Thanks Carl. I'll check in with Deb on who will lead the discussion – Shaun should be back by the 9th so he may want to lead this. I've included a couple of comments on the briefing paper.

Ex. 5 - Deliberative Process

I'll let you know what I hear from Deb on who will lead – then we'll need to get an invite out as this is not on anyone's calendar.

Thanks

D

Darcy

Dee and I were thinking that for the next consultation call we would give a quick overview of the FIP using the paper (attached and slightly updated) from the last call. This would refresh the memories of the Council members and legal counsel that were on the previous calls and give the other Council members enough information to respond to the question we posed at the end of the last call and which we intend to pose again:

- Based on this information, is there additional information the Tribe would like to share or concerns that Tribe would like to raise regarding EPA proceeding to propose the reservation specific FIP sometime in the early Spring? We will continue to consult with the Tribe, as requested, during the public comment process or prior to finalizing the rulemaking.

We did have a suggestion to make this statement a little more direct, i.e., is there additional information the Tribe would like to share or concerns that Tribe would like to raise as EPA proceeds to propose the reservation specific FIP sometime in the early Spring?

We also think that we could provide a quick air quality update to convey the same info we had in this week's 2016 ozone hot issue.

We don't think that a technical presentation from Cindy is needed, but if Cindy has a few points she would like to make that would be fine.

I see that Alfreda has me as leading the discussion, but I think that for consultation Deb (or you) should also participate.

Hmmm. So, it appears we are on for a telephone conference call for the U&O consultation next week. What do we need to cover in addition to what you covered in the last consultation? There had been some talk of having Cindy do a technical presentation for the tribe, but if we aren't there I don't think it makes sense. What are your thoughts?

Thanks
D

The call is on Tuesday, Feb. 9th at 10AM. Per the previous consultations, Carl will lead the call.

As for the Tribal resolution, I have not heard a thing. If the Tribe chooses to put its desires into a resolution, I was told EPA will get a copy. The resolution is for the Tribe's process, not our's.
