Hi Chief,

We have been advised by the USCG NPFC over the last couple of years that we should not be issuing PRFAs to one another anymore in order to help the other agency out with funding. If its ok with you, We may be able to simply access the FPN you have open and establish our own internal accounting codes and travel authorizations. Let me call Greg and our internal money folks and I'll get back to you.

Thanks,

Richard

Subject: PRFA

I spoke with the contact I was provided regarding funding of the EPA travel to and from the LST-1166 and they had no idea what CERCLA or OSLTF were. Since our systems in the USCG will not allow you to process travel claims through us, I am proposing a PRFA to EPA Region X to get around the issue. The files are attached, including the Statement of Work and the PRFA itself (not signed and not final). Please advise if this will be acceptable and the Statement of Work is appropriate. I estimated $10,000.00 for an initial amount pending a more complete estimate from the EPA. The amount can be modified now or we can do later amendments to the PRFA as necessary.

Please note: No travel in support of the LST-1166 is authorized until this situation has been resolved and the OSLTF will not repay the EPA for any travel until this has been finalized and approved.
