3-19-98

To Craig McKinney,

Here are the MS-DS. sheets sent me from Beckheart. They are the polymers that we will be useing in the water treatment system we're installing in Seattle.

I thought I would like you to look them over. They are both polymers and a little out of my understanding.

I think they are the same ones that are being used in Spanish Forks. Not positive.

The B-40 has acrylamide in it. That is on the carcinogen list.

Please let me know what you think. Also if there are limits on site storage etc. Thanks,

S J Livino
Seattle

We plan to start-up the system on the 13th of April.
