Exporter Information

Exporter Name:	Clean Harbors El Dorado, LLC
Exporter EPA Identification Number:	ARD069748192
Exporter Mailing Street Address:	309 American Circle
Exporter Mailing City:	El Dorado
Exporter Mailing State:	AR
Exporter Mailing Zip Code:	71730
Exporter Mailing Country:	United States
Exporter Site Street Address:	309 American Circle
Exporter Site City:	El Dorado
Exporter Site State:	AR
Exporter Site Zip Code:	71730
Exporter Site Country:	United States

Calendar Year Covered by Report:	**2011**

received
SDM 3/1/12

Exporter Certification

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment.

Exporter Printed Name:	Daniel Roblee
Exporter Signature:	[signature]
Date of Signature:	2-27-12

Waste Reduction Page

As required in 40 CFR 262.56(a)(5) and 40 CFR 262.87(a)(5), Except for hazardous waste produced by exporters of greater than 100 kg but less than 1000 kg in a calendar month, unless provided pursuant to §262.41 [biennial report], when submitting in even numbered years:

(i) A description of the efforts undertaken during the year to reduce the volume and toxicity of waste generated:	facility receives fluorescent bulbs, including tubes and miscellaneous shaped. We process these through our bulb crusher that separates the mercury from the glass and end caps. The mercury is sent for retort, and the glass and end caps are sent for recycle. Secondly, the facility has received approval to begin metal recovery operations. The large metal pieces will be removed from the
(ii) A description of the changes in volume and toxicity of waste actually achieved during the year in comparison to previous years to the extent such information is available for years prior to 1984:	incineration under RCRA conditions reduces the toxicity and the volume of wastes by as much as 100%, depending on the non-incinerable salts, minerals and metals that the wastes contained. Any toxicity that reamins would be from heavy metals that the wastes originally contained. This toxicity is further reduced, as required by 40 CFR Part 268 regulations, by stabilization at approved hazardous waste landfills prior to final landfill.
