Handling and Storage

- DO NOT USE IN POORLY VENTILATED OR CONFINED SPACES.

Keep drum tightly closed when not in use.

Steps to be Taken in Case Material is Released or Spilled: Immediately evacuate area and provide maximum ventilation. Only personnel equipped with proper respiratory and skin/eye protection should be allowed in area. Collect spilled material on sawdust or vermiculite and sweep into closed containers for disposal. Then flush area with plenty of water and maintain ventilation until vapors are eliminated.

This material or its vapors in contact with flames, hot glowing surfaces or electric arcs may form toxic and corrosive acid fumes.

Solvent vapors **heavier than air** will collect in low areas.

Do not store in open or unlabeled or mislabeled containers.

Do not store degreaser clean out sludge in tightly sealed containers.

Sludge containing finely divided aluminum residues should be stored out of doors away from combustible materials.

Waste Disposal Method: Spent Halogenated Solvents are classified as a Hazardous Waste by RCRA and must be disposed of in full accordance with all applicable Federal, State and Local Regulations.

Hazardous Waste Number: F001

Waste Solvent should be sent to either a licensed waste recycling facility for recovery of the solvent or a licensed disposal site for appropriate disposal.

[illegible] should be limited to trained personnel and interpretation [illegible] is the responsibility of the user.

FOR INDUSTRIAL USE ONLY — STORE IN COOL DRY AREA
