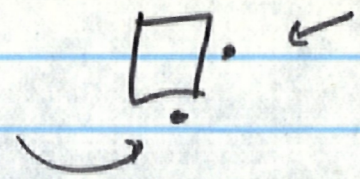
1.1.2
No Date

PASCO

at ① disposal site - 2 wells



G.W. flow S.W.

4 disposal areas → really 3 areas (2 are close together)

one control

continuous core - 5' to 35' (soil) ~~to~~ and then to g.w. (will only run g.w. if find soil)

Priority poll & pestic.

There are 5 wells already there - we'll also check these. (Monitoring wells)

→ Change opening TP's and title to deempl dioxin

Mike Gallagher - lead in Olympia

Lori will decide if we go to Oly or Spok first.

Revised sampling plan by 23rd. Send out to them.
