Thanks Jonathan. we'll take a look and get back to you soon. We may not get everyone's comments by tomorrow since most of our group are taking off on Friday or Monday to destress, honor Carl Lautenberger or go to his funeral in Anchorage.

Thanks for all the work.

Subject: LST 1166 list

Richard and Tristen: The last two weeks have been an unanticipated drill that we just finished yesterday at 5:00 pm. Here is a draft list for your review. I could not locate the photos after I looked at them a week ago. Tristen, I must have downloaded them to a temp file and lost them.

I still don't know what we tell the USCG about the PCBs. Tristen, I thought you said wiring and intact paint could be left in place. That would satisfy the general permit. Please advise.
