Subject:	CWA Permit Draft Review
Date:	Thursday, April 17, 2014 5:13:26 PM
Importance:	High

Erica,

This is a follow up to our recent conversation regarding EPA review of the draft permit. Please be reminded that NYSDEC is required to submit the permit for EPA review and approval prior to Public Notice. Specifically, EPA is entitled to a 90 day review period prior to the Notice. In lieu of the fact that the permit is to be issued July 1, 2014 NYSDEC's time period of submittal has already past. Therefore, the draft permit should be submitted to EPA asap so that we may begin the review process. In spite of the late submittal EPA will try to expedite the process so that this permit may be issued in a timely manner since the current permit has been administratively extended for the entire previous renewal period.

EPA would appreciate NYSDECs cooperation in this matter to ensure an effective CAFO program.

Andrea
