Made Call ☒ Received Call ☐ Meeting ☐

Contact: Mr Walter Davis, Director (206) 483-9104
Woodinville, Water District 104

Discussion: re: Bellevue Plating
Walt as former director of water facility for City of Bellevue stated that all Bellevue public wells are capped and inactive. He did state that several people within City and in bordering areas use private wells for water.

Re: Woodinville - Universal Mfg.
(A) Woodinville area receives publicly supplied water from 2 sources (1) City of Seattle via the Water District 104 (2) Snohomish County - Alderwood water district. B. At this time no public gw wells. Both Bothell wells are inactive.
(3) Several people use groundwater (private wells) for drinking water. Walt estimated - rough estimate that in a 3 mile radius of Universal Mfg. 1000 single use private wells.

Conversation with Jake Sellick
WDOE
7/84

out there in 1980
1981 - 1982 - quite a few changes - at back of facility is
wooded area - no fence
- confining obstruction along N end
- at S. end - another Univ. Metal Plating now
different ownership -
- no protected areas - no separated areas
whole back area paved - + WWTU in - numerous
treatment stds - marginal -
volumes small enough - they were small fry

Fire - major - totally wiped 1980
- maybe involved cyanide ~~facility~~ line
- destroyed most of plating shop
- fire - plating line left on - + static electricity
built up - sparks started fire -
Method of finding out what was in drum was
