RE: Tradebe Treatment and Recycling, LLC of Tennessee
2015 Export Report
TND 000 772 186

Pursuant to the requirements of 40 CFR 262.56, as a hazardous waste treatment, storage and recycling facility and an exporter of hazardous waste, Tradebe Treatment and Recycling, LLC of Tennessee (Tradebe) is attaching a report identifying the types, quantities, frequency, etc. and ultimate destination of hazardous waste exported.

In response to 40 CFR 262.56(a) (5) (i), Tradebe is reducing the volume and toxicity of waste brought into our facility by recycling material through our multiple recycling technologies. Our SDS system, which has been in service since 2005, is a recycling system that utilizes solid waste feedstock to recover petroleum based hydrocarbons. Our distillation column came on line shortly after the SDS and is used to recycle solvent wastes, as well, as to produce commercial solvent products. In 2008 Tradebe installed a pot still, further increasing our solvent processing capabilities. In 2009, Tradebe installed a thin film evaporator, a high viscosity distillation system that Tradebe utilizes to recover many solvent waste streams that have required offsite disposal in the past. Tradebe placed a second SDS system into operation in the 4th quarter of 2015, with greater capacity to recycle and recover hydrocarbons. Each year, more and more of the material handled by Tradebe is recycled rather than being sent for disposal.

Thank you for your time regarding this matter. Please contact Timothy Denhof, at timothy.denhof@tradebe.com or 219.354.2383, with any questions.

Respectfully,

C. M. Olson
