Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.

Notes:

- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:
- The reported result may be a coelution of 3-Methylphenol and/or 4-Methylphenol.
B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).
B - Compound is found in the associated blank as well as in the sample (Organics).
D - Result was obtained from the analysis of a dilution.
E - This flag identifies compounds whose concentrations exceed the calibration range of the GC/MS instrument.
J - Estimated concentration.
NJ - Tentatively identified compound, estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).

B - Compound is found in the associated blank as well as in the sample (Organics).

J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).

B - Compound is found in the associated blank as well as in the sample (Organics).

J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).

B - Compound is found in the associated blank as well as in the sample (Organics).

J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).

B - Compound is found in the associated blank as well as in the sample (Organics).

J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).

B - Compound is found in the associated blank as well as in the sample (Organics).

J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.
- - Not applicable.

Notes:

B - Value is real, but above instrument detection limit and below contract-required detection limit (Inorganics).

B - Compound is found in the associated blank as well as in the sample (Organics).

J - Estimated concentration.
P - Indicates there is a greater than 25% difference for detected concentrations between two GC columns. The lower of the two values is reported.
R - Rejected.
U - Non-detect at associated value.
UJ - Not detected; associated reporting limit is estimated.

Notes:

< - Less than reported value.
B - Estimated concentration (Inorganics).
B - Compound was found in the blank and sample (Organics).
D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description
- - Not applicable.

Notes:

< - Less than reported value.
B - Estimated concentration (Inorganics).
B - Compound was found in the blank and sample (Organics).
D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description

Notes:

< - Less than reported value.
B - Estimated concentration (Inorganics).
B - Compound was found in the blank and sample (Organics).
D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description

Notes:

< - Less than reported value.
B - Estimated concentration (Inorganics).
B - Compound was found in the blank and sample (Organics).
D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description
- - Not applicable.

D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description

Notes:

< - Less than reported value.
B - Estimated concentration (Inorganics).
B - Compound was found in the blank and sample (Organics).
D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description
- - Not applicable.

Notes:

< - Less than reported value.
B - Estimated concentration (Inorganics).
B - Compound was found in the blank and sample (Organics).
D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description
- - Not applicable.

E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description

Notes:

< - Less than reported value.
B - Estimated concentration (Inorganics).
B - Compound was found in the blank and sample (Organics).
D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description

Notes:

< - Less than reported value.
B - Estimated concentration (Inorganics).
B - Compound was found in the blank and sample (Organics).
D - Compounds at secondary dilution factor.
E - Estimated because of the presence of interference (Inorganics).
E - Exceed calibration range of GC/MS instrument (Organics).
J - Estimated concentration.
ND - Not detected.
NJ - Tentatively identified compound, estimated concentration.
P - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
R - Rejected.
U - Not detected at the associated reporting limit.
UJ - Not detected; associated reporting limit is estimated.
W - Unknown description
X - Unknown description
