Waste Reduction

As required in 40 CFR 262.56(a)(5) and 40 CFR 262.87(a)(5), Except for hazardous waste produced by exporters of greater than 100 kg but less than 1000 kg in a calendar month, unless provided pursuant to §262.41 [biennial report], when submitting in even numbered years:

(i) A description of the efforts undertaken during the year to reduce the volume and toxicity of waste generated:	EEI is a commercial TSDF with industrial classification NAICS code 562211. The amount of waste generated by EEI is directly related to the amount and type of wastes received by EEI from offsite. The opportunity for waste minimization is therefore limited, depending on these factors. EEI is constantly evaluating all areas of the operations for pollution prevention opportunities and have implemented many procedures to reduce the amount of waste generated. During the past year the most significant waste minimization change we made was to recycle the plastic containers that contained waste consumer products shipped to EEI for treatment. This containers were going to a solid waste landfill.
(ii) A description of the changes in volume and toxicity of waste actually achieved during the year in comparison to previous years to the extent such information is available for years prior to 1984:	Changes in volume of toxicity of wastes actually received were comparable to previous years.
