This reprocessing facility appears to be well run. Materials are accepted from customers & returned in virgin condition in either drums or tankers as the customer wishes. Emptied incoming drums are sent to B&M Drum Service, 4700 N. 25th St, Oak Lawn, Ill. 60453. There is some drum storage of Freon 113 in an unsecured area at this time. This is recently acquired land and will be fenced yet this summer. ~~The site does~~ All materials brought in for reprocessing are tested in the company lab. If there is anything in the load that can't be disposed of at C.I.D., Calumet City is not accepted by Custom Organics.
