Piney_Creek.xls

Krista

Attached is the upstream and downstream data from Piney Creek. We do have chemistry data for both sites from 2009, 2012, and 2013. Also attached is the sediment bedload power point from Perkins Run coming into Captina Creek.

I was looking at the permit for Southern Ohio Coal and the outside mixing zone average permit limit for TDS is listed as a monthly average.

I'll be in the field but should be around tomorrow (Wed) after 3:00 and also in on Friday. Let me know if you have any questions.

Kelly
