completely valid (more valid that say some interpretations of others for certain) ?

FS surface sediment data were debiased by taking the median of all

points within a baseline sample grid cell and comparing to the associated
baseline sample for a qualified assessment of any change.

Thank you for the opportunity to comment and for putting this together.

S

Subject: SETAC 2019 Poster Draft

Hi Sean and John,

Attached is a draft poster for the 2019 SETAC annual meeting. I've also attached our abstract for reference. Can you review the poster and provide feedback by **COB Fri 10/18**?

John, can you also provide a higher resolution image for your logo?

Thanks,

Kyle Vickstrom, EI
