Neal,
Do you now if there are any plans in works to have tanks removed off tidelands in front of Sesko Property in Bremerton? I don't recall this being the case but wanted to be sure before responding back to EPA.
Thanks,
Shayne

Hi Shayne,
I don't know anything about this project. You might want to ask Neal Cox.

Hi Shayne-
I fixed Erika's address in my contacts list, so hopefully everything I send to her in the future will get to her.

As far as an as-built goes…at some point in the relatively near future, we will be posting a copy of the final Removal Action Report on our website. It will contain, amongst other things, figures depicting where the work was completed (as-builts). When we post the report on our site, I will send you and Erika a message informing you that it has been posted, along with a link to get you to the report.

While we're on the topic of the site, I was wondering if there is anything to report from your end of things regarding the ballast tanks on the beach. I seem to recall seeing a while back that DNR had initiated proceedings with Sesko to have them removed from the beach. Any update that can be reported?

Bill,

Thanks for update. Yes please do send future correspondence to Erika (FYI email you had for Erika was misspelled-proper spelling and email address above). Also please send us a copy of as-built for recent temporary cap near floats and confirmatory sampling results from recent remedial emergency action.

We look forward to working with you through the continued RI/FS process.

Thank you,
Shayne

Hi Shayne-
I'm out of the office today, but here's an update.
We are currently doing some internal planning/info gathering as we prepare to define the scope of the RI/FS work. This work is being done in preparation for a couple of meetings we intend to schedule for the spring; one with key stakeholders (which will include DNR), the other for the general public.

We haven't defined the content of the meetings yet, nor the dates. I'm hoping we will be able to hold the stakeholder meeting sometime in March, but that is yet to be seen.

The objectives of the stakeholder meeting will be to 1) provide folks with background information to help them determine how they can best participate in project-related activities, 2) identify what we believe are requirements that we will need to meet (ARARs) as we do our work in order to receive feedback from

participants, 3) identify the general approaches that will be employed in our investigation work, again to elicit feedback, and 4) conduct a site visit. The plan is to coordinate with Erika Shaffer when we get to the point of scheduling a meeting.

We also plan to hold a meeting for the general public at some point after the stakeholder meeting. At this meeting, we intend to provide an update on where we are in the process, what we plan to be doing (particularly in the near term), and take any input on the scope of our investigation of the site.

As indicated above, our plan is to coordinate with Erika as our planning becomes more refined/defined. Let me know if should be in the loop as well.

Bill,
I am updating site status information for my sites and was wondering if you could provide me update regarding Bremerton Gasworks Site. I appreciate help.
Sincerely,
Shayne

Shayne,
I have turned the site over to Bill Ryan for the remedial work. He can help you.
