I'm assuming that these will be draft permits (i.e., these will be permits sent to us at or prior to the time of the public notice). If my assumption is correct, then under our MOA with Ohio our formal review period does not start until they send us the permits that they intend to issue following the close of the public comment period.

Fyi Gary

Comes out to 29 permits by 4-25-14 and 36 total by July 2014

You will see Bennoc and Rosebud permits in that 1st group

Marcus / Scott – OEPA informed us that we will be seeing around 20 coal permits in the next 30 days. Attached is a list. I am reminded that R4 objected to a large number of permits a couple of years ago, I hope we are not in that situation here. We will try to surface the most significant as early as possible but will likely be on the clock for our review.

Kevin

This is the list we are working off (second tab). We have had a few modifications, but this provides a good overall roadmap.

Dan/Eric …please work with Kevin to give the Region the necessary information with as much advanced notice as possible.

Brian

Subject: Upcoming permit submittals

Brian / Paul – I understand that you anticipate approx 20 coal permits coming to us in the next 30 days or so. I would appreciate if you could send a listing of those permits that includes if they are new dischargers or reisuance. I would also ask that OEPA submit the complete package for each permit electronically to R5NPDES@epa.gov. To eliminate confusion these should be submitted individually, one permit package in each e-mail.

I also ask that you send these to us in advance of public notice if possible.

If you have any questions feel free to call me. thanks
