Re: FOI RIN - 2891-87

SDMS DocID 538448

Dear Mr. Smith,

Thank you for your letter of Aug 19th. It answered some of my questions but raises others.

I would like to know exactly what contaminants were detected in wells. I would also like to know where these monitoring wells are located. I live across the road from K. J. Quinn and am concerned about my drinking water. As we also have a brook running behind the house that my son plays near, I am concerned about that water also. Is there any possibility that these "contaminants" could be either in our drinking water or the brook?

Thank you for your assistance.
