RE: 2014 Annual Export Report
Clean Harbors of Connecticut
51 Broderick Road
Bristol, CT 06010
EPA ID # CTD000604488

Via FedEx

To whom it may concern:

In accordance with 40 CFR 262.56, Annual reports for Exports of Hazardous Waste, please find enclosed the Annual Export Report for Clean Harbors of Connecticut (CHCT). The report details exports of hazardous waste made during the calendar year 2014

Please be advised that CHCT did not export any SLABS (spent lead acid batteries) in 2014.

If you have any questions or concerns regarding this report please do not hesitate to contact me at (781) 792-5174 or via email at medinad@cleanharbors.com.

"I certify under penalty of law that this document and all attachments were prepared under my supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Sincerely,
Clean Harbors of Connecticut Inc.

David S. Medina

WASTE MINIMIZATION PLAN

Clean Harbors of Connecticut, Inc.
51 Broderick Road
Bristol, CT 06010

Clean Harbors of Connecticut, Inc. (CHCT) is a hazardous waste treatment storage and disposal facility Licensed under 22a-454-CGS of the Connecticut hazardous waste regulations (Part B Permit DEP/HWM-017-004). Pursuant to section 3005(h) of the Hazardous and Solid Waste Amendments of 1984 (HSW A), CHCT has developed and maintains this Waste Minimization Plan.

Waste minimization is defined by the U.S. EPA as the reduction, to the extent feasible, of hazardous waste that is generated or subsequently treated, stored or disposed, and includes both source reduction and recycling. Source reduction is defined as the reduction or elimination of waste generation at the source, usually within a process. Recycling refers to 1) the use or re-use of a waste as an effective substitute for a commercial product, or an ingredient or feedstock in an industrial process, and 2) reclamation, which is defined as the recovery or regeneration of a useable product from the processing of hazardous waste.

In its Interim Final guidance of the Elements of a Waste Minimization Program published in the Federal Register on May 28,1993 (FR vol. 58, No. 102, Page 31114), EPA outlined six basic elements it should be incorporated into a successful waste minimization program.

The six elements EPA has proposed include: 1) Top management support; 2) Characterization of waste generation and waste management costs; 3) periodic waste minimization assessments; 4) appropriate cost allocation; 5) encouragement of technology transfer; 6) program implementation and evaluation.

In particular, this facility is permitted for the solidification of generated waste streams to stabilize mobility of toxic constituents. It also maintains a permitted "Paint Processing Area" located within the Process (Operations) Building, which serves to sort and manage containers of paint by type (either latex paint (water-based) or alkyd paint (oil-based)); repackaging paints wastes (either latex paint (water-based) or alkyd paint (oil-based)) in containers or bins for storage and/or off-site shipment to an end-of-life management (treatment, recycling, energy recovery, or disposal) facility, in accordance with the requirements and provisions of the Paint-Care Program.

CHCT is dedicated to the reduction and elimination of waste wherever economically practicable. CHCT adopts and implements this Waste Minimization Plan, which has been developed pursuant to the EPA's Interim final guidance.
