OU5- Former Stimson Lumber Mill

CSM- The former Stimson Lumber Mill is defined geographically by the parcel of land that included the former Stimson Mill. The eastern boundary of OU5 will follow the western high bank of Libby Creek.

A total of 200 soil samples (field and duplicate samples) have been collected at 875 Highway 2 South between 2002 and 2006. The number of samples collected across the various investigations is as follows:

Contaminant Screening Study	182
Pre-design	10
Removal clearance	4
SQAPP-2005	4

A total of 593 air samples (field and replicate samples) have been collected at 875 Highway 2 South between 2002 and 2005. The number of samples collected across the various investigations is as follows:

Phase I	14
Contaminant Screening Study	167
Removal clearance	387
SQAPP-2005	25

A total of 64 dust samples have been collected at 875 Highway 2 South between 2002 and 2006. The number of samples collected across the various investigations is as follows:

Phase I	2
Contaminant Screening Study	38
Pre-design	24

A total of 5 bulk samples have been collected at 875 Highway 2 South in 2004. All five samples were collected as part of the Pre-design inspection.

OU6- Burlington Northern/ Sante Fe Railway

CSM- The rail yard owned and operated by the Burlington Northern and Santa Fe Railroad (BNSF) is defined geographically by the BNSF property boundaries and extent of contamination associated with the rail yard. Railroad transportation corridors are also included in this OU.

A total of 656 soil samples (field and duplicate samples) have been collected along BNSF Railway between 2003 and 2004. The number of samples collected across the various investigations is as follows:

Burlington Northern Investigation	627
Burlington Northern Overexcavation	22
Burlington Northern 2nd Overexcavation	4
BNSF- Track 3	1
BNSF- Track 4	1
	1

A total of 365 air samples have been collected along BNSF Railway between 2002 and 2005. The number of samples collected across the various investigations is as follows:

Phase I	8
Burlington Northern Investigation	309
BNSF Rail Yard Exclusion Zone	48

OU1- Export Plant

CSM- The former Export Plant is defined geographically by the property boundary of the parcel of land that included the former Export Plant.

A total of 454 soil samples (field and duplicate samples) have been collected at the Export Plant area between 1999 and 2006. The number of samples collected across the various investigations is as follows:

Phase I	159
Removal Clearance	246
Contaminant Screening Study	44
WR Grace sampling by URS	5

A total of 979 air samples (field and replicate samples) have been collected at the Export Plant area between 2000 and 2006. The number of samples collected across the various investigations is as follows:

Phase I	72
Collected by WR Grace	12
Removal clearance	895

A total of 27 dust samples have been collected at the Export Plant area in 2001. The number of samples collected across the various investigations is as follows:

Phase I	12
Removal Clearance	15

A total of 42 bulk samples have been collected at the Export Plant area between 2001 and 2002. The number of samples collected across the various investigations is as follows:

Phase I	3
Removal Clearance	39

OU2- Screening Plant and Associated Areas

CSM- The exact geographic area of OU2 has not yet been defined, but includes areas impacted by contamination released from the former Screening Plant. These areas include the former Screening Plant, the Flyway property, the Highway 37 Right-of-Way adjacent to the former Screening Plant and/or Rainy Creek Road, the Wise property, and the KDC Bluffs. The KDC Bluffs area is located directly across the Kootenai River from the former Screening Plant.
