Subject: East Liverpool Community Meeting public materials

Hi Will, Stan, George and Tim,

The East Liverpool Community Meeting for the Region 5 RARE epidemiologic health study of air manganese exposure in adults is now scheduled for July 11, 2013. It has been suggested that you four would be good reviewers of the fact sheet and slide presentation before I proceed moving these materials through Management review. Because we are on a tight timeline for the July meeting, I am asking if it would be possible to review both the slides and fact sheet by next Wednesday, May 8th?

The slides include notes from the presenters which you may want to examine also. Please note, these are the materials that will be presented to the public. These are draft documents. Please do not distribute, cite or quote. I am also including as an FYI the Q&A that Ohio Department of Health will be bringing to the meeting. This is an Ohio Department of Health Document, not EPA, so we will not be able to edit this document. I just wanted you aware of this, since it will be distributed at the meeting.

Thank you all for your time,

Danelle
