Jody/Cindy,

OK, send me the newer version and I'll get rid of the one you sent me. I thought the metrics developed from the registry data where really interesting. Especially the one showing that over half the wells were less than 1TPY. I wonder if other oil and gas areas are similar (DJ or UGRB) or if tighter regulation have lead to shut in on the low producing wells.

Also, the SONGNEX results from this past spring should shed more light on the high top down leakage rates that the producers were discrediting. I know that Joost de Gouw is putting on a results workshop in Boulder on Oct 20th.

Yes, can't wait for the White Rim. The weather should cool down some and be perfect riding. Your 6-day trip sounds perfect - you need a couple of days just to transition into desert mode.

Brock

Hi Brock,

I heard from Cindy that she made a last minute change to her presentation. I don't have that version, so I'm cc:' ing her so she can send that to you. We will release that version to any of the operators who asked for it today, and a couple people did.

Have a great ride on the White Rim trail. I'll be riding in the Maze District for six days next week, can't wait. We should both have great weather!

Jody

Here is Cindy's presentation. We are not offering this as a handout, because the analysis is preliminary.

Kim -

Just got your voicemail. Here is latest version of presentation.

I will call you.
