Frederick,

A meeting on Tuesday, March 19, in the Dalles would work for me. I can be there from 10am-3pm. I think that should give us enough time to meet and tour the site.

I'll check with Brian Thorne about Lockheed's interest in our meeting. We have planned to meet the following week in Seattle.

Thanks,
Emy

Hi Emy,

How about meeting sometime the afternoon of Tuesday, March 19? Coming to The Dalles sounds like a good idea. The site visit can be before or after our meeting depending on your schedule.

It's up to you, but I have no objections if Lockheed/ARCADIS participates in the meeting. It might be a benefit because I could see where maybe DEQ and Region 10 might disagree on something, but if it is something that Lockheed would not object to the DEQ/Region 10 disagreement could be moot.

Cheers, Fredrick

Frederick,

As we discussed on the phone yesterday, I would like to send the near-final version of the CERCLA five-year review to DEQ for review in early March. My goal is to have the draft ready by March 5. I don't plan to extensively discuss the RCRA landfill in the five-year review.

Please let me know which days/times during the week of March 18 would work for a meeting. Would we meet in The Dalles? Including a site visit may also be a good use of time.

Thanks,
Emy

Subject: CERCLA 5-Year Report

Hi Emerald,

Lissa and I had a brief discussion with Brian Thorne with Lockheed and gave us some information about the meeting Region 10 had with Lockheed. He mentioned that you were working on the CERCLA 5-Year Review Report and that maybe a version would be completed in a month.

At this time, do you see results and review of the air monitoring at the RCRA landfill to be included in the 5-year report? Also, Bernie Zavala has had comments on the RCRA groundwater monitoring array, which does include CERCLA monitoring well MW-5S -- will those concerns also be in the 5-year report?

I ask this because in the works is a technical meeting between Region 10 and DEQ on the technical issues at the RCRA landfill. It's been problematic to get a demonstrative presentation to ferret what the exact concerns and issues are with Region 10. It might well be that the 5-year report will have some or all of those concerns. If true, it might make sense to have the technical meeting after the 5-year report.

So anything you can share about the 5-year report might be useful. Thanks! Fredrick
