Subject: Command Decision Made for LST-1166

Chris and Richard,

Dave called me today regarding a request from Sector Portland to have the secruity at the LST stand down as of today.

The reasoning that security is being stood down is because all of the hazmat has been removed and the costs can no longer be justified.

Dave (as Acting UM) did not have enough background to make the executive decision on whether to concur with the Sector so I went ahead and made the call to concur with the Sector's request. Dave called the Sector back to relay the message.

I do not think there are any collateral issues that would result of standing down security, but if I missed something, please let me know ASAP.

Calvin
