Don Moos -

Attached for your information is a copy of an information request letter sent to Resource Recovery Corporation. At a waste landfill near Pasco, they received waste from the Rhone-Poulenc Chemical Co of Portland, Oreg. That waste may have been contaminated with dioxin. This "search" is part of the Agency's national dioxin strategy effort.

I will keep you posted as our work progresses. Please give me a call if you have any questions.
