Mike and others:

Dave Galt called me this morning re-confirming the date and time of Wednesday's meeting (meeting with industry). He said on the phone that the data we are asking for is a "no go", but that they would try and help as much as possible in other ways. Not sure what this means, but if true, then the EPA Guidance on Private Firms is somewhat out the window as it is data driven. I will prepare a sheet of other options we are looking at. To a good meeting on Wednesday...
