Subject: RE: Confidential Maine Inspection

Thanks for letting me know Beth. Dave Simonsen may have been too Cold Brook recently. Dave, if you have, can you let Beth know and if send her a copy of your report if it is ready?

Beth, can you ask your stack test personnel to get in touch with Bob Hartley. He knew that EPA had requested a stack test from Sprague but has not heard of the dates and details.

Subject: Maine Inspection

Hi Louis,
I'm hoping to conduct an inspection at Cold Brook Energy in Hampden, Maine this week either Weds 5/8 or Thurs 5/9. I'll be looking at compliance with the area source GACT (40 CFR 63, subpart BBBBBB) and also looking to see if there is any #6 oil/asphalt storage. Sorry for the short notice, but we just found out that Sprague in Searsport will be starting their testing for asphalt this week and since we will be in the area (and our stack testing guys will be in the area) I would like to get this inspection done.

I was able to get the permit for Cold Brook Energy off the DEP website. But please, feel free to contact me if you have any questions/concerns.

Thanks,
Beth
